Since the start of the reporting period, the management fee has been calculated for each calendar day based on the respective fund assets, while it had previously been calculated on the basis of the value at the end of each month. The calculation of the custodian bank fee (based on the fund assets) and the custody charge (based on the portfolio assets) has also been converted to a daily basis.

Legal notice

The software used performs calculations on the basis of more than the two decimal places displayed. Minor discrepancies cannot be ruled out due to further calculations using published results.

The value of a unit is calculated by dividing the entire value of the investment fund inclusive of its income by the number of units. The total value of the investment fund is calculated on the basis of the current market prices of the securities, money market instruments and subscription rights in the fund plus the value of the fund's financial investments, cash holdings, credit balances, receivables and other rights net of its payables. That value will be calculated by the custodian bank.

The net assets are calculated in accordance with the following principles:

- a) The value of assets quoted or traded on a stock exchange or other regulated market shall be determined, in principle, on the basis of the most recently available price.
- b) Where an asset is not quoted or traded on a stock market or another regulated market or where the price for an asset quoted or traded on a stock market or another regulated market does not appropriately reflect its actual market value, the prices provided by reliable data providers or, alternatively, market prices for equivalent securities or other recognized market valuation methods shall be used.

Raiffeisen KAG uses the method developed by OeKB (Österreichische Kontrollbank AG) to calculate the fund's performance, on the basis of data provided by the custodian bank (where payment of the redemption price is suspended, using indicative values). Some costs – the subscription fee (not exceeding 3.00 % of the invested amount) and any redemption fee (not exceeding 0.00 % of the sold amount) – are not included in the performance calculation. Depending on their concrete value, they will reduce a performance accordingly. Past results do not permit any reliable inferences as to the future performance of the fund.

Dear unitholder,

Raiffeisen Kapitalanlage-Gesellschaft m.b.H. is pleased to present its semi-annual fund report for Raiffeisen Sustainable Mix for the reporting period from Oct 1, 2018 to Mar 31, 2019. The accounting is based on the price calculation as of Mar 29, 2019.

Fund investment policy report

Equities

The fund continues to invest in equities of companies which focus on sustainability and have above-average ratings in terms of social and environmental criteria. Aside from a favorable sustainability assessment, the selected companies must also have attractive financial valuations. The fund's equities segment remains broadly diversified and invests in companies which operate in developed markets in a particularly responsible and sustainable manner. The fund continues to focus in its investments on Europe and North America, while Japan plays a relatively minor role. The period under review was initially dominated by a significant correction in Q4 2018. Sentiment did not turn until just before the end of the year. This was followed by a V-shaped recovery in Q1 2019. Key issues for market players included the trade talks between the USA and China and specifically the reversal in FED policy which ruled out further interest rate hikes. In this environment, the equities segment performed well. The majority of the sectors provided positive earnings contributions, with information technology, healthcare and industry making the strongest contributions. Companies in the basic consumer goods, cyclical consumer goods and communications services sectors delivered negative contributions. At the individual stock level, securities such as Keysight Technologies, a US measuring instrument manufacturer, Neste, a refinery focusing on clean, sustainable fuels, and Procter & Gamble, a consumer product company, delivered particularly positive performances. Sunopta, an organic food producer, Sysmex, a Japanese laboratory equipment supplier, and EssilorLuxottica, an ophthalmic optics company based in Paris, occupied the opposite end of the performance scale. The fund's activities in its equities segment were shaped by profit-taking, measures to optimize risk/return perspectives and not least by changes to the sustainability assessment for individual securities.

Euro bonds / global bonds

In the bond segment, Raiffeisen Sustainable Mix continues to invest exclusively in bonds issued by sovereigns and companies that focus on sustainability, which means that they have above-average ratings in terms of social and environmental criteria. Worth mentioning is the renewed inclusion of Belgium since January 2019 thanks to the country's more restrictive nuclear power policies. With France, Finland, the UK and Slovakia still excluded, we do not invest in these countries' government bonds.

The period under review was characterized by declining yields on European government bonds. Yields on 10-year German government bonds, for instance, dropped from close to 0.50 % at the start to -0.07 %. On the other hand, in Q4 2018 risk premiums on corporate bonds rose by close to 150 basis points compared to German government bonds. In Q1 2019, corporate bonds made up for the weak fourth quarter and risk premiums dropped again. Uncertainties such as the US-China trade dispute, Brexit and the disagreement surrounding the Italian budget all pushed investors towards safer asset classes. By the end of the year, corporate bonds had acquired higher risk premiums. As of mid-January 2019, thanks to an easing of the forenamed conflicts, the weak performance had been recouped. In addition, the capital markets were buoyed up by the scaling down of tighter monetary policies, which was triggered by the weaker economic outlook announced by the FED and the ECB.

On average, the US dollar-denominated bonds that had been added to the Raiffeisen Sustainable Mix accounted for around 10 % of the overall fund and made a very positive contribution to income. Supported by a further FED interest rate hike, the US dollar gained against the euro in the reporting period. However, due to a significant reversal of interest rate expectations on the market, yields dropped considerably on the US bond market, translating into respective bond price gains. The predominant part consisted of bonds issued by supranational organizations or agency issuers in the top rating classes. Mortgage bonds, bank bonds and corporate bonds made up the rest. Thanks to significant inflows, US dollar bonds were purchased on both the primary and the secondary market. In the first half of the reporting period, yield differentials between these non-government bonds and US government bonds widened before diminishing substantially until the end of March 2019. The interest rate risk was reduced slightly in the course of the reporting period, with derivatives also being used.

Securities lending transactions were entered into in order to generate additional income.

- Identity of the counterparties for securities lending transactions:

Raiffeisen Bank International AG (as a recognized securities lending system within the meaning of § 84 InvFG)

- Nature and value of eligible collateral received by the investment fund versus the counterparty risk:

Under the master agreement on securities lending transactions concluded between the management company and Raiffeisen Bank International AG, Raiffeisen Bank International AG is obliged to provide collateral for loaned securities. Bonds, equities and units in investment funds are permitted as collateral. The bonds used as collateral may be issued by sovereigns, supranational issuers and/or companies etc. No stipulations apply in relation to the terms of these bonds. Within the scope of provision of collateral, pursuant to § 4 of the Austrian Securities Lending and Repurchase Agreement Ordinance (Verordnung zu Wertpapierleih- und Pensionsgeschäften, WPV), diversification and correlation with risk diversification achieved through quantitative issuer limits in particular and appropriate liquidity for collateral for the purpose of tradability and realizability will be ensured. This collateral will be valued on each banking day, subject to an add-on compared to the valuation of the securities loaned from the fund in accordance with provisions of EU Regulation 575/2013 (CRR). For bonds, this add-on will be determined on the basis of the credit rating of the issuer and the remaining term of the bond and will amount to no less than 0.5 %. For equities and units in investment funds, this add-on will amount to 10.607 %. The value of the required collateral, thus calculated, will result in the ongoing overcollateralization of the fund's outstanding securities lending positions.

On the reporting date the collateral had the following makeup:

In relation to securities lending transactions, the investment fund is not entirely collateralized by means of securities which are either issued or guaranteed by an EEA member state.

Collateral holding period: unlimited

Period of securities lending:

Duration / Days	< 1 day	1-7 days	7-30 days	30-90 days	90-360 days
	0 %	0 %	0 %	0 %	100 %

Country of counterparty (Raiffeisen Bank International AG): Austria

Settlement: bilateral

- Reuse of collateral:

Collateral received is not reused.

- Custody of collateral which the investment fund has received in connection with securities lending transactions:

The collateral will be held in a separate sub-account with the custodian bank/depository for each fund.

- Custody of collateral which the investment fund has provided in connection with securities lending transactions:

Within the limits stipulated by law (§ 84 InvFG), the management company is merely permitted to lend securities to third parties. However, it is not permitted to borrow securities. Accordingly, the investment fund will not provide any collateral within the scope of securities lending transactions.

Further information on repurchase agreements

During the reporting period, no repurchase agreements were concluded on behalf of the fund. Accordingly, the information concerning repurchase agreements which is stipulated in § 8 of the Austrian Securities Lending and Repurchase Agreement Ordinance and Art. 13 of Regulation (EU) No. 2015/2365 is not required.

Total return swaps and similar derivative instruments

A total return swap is a credit derivative instrument. Income and fluctuations in the value of the underlying financial instrument (underlying instrument or reference asset) are exchanged for fixed interest payments.

The fund did not enter into total return swaps or similar derivative instruments in the period under review.
