Who are Janus Henderson Investors?

Janus Henderson Investors exists to help clients achieve their long-term financial goals.

Formed in 2017 from the merger between Janus Capital Group and Henderson Global Investors, we are committed to adding value through active management. For us, active is more than our investment approach – it is the way we translate ideas into action, how we communicate our views and the partnerships we build in order to create the best outcomes for clients.

We are proud to offer a highly diversified range of products, harnessing the intellectual capital of some of the industry's most innovative and formative thinkers. Our expertise encompasses the major asset classes, we have investment teams situated around the world and we serve intermediary, institutional and individual investors globally. As at 30 June 2017, we had approximately US\$344.9bn (€302.4bn) in assets under management, more than 2,000 employees and offices in 27 cities worldwide. Headquartered in London, we are an independent asset manager that is dual-listed on the New York Stock Exchange and the Australian Securities Exchange.

At Janus Henderson, we believe in the sharing of expert insight for better investment and business decisions. We call this ethos *Knowledge. Shared. Knowledge. Shared* is reflected both in how our investment teams interact and in our commitment to empowering clients in their decision-making. In our view, knowledge is powerful when it is shared.

Directors' Report

Introduction

Henderson Horizon Fund (the "Company") is an open-ended investment company incorporated in Luxembourg as a société d'investissement à capital variable (SICAV) on 30 May 1985 and is a recognised collective investment scheme for the purposes of Section 76 of the United Kingdom Financial Services Act 1986. Potential investors in the United Kingdom are advised that all, or most, of the protections afforded by the United Kingdom regulatory system will not apply to an investment in the Company and that compensation will not be available under the Financial Services Compensation Scheme.

The Company is an umbrella structure, comprising various funds. Each fund is operated as a distinct fund with its own portfolio of investments and specific investment objectives.

Financial Statements

A copy of the latest Annual and Interim Report may be obtained upon request from either the offices of the companies registered as distributors or from the Registered Office of the Company. Alternatively, please go to **www.janushenderson.com**.

Activities during the year

The Company followed the normal activities of an open-ended investment company. The Investment Manager's Report that follows gives a general market review.

On 30 May 2017 Henderson Group plc and Janus Capital Group merged to form Janus Henderson Group plc.

The Net Assets at 30 June 2017 amounted to USD 17.08 billion.

At the year end, the Company consisted of 26 active funds.

Fund Changes

- Details of share class launches and closures can be found on pages 219 and 220.
- World Select Fund closed 31 March 2017.
- Core Credit fund class IR shares was renamed class Y shares as from 2 May 2017.
- Asian Growth Fund changed its benchmark from MSCI AC Asia ex Japan Index to MSCI AC Asia Pacific ex Japan Index from 2 May 2017.
- Henderson Global Investors (North America) Inc. was appointed sub-Investment Manager of Global Property Equities Fund on 2 May

The Directors may from time to time close funds as well as add further funds with different investment objectives, subject to the approval of the Commission de Surveillance du Secteur Financier ("CSSF"). Notifications will be provided to shareholders on closure of a fund, which are also subject to review by the CSSF.

Corporate Governance Statement

The Board adheres to the Association of the Luxembourg Fund Industry ("ALFI") code of conduct for Luxembourg investment funds. The code of conduct sets a framework of high-level principles and best practice recommendations for the governance of Luxembourg investment funds.

On behalf of the Henderson Horizon Fund Board, I would like to thank you for your continued support.

lain Clark Chairman 27 September 2017

Market review

For the year from 1 July 2016 to 30 June 2017

Overview

Global equity markets rose over the 12 months to 30 June (MSCI World Index +18.8% total return in US Dollars). Politics were strongly in focus over the period, which began and ended within days of major votes in the UK – firstly, on whether to leave the European Union (EU), and latterly, on which party would be in charge during the negotiations with the EU that followed the decision to 'leave'. November saw Donald Trump elected as US president, with Continental Europe seeing a number of elections that produced market-friendly results.

Europe

European equities advanced (FTSE World Europe ex UK Index +22.7% total return in Euro terms) during a busy 12 months that saw a number of elections. With euro-sceptic candidates polling strongly, investors were initially nervous about the eurozone's future. The votes generally returned favourable results for the single-currency bloc, however, and France's election of Emmanuel Macron sent the Euro to a 2017 high against the US Dollar. Broad economic data in the eurozone was a source for optimism, with gross domestic product (GDP) exceeding expectations to advance 0.6% in the first quarter and inflation rising. The European Central Bank (ECB) extended the length of its bond-buying programme (albeit at a lower rate of purchases per month).

UK

In the UK, the broad FTSE All-Share Index rose over the 12 months (+18.1% total return in Sterling terms). Domestic equities ultimately weathered the Brexit storm well and moved higher, helped initially by the swift appointment of Theresa May as prime minister after David Cameron's resignation. Given fears that the UK might slip into recession following the vote to leave the EU, the Bank of England (BoE) acted to ease the pressure on the economy, cutting its benchmark interest rate to 0.25%. In an effort to shore up parliamentary support ahead of Brexit (exiting the EU) negotiations, May called a snap general election – a gamble that failed to pay off, as the UK awoke to a hung parliament on 9 June. In economic news, the UK unemployment rate fell and inflation moved higher.

US

US equity markets advanced over the review period (S&P 500 Index +17.9% in total return US Dollar terms). November's presidential election resulted in a surprise win for Donald Trump, pushing US stocks higher for the remainder of the year. In December, the Federal Reserve (Fed) raised the target range for the federal funds rate by 25 basis points, as was widely expected. Optimism in equity markets became slightly more subdued as the period progressed, dampened by fading hopes for US fiscal stimulus (tax cuts and government spending) and a deceleration in economic data. GDP growth slowed from the fourth quarter of 2016 to the first quarter of 2017, and the Dollar slid against the pound. The Fed followed through on guidance for more rate hikes in 2017: they lifted benchmark interest rates by 25 basis points in both March and June.

Japan

Japanese equities advanced by 32.2% in total return Yen terms (Topix Index). The Bank of Japan (BoJ) made adjustments to its stimulus package, and a sharper focus on controlling Japan's bond yield curve was initiated in September. While growth for the January-March quarter missed expectations, the figure of 0.3% marked the fifth consecutive quarter of advancement. The final weeks of the period showed some regression, including a widening trade deficit, but nevertheless, the BoJ expressed a positive outlook considering recent domestic spending and economic advancement in other developed economies.

Asia

The Chinese economy demonstrated signs of stabilising over the 12 months: annualised GDP growth reached 6.9% in the first quarter, and the IMF upgraded its projection for the country's 2017 growth to 6.6%. However, Moody's (credit rating agency) downgraded China's credit rating by one notch, citing an increasing reliance on debt-fuelled growth. India saw equities climb on optimism regarding Narendra Modi's government reforms, with the rupee moving steadily higher versus the US Dollar from February. South Korea recorded largely positive data in a year that saw its president impeached and jailed. The MSCI AC Asia Pacific ex Japan Index returned 25.3% in US Dollar total return terms over the review period.

Emerging markets

Emerging markets had a positive run (MSCI Emerging Markets Index +24.2% in US Dollar total return terms), buoyed by a steadier Chinese economy and uncertainty in the UK and Europe that sent investors searching for opportunities elsewhere. Regional central banks had an active year: Brazil and Russia eased, while Mexico increased rates multiple times. The Brazilian stock market, a big winner in 2016, pared back gains somewhat as the oil price floundered and President Michel Temer was formally charged with corruption.

Fixed income and commodities

Within fixed income, yields on core government bond markets (those of the US, UK and Germany) rose (yields move inversely to prices). Of these, bunds had the bumpiest ride, rising and falling in anticipation of various elections across Europe. Gilt yields also followed a political path, falling on the announcement of June's general election and around the event itself. Corporate bond markets were boosted in August, when it was announced that the BoE's enlarged stimulus package would include the purchase of £10bn of corporate debt. The JPM Global Government Bond Index fell 4.4% in Dollar terms and the Barclays Global Aggregate Corporate Bond Index returned -1.9% in US Dollars over the period.

Commodity markets ended the period down. The price of Brent Crude slipped by approximately US\$2 per barrel over the 12 months, a slight fall that belied swings in the price cause by news of OPEC production cuts and fears over increased US oil production. Gold fell as investors grew more confident about the prospects for riskier investments amid generally positive economic data in the developed world.

Investment report for the year from 1 July 2016 to 30 June 2017

Investment Fund Managers

James Briggs

Over the year under review, the fund returned 0.5% in US Dollar terms.

Global corporate bonds produced a positive total return over the review period, although a rise in government bond yields detracted from performance.

The first quarter of the year under review produced positive total returns. Credit spreads tightened in July and August as the market recovered from the UK's vote to leave the European Union. The rally gained momentum with the Bank of England's (BoE's) announcement that it would join the European Central Bank (ECB) in buying corporate bonds. Total returns were negative towards the end of 2016 despite positive excess credit returns as global government bonds sold off, particularly following Donald Trump's victory in the US presidential elections in November. December saw the US Federal Reserve (Fed) hike interest rates by 25 basis points. In Europe, the ECB announced it would be reducing the size of its monthly bond purchases from €80bn to €60bn but extending the programme by nine months, to the end of 2017.

Performance throughout the rest of the year was driven by continued corporate bond tightening, while macroeconomic themes remained prevalent. Donald Trump was inaugurated as US president, and in Europe, Dutch prime minister Mark Rutte fended off populist politician Geert Wilders in Holland's general election. In the UK, the government officially triggered Article 50. In April, credit spreads tightened sharply in the run-up to and after the first round of the French presidential election, with Emmanuel Macron seen as highly likely to win the second round in May. Elsewhere in the world, Donald Trump fired FBI director James Comey, and in the UK, headlines were dominated by the calling of a snap general election in June, which resulted in a hung parliament. June also saw a third interest rate hike by the US Fed (the bank also increased in March), which was anticipated and therefore ignored by markets. Later in the month, there was a sharp sell-off in interest rates following hawkish central bank rhetoric from Mario Draghi.

The fund produced a positive total return over the year, with lower-rated investment grade holdings outperforming their higher-rated counterparts. At the sector level, the consumer non-cyclical sector was the standout performer, with positions in pharmaceutical companies Pfizer and Merck and brewer Anheuser-Busch InBev the largest contributors. All three of these holdings were trimmed throughout the course of the year. Other notable contributors included Amgen (biotechnology), Berkshire Hathaway (insurance) and Verizon (telecommunications), the latter being the portfolio's largest positive contributor to returns.

The portfolio participated in five new issues during the year, including deals from Microsoft, Henkel, Unilever, Verizon and AT&T. We also increased or initiated a number of positions in the secondary market. Positions pared during the year under review included healthcare companies Pfizer, Amgen and GlaxoSmithKline, among others, and we exited our holding in Norwegian oil company Statoil.

The market reaction to comments from central bankers towards the end of June suggests that sentiment may be more fragile than we have experienced recently. Volatility (sharper fluctuations in price) in interest rates, currency and commodity markets, together with a deterioration in the quality of recent new issuance, suggests that the risk of a correction in the credit markets in the near term has become less remote.

We have for some time believed that the supressed levels of volatility witnessed across capital markets are unlikely to persist in the face of declining central bank balance sheets. Recent weakness in commodity markets is unlikely to cause a material uptick in default rates but is suggestive of a less certain economic environment. In addition, we continue to see companies taking advantage of the low yield environment to increase the amount and extend the maturity of their debt profiles. While we do not view current valuations as excessive in this context, we do believe that markets are asymmetrically skewed to the downside. We will continue to rotate into higher quality credit with a view to benefiting from more attractive valuations later in the year.

Investment report for the year from 1 July 2016 to 30 June 2017

Investment Fund Managers

Steve Drew

The fund returned 6.6% in US Dollar terms, slightly underperforming the JP Morgan Corporate Emerging Market Bond Index, which returned 6.8% in US Dollar terms.

Emerging market corporate bonds produced a strong positive total return over the financial year. The period started strongly, with July and August staging a strong relief rally, as the fallout from the UK's referendum vote to leave the European Union (EU) proved to be less immediate than some had feared and concerns over the Turkish coup in June faded quickly. Performance weakened slightly in September as rate concerns re-emerged, although returns were still positive. The slightly less dovish language from central bank meetings at the Bank of Japan and US Federal Reserve (Fed) was enough to give the market reason to pause for thought at least for the first half of September.

Performance in the last quarter of 2016 was mixed: October's was flat, November's weak and December's stronger again. It was developed market macroeconomic and monetary policy events (specifically, the US presidential election in November and the Fed's rate hike in December) that drove emerging market returns, rather than events with the emerging markets themselves.

Emerging market corporate bonds delivered a strong positive return during the remainder of the year, driven by a continued rally in risk assets and strong inflows into emerging market fixed income funds. In emerging market corporates, high yield continued to outperform investment grade names as the grab for yield among investors remained solid.

In the beginning of 2017, the market rallied in response to events in the developed market macroeconomic and monetary policy world, rather than any specific emerging market events. But in the last three months of the financial year, we saw a re-emergence of geopolitical risk in Latin America. Brazilian president Michel Temer was implicated in the Operation Weak Flesh corruption scandal in May, and prosecutors charged him with corruption and obstruction of justice towards the end of June. But it was the hawkish rhetoric from central banks towards the end of June (both from Mario Draghi at the European Central Bank and from the US Fed) that drove government bond yields higher and eased off the reach for yield that has driven returns thus far in 2017.

Positive performance came from the fund's positioning in Latin America, with holdings in Mexico and Argentina both performing strongly. In Mexico, positions in Funo (real estate) and Pemex (oil and gas) added to performance, while in Argentina, holdings in the provinces (Neuquen, Mendoza and Cordoba) were the best performers. The fund's sovereign holdings also performed well.

Positioning in Brazil, in particular a holding in steelmaker CSN Resources (which we exited in May of this year), detracted from performance. Fund performance also suffered from underweights to Brazilian mining company Vale and oil company Petrobras.

Emerging market corporates have delivered a good performance so far in 2017 despite a pickup in emerging market currency and sovereign volatility (denoting sharper fluctuations in price) in June. We remain market weight in Asia, Latin America, and Central and Eastern Europe, the Middle East and Africa. Conviction among our peer group (still) remains low, demonstrated by the relative lack of dispersion in returns. We have reduced our duration (interest rate sensitivity) from overweight to market weight. We believe markets have not priced in the Fed's proposed balance sheet reduction and still expect unconditional support from central banks. Recent developed market spikes in yields could be a precursor to further volatility. Consequently, we expect a volatile but weakening Treasury market in the third quarter and a range-bound but strengthening US Dollar. Geopolitical risk is rising in Latin America (Brazil, Argentina) and in the Middle East (Qatar). Our short term outlook is cautious. Yield buyers still seem to be finding the overall market attractive, but flows have slowed.

Investment report for the year from 1 July 2016 to 30 June 2017

Investment Fund Managers

Stephen Thariyan, Tim Winstone and Tom Ross

Effective 1 February 2017 Tim Winstone also manages the fund

The fund returned 2.3% over the year, outperforming the iBoxx Euro Corporates Index return of 1.2% in Euro terms.

Euro investment grade markets delivered a positive total return over the review period. The year started positively, but returns weakened in September as investor sentiment deteriorated on the back of heightened concerns over key meetings from the Bank of Japan and the US Federal Reserve (Fed). Total returns in October and November were also negative. In October, movements in European government bonds detracted from performance as positive European economic data and concern over the prospect of European Central Bank (ECB) tapering (a reduction in stimulus measures) caused investors to move out of the asset class. In November, demand for European investment grade credit declined amid increased volatility (sharper fluctuations in price) on Donald Trump's presidential election victory.

Market sentiment picked up in December, with positive total and excess credit returns posted in the month. December saw the ECB announce a €20bn reduction in asset purchases to €60bn a month from April 2017, but an extension to the purchasing programme to December 2017. Additionally, Italians voted against constitutional reforms in the referendum, the Italian prime minister resigned and the US Fed delivered its first interest rate rise since December 2015.

Despite positive excess credit returns, January and March posted negative total returns as investors moved out of German government bonds. Total returns in February, however, were positive, driven by a rally in European government bonds. March was notably busy, with Dutch prime minister Mark Rutte fending off populist politician Geert Wilders in Holland's general election, the Fed delivering a 25-basis-point rise in interest rates and the UK formally triggering Article 50 of the Lisbon Treaty (which marked the official commencement of EU exit negotiations).

In April, credit spreads tightened sharply on and after the first round of the French presidential election, with Emmanuel Macron and Marine Le Pen progressing to the second round in May. There was plenty of political news elsewhere in the world too, as Donald Trump fired FBI director James Comey. While in the UK, headlines were dominated by the calling of a snap general election in June, which resulted in a hung parliament. Credit spreads also tightened in June, although a sharp sell-off in interest rates towards the end of June following hawkish rhetoric from ECB president Mario Draghi caused negative total returns.

Positive performance came from overweight positions to rising stars UK grocery and general merchandise retailer Tesco and Italian aerospace and defence company Leonardo. Further positive performance came from an overweight position to French government bonds. Spreads between French and German government bonds continued the trend started towards the end of April of 2017 and narrowed further during May as French risk premia normalised following the French presidential elections. We used the strength in the market to unwind this position in June. The fund also benefited from overweight holdings in the real estate (Aroundtown) and basic materials (Glencore) sectors.

The greatest negative performance came from overweight positioning in AAA-rated German bunds. An underweight to Lufthansa via credit default swaps also detracted from performance, although we closed this position in the last quarter of the year under review. An underweight to Ford and an overweight to Petroleos Mexicanos further hurt performance.

On a fundamental basis, European investment grade credit continues to be in relatively robust condition, as default rates and corporate leverage remains low, while European economic data is firm. Flows into the asset class were positive in June, driven by buying from shorter maturity investment funds. However, valuations have become even more expensive, as European investment grade spreads closed June at 101 basis points (Bank of America Merrill Lynch Euro Corporate Index spread to worst versus government), 6 basis points tighter than where spreads began the month. Spreads are continuing to trade at the tighter end of levels seen so far in 2017, leaving us generally unexcited about the asset class. Yields available on European investment grade credit also remain low, which in this yield-hungry market will continue to constrain future investor demand for the asset class. We are positioned slightly long credit risk versus the benchmark, composed of an underweight to European investment grade credit and an overweight to off-benchmark positions.

Longer term, we continue to remain cautious and expect European investment grade total returns in 2017 to be unexciting. While the main political events of 2017 are behind us, risks including German and potentially Italian elections, Donald Trump delivering on his protectionist agenda and the UK's negotiations with the European Union exist, which could cause a deterioration in sentiment. The reduction in purchases by the ECB has so far been focused more on government than corporate bonds, which has continued to cause further tightening in European investment grade credit spreads. When and if the ECB announces further tapering of its stimulus programme, we envisage credit spreads will naturally move wider. With this in mind, we will remain focused on relative value and utilise our strong bottom-up credit selection capabilities and off-benchmark ability, as well as any periods of volatility which materialise, to make use of attractive opportunities.

Investment report for the year from 1 July 2016 to 30 June 2017

Investment Fund Managers

Stephen Thariyan, Thomas Hanson and Tom Ross

Effective 1 February Thomas Hanson also manages this fund

Over the year, the fund returned 10.1%, slightly underperforming the benchmark by 0.1% in Euro terms.

The European high yield market delivered a strong positive total return over the year. The financial year started strongly on the back of positive market sentiment and a supportive technical environment driven by inflows into the asset class and low supply. Sterling high yield also benefited in August from the Bank of England announcing a raft of measures designed to provide monetary stimulus to the UK economy, including a 25-basis-point reduction in the base interest rate (the first cut since 2009), and the intention to begin buying Sterling-denominated corporate bonds in September via the Corporate Bond Purchase Scheme. Total returns weakened in September as heightened concerns over potential action from the Bank of Japan and the US Federal Reserve (Fed) caused market sentiment to deteriorate.

Total returns in October were positive, driven by strong excess credit returns. November, however, saw performance weaken as risk sentiment reduced on the back of Donald Trump's presidential election victory. December, in contrast, was a strong month for performance, driven by investor demand for higher yielding bonds and European government bonds increasing Credit spreads tightened in January and February on the back of inflows into the asset class and subdued supply. This technical environment weakened in March, leading to a widening in credit spreads over the month. Movements in German government bonds also detracted from total returns.

In April, credit spreads tightened sharply on and after the first round of the French presidential election, with Emmanuel Macron and Marine Le Pen progressing to the second round in May. There was plenty of political news elsewhere in the world, too: Donald Trump fired FBI director James Comey, and in the UK, headlines were dominated by the calling of a snap general election, which resulted in a hung parliament. Credit spreads tightened further in June despite a sharp sell-off in interest rates towards the end of the month following hawkish rhetoric from European Central Bank president Mario Draghi. In June, the Fed delivered a third interest rate hike (the bank also increased rates in March), which was anticipated and therefore ignored by markets.

Positive performance in the second half of the year came from our full underweight to Croatian food retailer Agrokor. Bonds in the issuer declined sharply over 2017 in response to negative headlines and rumours surrounding the company's weak financial position and its impending restructuring. Further positive performance came from our overweight positioning in UK retailers Iceland and Tesco. An overweight position in bonds issued by German utility company RWE also added to performance as Sterling-denominated bonds we held in the issuer staged a sharp rally over July and August on the back of strong demand among investors.

Negative performance came from not owning Areva, as the company's bonds rallied in December on news the entity received offers for firm investments in NewCo. Negative performance also came from our overweight position in Grupo Isolux, which we completely exited in March. Bonds in the company suffered on the back of concerns over liquidity. Our underweight to emerging market issuers, including Petrobras, Gazprom and Russian Rail, also detracted, as emerging market credits produced strong returns over the year.

Given the back-up in European government bond yields over the June, the yield to worst of the Harmonised Index of Consumer Prices has increased marginally, to around 2.9%. While this represents an incremental improvement on recent levels, yields still remain near the all-time low point for the asset class. Credit spreads backed up a bit further in July, but remained close to recent cycle tights. Despite this significantly challenged valuation picture, there is actually much to be sanguine about in European high yield. The corporate fundamental picture remains supportive, with default rates low (and projected to stay so), interest cover high and leverage stable. The vast majority of supply that comes to the market is for refinancing purposes (as opposed to funding mergers and acquisitions or other re-leveraging events) and as a result, net supply is low. The technical picture has most definitely weakened over recent weeks, however, with fund flows turning sharply negative in the European high yield space. A further deterioration in this technical backdrop remains one of our chief concerns.

June saw interest rate volatility rise sharply, and given the rhetoric emanating from central banks globally, we envisage that this theme will come to dominate market attention as we move into the second half of the year. This, combined with the rich valuations in European high yield, leads us to continue to be cautious on the market. The fund is neutrally positioned at an overall level, with yield and duration times spread metrics broadly similar to that of the benchmark. We will continue to focus on idiosyncratic opportunities to drive returns.

Investment report for the year from 1 July 2016 to 30 June 2017

Investment Fund Managers

James Briggs

Over the year, the fund returned 2.7%, slightly underperforming the benchmark by 0.1% in US Dollar terms.

Global corporate bonds produced a positive total return over the financial year. Excess credit returns (versus government) added to performance, contributing more positively in the first half of the period than the second half.

The financial year started positively, with the first quarter producing positive total returns. Credit spreads tightened in July and August as the market recovered from the UK's vote to leave the European Union (EU). The rally gained momentum with the Bank of England's August announcement that it would join the European Central Bank (ECB) in buying corporate bonds. Total and excess credit returns were weaker in September, however, due to concerns over key meetings from the Bank of Japan and the US Federal Reserve (Fed).

Total returns were also negative in October and November, despite positive excess credit returns, as investors reduced their global government bond holdings. November in particular experienced a sharp sell-off following Donald Trump's victory in the US presidential election on 8 November. Total and excess credit returns were both positive in December. The month was particularly heavy with central bank activity, as the US Fed increased interest rates by 25 basis points and the ECB announced it would be reducing the size of its monthly bond purchases from €80bn to €60bn but extending the programme by nine months, to the end of 2017.

Global corporate bonds produced a positive total return overall in the remainder of the year despite marginally negative performance in March. Performance was driven by a combination of government bond movements and continued corporate bond spread tightening. Much like the first half of the year, macroeconomic themes continued to dominate. Donald Trump was inaugurated as US president and attempted (unsuccessfully) to close the US's borders to citizens of seven mainly Muslim countries. In Europe, Dutch prime minister Mark Rutte fended off populist politician Geert Wilders in Holland's general election, and in the UK, the government officially triggered Article 50 (which marked the official commencement of EU exit negotiations).

In April, credit spreads tightened sharply on and after the first round of the French presidential election given an increase in the likelihood that Emmanuel Macron would be successful in the second round in May. Elsewhere in the world, Donald Trump fired FBI director James Comey, and in the UK, headlines were dominated by the calling of a snap general election to take place in June, which resulted in a hung parliament. June saw a third interest rate hike by the US Fed (the bank also increased rates in March), which was anticipated and therefore ignored by markets. Later in the month, there was a sharp sell-off in interest rates following hawkish comments from ECB president Mario Draghi.

Despite being cautiously positioned into a strengthening market, our participation in the new issue and high yield markets and overweight to European credit following the French election mitigated the impact on performance. The fund benefited from security selection including overweight positions in German conglomerate Siemens and rising stars Tesco (a UK retailer) and Leonardo (an Italian aerospace and defence company). Selective positioning in financials also contributed to returns, with HSBC, Barclays, Raiffeisen Bank and Lloyds the standout performers. Although we maintained an underweight to the financial sector, the position became less pronounced over the course of the review period, and positioning was skewed towards higher yielding securities.

At an individual credit level, underweights to issuers including Standard Chartered, Ford and McDonald's detracted from performance. An overweight position in Anheuser-Busch InBev also hurt fund performance. At a sector level, our material underweight to the energy sector detracted from returns, as the oil price increased for the majority of the year only to start falling again in February of this year.

The market reaction to comments from central bankers towards the end of June suggests that sentiment may be more fragile than we have experienced in recent months. Volatility (sharper fluctuations in price) in interest rates, currency and commodity markets, together with a deterioration in the quality of recent new issuance, suggests that the risk of a correction in the credit markets in the near term has become less remote

We have for some time believed that the supressed levels of volatility witnessed across capital markets are unlikely to persist in the face of declining central bank balance sheets. Recent weakness in commodity markets is unlikely to cause a material uptick in default rates but is suggestive of a less certain economic environment. In addition, we continue to see companies taking advantage of the low yield environment to increase the amount and extend the maturity of their debt profiles. While we do not view current valuations as excessive in this context, we do believe that markets are asymmetrically skewed to the downside. We will continue to rotate into higher quality credit with a view to benefiting from more attractive valuations later in the year.

Investment report for the year from 1 July 2016 to 30 June 2017

Investment Fund Managers

Seth Meyer and Tom Ross

Over the year under review, the fund returned 14.1% and outperformed the benchmark index by 1.7% in US Dollar terms.

The global high yield market delivered a positive total return over the year, which began strongly, driven by demand for yield among investors and positive market sentiment. In September, US energy and overall high yield bonds benefited from a surge in crude oil prices on the back of a production cut agreement by the Organization of the Petroleum Exporting Countries (OPEC).

Excess credit returns were positive in October. In November, excess credit returns were also positive, buoyed by OPEC's decision to cut oil production for the first time in eight years. However, total returns were negative, as global government bonds sharply sold off following Donald Trump's victory in the US presidential election on 8 November. Total and excess credit returns were positive in December as continued upward movements in the oil price and positive sentiment resulting from Trump's victory benefited demand for high yielding bonds.

January and February delivered robust total and excess credit returns on the back of a strong demand for risk in the market and positive movements in government bonds. Conversely, total returns were negative in March, largely as a result of a sell-off in US and European government bonds in the run up to the Dutch elections and the Federal Reserve (Fed) meeting. Excess credit returns also detracted from performance.

In April, credit spreads tightened sharply on and after the first round of the French presidential election, with Emmanuel Macron and Marine Le Pen progressing to the second round. Credit spreads tightened further in May despite heavy political noise, including Donald Trump firing FBI director James Comey and news of a snap general election to take place in the UK in June. Credit spreads tightened further in June despite a sharp sell-off in interest rates towards the end of the month following hawkish central bank rhetoric, in particular from European Central Bank (ECB) president Mario Draghi. June also saw a third interest rate hike by the Federal Reserve, which was anticipated and therefore ignored by markets.

The fund benefited from strong performance in a position in senior and subordinated bonds issued by cargo handling firm WFS Global. We purchased subordinated bonds in the issuer during April, and these staged a strong rally on the back of the release of very strong fourth quarter 2016 numbers. The bonds continued to rally throughout May, and so we added senior bonds to the position. Positive contribution to performance also came from a position in debt collector Garfunkelux, where we were long bonds versus short credit default swaps (CDS). We initiated this trade in October 2016 but as the relationship between the bonds and CDS normalised, we unwound some of this position. Security selection also benefited fund performance, with overweights to a variety of names, including Zekelman Industries and Midcontinental Communications, all contributing to performance.

Negative performance came from our overweight position in Grupo Isolux (which we completely exited in March), as the company continued to be weighed down by concerns over liquidity. Underweights in emerging market names, including Petrobras and Petroleos Mexicanos, also detracted from performance over the year.

We marginally reduced risk over June and are currently positioned neutral to the benchmark. We remain overweight European and US high yield credit with an underweight position in emerging markets given that valuations are rich and because the asset class saw a noticeable weakening in sentiment over the month. We continue to participate selectively in primary markets and will utilise this selective approach looking ahead.

In the long term, however, we are cognizant that risks to the downside remain present, which could induce volatility (sharper fluctuations in price). Possibly the greatest threat remains the risk of global central bank easing, particularly from the ECB and the Fed. As was evidenced in June, any tightening of monetary policy could instigate a weakening in investor sentiment and negatively impact global credit spreads (the difference in the yield of corporate bonds over equivalent government bonds). Additional risks include further weakness in the oil price, which will particularly impact US high yield credit, and additional negative fund flows. Given this, we will continue to focus on using idiosyncratic risk and our strong bottom-up credit selection capabilities to drive returns.

Total Return Bond Fund

Investment report for the year from 1 July 2016 to 30 June 2017

Investment Fund Managers

Fixed Income Investment Strategy Group

The fund returned +3.4% in Euro terms over the year.

The strong performance of credit markets continued as risk appetite returned and global central banks ran relatively accommodative monetary policies. Early in the year, the Bank of Japan announced a policy of 'yield curve control', a commitment to targeting a yield of around 0% for the 10-year government bond, alongside negative short term interest rates, while the Bank of England (BoE) announced further quantitative easing (central bank liquidity measures) and a corporate bond purchase programme in August. Following the US election, developed market government bond yields rose, initially led by the US Treasury market, as investors started to price in the reflationary effects of Donald Trump's policies, combined with better than expected economic data. European government bonds followed suit in the second quarter of 2017 as yields rose following the market-friendly French election result and potential for the European Central Bank to further slow the pace of its asset purchases.

The fund delivered a return which compared favourably to investment grade bond markets, benefiting from positioning in corporate bonds, emerging markets and lower interest rate sensitivity (duration) than global bond markets.

In the second half of 2016, performance was boosted by holdings in Sterling corporate bonds and asset backed securities, which outperformed other regional equivalents following the BoE's easing announcements in the aftermath of the UK's vote to leave the European Union. We subsequently took partial profits and recycled the proceeds into other areas, including emerging market corporates. Holdings within the financial sector (particularly subordinated insurance debt) were also beneficial for performance as yield curves steepened.

The combination of demand for yield from institutional investors and a limited supply outlook continued to act as a tailwind for emerging market credit. In September, we increased our positioning in this sector to 20% of net asset value. This was rewarded by the strong performance of the asset class over the year, despite the weakness either side of the US election. Latin American issuers saw significant outperformance, with fund holdings in Latin America and BB/B high yield issuers the main drivers of returns. This portion of the portfolio is now defensively positioned following recent outperformance. At the end of the first quarter of 2017, we also sold our remaining holdings in euro-denominated investment grade corporate bonds on valuation grounds, though we retained positioning in European high yield corporate debt.

Within government markets, the contribution from inflation-linked Treasuries was positive, as inflation expectations continued to normalise following the US election. We subsequently switched the majority of this holding into fixed rate US Treasuries and added further to our US Treasury holdings in March 2017. We continue to hold government bonds in core markets for diversification purposes and to provide an offset during periods of credit market weakness.

Rates strategies added incrementally to returns over the 12 months. Within rates markets, positions expecting steeper yield curves (i.e. longer maturity bonds to underperform) in the US and eurozone added value. In addition, the fund benefited from positioning for US Treasuries to outperform UK government bond futures. Against this, positions expecting shorter maturity rates in the UK and Japan to fall detracted as the government bond sell off in the fourth quarter pushed yields higher across the yield curve. Currency positions were a small detractor over the year. The main drag came from positions that expected the Swedish krona to appreciate and anticipated a rebound in Sterling relative to the Euro in 2017.

At the end of the 12 months, we added a partial hedge to the portfolio using the European high yield credit derivative (iTraxx crossover) in order to provide some offset to any credit market weakness. Portfolio duration was also reduced to 3.8 years given the potential for further upward repricing of bond yields in response to global central bank policy.

We continue to invest selectively in higher yielding credit assets for income and high quality government bond markets for diversification, and will manage overall portfolio duration tactically.

Investment report for the year from 1 July 2016 to 30 June 2017

Investment Fund Managers

Michael Kerley and Sat Duhra

Despite uncertainty surrounding global growth, interest rates and politics, Asian markets continued to head higher, with the MSCI Asia Pacific ex Japan Index rising 25.0% in US Dollar terms. The fund returned 17.3% in US Dollar terms over the year underperforming the index.

Despite surprise election results in the US and UK, the rise of nationalism in Europe, and geopolitical spats in the Middle East and the South China Sea, Asian markets moved higher, driven by an impressive improvement in corporate earnings. At the end of June 2017, analyst expectations of 2017 earnings had received their 15th consecutive month of upgrades – the best performance since 2009. The year was also notable for marked swings in factor and style as the darlings of the previous year came under pressure; the expectation of stronger growth and higher interest rates prompted a switch from yield and defensiveness towards value and cyclicality. These swings were not supportive of the fund's income-focused mandate.

The best performing markets in Asia benefited from these market drivers. The more cyclical markets of Korea, China and Taiwan all outperformed the broader index, while the Association of Southeast Asian Nations (ASEAN) markets of Thailand, the Philippines, Indonesia and Malaysia all lagged. This performance was broadly a reflection of earnings expectations, which favoured northern Asia over the south, with Korean and Taiwanese technology receiving a large portion of these upgrades. The other notable area of strength was Chinese internet, which benefited from a significant re-rating (sector reassessment by the market) over the year with index heavyweights Tencent and Alibaba rising 58% and 77%, respectively. Although earnings improved in most areas, India was a notable disappointment as a weak economy and disruption from de-monetisation and the impending goods and services tax led to an earnings trend that is still negative.

The switch from yield and defensives towards value and cyclicality did not help the fund's relative performance over the year. The focus on high dividend yield in sectors such as telecommunications, utilities and property was not in favour in a market focused on cyclicality and value. The best performing sectors were technology and materials, while telecommunications posted a negative return. At the stock level, the portfolio benefited from the strong performance of KB Financial, Star Petroleum, Huayu Automotive, NetEase, HSBC, Samsung Electronics and Hon Hai Precision, which all rose by more than 40% but not strongly enough to offset the factor influences mentioned above.

Over the year, some new positions were added to the portfolio. In China, snack, pastry and drink company Dali Foods was acquired for its inexpensive valuation and exciting move into soya milk as a dairy alternative, while the strong growth of leisure and sportswear spending attracted us to sportswear company Anta Sports. We also added Chinese banks to the portfolio in early 2017 on expectations of improved asset quality in an improving economic environment. These purchases were funded by sales of Guangdong Investment and China Mobile. Elsewhere, we added Rio Tinto in Australia on expectations of lower capital expenditure, strong cash flow and a higher dividend. We initiated a position in Samsung Electronics due to the improving pricing in memory chips and OLED panels, together with the announcement of a more transparent dividend policy. Other notable transactions included the acquisition of Macau casino operator Melco Resorts and Chinese online car sales platform Autohome, while sales of AMP and ANZ in Australia, Kangwon Land in Korea and Bharti Infratel in India were used to fund such activity.

We remain cautiously optimistic on the outlook for the Asia Pacific region, as valuations remain attractive and earnings are supportive. We are conscious, however, that valuations elsewhere are elevated and that risks around politics, protectionism and rising interest rates have the potential to add volatility (sharper fluctuations in prices). The portfolio remains focused on domestic companies, with a bias towards northern Asia over ASEAN countries and India on valuation and income grounds. Although the earnings recovery in Asia is encouraging, the outlook for dividends is even more exciting as strong free cash flow, low levels of corporate debt and low dividend payout ratios should allow dividend growth to outstrip earnings growth over the next few years.

Investment report for the year from 1 July 2016 to 30 June 2017

Investment Fund Managers

Andrew Gillan and Mervyn Koh

The fund returned 25.9% over the year, outperforming the MSCI AC Asia Pacific ex Japan index return of 24.7 in US Dollar terms.

Asian markets had a strong year, posting a return of 25% as a result of improved corporate earnings and as it became clear that the normalisation in US interest rates (that is, incremental increases) would be very measured. Macroeconomic data in Asia was supportive, with clear signs of a stabilisation in the Chinese economy as last year's stimulus took effect, while export data across the region was buoyant. Initial concerns about increased protectionism after Donald Trump's win in the US presidential election did not materialise and we began to see steady flows back towards emerging markets, including Asia, through the first half of 2017. India was volatile following concern over the government's demonetisation policy, but the impact on economic growth proved short-lived and the market recovered well. The index provider MSCI decided to include Chinese A shares (those listed in yuan on the Chinese mainland) in its major indices, although this will be implemented in a very measured way.

The fund outperformed during the year, with our significant overweight to the information technology (IT) sector a key driver. The Korean memory sector was a particularly strong performer. Our holdings in Samsung Electronics and SK Hynix saw positive earnings revisions on firmer-than-expected DRAM memory chip pricing as the industry remains disciplined in terms of supply. Samsung Electronics also benefited from plans to improve shareholder returns both from increased dividends and share cancellations. The Chinese internet sector also continued to perform well, and we benefited from our positions in Tencent, Alibaba and NetEase. Alibaba shares rallied after the company gave revenue guidance significantly ahead of analyst expectations. While the shares have re-rated (undergone a reassessment by the market), we still feel that both Tencent and Alibaba offer compelling growth and have very strong franchises in the China market, so we remain happy to maintain our holdings in both companies. In Hong Kong, our position in Samsonite performed well after the company delivered good results and the integration of its Tumi acquisition appeared to be on track. Other notable contributors included Taiwanese companies Largan Precision, an optical lens company, and Catcher, a casings company, which both supply components to major smartphone companies.

Detractors over the year included a number of holdings in India. Lupin, a leading Indian generics company, underperformed as more competing drugs appeared against two of their most important products in the US. Lupin and their peers are also facing challenges of a consolidating drugstore network in the US, which is putting further pressure on prices. We therefore decided sell out of the position given these concerns and the valuation of the company. We have, however, maintained a position in our other Indian pharmaceutical company, Aurobindo, which also underperformed, but we feel that the company's valuation and product pipeline remains attractive. The other area of underperformance in India was in IT services, where we have holdings in Tata Consultancy Services, Infosys and Tech Mahindra. These companies are still growing, but their legacy application management business is under pressure; while their digital offering is showing strong growth, overall revenue growth of less than 10% has disappointed the market. These companies have strong balance sheets and good cash flow generation, so we are maintaining positioning towards the sector despite the current headwinds.

We did make a number of changes to the portfolio during the year. The first of these was to add two Australian companies to the portfolio now that Australia has been included in our investment universe. We initiated positions in CSL, a leading healthcare company, and Amcor, a global packaging firm. While we will begin with an underweight position to Australia, we do foresee increasing that weighting over time. In other recent trades, we exited the position in India's Godrej Consumer on price concerns. The company has executed extremely well, but we feel that the valuation (share price) is too rich to maintain the position. We also exited the position in Manila Water in the Philippines, but will retain indirect exposure to the company via its parent company, Ayala, which we continue to hold. We used the proceeds to initiate two new positions in Techtronic Industries and Nien Made, which we feel offer good value for their franchise strength and growth prospects. Techtronics is a leading manufacturer of power tools, and Nien Made's expertise is in window coverings and blinds. Other new companies to the portfolio included Delta Electronics and Advantech in Taiwan, which provide exposure to industrial automation. Companies we sold earlier in the year included China Mengniu Dairy, China Resources Gas and CK Hutchison. We continue to run a focused portfolio of less than 40 companies.

Asian markets have posted healthy gains in the first half of 2017, but valuations remain attractive relative to history, and earnings revisions are more positive than they have been for the past few years, which gives us much comfort. Given the underperformance of Asian and emerging market equities relative to developed markets in recent years, we remain optimistic that stronger earnings growth will support improved relative performance for Asian equities. Clearly, risks of increased protectionism in US trade policy remain, and there are challenges and reforms to address across the region, but we can still identify a number of attractive investment opportunities for the long-term investor.

Investment report for the year from 1 July 2016 to 30 June 2017

Investment Fund Manager

Nick Sheridan

Over the year under review, the fund returned 22.5% underperformed the benchmark index of 24.8% in Euro terms.

Returns across European markets were strong over the last year, with value outperforming growth, but performance seemed to be inversely linked to company size. By way of example, the difference in performance between large cap stocks and micro cap stocks was some 12.6%; large cap returned 6% versus 18.6% for micro cap (capital only) – performance degraded the higher up the market one went in terms of market cap. Broadly speaking, the style of the fund could be characterised as quality value. The fund invests in large and mid cap stocks

While a number of stock specific events contributed to this performance, both positively (the takeover of Christian Dior) and negatively (profit warnings from Eutelsat and Schaeffler – the former was sold and the latter retained), style and market cap were the largest drivers.

Overall, the characteristics were little changed, although arguably slightly less quality. The underlying investment process focuses on returns; thus, as the more operationally geared areas of the market start to see profits increase, this will be reflected in the holdings. Under normal circumstances, it should be expected that the fund's return on equity will remain above that of the market.

As mentioned, Schaeffler (a supplier of automobile parts to the original equipment and aftermarket) was subject to a profit warning (margin guidance for earnings before interest and taxes was decreased by 100 basis points, to 11-12%, for 2017). This was caused by a number of factors:

- 1) Below budget customer contributions to research and development (R&D). The company thinks that the reduced level of contributions should revert to normal. If these do recover, then first-half shortfall could be reversed in the second half.
- 2) Timing differences between expansionary capital expenditure and revenue due to investment in a new factory in the Czech Republic for a new product which reduces engine emissions by thermal management.
- 3) Logistics problems from a new site and a supply bottleneck that caused a subsequent write off of stock. Essentially, the company was unable to get the goods to the customer, and so they sourced elsewhere. Schaeffler doesn't sell perishable goods, so although these items were fully written off (in order to comply with German GAAP, any subsequent sale will see a corresponding write back to the profit and loss statement, which seems quite likely.
- 4) Some pricing pressure on input costs due to high steel prices this should reduce as the year progresses.
- 5) A degree of pricing pressure by original equipment manufacturers it is unclear as to whether this will have a temporary or permanent impact.

The ramp-up of R&D by Schaeffler was always going to give rise to some timing differences between costs and revenue. To give some idea of the size of R&D being undertaken, the group is, as of 30 June, working on 29 new projects. Ultimately, as long as the R&D produces returns, then increasing spend is a good thing, as it means higher future profits. But in the short term, it does cause uncertainty. Schaeffler are guiding for 'new products' to start contributing in the second half. Hopefully, this will give investors comfort that recent R&D is producing revenue.

Points 1-3 reflect either investment in the future or isolated issues. Point 4 should dissipate as the year progresses, while Point 5 may or may not be permanent.

On the current rating, we are happy to remain invested, as we believe the problems are either temporary or an investment for the future.

Looking forward, the economic backdrop for Europe appears favourable; but markets have performed extremely well over recent months and consolidation around present levels, ahead of results season, would not surprise.

Investment report for the year from 1 July 2016 to 30 June 2017

Investment Fund Manager

Simon Rowe

The year to June 2017 started amid the uncertainty and confusion caused by the UK's unexpected vote to leave the European Union (EU). The vote caused a sharp sell-off in equities, and particularly financials, because of fears that the economic disruption might cause the European Central Bank (ECB) to push interest rates even further in a negative direction. There were also wider fears that the rise of populist anti-EU sentiment might cause the EU and the Euro to unravel. In the event, the UK's vote caused little short term disruption. The tide of populism was reversed in early 2017 with a rebuff to populists first in the Netherlands and more significantly in France, where Emmanuel Macron, standing as a pro-reforms, pro-EU candidate, won an overwhelming majority in the presidential election. The French vote cemented a rally that had been building since the start of 2017 as a more benign political environment combined with evidence of an economic pick-up in previously moribund countries such as Portugal, Italy and France. Greater optimism about Europe also coincided with a period in which investors became more sceptical about President Trump's ability to implement his electoral promises of tax cuts and infrastructure spending.

In this strong rally, the Henderson Horizon European Growth Fund gained 21.9% in Euro terms, slightly behind its index, which gained 22.1%. One of the strongest sectors over the year was banks, which bounced sharply from post-EU referendum lows. Our two larger banks, Nordea and ING, rose 66% and 65%, respectively. The fund's underweight position in banks was a headwind, although we added Danske to the fund and it also performed well.

Offsetting financials was our overweight position in industrial companies; this proved helpful as hopes of a broader economic improvement in Europe grew. Other strong performers included French services group SPIE, which rose 63%, and construction chemicals group Sika, which rose 51%. New holding CNH, an agricultural equipment specialist, gained 50%. Three companies in the fund received bids: Zodiac, Akzo and Pfeiffer Vacuum (the last two were both purchased during the year under review). Detractors from performance were Novo Nordisk, which declined on US pricing pressure, and Huhtamaki, which fell back after strong performance, again on weaker results.

In terms of portfolio changes, we reduced and sold some of our holdings in defensive growth companies in the second half of 2016. Some of these, such as DCC or RELX, remain significant holdings, but others, such as Kone, Symrise or Sodexo, were sold on valuation grounds or concerns about future performance. Some of the money released was reinvested in self-help stories (companies that should benefit from internal change), such as Carlsberg, Philips and FNAC, where profitability was below peers. We also bought a position in Royal Dutch Shell because of its potential to cut costs and improve performance. Other new holdings included French flooring specialist Tarkett and Spanish sausage skin expert Viscofan.

The economic backdrop in Europe continues to improve, and France looks likely to embark on significant economic reforms under its new president Emmanuel Macron. The outlook for European equities is also supported by increased interest from international investors, who have considered Europe uninvestible for many years. But after strong performance, June brought signs that the rally in European equities was starting to run out of steam. There was a sell-off in the last days of the month (with the yield on 10-year German bonds doubling to over 0.5%) over concerns about ECB policy, in particular how the ECB would wind down its programme of bond purchases after comments from chief Mario Draghi suggested that an end to its bond buying programme was approaching.

Therefore, the next months may not be as smooth as the first half of the year. Macron has already announced cuts to public spending and delays to proposed tax cuts in order to get the budget deficit under control. There is also a risk that corporate results for the second quarter might not live up to the high expectations that the market rally has encouraged.

Investment report for the year from 1 July 2016 to 30 June 2017

Investment Fund Managers

Japanese Equity team

The fund returned 31% in US Dollar terms, outperforming its benchmark, the TOPIX Index, which returned 21% in US Dollar terms. The Japanese Yen depreciated over the year, and thus, there was a higher return in local currency terms.

Despite the global macroeconomic recovery, the market was relatively flat during the first half of calendar year 2016 due to Yen appreciation, uncertainty over global interest rate policy and political risk. The market bottomed out after the UK made its decision to leave the European Union, but was later fueled by the outcome of the US election, although the result was an unexpected one. This sharp rebound was a catch-up rally led by cyclical value stocks, which had underperformed quality growth companies for a long period of time under an accommodative interest rate policy. The Yen weakened substantially during the year, which also helped the index to move higher. Since the beginning of this 12-month period, however, the market moved up only gradually, while the US Dollar gave up some of its earlier gains. Unlike the first half of the year, the market was highly rotational without any clear performance leadership.

The fund's outperformance was due to successful stock picking. The biggest contributor was Fujitsu, an information technology services company that is restructuring its business portfolio to improve margins. The market's confidence for the company's successful turnaround seems to increase at the earnings release of each quarter. Nintendo was the second largest contributor, as the market reassessed its value after the successful launch of its first smartphone-based game. Disco, a semiconductor equipment company, came in the third place, as the company benefited from strong semiconductor capital expenditure; we like its unique position in the industry's supply chain. The biggest detractor was advertisement agency Dentsu. We believe weakness in the advertising market is cyclical and that Dentsu can continue to generate high levels of free cash flow, which is underestimated by the market.

We introduced several new stocks to the portfolio. We bought Sony, as we believed the company was undervalued, taking into account its growth potential. Sony has successfully restructured its business portfolio, and its earnings visibility has improved. We also bought shares in SoftBank. We believe revaluation will continue, as the market is still skeptical about Softbank's attempt to transform the group from a telecommunications infrastructure operator to a leading communication technology conglomerate of the next generation.

To finance these positions, we sold all our holdings in Mizuho Financial Group, as we came to the conclusion that the market will continue to demand a high risk premium, as its business franchise, as well as its cost structure, is weaker than that of its peers. We also reduced holdings in Rakuten, a Japanese electronic commerce platform operator, as we expect the competitive environment to continue.

In our view the outlook for Japanese equities is positive. The unemployment rate at 2.8% (June 2017) is the lowest among developed countries and the best figure since 1994. We believe this is an opportunity for the Japanese economy to finally regain pricing power, ending decades of deflation. Corporate earnings are strong. Based on the recent Yen to US Dollar exchange rate, earnings per share for Tokyo Stock Exchange First Section-listed companies could grow by double-digits in this fiscal year, with corporate profitability having registered historical highs. Furthermore, many Japanese companies are trading at price- to-earnings ratios of around 14 times, making the valuations attractive compared to other developed markets.

Unlike the US and possibly the eurozone, the Bank of Japan's rate policy is likely to remain accommodative, which will have positive implications for the overall stock market. We are also encouraged by recent progress in corporate governance, which has been translating into higher rewards for shareholders. The risk will be Yen appreciation and geopolitical issues, which may cause higher volatility (sharper fluctuations in prices). We believe the risk/reward balance is very good in Japan and will continue to focus on stock picking, which will be a key determinant of the fund's performance.

Investment report for the year from 1 July 2016 to 30 June 2017

Investment Fund Manager

Nick Sheridan

Over the year, the fund returned 17.4% against the MSCI Europe Net Return EUR return of 18.0% in Euro Terms.

Returns across European markets were strong over the last year, with value outperforming growth, but performance seemed to be inversely linked to company size. By way of example, the difference in performance between large cap stocks and micro cap stocks was some 12.6%; large cap returned 6% versus 18.6% for micro cap (capital only) – performance degraded the higher up the market one went in terms of market cap. Broadly speaking, the style of the fund could be characterised as quality value. The fund invests in large and mid cap stocks

While a number of stock-specific events contributed to this performance, both positively (a bid for Unilever) and negatively (profit warnings from Eutelsat and Schaeffler – the former was sold and the latter retained), style and market cap were the largest drivers.

Overall, the characteristics were little changed, although arguably slightly less quality. The underlying investment process focuses on returns; thus, as the more operationally geared areas of the market start to see profits increase, this will be reflected in the holdings. Under normal circumstances, it should be expected that the fund's return on equity will remain above that of the market.

As mentioned, Schaeffler (a supplier of automobile parts to the original equipment and aftermarket) was subject to a profit warning (margin guidance for earnings before interest and taxes was decreased by 100 basis points, to 11-12%, for 2017) which was caused by a number of factors:

- 1) Below budget customer contributions to research and development (R&D). The company thinks that the reduced level of contributions should revert to normal. If these do recover, then first-half shortfall could be reversed in the second half.
- 2) Timing differences between expansionary capital expenditure and revenue due to investment in a new factory in the Czech Republic for a new product which reduces engine emissions by thermal management.
- 3) Logistics problems from a new site and a supply bottleneck that caused a subsequent write off of stock. Essentially, the company was unable to get the goods to the customer, and so they sourced elsewhere. Schaeffler doesn't sell perishable goods, so although these items were fully written off in order to comply with German accounting standards, any subsequent sale will see a corresponding write back to the profit and loss statement, which seems quite likely.
- 4) Some pricing pressure on input costs due to high steel prices this should reduce as the year progresses.
- 5) A degree of pricing pressure by original equipment manufacturers it is unclear as to whether this will have a temporary or permanent impact.

The ramp-up of R&D by Schaeffler was always going to give rise to some timing differences between costs and revenue. To give some idea of the size of R&D being undertaken, the group is, as of 30 June, working on 29 new projects. Ultimately, as long as the R&D produces returns, then increasing spend is a good thing, as it means higher future profits. But in the short term, it does cause uncertainty. Schaeffler are guiding for 'new products' to start contributing in the second half. Hopefully, this will give investors comfort that recent R&D is producing revenue.

Points 1-3 reflect either investment in the future or isolated issues. Point 4 should dissipate as the year progresses, while Point 5 may or may not be permanent.

On the current rating, we are happy to remain invested, as we believe the problems are largely either temporary or an investment for the future.

Looking forward, the economic backdrop for Europe appears favourable; but markets have performed extremely well over recent months and consolidation around present levels, ahead of results season, would not surprise.

Investment report for the year from 1 July 2016 to 30 June 2017

Investment Fund Managers

Tim Stevenson and James Ross

Please note that as of 1 September 2016, James Ross also managed this fund.

It was a positive year for European equities, with the index rising 18.7%. The fund lagged this strong return and rose 15.0%. The robust market return was driven by a big improvement in European economies, and a significantly better political outlook (apart from in the UK). The simplest explanation for the lag in the fund is the extent to which the index was driven by recovery stocks (for example, mining and deep cyclicals) and that the 'reliable' growth names have met expectations of growth but nevertheless been neglected in preference for larger recovery plays. The team managing the fund was strengthened during the year with the addition of James Ross.

The economic recovery, which had been detected at the time of our Annual Report in June 2016, accelerated. Indeed, European gross domestic product growth is expected to exceed that of the US in 2017, and earnings growth has moved into decisively positive territory. The election of moderate centrist governments in the Netherlands and, importantly, in France has made the US and UK political situations look like exceptions, much to the relief of many people in Europe. This has encouraged funds to flow back into European equities – but this has mainly been by way of passive funds, such as exchange traded funds.

The economic growth debate was somewhat confused by signs of a slowdown in China and fears that the US economy may slow if the Federal Reserve tightens the interest rate policy too aggressively. In Europe, however, the European Central Bank is likely to maintain an easy monetary policy well into 2018 (as inflation remains stubbornly low), even if the rhetoric about 'tapering' (reduction) ramps up in the latter part of 2017. This should provide an economic tailwind, fuelled by better investment and consumer demand as the fiscal situation continues to improve, and allows a more relaxed spending policy in many countries.

One notable exception to good political news was the UK, where, a year on from the UK's vote to leave the European Union, the complex process of acting upon this decision has begun. In addition, the ruling Conservative Party lost its majority and thus weakened its position in the recent snap election. We have continued to be highly selective and underweight in the UK overall.

Top performers during the year were Amundi (fund management), Credit Agricole and ING (banks). The takeover of ARM also added to returns. Our purchase of Atlas Copco in December 2015 also had a major positive impact, as did the timely purchase of BAT when we felt that the valuation level had fallen to a reasonable level.

Major detractors from the fund were Capita, which we began to reduce on fears of lower growth. It warned again before we finally sold the position. Pandora (a top performer in the previous year) also suffered a major derating on concerns of lower growth, and we sold the entire position. A warning from UK telecommunications company BT also saw a sharp fall in what had been quite a large holding. Our cautious view of mining companies also meant that we bypassed the rally in that area of the market.

During the year, we added more to financials in expectation of better returns as economies recover and net interest margins improve.

The Henderson Horizon Pan European Fund has always looked for good quality, consistent and reliable companies, and tries to participate in their future. Over the last year, we were able to increase our holdings to include more financials and economically sensitive names. While there were some specific disappointments that impacted performance, the overall position of the fund looks good. We have holdings in some companies which have excellent positions in areas that we think have a promising future in a world where growth will remain subdued compared with prior years. Patience is required, but we also recognise the need to be decisive where our holdings fall off their long term growth path. With James Ross helping to select these companies, backed by the outstanding European team, we are confident that we can soon be back on the outperformance trend.

Investment report for the year from 1 July 2016 to 30 June 2017

Investment Fund Managers

Michelle J. Picard, W. Scott Priebe and Derek J. Pawlak

The fund's total return during the year was 10.4% in US Dollar terms compared with the Russell 3000 Growth Index, which produced a total return of 20.2%.

US equity markets were quite strong in the 12 months under review as investors responded positively to the election of Donald Trump and US economic data continued to show signs of strengthening. During the year, small cap equities outperformed large cap equities, and small and mid cap growth outperformed value, although large cap value slightly outperformed large cap growth. From a quality perspective, the year was dominated by low quality companies; those companies rated B or worse (low quality) returned 19.22% versus 12.74% for those rated B+ or better (high quality). Factor attribution data confirmed this bias, as non-earning companies and low return on equity companies within the Russell 2500 Growth Index meaningfully outperformed.

Specific to the US Growth Fund, the greatest detractors from performance, from a sector perspective, were the consumer discretionary and technology sectors. These two sectors represented three quarters of the underperformance, yet it was mostly what the strategy didn't own in these sectors, rather than what it did, that contributed to underperformance. Not holding positions in Apple, Facebook, Microsoft and Amazon significantly detracted. That being said, a position in Tractor Supply Company also weighed on performance. This consumer discretionary company was the greatest detractor, and was down nearly 40% during the year. The earnings misses during the year were the result of a weak end consumer and volatile weather, although we believe these issues will prove to be transitory.

Contributing to performance was strong stock selection within the financial services sector. Holdings in Raymond James Financial, Bank of the Ozarks and Visa contributed to the outperformance during the year. Outside of financials, the strategy also benefited from strong stock selection in the technology sector. Holdings in Adobe, Microchip, Amphenol and Red Hat drove performance within the sector.

Investment activity included the new additions of Panera Bread, CoStar Group, Alphabet and Ulta Beauty, among others. These new companies replaced positions in W.W. Grainger, Perrigo, Under Armour and Manhattan Associates, which were all sold for fundamental reasons.

The US economy appears to be in a 'goldilocks' period, with data just strong enough to excite investors but slow enough to avoid scaring the Federal Reserve (Fed) into inaction. May's employment data was weaker than expected, but the just-released June data came in much stronger, and previous periods were revised upwards. The data showed a meaningful number of people rejoining the workforce, causing the unemployment rate to tick higher, but this supports the theory that the US economy isn't as close to full employment as the data would indicate. Supporting this theory was somewhat stagnant wage growth and overall muted inflation figures. Current data would suggest that the Fed is going to have an opportunity to raise rates at least once more this year, as well as start the process of shrinking its balance sheet. Politics continue to be at the forefront, although expectations for major tax reform or an infrastructure bill in 2017 seem to have evaporated. Agreement on healthcare legislation seems agonisingly close, yet it's difficult to see how Republicans in the Senate will build consensus to pass the bill.

We've noted that management teams seem generally more optimistic about the economy, but we're still waiting for more hard data to prove this thesis. Year to date, investors have been willing to reward companies with strong fundamentals and punish those that miss expectations; this revision back to a more fundamentally driven market has been refreshing and should continue. This is why it's as important as ever to invest in high quality companies with experienced management teams, a track record of consistent growth and the ability to expand organically despite the many challenges facing the global economy.

Asia-Pacific Property Equities Fund

Investment report for the year from 1 July 2016 to 30 June 2017

Investment Fund Manager

Tim Gibson

The fund returned +2.0% (net of fees) in US Dollar terms over the year to 30 June 2017, underperforming the customised benchmark (the bespoke FTSE EPRA NAREIT Pure Asia Index), which was up 5.4% during the year.

The first half of the year under review was fairly turbulent. The initial gains from the rebound that followed the Brexit referendum (the UK's vote to leave the European Union) were erased by a sharp upward move in the yield curve as bond markets sold off (bond yields move inversely to prices). Rising inflation expectations and the surprise victory of Donald Trump in the US presidential election fuelled expectations of fiscal stimulus. However, the start of 2017 saw markets stabilising and generally well supported by stronger macroeconomic growth across the board. Markets took the well-anticipated three US Federal Reserve interest rate hikes since December 2016 in stride, and bond yields compressed from their highs at the end of 2016. Against a backdrop of rising yields, Asian property equities underperformed the general equity markets.

Within Asian property equities, Hong Kong (+17%) outperformed during the year, supported by a strong residential market, as prices and primary transactions both hit new record highs. The office sector also enjoyed continued rental growth on the back of tight supply, while a record land bid for a central office site also sent capital values to new highs. In Singapore – which lagged the region over the past few years on the back of a generally weak macroeconomic environment – there were initial signs of revival in the physical property markets from the start of 2017, and the region managed to claw back initial losses to end the year with a strong positive performance (+15%). The government signalled the potential start of an easing cycle (a policy in which a country's central bank attempts to lower interest rates and increase money supply by buying government securities) following many years of tightening in the residential sector, which boosted investor sentiment and drove a pickup in transactions and activity in the land acquisition market. The office sector also saw the first positive rental growth in the second quarter of 2017 after two years of decline.

Performance among Japanese developers whipsawed around enthusiasm about the reflation trade, but managed to post a positive return (+5%) for the 12 months on the back of encouraging results as well as better guidance for the next year. On the other hand, Japanese real estate investment trusts (REITs) were down by 16%, suffering the brunt of the sell-off with the reversal of negative interest rates in Japan, and were dragged down further by a 10% depreciation in the Yen over the year. On a similar thread, Australia (-4%) also underperformed the region as REITs were hurt by the rising bond yields during the year.

The fund underperformed the benchmark over the period, as our outperformance in Australia (largely driven by positive stock selection) was offset by negative contributions from Hong Kong and Japan. In Hong Kong, top detractors included our holding in Cheung Kong Properties, as well as our underweight position in New World Development. Meanwhile, our overall underweight position in Japan contributed positively; however, our holding in hotel owner Invincible Investments was a key detractor.

In the first half of the year under review, we took profits in Hong Kong, following its stellar run earlier in the period, and raised our holdings in Japanese developers and Australian REITs as the reflation trade played out. We rotated our holdings within the Singapore and Japanese REITs, adding Mapletree Commercial Trust (exiting CapitaMalls Trust) and Activia Properties (exiting Japan Real Estate Investment and GLP JREIT), respectively. In the second half of the year, we added back to our exposure in Hong Kong, increased our weighting in Singapore on the back of improving fundamentals in the physical market, and reduced our weightings in Japan and Australia. We initiated new positions in Hang Lung Property and Kerry Property in Hong Kong and City Developments in Singapore as we turned incrementally positive on the fundamentals in the sectors in which these companies operate. Meanwhile in Australia, we switched out of GPT Group and Stockland and initiated positions in Mirvac Group and GDI Property. Within the REITs space, we also initiated new positions in Nippon Prologis REIT and CapitaLand Commercial REIT.

While we have seen rates and 10-year yields move higher from historic low levels in the last year, our outlook for the sector remains balanced. Despite central banks leaning toward a slightly hawkish rhetoric, macroeconomic growth remains fairly benign. Property fundamentals are largely stable with some sectors showing signs of improvement and potential turnaround after years of down cycle. We remain focused on bottom-up stock selection, targeting high-quality companies in sectors that we believe are able to deliver growth.

Investment report for the year from 1 July 2016 to 30 June 2017

Investment Fund Managers

Charlie Awdry and May Ling Wee

In the year to end June 2017, the fund returned 34.3% in US Dollars terms, coming in ahead of the benchmark MSCI China Index, which returned 32.2%.

Sector allocation was a positive contributor, driven largely by our overweight in consumer discretionary stocks and our underweight in telecommunications stocks. Pleasingly, our long-short attribution boosted returns, as our long positions rose more than the benchmark and our short positions rose less.

At the stock level, long contributors included branded budget hotel operator China Lodging Group, whose shares responded positively to improving operating metrics and rising room rates. Our holding in automobile steering equipment supplier Nexteer Automotive performed well; profits and order books rose as customers tried to improve the fuel efficiency of their cars, particularly in the SUV segment. The fund benefited from a number of Chinese internet businesses, including games company NetEase, which that has navigated the growth of mobile internet on smartphones particularly well, and Sina, which is a large shareholder of Weibo, a Twitter-like social media platform that has seen a significant renaissance in China. Shenzhen-listed surveillance technology company Hangzhou Hikvision helped returns as investors began to appreciate the opportunities arising from the growth of artificial intelligence applications. Top positive contributors from the short book included positions in global outsourcing company Li & Fung (which is under pressure from the current trend of antiglobalisation), consumer staple Want Want, and property and airline conglomerate Swire Pacific.

Detractors from performance included stock broker China International Capital, which did not rally along with the markets as expected, and so was sold from the fund. Telecommunications operator HKT Trust fell when controlling shareholder PCCW reduced its stake through a secondary market placement. We believe the sell down may have been valuation-driven, but it is clearly a negative signal, so we cut the position from the fund.

We reintroduced Chinese bank shares into the fund in April after not owning them for well over a year. We felt they merited a holding because of a number of factors. Firstly, the cyclical recovery in the economy is improving corporate China's profits and cash flows; secondly, corporate China is making better capital allocation decisions, which makes them better debtors; thirdly, the valuation gap between banks and fashionable growth stocks is very high; and fourthly, they paid annual dividends in June and July, so we locked in a 5% dividend yield. China Construction Bank and Bank of China now make up around 10% of the fund, which is still an underweight position versus the benchmark. We would stay away from smaller joint stock banks that rely on funding from the interbank market where rates are rising. To fund these purchases, we continued to harvest profits in expensive growth stocks that have performed well, such as CSPC Pharma and ASM Pacific. Meanwhile, we sold our Hong Kong Exchange holdings.

Growth was on an upswing until recently, and we see the current round of politically and market-induced tightening, manifested in short term interest rates, as another passage of a mini-cycle flowing through the Chinese economy. While market commentators are focused on the macroeconomic picture, Alibaba, China's e-commerce giant and largest holding in the fund, conducted an investor day where it guided up revenue growth estimates for its next financial year from consensus estimates of approximately 35% to 45-49% growth year over year – and this is a company that generated \$23.5bn in sales last year.

Chinese equities have been rising for some time now, and another cycle is kicking in – that of increasing investor engagement as clients change from ignoring the moves, to being curious about them, to now wondering whether they should take part. Furthermore, China's domestic A share markets were the centre of attention in June 2017 as influential index provider MSCI decided to include A shares in its emerging markets and All Country World Indices, starting from 2018. We view this as a symbolic step, acknowledging the progress China has made in opening access to its markets primarily through the 'Connect' trading link with Hong Kong. We have over 10% of the fund invested in a number of high quality A share companies and believe they may benefit over time from the increased scrutiny of foreign investors that MSCI indices inclusion may bring.

Bull markets seem to be climbing a (Chinese) wall of worry. We are beginning to see more investor engagement with the asset class and are hopeful that if people finally find a reason to reduce their allocation to the popular US equity markets, they might consider turning to China.

Investment report for the year from 1 July 2016 to 30 June 2017

Investment Fund Managers

Ben Lofthouse and Andrew Jones

The fund's total return in US Dollar terms over the year was 13.5%, compared with the total return of the MSCI World Index of 18.2% in US Dollar terms over the same 12 months.

Equity markets rose strongly over the year as political risk gradually reduced and the outlook for global economic growth improved. The US market performed well following the Republican victory in the presidential and house elections, while European markets were especially strong after the election of Emmanuel Macron in France. With these elections completed, the market focused on positive gross domestic product (GDP) trends globally and the likelihood that interest rates would have to increase from very low levels. This resulted in the financials, industrials and technology sectors performing well, while more defensive areas such as telecommunications and healthcare underperformed the strong market.

The fund underperformed the benchmark during the year. The underweight position in the technology sector was negative for relative performance, as were the holdings in certain defensive companies. Among the weaker performers were tobacco companies Imperial Brands and Japan Tobacco, which both reported disappointing volume trends and were also affected by the market rotation towards more economically sensitive companies. Analytics provider Nielsen also detracted from returns following the company reporting disappointing results, with sales growth in its 'buy' division being lower than expected. The portfolio retained its holdings in all three companies, as the valuations are attractive and they are generating good levels of free cash flow, and as a result, are delivering good dividend growth.

The best performing holdings during the year were predominantly financials, including Natixis, JP Morgan, ING and Cembra Money Bank. If interest rates and bond yields move sustainably higher (and prices move inversely to yields), this should positively impact margins for financial companies, following years of margin pressure and earnings downgrades as a result of the low interest rate environment. Although the underweight position in the low yielding technology area was negative for relative returns when compared with the benchmark, the holdings in companies such as Microsoft and Taiwan Semiconductor were positive in absolute terms.

During the year, new positions were added in Samsung Electronics, General Motors (GM), fertiliser producer Agrium and Scandinavian bank Nordea. Samsung is a diversified, global technology leader which is lowly rated on a cash flow and earnings basis. It is returning more of its surplus cash flow to shareholders, and as a result, there should be good dividend growth in the future. GM's management was more focused on cash returns to shareholders via dividends and share buybacks, and the shares are attractively valued on metrics such as price to earnings ratio and dividend yields.

Agrium is in the process of merging with PotashCorp in a deal that should be substantially earnings-accretive and lead to good potential dividend growth from an already attractive yield. Nordea has leading market positions, a very high capital ratio and an attractive distribution policy. The company is well placed to improve its return on equity further, grow earnings and deliver good dividend growth from an attractive starting yield of 6%. These positions were funded by exiting positions in telecommunications operator BCE, professional publisher Wolters Kluwer, pharmaceutical group AstraZeneca and German re-insurance group Munich Re following good long term performance.

For the first time in many years, most major areas of the world are delivering good GDP growth, which is resulting in a favourable global economic backdrop. Higher economic growth should allow greater sales and earnings growth for companies, ultimately driving higher dividend growth for shareholders. We will continue with our existing strategy of identifying companies that pay an attractive and sustainable dividend and have capacity to grow over the medium to long term.

Investment report for the year from 1 July 2016 to 30 June 2017

Investment Fund Managers

Paul O'Connor and Ryan Boothroyd

The fund returned 8.2% over the 12 months, with a realised volatility that continued to be below both global equities and government bonds ('volatility' denotes sharper fluctuations in prices).

The 12 months to June 2017 were characterised by vibrant politics set against a backdrop of increasingly stable economics.

Numerous political shocks provided plenty of event risk over the year, with the UK's decision to leave the European Union (just ahead of the review period) and the US presidential election returning the two most surprising outcomes. However, despite both events driving major rotations in asset markets, the underlying global economy continued to recover. As we approach the 10-year anniversary of the financial crisis, gross domestic product growth is stable and disparities in the economic fortunes of individual countries have narrowed. As a result, we are beginning to approach the end of monetary easing as central banks begin to scale back, or even fully reverse, extraordinary policy measures.

Positive performance was mainly driven by the fund's equity assets. In particular, North America, Europe ex UK and Japan were the largest contributors. Underlying holdings providing the strongest contributions were the Vanguard S&P 500 UCITS Exchange Traded Fund (ETF), the Henderson European Selected Opportunities Fund, the Montanaro European Income Fund, and the CF Morant Wright Nippon Yield Fund. Detractors over the year included positions in the Source Bloomberg Commodity UCITS ETF, the Melchior Selected Trust European Absolute Return Fund, ETFS Physical Gold, and the BlackRock Emerging Markets Flexible Dynamic Bond Fund.

We made a number of key changes to the portfolio over the year. The majority of these changes were along the broad theme of reflation (government policies intended to stimulate an economy), moving away from some of the assets that have prospered in the lower for longer environment towards a more balanced to cyclical view.

Within our equity allocations, this meant moving towards an overweight in more cyclical regions such as Europe and Japan and moving away from the growth and low volatility factors in favour of greater value sensitivity. Moreover, we meaningfully rebuilt our emerging markets allocation after a sustained period of underweight positions and added more active management in the UK and Japan through investments in the Polar Capital Value Opportunities Fund and the First State Japan Fund.

In fixed income, we retained our underweight position but slowly began to reduce our credit holdings over the second half of the year. This was implemented through a move away from high yield ETFs towards actively managed and lower duration portfolios (duration is a measure of interest rate sensitivity), reducing our loans holdings and making a number of shorter term tactical trades within the UK government bond market.

While the improving economic environment has proved conducive to generating investment returns across asset classes, it is not without risks. We are particularly cognisant of the suppression of volatility that currently characterises markets alongside the continued search for yield, which has pushed investors increasingly far up the risk spectrum. Further, from a strategic perspective, cross asset valuations remain stretched and expected returns are low. We expect reversion in both metrics over the medium term, which we believe warrants a cautiously optimistic approach, with a greater focus on active management and dynamic asset allocation than was required in the 'easy money' decade to 2017.

Investment report for the year from 1 July 2016 to 30 June 2017

Investment Fund Managers

David Whitten, Daniel Sullivan and Darko Kuzmanovic

The Henderson Horizon Global Natural Resources Fund rose 4.0% in US Dollar terms compared with the S&P Global Natural Resources Index's return of 14.7% over the year.

The performances of the three main resource sectors – mining, energy and agriculture – were mixed. The mining and agriculture sectors rose strongly, by 23% and 21%, respectively, while the energy sector was nearly flat at 0.2%.

The relative return was impacted by the fund's overweight position to the poorly performing Canadian market, particularly the mining and upstream energy sectors. The underweight position in European resources equities also negatively impacted returns. Over the past 12 months, there was significant overall divergence between large and small resources stocks. The reason for this may be due to investors readjusting their positions within the sectors (especially the mining sector) following the very strong mining versus industrials outperformance over the previous six-month period. The fund's smallish tail of risk-adjusted companies generally failed to match the benchmark returns.

The fund was underweight the strongly performing agricultural sector over the year. Significant positive contributors included two smaller Australasian companies: Synlait Milk (stronger than expected infant formula sales into China) and Costa (strong horticultural growth across all horticultural products). The consolidation of the agricultural sector remained a dominant theme over the year.

In the energy sector, Marathon Petroleum (refining beneficiary), EOG Resources (ongoing reduction in operating costs and technical leadership in onshore US shale) and Lundin Petroleum (production growth, low operating costs and successful project execution) were the main positive contributors. Conversely, the weaker oil price and asset acquisition timing concerns resulted in Cenovus Energy being a significant underperformer. Other negatively contributing holdings that were affected by the low oil price included Precision Drilling, Hess and Exxon Mobil.

In the mining sector, positive contributors were driven by large capitalisation mining stocks. BHP Billiton and Rio Tinto benefited from a rebound in steel-making raw materials, and Canadian base metal company Lundin Mining performed well on project execution and improving base metal prices. Alcoa benefited from a split into two separate companies. Leading lithium companies Albemarle and SQM performed well on the back of an elevated lithium price and an ongoing confirmation of the trend towards electric vehicles. Performance detractors included several smaller gold companies that disappointed on project execution or suffered from adverse geopolitical issues.

The outlook for global natural resources equities remains supportive. On most valuation metrics, the mining sector appears attractive. The recovery across many mining commodities since early 2016, ongoing mining project capital discipline and a general reduction in overall debt means that the earnings upgrade cycle and cash flow generation of the mining sector continues to improve. In energy, although the oil price is being supported by ongoing production restraint from the Organization of the Petroleum Exporting Countries, a sustained recovery is being delayed by the offsetting strength in US onshore shale production. We think that the large reduction in conventional oil exploration over the past few years and the resulting decline in oil reserves, combined with a reasonable demand growth outlook, will at some stage improve the supply and demand balance.

Longer term, the impact from the likely penetration of electric vehicles is a demand threat. Renewable energy is an increasing area of investment interest. The lack of new project capital expenditure by the oil & gas industry and the reset in the oil price means that the worst of negative earnings revisions has likely passed. We see longer term opportunities from the rapid agricultural industry consolidation of many of the leading crop protection, seed technology and fertiliser companies. Across agriculture, we hold advantaged food companies, agricultural product distributors, agricultural machinery companies and agricultural companies exhibiting global reach and technological leadership.

Investment report for the year from 1 July 2016 to 30 June 2017

Investment Fund Managers

Guy Barnard and Tim Gibson

Over the year, the fund returned 2.1% in US Dollar terms. The FTSE EPRA NAREIT Developed Index gained 0.2%.

Global equity markets performed strongly over the year, with investor sentiment shifting toward a reflationary bias given improving economic data and a pickup in inflation expectations. Donald Trump's surprise election victory in November initially exacerbated these trends, although a lack of real progress on election pledges since has seen some of this reverse. Central bank policy also saw divergence, with further hikes from the US Federal Reserve, while in the UK, Europe and Japan, central bank liquidity measures was enforced.

Although physical property markets remained robust, with investor allocations to the sector increasing, property equities made little real progress at a global level. However, we saw significant variations at a country and sector level. US real estate investment trusts (REITs) declined by 3.8% over the year, with retail names particularly weak given deteriorating sales trends and an acceleration in the pace of closures from department stores. Conversely, industrial and data centre companies gained, as they benefited from the growth of e-commerce and cloud computing. Stocks in Asia Pacific were up 4.1%, driven by strong returns in Singapore and Hong Kong, where fundamentals improved and transactional evidence showed further value gains. Stocks in Australia and Japan both declined as the rates trade reversed. In Europe, stocks rose 8.3%, boosted by smaller countries such as Austria and Finland (helped by mergers and acquisitions activity) as well as a strong recovery in Spain, where we saw rising rents and asset values.

The fund outperformed its index over the year, with stock selection driving performance, in line with our investment process. In the US, industrial landlord Rexford made notable gains, as did office landlords Hudson Pacific Properties and Cousins. Healthcare owner Sabra and off-benchmark ski resort owner/operator Vail Resorts also added value. Mexican FIBRA Prologis Property Mexico also made strong gains, despite volatility (sharper fluctuations in prices) following the US election. In Europe, having Spanish holdings, specifically in Merlin and Inmobiliaria Colonial, was beneficial. Berlin residential landlord Deutsche Wohnen and French office-focused lcade also boosted performance. A focus on logistics in both the UK through positions in Hansteen and Segro, and Australia through Goodman Group delivered positive returns. Stock selection detracted in Hong Kong, although our holding in large cap Sun Hung Kai helped performance. Japanese REIT Invincible Investment detracted on the back of downward revisions to guidance.

While we continue to maintain a fairly neutral regional stance, we reduced our US holdings over the year as growth expectations continued to moderate, particularly in those markets where we have seen increasing supply. Conversely, we increased holdings in Singapore and Hong Kong, as we felt the rental outlook was improving after several more challenging years. We also added European holdings, most notably in the German commercial sector, where rental growth is accelerating on the back of improving demand and limited new supply.

At a stock level, significant changes included the addition of apartment landlord Equity Residential and storage company Public Storage in the US. Both stocks were weak, as new supply in their markets impacted rental growth. However, both remain high quality companies with strong balance sheets and best in class assets and operating platforms. We felt that concerns about oversupply in these direct real estate markets was priced into share prices, so added to current positions. We also remain focused on those areas of structural growth, such as single family residential, where we added Invitation Homes; medical office buildings, where we added Alexandria; and industrials, where we switched Prologis into DCT Industrial Trust. We also initiated a position in MGM Growth Properties, the REIT spinoff of MGM casinos, where we see a good earnings trajectory coupled with an attractive yield. In Singapore, we added City Developments, seeing it as the best way to benefit from an improving residential and commercial market. In Hong Kong, we switched from Cheung Kong to Hang Lung given our expectations of a domestic retail rebound in China. In Europe, we further reduced our positions in London offices, selling Great Portland, with proceeds recycled into a new position in industrial landlord Hansteen. In Germany, we added commercial owner Aroundtown, which offers an opportunistic growth and intensive asset management play on what we see as an increasingly attractive market.

Looking ahead, we still expect investor demand for physical real estate, a real asset with an attractive and growing income stream, to remain robust. While we are likely to see further rises in interest rates and bond yields (prices move inversely to yields) as central bank stimulus is reduced and eventually reversed, the current spread between property and bond yields remains wider than historical averages, providing a buffer. An improving economic backdrop will also benefit landlords through the ability to increase rents, particularly in those markets where new construction is limited. Additionally, while we are getting later in the property cycle in some parts of the world, there remain countries, cities and sectors where trends look set for further improvement, which we can target.

We will continue to play to our strengths, reducing macroeconomic risks and focusing on bottom up stock selection to drive returns through a concentrated, high conviction portfolio. We have increasingly targeted those markets, sectors and companies, capable of growing income and dividends, even in a lower growth environment. Also, as market-wide growth slows, we place greater emphasis on quality assets and management teams; in our experience, the value of these factors always comes to the fore.

^{*} In the case of derivative instruments, Market Value refers to the net profit or loss and is used in the calculation of the Fund NAV.

Global Technology Fund

Investment report for the year from 1 July 2016 to 30 June 2017

Investment Fund Managers

Stuart O'Gorman and Alison Porter

The fund returned 36.3% versus a benchmark return of 35.5% in US Dollar terms.

Internet and information technology services contributed positively to performance, while communications equipment and components detracted.

Micron and Samsung performed well. Memory demand was an area of strength, driven by cloud data centre spending, mobile and stronger PC trends. Pricing was also strong, supported in part by a more consolidated industry leading to a more rational view on capacity expansion. (Memory manufacturing has high fixed costs, utilising specialised equipment, and largely occurs in-house. This results in extremely high operating leverage.) The better unit pricing and volume environment led to significantly higher profit margins for Micron and Samsung. Chinese internet was an area of strength, as both Tencent (Chinese messaging and video gaming) and Alibaba (Chinese e-commerce and cloud infrastructure) outperformed. Alibaba surprised positively with its revenue guidance for fiscal year 2018 at its annual investor day, while Tencent benefited from very strong online video games momentum. Broadcom (which merged with Avago) contributed positively as the integration of the two companies continued to deliver synergies on schedule. Elsewhere, NXP Semiconductor was acquired by Qualcomm, which was a positive contributor.

Fleetcor detracted from performance following a third-party report that questioned the sustainability of business practices. We disagree with the hypothesis put forward, and view the fuel card company as being a secular winner in the paperless payments business. eBay underperformed as the turnaround took longer than expected. Palo Alto Networks detracted, as its earnings results fell short of expectations for two consecutive quarters and the company announced a re-organisation of the sales force. For software companies in particular, we often view this with trepidation. We exited the position on a potential worsening of the competitive environment for Palo Alto.

We purchased eBay, as we felt the company has a good e-commerce platform that trades on an attractive valuation. We initiated a position in Texas Instruments, which has a very strong franchise in analog semiconductors and a strong track record in capital allocation. The company is also likely to be a beneficiary of US tax reform. We added a new position in the contract manufacturer Flex. Typically, contract manufacturers have faced very short product cycles and low margins, being heavily skewed towards consumer electronics. However, Flex is pivoting to non-tech end markets (the company signed a contract with Nike, for example) that carry better margins and longer product cycles, which should be positive for returns.

Following its strong run, we exited our Qualcomm position. We viewed the risk-reward as unfavourable at this valuation given anticompetitive legal proceedings brought against it. We sold out of both Checkpoint (security software) and PayPal (an online payments platform), as both stocks reached our target price.

The long-term drivers of technology – demographics and innovation – remain intact as the sector continues to take market share versus the 'old economy'. The relative valuation of the sector is attractive, especially given the balance sheet strength. We will continue to focus on bottom-up analysis of powerful secular themes and growth at a reasonable price.

Investment report for the year from 1 July 2016 to 30 June 2017

Investment Fund Manager

Yun Young Lee

The fund returned 26.4% in US Dollar terms, The Russell Nomura Small Cap Index increased by 23.4% in US Dollar terms over the same year.

The Japanese market advanced during the year, mainly because of the Bank of Japan's (BoJ's) continued market-friendly stance, robust global economic data, and continued strong earnings momentum from Japanese corporations. The smaller companies index outperformed the broader market index during the 12 months, supported by stronger than expected domestic consumption and private capital expenditure. Looking at the Russell Nomura Small Cap Index, the top five positive contributors over the year were all cyclical sectors such as nonferrous metals, glass & ceramics products, machinery, chemicals and rubber products. This indicates that many cyclical industries, which had been underappreciated by the market in previous years, performed well.

Major positive contributors to the fund's performance over the year included Tokyo Steel Manufacturing (construction steel), Nippon Electric Glass (LCD glass and glass fibre), Nippon Soda (agrochemicals), Nichicon (aluminium capacitor) and Toshiba Tec (point-of-sale system). Tokyo Steel climbed from a low valuation level, fuelled by favourable earnings results and improved shareholder returns. After the share price tumbled in early 2017, the price started to rise again, driven by a better-than-expected profits margin and expectations for large construction projects in the second half of 2017. Nippon Electric Glass, which was underappreciated by the market, rallied due to a rise in LCD panel prices and increased profits from the glass fibre business for automobiles. As we expected, Nippon Electric Glass went through multiple expansions, as its earnings profile has become more balanced via rapid growth of the automobile glass fibre business. Nippon Soda surged from a low valuation level on the back of favourable earnings results that indicated a recovery in agrichemical sales in Brazil and a robust demand for its chemicals. Nichicon appreciated due to tight supply versus demand for aluminium capacitors. The overall supply versus demand situation for legacy components, including analog semiconductors, resistors, aluminium capacitors, semiconductor packages and lead frames is improving, driven by growth in automotive (ADAS and xEV), general machinery and home appliance applications. Toshiba Tec succeeded in a profits turnaround in its overseas business, and the share rebounded from oversold levels. We sold all the positions of Toshiba Tec during the year, as it reached our target price.

Major detractors from performance were LINE (internet), Cookpad (internet), Isetan Mitsukoshi Holdings (retail), Zuiko (machinery) and Toa (construction). We implemented regular management meetings with all these companies during the year and found no material change to our thesis on these companies. We increased our positions of LINE, Cookpad and Toa on share price weakness.

During the 12 months under review, new purchases included Aiful (consumer finance), Anicom (pet insurance), Asics (running shoes), Central Glass (chemicals), Cookpad (internet), Foster Electric (electronic components), IDOM (used car dealer), Internet Initiative Japan (internet), Isetan Mitsukoshi Holdings (retail), Kobe Steel (blast furnaces), LINE (internet), Monex (online broker), Nichi-Iko Pharmaceutical (generic drug maker), Nihon Trim (water purifier), Nippon Yusen (shipping), Ricoh (printers), Seiko (watches), Tadano (cranes), Unizo Holdings (real estate), Yonex (sporting equipment) and Yorozu (auto parts). We met with the management of these companies and believe the firms to be undervalued compared to their earnings growth potentials.

During the year, we completely sold the positions in Kandenko, Kitz, Mimasu Semiconductor Industry, Mitsui Home, Nichii Gakkan, Nippon Ceramic, Otsuka Kagu, Round One, Sega Sammy Holdings, Shibaura Electrics, Take And Give Needs, Toshiba Tec and Toyo Tire & Rubber, as they reached our target prices.

We are constructive on the Japanese small cap market for three reasons: we see a visible improvement in corporate governance among the management of Japanese corporations via more focus on the return on equity as well as the higher shareholder return; the BoJ and Japanese government continue to enact market-friendly policies, limiting any material downside risk; and the Japanese small cap market continues to be one of the most under-researched asset classes in developed countries, offering a large number of mispricing opportunities to bottom-up, active managers like us.

Investment report for the year from 1 July 2016 to 30 June 2017

Investment Fund Manager

John Bennett

Over the year to 30 June 2017 the Fund's net asset value (NAV) rose by 6.0% (EUR Retail Class, net of fees).

Equity markets have continued their 'wall of worry' climb over the year under review. The wall is amply demonstrated by the considerable political noise, which continues to command the attention of the media at large, as well as the usual financial commentariat. Thus, we have seen perceived risk travel from the UK's European Union membership referendum via Trump to European elections. We continue to ignore much of this.

Having entered 2017 believing that the world had shifted from a 'growth' to a 'value' market, we note that European equities have fared well versus their US counterparts since the presidential election. The biggest surprise at the half-year stage was that growth had outperformed value. At a time when the European economy is in improving health and macroeconomic indicators are being corroborated by most companies we engage with, we would have expected less ardour for quality growth stocks. Of course, the bond market remains pertinent to the debate, and here we are even more perplexed: all those savers, insurers and pension funds willing (or forced by regulators) to lend their money on long duration (sensitivity to interest-rate movements) at paltry yields to less-than-infallible sovereigns must surely pray that inflation is a relic. Similarly, many 'bond proxies' in the equity market only make sense at current prices if a disinflationary environment prevails.

On a gross basis, the long book contributed approximately 12.4% while the short book detracted by 3.4%. The financials and industrials sectors were the main contributors to performance on the long side; however, on the short book, the consumer discretionary sector lagged and our index futures hedges, used not as a profit centre but as a liquid hedging tool, detracted from performance.

On the long book, among the top contributors at a stock level were banks Nordea Bank, DNB, ING and KBC. Since August 2016, we have increasingly positioned the fund for a better inflationary outlook. As we moved into 2017, we felt that the most important sector was something we have not favoured for the past decade – financials. We believe that we are approaching the end of a decade-long bear market for banks, as a combination of rehabilitated capital ratios and an inflection in interest rates makes the industry once again investable. This proved to be a timely move, with European financials, specifically banks, proving the best-performing part of the market overall during the second half of 2016.

In the industrials sector, a key contributor was Swedish truck maker Volvo, which reported robust first-quarter results, while strengthening truck demand drove broker upgrades. There was also a positive performance from low-cost carrier Ryanair, a position that we added in the belief that there will be a consolidation of the short-haul European airline market, from which Ryanair will be a major beneficiary in terms of value creation. Mid-cap industrial Trelleborg performed well, benefiting from self-help measures and portfolio changes being implemented by management.

Oil services companies John Wood Group and TechnipFMC detracted due to a falling oil price and concerns on the order book.

On the short side, we had success with a telecommunications position, while the main laggards were from the consumer discretionary sector as the widespread rally in the high-beta auto sector, as well as the Italian market, hurt our auto manufacturer positions.

In terms of changes, Bayer continued to perform relatively poorly after we eliminated it from the portfolio in the second quarter of 2016. Moving into 2017, however, its undemanding valuation in the sector and our move to tilt the portfolio to a value style warranted its reintroduction. In healthcare, we increased our weightings in GlaxoSmithKline, Grifols and Novo Nordisk, as we have begun to rebuild positioning towards the sector after a period of underperformance. With the exit from the lighting business now underway, Philips finally appears to be serious about its transformation into a more focused, health-centric company. While we would like to see management streamline the business further, we saw enough to warrant a position.

In anticipation of continuing global defence spending, we introduced aerospace manufacturer BAE Systems while consumer staples stocks Nestle, Heineken and Imperial Brands and Carlsberg were also added. In Germany, following meetings with management teams, we introduced Deutsche Post and telecommunications carrier United Internet, as we are attracted by both its valuation upside potential and portfolio optionality, which we believe will play out over the next two years. On the short side as government intervention risk in the UK power retail market reared its head again, we opened short positions in the utilities sector. In the course of the year, we took profits on our long positions in ISS, Geberit and Saga and disposed of Fresenius Medical Care, BP and Royal Dutch Shell.

In terms of overall positioning, we remain biased on the long side toward the more cyclical areas of the market. Our exposures stood at approximately 64% net and 108% gross, respectively, at the end of the fiscal year.

Notwithstanding a bout of profit-taking in recent weeks, European equities remain, in our opinion, in a bull market. As alluded to above, the key question for us is whether the shape of the market will change. In this respect, our tilt in favour of value, established in 2016, remains intact. Integral to this is our weighting in banks – a sector which always makes for lively debate, given its near-death experience. While it has seen no help from the bond market, we are much encouraged by bottom-up, stock-specific progress across the sector. Earnings are no longer an automatic quarterly downgrade by analysts and, crucially, balance sheets have largely been restored to full health. It remains a sector laden with investor scepticism and unnerving share price volatility, but we will stay the course and are optimistic for a normalised yield curve.

Investment report for the year from 1 July 2016 to 30 June 2017

Investment Fund Manager

Guy Barnard

The fund returned 7.0% in Euro terms. Meanwhile, the FTSE EPRA/NAREIT Europe Capped Index increased 5.5% over the same year.

European equity markets made gains over the year, recovering from the fallout from the UK's referendum to leave the European Union (EU) and supported by Donald Trump's surprise victory in the US election, which raised hopes of more expansionary fiscal policy, spurring inflation expectations globally. Growth indicators also suggested an improving economic backdrop in Europe, and political risk declined significantly following the election of Emmanuel Macron in the French election. Meanwhile, both the Bank of England and the European Central Bank (ECB) expanded their policies of ultra-low interest rates and quantitative easing (whereby a central bank creates large sums of money to purchase government bonds or other securities, in order to stimulate the economy), albeit with the ECB signalling a reduced pace of monthly purchases in 2017 and a further taper likely later this year. The reflation theme saw longer-dated sovereign bond yields move higher, resulting in a rotation from income-producing to cyclical sectors. As a result, property equities underperformed the wider European equity market.

Within the property sector, the smaller Norwegian, Finnish and Austrian markets all performed strongly, with the latter two strengthened by merger and acquisition (M&A) activity. Spanish stocks made strong gains as evidence emerged of rental growth becoming more widespread. German stocks also recovered from a weaker end to 2016 following continued strength in the residential market, most notably in Berlin, as well as an acceleration in office rental growth. UK property stocks made gains (despite further currency weakness) as property markets stabilised following the EU exit vote and values stabilised and began to rise from the fourth quarter of 2016.

The fund outperformed its index over the year, driven by stock selection. Notable value was added in France, where our positions in office landlord lcade and residential developer Kaufman & Broad posted strong gains. Positioning within the UK also added significant value, with our preference for structural growth areas such as Segro and Hansteen in the industrial/logistics space and self-storage company Safestore posting gains. A recovery in those stocks hit hardest after the EU membership referendum and in which we added holdings late in 2016 also helped performance, with St Modwen and Capital & Counties recovering. Berlin-focused residential landlords Deutsche Wohnen and ADO again delivered attractive returns, as did commercial landlords Aroundtown and VIB. Finally, our overweight in Spain was beneficial through holdings in Inmobiliaria Colonial and Merlin Properties.

We maintained a fairly neutral stance at a country level against the index, given the current macroeconomic uncertainty and associated currency volatility (the rate and extent to which markets move up and down). We did, however, add to our German holdings, where we expect ongoing fundamental strength in both the residential and commercial property markets, most notably in Berlin. Here we initiated a new position in Aroundtown in the commercial sector, for its strong cash flow growth prospects. Within the residential space, we switched out of large-cap Vonovia, adding new positions in LEG and Buwog, and increasing our position in ADO Properties on valuation grounds. In the UK, we have continued to focus on areas of structural growth, increasing holdings in the industrial and logistics sector through Segro and Hansteen; student accommodation through Unite; and the nascent private rented sector (PRS) in the UK through the initial public offering of PRS REIT (a real estate investment trust).

Conversely, we further reduced London holdings, exiting positions in Derwent London and Land Securities. We also added to selective smaller-cap names late in 2016 that looked oversold, such as Helical and St Modwen, as well as a new position in Capital & Counties. Elsewhere, we sold out of Swiss company PSP, where fundamentals remained challenging, and took profits in French office landlord Gecina. In Belgium, we added listed healthcare landlord Aedifica, which we expect to benefit from structural trends and acquisitions. We remained constructive on the Swedish market and used weakness, driven by potential taxation changes, to add to holdings in Hemfosa and Wihlborgs, having previously sold Kungsleden.

The combination of European political risk abating and economic growth improving should provide an attractive backdrop for investors in the region. We believe that this, coupled with real estate's offer of an attractive income yield with predictable growth characteristics, should deliver attractive returns, even as bond yields begin to rise. While market-wide capital growth is likely to slow in the year ahead, there remain pockets of stronger growth that we can target at a country, sector or city level. Additionally, the income streams of the property sector remain incredibly robust, with the current dividend yield of almost 4% forecast to grow by 7% per annum for the next two years.

Investment report for the year from 1 July 2016 to 30 June 2017

Investment Fund Managers

Ollie Beckett and Rory Stokes

The fund returned 37.0% in Euro terms versus 25.5% for the benchmark index.

There was no shortage of political events to worry about in the 12 months to 30 June 2017. The market had to contend with elections in the US, Austria, the Netherlands, France and the UK, as well an Italian referendum on political reform. While these events were not completely ignored by investors, the robust returns over the year serve to highlight the greater importance of strong economic growth and corporate health. Regarding the European economy, the data was largely positive; the manufacturing purchasing managers' index reached a six-year high, unemployment continued to fall, industrial production increased, credit growth returned and consumer confidence moved to attractive levels. Given this improvement, it was not surprising to see gross domestic product (GDP) forecasts upgraded to approximately 2% for the eurozone in 2017. While this is not an eye-catching figure, it allows for a good operating environment for Europe's smaller companies, which look set to grow earnings at close to 20% in 2017.

The fund performed well, driven by good stock selection as well as our bias toward the value style. We have resisted the urge in recent years to shift the portfolio to the better performing 'quality growth' end of the market, where valuations have continued to rerate (undergone a reassessment by the market) far beyond what we would deem reasonable value. Instead, we have sought more attractively valued shares in the more cyclical end of the market.

Burford Capital (the number one global player in the relatively new industry of litigation finance) performed well, having announced the acquisition of its nearest competitor. Lenzing was again among our biggest contributors as strong demand underpinned prices. The Austrian-based company is the leading global manufacturer of viscose fibres and related speciality fibres. We trimmed our holding following a period of share price strength. We also saw good returns from Dutch financial Van Lanschot, where receding political risk focused investor attention on the company's low valuation. We had good returns from solar technology company Meyer Burger. We bought the company in the second quarter of 2017 on expectations that orders would return as the cost of solar (and other renewables) is finally close to parity with more traditional energy sources. Participation in the initial public offering (IPO) of Alfa Financial Software was also a positive contributor during the quarter, and we believe the strong track record established by the company's founders can be repeated within public markets. The dominance that has been built within asset leasing markets gives the business access to a fast growing structural trend that is taking place across a number of industries, regions and end markets.

Our biggest detractor was Imagination Technologies following the news that Apple would no longer require the company's graphics chip, having developed its own. This marks a new level of aggression from Apple towards its supply partners, and for that reason, we sold Dialog Semiconductor, whose power management chip could go the same way. It also serves as a reminder that companies with high levels of customer concentration should trade at structurally lower valuation multiples.

Purchases included SGL Carbon, which refined its portfolio to focus on high growth areas in carbon composites supplying the autos industry, as well as lithium ion batteries. We also bought back into De'Longhi; its latest range of 'bean to cup' coffee machines looks likely to do well, and sell-side analysts now have more realistic forecasts. We bought Guillin (thermos formed plastic packaging), as French election fears offered us an attractive entry point. We also participated in the IPO of Aumann, which looks well positioned in electrical drivetrains, as we see the adoption of electric vehicles gathering pace. We also returned to Barco (a stock we held a number of years ago); in recent years, the company has been going through a transition to focus on its most attractive niches. This predominantly means digital cinema, which looks to be at the start of a replacement/upgrade cycle. We sold Rheinmetall, as the whole defensive sector ran very hard after the election of Donald Trump in the US. We also sold Hellenic Telekom, as although we are seeing good levels of cash generation, this is unlikely to translate into shareholder dividends. We sold Indra Sistemas, which had disappointing results in regards to reaching its cost cutting targets.

While we continue with our bias toward value stocks, it has been encouraging to see the market less dominated by a particular style in 2017. This serves as a reminder that our time is best spent finding mispriced securities where the market perception is wrong, rather than focusing too much on where the German 10-year bund yield goes next.

That being said, many clients have been asking us recently for our view on European smaller companies after a period of strong performance. We take the somewhat simplistic view that small caps are a leveraged play on global GDP growth (at approximately 2.2x historically), so if you believe that the global economy is continuing to grow, then small caps look attractive. From a regional standpoint, Europe is yet to have a meaningful earnings recovery; hence, we believe the superior levels of growth forecast for 2017 (versus the US and Asia) are much more achievable.

World Select Fund

Investment report for the period from 1 July 2016 to 31 March 2017

Investment Fund Managers

Ian Tabberer and Wouter Volckaert

Please note that as of 1 September 2016, Wouter Volckaert took over co-management of this fund from Matthew Beesley.

The fund underperformed over the period from 30 June 2016 to 31 March 2017, returning 7.2% versus a return of 13.6% for the MSCI World benchmark in US Dollar terms over this period, performance was negatively impacted by weakness in the healthcare and consumer discretionary sectors and within stock selection in North America.

At the start of the period, investors dealt with the surprise outcome of the UK's decision to leave the European Union (commonly known as 'Brexit'), but market attention soon moved on from this theme. Developed and emerging markets rallied, with Sterling the only lasting casualty of the Brexit fallout, as it fell against most major currencies. With economic growth picking up in the US, UK and Europe, investors started to question the theory that interest rates would remain 'lower for longer'. On 8 November 2016, Donald Trump beat Hillary Clinton to the US presidency. Contrary to expectations, markets rallied on the result. Trump's reflationary (pro-growth) rhetoric, echoing his personal mantra of 'borrow and build', drove a rally in financials sensitive to interest rates and the underperformance of bond proxies (an equity perceived to pay safe and predictable income).

At the beginning of 2017, markets climbed on continued expectations that President Donald Trump would deliver on his proposed tax cuts and fiscal stimulus plans. This helped global equity markets, as measured by the MSCI World Index, deliver their sixth consecutive quarterly rise through to the end of March 2017. Expectations that Trump's policies would be positive for economic growth (via lower taxes and increased fiscal spending) have underpinned strong equity markets since his election. While economic data in the US has shown some signs of plateauing and Trump's policy implementation was less successful, positive economic data in Europe, Japan and China are supporting investor expectations for future growth. Additionally, first quarter earnings results were the best in almost two years, with positive earnings per share growth and a majority of companies beating estimates in all the key developed markets.

At the stock level, within the healthcare sector, Israeli pharmaceutical company Teva Pharmaceuticals underperformed, as the generics industry continued to face increasing pricing pressures. For Teva in particular, investor sentiment is tied to the performance of its multiple sclerosis drug Copaxone, which started to come under pressure from a potential launch of a generic by Sandoz (a subsidiary of Novartis). Additionally, management lowered its earnings guidance as a result of delays to the launch of new generic drugs. However, the firm has one of the strongest drug pipelines in the sector, and the reset in expectations could provide a floor for the shares. Within the consumer staples sector, US low cost retailer Dollar General was also weak. The stock fell by nearly 30% during the third quarter of 2016 on slightly disappointing earnings results. This miss was mainly driven by a reduction in the provision of US food stamps, which are often presented as a form of payment at Dollar General; the results were not in themselves that weak. However, cautious comments regarding the second half of the year led investors to take some profits. As economic data improved and the post-US election rally began to favour growth stocks, Dollar General continued to lag the broader market. On the positive side, French electronic components supplier Legrand reported strong earnings, with sales and operating profits rising strongly over the period, underpinned by both organic growth and acquisitions. The company retained its full-year 2017 earnings target and should continue to benefit from the improving European economy.

Hedged share classes

Hedged share classes in the funds are identified with a "H" immediately before the currency denomination. A hedged share class is a share class of the Company designated in a currency other than the base currency of the relevant fund. Hedged share classes allow the investment manager to use currency hedging transactions to reduce the effect of fluctuations in the rate of exchange between the designated currency of shares in those classes and the base currency of the fund.

Policies applicable to all funds

To the extent permitted by the Section 'Investment Restrictions' of the Prospectus, the funds may also invest in either closed-ended or open-ended investment funds, or other transferable securities, including derivatives, which invest in, or provide a return linked to, any of the transferable securities that they are permitted to invest in.

For the purpose of maximising portfolio returns, the funds may also, within the limits set forth in the Section 'Investment Restrictions' of the Prospectus, engage in a policy of currency hedging and make use of derivatives for efficient portfolio management when it is thought by the Investment Manager to be appropriate.

Further, some of the funds may invest into derivatives within the limits set forth in the Section 'Investment Restrictions' of this Prospectus in order to enhance returns. Each fund may, on an ancillary basis, hold liquid assets. All funds may also, to the extent permitted by applicable regulations, on a temporary basis or for defensive purposes, invest in government debt securities.

Cross sub-fund investments

As at 30 June 2017, cross sub-fund investments represented an amount of USD 10,034,574 and therefore the total combined Net Asset Value, without cross-investments, would be USD 17,071,171,738.

The following funds held cross investments at year-end:

- Henderson Horizon Fund Global Multi-Asset Fund, which invested in Henderson Horizon Fund Global High Yield Bond Fund and Henderson Horizon Fund Total Return Bond Fund.
- Henderson Horizon Fund Euro Corporate Bond Fund, which invested in Henderson Horizon Fund Euro High Yield Bond Fund.

As at 30 June 2017

2. Presentation of Financial Statements

The accompanying financial statements present the assets and liabilities of the individual funds and of the fund taken as a whole. The financial statements of each individual fund are expressed in the currency designated in the prospectus for that particular fund and the financial statements of the Company are expressed in United States Dollars. When the base currency of the fund is not in United States Dollar, the difference between the opening net assets stated at exchange rates ruling at the beginning of the year and their value at the financial period end is shown as an Exchange rate effect on opening net assets in the Combined Statement of Changes in Net Assets. The financial statements have been prepared in accordance with the format prescibed by Luxembourg legal and regulatory requirements for undertakings for collective investment.

Each fund is treated as an independent entity. Shareholders of each fund are entitled only to the wealth and yield of the fund to which they have subscribed. Each fund bears the appropriate amount of liabilities attributable to it and the commitments entered into in the name of one fund are covered solely by the assets of that fund. The fund will not be liable as a whole to third parties. Separate accounts and records will be maintained for each fund.

As the financial statements include dividend declarations effective for the distribution as of 30 June 2017, the Net Asset Values shown throughout the report may differ from those published on 30 June 2017 for dealing in these funds.

3. Significant Accounting Policies

The following is a summary of the significant accounting policies followed by the fund:

Valuation of Investment Securities

The investments of each fund will normally be valued on the basis of either the last available mid-market price (the mid point between the quoted bid and offer prices) or, for certain markets, the last traded price on the principal stock exchange or market on which the investments are quoted, listed or normally dealt in as at 1.00p.m. Luxembourg time on the relevant Dealing Day with the exception of the Global Equity Income Fund, Emerging Market Corporate Bond Fund, Global Corporate Bond Fund, Global High Yield Bond Fund, Global Technology Fund, Core Credit Fund, Global Property Equities Fund, Global Natural Resources Fund, US Growth Fund and Global Multi-Asset Fund which are valued as at 4.00p.m. Luxembourg time. All other assets, including restricted and not readily marketable securities, will be valued in such manner as the Directors consider appropriate to reflect their fair value.

In the case of Core Credit Fund which is valued at 4.00pm. Luxembourg time on any Wednesday that is a Business Day a special NAV was calculated as at 30 June 2017 for financial statement purposes.

In the event that net subscriptions or redemptions on any Dealing Day represent a material proportion of the Shares in issue, or in such other circumstances as the Directors consider appropriate, the investments may be valued on an offer or bid basis, as appropriate, taking into account the applicable dealing costs, or in such a manner as the Directors deem appropriate, to reflect more fairly the value of the investments in the circumstances.

Securities which are neither listed on any stock exchange nor dealt on another regulated market will be valued in such manner as the Directors consider appropriate to reflect their fair value.

Units or shares of open-ended undertaking for collective investment ("UCI") are valued at their last determined and available net asset value or, if such price is not representative of the fair market value of such assets, then the price as determined by the Directors on a fair and equitable basis. Units or shares of a listed closed-ended UCI are valued at their last available stock market value.

The last Dealing Day of the current year was 30 June 2017 and the investments have been valued based on the relevant market or traded price attributable to that Dealing Day.

In the case of short term instruments, the value of the instrument based on the net acquisition cost, is gradually adjusted to the repurchase price thereof. In the event of material changes in market conditions, the valuation basis of the investment is adjusted to the new market yields.

As a result of time variations in certain markets the prices applied to certain funds do not necessarily reflect the closing market prices for the same calendar day as the relevant Dealing Day.

As at 30 June 2017

Forward foreign exchange contracts

Forward foreign exchange contracts are valued at the forward rate applicable at the statement of net assets date for the period until maturity. Gains or losses resulting from forward foreign exchange contracts are recognised in the Statement of Operations and Statement of Changes in Net Assets

Financial futures contracts

Financial future contracts are valued at the exchange quoted price at 1.00 pm Luxembourg time with the exception of the World Select Fund, the Global Technology Fund, the Global Property Equities Fund, the Global High Yield Bond Fund, the Global Equity Income Fund, the Core Credit Fund, the US Growth Fund and Global Multi-Asset Fund which are valued as at 4.00pm Luxembourg time. Initial margin deposits are made in cash upon entering into futures contracts. During the period the future contract is open, changes in the value of the contract are recognised as unrealised gains and losses by marking to market on a daily basis to reflect the market value of the contract at the end of each day's trading. Variation margin payments are made or received, depending upon whether unrealised losses or gains are incurred. Variation margin payments are recorded in the Futures margin account in the statement of net assets. When the contract is closed, the fund records a realised gain or loss equal to the difference between the proceeds from (or cost of) the closing transaction and the opening transaction.

Options

When the fund purchases an option, it pays a premium and an amount equal to that premium is recorded as an investment. When the fund writes an option, it receives a premium and an amount equal to that premium is recorded as a liability. The investment or liability is adjusted daily to reflect the current market value of the option. If an option expires unexercised, the sub-fund realises a gain or loss to the extent of the premium received or paid.

Option premiums are treated as revenue and distributed accordingly. This applies to Asian Dividend Income Fund and Total Return Bond Fund.

Swap contracts

Funds may enter into Credit Default Swaps and other types of swap agreements such as interest rate swaps, swaptions and inflation linked swaps. Gains or losses resulting from swap contracts are recognised in the Statement of Operations and changes in net assets. The premiums received resulting from Credit Default Swaps are recognised under Derivative income/expense in the Statement of Operations. Swaps are valued at fair market value as determined in good faith pursuant to procedures established by the Management Company.

Contracts For Difference

For contracts for difference, changes in the value of the contracts are recognised as unrealised gains or losses in the Statement of Net Assets by "marking-to-market" the value at the balance sheet date, using prices supplied by independent pricing services that are based on the closing prices of the underlying securities on the recognised exchanges. When a contract is closed, the difference between the proceeds from (or cost of) the closing transaction and the original transaction is recorded as a realised gain or loss in the Statement of Operations.

Realised Gains & Losses on Sale of Investments

The computation of realised gains and losses on sales of investments is made on the basis of average cost.

Income

Dividends are recognised as income on the dates that securities are first quoted as "ex-dividend" to the extent information thereon is reasonably available to the fund. Interest is accrued on a daily basis.

Dividend and interest income is disclosed net of withholding tax where applicable.

Dividends received on Contracts for Difference, Swap Income and Hedge Income are reflected in the Statement of Operation under the caption "Derivative income".

Dividends paid on Contracts for Difference, Swap Expense and Hedge Expense are reflected in the Statement of Operation under the caption "Derivative expense".

Collective investment scheme-Management fee rebates are received from management companies and are recognised when the entitlement arises, as either income or capital in accordance with the treatment of the management fee charged on the underlying Collective investment scheme. Management fee rebates are reflected in the Statement of Operations under "Other income".

As at 30 June 2017

Securities lending

The fund, with the exception of Core Credit Fund, has entered into a securities lending programme with BNP Paribas Securities Services acting as the Securities Lending Agent for the purposes of efficient portfolio management.

The Securities Lending Agent shall ensure that sufficient value and quality of collateral is received before or simultaneously with the movement of loaned collateral. This will then be held throughout the duration of the loan transaction and only returned once the lent asset has been received or returned back to the relevant fund.

Securities lending generates additional revenue for the benefit of the relevant fund and is accounted for in the Statement of Operations under 'Other income'.

Designated Currencies

As permitted by Luxembourg law, the books of the fund are kept in United States Dollars ("USD") with the exception of the Euroland Fund, the European Growth Fund, the Pan European Smaller Companies Fund, the Pan European Property Equities Fund, the Pan European Equity Fund, the Pan European Alpha Fund, the Euro Corporate Bond Fund, the Euro High Yield Bond Fund, the Total Return Bond Fund and the Pan European Dividend Income Fund which are kept in Euro ("EUR"). The base currency of Global Multi-Asset Fund is Sterling ("GBP") and the base currency of Japan Opportunities Fund and Japanese Smaller Companies Fund are in Japanese Yen ("JPY")

The EUR, GBP and JPY figures have been converted into US Dollars in order to produce consolidated combined financial statements to comply with Luxembourg regulations.

Realised and Unrealised exchange differences on the re-valuation of foreign currencies are taken to the Statements of Operations.

Hedged share classes

Hedged share classes allow the investment manager to use currency hedging transactions to reduce the effect of fluctuations in the rate of exchange between the currency of shares in those classes and the base currency of the fund.

Any benefits or losses of the hedging transactions should accrue to shareholders in that hedged share class only. The investment manager will review the relevant hedging positions on a regular basis and, if considered appropriate, make adjustments to correct the allocations across share classes.

The currency transactions will not cause the hedged class shares to be leveraged. The value of the share class to be hedged will be made up of both capital and income elements and the investment manager intends to hedge between 95-105% of the value of each hedged Share class. Adjustments to any hedge to keep within this target range will only be made when the required adjustment is material. As such the hedged class shares will not be completely protected from all currency fluctuations.

4. Dilution adjustment

The Henderson Horizon Funds operate a single swinging price policy, the threshold of which is determined by the Directors.

The Investment Manager may consider that it is in the best interests of the Company to apply a Swing Pricing adjustment, given the prevailing market conditions and the level of certain subscription or redemption requested by Shareholders in relation to the size of any fund. A Swing Pricing adjustment (a means of compensating a fund for the dilution effect of material subscription or redemption activity on the fund) may be applied to the Net Asset Value to account for the cost of dealing in the underlying securities. The Swing Pricing mechanism may be applied across all funds and may be adopted to protect the interests of shareholders of the fund.

If the net dealing on any valuation day is greater than the set tolerance of the total value of the fund, the price will be swung up/down depending on whether the net dealing is positive/negative.

The adjustment is included in the price of the fund therefore all investors in the fund will be affected by the price adjustment. e.g. If the price is swung up, investors buying into the fund will get fewer shares for their investment amount, while if it is swung down investors redeeming their shares will do so at a lower price.

On 30 June 2017, the last working day of the year ender review, no dilution adjustments were applied to the funds.

As at 30 June 2017

5. Rates of Exchange

The rates of exchange used for the conversion into USD of assets and liabilities of the fund denominated in other currencies and with respect to funds whose investment are valued at 1:00pm Luxembourg time as detailed in note 3 to the financial statements as at 30 June 2017 are as follows:

LICD 1 IDD 12227E004016	LICD 1 DUD EO 4E0001E

^{*} Class X shares are not available on the Core Credit Fund.

Additional fees and expenses will be charged to Shareholders of Class C Shares of the Pan European Equity Fund and Global Technology Fund, Class G Shares, Class I Shares, and Class M Shares as part of the management fee subject to the limit on the relevant management fee set out in "Management Fees" above. All additional fees and expenses that the Company can not recover from the Shareholders of Class C Shares of the Pan European Equity Fund and Global Technology Fund, Class G Shares, Class I Shares, and Class M shares through the management fee shall be borne by the Investment Manager.

The management fee for Class Z Shares is agreed between the investor and the Company and is not payable out of the property of the fund.

^{**}The AMC of the Class A share is 0.75%, Class X is 1.00%.

^{***}Fund closed on 31 March 2017

As at 30 June 2017

6. Fees and Operational expenses (continued) Administration, Registrar and Transfer Agent Fees Performance fees

The Investment Manager, in addition to the management fee, is entitled to receive out of the assets of the relevant Fund (excluding the Total Return Bond Fund, Core Credit Fund, Class B and Class R Shares of the European Growth Fund and excluding Class C, Class M, Global Multi-Asset Fund, Class N and Class Z Shares of the relevant Funds) a performance fee as detailed in the prospectus. At 30 June 2017, the following accruals were made for performance fees: Emerging Market Corporate Bond USD 1,261, Euro Corporate Bond Fund EUR 38,582, Euro High Yield Bond Fund EUR 20,578, Global High Yield Bond Fund USD 13,092, Asian Dividend Income Fund USD 626, Asian Growth Fund USD 72,482. Euroland Fund EUR 3,264,735, European Growth Fund EUR 35,300, Japan Opportunities Fund JPY 8,671,187, China Fund USD 13,841, Global Property Equities Fund USD 921, Global Technology Fund USD 244, Japanese Smaller Companies Fund JPY 114,900,899, Pan European Alpha Fund EUR 8,515,398, Pan European Property Equities Fund EUR 85,603 and Pan European Smaller Companies Fund EUR 5,328,916.

Administration, Registrar and Transfer Agent Fees

BNP Paribas Securities Services, Luxembourg Branch was appointed as Administrator under a fund administration agreement (the "Fund Administration Service Agreement").

The Administrator is entitled to receive out of the assets of the Company fees in consideration for providing administration services to the Company along with reasonable out-of-pocket expenses and disbursements.

The fees of the Administrator comprise transaction based fees and asset based fees and do not exceed 0.18% p.a of the net assets of the relevant fund

The actual fees paid are disclosed in the accounts and accrued on a daily basis.

RBC Investor Services Bank S.A., was appointed by the Management Company as Registrar and Transfer Agent under a registrar and transfer agent agreement (the "Registrar and Transfer Agent Agreement"). The Registrar Agent is responsible for processing the issue, redemption and transfer of Shares as well as the keeping of the register of Shareholders.

The Registrar is entitled to receive out of the assets of the Company fees in consideration for providing services to it along with reasonable out-of-pocket expenses and disbursements.

The fees of the Registrar Agent comprise transaction based fees and asset based fees and do not exceed 0.12% p.a. of the net assets of the relevant fund.

The actual fees paid are disclosed in the accounts and are payable monthly in arrears.

Custodian Fees

BNP Paribas Securities Services, Luxembourg Branch has been appointed by the Company under an agreement (the 'Custodian Agreement') to assure the safe custody of the Company's assets.

The Custodian is entitled to receive out of the assets of the Company, fees in consideration for providing services to it, along with reasonable out-of-pocket expenses and disbursements.

The company will pay the custody fees comprising asset-based fees and transaction-based fees that vary depending on the market in which a particular fund invests: these fees will not exceed 0.65% per annum of the value of the assets of the relevant fund and GBP120 (USD190) per transaction respectively.

The fees are accrued daily and paid monthly in arrears.

As at 30 June 2017

6. Fees and Operational expenses (continued)

Depositary Fees

BNP Paribas Securities Services, Luxembourg Branch has been appointed as Depositary for the Company in order to comply with new UCITS V regulation. The company will pay to the Depositary a fee for fiduciary services, which is set at a rate of 0.006% per annum on the total net assets of the relevant fund (subject to a minimum fee of GBP 1,200 (USD 1,800) per fund). This fee is accrued daily and is paid monthly in arrears.

Other expenses

The fund will pay, as far as allowable under applicable regulations, all other operating expenses which include, without limitation, taxes, expenses for legal and auditing services, printing Shareholders' reports, Prospectuses, all reasonable fees and out of pocket expenses of the Directors, registration fees and other expenses due to supervisory authorities and local, regulatory and tax representatives appointed in various jurisdictions, insurance, interest and brokerage costs. The fund will also pay fees or other charges levied in respect of the provision and use of benchmarks, dividend and redemption payment costs and the costs of publication of the net asset value or other fund information, including, but not limited to, that required to be published by any regulatory authority.

Collective investment scheme

When a fund may invest all or substantially all of its assets in Collective investment schemes, there may be additional costs of investing in the underlying funds("underlying funds' TERs") which would increase the TER of the fund. Accordingly the fund's TER will include a synthetic element to incorporate the TER of the underlying funds.

When investing into other collective investment funds managed by Janus Henderson group plc, there will be no double charging of management fees.

7. Shareholder Servicing Fee

A shareholder servicing fee at the rate of 0.5% per annum for the Regional and Specialist Funds (except for the Global Multi-Asset Fund) and 0.25% per annum for the Global Multi-Asset Fund and the Bond Funds of the relevant fund's average daily net assets is payable to the Distributor in respect of Class A, Class F, Class H, Class N and Class X shares. No shareholder servicing fees are payable on Class C, Class E, Class G, Class GU, Class IU, Class IF, Class M, Class Q, Class S, Class Y or Class Z shares of the relevant funds. The fee is accrued daily and payable monthly in arrears. The fee is payable to the Distributor for the provision of the following services; responding to existing investors' queries, maintenance of records of shareholders' accounts, issuance and delivery of periodic account statements to shareholders and assistance in handling purchases, exchanges and redemption of shares.

No shareholder servicing fees are payable in respect of all other share classes.

Initial Charge

As Principal Distributor, Henderson Global Investors Limited is entitled to receive in respect of Class A, F, H, N, Q, R and S shares of all funds an initial charge paid by the investor. The Initial Charge shall be expressed as a percentage of the Net Asset Value per share, until otherwise notified and will not exceed 5% of the total amount invested by an investor (which equals a maximum of 5.26% of the net asset value of the Share) and Class B, Class C, Class E, Class G, Class GU, Class IU, Class M and Class X Shares for the below funds:

Bonds

Core Credit Fund, Emerging Market Corporate Bond Fund and Global Corporate Bond Fund.

Regional

Pan European Dividend Income Fund

Specialist

Asia-Pacific Property Equities Fund, China Fund, Global Equity Income Fund, Global Natural Resources Fund, Global Technology Fund, Global Property Equities Fund, Japanese Smaller Companies Fund, Pan European Alpha Fund, Pan European Dividend Income Fund, Pan European Property Equities Fund and Pan European Smaller Companies Fund.

Except for the funds stated above, no initial charge is payable on Class E, Class G, Class IF, Class B, Class B, Class GU, Class B, Class C, Class B, Class

No initial charge is payable on Class Y and Class Z of any fund.

As at 30 June 2017

8. Distribution Fee

A distribution fee is payable to the Distributor in respect of Class X shares out of the assets of each fund at the rate of 0.6% per annum for the Regional and Specialist funds, and 0.35% per annum for the Bond funds of the relevant fund's average daily net assets, accrued daily and payable monthly in arrears. The fee is payable to the Distributor as remuneration for providing distribution-related services to the funds with respect to Class X shares.

9. Taxation

Under current Luxembourg law, there are no Luxembourg income, witholding or capital gains taxes payable by the Company. The Company is, however, subject to the tax on Luxembourg undertakings for collective investment ("tax d'abonnement"), calculated and payable quarterly, on the aggregate net asset value of each fund at the end of each quarter being 0.01% per annum on Class E, Class G, Class GU, Class I, Class IU, Class IF, Class B, Class C, Class M, Class Y and Class Z Shares and 0.05% per annum on all other share classes. No such tax is due on the portion of the Company's assets invested in other Luxembourg undertakings for collective investment.

No stamp duty or other tax is payable in Luxembourg on the issue of shares in the company.

Under current legislation, Shareholders are not subject to any capital gains, income, inheritance or other taxes in Luxembourg (except for Shareholders domiciled, resident or having a permanent establishment in the Grand Duchy of Luxembourg).

As at 30 June 2017

The fund offers 3 sub-classes. These sub-classes of Shares are abbreviated in the financial statements as "A1", "A2" and "A3", "I1", "I2" and "I3". Class C, Class M, Class N, Class S and Class Z offer only accumulation shares. Class B and Class R Distribution shares are only available on the European Growth Fund. The fee structure is described in notes 6, 7 and 8.

Sub-Class 1 shares – This share class distributes substantially all of the investment income after the deduction of fees, charges and expenses. Distributions will not include realised and unrealised capital gains.

Sub-Class 3 shares – This share class distributes substantially all of the investment income before the deduction of fees, charges and expenses. Distributions may include capital gains.

Accumulation shares are referred to as sub-class 2 shares.

^{*} Fund closed on 31 March 2017.

As at 30 June 2017

10. Share class detail (continued)

For holders of Accumulation shares of each of the funds, gross income and net realised and unrealised capital gains will not be distributed but will be accumulated.

All shares of the fund are of no par value and, subject to the restrictions of Luxembourg law, are each entitled to one vote at all meetings of the Shareholders.

"Shareholders may switch all or part of their shareholdings from one or more of the Funds into the same Class of one or more of the other funds on any Business Day.

Switches into Class E, Class G, Class GU, Class I, Class IU, Class IF, Class B, Class C, Class M, Class Y and/or Class Z Shares are not permitted, unless the investor switching into them is an institutional investor within the meaning of Article 174 of the law of 17 December 2010, relating to undertakings for collective investment.

Switches into Class G and Class GU shares are restricted to investors with a minimum total investment in Funds of the Company of €1,000,000,000 (or the equivalent in another currency) at the time of the initial investment and have specific distribution arrangements with the distributor. This minimum may be reduced at the discretion of the Directors.

Class B and Class R Shares are closed to investments from new investors.

Hedged share class

Where a Hedged Share Class is available it will be expressed as Class A H€, Class A HCNH, Class A HGBP, Class A HUS\$, Class A HSGD, Class A HSEK, Class A HCHF and Class A HAU\$.

Share Classes of the relevant fund may be made available in Euro, Sterling, Chinese Yuan, US Dollar, Singapore Dollar, Swiss Franc, Australian Dollar or Swedish Krona hedged versions or such other currencies at the Directors discretion. The Investment Manager will hedge the Shares of such classes in relation to the base currency of the relevant fund. Where such hedging is undertaken, the Investment Manager may use financial swaps, futures, forward currency exchange contracts, options and other derivative transactions in order to preserve the value of the hedged share class currency against the base currency of the fund.

An up-to-date list of the share classes available for the funds is available at the registered office of the Company.

11. Net Asset Value

The net asset value per Share of each fund will be expressed in the base currency of the fund, calculated on each business day in Luxembourg on each Valuation point and on other days as approved by the Board of Directors.

The net asset value for each Class of each fund is calculated by determining the value of the assets of the relevant fund applicable to that Class, including accrued income, and deducting all liabilities (including all fees and charges) of that Class, and dividing the resultant sum by the total number of Shares of that Class in the relevant fund in issue or allotted at that time, (the resulting amount being rounded to the nearest two decimal places) to give the net asset value per Share per Class of the fund.

Further details on rules that apply in valuing the total assets can be found in the current prospectus.

The assets of the funds are valued using prices available at different times during the day of 30 June 2017, being the last business day of the reporting period.

If the Company had calculated the net asset values solely with a view to publication, the market prices used to value the net assets would have been the closing prices on 30 June 2017. However, these net asset values would not have been significantly different from those shown in these financial statements, except for the following sub-funds, for which the following variations would have been observed:

Sub-fund	Currency	% difference (in % of NAV)
Euroland Fund	EUR	(0.86)
Pan European Equity Fund	EUR	(0.91)

12. Equalisation

The Company will maintain equalisation accounts in relation to the shares with a view to ensuring that the levels of distribution payable to investors in the share are not affected by the issue and redemption of, or the switch from or into, shares of those funds during an accounting period. The price at which shares are bought by an investor will therefore be deemed to include an equalisation payment (which will be credited to the relevant equalisation account) calculated by reference to the accrued income of the share class, net of fees, charges and expenses where applicable.

The first distribution which an investor receives in respect of such shares following the purchases may include a repayment of capital.

As at 30 June 2017

13. Dividend Distributions

During the year from 1 July 2016 to 30 June 2017 dividends were declared and were paid on the following funds:

Fund	Share class	Accounting date	Payment Date	Rate per share in Fund currency	No of shares cu	Fund urrency	Amount paid in Fund currency

15. Securities Lending Activities

The Company, with the exception of Core Credit fund, has entered into securities lending agreements for a number of equity and fixed income funds. In return for making securities available for loan throughout the period, the funds participating in the programmes received fees which are reflected in the financial statements of each participating fund under the "Other income" caption. The Company has appointed BNP Paribas Securities Services UK Limited (BP2S UK), acting through its London branch as agent for the equity and fixed income lending program. As remuneration for this agency role, BP2S UK receives a percentage of the variable fees from the associated program. All securities are fully collaterised.

Securities lending income is disclosed in the Statement of Operations in the caption "Other income".

As at 30 June 2017, the market value of the securities lent is as follows:

Fund	Counterparty	Ссу	Total market value of securities on loan	Amount of Type of collatera collateral received

As at 30 June 2017

16. Transactions with Connected Persons

During the year under review, the following transactions were entered into by the fund with the following connected persons of the fund:

(1) The Management Company and Investment Adviser – Note 6 documents the percentages of management fees and the performance fees relevant to each fund. The total amount charged by the fund to the Management Company and the Investment Adviser, Henderson Management SA, during the year in respect of these fees was USD 171,028,443 (June 2016: USD 170,089,910).

Out of the fees of the Investment Adviser and Management Company, the Investment Manager was entitled to fees at the rate of 25% of the Manager's management fee for the Regional and Specialist funds (except for the Pan European Property Equities Fund) and 12.5% of the Investment Adviser's and Management Company's management fee for the Bond funds and the Pan European Property Equities Fund. The total amount charged by the Manager to the Investment Manager during the year in respect of fees was USD 34,026,756 (June 2016: USD 37,868,938).

(2) The Distributor – fees paid to the Distributor were up to 0.5% per annum of the average total net assets of the Regional and Specialist funds (except for Global Multi-Asset Fund) and 0.25% per annum for the Global Multi-Asset Fund and the Bond funds (excluding those assets attributable to shareholders of the Class B, Class C, Class E, Class G, Class I, Class Y Class B, Class M, Class Q, Class R Class S, Class Z Shares).

The total amount charged to the fund by the Distributor during the year in respect of these fees was USD 40,289,619 (June 2016: USD 45,263,052).

Further, a Distribution fee on Class X Shares at the annual rate of 0.6% per annum for the Regional and Specialist funds and 0.35% per annum for the Bond funds of the fund's average daily net assets is payable to the Distributor. The total amount paid by the fund to the Distributor during the year in respect of these fees was USD 1,255,793 (June 2016: USD 1,706,183).

(3) The Directors fees payable to the Directors were USD 206,281 (June 2016: USD 185,508).

17. Soft Commission

The Investment Manager is authorised to effect transactions through brokers whereby the broker agrees to use a proportion of the commission earned on such transactions to discharge the broker's own costs or the costs of third parties in providing certain services to the Investment Manager. The services which can be paid for under such arrangements are those permitted under the rules of the Financial Conduct Authority (FCA) namely those that relate to the execution of transactions on behalf of customers or the provision of investment research to the Investment Manager.

18. Withholding tax reclaims

Withholding tax reclaims (WHT) have been filed in respect of WHT applied on French, Belgian, Danish, German, Italian, Spanish and Swedish dividends during the years 2003 to 2015. Claims received have been reflected in the funds when they are received. Total outstanding reclaims are shown below. The likely outcome of these reclaims cannot be assessed at the current point in time and consequently no amounts in respect of these reclaims have been included in these financial statements. The legal costs of pursuing these WHT reclaims will be borne by the fund. Should all of the claims be successful, the effect on each of the impacted funds (expressed in percentage of Net Assets as at 30 June 2017) would be as follows:

Fund	Total (EUR)	% Weighting of Total Net Assets
Euroland Fund	788,350	0.04%
European Growth Fund	75,657	0.08%
Pan European Equity Fund	7,673,765	0.27%
Global Natural Resouces Fund	212	0.00%
Global Property Equities Fund	111,574	0.04%
Global Technology Fund	259,364	0.01%
Pan European Alpha Fund	250,218	0.02%
Pan European Property Equities Fund	423,529	0.16%
Pan European Smaller Companies Fund	1,467,240	0.20%
Funds closed		
Pan European Equity Dividend Fund ¹	249,880	5.72%
Industries of the Future Fund ²	3,603	0.13%
World Select Fund ³	11,359	0.39%

An amount of €2,295,749 was received in the current year for French dividend reclaims relating to the years 2005 to 2008. These amounts have been included in the current year financial statements.

¹ Pan European Equity Dividend Fund is closed. The total assets used in the weighting percentage is as at 29 June 2012.

² Industries of the Future Fund is closed. The total net assets used in the weighting percentage is as at 31 January 2012.

³ World Select Fund is closed. The total net assets used in the weighting percentage is as at 31 March 2017.

As at 30 June 2017

19. Purchases and Sales of Securities

A listing of purchases and sales of securities during the year is available upon request at the registered office of the Fund.

The above transaction costs include costs directly linked to the acquisition or sale of investments, to the extent that such costs as shown separately on transaction confirmations.

As at 30 June 2017

22. Financial derivatives

The Company has used financial derivatives for hedging and meeting the investment objectives including risk reduction and implementation of investment policies. Details of individual contracts at market value are shown in the portfolio statements for the funds and the individual derivative underlying exposure position by counterparty at the year-end is summarised below. The underlying exposure, as defined by CESR Guidelines on Risk Measurement and the Calculation of Global Exposure and Counterparty Risk for UCITS ("CESR Guidance Document CESR/10-788"), may differ from the market value of the derivative position as presented in the individual fund portfolio statement.

As 30 June 2017, each category of derivatives were as follows:

	Fund Currency	Net forward foreign exchange contracts	Net future contracts	Interest rate swaps	Inflation rate swaps	Options	Credit default swaps	default	Contracts for difference

Henderson Horizon Strategic Bond fund launched on 26 July 2017.

Audit report

To the Shareholders of **Henderson Horizon Fund**

Our opinion

In our opinion, the accompanying financial statements give a true and fair view of the financial position of Henderson Horizon Fund and of each of its sub-funds (the "Fund") as at 30 June 2017, and of the results of their operations and changes in their net assets for the year then ended in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements.

What we have audited

The Fund's financial statements comprise:

- The Statements of Net Assets as at 30 June 2017;
- the Statements of Operations for the year then ended;
- the Statements of Changes in Net Assets for the year then ended;
- the Portfolios as at 30 June 2017; and
- the notes to the financial statements, which include a summary of significant accounting policies.

Basis for opinion

We conducted our audit in accordance with the Law of 23 July 2016 on the audit profession (Law of 23 July 2016) and with International Standards on Auditing (ISAs) as adopted for Luxembourg by the "Commission de Surveillance du Secteur Financier" (CSSF). Our responsibilities under those Law and standards are further described in the "Responsibilities of the "Réviseur d'entreprises agréé" for the audit of the financial statements" section of our report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

PricewaterhouseCoopers, Société coopérative, 2 rue Gerhard Mercator, B.P. 1443, L-1014 Luxembourg T: +352 494848 1, F: +352 494848 2900, www.pwc.lu

Cabinet de révision agréé. Expert-comptable (autorisation gouvernementale n°10028256) R.C.S. Luxembourg B 65 477 - TVA LU25482518

Independence

We are independent of the Fund in accordance with the International Ethics Standards Board for Accountants' Code of Ethics for Professional Accountants (IESBA Code) as adopted for Luxembourg by the CSSF together with the ethical requirements that are relevant to our audit of the financial statements. We have fulfilled our other ethical responsibilities under those ethical requirements.

Other information

The Board of Directors of the Fund is responsible for the other information. The other information comprises the information included in the annual report but does not include the financial statements and our audit report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the Board of Directors of the Fund and those charged with governance for the financial statements

The Board of Directors of the Fund is responsible for the preparation and fair presentation of the financial statements in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements, and for such internal control as the Board of Directors of the Fund determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors of the Fund is responsible for assessing the Fund's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors of the Fund either intends to liquidate the Fund or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Fund's financial reporting process.

Responsibilities of the "Réviseur d'entreprises agréé" for the audit of the financial statements

The objectives of our audit are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an audit report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF, we exercise professional judgment and maintain professional scepticism throughout the audit.

We also:

- identify and assess the risks of material misstatement of the financial statements, whether due to
 fraud or error, design and perform audit procedures responsive to those risks, and obtain audit
 evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting
 a material misstatement resulting from fraud is higher than for one resulting from error, as fraud
 may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal
 control;
- obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control;
- evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors of the Fund;
- conclude on the appropriateness of the Board of Directors of the Fund's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our audit report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our audit report. However, future events or conditions may cause the Fund to cease to continue as a going concern;
- evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

PricewaterhouseCoopers, Société coopérative Represented by

Luxembourg, 27 September 2017

Risk policies

The Management Company employs a risk management process that identifies the risks to which the individual funds and the Company taken as a whole are or might be exposed and how such risks are assessed, monitored and managed, ensuring compliance with relevant regulation. This enables it to monitor and measure at any time the risk of the portfolio positions and their contribution to the overall risk profile of the relevant fund, thereby ensuring that the global exposure of the underlying assets, including derivative instruments, shall not exceed the total net value of the relevant fund. In accordance with the Law of 17 December 2010 and the applicable regulatory requirements of the Commission de Surveillance du Secteur Financier ("CSSF") the management company reports to the CSSF on a regular basis on the risk management process.

Method

The global exposure of a fund is calculated by using either the commitment approach or value-at-risk approach by reference to its risk profile. The commitment approach means that financial derivative instruments are converted into the market value of the equivalent position in the underlying asset(s). Value-at-Risk ("VaR") is a mathematical-statistical concept and is commonly used as a standard measure of risk in the financial sector. The VaR approach is used, in general, for funds using derivative instruments or techniques within their investment strategies to generate additional leverage or market risk exposure.

Funds using the VaR approach

For such funds, the maximum potential loss that a fund could suffer in normal market conditions within a given time horizon and a certain degree of confidence is estimated. In these calculations all positions in the relevant portfolio are taken into consideration including those undertaken for efficient portfolio management purposes. For the purpose of calculating global exposure by VaR either a relative VaR approach or absolute VaR approach can be used; the selection of relative or absolute VaR methodology is determined by the availability of a reference portfolio appropriate for a fund in meeting its investment objective.

VaR model

VaR has been calculated using a Monte Carlo simulation approach. As a control mechanism, Monte Carlo results are compared to the parametric model for validation purposes within the daily monitoring process.

Parameters

The following parameters are applied as a minimum: a one-tailed 99% confidence interval, a holding period equivalent to one month (20 business days), effective observation period (history) of risk factors of at least 1 year (250 business days), quarterly data set updates and daily calculation.

Limits

For funds which have a suitable reference portfolio, the regulatory limit is that the VaR of the total portfolio's positions shall not be greater than twice the VaR of the portfolio's reference portfolio.

For those funds which are unable or for which it is not appropriate to determine a reference portfolio (e.g. absolute return type funds) an absolute VaR is calculated on all of the portfolio's positions. Absolute monthly VaR on such funds is not to exceed a regulatory maximum threshold of 20%.

As at 30 June 2017

The VaR method, limits and utilisation of those limits for the period from 1 July 2016 to 30 June 2017 are summarised in the table below:

VaR Results - for the year ended 30 June 2017

Fund	Global Exposure Reference Portfolio Actual VaR in year		year	VaR Limit	Utilisation of VaR Limit				
	Calculation basis		Minimum	Maximum	Average		Minimum	Maximum	Average
China Fund	Relative VaR	MSCI China Index	73.34%	105.92%	90.56%	200%	36.67%	52.96%	45.28%
Emerging Market Corporate Bond Fund	Relative VaR	JP Morgan Corporate Emerging Market Bond Index (CEMBI) Broad Diversified	84.16%	207.49%*	125.88%	200%	42.08%	103.75%	62.94%
Euro Corporate Bond Fund	Relative VaR	iBoxx Euro Corporates Index	96.47%	121.12%	108.12%	200%	48.24%	60.56%	54.06%
Euro High Yield Bond Fund	Relative VaR	Bank of America Merrill Lynch European Currency Non-Financial High Yield Constrained Index	69.35%	110.34%	88.42%	200%	34.68%	55.17%	44.21%
Global Corporate Bond Fund	Relative VaR	Barclays Global Aggregate Corporate Bond Index	89.99%	109.86%	101.27%	200%	45.00%	54.93%	50.63%
Global High Yield Bond Fund	Relative VaR	Bank of America Merrill Lynch Global High Yield Constrained Index	108.20%	147.78%	124.91%	200%	54.10%	73.89%	62.45%
Core Credit Fund	Absolute VaR	n/a	0.96%	1.46%	1.21%	20%	4.80%	7.32%	6.04%
Pan European Alpha Fund	Absolute VaR	n/a	1.39%	8.76%	5.56%	20%	6.95%	43.80%	27.78%
Total Return Bond Fund	Absolute VaR	n/a	1.26%	1.91%	1.62%	20%	6.28%	9.55%	8.11%

^{*} The Emerging Market Corporate Bond Fund temporarily exceeded the VaR ratio limit of twice the VaR of the reference portfolio on 14 February 2017 for portfolio positions as at close of business 13 February 2017. In accordance with internal processes the fund manager was alerted and traded out of the position with the largest contribution to the Fund's VaR.

For those funds measuring and monitoring global exposure using the VaR approach, the level of leverage arising from the use of derivative instruments is disclosed in the table below as a percentage of each fund's total Net Asset Value. The calculation is based on the sum of notional exposures of financial derivative instruments in the investment portfolio including those held for risk reduction purposes.

Please note this level of leverage is explicitly not an investment limit for the relevant fund and will vary over time under differing market conditions to ensure that the relevant fund meets its investment objective.

Leverage – for the year ended 30 June 2017

Fund	Leverage			
	Minimum	Maximum	Average	
China Fund	18.24%	60.73%	41.05%	
Emerging Market Corporate Bond Fund	0.00%	50.41%	10.40%	
Euro Corporate Bond Fund	17.68%	66.79%	36.65%	
Euro High Yield Bond Fund	34.92%	127.74%	67.86%	
Global Corporate Bond Fund	33.09%	150.36%	69.13%	
Global High Yield Bond Fund	34.13%	121.82%	64.35%	
Core Credit Fund	10.97%	45.91%	23.01%	
Pan European Alpha Fund	34.04%	109.22%	65.84%	
Total Return Bond Fund	125.45%	325.55%	193.45%	

As at 30 June 2017

Funds using the Commitment Approach

The global exposure for those funds not specified in the table above has been determined according to the commitment approach during the reporting period from 1 July 2016 to 30 June 2017. For such funds, each fund's total commitment to derivatives is limited to 100% of the relevant fund's total net value, being quantified as the sum as an absolute value of the individual commitments, after consideration of the possible effects of appropriate netting and hedging arrangements.

Remuneration Policy

Following the implementation of the UCITS V Directive in the UK from 18 March 2016, all authorised UCITS Management Companies are required to comply with the UCITS Remuneration Code. Under the Code, the Remuneration Committee of Janus Henderson Group plc in its oversight of Henderson Global Investors must make relevant remuneration disclosures in the first full performance year following the implementation date.

The disclosures must split remuneration between fixed and variable remuneration and must break down remuneration for categories of UCITS Code Staff (defined as all staff whose professional activities have a material impact on the risk profiles of the funds it manages).

The Janus Henderson Group plc Remuneration Committee approves the list of UCITS Code Staff annually. In addition, identified UCITS Code Staff are notified of their status and the associated implications annually.

Henderson Horizon Funds is managed by Henderson Global Investors, which is a subsidiary of Janus Henderson Group plc.

The Remuneration Committee of Janus Henderson Group plc has established a Remuneration Policy, one of the guiding principles of which is to ensure that the remuneration of its employees is consistent with and promotes sound and effective risk management and does not encourage risk-taking which is inconsistent with the risk profiles, rules or instruments of incorporation of each AFM and the funds they manage. This policy applies to Henderson Global Investors and Henderson Horizon funds.

Further information on the Janus Henderson Group plc Remuneration Policy is available in the Janus Henderson Group plc annual report and accounts.

The total remuneration figures are in fund currency.

- 1. This is actual number of employees who are fully or partly involved in the activities of Henderson Horizon fund range no attempt has been made to apportion the time spent specifically in support of Henderson Horizon fund as this data is not captured as part of the Company's normal processes.
- 2. Please note that due to the employment structure and resourcing of the Janus Henderson Group plc, the staff indicated in this table may provide services to other companies in the Janus Henderson Group plc.
- 3. The remuneration disclosed is only in respect of the provision of services to the individual funds for the year, rather than the total remuneration for the year for this purpose, remuneration has been apportioned between the provision of services to the funds and to other entities in the Henderson Group, as follows:
 - in respect of performance fee incentives, 100% of any direct allocations of performance fees generated within individual funds;
 - in respect of fixed pay and annual/long term incentive bonuses:
 - where fixed pay is directly attributable to (for example, fees for Horizon Board members), 100% of those fees;
 - for fund managers, pro-rated using the average AUM of the fund managed by the relevant fund manager (as a proportion of the total AUM managed by that individual) as a proxy.
 - for other individuals, pro-rated using the average AUM of the fund (as a proportion of the aggregate average AUM of Janus Henderson Group plc) as a proxy.
- 4. Senior Management includes the Henderson Executive Committee and other Group Board members and the Board of Henderson Horizon.
- 5. Other Code Staff includes all other UCITS Code Staff not covered by the above, including Fund Managers who manage AUM within the funds.

Note: Henderson Group plc merged with Janus Capital on 31 May 2017 to become Janus Henderson Group plc., the AUM, employee and compensation metrics used for the remuneration disclosure are primarily based on the Henderson Group plc prior to the merger as the combined group data only exists from 31 May 2017.

As at 30 June 2017

Eligibility for French "Plan d'Epargne en Actions" (PEA)

A PEA is a French equity savings plan intended to encourage French tax resident individuals to invest in European equities. PEA eligible funds must invest on a permanent basis at least 75% of their assets in PEA eligible securities issued by companies (i) established in a Member State of the European Union or in Iceland, Liechtenstein or Norway and (ii) subject to corporate income tax, or an equivalent tax.

Throughout the period 1 July 2016 to 30 June 2017, the sub-funds listed below invested more than 75% of their total net assets in PEA eligible securities. As at the date of this report, the sub-funds had the following percentage of their total net assets invested in eligible PEA securities:

Name of sub-fund	Proportion of PEA eligible securities as at 30 June 2017
Henderson Horizon Fund - Pan European Smaller Companies Fund	88.03%
Henderson Horizon Fund - Euroland Fund	98.46%
Henderson Horizon Fund - European Growth Fund	88.51%
Henderson Horizon Fund - Pan European Equity Fund	88.66%

The Directors have notified shareholders of the withdrawal of the PEA eligible status of Henderson Horizon Fund - Pan European Property Equities Fund at the end of the final quarter of 2016.

General Information

Henderson Horizon Fund (the "Company") is an open-ended investment company incorporated in Luxembourg as a société d'investissement à capital variable (SICAV) on 30 May 1985 and is a recognised collective investment scheme for the purposes of Section 76 of the United Kingdom Financial Services Act 1986. Potential investors in the United Kingdom are advised that all, or most, of the protections afforded by the United Kingdom regulatory system will not apply to an investment in the Fund and that compensation will not be available under the Financial Services Compensation Scheme.

The Fund provides a simple and cost effective way of investing in world equity and bond markets. The Fund, through its twenty six funds, provides investors with access to nineteen equity funds and seven bond funds.

Applications for shares may be made on any business day in Luxembourg to the Registrar and Transfer Agent between 9.00am and 6.00p.m. (local time), or to the Distributor in London between 9.00am and 5.00pm (local time). Applications should be made on the application form circulated with the Prospectus or by fax, telephone or in writing and may be made in any major currency. If you are sending applications by fax or telex, you should also subsequently send the original form by post. Applications are accepted by telephone only from existing investors who have previously been issued with a Personal Service Number.

For full information, including a copy of the Prospectus and the Key Investor Information Document (KIID), please write to the Registrar and Transfer Agent or Distributor at the addresses shown on page 1. Alternatively, contact the main dealing desk on Luxembourg +352 2696 2050 or visit the Fund's website: www.jaunshenderson.com/horizon.

Please remember that past performance is not necessarily a guide to future performance and do not take into account fees or commissions that may occur on subscription and redemption. The value of an investment and the income from it can fall as well as rise as a result of market and currency fluctuations and you may not get back the amount originally invested. Tax assumptions may change if the law changes and the value of tax relief will depend upon individual circumstances. Please refer to the Prospectus for information on the Henderson Horizon Fund.

Issued by Janus Henderson Investors. Janus Henderson Investors is the name under which Henderson Global Investors Limited (reg. no. 906355) (incorporated and registered in England and Wales with registered office at 201 Bishopsgate, London, EC2M 3AE and authorised and regulated by the Financial Conduct Authority) provide investment products and services. Past performance may not be a reliable guide to future performance. The value of an investment and the income from it can fall as well as rise significantly. Tax assumptions and reliefs depend upon an investor's particular circumstances and may change if those circumstances or the law change. Please refer to the Prospectus and the key investor information document for further information on the Henderson Horizon Fund. A copy of the Fund's prospectus, key investor information document, articles of incorporation, annual and semi-annual reports can be obtained free of cost from the local offices of Henderson Global Investors: 201 Bishopsgate, London, EC2M 3AE for UK, Swedish and Scandinavian investors; Via Dante 14, 20121 Milan, Italy, for Italian investors and Roemer Visscherstraat 43-45, 1054 EW Amsterdam, The Netherlands for Dutch investors; and the Fund's: Austrian Paying Agent Raiffeisen Bank International AG, Am Stadtpark 9, A-1030 Vienna; French Paying Agent BNP Paribas Securities Services, 3, rue d'Antin, F-75002 Paris; German Information Agent Marcard, Stein & Co, Ballindamm 36, 20095 Hamburg; Belgian Financial Service Provider CACEIS Belgium S.A., Avenue du Port 86 C b320, B-1000 Brussels; Spanish Representative Allfunds Bank S.A. Estafeta, 6 Complejo Plaza de la Fuente, La Moraleja, or Swiss Representative BNP Paribas Securities Services, Paris, succursale de Zurich, Selnaustrasse 16, 8002 Zurich who are also the Swiss Paying Agent. RBC Investor Services Limited, 51/F Central Plaza, 18 Harbour Road, Wanchai, Hong Kong, Tel: +852 2978 5656 is the Fund's Representative in Hong Kong.
