Legal notice

The software used performs calculations on the basis of more than the two decimal places displayed. Minor discrepancies cannot be ruled out due to further calculations using published results.

The value of a unit is calculated by dividing the entire value of the investment fund inclusive of its income by the number of units. The total value of the investment fund is calculated on the basis of the current market prices of the securities, money market instruments and subscription rights in the fund plus the value of the fund's financial investments, cash holdings, credit balances, receivables and other rights net of its payables. That value will be calculated by the custodian bank.

The net assets are calculated in accordance with the following principles:

- a) The value of assets quoted or traded on a stock exchange or other regulated market shall be determined, in principle, on the basis of the most recently available price.
- b) Where an asset is not quoted or traded on a stock market or another regulated market or where the price for an asset quoted or traded on a stock market or another regulated market does not appropriately reflect its actual market value, the prices provided by reliable data providers or, alternatively, market prices for equivalent securities or other recognized market valuation methods shall be used.

Raiffeisen KAG uses the method developed by OeKB (Österreichische Kontrollbank AG) to calculate the fund's performance, on the basis of data provided by the custodian bank (where payment of the redemption price is suspended, using indicative values). Some costs – the subscription fee (not exceeding 3.00 % of the invested amount) and any redemption fee (not exceeding 0.00 % of the sold amount) – are not included in the performance calculation. Depending on their concrete value, they will reduce a performance accordingly. Past results do not permit any reliable inferences as to the future performance of the fund.

Dear unitholder,

Raiffeisen Kapitalanlage-Gesellschaft m.b.H. is pleased to present its semi-annual fund report for Raiffeisen Sustainable Mix for the reporting period from Oct 1, 2019 to Mar 31, 2020. The accounting is based on the price calculation as of Mar 31, 2020.

Fund investment policy report

Equities

Raiffeisen Sustainable Mix continues to invest in equities of companies which focus on sustainability and have above-average ratings in terms of social and environmental criteria. In addition to a favorable sustainability assessment, the selected companies must also have attractive financial valuations. The fund's equities segment remains broadly diversified and invests in companies which operate in developed markets in a particularly responsible and sustainable manner. Investments continue to focus on Europe and North America, while Japan plays a relatively minor role. The period under review was initially dominated by significant gains in Q4 2019, which continued in the first few weeks of 2020. Once market participants started to realize the threat to health and economy posed by the coronavirus, risk-exposed investments, especially equities, were sold as of mid-February 2020. This correction reached a preliminary peak in mid-March 2020 before a slight counter-movement set in towards the end of the quarter. The shutdown of the major economies in March will have significant effects and plunge the global economy into recession in 2020. At present, it is difficult to quantify the impact on companies and national debt with any accuracy. In this environment, the equities segment delivered a significantly negative performance. Almost all sectors made negative contributions, with cyclical consumer goods and industrial stocks posting the weakest performance. The healthcare industry was the only sector that made a positive performance contribution. At the individual stock level, securities such as MSCI, the index and research provider, NTTDocomo, the Japanese telecom company, and Coloplast, the Danish healthcare specialist, delivered particularly positive performances. By contrast, Gildan Activewear, the clothing manufacturer, Anheuser-Busch, the beer manufacturer, and Herman Miller, the office furniture supplier, occupied the opposite end of the performance scale. The fund's activities in its equities segment were shaped by profit-taking, measures to optimize risk/return perspectives and not least by changes to the sustainability assessment for individual securities.

Euro bonds / global bonds

On average, the sustainable US dollar-denominated bonds that had been added to the fund accounted for around 10 % of the overall fund and made a positive contribution to income. This was not so much due to the US dollar, which changed very little over the reporting period despite a relatively wide fluctuation range. The significant fluctuations were primarily owed to the coronavirus crisis which had occupied the financial markets and hence the central banks since February 2020. Instead, the decisive factor was a general rise in prices among bonds which are considered as relatively safe. This was true for the overwhelming majority of the securities in the global bond segment. These were bonds issued by supranational organizations or agency issuers in the top rating classes. However, the extent to which they managed to follow the upturn in US government bond prices was rather limited. By contrast, a smaller group of bonds, among them mortgage bonds, bank bonds, corporate bonds and quasi-government issues in slightly lower rating categories, suffered at times significant price losses. Initially, the yield differentials between these non-government bonds and US government bonds remained stable, just to reach an exceptional extent in March 2020. Thanks to significant inflows in the first five months of the reporting period, US dollar bonds were purchased on both the primary and the secondary market. The interest rate risk in the US dollar bond field thus increased slightly in the course of the reporting period.

Securities lending transactions were entered into in order to generate additional income.

Makeup of fund assets in EUR

Any discrepancies in terms of the market value or the share of the fund assets result from rounding-off.

UCITS refers to units in an undertaking for collective investment in transferable securities

§ 166 InvFG refers to units in investment funds in the form of "other asset portfolios"

§ 166 (1) item 2 InvFG refers to units in special funds

§ 166 (1) item 3 InvFG refers to units in undertakings for collective investment in transferable securities pursuant to § 166 (1) item 3 InvFG
(such as alternative investments/hedge funds)

§ 166 (1) item 4 InvFG refers to units in real estate funds

- Identity of the counterparties for securities lending transactions:

Raiffeisen Bank International AG (as a recognized securities lending system within the meaning of § 84 InvFG)

- Nature and value of eligible collateral received by the investment fund versus the counterparty risk:

Under the master agreement on securities lending transactions concluded between the management company and Raiffeisen Bank International AG, Raiffeisen Bank International AG is obliged to provide collateral for loaned securities. Bonds, equities and units in investment funds are permitted as collateral. The bonds used as collateral may be issued by sovereigns, supranational issuers and/or companies etc. No stipulations apply in relation to the terms of these bonds. Within the scope of provision of collateral, pursuant to § 4 of the Austrian Securities Lending and Repurchase Agreement Ordinance (Verordnung zu Wertpapierleih- und Pensionsgeschäften, WPV), diversification and correlation with risk diversification achieved through quantitative issuer limits in particular and appropriate liquidity for collateral for the purpose of tradability and realizability will be ensured. This collateral will be valued on each banking day, subject to an add-on compared to the valuation of the securities loaned from the fund in accordance with provisions of EU Regulation 575/2013 (CRR). For bonds, this add-on will be determined on the basis of the credit rating of the issuer and the remaining term of the bond and will amount to no less than 0.5 %. For equities and units in investment funds, this add-on will amount to 10.607 %. The value of the required collateral, thus calculated, will result in the ongoing overcollateralization of the fund's outstanding securities lending positions.

On the reporting date the collateral had the following makeup:

ISIN	Security title	Regulated market	Currency	Asset class	Issuer	Rating	Volume Mar 31, 2020	Market value in portfolio currency

In relation to securities lending transactions, the investment fund is not entirely collateralized by means of securities which are either issued or guaranteed by an EEA member state.

Collateral holding period: unlimited

Period of securities lending:

Duration / Days	< 1 day	1-7 days	7-30 days	30-90 days	90-360 days
	0 %	0 %	0 %	0 %	100 %

Country of counterparty (Raiffeisen Bank International AG): Austria

Settlement: bilateral

- Reuse of collateral:

Collateral received is not reused.

- Custody of collateral which the investment fund has received in connection with securities lending transactions:

The collateral will be held in a separate sub-account with the custodian bank/depositary for each fund.

- Custody of collateral which the investment fund has provided in connection with securities lending transactions:

Within the limits stipulated by law (§ 84 InvFG), the management company is merely permitted to lend securities to third parties. However, it is not permitted to borrow securities. Accordingly, the investment fund will not provide any collateral within the scope of securities lending transactions.

Further information on repurchase agreements

During the reporting period, no repurchase agreements were concluded on behalf of the fund. Accordingly, the information concerning repurchase agreements which is stipulated in § 8 of the Austrian Securities Lending and Repurchase Agreement Ordinance and Art. 13 of Regulation (EU) No. 2015/2365 is not required.

Total return swaps and similar derivative instruments

A total return swap is a credit derivative instrument. Income and fluctuations in the value of the underlying financial instrument (underlying instrument or reference asset) are exchanged for fixed interest payments.

The fund did not enter into total return swaps or similar derivative instruments in the period under review.

Raiffeisen Kapitalanlage-Gesellschaft m.b.H. complies with the code of conduct for the Austrian investment fund industry 2012.
