Dear Unit-holder,

We are pleased to present you the following semi-annual report for the ERSTE BOND EMERGING MARKETS CORPORATE jointly owned fund pursuant to the Austrian Investment Fund Act for the period from 1 July 2018 to 31 December 2018.

The former management company, ERSTE-SPARINVEST Kapitalanlagegesellschaft m.b.H., was merged into Erste Asset Management GmbH effective 31 December 2017 and with entry of this merger in the trade register of Vienna Commercial Court on 3 November 2018. Erste Asset Management GmbH became the Management Company of ERSTE BOND EMERGING MARKETS CORPORATE as of the effective date of the merger.

Development of the Fund

The reporting period was driven to a great extent by the “(trade) war” between the USA and China and the gradual normalisation of US central bank policy.

The USA sees China’s expansion in IT, trade, and general international terms (belt and road, loans to commodity-rich African countries) and military terms (South China Sea) as more and more of a threat to its economic and political power. To prevent a further shift in the balance of power, President Trump intends to apply import tariffs of 25% on goods from China worth over USD 200 billion starting in January 2019 should the agreed talks bear no fruit by then. Global trade is already contracting slightly or is barely growing and the trade war will not do anything to counter this trend, so the EM countries (macroeconomic data) and companies will also be impacted by this to different degrees. The trade war is coming at a very inopportune time for China because the relatively highly indebted country is in the process of cleaning up its finances.

Alongside the trade war that is dampening the economic outlook, the US Fed is normalising its monetary policy (hiking its key rate). Loans and refinancing are becoming more expensive, and demand for riskier investments (equities, EM and HY bonds) will grow more slowly, stagnate, or even decline slightly. This will impact the cyclical companies in the HY segment with higher levels of debt and that already have higher refinancing costs the most (high yield companies in China).

Commodity prices retreated slightly during the period with only the oil price holding its ground until recently (because of the geopolitical newsflow), at which point the rapidly rising stocks in the USA and the positive positioning of the market participants triggered a substantial correction. The decreasing commodity prices had no real economic consequences for the relevant companies because the EM currencies depreciated very substantially versus the USD.

In terms of individual countries, Argentina secured a major IMF package to stabilise its economy, and Turkey was forced to hike its interest rates significantly and accept financial assistance from Qatar and China to the same end. Bond prices were very volatile in both countries.

We had Turkey underweighted, which made a very positive performance contribution. We were able to scale back our overweighting in Argentina in time, but during the correction. We are underweighted in Russia because of the lack of liquidity and the sanction risks. During the weak phase, we began buying Chinese corporate bonds, and also Mexican corporate issues based on the uncertainty about the political orientation of the new president. We were tactically underweighted in Brazil because the market has already priced in a great deal of positive potential after the elections.

The USD was constantly hedged, with some arrangements being concluded for a longer period as protection against rising hedging costs versus the EUR.
