Who are Janus Henderson Investors?

Janus Henderson Investors exists to help clients achieve their long-term financial goals.

Formed in 2017 from the merger between Janus Capital Group and Henderson Global Investors, we are committed to adding value through active management. For us, active is more than our investment approach – it is the way we translate ideas into action, how we communicate our views and the partnerships we build in order to create the best outcomes for clients.

We are proud to offer a highly diversified range of products, harnessing the intellectual capital of some of the industry's most innovative and formative thinkers. Our expertise encompasses the major asset classes, we have investment teams situated around the world and we serve intermediary, institutional and individual investors globally. As at 31 December 2017, we had approximately US\$370.8bn (€308.8bn) in assets under management, more than 2,000 employees and offices in 27 cities worldwide. Headquartered in London, we are an independent asset manager that is dual-listed on the New York Stock Exchange and the Australian Securities Exchange.

At Janus Henderson, we believe in the sharing of expert insight for better investment and business decisions. We call this ethos *Knowledge. Shared. Knowledge. Shared* is reflected both in how our investment teams interact and in our commitment to empowering clients in their decision-making. In our view, knowledge is powerful when it is shared.

Directors' Report

Introduction

Janus Henderson Horizon Fund (the "Company") is an open-ended investment company incorporated in Luxembourg as a société d'investissement à capital variable (SICAV) on 30 May 1985 and is a recognised collective investment scheme for the purposes of Section 76 of the United Kingdom Financial Services Act 1986.

The Company is an umbrella structure, comprising various funds. Each fund is operated as a distinct fund with its own portfolio of investments and specific investment objectives.

Financial Statements

A copy of the latest Annual and Interim Report may be obtained upon request from either the offices of the companies registered as distributors or from the Registered Office of the Company. Alternatively, please go to www.janushenderson.com.

Activities during the period

The Company followed the normal activities of an open-ended investment company. The Investment Manager's Report that follows gives a general market review.

The Net Assets at 31 December 2017 amounted to USD 17.65 billion.

At the period end, the Company consisted of 27 active funds.

Fund Changes

- Details of share class launches, closures and share class name changes can be found on pages 207 and 209.
- Janus Henderson Horizon Strategic Bond Fund launched on 26 July 2017.
- Effective 15 December 2017, the Fund Advisory Agreement with Henderson Management S.A. as Investment Advisor was terminated.
- Effective 15 December 2017, Henderson Global Investors (Australia) Institutional Funds Management Limited, changed its name to Janus Henderson Investors (Australia) Institutional Funds Management Limited.
- Effective 15 December 2017, the Company changed its name from Henderson Horizon to Janus Henderson Horizon; all fund names changed to Janus Henderson Horizon, details can be found on page 207.

The Directors may from time to time close funds as well as add further funds with different investment objectives, subject to the approval of the Commission de Surveillance du Secteur Financier ("CSSF"). Notifications will be provided to shareholders on closure of a fund, which are also subject to review by the CSSF.

Corporate Governance Statement

The Board adheres to the Association of the Luxembourg Fund Industry ("ALFI") code of conduct for Luxembourg investment funds. The code of conduct sets a framework of high-level principles and best practice recommendations for the governance of Luxembourg investment funds.

On behalf of the Janus Henderson Horizon Fund Board, I would like to thank you for your continued support.

Les Aitkenhead
Chairman
28 February 2018

Market review

For the period from 1 July 2017 to 31 December 2017

Overview

Global equity markets rose over the six months to 31 December (MSCI World Index +9.7%, total return in US Dollar terms). There were mixed election results across Europe, while political tension between the US and North Korea rose. The UK continued to negotiate its exit from the European Union (EU) while central bank activity was somewhat divergent.

UK

In the UK, the FTSE All-Share Index rose (+7.2% total return in Sterling terms). Brexit discussions reached a deadlock in October but, in early December, a significant breakthrough occurred allowing trade talks to begin. The UK's Office for Budget Responsibility and the International Monetary Fund (IMF) both downgraded their outlook for UK economic prospects, with the IMF commenting that the Brexit process was damaging the UK economy. The gross domestic product (GDP) annual growth rate dropped to more than a four-year low in the second and third quarters of 2017, and consumer confidence fell to its lowest point in November since the Brexit vote. With inflation standing at a five-year high of 3.0%, the Bank of England (BoE) raised its benchmark rate from 0.25% to 0.5% in early November, as expected. However, inflation in the year to December dipped to 3% while wage growth remained subdued, weakening support for another imminent rate rise.

Europe

European equities were up over the period (FTSE World Europe ex UK Index +4.4 % total return in Euro terms) as the economy continued to perform strongly; eurozone economic confidence reached its highest level since 2001 in October. However, European Central Bank (ECB) President Mario Draghi refused to let the strong eurozone economy bring an end to quantitative easing, announcing an extension of the bank's bond purchase programme for another year (at half the monthly pace) as inflation remained below the 2% target. The decision weakened the Euro against the US Dollar and strengthened eurozone bonds. The German general election in September boosted the power of far-right group Alternative, and Catalonia's failed attempt to achieve independence from Spain caused Spanish equity funds to drop at their fastest rate since the 2008 global financial crisis. Meanwhile, European GDP growth for the second quarter was 0.7%, falling to 0.6% in the third quarter.

US

US equity markets advanced S&P 500 Index +11.4% in total return US Dollar terms, hitting record highs late in the period over rising oil prices, speculation about President Donald Trump's tax reform and a rally in technology stocks. Consumer price inflation rose to a five-month high in September as petrol prices increased due to the damage caused by Hurricane Harvey. As expected, the US Federal Reserve (Fed) raised interest rates in December based on continuing economic improvement, and predicted three more hikes in 2018. The annualised GDP growth rate for the second quarter was 3.1%, rising to 3.2% in the third quarter. Although the latter figure was revised slightly down from the second estimate of 3.3%, it still marked the highest growth rate since the first quarter of 2015. Among other things, this was boosted by government spending. Consumer sentiment (according to the University of Michigan) neared a 14-year high in October before falling back in November and December as US citizens, particularly in the lower-income bracket, became less optimistic about their economic prospects.

Japan

Japanese equities were up +13.8% total return in Yen terms, based on the Topix Index. In July, the country struck a free-trade deal with the EU, which is expected to benefit the Japanese automobile sector. The Yen strengthened against the US Dollar in August as investors sought 'safe haven' assets amid heightened tensions between the US and North Korea, but fell back as these fears eased. In September, the Bank of Japan announced plans to continue stimulating its economy, leaving its policy unchanged. The stock market rose in October when Prime Minister Shinzo Abe was re-elected in the snap general election, and optimistic foreign investors increased their allocation to Japanese equities. Second quarter GDP growth was revised down to 0.6% from 1.0%, but revised up to 0.6% from 0.3% in the third quarter, boosted by exports and the increasing pace of business spending growth.

Asia

The MSCI AC Asia Pacific ex Japan Index performed strongly over the period (+12.4% total return, in local currency terms and 14.5% in US Dollar). In August, the International Monetary Fund (IMF) increased its Chinese growth estimates out to 2020. However, GDP growth for the third quarter slowed to an annual pace of 6.8%, down from the rate of 6.9% in both the first and second quarter. The Indian economy expanded at an annual rate of 6.3% in the third quarter after more than a year of declining growth, boosted by strong manufacturing performance. Optimism over the improving economy and improvements in company profits led the country's stock markets to record levels in late December. South Korea's economy grew to a three and a half year high of 3.8% year-on-year in the third quarter. This was well above the second-quarter annual expansion of 2.7% and was accredited to impressive growth in manufacturing and services. Stocks in Australia rose during the six months, nearing a ten-year high towards the end of the period on increasing oil and metals prices.

Market review (continued)

For the period from 1 July 2017 to 31 December 2017

Emerging markets

Emerging market equities were up over the period (MSCI Emerging Markets Index +13.9% in local currency terms and 16.1% in US Dollar terms). The Brazilian economy slowly improved, despite a volatile political situation as President Michel Temer faced a second round of corruption charges. Interest rates were cut to a record low of 7.0% in early December as inflation continued to fall. Russia's annual GDP growth rate expanded to 2.5% in the second quarter, but fell to 1.8% in the third quarter as industrial production eased. The Mexican economy increased 0.3% quarter-on-quarter in the second quarter, but fell 0.3% in the third quarter, which was worse than expected.

Fixed income and commodities

US 10-year Treasury yields were volatile as tensions between the US and North Korea escalated, rising in December when President Donald Trump's tax bill was passed. UK 10-year gilt yields spiked in September on speculation of a BoE interest rate rise and rose again in November over optimism regarding a breakthrough in Brexit negotiations. German bund yields fell in October when the ECB announced plans to extend the length of its asset purchase scheme, falling further in the fourth quarter as analysts grew concerned over the high prices on German government debt amid a strong economy. Global investment grade corporate bonds closed the period on a strong note as they delivered positive total returns in the fourth quarter and continued the trend of the previous three quarters. In terms of relative performance, sterling-denominated credit outperformed, followed by US Dollar-denominated credit, while euro issuers trailed behind.

The price of Brent Crude rose over the six months, boosted by the speculation and reality of an extension of production cuts. Gold also rose, benefiting from geopolitical strain throughout the six months, such as tensions between the US and North Korea.

Core Credit Fund

Investment report for the period from 1 July 2017 to 31 December 2017

Investment Fund Manager

James Briggs

The fund returned 0.7% over the period in US dollar terms.

Global corporate bonds produced a positive total return over the six months, with returns driven by a combination of credit spread (the extra yield over an equivalent government security) compression as well as government bonds.

The period was busy with political and central bank activity. As widely expected, the European Central Bank announced a reduction in its monthly asset purchases from €60bn to €30bn, although extended the programme to September 2018. Catalonia was unsuccessful at securing independence from Spain, Angela Merkel struggled to form a new coalition government in Germany, while the UK made progress on negotiations regarding its exit from the European Union (known as 'Brexit'). Meanwhile in the US, President Donald Trump continued to wage a war of words against the North Korean president, and North Korea fired a missile over Japan. Towards the end of the period, the US Federal Reserve raised interest rates by a further 25 basis points and the tax overhaul bill was finally passed.

The period witnessed a pick-up in idiosyncratic credit stories on both a positive and negative note. Construction company Astaldi (losses linked to Venezuelan exposure), pharmaceutical company Teva (US generics pricing, loss of Copaxone monopoly and profits warnings) and telecommunications company Altice (lower than expected third-quarter earnings and a reduction to 2018 guidance) all suffered. Positively, we also experienced a number of upgrades in the 'rising star' space, with Clydesdale Bank and Aroundtown (hybrids) all gaining investment grade status.

Returns were driven by positioning in corporate bonds, with interest rate duration (a measure of interest rate sensitivity) being a significant detractor. From a currency viewpoint, returns stemmed predominantly from our positioning in US dollars.

The consumer non-cyclical sector was the largest contributor to performance, with holdings in GlaxoSmithKline, Anheuser-Busch InBev and Pfizer the top performing names. The communications sector also performed well, with strong contributions to performance from US telecommunications companies Verizon and AT&T.

While performance at a sector level was generally positive, energy and basic industries – two sectors in which the fund has limited holdings in – contributed little to overall performance. A holding in long-dated euro-denominated General Electric bonds was the poorest contributor to performance at an individual bond level.

Credit markets started 2018 on a strongly positive note and continued the theme of the previous year. This reflects not only the strong economic data across most major economies, but also some positive trends within credit markets as well. Over the course of the last quarter of 2017 we saw a number of upgrades to 'rising stars' (Leonardo, as well as subordinated issuance from Clydesdale Bank, ENEL and Aroundtown), in some instances accompanied by liability management programmes. On the flip side, we also saw an increase in negative idiosyncratic credit stories, which so far has had a limited impact on the broader market. We would, however, expect this bifurcation of the credit market to continue.

We shall therefore continue to position the fund defensively and look to take advantage of any credit strength to further reduce risk. Any entrenched spread widening will be an opportunity for us to add to risk.

Emerging Market Corporate Bond Fund

Investment report for the period from 1 July 2017 to 31 December 2017

Investment Fund Manager

Steve Drew

The fund returned 2.7%, compared with the JP Morgan Corporate Emerging Markets Bond Index (CEMBI) Broad Diversified return of 2.8% in US Dollar terms over the period.

Emerging market corporate bonds produced a positive total return over the period. The strength of the market was driven by a global reach for yield and almost consistent inflows into the asset class. High yield emerging market corporate bonds consistently outperformed investment grade bonds. From a geographical perspective, all regions produced a positive total return, with Latin America the standout performer while those from the Middle East were most muted.

Specific emerging market news remained relatively muted over the period, although tensions between the US and North Korea continued to mount (and this drove the flight-to-quality bid for US Treasury bonds in August), as did political concerns in Turkey. We experienced a waning of appetite across credit markets in early November, with events in emerging markets being one of the triggers as the Crown Prince of Saudi Arabia announced a crackdown on corruption and imprisoned a number of key figures in the country.

New issuance volume continued to beat previous years' levels: the total issuance for 2017 reached a record of \$480bn. This was matched by that of inflows into emerging market fixed income as a whole, which reached US\$112.8bn.

Positioning in single-B rated corporates was the most significant contributor to performance over the period as high yield continued to outperform investment grade. Specifically, the fund's holdings in Digicel (Jamaica, telecommunications), IHS (Nigeria, telecommunications), MHP (Ukraine, consumer) and Nostrum Oil & Gas (Kazakhstan, oil & gas) were some of the strongest individual contributors to performance. The fund continued to be helped by holdings in sovereign and quasi-sovereign names (Angola, Russia, Banque Ouest Africaine de Developpement), although Tajikistan and Bahrain were two of the more significant detractors for the period. Holdings in Argentinian provinces and corporates also continued to perform well (Province of Neuquen, Pampa Energia).

From a country allocation perspective, the fund exited its position in Mexico over September because of concerns over the election in 2018, as well as NAFTA renegotiations. This detracted from overall performance for the period.

Emerging market corporates have posted positive returns for 13 consecutive months. Acceleration of inflows into the asset class since the summer of 2016 and low developed market rates encouraged investors to reach out for yield and income. Benign global inflation trends, along with a rebound in activity in developed markets, allowed most emerging market central banks to set up a favourable credit environment in order to foster economic growth.

We believe the global economic recovery and the relative yield pick-up still supports emerging market credit markets for 2018. We maintained our positioning while keeping a positive skew on credit quality. We expect volatility (sharper fluctuations in prices) to pick up further in the first and second quarters of 2018. If the US Federal Reserve keeps on tightening its monetary policy according to plan, we believe the market will increasingly focus on external factors that can derail the base case for US rates. In particular, we believe China will play a major role as it endeavours to maintain the competitiveness of its currency.

Euro Corporate Bond Fund

Investment report for the period from 1 July 2017 to 31 December 2017

Investment Fund Managers

Stephen Thariyan, Tim Winstone and Tom Ross

The fund returned 1.6%, compared with the iBoxx Euro Corporate Index return of 1.8% in euro terms over the period.

Euro investment grade markets delivered a positive total return, driven by movements in European government bonds and positive excess credit returns.

The period was busy with political and central bank activity. As widely expected, the European Central Bank (ECB) announced a reduction in its monthly asset purchases from €60bn to €30bn, although extended the programme to September 2018. Catalonia voted for independence from Spain (but was unsuccessful in achieving this), Angela Merkel struggled to form a new coalition government in Germany and the UK made progress on Brexit negotiations (the UK's exit from the European Union). Meanwhile in the US, President Donald Trump continued to wage a war of words against the North Korean president and North Korea fired a missile over Japan. Towards the end of the period, the US Federal Reserve raised interest rates by a further 25 basis points (bps) and the tax-overhaul bill was finally passed.

There was a pick-up in idiosyncratic credit stories on both a positive and negative note. Construction company Astaldi (losses linked to Venezuela), pharmaceutical company Teva Pharmaceutical Industries (US generics pricing, loss of Copaxone monopoly and profit warnings) and telecommunications company Altice (lower than expected third quarter earnings and a reduction to 2018 guidance) all suffered. Positively, we experienced a number of upgrades in the 'rising star' space, with Clydesdale Bank and Aroundtown (hybrids) both gaining investment grade status.

Strong performance came from our overweight to sterling-denominated bonds from UK retailer Tesco, as well as our holdings in hybrid bonds, specifically Total and Aroundtown, which benefited from the strong appetite for risk among investors over the period. Further positive performance came from our overall overweight to the banking sector and bottom-up selection within banks, such as overweights to Clydesdale Bank, Morgan Stanley and Nykredit, as well as an underweight to HSBC.

It was largely our underweight positions that detracted from fund performance. In particular, negative performance came from our short position via credit default swaps to a UK betting and gambling company. Our overweight to Altice Luxembourg also hurt performance as the price of bonds in the Altice debt complex suffered in sympathy with the share price of Altice NV, which fell 59% during November in response to the release of third quarter results and lowered 2018 guidance.

December saw European investment grade credit spreads (the extra yield over an equivalent government security) end the month marginally tighter at 85bps (BofAML Euro Corporate Index spread to worst versus government), driven by sustained positive flows into the asset class and continued ECB buying. As of January, the bank will halve its monthly corporate and government asset purchases to €30bn per month. While this will reduce the extent of the technical support provided to European investment credit, we still believe the flow of money into the bond market from quantitative easing (central bank liquidity measures) will likely have a positive impact on demand for European investment grade, and may possibly lead to further tightening from current levels.

European investment grade credit continues to be in a relatively robust fundamental condition as default rates and corporate leverage remains low, and European economic data remains firm with the eurozone economy, growing at an annual rate of approximately 2.1% year on year according to the International Monetary Fund. Gross supply for 2018 is forecast to be marginally below that of 2017, although net supply is expected to be higher, particularly in non-bank financials.

However, spread levels remain close to their 2017 tightness and continue to trade rich versus historical levels, which leaves us generally unexcited about the asset class from a valuation perspective. As previously mentioned, we trimmed risk over the month, predominantly in core credit. We still remain long risk overall versus the index, but to a lesser degree. This positioning is composed of an underweight to European investment grade credit, offset by a larger overweight to non-core areas of credit including European high yield, as well as smaller positions in sterling and US dollar high yield, and sterling and US dollar investment grade credit. Our non-core allocation is a function of high conviction bottom up stock selection.

We remain cognisant that the ongoing support from the ECB cannot be considered in isolation. Looking ahead, we are particularly concerned about the Italian election in early March, which could be a possible source of market volatility (sharper fluctuations in prices). Other risks to stability also include headlines related to the US president, Brexit negotiations and a further rise in yields of European government bonds (prices move inversely to yields). 2017 witnessed a rise in idiosyncratic risk in developed markets and this also remains a threat, particularly given the current low volatility environment could cause exaggerated moves in bond prices. With this in mind, we are reluctant to become too long risk and will remain focused on relative value and utilise our strong bottom-up credit selection capabilities and off-benchmark ability, as well as any periods of volatility which materialise, to make use of attractive opportunities.

Euro High Yield Bond Fund

Investment report for the period from 1 July 2017 to 31 December 2017

Investment Fund Managers

Thomas Hanson and Tom Ross

The fund returned 1.9%, compared with the BofAML European Currency Non-Financial High Yield Constrained Index return of 2.2% in Euro terms over the period.

The European high yield market delivered a positive total return over the period of approximately +2.2%, with performance being strongest in July and October. 10-year German government bonds provided a flat contribution to total returns over the period.

The period was busy with political and central bank activity. As widely expected, the European Central Bank announced a reduction in its monthly asset purchases from €60bn to €30bn, although extended the programme to September 2018. Catalonia voted for independence from Spain (but was unsuccessful in achieving this), Angela Merkel struggled to form a new coalition government in Germany and the UK made progress on Brexit negotiations (the UK's exit from the European Union). Meanwhile in the US, President Donald Trump continued to wage a war of words against the North Korean president and North Korea fired a missile over Japan. Towards the end of the period, the US Federal Reserve raised interest rates by a further 25 basis points (bps) and the tax-overhaul bill was finally passed.

There was a pick-up in idiosyncratic credit stories on both a positive and negative note. Construction company Astaldi (losses linked to Venezuela), pharmaceutical company Teva Pharmaceutical Industries (US generics pricing, loss of Copaxone monopoly and profit warnings) and telecommunications company Altice (lower than expected third quarter earnings and a reduction to 2018 guidance) all suffered. Positively, we experienced a number of upgrades in the 'rising star' space, with Clydesdale Bank and Aroundtown (hybrids) both gaining investment grade status.

The strongest performance came from an underweight to retailer New Look as the price of bonds declined sharply in November on the release of weak 1H 2018 results, which showed a fall in like-for-like sales of -8.4%. Further positive performance came from our overweight to the banking sector and security selection within the sector, such as an overweight to lower Tier 2 bonds from Raiffeisen Bank. On a sector basis, overweight positions in the retail (Matalan), telecommunications (Orange) and transportation (Global Ship Lease) sectors also benefited fund performance.

The greatest negative performance came from our short position via credit default swaps to a UK betting and gambling company, as well as our overweight to Altice Luxembourg as the price of bonds in the Altice debt complex suffered in sympathy with the share price of Altice NV, which fell 59% during November in response to the release of third quarter results and lowered 2018 guidance. Our underweight to emerging market issuers including Petrobras, Gazprom and Russian Rail also detracted from performance.

Credit spreads (the extra yield over an equivalent government security) moved marginally wider in December, closing the month at just over 300bps (ICE BofAML HPIC Index spread to worst versus government). That picture reversed as we moved into 2018, with spreads tightening so far in January, supported by positive market sentiment and limited supply thus far. Credit spreads still remain tight when considered on a historical basis, and the yield to worst on the HPIC benchmark currently stands at 2.75%, close to the lowest point in its history. This stretched valuation picture continues to constrain our level of beta risk positioning in European high yield, preventing us from becoming too long risk relative to the index. The notable underperformance of the B-rated space versus BBs does offer some potential value, however.

Retail fund flows were negative over December (and 2017 in total), but it is unclear as to whether this trend will persist, especially as anecdotal evidence suggests minor inflows into the asset class so far. Gross supply was approximately €83bn in 2017 (one of the largest years on record), and it looks as though January will be a busy month in this regard too. However, the macroeconomic backdrop continues to be beneficial, with growth positive across Europe, and broader economic data releases generally being stronger than expected. Defaults in Europe (which are ultimately the main driver of capital impairment) remain extremely low, and it is difficult to envisage this changing significantly in the near term given the macroeconomic backdrop.

The fund reduced risk over the course of recent weeks, and is currently broadly flat versus the benchmark in yield, spread duration and duration times spread terms. Heading into 2018 we will look to participate in attractive primary market issuance from issuers we favour and continue to look for idiosyncratic opportunities to help drive fund returns.

Euro High Yield Bond Fund

Statement of Net Assets

As at 31 December 2017

	Notes	EUR
Assets

Global Corporate Bond

Investment report for the period from 1 July 2017 to 31 December 2017

Investment Fund Manager

James Briggs

The fund returned 1.8%, compared with the Barclays Global Aggregate Corporate Bond Index return of 2.5% in US Dollar terms during the period.

Global corporate bonds produced a positive total return over the period, with returns driven by a combination of compressing credit spreads (the extra yield over an equivalent government security) and government bonds.

The six-month period under review was busy with political and central bank activity. As widely expected, the European Central Bank announced a reduction in its monthly asset purchases from €60bn to €30bn, although it extended the programme to September 2018. Catalonia's made an unsuccessful bid for independence from Spain, Angela Merkel struggled to form a new coalition government and the UK made progress on negotiating its exit from the European Union (known as 'Brexit'). Meanwhile in the US, President Donald Trump continued to wage a war of words against the North Korean president, and North Korea fired a missile over Japan. In mid-December, the US Federal Reserve raised interest rates by a further 25 basis points and the tax overhaul bill was finally passed.

The period witnessed a pick-up in idiosyncratic credit stories on both a positive and negative note. On the negative side, construction company Astaldi (losses linked to our Venezuela position), pharmaceutical company Teva (US generics pricing, loss of Copaxone monopoly, profit warnings) and telecommunications company Altice (lower-than-expected third-quarter earnings, reduction to 2018 guidance) all suffered. Positively, we also experienced a number of upgrades in the 'rising star' space, with Clydesdale Bank and Aroundtown (hybrids) all gaining investment grade status.

In a rallying market for risk assets and credit markets especially, it was generally our overweight positions, both at a sector and individual issuer level, that outperformed and our underweights that detracted. The fund was positioned with a non-cyclical bias and this overall position was the strongest contributor to performance – in particular, holdings in global pharmaceutical companies GlaxoSmithKline and Johnson & Johnson, as well as US pharmaceutical Amgen. We also saw good performance from some of our 'rising star' candidates. Tesco posted strong results at the beginning of the quarter and subsequently conducted a liability management exercise, buying back bonds.

The fund's underweight to credit as a whole, and in particular North American and US dollar-denominated credit, was the major detractor from performance over the six months. Our underweight to energy was also a significant detractor. At an individual credit level, UK gaming company Ladbrokes was the most significant underperformer. Spreads in the name tightened over the period following news that online gambling group GVC is in advanced talks to acquire the company, and noise related to the 12-week government review of fixed-odd betting terminals. We subsequently exited the position in Ladbrokes. An overweight to US semiconductor company Broadcom also detracted from performance, as the company announced it would be acquiring Qualcomm, another semiconductor manufacturer. We since reduced this position.

Credit markets started 2018 on a strongly positive note, continuing on the themes we saw through the end of 2017. This reflects not only the strong economic data across most major economies, but also some positive trends within the credit markets as well. Over the course of the last quarter of 2017 we saw a number of upgrades to 'rising stars' (Leonardo Company, as well as subordinated issuance from Clydesdale Bank, ENEL and Aroundtown) in some instances accompanied by liability management programmes. On the flip side, we also saw an increase in negative idiosyncratic credit stories, which so far has had a limited impact on the broader market. We would, however, expect this bifurcation of the credit market to continue.

We shall therefore continue to position the fund defensively and look to take advantage of any credit strength to further reduce risk. Any entrenched spread widening will be an opportunity for us to add to risk.

Global High Yield Bond Fund

Investment report for the period from 1 July 2017 to 31 December 2017

Investment Fund Managers

Seth Meyer and Tom Ross

The fund returned 3.2% outperformed the Bank of America Merrill Lynch (BofAML) Global High Yield Constrained Index which returned 2.8% in US Dollar terms over the period.

The Global high yield market delivered a positive total return over the period of approximately +2.8% with performance being strongest in July. Government bonds marginally added to total returns over the period.

The period was busy with political and central bank activity. As widely expected, the European Central Bank announced a reduction in its monthly asset purchases from €60bn to €30bn, although extended the programme to September 2018. Catalonia voted for independence from Spain (but was unsuccessful in achieving this), Angela Merkel struggled to form a new coalition government in Germany and the UK made progress on Brexit negotiations (the UK's exit from the European Union). Meanwhile in the US, President Donald Trump continued to wage a war of words against the North Korean president and North Korea fired a missile over Japan. Towards the end of the period, the US Federal Reserve raised interest rates by a further 25 basis points and the tax-overhaul bill was finally passed.

There was a pick-up in idiosyncratic credit stories on both a positive and negative note. Construction company Astaldi (losses linked to Venezuela), pharmaceutical company Teva Pharmaceutical Industries (US generics pricing, loss of Copaxone monopoly and profit warnings) and telecommunications company Altice (lower than expected third quarter earnings and a reduction to 2018 guidance) all suffered. Positively, we experienced a number of upgrades in the 'rising star' space, with Clydesdale Bank and Aroundtown (hybrids) both gaining investment grade status.

Strong positive performance came from our underweight to Venezuelan state-owned oil and gas company Petroleos De Venezuela as the price of bonds in the company sharply declined in November on the back of the issuer commencing restructuring proceedings. Further strong positive performance came from our overall overweight to the healthcare sector, and security selection within the sector such as an overweight to Valeant Pharmaceuticals. Performance was helped by our overweight position to Golden Nugget as CCC-rated bonds we own in the issuer saw positive price movements over the period. The fund also benefited from overweight positions to issuers within retail (Matalan), energy (Tullow Oil) and basic industry (CF Industries).

Negative performance came from our short position via credit default swaps to a UK betting and gambling company, as well as our overweight to Altice Luxembourg as the price of bonds in the Altice debt complex suffered in sympathy with the share price of Altice NV, which fell 59% during November in response to the release of third quarter results and lowered 2018 guidance. Our underweight to the overall energy sector and issuers within it, such as Petrobras, also hurt performance.

We marginally reduced fund risk over December through our European holdings, such as Co-operative Group, CMA and Lecta. However, we remain overweight this region versus the benchmark. We are also overweight in the US relative to the benchmark, although our overall risk level to this region remained broadly the same on the month. We continue to remain positioned underweight to emerging markets as we believe high yield names within this market offer less attractive bottom-up opportunities. Overall, we are approximately flat in risk terms to the benchmark.

Sentiment in January started out positively and volatility (sharper fluctuations in prices) remains low. However, valuations across European, US and emerging market high yield markets remain rich and issuance across the regions is expected to increase, which we would look to participate in. On this view, we do not believe a long risk position versus the index is currently warranted. As ever, we continue to believe bottom-up stock selection and an understanding of idiosyncratic risk, which we believe will be of vital importance in 2018, will enable us to navigate volatility and drive returns.

Strategic Bond Fund

Investment report for the period from 26 July 2017 to 31 December 2017

Investment Fund Managers

Jenna Barnard and John Pattullo

The fund returned 1.4% in US Dollar terms between inception and end of December.

The fund launched on 26 July 2017 with \$20mn in seed capital and the intention of replicating the existing Janus Henderson Strategic Bond Fund managed by the same managers. We believe that this was largely achieved within the constraints imposed by the small amount of seed money versus minimum denominations that bonds can be traded in.

Turning to the market, the period to end December 2017 was benign for the bond markets in which we invest. Credit spreads (the extra yield over an equivalent government security) continued to compress at a relatively steady pace, albeit with brief corrections in August and November. Government bond volatility (sharper fluctuations in prices) also remained at remarkably low levels. Overall, it was the kind of environment in which income continued to drive return, and higher yielding bonds saw their price rise (prices move inversely to yields) as investors felt confident enough to take on more risk. There was relatively little drama in the fund. The kind of companies that got into difficulty were predictable, in our view, as they operated in industries which are perennial disappointers eg airlines (Air Berlin default in August) and fashion retailers (New Look) and which, by style, we pride ourselves on avoiding.

The standout contributors to performance were financial bonds issued by both banks and insurance companies. These are a higher yielding part of the market, which central banks have not purchased via their quantitative easing schemes (central bank liquidity measures) and which benefited from a return of investor confidence post the French presidential elections in the first half of 2017.

Fund activity, as always, focused on the two key elements of bond management: the amount of credit extended and duration (a measure of interest rate sensitivity). In terms of credit, the fund actively reduced its high yield bond weighting during the six months, rotating into investment grade and sovereign bonds. This reflected not a fear of defaults rising, but rather valuation – ie yields getting to levels which simply did not compensate us for the risk of lending money to certain companies. We continued to favour financial bonds due to continued stringent regulation of the sector, continued build-up of capital strength and reasonable valuations. It is worth noting that, in the Janus Henderson Strategic Bond Fund, the current high yield corporate bond weighting is close to the lowest that we have run in the current business cycle dating back to 2009. If there was a new theme in the corporate bond market in the period under review, it was really that of industry divergence and disruption. The impact of new technologies and increased pricing transparency/margin pressure was felt across many companies in a diverse array of industries.

Duration management was active, as is our style. Structurally, we continued to favour Australian government bonds, reflecting the significant headwinds facing this economy – in particular, a consumer burdened by record high levels of household indebtedness and a regulator trying to restrict mortgage availability in order to cool its house market. Tactically, we managed duration in reaction to events – for example, government bond yields got very low in early September for a number of reasons, including fears of a hurricane destroying large parts of Florida, causing us to reduce our duration before increasing it again over subsequent months.

Derivatives remain an important tool for managing the fund and were used during the period under review for two main purposes: hedging currency positions back to our base currency of US dollars and actively managing the interest rate exposure of the fund.

We continue to view the world through the lens of long term structural disinflationary forces and divergent economic cycles in the developed world. The range and speed of industry disruptions in 2017 was noteworthy as we witnessed the impact of disruptive new technologies and changing consumer behaviour accelerate. As a result, we continue to focus on quality businesses with sustainable cash flows as opposed to trying to time cyclical upswings in low quality industries and companies. We expect the current environment of low inflation and low default rates to persist for some time yet.

Strategic Bond Fund

Total Return Bond Fund

Investment report for the period from 1 July 2017 to 31 December 2017

Investment Fund Managers

Fixed Income Investment Strategy Group

The fund returned +0.6% in Euro terms over the period.

The period under review was busy with political and central bank activity. As widely expected, the European Central Bank announced a reduction in its monthly asset purchases from €60bn to €30bn, although it extended the programme to September 2018. Meanwhile in the US, Donald Trump continued to wage a war of words against the North Korean president and North Korea fired a missile over Japan. In mid-December, the Federal Reserve (Fed) raised interest rates by a further 25 basis points (bps) and the tax-overhaul bill was finally passed. Returns from core government bond markets were mixed, with US treasuries and UK gilts delivering small positive returns; however, Australia and Canada saw moderate negative returns. Investment-grade corporate bond markets performed strongly, with credit spreads falling by around 15bps, and ended the period at the lowest levels since 2007. Emerging markets outperformed, with a weak US dollar and rising commodity prices a tailwind.

The fund delivered a return which was broadly in line with global bond markets (as measured by the Barclays Multiverse hedged to euro). Exposure to higher-yielding areas of the bond market, such as emerging market credit, was beneficial and increased exposure to specific government bond markets also added incremental return. Rates and currency strategies detracted in aggregate.

Exposure to emerging market credit continued to be beneficial for returns, and inflows into the asset class hit a five-year high. Within emerging market credit, relative positioning in high yield, favouring Latin America over Asia, and allocating to sovereigns and the oil & gas sector were all beneficial for performance.

During the third quarter, we continued to build our secured loans allocation. This reflects the broader theme of rotating out of fixed coupon assets into floating rate secured credit, where the latter offer a combination of attractive credit spreads (the extra yield over an equivalent government security) and resilience in a rising rate environment. Exposure to floating rate asset-backed securities and mortgage-backed securities was also increased. This was funded by selling investment grade corporate bonds, where low underlying government bond yields and tighter credit spreads left a less compelling return profile for that asset class, particularly in Europe.

Returns from high yield corporate bonds in the US and Europe were more muted, with weaker performance from the market in November. That said, we were able to identify some rising stars that have performed well as rating upgrades have been achieved.

Within government bonds, exposure to 30-year European swaps and US treasuries added value. We increased government bond holdings over the period, by positions in Australian government debt in the 3-year and 30-year maturities, and within the eurozone to sovereign debt in Spain and Portugal. The latter performed particularly well following a ratings upgrade. The interest rate sensitivity of the fund was broadly unchanged at 3.7 years, as at 31 December (with a 0-to-6 year operating range), though the composition of the portfolio has changed as described above

Currency strategies were mixed and detracted in aggregate. Positions that expected currencies in emerging Europe (Polish zloty, Czech koruna) to outperform the euro worked well. However, we also expected the US dollar to stage a rebound to reflect a pick-up in economic performance and a faster pace of Fed rate hikes. Weaker-than-expected inflation and political tensions led to further underperformance in the US dollar, and the position was closed for a loss in September.

Active interest rate strategies were broadly flat in performance terms. A position expecting longer-maturity UK inflation expectations to rise, relative to 5-years, added value, but this was offset by negative performance from yield curve strategies and a position expecting Canadian rates to outperform versus US.

We remain selectively invested in higher-yielding assets for now, with a significant allocation to high quality ABS/MBS and government bonds for diversification. While credit spreads are at the lower end of historic ranges, these are currently supported by robust growth, low default rates and subdued volatility. However, we are cognisant that volatility may pick up as central banks gradually shift their stance towards tighter monetary policy, and continue to manage our allocations actively.

Asian Dividend Income Fund

Investment report for the period from 1 July 2017 to 31 December 2017

Investment Fund Managers

Michael Kerley and Sat Duhra

The fund returned 9.0%, compared with the MSCI AC Asia Pacific ex Japan Index return of 14.3% in US dollar terms over the period.

Asian markets continued their strong performance in the second half of 2017, rising by 14.3% in US dollar terms (as measured by the MSCI All Country Asia Pacific ex Japan index). The full year return of 37% was the best performance since the recovery year of 2009. This was achieved despite worries over rising interest rates and geopolitical uncertainty in both North Korea and the Middle East.

For the first time in a number of years, Asian markets outperformed their developed market peers. Although the global backdrop for equities was supportive, the strength of corporate earnings in Asia drove returns over and above other regions. Earnings per share growth for Asia Pacific is forecast to be 24% for 2017 and – more importantly – the positive momentum was sustained throughout the year with increasing breadth, which was supportive for equity prices. This dynamic was generally more supportive of North Asia over South Asia, with China and Korea in particular leading the charge.

The best performing market was China, which benefited from positive economic momentum, a stable and rising currency, strong corporate earnings and inclusion in MSCI indices, which prompted positive flows. The internet sector particularly Tencent and Alibaba, led the way both in terms of earnings upgrades and share price performance, and by the end of the period were the first and third largest companies in Asia by market capitalisation. Unsurprisingly, technology was one of the best performing sectors, although it was surpassed by energy and materials in the final months of the year as the oil price moved above \$60 a barrel and industrial metal prices spiked on improved demand and low inventories.

In terms of style, growth strategies led performance, with investors embracing companies with strong forecast earnings growth, especially if they were associated with some of the new economy themes such as artificial intelligence, robotics, new energy vehicles and e-commerce. Although the fund had positions in some of these themes, the income-focused nature of the process made it difficult to keep pace with the overall index.

There was notable success at the stock level, with Dali Foods rising 60% while Anta Sports, Huayu Automotive, Autohome and SK Innovation all rose over 30%. These returns were more than offset by the higher yield part of the fund, with telecommunications, real estate investment trusts and utilities being some of the worst performing sectors. Notable detractors were Hon Hai Precision, Telekom Indonesia, Spark New Zealand, Amcor and QBE Insurance.

Over the period, we added a few new positions to the portfolio. BHP, an Australian resources company, is a beneficiary of rising materials prices but is also likely to be more aggressive with dividend pay-outs under new management. PetroChina is benefiting from increased domestic gas pricing, rising oil prices and a candidate for more shareholder-friendly policies as the year progresses. Sticking with China, we also added software and cloud services company Chinasoft International and sold China Mobile, where a fast approaching 5G capex cycle is likely to be detrimental to dividends. We also sold Jiangsu Expressway because it lacks catalysts in the short to medium term. In the rest of the region, we added Korean refiner S-Oil and Taiwanese notebook and server manufacturer Quanta Computer. These were funded by sales of Singapore Post and Taiwanese engineering company CTCL.

We remain cautiously optimistic on Asia Pacific markets. Valuations are still attractive, especially versus developed market peers, while earnings momentum remains positive. We believe the outlook for dividends in the region is still compelling, with dividend growth at least expected to match earnings growth with the potential for more should dividend pay-outs rise. There are obvious risks from increased tension surrounding North Korea and the Middle East, as well as from rising US interest rates, which could reduce liquidity and the attractiveness of risk assets. We will use any increased volatility (sharper fluctuations in prices) as an opportunity to add our preferred stocks to the fund at more attractive prices.

Asian Growth Fund

Investment report for the period from 1 July 2017 to 31 December 2017

Investment Fund Managers

Andrew Gillan and Mervyn Koh

The fund gained 11.3% in US dollar terms during the six months under review, against the MSCI All Countries Asia Pacific ex Japan Index's rise of 14.3%.

There were no major global macroeconomic shocks, as conditions remain conducive for growth. Economic data pointed to a very healthy global economy as unemployment rates reached historical lows in G3 economies. While central banks around the world continued to indicate that the level of monetary policy stimulus will be gradually reduced, the US Federal Reserve hiked the benchmark lending rate by 25 basis points in December, in line with market expectations.

Against this backdrop, Asian markets posted steady gains throughout the period on the back of strong economic growth, underpinned by strong export numbers and positive purchasing managers' indices. Within the region, October 2017 witnessed the 19th National Congress of the Communist Party of China, where President Xi Jinping expectedly retained his top position in the Party, and a new guiding ideology was written into the Party's Constitution. Meanwhile in India, economic reforms continued gathering pace with the implementation of a nationwide goods and services tax regime, following the controversial demonetisation policy in November 2016.

Despite posting healthy gains, the fund lagged the index over the six months, with the bulk of the underperformance coming from the quarter ending September. The main driver of underperformance was our overweight position and stock selection in Taiwan, as there were heavy profit taking on names such as Largan Precision and Hon Hai Precision Industry following the latest iPhone launch. We maintained our positions in both companies and believe they can continue to deliver good earnings growth despite the noise around monthly numbers. Stock selection in India also detracted from performance, with ITC and Power Grid particularly weak. Shares of the former took a hit after the Indian government went back on its earlier decision of not raising taxes on cigarettes, while there were some concerns on the visibility of orders over the medium term for the latter. However, the fund continues to hold positions in both.

On a sector level, the underweight position and strong stock selection in financials contributed positively, led by strong performance of our holdings in conglomerate Ayala Corporation in the Philippines and HDFC Bank in India. The fund's lack of holdings in Australian banks also helped as shares of the big four banks were particularly weak. The underweight position to the telecommunications sector contributed to performance as well.

There were quite a number of changes to the fund during the period under review. Within China and Hong Kong, we added new positions in Midea, ENN, BOC Hong Kong and Yum China, all of which we believe offer attractive value relative to their growth prospects. In Korea, we initiated a position in Coway, a well-known manufacturer of water purifiers and other environmentally friendly household products with a strong domestic market share and a highly profitable business model. Treasury Wine Estates, an Australian-listed wine company, was another new position – although admittedly trading on a higher earnings multiple than the other new positions. We believe that the long term growth opportunity is significant and that the management team's execution to date on margin expansion can be continued in the coming years.

In addition to our sale of Universal Robina, where operating performance deteriorated, we also exited our positions in Tech Mahindra and Raffles Medical. Tech Mahindra suffered weaker results in line with the Indian IT Services sector and we feel more comfortable in larger peers, Infosys and Tata Consultancy Services as the industry transitions to more digital business. Raffles Medical is undertaking an exciting expansion in China that will impact its earnings in the short term, and therefore we view the current multiple as too expensive to maintain the position given this impact to its profits. Other positions which the fund exited included Astra International in Indonesia, SK Hynix in Korea, President Chain Store in Taiwan and Aurobindo Pharma in India.

The six months under review capped an extremely strong 2017 for Asian markets but, encouragingly, this was accompanied by significantly stronger earnings growth relative to the previous few years. Despite the stellar performance, valuations remain reasonable both relative to their own history for the region and relative to developed markets given the superior growth outlook for Asia. China remains the focal point for the region, and with President Xi Jinping consolidating his position post the National Congress, there will be renewed emphasis on the balance between reform and growth. The elevated debt levels will also continue to come under close scrutiny. While the old economy may continue to chug along, we continue to favour the new economy, private sector businesses in China. In the longer term, we believe there is every reason to be positive on Asia with attractive demographics, increasing consumption and innovation, as well as significant economic development potential providing an ideal backdrop for companies to thrive.

Euroland Fund

Investment report for the period from 1 July 2017 to 31 December 2017

Investment Fund Manager

Nick Sheridan

The fund returned 2.4%, compared with the MSCI EMU Net Return of 3.7% in Euro terms over the period.

Ultra-loose monetary policy, improving economic data, lower unemployment and a pick-up in earnings growth led to a long period of stability in markets, and during the second half of the year, global synchronised economic growth continued. These conditions allowed financially challenged companies to survive while 'disruptors' (inexpensively financed companies) wooed investors with business plans that promised immediate rewards.

Against this backdrop, investor sentiment was positive, pushing multiples forward and rewarding 'Glamour' rather than 'Value'. Volatility (fluctuations in prices) is at historic lows and, in the US, cashflow, as an investment metric, is going unrewarded. How and when these investment conditions will change is unknown, but interest rates are starting to rise (specifically in the US and UK) and quantitative easing (central bank liquidity measures) is beginning to be rolled back. As the recent extremes of credit ease weaken, some contraction in the stock valuations associated with so-called growth stocks can be expected.

Activity during the period included switching from Societe Generale into UniCredit, which trades at a similar rating (Price to Book of 0.5), strengthened its finances via a rights issue earlier in the year and will see profits benefit more than Societe Generale if/when European interest rates rise. We finally exited our position in Ahold, which has been in the fund for some time, as the longer term earnings profile looks to have degraded somewhat due to increasing competition. New positions in the fund include Stroer, which provides outdoor advertising. The company is family owned and has a history of allocating incremental capital at attractive rates of return.

Over the period, the holdings in Faurecia (results and re-rating (stock reassessment by the market)), Arcelor Mittal (results and steel price strength), Covestro (results/increased liquidity), Kingspan (results) and Iren (results/corporate governance) all performed well. Meanwhile, the holdings in Lenzing (concerns over new capacity), Tarkett (position sold), Sanofi (position sold), Eutelsat (results/oversupply) and Ryanair (union recognition to increase costs) detracted from performance.

We remain constructive on the outlook for European equities, where valuations remain inexpensive compared to other equity markets, notably the US. However, it is important to keep in mind the amount of leverage in markets (particularly in the US, where companies borrowed to buy back shares), which might be a problem if bond yields move quicker and further than anticipated (prices move inversely to yields).

European Growth Fund

Investment report for the period from 1 July 2017 to 31 December 2017

Investment Fund Managers

Simon Rowe and Marc Scharzt

Effective from 1 December 2017 Marc Scharzt co-managed this fund.

During the period under review, the fund returned 2.0%, compared with the FTSE World Europe ex UK Total Return Index which returned 2.9% in Euro terms.

Equities continued to perform strongly in the second half of 2017, encouraged by positive economic statistics in the US and rising evidence of a pick-up in European growth. Encouraging trading results from individual companies also encouraged investors to overcome concerns about political unrest in Catalonia, and regarding US president Donald Trump's erratic behaviour and online comments. Even though Trump failed to advance his ideas on healthcare reform, the prospect and then delivery of tax reform in the US also encouraged equities as the biggest beneficiaries appear to be companies, rather than the wider economy. Commodities also performed strongly, including oil, which rose very sharply from its mid-year low. The recovery of oil was boosted by signs of falling inventories, a rise in oil consumption and the possibility of reduced exports from some Middle Eastern producers. Early in 2018 oil, traded at its highest level since 2015.

Strong contributions came from new holding FNAC (+41%), as well as Rockwool (+22.7%), Shell (+21.6%) and Pfeiffer Vacuum (+21.8%). These gains were partially offset by caterer Elixior, which fell after new management scrapped profit targets. Nordea also weakened on disappointing guidance. Several other holdings, such as SPIE, gave back ground after strong performance earlier in the year.

In terms of changes to the fund, we took profits in paint equipment group Dürr, testing specialist INFICON and Swiss consumer finance company Cembra, after very strong performance. We took profits in Kerry and Eurotunnel, and also trimmed a number of other successful investments such as Rockwool, Sika, IMCD, Philips and Fuchs. We bought new positions in French defence group Thales, which fell back after slight disappointment over its third quarter statement, as we think it has the potential to use its balance sheet – which, indeed, happened in December when it bought Gemalto to increase its skills in tackling cyber security. We also bought a holding in Austrian engineer Andritz, which de-rated (stock reassessment by the market), as we think it also has potential to use its balance sheet. Other new holdings included German healthcare group Merck, cable specialist Prysmian and Ryanair, which we believe was punished too harshly for deciding to recognise unions. We also topped up a number of other holdings.

After regional elections in December, the Catalan independence situation eased (if not solved), and the start of the new year saw a continuation of market confidence, with indices again reaching record highs. We believe the biggest risks to Europe lie within the Italian election, scheduled for March, and the unresolved political situation in Germany. The wider risk to financial markets comes from any change within bond markets, where yields have risen from the extreme lows of mid 2016, but are still very low by historic standards (prices move inversely to yields). With the US Federal Reserve already expected to continue to lift interest rates, and growing evidence of a European economic pick-up, there is perhaps more uncertainty about whether the European Central Bank (ECB) will accelerate the wind-down of bond purchases beyond its indications in October and consider increasing interest rates. However, it is hard to see inflation – the potential driver of a change in interest rate expectations – making much headway, given the lack of real upward pressure on wage rates – either in the US or Europe. So, the likelihood is that equities will remain supported by relatively low interest rates. We believe the last thing the ECB wants is to derail the gradual economic recovery that it worked so long to engineer.

Japan Opportunities Fund

Investment report for the period from 1 July 2017 to 31 December 2017

Investment Fund Managers

Japanese Equity team

The fund returned 9.3% in US dollar terms, underperforming its benchmark, TOPIX, which returned 13.4% in US dollar terms. As the Japanese yen was almost flat during this period, the fund's return in local currency was similar.

As the period began, support for Prime Minister Shinzō Abe's cabinet had been on the wane since May, as Abe was unable to satisfactorily answer accusations of influence peddling. This, as well as geopolitical risk related to North Korea, weighed on sentiment in summer. In September, however, Abe called a snap election for the lower house of parliament and his Liberal Democratic Party kept more than half of the seats. The market interpreted this victory as a sign that Abe would be re-elected in September 2018, and that economic and monetary policy would remain unchanged. The subsequent rally in stock prices was led by small caps as well as thematic growth stocks, such as artificial intelligence and robotics-related shares. On the other hand, despite what we viewed as inexpensive valuations, high-quality, large-cap shares had subdued performance. The return difference between the TOPIX Small-Cap and the TOPIX Core 30 was more than 7% in favour of small caps. This market environment did not help the fund's relative performance.

In terms of stock selection, the biggest contributor was Disco, a semiconductor equipment company, as its earnings continued to beat market expectations, helped by strong semiconductor capital expenditure. Recruit Holdings continued to add value, as the market started to appreciate its strong business model. The biggest detractor was Dentsu, a media agency, as investors questioned the visibility of organic growth, especially in the US, as its peers continued to lower earnings guidance. Japan Tobacco International shares remained flat; it lost market share to competitors in vapour tobacco while it delayed the full launch of its own vapour product.

We introduced several new stocks to the portfolio. Dai-ichi Sankyo is a pharmaceutical company with an attractive pipeline. In our view, the market seems to have underestimated the potential of new cancer drugs and that the share price can be re-rated over the next few years. We also bought Komatsu, a mining and infrastructure equipment company, as we expect the business cycle will continue to be positive. We increased the fund's financials sector weighting, as we believe it looks extremely undervalued and the macro environment could shift in its favour. To finance these positions, we sold the fund's full positions in Asahi Kasei and Recruit Holdings, as they became fully valued after strong performance.

Our outlook for Japanese equities continues to be positive. The unemployment rate is the lowest since 1994 and the lowest among developed countries. The government's strong support has been vital to the recovery in economic fundamentals, which has resulted in seven consecutive quarters of positive growth. We believe this is an opportunity for the Japanese economy to move towards ending decades of deflation. Wage increases will translate into higher consumer confidence, allowing businesses to increase prices and improve profitability. Corporate earnings are also strong. Based on a yen value of 110 to the US dollar, earnings per share (EPS) for Tokyo Stock Exchange 1st section (TSE1)-listed companies are expected to grow by high single digits in the next fiscal year, registering a historically high profit. However, price to earnings (P/E) is at 15 times projected earnings estimates, still the lowest among developed markets.

The Bank of Japan (BoJ)'s rate policy is likely to remain accommodative, which we expect will have a positive implication for the overall stock market in Japan. We are also encouraged by recent progress in corporate governance, which has been translating into higher reward to shareholders. The risks will be yen appreciation and geopolitical issues, which may cause higher volatility. We believe the risk/reward balance is very good in Japan and will continue to focus on stock picking, which will be a key determinant of the fund's performance.

Pan European Dividend Income Fund

Investment report for the period from 1 July 2017 to 31 December 2017

Investment Fund Manager

Nick Sheridan

The fund returned 2.8%, compared with the MSCI Europe Net Return EUR of 3.3% in Euro terms over the period.

Ultra-loose monetary policy, improving economic data, lower unemployment and a pick-up in earnings growth led to a long period of stability in markets, and during the second half of the year, global synchronised economic growth continued. These conditions allowed financially challenged companies to survive while 'disruptors' (inexpensively financed) wooed investors with business plans that promised immediate rewards.

Against this backdrop, investor sentiment was positive, pushing multiples forward and rewarding 'Glamour' rather than 'Value'. Volatility (fluctuations in prices) is at historic lows and, in the US, cashflow, as an investment metric, is going unrewarded. How and when these investment conditions will change is unknown, but interest rates are starting to rise (specifically in the UK and US) and quantitative easing (central bank liquidity measures) is beginning to be rolled back. As the recent extremes of credit ease weaken, some contraction in the stock valuations associated with so-called growth stocks can be expected.

During the period, we sold our position in Jupiter Asset Management (over concerns regarding the long term viability of the returns from 'box positions') and the holding in Ahold (competition appears to be increasing), among others. We introduced holdings in companies such as Vestas Wind Systems (following competitor-induced weakness) and BE Semiconductors Industries.

In the second half of 2017, the holdings in BE Semiconductors Industries (results and optimism for longer business cycle), Royal Dutch Shell (oil price recovery), Next (previously oversold), Rio Tinto (commodity price rise) and Deutsche Post (results) all performed well. Meanwhile, holdings in Neopost (results/delayed business recovery), GlaxoSmithKline (dividend concerns), WPP (fears of disintermediation of business), Sanofi (sector weakness/diabetes concerns) and National Grid (political risk) detracted from performance.

We remain constructive on the outlook for European equities, where valuations remain inexpensive compared to other equity markets, notably the US. However, we believe it is important to keep in mind the amount of leverage in markets (particularly in the US, where companies borrowed to buy back shares), which might be a problem if bond yields move quicker and further than anticipated (prices move inversely to yields).

Pan European Equity Fund

Investment report for the period from 1 July 2017 to 31 December 2017

Investment Fund Managers

Tim Stevenson and James Ross

The fund returned 1.2%, compared with the FTSE World Europe Index return of 3.7% in Euro terms over the period.

The second half of the year was positive for European equity markets, despite the drag of a strengthening euro, which appreciated by over 5% against the US dollar. Energy, materials and information technology were the strongest sectors, while consumer healthcare, telecommunications and utilities were the worst performing areas of the market.

The strongest contributors to performance were Deutsche Post, Amundi, Infineon Technologies and Amadeus IT. Deutsche Post benefited from a strong and improving volume environment across its key franchises and traded on a reasonable multiple. Amundi was structurally well positioned (best-in-class distribution and cost structure) performed well as investors priced in the significant advantages of the recent Pioneer deal. Infineon was geared into the increasingly fashionable area of electric vehicles. In addition, Amadeus benefited from its market-leading global distribution system, as well as a dominant position in airline (and increasingly airport and hotel) information technology.

The biggest detractors included Merlin Entertainments, BIC and Fresenius. Merlin suffered from short term demand weakness, especially in and around London and partly related to high levels of terrorist activity. The company remains well placed to deploy large amounts of capital at high returns over the coming years but the near term uncertainty caused us to exit our position. BIC suffered from tough trading conditions in all three divisions, most notably in shavers, where there is an ongoing price war in the US market led by the disruptive 'shaving club model'. Again, we sold our holding. Fresenius underperformed due to a series of profit warnings by companies involved in the production and distribution of generic drugs in the US, to which Fresenius is involved via its Kabi business.

During the period, we initiated positions in Bayer, Novo Nordisk, UniCredit, Rolls Royce and BAWAG. We saw an opportunity to invest in Bayer after the recent profit warning, which was mainly driven by one-off, transient issues. We believe the long term future of the company looks attractive, especially when considering Monsanto's assets, and the opportunity that the merger will provide for a potential recovery in agricultural markets. We initiated a small position in Novo Nordisk as we feel that a little more clarity is starting to emerge on the pricing environment for its insulin products in the US. UniCredit is a low price-to-book bank that should be a prime beneficiary of the slowly improving economic environment in Italy, a consolidating national banking system and falling loan impairments. We see Rolls Royce as a long-cycle industrial holding with strong end markets and a material improvement in free cash flow coming through. Finally, BAWAG, a recent initial public offering, is an Austrian bank with a high return business as well as a credible merger and acquisition (M&A) strategy that should add value over the longer term.

We sold positions in Essilor, Publicis and Reckitt Benckiser. Essilor has been a longstanding position in the fund, offering great opportunity in attractive demographic themes, but is now seeing in its core US market. Publicis is suffering from increasing structural pressures and a recent meeting with the company did little to assuage our concerns. Finally, Reckitt Benckiser is suffering from structural growth headwinds in its consumer healthcare business. The recent acquisition of Mead Johnson also brought some near term pressures.

2017 was a tough year for the fund, even though it ended with a marginally positive fourth quarter. Our 2017 underperformance was accentuated by a small number of stock-specific issues in the opening months of the year. With these now behind us, we are confident of a better 2018. We remain of the view that European equities continue to offer significant attractions when compared to other asset classes.

US Growth Fund

Investment report for the period from 1 July 2017 to 31 December 2017

Investment Fund Managers

W. Scott Priebe and Derek J. Pawlak

For the six month period ended 31 December 2017, the fund returned 8.3% versus 13.8% for the Russell 3000 Growth Index in US dollar terms.

The second half of 2017 was a fitting end to what was a remarkably strong year for equity markets. The S&P 500 finished the year near a record high and markets continued to strengthen into January.

In the second half of the year, the S&P was up 11.42% and small cap stocks gained 9.20%. Growth equities outperformed their value cohorts in 2017, with small cap growth outperforming value by 14.33% and large cap growth outperforming value by 16.55% (this was the largest dispersion in growth versus value since 2009). International equities pushed higher in the period as well; the MSCI EAFE Index returned 9.97% and MSCI Emerging Markets Index was up 16.15%. Annual returns for these markets were actually stronger than those in the US, up 25.62% for the MSCI EAFE and 37.75% MSCI Emerging Markets. Across the globe, economic growth appears to be synchronised as we're seeing strength in the US, Europe and Asia. This synchronisation drove equity markets higher and the recent US tax cut should only add fuel to the fire here in the US. This tax cut, along with a friendlier environment for business and a strengthening US consumer, should provide a tailwind to what we hope will be another strong year for equity markets in 2018.

The underperformance was pervasive across sectors, indicating a bias towards low quality. The greatest detractors from performance were technology, consumer staples and producer durables. Within technology, the weakness was the result of being underweight versus the benchmark and not holding companies such as Apple, which was up 18.4%, and Amazon, which was up 20.8%. Counteracting this weakness was strong performance from technology companies Amphenol, Adobe, Red Hat and Intuit. The consumer staples weakness was due to an underweight in industries such as beverages, drug & grocery store chains and foods; within these industries, holdings JM Smucker and Walgreens Boots Alliance underperformed, but also contributing to the weakness was the underweight to lower quality (low growth, high debt) companies in these industries. The producer durables sector also detracted from performance, but this was due to the underweight in some of the more cyclical sectors such as machinery equipment, railroads and truckers, which we've historically avoided because of their inherent volatility (sharp fluctuations in prices). Contributing to performance were Cantel Medical, Adobe Systems and VF Corporation, which each contributed over 80 basis points to relative performance. During the period, the fund added new positions in Microsoft and Red Hat. These positions were added because of their strong fundamental outlook and the desire to increase the technology allocation. Sold during the period were Tractor Supply Company and JM Smucker; each of these companies underperformed and the long-term thesis no longer held.

With the recent passing of the tax reform bill, there is much debate as to how much of the fourth quarter market move is reflective of the new law, but our sense is the market is underestimating its impact, given its nuances and complexities. Companies have already begun to pre-release guidance and the impact to their financials, but there remains a healthy dose of skepticism on the longer term benefits of such legislation. Given the permanent nature of the tax cuts for corporations, the magnitude of the cut, the benefits of repatriation, the immediate deductibility of capex and a new territorial tax system, such skepticism seems unwarranted. Given rising wages and increasing economic momentum, both in the US and abroad, we feel S&P earnings estimates are low and will increase as the year progresses.

Furthermore, the Wall Street Journal reported (12/6/17) that the earnings per share of a Factset index of more than 20,000 listed companies around the world has advanced nearly 19% in the past year, the fastest year-on-year rise since 2011. Such high earnings momentum, worldwide, should boost investor confidence that this recent surge in stock markets is backed by a broad global economic recovery and the ability of companies to generate real earnings, not just ever higher valuations. In light of our revised US economic outlook and strong global dynamics affecting US multinationals, our S&P 500 earnings projections are revised as follows: 2017 \$127.50 to \$130.00 and 2018 \$138.00 to \$147.00, resulting in year-on-year earnings gains of 10.6% and 13.1% respectively. Accelerating earnings and a lack of alternatives (as well as low supply of publicly traded shares relative to 20 years ago) could allow multiples to remain extended from a historical perspective. We believe a multiple of 20-22x is achievable by year end 2018, resulting in the S&P ending the year at 2950-3250 or 8-18% appreciation.

Asia-Pacific Property Equities Fund

Investment report for the period from 1 July 2017 to 31 December 2017

Investment Fund Manager

Tim Gibson

The fund returned 7.9% in US Dollar terms over the period outperforming the FTSE EPRA NAREIT Pure Asia Index which returned 7.0%, on a net basis.

Asian property equities had another strong half, ending the period up +15.9%. Hong Kong (+16.7%) was the star performer as volumes and prices in the residential market continued to achieve new record highs and commercial assets remained supported by tighter cap rates. Companies were more proactive in enhancing shareholder value over the period, which saw many developers raising dividends and the demerger of Wharf Holdings.

Singapore (+14.3%) also had a stellar half as residential property prices finally rose quarter on quarter in the third quarter of the year – the first quarterly increase after fifteen consecutive quarters of decline. Aggressive land bids by developers and a hot en-bloc market were supportive of real estate values. Strengthening rental growth and transactions in the commercial sector also boosted the office market.

Australian real estate investment trusts (REITs) (+11.8%) posted positive performance as 10-year bond yields tightened (prices move inversely to yields) and an unexpected bid from Unibail-Rodamco for Westfield (outside of the custom index) in December provided some relief for retail landlords, which was weighed down by negative sentiments for most of the period.

Although the macroeconomic outlook in Japan remains muted, Japanese developers (+2.9%) climbed as companies reported healthy results over the period, with generally positive earnings guidance. On the other hand, public REITs (+0.1%) had a difficult year, mainly due to continuing fund outflows from Japanese investment trusts.

Our position in NEXTDC was the standout performer as the data centre industry continued to benefit from strong demand. Other key contributors included our overweight positions in Singapore developer City Developments, which was supported by the strong residential market; Japanese developer Hulic, which raised its guidance on the back of better than expected sales activities; and Link REIT, which completed the sale of a portfolio of assets in Hong Kong at robust prices. However, our overweight in Aveo Group detracted over the period.

At the start of the period, we initiated a position in Australian data centre operator NEXTDC, one of the leading players in a sector which we expect will benefit from strong demand for the coming years. We reduced our position in Scentre Group because of structural and cyclical concerns over Australian retail. In Hong Kong, we exited our position in Hongkong Land on lower expected returns, and rotated into Wharf Holdings on the back of strengthening retail sales numbers in Hong Kong and China.

In Japan, we rotated from Nippon Building Fund to MCUBS Midcity, reducing our exposure to Tokyo office which is getting later in the cycle and preferring to increase our exposure to Osaka which offers better rental growth potential.

In November, we added a new position in diversified Japanese REIT Star Asia Investment as we like its growth story, with potential access to a new asset class (student accommodation) as well as attractive valuations. This was funded with profits from outperformers including NETDC and CapitaLand Commercial Trust, as well as by trimming our existing stakes in other public REITs.

We believe global growth will continue to pick up this year, which is positive for company earnings. Overall financial conditions remain supportive of the recovery, as tightening by the US Federal Reserve remains in its early stages and monetary policy elsewhere in the world is still relatively easy, and rates remain low. Although we believe we will likely see further rises in interest rates and bond yields, we expect the pace of such increases to be gradual.

Looking ahead, we still expect investor demand for physical real estate, a real asset with an attractive and growing income stream, to remain robust. Strengthening macroeconomic growth will continue to drive markets and is beneficial for real estate.

Physical fundamentals across Asia Pacific remain robust, driven by end-user demand and healthy household balance sheets. However, in certain markets, we are getting later in the property cycle and therefore expect more modest income-led returns from here. We maintain our preference to limit top-down investing and focus on bottom-up stock selection to generate returns, identifying and investing in companies with top quality management teams, solid capital structures, and the ability to generate income and dividend growth even against a backdrop of lower growth.

China Fund

Investment report for the period from 1 July 2017 to 31 December 2017

Investment Fund Managers

Charlie Awdry and May Ling Wee

Over the six months, the fund returned 22.0% in US Dollars, slightly behind the benchmark MSCI China, which returned 23.4%.

Chinese equity markets broadly trended upwards in the six months to the end of December 2017, driven by a strong half yearly profit reporting season that helped continue the upward revisions of profit forecasts from investment bank analysts.

October was dominated by the Communist Party Congress, which saw President Xi Jinping's power reinforced and acknowledged by the Communist Party. We believe Xi's 'Socialism with Chinese characteristics in a New Era' sets the context for future policy and gives him unquestioned ideological authority over the Party and China. We will watch closely as policies are rolled out to address issues that Xi identified, such as unbalanced and inadequate development, reducing inequality, the need for a world class military, a beautiful China and the rule of law.

The fund's performance placed it at the 37th percentile of peer group returns. On a relative performance basis, the fund was hampered by the UCITS concentration rule, which limits a single portfolio holding to 10.0% of the total portfolio. Tencent is now over 18% of the benchmark MSCI China Index and rose 44.6% over the period. Our underweight position cost us 1.4% in relative performance, which is almost exactly the entire relative underperformance of the fund.

One of the top stock contributors to performance on the long side was our position in life insurance company Ping An Insurance, which rallied as the market re-appraised the quality and value of its balance sheet and investment portfolio. US-listed private wealth management company Noah Holdings and social media platform Weibo (sometimes called 'China's Twitter' by foreign observers) also helped returns, as did Shanghai A share holdings Kweichow Moutai and China international Travel Services. Shares in baijiu liquor company Kweichow Moutai have performed very strongly over a number of years as the recovering economic and business cycle boosted high-end liquor consumption, and the company's strong premium brand position allows it to raise prices along its distribution chain.

In addition to Tencent, top detractors to performance included our holding in luxury retail mall operator Hang Lung Properties. Residential property developer China Overseas Land also hurt performance, but shares staged a strong rebound as we entered 2018. We sold our position in Macau casino operator Sands China on a stop loss review mechanism, and prefer to invest in Macau through our holding in Galaxy Entertainment, which performed better.

Our short book rose less than the market, and therefore boosted returns for the overall fund. We had particular success shorting an online discount retailer where user engagement and revenue growth slowed dramatically. We since closed the position, feeling that negative sentiment was pervasive and that valuations had become attractive – a conclusion confirmed by a subsequent bid for the company from a much larger peer.

Generally, our transactions over the second half of 2017 tilted the fund towards the value end of Chinese equity markets. Growth shares enjoyed a huge period of outperformance through 2017 and the fund benefited from this trend. While we still like many growth shares, we feel there is an attractive buyable upside in unloved parts of the market, so we've continued acquiring select energy and financial sector shares, such as offshore drilling company China Oilfield Services and Industrial & Commercial Bank of China.

Inflows into the Chinese and broader emerging markets equity markets returned, and Hong Kong initial public offerings are now hot, so it's fair to say the Chinese bull market continues to mature. Although early signs of greed are emerging, past experience suggests this period of the market can continue for a long time and provide strong returns. We believe this is particularly true this time because in this cycle investors have generally been ignoring China for a number of years beforehand.

As usual, we are sticking to what we know best, and are finding plenty of attractive investment opportunities as China's economy grows slowly and the profit upcycle continues in Hong Kong, US and mainland A share stock markets.

Global Equity Income Fund

Investment report for the period from 1 July 2017 to 31 December 2017

Investment Fund Managers

Ben Lofthouse and Andrew Jones

The fund's total return in US Dollar terms over the six months was 8.3%, compared with the total return of the MSCI World Index of 10.6% in US Dollar terms over the same period.

Equity markets rose significantly over the six months as the outlook for global economic growth continued to improve. With a strong economic backdrop, the market became more optimistic about the prospects for corporate profit growth. The US market performed particularly strongly following the announced changes to corporate and personal tax rates. The energy and mining sectors also performed very well during the six months as commodity prices rose, while more defensive sectors such as consumer staples and healthcare underperformed.

The fund underperformed the benchmark during the period. Among the weaker performers were Nielsen, Nordea and General Electric. Nielsen fell after the growth rate of its Buy division continued to be poor, Nordea was weak after announcing that the costs of restructuring would be higher than the market had expected, while General Electric fell following disappointing results and a restructuring plan that was more cautious than the market had hoped for. The fund's holdings in the tobacco sector were also negative for performance during the six months, following the FDA announcing an intention to lower the nicotine content of combustible cigarettes and also encouraging the adoption of new, lower harm delivery devices over the long run.

The fund's overweight position in the energy sector was positive for performance, with Chevron, Tenaris, Occidental Petroleum and Royal Dutch Shell all rising during the six months. As well as benefiting from a higher oil price, these companies are finding significant cost savings and are also only approving new capital projects when they are sure of the returns in a conservative commodity price environment. The holdings in Microsoft, TSMC and Samsung Electronics were also positive for performance, with all three companies announcing excellent results with good revenue and cashflow growth.

The fund initiated new positions in Danish brewer Carlsberg, US semiconductor group Maxim Integrated Products and US chemical company DowDuPont during the month. Carlsberg has a new management team who are very focused on improving margins, increasing cashflow generation and also deleveraging the balance sheet. Maxim is well positioned to benefit from the structural growth in semiconductor use in the industrial and automotive sectors, which should result in continued good cashflow and dividend growth in the future.

We believe the merger of Dow and DuPont will lead to significant synergies, which, along with good operational performance, should lead to good cash returns to investors going forward. These positions were funded by exiting the positions in Telenor, Iron Mountain and Cembra Money bank following good long term performance.

The second half of 2017 saw strong, synchronised global economic growth. This is expected to continue in 2018, which should lead to good corporate earnings, cashflow and dividend growth being delivered. This in turn should enable markets to continue to make progress despite the good performance of the last few years. The fund will continue with its existing strategy of identifying companies that pay an attractive and sustainable dividend which have the capacity to grow over the medium to long term.

Global Multi-Asset Fund

Investment report for the period from 1 July 2017 to 31 December 2017

Investment Fund Managers

Paul O'Connor, Oliver Blackburn and Nicholas Harper

During the period Ryan Boothroyd was replaced by Oliver Blackburn and Nicholas Harper.

The fund returned 3.2% (in Sterling terms) over the period. The fund outperformed both its benchmark of three-month Libor with a return of 0.2% and the target return of three-month Libor plus 4% in the period, and has done since inception.

The six months to the end of December 2017 were characterised by strong credit and equity markets against a backdrop of good macroeconomic momentum. Geopolitics generated headlines, but had little investment impact in the end.

Developments in North Korea dominated the headlines in August, following missile launches and nuclear tests. However, these events didn't have a lasting influence on financial markets and investors quickly moved on to other topics. In Japan, market sentiment was boosted by Prime Minister Shinzo Abe's significant victory in the snap election, re-affirming his mandate to pull the Japanese economy out of stagnation. European equity markets had a tougher time, however, as Catalonia's declaration of independence from Spain, and a setback for Chancellor Angela Merkel in the German election, brought back the spectre of political instability in the eurozone. However, the period ended with a strong rally in many markets as President Donald Trump's tax reform bill was finally passed and is now expected to boost both corporate earnings and US growth, at least in the near term.

The fund enjoyed positive contributions from government bonds, corporate bonds, emerging market debt, equities, commodities, other alternatives and currency hedging. Equities were the biggest contributor, particularly Japanese, US and UK stocks, once the effect of currency hedging was incorporated. Underlying holdings providing the strongest returns were First State Japan Equity Fund, CF Morant Wright Nippon Yield Fund, Janus Henderson Emerging Markets Fund and Polar Capital UK Value Opportunities Fund. Detractors over the period were limited, but included positions in Ashmore Global Opportunities Ltd, iShares US Dollar Short Duration Corporate Bond (ETF) (excluding the impact of currency hedging), Kames Equity Market Neutral Plus Fund and UK index-linked bonds.

Changes in the fund were focused on a move out of more expensive and less liquid corporate fixed income and emerging market debt into sovereign bonds and cash. Concerns about investor optimism and the effect of central bank stimulus withdrawal on these asset classes drove the move. The weight in alternatives declined as we exited one fund due to falling conviction in that strategy.

Within our equity allocation, our broad global equity position was reduced in favour of a modest increase in the already-large position in Japanese equities following the Japanese election victory for Prime Minister Shinzo Abe. This continues a theme of looking for regions offering better value, such as Europe and emerging markets. In the UK and Europe, we moved some passive equity holdings into active strategies, which is a broader theme for us across risk assets, as bull markets mature. In the US, we took profits on our holding in the technology-rich Nasdaq futures position, banking some substantial performance gains and switching into the broader market.

In fixed income, investment grade corporate bonds and emerging market debt were reduced predominantly in favour of cash and index-linked gilts. Credit spreads (the extra yield over an equivalent government security) narrowed significantly towards historic lows and we have concerns about the ability of certain fixed income markets to cope with the withdrawal of plentiful liquidity from central banks. As a result, we felt it prudent to switch some of our holdings into the more liquid sovereign bond market. The sales were out of passive strategies, where concentrated positioning is under greater threat from a market fall.

On balance, our core macroeconomic view as we enter 2018 is a constructive one, featuring a synchronised global recovery, a modest pick-up in inflation and a gradual normalisation of monetary policy. Still, with few assets looking particularly inexpensive, we have to question the extent to which many of the positives features of our view are already priced into financial markets.

We enter the year with equities remaining our preferred asset class. While the ending of quantitative easing (central bank liquidity measures) will be a challenge for all financial markets, equities look best from a relative valuation perspective and offer solid earnings growth as well. However, since absolute valuations are far from inexpensive, the bull market is growing old and some signs of investor complacency are emerging. We do not see this as a time to be 'all-in'.

Looking ahead, we expect lower returns and higher volatility (sharper fluctuations in prices) compared to 2017 and think it is sensible to start the year keeping some firepower in reserve, in the form of cash that we can put to work in any dips that do materialise.

Global Natural Resources Fund

Investment report for the period from 1 July 2017 to 31 December 2017

Investment Fund Managers

David Whitten, Daniel Sullivan and Darko Kuzmanovic

The fund gained 23.8% in US Dollar terms, compared with the gain in the S&P Global Natural Resources Index return of 20.0% over the period.

In US Dollars, the benchmark's sub-sectors were strong, led by metals (+29%), while energy was up 19% and agriculture rose by 11%. In the mining sector, precious metal prices were firmer, with gold and silver both up 2%. Base metals were strong, with nickel gaining 22%, copper 12%, aluminium 8% and zinc 5%. Iron ore gained 12% to \$71 per tonne as the Chinese steel industry continues to demand high grade imported ore. Spot coking coal prices had strong gains, up 36% to \$260 per tonne.

There is strong global interest in electric vehicles, lithium batteries, lithium producers and other battery raw material producers. The mining sector is starting to seek growth through acquisitions in exploration, projects and companies as participants look to position to meet the need for the raw materials to support electric vehicle growth.

Another feature was initiatives by the Chinese government to reduce pollution levels. This translated into the closure of inefficient operations in steel and aluminium and across many other sectors. The fund benefited from this move as China imported higher grade raw materials to maximise efficiency.

In the energy sector, the oil price rose 17% to \$60 per barrel, with Organization of the Petroleum Exporting Countries agreeing on 30 November to extend production cuts until the end of 2018. The US natural gas price declined 2%, with supplies plentiful. The spot uranium price rose 3%. Acquisition activity was low in recent months, but this is expected to recommence with oil prices trending higher. Santos rejected a non-binding private equity offer, pitched low at A\$4.55 per share. Shell sold its entire 13.3% stake in Woodside Petroleum into the market for around A\$3.5bn.

In the agriculture sector, agricultural commodities were weak, with wheat down 5%, soybeans down 2% and corn down 1%. The consolidation of the agriculture sector remains a dominant theme. Agrium and Potash Corporation merged on 3 January 2018 to form Nutrien. The Bayer-Monsanto takeover deal is scheduled for completion in early 2018. Glencore continues to pursue a strategy to grow agricultural infrastructure and trading through industry consolidation in the US.

Contributions were led by mining (+18.1%) and agriculture (+4.4%), with energy adding 2.8%. The best positive contributions in the mining sector included Alcoa, Glencore, Anglo American, Orocobre and Rio Tinto. The main positive contributors from the agriculture sector were SQM, Agrium, Synlait Milk and Deere & Co. In energy, Canadian Natural Resources, EOG Resources and Suncor Energy performed well. Negative contributions were mainly in Fluence, Precision Drilling and Vestas Wind Systems. We increased positions in the energy sector, including Suncor Energy, Royal Dutch Shell and EOG Resources. We also increased holdings in Xanadu Mines, Orocobre, Agrium and SQM. New holdings were DowDuPont, Enbridge, First Quantum and Mineral Resources. We exited our positions in Archer-Daniels Midland, Precision Drilling, Cenovus Energy and Pioneer Natural Resources.

Overall, the fund remains overweight the mining sector and underweight the agriculture sector, with energy a lesser underweight. In the mining sector, the fund remains weighted towards the gold, diversified miners and lithium mining industries. In the agriculture sector, we hold advantaged food companies and agricultural machinery companies. In the energy sector, the fund is overweight the oil and gas exploration and production, storage and transportation sub-sectors. The fund continues to benefit from being invested in high quality, attractively valued companies with robust growth projects. These investments are well diversified and the fund has holdings in well managed companies across many commodities, and through the range of upstream, midstream and downstream producers.

Global Property Equities Fund

Investment report for the period from 1 July 2017 to 31 December 2017

Investment Fund Managers

Guy Barnard and Tim Gibson

The total return for the fund during the six month period was 5.6% in US Dollar terms. The FTSE EPRA NAREIT Developed Index rose 5.3%.

Global equity markets made further gains over the period, with accelerating global gross domestic product and long-awaited progress on US tax reform trumping heightened geopolitical tensions surrounding North Korea and political uncertainty in Europe. Central bank policies diverged, with hikes from the US Federal Reserve and Bank of England, while in Europe and Japan quantitative easing (QE) policies (central bank liquidity measures) were reinforced. Long-dated government bond yields remained range bound, with yield curves flattening, reflecting ongoing low levels of inflation and medium-term growth concerns.

In the property market, conditions remained robust, with transaction volumes globally showing a small increase on 2016. Transactional evidence shows strong demand from both domestic and global equity investors who are typically seeking long-term secure income. We saw a number of record breaking property transactions over the period, most notably in Hong Kong and London, reflecting investor demand for trophy assets. As a result, property yields saw further modest compression in many markets (prices move inversely to yields), although quality differentials in pricing are again widening. Additionally, an improving economic backdrop is translating into a pickup in rental growth in many cities and sectors, as vacancy levels are generally low; the caveat being markets where we've seen increased supply in recent years, such as coastal apartment markets in the US and self-storage. Retail landlords globally are also seeing a decline in rental growth as ecommerce pressures are leading many retailers to reduce their store count; this is particularly prevalent among 'secondary' malls in the US.

Overall, listed real estate stocks made gains in the period, but lagged wider equity markets where earnings growth was stronger. However, we saw significant differentials by country and sector. European stocks proved the strongest, with healthy gains in Germany, France, Sweden and Spain. Stocks in Asia Pacific also made gains, driven by strong returns in Singapore and Hong Kong where fundamentals improved, most notably in the residential sector. US real estate investment trusts (REITs) made little progress, as positive performance from hotel and industrial stocks was offset by weakness in healthcare and apartment landlords given supply concerns. Retail REITs rallied strongly to end the period, following mergers and acquisitions (M&A) activity, most notably Brookfield's bid for GGP, which reversed year-to-date declines. M&A in the retail space was not limited to the US, with Hammerson bidding for peer Intu in the UK and Continental European retail landlord Unibail-Rodamco taking over Westfield, which will see it enter the US and the UK.

The fund marginally outperformed its index (net of fees). An overweight to industrial landlords globally added value, through positions in DCT, Goodman, Segro and VGP. Datacentre landlords NEXTDC and Interxion also performed strongly. An overweight to Europe was also beneficial, most notably through Aroundtown in Germany. In Asia, Sun Hung Kai and Kerry Properties in Hong Kong, and City Developments in Singapore, also added alpha. Conversely, our US retail position detracted following M&A activity, with an absence of GGP detrimental. Japanese developer Mitsui Fudosan also lagged.

From a positioning perspective, while we continue to maintain a fairly neutral regional stance, we further reduced holdings in the US where growth expectations continue to moderate. Conversely, we increased our position in Continental Europe through logistics developer VGP and German commercial landlord Aroundtown. We also increased our holdings in the UK, adding retail landlord Hammerson following weakness, switching out of Unibail.

In the US, we continued to focus on areas of structural growth and those companies best placed to demonstrate ongoing cash flow growth, even in the mature phase of the cycle. Changes over the period included new positions in global cell tower owner American Tower Corporation and Canadian landlord Pure Industrial. We also added healthcare landlord Sabra. Conversely, we further reduced our retail position, selling GGP (unfortunate timing with hindsight) and Urban Edge. We also switched from Empire State REIT to Brandywine in the office space, and Avalonbay to UDR in the apartment space. In Asia Pacific, we consolidated our holdings in the Japanese developers, selling Mitsubishi Estate and adding to Mitsui Fudosan. We also added public REIT Daiwa Office, given its access to the attractive Shibuya area in Tokyo. Finally, we reduced our Australian retail position, given weak leasing spreads and likely structural pressures from Amazon entering the market, selling Scentre Group and adding to diversified landlord Mirvac.

Looking ahead, we still expect investor demand for physical real estate, a real asset with an attractive and growing income stream, to remain robust. While we are likely to see further rises in interest rates and bond yields as QE is tapered (reduced) and eventually reversed, the current spread between property and long-dated bond yields remains wider than historical averages, providing a buffer. An improving economic backdrop will also benefit landlords, through the ability to increase rents, particularly in those markets where new construction was limited. Additionally, while we are getting later in the property cycle in some parts of the world, there remain countries, cities and sectors where trends look set for further improvement which we can target.

We will continue to play to our strengths, reducing macroeconomic risks and focusing on bottom up stock selection to drive returns through a concentrated, high conviction portfolio. We have increasingly targeted those markets, sectors and companies that we believe are capable of growing income and dividends, even in a lower growth environment. Also, as market-wide growth slows, we place greater emphasis on quality assets and management teams; in our experience the value of these factors always comes to the fore.

Global Technology Fund

Investment report for the period from 1 July 2017 to 31 December 2017

Investment Fund Managers

Stuart O’Gorman and Alison Porter

The fund returned 17.4%, versus a MSCI All Countries World IT Index return of 17.7% in US Dollar terms.

The technology sector continued to outpace the broader equity market, driven by superior earnings growth and strong upward earnings revisions. The earnings strength was led by ongoing share gains from the old economy and powerful secular growth drivers.

Naspers outperformed. Naspers is a South African holding company with ownership in Tencent. The net asset value represents a significant discount to holding Tencent shares outright, which we view as attractive. Micron also performed well. Memory demand has been an area of strength of late, driven by cloud data centre spending, mobile and stronger PC trends. Cavium, networking semiconductors, outperformed as Marvell announced an intention to merge. The implied price represented a premium to the prevailing market price of Cavium. As we have previously noted, Cavium has a strong franchise in networking and was expanding its use cases into ARM-based servers. The combined entity should have more scale in data centre semiconductors going forward. Universal Display, which own patents and manufactures materials used for flexible display, contributed positively to performance following strong results. The company is ramping up new Chinese and Korean customers.

Nokia was the largest detractor following weaker than expected guidance. The telecommunications equipment sector has been a difficult area over the last few years due to a myriad of factors. Despite these headwinds, we like Nokia because of its dominant position in a cyclically depressed telecommunications equipment market. The equipment industry is more consolidated versus history, and the company boasts a strong management team, in our opinion. Expedia and Priceline detracted from performance as both companies guided to higher than expected costs. We continue to view the online travel space as being attractive given the strong positions that Expedia and Priceline have built.

The largest change to the fund during the period was rotating from Tencent into Naspers. Over the period, activity included the sale of Criteo on increasing concerns on the impact of Apple’s new operating system and GDPR. We sold EPAM Systems, an IT Services company with its headcount predominantly located in Eastern Europe, as the name approached our price target.

We added a number of new names to the fund over the period. These included TE Connectivity (designer and manufacturer of connectors and sensors), Grubhub (food delivery platform), Coherent (lasers) and Ambarella (semiconductors for video compression and machine vision).

The long term drivers of technology remain intact as it continues to take share versus the old economy, driven by demographics and innovation. We continued to be enthusiastic about the long term outlook for payment digitisation, investment in next generation infrastructure (cloud and 5G), internet transformation (e-commerce, media, travel etc increasingly moving online) and Artificial Intelligence (changing interface with technology and the transport revolution). The relative valuation of the sector remains attractive, especially given the balance sheet strength. We continue to focus bottom-up on powerful secular themes and growth at a reasonable price.

Japanese Smaller Companies Fund

Investment report for the period from 1 July 2017 to 31 December 2017

Investment Fund Manager

Yun Young Lee

The fund gained 11.9% in US Dollar terms during the six months under review, against its benchmark Index rise of 16.7% in US Dollar terms over the same period.

During the period, the Japanese small cap market was up strongly. Smaller companies' quarterly earnings results announced in the period showed strong earnings momentum, boosted more by domestic economy recovery, such as private capex and domestic consumption compared to the first half of the year. Prime Minister Shinzo Abe's election victory in October was a positive for Japanese equities. Japan's ruling Liberal Democratic Party and coalition partner Komeito secured a two-thirds majority in the lower house, giving Abe's government a solid base to continue to tackle challenges, including economic, political and social issues. Given the strong mandate win, Abe now looks to be on track to become the longest-serving prime minister in Japanese history. Moreover, business sentiment, showed in the Bank of Japan's 'Tankan' survey, was strong. Small and medium sized companies' business condition DI in December advanced for a sixth straight quarter and was at a 26-year high.

Major positive contributors to the fund included Toa (marine construction), Fuji Oil (oil refinery), Nippon Yusen (shipping), Nippon Soda (chemical) and Isetan Mitsukoshi Holdings (department store). Toa announced an upward revision of earnings guidance, indicating better profit margins than expected. Fuji oil surged from a low valuation level due to structural improvement of the supply and demand situation in oil refinery industry, while Nippon Yusen increased its earnings guidance thanks to better containership fleet's profitability and a recovery in freight rates of dry bulk carriers. Nippon Soda increased due to ongoing volume growth and increased profitability of its chemicals with high market shares.

Major negative contributors included Cookpad (internet recipe services), Asics (running shoes), Yonex (badminton racket), Kobe Steel (steel) and Kadokawa Dwango (Internet). Kobe Steel dropped dramatically due to a data-falsification scandal, and we closed our positions in the company. Cookpad, Asics, Yonex and Kadokawa all declined due to weak earnings results.

We opened positions in Denki Kogyo (antenna maker), Life (foods retailer), Meidensha (EV parts maker), Mitsui Engineering & Shipbuilding, North Pacific Bank, Saint Marc Holdings (bakery restaurant operator) and Septeni Holdings (internet).

We are likely to see pay levels continue to rise. Owing to the labour shortage, compensation levels have increased steadily over the last three to five years. The trend may accelerate from 2018, and we should see a commensurate increase in private consumption. We positioned our portfolios ahead of this and hope to benefit from the ongoing trend of higher consumer spending.

We continue to see attractive opportunities in Japanese smaller companies and look to identify mispricing opportunities through in-depth proprietary fundamental research to discover incremental changes that may impact a company's growth potential and share price. We look to invest in undervalued smaller companies to benefit from the potential of these companies to become merger and acquisition targets by larger, cash-rich companies. Additionally, we seek to invest in companies that are improving corporate governance standards and rewarding shareholders; these characteristics have greatly improved since Prime Minister Abe's introduction of a corporate governance code in 2015, and look set to be a continuing trend given his solid victory in the October 2017 snap election.

Pan European Alpha Fund

Investment report for the period from 1 July 2017 to 31 December 2017

Investment Fund Manager

John Bennett

Over the six months to 31 December 2017, the fund's net asset value fell by 0.8% (EUR Retail Class, net of fees).

As 2017 progressed, we became increasingly cautious in our view of markets. Essentially, this was the result of a lack of opportunities presenting themselves at attractive prices: in other words, valuations are increasingly problematic for us. Along with clear and present signs of momentum-driven markets, this led us to believe we have probably entered the final phase of this long bull market. Acknowledging that such phases can become dangerously self-fulfilling, we believe that the enormous growth in popularity of passive investment vehicles, coupled with central bank policy around the world, has created ideal conditions for the perfect momentum storm. The most egregious examples are in areas such as the cryptocurrency bubble, but we believe it extends to other areas too, such as technology and other 'growth' stocks.

Such periods have occurred before in financial market history and we believe they will occur again. They are always testing for the value-conscious investor, and 2017 was such a period. It was a year which, at times, caused us to question ourselves, as our focus on financial metrics (such as free cash yields and balance sheet strength) seemed destined to be consigned to the status of quaint.

Nevertheless, we stuck to our familiar areas and, in particular, to the discipline of trying not to overpay for the assets we buy. Many stocks look to be trading on high multiples of high profit margins. If we are right in our belief that mean reversion is not dead, the scene is set for a challenge to the momentum consensus.

Performance over the period was adversely affected by weak stock picking, with a number of names that we have held for a long time rolling over and us failing to sell or reduce them.

On a gross basis, the long book contributed by approximately 150 basis points, while the short book detracted by approximately 80 basis points. The financials and energy sectors were the main contributors to performance on the long side, and on the short book we had some success with our consumer discretionary sector allocation. Our index futures hedges, used not as a profit centre but as a liquid hedging tool, detracted from performance.

On the long book, among the top contributors at a stock level was bank ABN Amro. In the final quarter of 2017, we decided to substantially increase the fund's position in European banks. During the period, we unwound some of this, based upon two factors. The first of these is that the sector re-rated (sector reassessment by the market) as investors were comforted that balance sheet capital has been and continues to be rebuilt: it is no longer the 'easy' avoid in European equities that it was for so many years. Secondly, we are concerned by a continuing lack of inflationary pressure and the consequences this has for bond yields. With European bank stocks having re-rated, it is our view that this lack of upward pressure on bond yields becomes more important. Thus, we took profit on BNP Paribas, Danske Bank and Societe Generale and reduced our holdings in Intesa Sanpaolo, ING, KBC and Unicredit.

The single biggest stock contributor was GALP Energia, which benefited from the rising oil price as well as the company's excellent production profile from offshore Brazil. Meanwhile, our key holding in the auto components sector, Autoliv, saw a strong share price rebound in the wake of the announcement of a strategic review. This will focus on its operating structure, potentially creating separate companies in passive safety and electronics. By way of contrast, performance was impacted by renewable energy equipment manufacturer Vestas Wind Systems, which suffered due to political risk and margin concerns. This holding was substantially reduced.

On the short side, we had particular success in European clothing retailers and a Spanish telecommunications stock.

Key activity over the period included the purchase of a position in Merck, a German conglomerate that encompasses pharmaceuticals, life sciences and performance materials. We believe that there is significant optionality in the pharmaceutical pipeline, despite short term caution on trends within its performance materials division.

After meeting management, we initiated a position in Nokian Renkaat, which specialises in the manufacture of winter tyres. We are excited by the potential long term return on capital when a new plant being constructed in the US is fully operational. We introduced Norwegian fish farming leader Marine Harvest, where we identified attractive top line prospects as well as favourable supply/demand dynamics.

We added pulp and paper manufacturer UPM-Kymmene, attracted by management's focus on improving return on capital and whose stock trades at an attractive valuation. We established a holding in British American Tobacco because we like its geographic reach as well as its strategy in next generation heat-not-burn products.

Finally, we bought Italian utility name Enel, which we see as the cheapest among the integrated utilities peer group and is undergoing a promising streamlining exercise under new management.

On the sell side, we reduced our allocation to the healthcare sector over the period by selling our positions in AstraZeneca, GlaxoSmithKline and Novartis and reducing our weighting in Roche. We took profits on our holding in Volvo and exited oil service play John Wood Group due to the capex cycle trailing the oil price by more than expected. We sold our longstanding holding in mid cap French office supplier BIC and covered shorts positions in the financials sector.

In terms of overall positioning, we reduced risk in the fund since the last report, primarily through a decrease in our gross exposure. Our exposures stood at approx. 57% net and 75% gross respectively at the end of the period compared with around 64% and 108% respectively as at 30 June 2017.

As we start 2018, the opportunities are very much stock specific and the fund remains a bottom up blend of sector and stock decisions. As we stand today, we are relying less on sector themes and have no big convictions at the sector level.

We remain cautious: bargains certainly do not abound and the past year's increasingly momentum driven market gives further cause for vigilance. Some form of mean reversion in market leadership looks inevitable and perhaps even imminent.

Pan European Property Equities Fund

Investment report for the period from 1 July 2017 to 31 December 2017

Investment Fund Manager

Guy Barnard

The total return for the six month period was 12.1% in Euro terms. The FTSE EPRA/NAREIT Europe Capped Index gained 7.2% in Euro terms over the period.

European economic indicators strengthened throughout the period, with euro area gross domestic product growth running at its fastest pace for six years, consumer confidence reaching a 16-year high and unemployment falling below 9%, an eight-year low. However, political uncertainty remained prominent in Europe, with an unexpected German election result, Catalan separatists calling for independence in Spain and the UK burdened by its exit from the European Union (known as 'Brexit'). In terms of monetary policy, the European Central Bank announced a continuation of its quantitative easing programme (central bank liquidity measures) at a reduced pace, to at least September 2018. Conversely, the Bank of England announced the first interest rate rise in a decade, given inflation pressures.

Property equities made gains over the period and outperformed wider equity markets. Physical property markets continued to highlight further growth in most markets, with transactional evidence showing strong demand from both domestic and global equity investors. As a result, property yields saw further modest compression in many markets (prices move inversely to yields). Additionally, an improving economic backdrop is translating into rental growth in many cities and sectors, most notably in Germany, Spain and Sweden. There were clear winners at a sector level too, with logistics landlords generating strong returns as rental growth accelerated given increased tenant demand as a result of ecommerce. However, retail landlords lagged, as moderating consumer spending, combined with the rising trend to online sales, led investors to avoid the sector. A flurry of mergers and acquisitions deals late in the period saw companies looking to drive future growth from operating synergies as well as taking advantage of discounted valuations.

The fund significantly outperformed its index over the period, driven by stock selection. Notable value was added in the UK, where our preference for areas of structural growth, such as Segro and Hansteen in the industrial/logistics space, Unite in student accommodation and self-storage company Safestore all made gains. Our overweight in Germany also proved fruitful, with commercial landlord Aroundtown generating significant returns as it continues to demonstrate impressive cash flow growth, boosted by an opportunistic approach to acquisitions. In France, our overweight in office landlords Gecina and Icade was beneficial, as well as our underweight in retail names. Swedish stock Hemfosa also rallied strongly on news it would split its business into two parts in an effort to maximise value. Finally, an absence of any Swiss stocks added value given the currency weakness.

From a top down perspective, we made no significant changes and continued to adopt a fairly neutral stance at a country level, focusing on bottom up stock selection to drive alpha. We remain overweight German commercial, UK alternatives and Spain, and underweight retail, London office and Switzerland. At a stock level, new positions included Gecina in the French office space, given improving fundamentals and share price weakness during a rights issue. We also added VGP, a Belgian listed developer and owner of big box logistics parks in several European countries. We rate the management team highly given their record of securing land and development margins have been outstanding.

In the UK, we added Hammerson toward the end of the period. While challenges remain in physical retail, we felt more than compensated for the uncertainty. We also added a holding in the healthcare sector through GP surgery owner Assura, which offers a highly secure and growing long-term income stream. We sold out of several positions that performed well and we felt a further re-rating (stock reassessment by the market) was unlikely; Hansteen and St Modwen in the UK and Aedfica and Nexity on the continent. In Sweden, we re-introduced a position in Balder, which offers a strong cash flow growth story from a high quality portfolio, including a high proportion of defensive rental residential apartments. This was partly funded through profit taking in peers Hemfosa and Wihlborgs. Finally, we added to Austrian-listed residential owner/developer BUWOG on valuation, which proved well-timed ahead of a takeover approach from German peer Vonovia late in the period.

Looking ahead, we enter 2018 with strong economic momentum in most parts of Europe and a supportive monetary backdrop. This, coupled with real estate's offer of an attractive income yield with predictable growth characteristics, should deliver attractive returns, even as bond yields begin to rise. While we may see greater volatility (sharper fluctuations in prices) in equity markets in 2018 compared to 2017 as stimulus is gradually unwound, we expect the long-term structural trends which are driving investors to seek secure income to continue to lead to healthy demand for real estate assets.

We continue to believe that the stocks held in our concentrated fund offer attractive prospects, either from a growth, value or income standpoint. With listed real estate stocks continuing to trade at a discount to net asset value, it remains less expensive for investors to buy property through shares than physical real estate. While growth is moderating, we still forecast further asset value growth this year, albeit with wide divergence by country and sector. More importantly, the income streams of the property sector remain incredibly robust, with the sector's current dividend yield of almost 4% forecast to grow by c.7% per annum for the next two years.

Pan European Smaller Companies Fund

Investment report for the period from 1 July 2017 to 31 December 2017

Investment Fund Managers

Ollie Beckett and Rory Stokes

During the period the fund returned 6.5% in Euro terms against the Euromoney Smaller Companies Index of 5.7%.

Global and European politics remain a source of noise in the market that can affect prices in the short term. In the first half of the period, market participants became excited by the prospect of President Donald Trump's tax reforms, then despondent at the prospect of them not occurring, before finally encouraged by the fact that they went through Congress. An inconclusive German election that left the ongoing Chancellorship of Angela Merkel in question did not seem to discourage markets, but there was temporary volatility caused by the emerging stalemate around Catalan independence from Spain. Negotiations regarding the UK's departure from the European Union (EU) (known as 'Brexit') continued.

Looking forward, Italian elections in the coming months look unlikely to produce a clear winner and the German election could potentially be rerun. Additionally, French President Emmanuel Macron's plans to deepen European integration could spark a noisy debate within the EU.

Notwithstanding this, the European economy continues to recover. The global backdrop for growth still appears encouraging, with the US and Chinese economies also showing expansion – and European smaller companies are primarily a beneficiary of global growth.

In terms of positive contributors to performance, we had strong returns from JOST Werke, a German trucks and trailer company that listed during the summer. Wacker Chemie, a diversified chemicals company producing silicones, polymers, polysilicon and bio-based materials, also contributed positively to performance. Strong demand and cash generation offset news that the company had to shut down its Tennessee plant following an explosion. Gaztransport et Technigaz, a French-listed provider of technology in container systems for the transport and storage of liquid natural gas (LNG), also helped performance. The company continued to pick up orders and benefited as the market began to focus on the large potential for using LNG as a fuel. Solar equipment company Meyer Burger had strong share price performance. We bought Meyer Burger early in 2017 for its turnaround potential, and the latest results and roadshow produced further evidence that the company is on track. It announced a large number of new orders and its new product launch has so far been successful.

Our biggest detractor was Criteo, a French-domiciled/US listed provider of targeted online advertising, which suffered after Apple tweaked the Safari browser to no longer allow online targeted advertising. The company is working on a solution to circumvent this, but it clearly creates a near term headwind. We remain holders as, after the share price fall, we believe it now seems likely to be a bid target. Lenzing, a strong contributor year to date, was among our weakest holdings as there was a stock placing by the major shareholding foundation. In addition, investors grew nervous of increasing global supplies of viscose. While this will be a headwind for the company, we believe strong demand, as well as its focus on speciality fibres, will continue to propel growth. Defence company Ultra Electronics also disappointed the market with a profit warning. Defence spending cuts impacted the company to a greater degree than we expected, and the CEO has now left, so the position is under review.

Activity was driven by bottom-up stock selection, as per usual. We added carpet manufacturer Victoria. The company raised capital to complete the acquisition of Italian ceramic flooring manufacturer Ceramiche Serra. We also added S&T, which creates firewalls for machines and is built into the trend of the Internet of Things. As more devices are linked to the cloud, we expect security to become an ever more important issue. The company is also completing an acquisition that will add a hardware offering to its existing software services. We also added a contrarian holding in troubled UK retailer Dixons Carphone as we believe it should be able to benefit from the launch of the iPhone X. Activity also included the purchase of VGP, a Belgium warehouse owner and property developer. We bought Alfa Financial Markets, a leading consultant on new areas of regulation such as MiFID II.

We took advantage of the large number of new companies coming to market and participated in the initial public offerings of doBank, JOST Werke and Zur Rose. DoBank is a processor of non-performing loans, which offers a large addressable market in Italy, and Zur Rose is a fast-growing online pharmacy in Switzerland.

Disposals involved profit-taking in Alfa Financial Software, ASM International, Cerved, Nexity and NOS. British fashion brand Jimmy Choo also exited the fund after being acquired.

European smaller companies remain a relatively scarce source of value in an expensive world. Furthermore, the European economic recovery provides a favourable backdrop for earnings growth. There are risks around issues such as the Brexit negotiations and broader political paralysis in countries such as Germany and Italy. However, overall, we anticipate that politics will remain a noisy distraction but that there are enough companies with exciting growth prospects or self-help that will allow us to find stocks to deliver returns for our clients.

Notes to the Financial Statements (continued)

As at 31 December 2017

Hedged share classes

Hedged share classes in the funds are identified with a "H" immediately before the currency denomination. A hedged share class is a share class of the Company designated in a currency other than the base currency of the relevant fund. Hedged share classes allow the Investment Manager to use currency hedging transactions to reduce the effect of fluctuations in the rate of exchange between the designated currency of shares in those classes and the base currency of the fund.

Policies applicable to all funds

To the extent permitted by the Section 'Investment Restrictions' of the Prospectus, the funds may also invest in either closed-ended or open-ended investment funds, or other transferable securities, including derivatives, which invest in, or provide a return linked to, any of the transferable securities that they are permitted to invest in.

For the purpose of maximising portfolio returns, the funds may also, within the limits set forth in the Section 'Investment Restrictions' of the Prospectus, engage in a policy of currency hedging and make use of derivatives for efficient portfolio management when it is thought by the Investment Manager to be appropriate.

Further, some of the funds may invest into derivatives within the limits set forth in the Section 'Investment Restrictions' of this Prospectus in order to enhance returns. Each fund may, on an ancillary basis, hold liquid assets. All funds may also, to the extent permitted by applicable regulations, on a temporary basis or for defensive purposes, invest in government debt securities.

Cross sub-fund investments

As at 29 December 2017, cross sub-fund investments represented an amount of USD 10,678,541 and therefore the total combined Net Asset Value, without cross-investments, would be USD 17,641,722,256.

The following funds held cross investments at the period end:

Janus Henderson Horizon Fund - Global Multi-Asset Fund, which invested in Janus Henderson Horizon Fund - Global High Yield Bond Fund and Janus Henderson Horizon Fund - Total Return Bond Fund.

Janus Henderson Horizon Fund - Euro Corporate Bond Fund, which invested in Janus Henderson Horizon Fund - Euro High Yield Bond Fund.

2. Presentation of Financial Statements

The accompanying financial statements present the assets and liabilities of the individual funds and of the Company taken as a whole. The financial statements of each individual fund are expressed in the currency designated in the prospectus for that particular fund and the financial statements of the Company are expressed in United States Dollars. When the base currency of the fund is not in United States Dollars, the difference between the opening net assets stated at exchange rates ruling at the beginning of the year and their value at the financial period end is shown as an Exchange rate effect on opening net assets in the Combined Statement of Changes in Net Assets. The financial statements have been prepared in accordance with the format prescribed by Luxembourg legal and regulatory requirements for undertakings for collective investment.

Each fund is treated as an independent entity. Shareholders of each fund are entitled only to the wealth and yield of the fund to which they have subscribed. Each fund bears the appropriate amount of liabilities attributable to it and the commitments entered into in the name of one fund are covered solely by the assets of that fund. A fund will not be liable as a whole to third parties. Separate accounts and records will be maintained for each fund.

As the financial statements include dividend declarations effective for the distribution as of 29 December 2017, the Net Asset Values shown throughout the report may differ from those published on 29 December 2017 for dealing in these funds.

3. Significant Accounting Policies

The following is a summary of the significant accounting policies followed by the Company:

Valuation of Investment Securities

The investments of each fund will normally be valued on the basis of either the last available mid-market price (the mid point between the quoted bid and offer prices) or, for certain markets, the last traded price on the principal stock exchange or market on which the investments are quoted, listed or normally dealt in as at 1.00p.m. Luxembourg time on the relevant Dealing Day with the exception of the Global Equity Income Fund, Emerging Market Corporate Bond Fund, Global Corporate Bond Fund, Global High Yield Bond Fund, Global Technology Fund, Core Credit Fund, Global Property Equities Fund, Global Natural Resources Fund, US Growth Fund, Global Multi-Asset Fund and Strategic Bond Fund which are valued as at 4.00p.m. Luxembourg time. All other assets, including restricted and not readily marketable securities, will be valued in such manner as the Directors consider appropriate to reflect their fair value.

In the case of Core Credit Fund, which is valued at 4.00p.m. Luxembourg time on any Wednesday that is a Business Day, a special NAV was calculated as at 29 December 2017 for financial statement purposes.

Notes to the Financial Statements (continued)

As at 31 December 2017

3. Significant Accounting Policies (continued)

Valuation of Investment Securities (continued)

In the event that net subscriptions or redemptions on any Dealing Day represent a material proportion of the Shares in issue, or in such other circumstances as the Directors consider appropriate, the investments may be valued on an offer or bid basis, as appropriate, taking into account the applicable dealing costs, or in such a manner as the Directors deem appropriate, to reflect more fairly the value of the investments in the circumstances.

Securities which are neither listed on any stock exchange nor dealt on another regulated market will be valued in such manner as the Directors consider appropriate to reflect their fair value.

Units or shares of open-ended undertaking for collective investment ("UCI") are valued at their last determined and available net asset value or, if such price is not representative of the fair market value of such assets, then the price as determined by the Directors on a fair and equitable basis. Units or shares of a listed closed-ended UCI are valued at their last available stock market value.

The last Dealing Day of the current year was 29 December 2017 and the investments have been valued based on the relevant market or traded price attributable to that Dealing Day.

In the case of short term instruments, the value of the instrument based on the net acquisition cost, is gradually adjusted to the repurchase price thereof. In the event of material changes in market conditions, the valuation basis of the investment is adjusted to the new market yields.

As a result of time variations in certain markets the prices applied to certain funds do not necessarily reflect the closing market prices for the same calendar day as the relevant Dealing Day.

Any difference arising between the cost of securities held at the reporting date and their market value at that date is recognised as unrealised appreciation or depreciation.

Forward foreign exchange contracts

Forward foreign exchange contracts are valued at the forward rate applicable at the statement of net assets date for the period until maturity. Gains or losses resulting from forward foreign exchange contracts are recognised in the Statement of Operations and Statement of Changes in Net Assets.

Financial futures contracts

Financial future contracts are valued at the exchange quoted price at 1.00 pm Luxembourg time with the exception of the Global Technology Fund, the Global Property Equities Fund, the Global High Yield Bond Fund, the Global Equity Income Fund, the Core Credit Fund, the US Growth Fund, Global Multi-Asset Fund and Strategic Bond Fund which are valued as at 4.00pm Luxembourg time. Initial margin deposits are made in cash upon entering into futures contracts. During the period the future contract is open, changes in the value of the contract are recognised as unrealised gains and losses by marking to market on a daily basis to reflect the market value of the contract at the end of each day's trading. Variation margin payments are made or received, depending upon whether unrealised losses or gains are incurred. Variation margin payments are recorded in the Futures margin account in the statement of net assets. When the contract is closed, the fund records a realised gain or loss equal to the difference between the proceeds from (or cost of) the closing transaction and the opening transaction.

Options

When a fund purchases an option, it pays a premium and an amount equal to that premium is recorded as an investment. When a fund writes an option, it receives a premium and an amount equal to that premium is recorded as a liability. The investment or liability is adjusted daily to reflect the current market value of the option. If an option expires unexercised, a sub-fund realises a gain or loss to the extent of the premium received or paid.

For the Asian Dividend Income Fund only, Option premiums are treated as revenue and distributed accordingly.

Swap contracts

Funds may enter into Credit Default Swaps and other types of swap agreements such as interest rate swaps, total return swaps, swaptions and inflation linked swaps. Gains or losses resulting from swap contracts are recognised in the Statement of Operations and changes in net assets. The premiums received resulting from Credit Default Swaps are recognised under Derivative income/expense in the Statement of Operations. Swaps are valued at fair market value as determined in good faith pursuant to procedures established by the Management Company.

Contracts For Difference

For contracts for difference, changes in the value of the contracts are recognised as unrealised gains or losses in the Statement of Net Assets by "marking-to-market" the value at the balance sheet date, using prices supplied by independent pricing services that are based on the closing prices of the underlying securities on the recognised exchanges. When a contract is closed, the difference between the proceeds from (or cost of) the closing transaction and the original transaction is recorded as a realised gain or loss in the Statement of Operations.

Notes to the Financial Statements (continued)

As at 31 December 2017

Realised Gains & Losses on Sale of Investments

The computation of realised gains and losses on sales of investments is made on the basis of average cost.

Income

Dividends are recognised as income on the dates that securities are first quoted as "ex-dividend" to the extent information thereon is reasonably available to the fund. Interest is accrued on a daily basis.

Long positions held on contracts for difference are subject to financing costs. Interest is calculated and charged on a daily basis on the contract value. Similarly if short positions are held, interest will be received.

Dividend and interest income is disclosed net of withholding tax where applicable.

Dividend charges or credits are used to ensure that the contracts for difference mirror the value of the underlying stock when a dividend is announced. If a long position is held a payment will be received on the ex-dividend date and is reflected within "Derivative income" in the Statement of Operations. If a short position is held, a charge is deducted on ex-dividend date and is reflected within "Derivative expense" in the Statement of Operations.

Collective investment scheme-Management fee rebates are received from management companies and are recognised when the entitlement arises, as either income or capital in accordance with the treatment of the management fee charged on the underlying Collective investment scheme. Management fee rebates are reflected in the Statement of Operations under "Other income".

Securities lending

The fund, with the exception of Core Credit Fund, has entered into a securities lending programme with BNP Paribas Securities Services acting as the Securities Lending Agent for the purposes of efficient portfolio management.

The Securities Lending Agent shall ensure that sufficient value and quality of collateral is received before or simultaneously with the movement of loaned collateral. This will then be held throughout the duration of the loan transaction and only returned once the lent asset has been received or returned back to the relevant fund.

Securities lending generates additional revenue for the benefit of the relevant fund and is accounted for under the Statement of Operations under 'Other income'.

Designated Currencies

As permitted by Luxembourg law, the books of the Company are kept in United States Dollars ("USD") with the exception of the Euroland Fund, the European Growth Fund, the Pan European Smaller Companies Fund, the Pan European Property Equities Fund, the Pan European Equity Fund, the Pan European Alpha Fund, the Euro Corporate Bond Fund, the Euro High Yield Bond Fund, the Total Return Bond Fund and the Pan European Dividend Income Fund which are kept in euros ("EUR"). The base currency of Global Multi-Asset Fund is Sterling ("GBP") and the base currency of Japan Opportunities Fund and Japanese Smaller Companies Fund are in yen ("JPY")

The EUR, GBP and JPY figures have been converted into USD in order to produce consolidated combined financial statements to comply with Luxembourg regulations.

Realised and unrealised exchange differences on the re-valuation of foreign currencies are taken to the Statements of Operations.

Hedged share classes

Hedged share classes allow the Investment Manager to use currency hedging transactions to reduce the effect of fluctuations in the rate of exchange between the currency of shares in those classes and the base currency of the fund.

Any benefits or losses of the hedging transactions should accrue to shareholders in that hedged share class only. The Investment Manager will review the relevant hedging positions on a regular basis and, if considered appropriate, make adjustments to correct the allocations across share classes.

The currency transactions will not cause the hedged class shares to be leveraged. The value of the share class to be hedged will be made up of both capital and income elements and the Investment Manager intends to hedge between 95-105% of the value of each hedged Share class. Adjustments to any hedge to keep within this target range will only be made when the required adjustment is material. As such the hedged class shares will not be completely protected from all currency fluctuations.

Notes to the Financial Statements (continued)

As at 31 December 2017

4. Dilution adjustment

The Janus Henderson Horizon Funds operate a single swinging price policy, the threshold of which is determined by the Directors.

The Investment Manager may consider that it is in the best interests of the Company to apply a Swing Pricing adjustment, given the prevailing market conditions and the level of certain subscriptions or redemptions requested by Shareholders in relation to the size of any fund. A Swing Pricing adjustment (a means of compensating a fund for the dilution effect of material subscription or redemption activity on the fund) may be applied to the Net Asset Value to account for the cost of dealing in the underlying securities. The swing pricing mechanism may be applied across all funds and may be adopted to protect the interests of shareholders of the Company.

If the net dealing on any valuation day is greater than the set tolerance of the total value of a fund, the price will be swung up/down depending on whether the net dealing is positive/negative.

The adjustment is included in the price of a fund therefore all investors in a fund will be affected by the price adjustment. e.g. If the price is swung up, investors buying into a fund will get fewer shares for their investment amount, while if it is swung down investors redeeming their shares will do so at a lower price.

On 29 December 2017, the last working day of the period under review, no dilution adjustments were applied to the funds.

5. Rates of Exchange

The rates of exchange used for the conversion into USD of assets and liabilities of a fund denominated in other currencies and with respect to funds whose investment are valued at 1:00pm Luxembourg time as detailed in note 3 to the financial statements as at 31 December 2017 are as follows:

USD 1=AUD 1.2787995	USD 1=IDR 13567.5004626	USD 1=PLN 3.4824409
USD 1=CAD 1.2535248	USD 1=ILS 3.4713392	USD 1=RON 3.8860230

Notes to the Financial Statements (continued)

As at 31 December 2017

6. Fees and Operational expenses

Management Fees

Under a Fund Management Company Agreement the Company will pay management fees to the Management Company, Henderson Management S.A.

For the period ended 31 December 2017 the management fees, as a percentage per annum on the total net assets of the relevant fund, were as follows:

	Class A, X*	Class B	Class C	Class GU, E	Class S, F, IF, D	Class G	Class H	Class I	Class Y	Class IU	Class M	Class N	Class Q	Class R

*Class X shares are not available on the Core Credit Fund

**The AMC of the Class A share is 0.75%, Class X is 1.00%

Additional fees and expenses will be charged to Shareholders of Class C Shares of the Pan European Equity Fund and Global Technology Fund, Class G Shares, Class I Shares, and Class M Shares as part of the management fee subject to the limit on the relevant management fee set out in "Management Fees" above. All additional fees and expenses that the Company cannot recover from the Shareholders of Class C Shares of the Pan European Equity Fund and Global Technology Fund, Class G Shares, Class I Shares, and Class M shares through the management fee shall be borne by the Investment Manager.

The management fee for Class Z Shares is agreed between the investor and the Company and is not payable out of the property of the fund.

Notes to the Financial Statements (continued)

As at 31 December 2017

6. Fees and Operational expenses (continued)

Performance fees

The Investment Manager, in addition to the management fee, is entitled to receive out of the assets of the relevant funds (excluding the Global Multi-Asset Fund, Core Credit Fund, Strategic Bond Fund, Total Return Bond Fund Class B and Class R Shares of the European Growth Fund and excluding Class C, Class M, Class N and Class Z Shares of the relevant Funds) a performance fee as detailed in the prospectus. At 31 December 2017, the following accruals were made for performance fees: Emerging Market Corporate Bond USD 9,867, Euro Corporate Bond Fund EUR 43,026, Euro High Yield Bond Fund EUR 7,781, Global High Yield Bond Fund USD 22,471, Euroland Fund EUR 204,406, European Growth Fund EUR 369, Pan European Dividend Income Fund EUR 7, Asia Pacific Property Equities Fund USD 3, China Fund USD 1, Global Equity Income Fund USD 1, Global Natural Resources Fund USD 12,290, Global Property Equities Fund USD 9,869, Global Technology Fund USD 9, Pan European Alpha Fund EUR 49, Pan European Property Equities Fund EUR 196,264 and Pan European Smaller Companies Fund EUR 1,118,009.

Administration, Registrar and Transfer Agent Fees

BNP Paribas Securities Services, Luxembourg Branch has been appointed by the Management Company as Administrator under a fund administration agreement (the "Fund Administration Service Agreement")

The Administrator is entitled to receive out of the assets of the Company fees in consideration for providing administration services to the Company along with reasonable out-of-pocket expenses and disbursements.

The fees of the Administrator comprise transaction based fees and asset based fees and do not exceed 0.18% p.a of the net assets of the relevant fund.

The actual fees paid are disclosed in the accounts and accrued on a daily basis.

RBC Investor Services Bank S.A., was appointed by the Management Company as Registrar and Transfer Agent under a registrar and transfer agent agreement (the "Registrar and Transfer Agent Agreement"). The Registrar Agent is responsible for processing the issue, redemption and transfer of Shares as well as the keeping of the register of Shareholders.

The Registrar is entitled to receive out of the assets of the Company fees in consideration for providing services to it along with reasonable out-of-pocket expenses and disbursements.

The fees of the Registrar Agent comprise transaction based fees and asset based fees and do not exceed 0.12% p.a. of the net assets of the relevant fund.

The actual fees paid are disclosed in the accounts and are payable monthly in arrears.

Custodian Fees

BNP Paribas Securities Services, Luxembourg Branch has been appointed by the Company under an agreement (the 'Custodian Agreement') to assure the safe custody of the Company's assets.

The Custodian is entitled to receive out of the assets of the Company, fees in consideration for providing services to it, along with reasonable out-of-pocket expenses and disbursements.

The Company will pay the Depository custody fees comprising asset-based fees and transaction-based fees that vary depending on the market in which a particular fund invests : these fees will not exceed 0.65% per annum of the value of the assets of the relevant fund and GBP120 (USD190) per transaction respectively.

The fees are accrued daily and paid monthly in arrears.

Depository Fees

BNP Paribas Securities Services, Luxembourg Branch has been appointed as Depository for the Company in order to comply with new UCITS V regulation. The Company will pay to the Depository a fee for fiduciary services, which is set at a rate of 0.006% per annum on the total net assets of the relevant fund (subject to a minimum fee of GBP 1,200 (USD 1,800) per fund). This fee is accrued daily and is paid monthly in arrears.

Notes to the Financial Statements (continued)

As at 31 December 2017

6. Fees and Operational expenses (continued)

Other expenses

The Company will pay, as far as allowable under applicable regulations, all other operating expenses which include, without limitation, taxes, expenses for legal and auditing services, printing Shareholders' reports, Prospectuses, all reasonable out of pocket expenses of the Directors, registration fees and other expenses due to supervisory authorities and local, regulatory and tax representatives appointed in various jurisdictions, insurance, interest and brokerage costs. The Company will also pay fees or other charges levied in respect of the provision and use of benchmarks, dividend and redemption payment costs and the costs of publication of the net asset value or other fund information, including, but not limited to, that required to be published by any regulatory authority.

Collective investment scheme

When a fund may invest in all or substantially all of its assets in Collective investment schemes, there may be additional costs of investing in the underlying funds ("underlying funds' TERs") which would increase the TER of the fund. Accordingly the funds TER will include a synthetic element to incorporate the TER of the underlying funds.

When investing into other collective investment funds managed by a Janus Henderson group company, there will be no double charging of management fees.

7. Shareholder Servicing Fee

A shareholder servicing fee at the rate of 0.5% per annum for Class A, Class F, Class N and Class X Shares and 0.30% per annum for Class D and Class H Shares of the Regional and Specialist Funds (except for the Global Multi-Asset Fund) and 0.25% per annum for the Global Multi-Asset Fund and the Bond Funds of the relevant fund's average daily net assets is payable to the Distributor. This fee is accrued daily and payable monthly in arrears. This fee is payable to the Distributor for the provision of the following services; responding to existing investors' queries, maintenance of records of shareholders' accounts, issuance and delivery of periodic account statements to shareholders and assistance in handling purchases, exchanges and redemption of shares.

No shareholder servicing fees are payable in respect of all other share classes of the relevant funds.

Initial Charge

As Principal Distributor, Henderson Global Investors Limited is entitled to receive in respect of Class A, F, H, N, Q, R and S shares of all funds an initial charge paid by the investor. The Initial Charge shall be expressed as a percentage of the Net Asset Value per share, until otherwise notified and will not exceed 5% of the total amount invested by an investor (which equals a maximum of 5.26% of the net asset value of the Share) and Class B, Class C, Class E, Class G, Class GU, Class I, Class IU, Class IF, Class M and Class X Shares for the below funds:

Bonds

Core Credit Fund, Emerging Market Corporate Bond Fund, Global Corporate Bond Fund and Strategic Bond Fund.

Regional

Pan European Dividend Income Fund

Specialist

Asia-Pacific Property Equities Fund, China Fund, Global Equity Income Fund, Global Natural Resources Fund, Global Technology Fund, Global Property Equities Fund, Japanese Smaller Companies Fund, Pan European Alpha Fund, Pan European Property Equities Fund and Pan European Smaller Companies Fund.

Except for the funds stated above, no initial charge is payable on Class E, Class G, Class I, Class IF, Class B, Class C, Class GU, Class IU, Class M and Class X Shares.

No initial charge is payable on Class IR, Class Y and Class Z of any fund.

8. Distribution Fee

A distribution fee is payable to the Distributor in respect of Class X shares out of the assets of each fund at the rate of 0.6% per annum for the Regional and Specialist funds, and 0.35% per annum for the Bond funds of the relevant fund's average daily net assets, accrued daily and payable monthly in arrears. The fee is payable to the Distributor as remuneration for providing distribution-related services to the funds with respect to Class X shares.

9. Taxation

Under current Luxembourg law, there are no Luxembourg income, withholding or capital gains taxes payable by the Company. The Company is, however, subject to the tax on Luxembourg undertakings for collective investment ("tax d'abonnement"), calculated and payable quarterly, on the aggregate net asset value of each fund at the end of each quarter being 0.01% per annum on Class E, Class G, Class GU, Class I, Class IU, Class IF, Class B, Class C, Class M, Class Y and Class Z Shares and 0.05% per annum on all other share classes. No such tax is due on the portion of the Company's assets invested in other Luxembourg undertakings for collective investment.

Notes to the Financial Statements (continued)

As at 31 December 2017

9. Taxation (continued)

No stamp duty or other tax is payable in Luxembourg on the issue of shares in the Company.

Under current legislation, Shareholders are not subject to any capital gains, income, inheritance or other taxes in Luxembourg (except for Shareholders domiciled, resident or having a permanent establishment in the Grand Duchy of Luxembourg).

10. Share class detail

The Company offers the following share classes for each of its funds.

	Class A	Class B	Class C	Class D	Class E	Class F	Class G	Class GU	Class H	Class I	Class IU	Class IF	Class M	Class N	Class Q	Class R	Class S	Class Y	Class X	Class Z

The Company offers 3 sub-classes. These sub-classes of Shares are abbreviated in the Financial Statements as "A1", "A2" and "A3", "I1", "I2" and "I3". Class C, Class M, Class N, Class Q, Class S and Class Z offer only accumulation shares. Class B and Class R Distribution shares are only available on the European Growth Fund. The fee structure is described in notes 6, 7 and 8.

Sub-Class 1 shares – This share class distributes substantially all of the investment income after the deduction of fees, charges and expenses. Distributions will not include realised and unrealised capital gains.

Sub-Class 3 shares – This share class distributes substantially all of the investment income before the deduction of fees, charges and expenses. Distributions may include capital gains.

Notes to the Financial Statements (continued)

As at 31 December 2017

10. Share class detail (continued)

For holders of Accumulation shares of each of the funds, gross income and net realised and unrealised capital gains will not be distributed but will be accumulated.

Accumulation shares are referred to as sub-class 2 shares.

All shares of the Company are of no par value and, subject to the restrictions of Luxembourg law, are each entitled to one vote at all meetings of the Shareholders.

Shareholders may switch all or part of their shareholdings from one or more of the funds into the same Class of one or more of the other funds on any Business Day.

Switches into Class E, Class G, Class GU, Class I, Class IU, Class IF, Class B, Class C, Class M, Class Y and/or Class Z Shares are not permitted, unless the investor switching into them is an institutional investor within the meaning of Article 174 of the law of 17 December 2010, relating to undertakings for collective investment.

Switches into Class G, Class I, Class B, Class C and Class GU Shares are restricted to institutional investors with a minimum total investment in funds of the Company of €1,000,000,000 (or the equivalent in another currency) at the time of the initial investment.

Class B and Class R Shares are closed to investments from new investors.

Hedged share class

Where a Hedged Share Class is available it will be expressed as Class A HEUR, Class A HCNH, Class A HGBP, Class A HUSD, Class A HSGD, Class A HSEK, Class A HCHF and Class A HAUD.

Share Classes of the relevant fund may be made available in Euro, Sterling, Chinese Yen, US Dollar, Singapore Dollar, Swiss Franc, Australian Dollar or Swedish Krona hedged versions or such other currencies at the Directors discretion. The Investment Manager will hedge the Shares of such classes in relation to the base currency of the relevant fund. Where such hedging is undertaken, the Investment Manager may use financial swaps, futures, forward currency exchange contracts, options and other derivative transactions in order to preserve the value of the hedged share class currency against the base currency of the fund.

An up-to-date list of the share classes available for the funds is available at the registered office of the Company.

11. Net Asset Value

The net asset value per share of each fund will be expressed in the base currency of the fund, calculated on each business day in Luxembourg on each Valuation point and on other days as approved by the Board.

The net asset value for each class of each fund is calculated by determining the value of the assets of the relevant fund applicable to that class, including accrued income, and deducting all liabilities (including all fees and charges) of that class, and dividing the resultant sum by the total number of shares of that class in the relevant fund in issue or allotted at that time, (the resulting amount being rounded to the nearest two decimal places) to give the net asset value per share per class of the fund.

Further details on rules that apply in valuing the total assets can be found in the current prospectus.

The assets of the sub-funds are valued using prices available at different times during the day of 29 December 2017, being the last business day of the reporting period.

If the Company had calculated the net asset values solely with a view to publication, the market prices used to value the net assets would have been the closing prices on 29 December 2017. However, these net asset values would not have been significantly different from those shown in these financial statements.

12. Equalisation

The Company will maintain equalisation accounts in relation to the shares with a view to ensuring that the levels of distribution payable to investors in the share are not affected by the issue and redemption of, or the switch from or into, shares of those funds during an accounting period. The price at which shares are bought by an investor will therefore be deemed to include an equalisation payment (which will be credited to the relevant equalisation account) calculated by reference to the accrued income of the share class, net of fees, charges and expenses where applicable.

The first distribution which an investor receives in respect of such shares following the purchases may include a repayment of capital.

Notes to the Financial Statements (continued)

As at 31 December 2017

13. Dividend Distributions

During the period from 1 July 2017 to 31 December 2017 dividends were declared and were paid on the following funds:

As at 31 December 2017

15. Securities Lending Activities

The Company, with the exception of Core Credit Fund, has entered into securities lending agreements for a number of equity and fixed income funds. In return for making securities available for loan throughout the period, the funds participating in the program received fees which are reflected in the Financial Statements of each participating fund under the "Other income" caption. The Company has appointed BNP Paribas Securities Services UK Limited (BP2S UK), acting through its London branch as agent for the equity and fixed income lending program. As remuneration for this agency role, BP2S UK receives a percentage of the variable fees from the associated program. All securities are fully collateralised.

Securities lending income is disclosed in the Statement of Operations in the caption "Other income".

As at 31 December 2017, the market value of the securities lent is as follows:

Fund	Counterparty	Ccy	Total market value of securities on loan	Amount of collateral received	Type of collateral
Euro Corporate Bond Fund					
	Citigroup	EUR	88,631,100	93,522,470	Bond

Notes to the Financial Statements (continued)

As at 31 December 2017

16. Transactions with Connected Persons

During the period under review, the following transactions were entered into by the Company with the following connected persons of the Company:

(1) The Management Company and Investment Manager – Note 6 documents the amount of management fees and the performance fees relevant to each fund. The total amount charged by the Investment Manager to the Management Company, Henderson Management SA, during the period in respect of these fees was USD 81,437,949 (June 2017: USD 171,028,151).

(2) The Distributor – fees paid to the Distributor were up to 0.5% per annum of the average total net assets of the Regional and Specialist funds (except for Global Multi-Asset Fund) and 0.25% per annum for the Global Multi-Asset Fund and the Bond funds (excluding those assets attributable to shareholders of the Class B, Class C, Class E, Class G, Class I, Class IR Classes IU, Class M, Class Q, Class R Class S, Class Z Shares).

The total amount charged to the Company by the Distributor during the period in respect of these fees was USD 21,312,382 (June 2017: USD 40,289,619).

Further, a Distribution fee on Class X Shares at the annual rate of 0.6% per annum for the Regional and Specialist funds and 0.35% per annum for the Bond funds of the fund's average daily net assets is payable to the Distributor. The total amount paid by the Company to the Distributor during the period in respect of these fees was USD 621,829 (June 2017: USD 1,255,793).

(3) The Directors fees payable to the Directors were USD 103,400 (June 2017: USD 206,281).

17. Soft Commission

The Investment Manager is authorised to effect transactions through brokers whereby the broker agrees to use a proportion of the commission earned on such transactions to discharge the broker's own costs or the costs of third parties in providing certain services to the Investment Manager. The services which can be paid for under such arrangements are those permitted under the rules of the Financial Conduct Authority (FCA) namely those that relate to the execution of transactions on behalf of customers or the provision of investment research to the Investment Manager.

18. Withholding tax reclaims

Withholding tax reclaims (WHT) have been filed in respect of WHT applied on French, Belgian, Danish, German, Italian, Spanish and Swedish dividends during the years 2003 to 2015. Claims received have been reflected in the funds when they are received. The likely outcome of these reclaims cannot be assessed at the current point in time and consequently no amounts in respect of these reclaims have been included in these financial statements. The legal costs of pursuing these WHT reclaims will be borne by the fund. Should all of the claims be successful, the effect on each of the impacted funds (expressed in percentage of Net Assets as at 31 December 2017) would be as follows:

Fund	Total (EUR)	% Weighting of Total Net Assets
Euroland Fund	788,350	0.04%
European Growth Fund	75,657	0.08%
Pan European Equity Fund	7,673,765	0.34%
Global Natural Resources Fund	212	0.00%
Global Property Equities Fund	111,574	0.04%
Global Technology Fund	259,364	0.01%

Notes to the Financial Statements (continued)

As at 31 December 2017

21. Transaction Costs (continued)

Fund	Amount in fund currency	Fund	Amount in fund currency
Pan European Alpha Fund	EUR	Pan European Smaller Companies Fund	EUR
Commissions	939,896	Commissions	364,263
Taxes	145,485	Taxes	301,272
Other costs	122	Other costs	53,847
Total transaction cost	1,085,503	Total transaction cost	719,382
Pan European Property Equities Fund	EUR		
Commissions	72,541		
Taxes	56,460		
Other costs	15,129		
Total transaction cost	144,130		

The above transaction costs include costs directly linked to the acquisition or sale of investments, to the extent that such costs are shown separately on transaction confirmations.

22. Subsequent Events

There have been no subsequent events after 31 December 2017.

APPENDIX – unaudited

As at 31 December 2017

Securities Financing Transactions

The funds engage in Securities Financing Transactions (as defined in Article 3 of Regulation (EU) 2015/2365, securities financing transactions include repurchase transactions, securities or commodities lending and securities or commodities borrowing, buy-sell back transactions or sell-buy back transactions and margin lending transactions). In accordance with Article 13 of the Regulation, the funds' involvement in and exposures related to securities lending for the accounting period ended 31 December 2017 are detailed below.

Global Data

The following table lists the ten largest issuers by value of collateral received (across all SFTs) for each fund as at 31 December 2017.

Fund	Market value of securities on loan (in fund currency)	% of lendable assets	% of AUM
Euro Corporate Bond Fund	222,364,683	11.91%	11.10%
Euro High Yield Bond Fund	35,167,555	15.23%	14.07%
Total Return Bond Fund	37,408,336	4.31%	3.99%
Euroland Fund	71,176,354	3.32%	3.29%
European Growth Fund	6,626,031	7.20%	7.14%
Pan European Equity Fund	34,881,595	1.56%	1.55%
China Fund	1,474,533	0.77%	0.64%
Global Equity Income Fund	183,282	1.07%	1.05%
Global Natural Resources Fund	390,234	4.17%	4.15%
Global Property Equities Fund	3,722,850	1.09%	1.07%
Pan European Property Equities Fund	3,622,409	1.21%	1.17%

The table lists the amount of total return swaps held as a proportion of total lendable assets and the fund's assets under management (AUM) as at 31 December 2017:

Fund	Market value of total return swaps (in fund currency)	% of lendable assets	% of AUM
Euro Corporate Bond Fund	76,500	-	-

The lending and collateral transactions are on an open basis and can be recalled on demand.

APPENDIX – unaudited (continued)

As at 31 December 2017

Total Return Swaps

The total return swaps held by Euro Corporate Bond Fund are due to mature in less than six months.

The fund does not hold specific collateral in relation to the total return swap as all derivative positions that are held by the fund are collateralised on a net exposure basis.

All collateral is held in segregated accounts.

Re-use of collateral

The funds do not engage in any re-use of collateral.

Return and cost on securities lending activities

The following table lists the funds' return and cost for each type of SFTs for the year ended 31 December 2017.

Counterparty	Total gross amount of securities lending income (in fund currency)	Direct and indirect costs and fees deducted by securities lending agent (in fund currency)	% return of the securities lending agent	Net securities lending income retained by the fund (in fund currency)	% return of the fund
Euro Corporate Bond Fund	210,866	31,624	15%	179,242	85%

APPENDIX – unaudited

As at 31 December 2017

Risk policies

The Management Company employs a risk management process that identifies the risks to which the individual funds and the Company taken as a whole are or might be exposed and how such risks are assessed, monitored and managed, ensuring compliance with relevant regulation. This enables it to monitor and measure at any time the risk of the portfolio positions and their contribution to the overall risk profile of the relevant fund, thereby ensuring that the global exposure of the underlying assets, including derivative instruments, shall not exceed the total net value of the relevant fund. In accordance with the Law of 17 December 2010 and the applicable regulatory requirements of the Commission de Surveillance du Secteur Financier ("CSSF") the management company reports to the CSSF on a regular basis on the risk management process.

Method

The global exposure of a fund is calculated by using either the commitment approach or value-at-risk approach by reference to its risk profile. The commitment approach means that financial derivative instruments are converted into the market value of the equivalent position in the underlying asset(s). Value-at-Risk ("VaR") is a mathematical-statistical concept and is commonly used as a standard measure of risk in the financial sector. The VaR approach is used, in general, for funds using derivative instruments or techniques within their investment strategies to generate additional leverage or market risk exposure.

Funds using the VaR approach

For such funds, the maximum potential loss that a fund could suffer in normal market conditions within a given time horizon and a certain degree of confidence is estimated. In these calculations all positions in the relevant portfolio are taken into consideration including those undertaken for efficient portfolio management purposes. For the purpose of calculating global exposure by VaR either a relative VaR approach or absolute VaR approach can be used; the selection of relative or absolute VaR methodology is determined by the availability of a reference portfolio appropriate for a fund in meeting its investment objective.

VaR model

VaR has been calculated using a Monte Carlo simulation approach. As a control mechanism, Monte Carlo results are compared to the parametric model for validation purposes within the daily monitoring process.

Parameters

The following parameters are applied as a minimum: a one-tailed 99% confidence interval, a holding period equivalent to one month (20 business days), effective observation period (history) of risk factors of at least 1 year (250 business days), quarterly data set updates and daily calculation.

Limits

For funds which have a suitable reference portfolio, the regulatory limit is that the VaR of the total portfolio's positions shall not be greater than twice the VaR of the portfolio's reference portfolio.

For those funds which are unable or for which it is not appropriate to determine a reference portfolio (e.g. absolute return type funds) an absolute VaR is calculated on all of the portfolio's positions. Absolute monthly VaR on such funds is not to exceed a regulatory maximum threshold of 20%.

APPENDIX – unaudited (continued)

As at 31 December 2017

The VaR method, limits and utilisation of those limits for the period from 1 July 2017 to 31 December 2017 are summarised in the table below:

VaR Results - for the period ended 31 December 2017

Fund	Global Exposure Calculation basis	Reference Portfolio	Actual VaR in year			VaR Limit	Utilisation of VaR Limit		
			Minimum	Maximum	Average		Minimum	Maximum	Average
China Fund	Relative VaR	MSCI China Index	85.85%	105.87%	95.03%	200%	42.93%	52.94%	47.52%
Emerging Market Corporate Bond Fund*	Relative VaR	JP Morgan Corporate Emerging Market Bond Index (CEMBI) Broad Diversified	71.03%	134.16%	110.41%	200%	35.52%	67.08%	55.21%
Euro Corporate Bond Fund	Relative VaR	iBoxx Euro Corporates Index	95.78%	122.21%	105.74%	200%	47.89%	61.11%	52.87%
Euro High Yield Bond Fund	Relative VaR	BofA Merrill Lynch European Currency Non-Financial High Yield Constrained Index	75.42%	106.07%	89.48%	200%	37.71%	53.04%	44.74%
Global Corporate Bond Fund	Relative VaR	Barclays Global Aggregate Corporate Bond Index	88.80%	113.53%	100.03%	200%	44.40%	56.77%	50.02%
Global High Yield Bond Fund	Relative VaR	BofA Merrill Lynch Global High Yield Constrained Index	107.36%	130.32%	118.96%	200%	53.68%	65.16%	59.48%
Core Credit Fund	Absolute VaR	n/a	0.62%	1.23%	0.95%	20%	3.11%	6.15%	4.76%
Pan European Alpha Fund	Absolute VaR	n/a	3.49%	8.83%	6.24%	20%	17.43%	44.15%	31.18%
Strategic Bond Fund	Absolute VaR	n/a	1.72%	2.54%	2.08%	20%	8.59%	12.71%	10.41%
Total Return Bond Fund	Absolute VaR	n/a	1.26%	2.09%	1.54%	20%	6.32%	10.45%	7.69%

For those funds measuring and monitoring global exposure using the VaR approach, the level of leverage arising from the use of derivative instruments is disclosed in the table below as a percentage of each fund's total Net Asset Value. The calculation is based on the sum of notional exposures of financial derivative instruments in the investment portfolio including those held for risk reduction purposes.

Please note this level of leverage is explicitly not an investment limit for the relevant fund and will vary over time under differing market conditions to ensure that the relevant fund meets its investment objective.

Leverage - for the period ended 31 December 2017

Fund	Leverage		
	Minimum	Maximum	Average
Core Credit Fund	21.31%	100.72%	43.23%
Emerging Market Corporate Bond Fund*	0.00%	13.42%	5.41%
Euro Corporate Bond Fund	29.55%	55.55%	39.28%
Euro High Yield Bond Fund	37.23%	109.00%	59.79%
Global Corporate Bond Fund	48.09%	163.50%	89.04%
Global High Yield Bond Fund	47.78%	156.82%	80.89%
Strategic Bond Fund	49.00%	193.84%	92.93%
Total Return Bond Fund	195.86%	418.22%	293.76%
Pan European Alpha Fund	50.73%	110.42%	74.73%
China Fund	45.23%	56.04%	50.63%

* Results for the Emerging Market Corporate Bond Fund have been stated for the period ended 15 December 2017, at which date the global exposure calculation method was changed to the commitment approach.

APPENDIX – unaudited (continued)

As at 31 December 2017

Funds using the Commitment Approach

The global exposure for those funds not specified in the table above has been determined according to the commitment approach during the reporting period from 1 July 2017 to 31 December 2017. For such funds, each fund's total commitment to derivatives is limited to 100% of the relevant fund's total net value, being quantified as the sum as an absolute value of the individual commitments, after consideration of the possible effects of appropriate netting and hedging arrangements.

Eligibility for French "Plan d'Epargne en Actions" (PEA)

A PEA is a French equity savings plan intended to encourage French tax resident individuals to invest in European equities. PEA eligible funds must invest on a permanent basis at least 75% of their assets in PEA eligible securities issued by companies (i) established in a Member State of the European Union or in Iceland, Liechtenstein or Norway and (ii) subject to corporate income tax, or an equivalent tax.

Throughout the period 1 July 2017 to 31 December 2017, the sub-funds listed below invested more than 75% of their total net assets in PEA eligible securities. As at the date of this report, the sub-funds had the following percentage of their total net assets invested in eligible PEA securities:

Name of sub-fund	Proportion of PEA eligible securities as at 31 December 2017
Janus Henderson Horizon Fund - Pan European Smaller Companies Fund	88.48%
Janus Henderson Horizon Fund - Euroland Fund	99.15%
Janus Henderson Horizon Fund - European Growth Fund	88.77%
Janus Henderson Horizon Fund - Pan European Equity Fund	90.48%

General Information

Janus Henderson Horizon Fund (the "Company") is an open-ended investment company incorporated in Luxembourg as a société d'investissement à capital variable (SICAV) on 30 May 1985 and is a recognised collective investment scheme for the purposes of Section 76 of the United Kingdom Financial Services Act 1986. Potential investors in the United Kingdom are advised that all, or most, of the protections afforded by the United Kingdom regulatory system will not apply to an investment in the Company and that compensation will not be available under the Financial Services Compensation Scheme.

The Company provides a simple and cost effective way of investing in world equity and bond markets and through its twenty seven funds, provides investors with access to nineteen equity funds and eight bond funds.

Applications for shares may be made on any business day in Luxembourg to the Registrar and Transfer Agent between 9.00am and 6.00p.m. (local time), or to the Distributor in London between 9.00am and 5.00pm (local time). Applications should be made on the application form circulated with the Prospectus or by fax, telephone or in writing and may be made in any major currency. If you are sending applications by fax or telex, you should also subsequently send the original form by post. Applications are accepted by telephone only from existing investors who have previously been issued with a Personal Service Number.

For full information, including a copy of the Prospectus and the Key Investor Information Document (KIID), please write to the Registrar and Transfer Agent or Distributor at the addresses shown on page 2. Alternatively, contact the main dealing desk on Luxembourg +352 2696 2050 or visit the Company website: www.jaunshenderson.com/horizon.

Please remember that past performance is not necessarily a guide to future performance and do not take into account fees or commissions that may occur on subscription and redemption. The value of an investment and the income from it can fall as well as rise as a result of market and currency fluctuations and you may not get back the amount originally invested. Tax assumptions may change if the law changes and the value of tax relief will depend upon individual circumstances. Please refer to the Prospectus for information on the Janus Henderson Horizon Fund.

Janus Henderson

INVESTORS

Past performance may not be a reliable guide to future performance. The value of an investment and the income from it can fall as well as rise significantly. Tax assumptions and reliefs depend upon an investor's particular circumstances and may change if those circumstances or the law change. Please refer to the Prospectus and the key investor information document for further information on the Janus Henderson Horizon Fund.

Issued by Janus Henderson Investors.
