Semi-annual fund report from 1 August 2015 to 31 January 2016

Raiffeisen European SmallCap is an equity fund. Its investment goal is long-term capital growth subject to higher risks. It mainly invests (at least 51 % of its fund assets) in equities or equity-equivalent securities issued by small cap companies which have a market capitalization (price (market price) multiplied by a company's total number of issued shares) of up to EUR 5 billion and which are headquartered or mainly active in Europe. The fund may also invest in other securities, in bonds and money market instruments issued by sovereigns, companies or supranational issuers etc., in units in investment funds and in sight deposits and deposits at notice. The fund is actively managed and is not limited by means of a benchmark.

** On 24 August 2015, merged with ISIN savings fund income-retaining AT0000639026.

Legal notice

The software used performs calculations on the basis of more than the two decimal places displayed. Minor discrepancies cannot be ruled out due to further calculations using published results.

The value of a unit is calculated by dividing the entire value of the investment fund inclusive of its income by the number of units. The total value of the investment fund is calculated on the basis of the current market prices of the securities, money market instruments and subscription rights in the fund plus the value of the fund's financial investments, cash holdings, credit balances, receivables and other rights net of its payables. That value will be calculated by the custodian bank.

The net assets are calculated in accordance with the following principles:

- a) The value of assets quoted or traded on a stock exchange or other regulated market shall be determined, in principle, on the basis of the most recently available price.
- b) Where an asset is not quoted or traded on a stock market or another regulated market or where the price for an asset quoted or traded on a stock market or another regulated market does not appropriately reflect its actual market value, the prices provided by reliable data providers or, alternatively, market prices for equivalent securities or other recognized market valuation methods shall be used.

Raiffeisen KAG uses the method developed by OeKB (Österreichische Kontrollbank AG) to calculate the fund's performance, on the basis of data provided by the custodian bank (where payment of the redemption price is suspended, using indicative values). Some costs – the subscription fee (not exceeding 5.00 % of the invested amount) and any redemption fee (not exceeding 0.00 % of the sold amount) – are not included in the performance calculation. Depending on their concrete value, they will reduce a performance accordingly. Past results do not permit any reliable inferences as to the future performance of the fund.

Dear unitholder,

Raiffeisen Kapitalanlage-Gesellschaft m.b.H. is pleased to present its semi-annual fund report for Raiffeisen European SmallCap for the period from 1 August 2015 to 31 January 2016.

Fund investment policy report

The past six months were a volatile phase on the stock markets, and the fund underwent a correction of 6 %. The market suffered a loss slightly in excess of 8 %. Market sentiment was dampened by the increasing uncertainty over global growth. Growth rates in China declined slightly, and the economic outlook became more conservative worldwide. In this environment, European small cap stocks performed significantly more robustly than the broad European market. From a regional point of view, Europe performed slightly more strongly than the emerging markets. The strong correction which commodities and energy stocks were subject to worldwide only had a limited impact on the universe of smaller European companies. The positive momentum which had been expected for European exporting companies failed to materialize due to Asia's weakness.

In the past six months, the fund benefited from three mergers and acquisitions: USG People, Wincor Nixdorf and Gamesa. The positions Grenkeleasing, Nemetschek, DFDS and Teleperformance provided positive contributions for the fund. From an industry point of view, the technology, financial and industrial sectors delivered the best results. Here, the fund's stockpicking delivered clearly positive results in overall terms. German real estate stocks and some automobile industry suppliers were also outperformers. The fund's positions Delta Lloyd, Aareal Bank, Immofinanz and Virbac generated negative contributions. The fund's stockpicking was below-average in the healthcare, utilities and consumer sectors.
