The Company

Schroder GAIA (the 'Company') is an umbrella structured open-ended investment company with limited liability, organised as a 'société anonyme' and qualifies as a SICAV under Part I of the Law of 17 December 2010 as amended. The Company was incorporated on 21 October 2009 and its Articles were published in the Memorial on 12 November 2009 as amended.

This report covers the period from 1 October 2021 to 31 March 2022. The financial statements are prepared in accordance with Luxembourg regulations relating to undertakings for collective investment. The last day on which prices were calculated was 31 March 2022, the last working day of the period under review. At the date of this report, ten sub-funds are available for investment within the Company (the 'sub-funds').

Please refer to the current prospectus for the investment objectives of the sub-funds as well as details of investment restrictions. The Investment Manager's report for each sub-fund can be found in the quarterly investment reports, which can be obtained from the Company's registered office and are also available on the website of Schroder Investment Management (Europe) S.A. (<http://www.schroders.lu>).

Schroders is a FATCA compliant organisation. The FATCA classification of this entity and its GIIN is as follows: FATCA entity classification: FFI; Sponsoring entity: Schroder Investment Management (Europe) S.A.; Sponsoring entity GIIN: 4RIMT7.00000.SP.442.

Corporate Governance

The Company is subject to corporate governance based on:

1. Its obligations as defined by the UCITS Directive 2009/65/EC dated 13 July 2009, as implemented in Luxembourg law which is available for inspection at the registered office of the Company at 5, rue Höhenhof, 1736 Senningerberg, Grand Duchy of Luxembourg.
2. Its Articles of Incorporation which are available for inspection at the registered office of the Company and at the Luxembourg corporate and trade register, Registre de Commerce et des Sociétés ('RCSL').
3. The obligations in respect of the management of the Company, for which the Company has appointed Schroder Investment Management (Europe) S.A. (the 'Management Company'), which is subject to the requirements of the Management Company Directive 2010/43/EC, as implemented in Luxembourg law.
4. The Association of the Luxembourg Fund Industry ('ALFI') Code of Conduct for Luxembourg Investment Funds, the principles of which the Company has voluntarily adopted.

Internal Control and Risk Management Systems

The Board of Directors is responsible for establishing and maintaining adequate internal control and risk management systems of the Company in relation to the financial reporting process. Such systems are designed to manage rather than eliminate the risk of error or fraud in achieving the Company's financial reporting objectives and can only provide reasonable and not absolute assurance against material misstatement or loss.

The Board of Directors has contracted with the Management Company to put procedures in place to ensure all relevant accounting records are properly maintained and are readily available, including the production of annual and semi-annual reports. The annual and semi-annual reports of the Company are required to be approved by the Board of Directors of the Company and filed with the Commission de Surveillance du Secteur Financier ('CSSF') and in the case of the annual reports, with the Registre de Commerce et des Sociétés ('RCSL'). The annual statutory financial statements are required to be audited by independent auditors who report to the Board of Directors on their findings.

The Board meets at least four times a year and ensures that the Company maintains high standards of integrity and control in its operations and that it possesses adequate governance and means of control as law and regulation demand.

Schroder GAIA
31 March 2022

Investment Manager's Report

The sub-funds in the Schroder GAIA range can take advantage of positive or adverse market conditions through long or short exposures. This approach can sometimes result in quite diverse performance in the short term relative to the markets in which the sub-funds invest.

Economic review

The six-month period was dominated by sharply rising inflation. As the period got under way, natural gas prices were spiking in Europe as a result of shortages, and forcing up electricity prices in turn. The emergence of the Omicron variant of Covid-19 in November resulted in new restrictions on activity and renewed supply side disruption, which again added to inflationary pressures.

February 2022 brought Russia's shocking invasion of Ukraine. The war is having a devastating impact on the people of Ukraine. It is also exacerbating some of the existing economic pressures, as Western nations imposed sanctions on Russian individuals and financial entities. At the time of writing, Europe has not imposed sanctions on imports of Russian oil and gas, but Germany did suspend the approval of the long-awaited Nord Stream II gas pipeline. The war is also expected to affect the supply of agricultural commodities such as wheat, given that Ukraine and Russia are large suppliers.

Higher inflation saw the Bank of England (BoE) become the first major central bank to lift interest rates, with a 0.15 percentage point (pp) rise in December 2021 and a further 0.5pp of increases in 2022, taking rates to 0.75% by the end of March. UK annual inflation (as measured by the consumer price index) reached 6.2% in February 2022, well above the BoE's 2% target.

The US Federal Reserve followed suit in March, lifting rates by 0.25pp to a range of 0.25-0.50%. US inflation hit 7.9% in February 2022, the highest rate since 1982. Eurozone inflation hit a record high in February. The European Central Bank scaled back its bond-buying stimulus programme as a result, and indicated that it could raise interest rates later this year.

The early months of 2022 saw Western countries generally remove Covid-19 restrictions that had been reimposed as a result of the Omicron wave. However, certain Asian nations – including China – were more severely affected by the outbreak. China continued with its “zero Covid” policy, resulting in strict lockdowns in several major cities, including Shenzhen and Shanghai. Hong Kong also imposed stringent restrictions amid a surge in cases and a low vaccination rate among the elderly population.

Equity market review

The six months under review saw global developed market equities, as measured by the MSCI World Index, post a gain of 2.2% (Source: FactSet, US dollars). However, performance diverged significantly by region, sector and investment style.

The MSCI World Value Index significantly outperformed its growth counterpart. In part this was due to rising commodity prices, which benefited value areas such as energy. In addition, the rising bond yield environment hurt growth stocks. This is because the expected cash flows of growth stocks extend further into the future, so are more vulnerable to changes in the discount rate used to calculate their present value.

At the sector level, the energy and materials sectors performed very strongly thanks to higher commodity prices. Underperforming sectors included communication services and industrials. While the US equity market generally outperformed other regions, some of its high growth communication services stocks – such as Netflix and Meta (Facebook) – underperformed amid worries over valuations and their future growth prospects. In the industrials sector, many companies were affected by rising input prices and disrupted supply chains.

By region, while the US posted solid gains overall, European shares registered declines. This was partly due to the region's proximity to the war in Ukraine and the reliance on Russian gas. Additionally, worries over what rising fuel and power prices could mean for consumer spending weighed on sentiment. UK shares advanced, largely thanks to high exposure to the energy and basic materials sectors, which includes metals and mining.

Meanwhile, the MSCI Emerging Markets Index was down and underperformed the MSCI World. Russian equities fell sharply in the run up to, and in the aftermath of the invasion of Ukraine on 24 February. The local market closed from 25 February and Russia was removed from the MSCI Emerging Markets Index on 9 March, at a price that was effectively zero.

China lagged the emerging markets (EM) index by a wide margin as daily new cases of Covid-19 spiked, and lockdowns were imposed in several cities. Regulatory concerns relating to US-listed Chinese stocks also contributed to market weakness. South Korea and Taiwan underperformed as the outlook for global growth deteriorated.

Conversely, the Latin American markets all generated strong gains, amplified by currency strength. The rally in commodity prices proved supportive for all of the regional markets. Other EM net commodity exporters posted sizeable gains, including the UAE, Qatar, Kuwait, South Africa and Saudi Arabia.

The information contained in this report is historical and not necessarily indicative of future performance.

Investment Manager's Report (cont)

Bond market review

Following the strong post-pandemic economic rebound, with countries easing lockdown measures, attention turned toward increasingly elevated inflationary pressure.

Central banks remained accommodative and willing to look through inflation for much of 2021. But amid sharply resurgent demand, an energy price squeeze and supply chain disruption, price rises proved stubbornly persistent.

As a result, central banks became more hawkish later in 2021, also reflecting healthy economic conditions, reflected in particularly tight labour markets.

Bond yields rose sharply in Q1 2022. The Federal Reserve (Fed) began tapering asset purchases and raised rates in March. Its rhetoric turned markedly more hawkish leading investors to price in a rapid series of further hikes for 2022.

The Bank of England (BoE) hiked in December and again in February and March even amid concerns over the rising cost of living pressures on consumers. On the same day the BoE hiked in February, the European Central Bank (ECB) also appeared to pivot to a more hawkish stance by no longer ruling out rate hikes in 2022. The ECB also confirmed a faster reduction in their asset purchase programme.

The US 10-year yield increased from 1.49% to 2.35%. The shift in expectations around monetary policy precipitated a much larger sell-off in shorter-date government bonds. The US 2-year yield rose from 0.28% to 2.33%.

The UK 10-year yield rose from 1.02% to 1.61% and the 2-year from 0.41% to 1.36%.

The German 10-year yield increased from -0.19% to 0.55%. The German 2-year yield rose from -0.69% to -0.07%. Italian yields were impacted by concerns over tightening, with the 10-year rising from 0.86% to 2.04%.

Global corporate bonds produced negative total returns (local currency), and underperformed government bonds (Source: ICE Data Indices). High yield outperformed investment grade due to the contribution from income returns.

Outlook

The Schroders Economics Group thinks that, in the US, a slowdown is inevitable after rapid GDP growth of 5.7% in 2021. However, buoyant labour market conditions and a further run-down of excess savings should still ensure that the US economy registers a robust expansion of 3.5% this year and 2.1% in 2023. Inflation has continued to overshoot expectations and the Federal Reserve (Fed) has begun raising interest rates. We expect the Fed to raise rates several more times this year, ending 2022 at 2.25%.

In the eurozone, we think growth will slow but remain solid at 3.3% for 2022 and 2.6% in 2023. Households are expected to reduce their savings rate to more normal levels, and activity will get a boost from government spending as the European Union recovery fund kicks in. Annual inflation is forecast to rise from 2.6% in 2021 to 4.2% in 2022, before falling back to 2.1% in 2023. However, the European Central Bank remains dovish. It ended its pandemic emergency purchase programme (PEPP) in March 2022, but is likely to maintain its pre-pandemic quantitative easing programme until Q1 2023, and only raise rates in the second half of 2023.

In the UK, growth should slow from 7.5% to 4.3% in 2022 as the boost from re-opening the economy begins to fade. Household spending remains high as excess savings are reduced, but inflation will erode purchasing power. Rising inflation will be mainly driven by higher energy prices, and inflation should fall back in 2023. Meanwhile, a strong labour market should support the Bank of England in continuing to hike, taking the base rate to 1.25% by the end of this year.

Meanwhile in emerging markets (EM), most countries have so far taken the hawkish pivot in global monetary policy in their stride. Solid external positions coupled with relatively high interest rates should continue to offer some buffer as the Fed tightens the screws. However, while these solid fundamentals should prevent an EM crisis, growth is still set to slow as fading impetus from exports to developed markets and higher domestic interest rates start to bite.

Overall, the balance of risks is tilted in a stagflationary direction. Higher supply side inflation remains a key risk, as does the possibility of ongoing Russian aggression in Ukraine.

Notes to the Financial Statements as at 31 March 2022

The Company

The Company is an open-ended investment company organised as a 'société anonyme' under the laws of the Grand Duchy of Luxembourg and qualifies as a Société d'Investissement à Capital Variable ('SICAV'). The exclusive objective of the Company is to place the sub-funds available to it in transferable securities of any kind and other permitted assets, including financial derivative instruments, with the purpose of spreading investment risks and affording its Shareholders the results of the management of its portfolios.

The investment strategy of each sub-fund is based on an alternative investment strategy which has been designed and is currently managed by each of the Investment Managers.

Classes of Shares

Shares are generally issued as Accumulation Shares. Distribution Shares will only be issued within any sub-fund at the Directors' discretion. Investors may enquire at the Management Company or their Distributor whether any Distribution Shares are available within each Share Class and sub-fund.

The Directors may decide to create within each sub-fund different Share Classes whose assets will be commonly invested pursuant to the specific investment policy of the relevant sub-fund, but where a specific fee structure, currency of denomination or other specific feature may apply to each Share Class. A separate Net Asset Value per Share, which may differ as a consequence of these variable factors, will be calculated for each Share Class. The classes of share available for each sub-fund are set out in detail in the current prospectus.

E Share Class is not available through Schroders' global network of distributors. For any questions in this regard, please contact the Management Company.

Initial Charge

The Management Company and Distributors are entitled to an initial charge, which can be partly or fully waived at the Directors' discretion.

Share Classes	Initial Charge
A ¹ , A2 and K Shares	Up to 3.09278% of the Net Asset Value per Share
A1 Shares	Up to 2.04081% of the Net Asset Value per Share
C, C1, E and F Shares	Up to 1.01010% of the Net Asset Value per Share
I, IF, IZ, N, R, S and X Shares	No initial charge

Distribution Charge

As at the date of this report, there is a distribution charge of 0.50% on all Schroder GAIA A1 Share Classes. There are no other distribution charges attributable to any other classes of Shares available for investment within the Company.

Swing Pricing

A sub-fund may suffer dilution of the Net Asset Value per Share due to investors buying or selling Shares in a sub-fund at a price that does not reflect the dealing and other costs that arise when security trades are undertaken by the Investment Manager to accommodate cash inflows or outflows. In order to counter this impact, a Swing Pricing mechanism may be adopted to protect the interests of the Shareholders of the sub-fund. If on any Valuation Day, the aggregate net transactions in Shares of a sub-fund exceed a pre-determined threshold, as determined and reviewed for each sub-fund on a periodic basis by the Management Company, the Net Asset Value per Share may be adjusted upwards or downwards to reflect net inflows and outflows respectively.

The net flow will be determined by the Management Company based on the latest available information at the time of calculation of the Net Asset Value per Share. The extent of the price adjustment will be set by the Management Company to reflect dealing and other costs. Such adjustment may vary from sub-fund to sub-fund and will not exceed 2% of the original Net Asset Value per Share.

The mechanism has been implemented for Schroder GAIA sub-funds since their inception.

On 31 March 2022, the last Calculation Day of the period under review, swing pricing adjustments were applied to Schroder GAIA Wellington Pagosa. The official Net Asset Values per share of this sub-fund following the application of the swing pricing adjustment on that date are shown in the following table. All other financial information stated in this report is shown before any adjustments for swing pricing.

	Currency	Schroder GAIA Wellington Pagosa
Net Asset Value per Share* (including swing pricing adjustment) as at 31 March 2022

Summary of Significant Accounting Policies

The financial statements are prepared and presented in accordance with generally accepted accounting principles in Luxembourg for investment funds on a going concern basis.

Net Asset Value

Calculation of Net Asset Value per Share

The Net Asset Value per Share of each Share Class is calculated on the Calculation Day in the currency of the relevant Share Class. It will be calculated by dividing the Net Asset Value attributable to each Share Class, being the proportionate value of its assets less its liabilities, by the number of Shares of such Share Class then in issue. The resulting sum shall be rounded to the nearest up to four decimal places. Further details on rules that apply in valuing total assets can be found in the current prospectus.

Valuation of the Assets of the Company

The value of any cash in hand or on deposit, bills and demand notes and accounts receivable, prepaid expenses, cash dividends and interest declared or accrued as aforesaid and not yet received shall be deemed to be the full amount thereof, unless in any case the same is unlikely to be paid or received in full, in which case the value thereof shall be arrived at after making such discount as the Company may consider appropriate in such case to reflect the true value thereof.

The value of securities, financial derivative instruments and assets is determined on the basis of the prices at the close of market on the Business Day, on the stock exchange or any other Regulated Market on which these securities or assets are traded or admitted for trading. If a security is not traded or admitted on any official stock exchange or any Regulated Market, or in the case of securities so traded or admitted the last available price of which does not reflect their true value, the Directors are required to proceed on the basis of their expected sales price, which shall be valued with prudence and in good faith.

Notes to the Financial Statements as at 31 March 2022 (cont)

Net Asset Value (cont)

The financial derivative instruments which are not listed on any official stock exchange or traded on any other organised market are subject to reliable and verifiable valuation on a daily basis and can be sold, liquidated or closed by an offsetting transaction at any time at their fair value at the Company's initiative.

Should any of the aforesaid valuation principles not reflect the valuation method commonly used in specific markets or if any such valuation principles do not seem accurate for the purpose of determining the value of the Company's assets, the Directors may fix different valuation principles in good faith and in accordance with generally accepted valuation principles and procedures.

Units or Shares in open-ended UCIs shall be valued on the basis of their last available Net Asset Value as reported by such UCIs.

Fair Value Pricing

The Directors reserve the right to implement fair value pricing whenever they deem it appropriate.

As at 31 March 2022, the fair value adjustment was applied to the following securities:

Sub-Fund	Security name
Schroder GAIA Cat Bond	LionRock SideCar 2021-1 perpetual, ZCP
	Voussoir Re perpetual, variable
Schroder GAIA Helix	CFD on MAGNIT PJSC
	CFD on TRINITY LIMITED
	Fix Price Group
	Russian Federal Bond - OFZ 23/03/33, 7.70%
	Softline Holding
Schroder GAIA Wellington Pagosa	Clementia Pharmaceuticals

Taxation

The Company is not subject to any taxes in Luxembourg on income or capital gains.

The only tax to which the Company is subject is the 'taxe d'abonnement' at a rate of 0.05% per annum based on the Net Asset Value of each sub-fund at the end of the relevant quarter, calculated and paid quarterly.

In respect of any Share Class or sub-fund which comprises only institutional Investors (within the meaning of Article 174 of the Law of 17 December 2010 as amended), the tax levied will be at the rate of 0.01% per annum.

Interest and dividend income received by the Company may be subject to non-recoverable withholding tax in the source countries. The Company may further be subject to tax on the realised or unrealised capital appreciation of its assets in the countries of origin, and provisions in this respect may be recognised in certain jurisdictions.

Management Fees

The Investment Managers are entitled to receive management fees for their services, which are calculated and accrued daily by reference to the Net Asset Value of the sub-funds and are paid monthly. The actual rates payable for the period under review are set out in the following table:

Sub-Funds	Share Class	Management Fee
Schroder GAIA BlueTrend	A Shares	1.60%
	C, E and N Shares	1.00%
	I* Shares	None
Schroder GAIA Cat Bond	A and F Shares	1.50%
	C and IF Shares	1.10%
	I Shares	None
Schroder GAIA Contour Tech Equity	A and A1 Shares	2.00%
	C Shares	1.25%
	E Shares	1.00%
	I* Shares	None
Schroder GAIA Egerton Equity	A and A1 Shares	2.00%
	C and E Shares	1.25%
	X Shares (effective rate)	up to 1.25% (1.25%)
	I* Shares	None

* Please refer to the Directors' Report for details of all corporate actions that occurred during the period under review.

Notes to the Financial Statements as at 31 March 2022 (cont)

Management Fees (cont)

Sub-Funds	Share Class	Management Fee
Schroder GAIA Helix	A Shares	2.00%
	C, C1 and IZ* Shares	1.00%
	E Shares	0.75%
	S* Shares (effective rate)	up to 1.00% (0.35%)
	X Shares (effective rate)	up to 1.00% (0.60%)
	I Shares	None

	K Shares	1.90%
	I* Shares	None
Schroder GAIA UK Dynamic Absolute Return Fund	C and R Shares	0.75%
	K Shares	1.25%
	I Shares	None
Schroder GAIA Wellington Pagosa	A and A1* Shares	2.00%
	C and C1 Shares	1.25%
	E Shares	0.75%
	I* Shares	None

These fees may be partially waived at the discretion of the Management Company.

Directors' Fees

Marie-Jeanne Chèvremont-Lorenzini, Bernard Herman and Eric Bertrand received a remuneration of EUR 10,083 each for the period under review. Hugh Mullan received a remuneration of EUR 8,000 for the period under review. The remaining directors have waived their remuneration.

Performance Fees

The performance fee becomes due in the event of outperformance, that is if the increase in the Net Asset Value per Share during the relevant performance period exceeds the High Water Mark, i.e. by reference to the highest Net Asset Value per Share at the end of any previous performance period (the High Water Mark).

A Share Class performance fee is accrued on each Business Day and included in the Net Asset Values of the sub-funds on the following Calculation Day, on the basis of the difference between the Net Asset Value per Share determined on the same Calculation Day (before deduction of any provision for the performance fee) and the hurdle, multiplied by the average number of Shares in issue over the financial period or in the case of a performance fee based on outperformance over a benchmark the higher of the Target Net Asset Value per Share (i.e. the hypothetical Net Asset Value per Share assuming a performance based on the benchmark until the Business Day) or the High Water Mark, multiplied by the average number of Shares in issue over the financial period. No performance fee is calculated for I Shares.

Details of performance fees calculations for the period under review are shown in the table below. Further details of the calculation of performance fees can be found in the current prospectus and the fees payable for the period are shown in the Statement of Net Assets under 'Performance fees payable'. Performance fees charged per share class during the period are shown on pages 134-135.

For Schroder GAIA Contour Tech Equity, Schroder GAIA Egerton Equity, Schroder GAIA Two Sigma Diversified and Schroder GAIA UK Dynamic Absolute Return Fund the performance fee is 20% of the outperformance.

For Schroder GAIA Helix, Schroder GAIA Sirios US Equity and Schroder GAIA Wellington Pagosa the performance fee is 20% of the outperformance (with the exception of E Shares where the rate is 15% of the outperformance).

For Schroder GAIA BlueTrend the performance fee is 10% of the outperformance.

For Schroder GAIA Cat Bond and Schroder GAIA Oaktree Credit no performance fee is charged.

** Effective 1 March 2022 the Secured Overnight Financing Rate (SOFR) benchmark has been introduced for Schroder GAIA Helix.

Custodian and Administration fees

The Custodian and Fund Administrator are entitled to fees for related services rendered in accordance with common practice in Luxembourg, payable monthly, out of the net assets of the Fund.

Cash Collateral Reinvestment

For the purpose of counterparty risk mitigation, sub-funds with currency hedging transactions related to hedged Share Classes will pay or receive cash collateral on a daily basis from the counterparty, thus reducing their exposure over the duration of the forward contract.

Investment Managers may reinvest the cash collateral they receive from their counterparty in connection with currency hedging.

Collateral receivable or payable at the maturity date of the forward contracts are shown in the Statement of Net Assets as 'Net Hedged currency class forward contracts collateral receivable/payable'. Collateral calls receivable or payable are shown in the Statement of Net Assets as 'Hedged currency class forward contracts collateral calls receivable/payable'.

Forward Foreign Exchange Contracts

Outstanding forward foreign exchange contracts were valued at the last available price at NAV Calculation Day, by reference to the forward rate of exchange applicable to the maturity of the relevant contract. The unrealised appreciation/(depreciation) is shown in the Statement of Net Assets under 'Net unrealised appreciation/(depreciation) on forward foreign exchange contracts'.

On 31 March 2022, the following sub-funds were committed to forward foreign exchange contracts:

Spot Trades

Outstanding spot trades were valued at the last available price at NAV Calculation Day, by reference to the spot rate of exchange to the maturity of the relevant contract. The unrealised appreciation/(depreciation) is shown in the Statement of Net Assets under 'Net unrealised appreciation/(depreciation) on spot trades'.

On 31 March 2022, the following sub-fund was committed to Spot trades:

Currency Bought	Amount Bought	Currency Sold	Amount Sold	Settlement Date	Unrealised Appreciation/ (Depreciation)

Total Return Swap Contracts

The Fund may use total return swaps. A total return swap is a bilateral financial contract which allows the Fund to enjoy all of the cash flow benefits of an asset without actually owning this asset (the 'Reference Asset'). The sub-funds will have to pay a periodic fee (fixed or floating payment) in exchange of their rights to receive the total return of the Reference Assets (coupons and/or capital gains and/or losses). The Reference Asset can be almost any asset, which constitutes an eligible investment for the sub-funds. The sub-funds may use such instruments to seek exposure to an eligible market or for hedging purposes.

The total return swaps were valued at the last available price at NAV Calculation Day. The unrealised gain or loss on total return swaps at period-end is represented by the values of interests to be received (or paid), based on relevant swap agreements' interest rates less (or plus, respectively), the value of the performance to be paid (or received, respectively), based on the total return value of underlying assets, which is made of the current fair value of equities plus the dividend distributed for such equities for the relevant swap year. The unrealised appreciation/(depreciation) is shown in the Statement of Net Assets under 'Net unrealised appreciation/(depreciation) on total return swap contracts'.

As at 31 March 2022, the following sub-funds were committed to total return swap contracts agreements:

Protection Position	Industry	Counterparty	Currency	Nominal Amount	Market Value	Maturity Date	Unrealised Appreciation/ (Depreciation)

Contracts for Differences

Contracts for differences are valued based on the closing market price of the underlying security converted into the base currency of the contract for differences, less any financing charges attributable to each contract which are booked separately. On entering a contract for differences, the Fund may be required to pledge an amount of cash and/or other assets to the broker which is equal to a certain percentage of the contract amount ('initial margin'). Subsequently, payments known as 'variation margins' are made or received by the Fund periodically, depending on the fluctuations in the value of the underlying security. Realised gains or losses at the closure of the contract are equal to the difference between the value of the contract for differences at the time it was opened (including any financial changes) and the value at the time it was closed. Dividends (net of withholding taxes) attributable to open contracts for differences are deemed to be dividends receivable at the end of the period. The result of these revaluations is shown in the Statement of Net Assets under 'Net unrealised appreciation/(depreciation) on contracts for differences'.

As at 31 March 2022, the following sub-funds were entered into contracts for differences on financial indices and futures contracts:

Contract	Counterparty	Quantity	Market Value	Unrealised Appreciation/ (Depreciation)

Credit Default Index Swap Contracts

A credit default index swap allows the transfer of default risk. This allows a Fund to effectively buy insurance on a reference index obligation it holds (hedging the investment), or buy protection on a reference index obligation it does not physically own in the expectation that the credit will decline in quality. One party, the protection buyer, makes a stream of payments to the seller of the protection, and a payment is due to the buyer if there is a credit event (a decline in credit quality, which will be predefined in the agreement between the parties). If the credit event does not occur the buyer pays all the required premiums and the swap terminates on maturity with no further payments. The risk of the buyer is therefore limited to the value of the premiums paid. In addition, if there is a credit event and the Fund does not hold the underlying reference obligation, there may be a market risk as the Fund may need time to obtain the reference index obligation and deliver it to the counterparty. Furthermore, if the counterparty becomes insolvent, the Fund may not recover the full amount due to it from the counterparty. The market for credit default indices may sometimes be more illiquid than the bond markets. The Company will mitigate this risk by monitoring in an appropriate manner the use of this type of transaction.

Credit default indices were valued at their intrinsic value. The valuation method involves the current value of the interest-rate series and the current value of the credit spread traded on the market at the closing date. The result of these revaluations together with any interest receivable/payable in relation to credit default index is shown in the Statement of Net Assets under 'Net unrealised appreciation/(depreciation) on credit default index swap contracts'.

On 31 March 2022, the following sub-funds were committed to credit default indices agreements on financial indices:

Protection Position	Description	Counterparty	Currency	Nominal Amount	Interest (Paid)/Received %	Maturity Date	Unrealised Appreciation/(Depreciation)

Credit Default Swap Contracts

A credit default swap allows the transfer of default risk. This allows the Fund to effectively buy insurance on a reference obligation it holds (hedging the investment), or buy protection on a reference obligation it does not physically own in the expectation that the credit will decline in quality. One party, the protection buyer, makes a stream of payments to the seller of the protection, and a payment is due to the buyer if there is a credit event (a decline in credit quality, which will be predefined in the agreement between the parties). If the credit event does not occur the buyer pays all the required premiums and the swap terminates on maturity with no further payments. The risk of the buyer is therefore limited to the value of the premiums paid. In addition, if there is a credit event and the sub-fund does not hold the underlying reference obligation, there may be a market risk as the sub-fund may need time to obtain the reference obligation and deliver it to the counterparty. Furthermore, if the counterparty becomes insolvent, the sub-fund may not recover the full amount due to it from the counterparty. The market for credit default swaps may sometimes be more illiquid than the bond markets. The Company will mitigate this risk by monitoring in an appropriate manner the use of this type of transaction.

Credit default swaps were valued at their intrinsic value. The valuation method involves the current value of the interest-rate series and the current value of the credit spread traded on the market at the closing date. The result of these revaluations together with any interest receivable/payable in relation to credit default swaps is shown in the Statement of Net Assets under 'Net unrealised appreciation/(depreciation) on credit default swap contracts'.

On 31 March 2022 the following sub-fund was committed to credit default swap agreements:

Cross Currency Swap Contracts

The cross currency swaps were valued at the last available price at NAV Calculation Day. The Unrealised appreciation/(depreciation) is disclosed in the Statement of Net Assets under 'Net unrealised appreciation/(depreciation)' on cross currency swap contracts'. A cross currency swap is a contract by which two parties commit themselves during a given period to exchange interest payments denominated in two different currencies.

On 31 March 2022, the following sub-fund was entered in to cross currency swap contracts:

Counterparty	Paying Currency	Nominal	Receiving Currency	Nominal	Maturity	Paying Rate	Receiving Rate	Unrealised Appreciation/(Depreciation)
Schroder GAIA Wellington Pagosa

Inflation Rate Swap Contracts

An inflation rate swap allows the transfer of inflation risk. One party to the contract seeks to reduce their risk (by hedging), while the other increases exposure to the risk (by speculating). The party looking to hedge their inflation risk pays the floating rate linked to an inflation index while receiving fixed cash flows. By swapping floating for fixed, it reduces the hedging party's exposure to inflation risk and increases their certainty of future cash flows. Inflation rate swaps were valued at the last available price at NAV Calculation Day. The Unrealised appreciation/(depreciation) is disclosed in the Statement of Net Assets under 'Net unrealised appreciation/(depreciation)' on inflation rate swap contracts'.

On 31 March 2022, the following sub-fund was committed to swap agreements on inflation rates:

Nominal Amount	Currency	Counterparty	Security Description	Maturity Date	Unrealised Appreciation/(Depreciation)
Schroder GAIA Wellington Pagosa					
3,235,000	EUR	J.P. Morgan	Pay fixed 3.28%, Receive floating HICPX 5 year	15-Mar-2027	(16,675)
755,000	EUR	J.P. Morgan	Pay fixed 2.61%, Receive floating HICPX 10 year	15-Mar-2032	8,604
760,000	EUR	J.P. Morgan	Pay fixed 2.71%, Receive floating HICPX 10 year	15-Mar-2032	(959)
USD					(9,030)

Notes to the Financial Statements as at 31 March 2022 (cont)

Interest Rate Swap Contracts

In order to hedge against interest rate fluctuations, the Company may enter into interest rate swaps provided:

- The commitments deriving therefrom do not exceed the value of the relevant assets to be hedged; and
- The total amount of such transactions does not exceed the level necessary to cover the risk of the fluctuation of the value of the assets concerned.

Such contracts must be denominated in the currencies in which the assets of such Fund are denominated, or in currencies which are likely to fluctuate in a similar manner and must be either listed on an exchange or dealt in on a Regulated Market.

Interest rate swaps were valued at the last available price at NAV Calculation Day at their intrinsic value. The valuation method involves a current value of each interest rate and capital series converted into the currency of the Fund on the closing date. The result of these revaluations together with any interest receivable/payable in relation to interest rate swaps is shown in the Statement of Net Assets under 'Net unrealised appreciation/(depreciation) on interest rate swap contracts'.

On 31 March 2022, the following sub-funds were committed to swap agreements on interest rates:

Disclosure of Transaction Costs

The transaction costs are broker commission fees and taxes related to the purchase and sale of transferable securities. Bond sub-funds will generally show the figure of zero as the broker commission fees are included in the spread, which is excluded from the calculation pursuant to Annex I, Schedule B, Chapter V of Directive 2009/65/EC of the European Parliament. The transaction costs part of the acquisition cost/sale price of the related assets and the Custodian transaction costs are not included in this table. Costs for structured products are included in the market value.

Notes to the Financial Statements as at 31 March 2022 (cont)

Disclosure of Transaction Costs (cont)

The transaction costs for the period under review were as follows:

Sub-Funds	Currency	Commissions
Schroder GAIA BlueTrend	USD	32,447
Schroder GAIA Cat Bond	USD	20,910
Schroder GAIA Contour Tech Equity	USD	303,114
Schroder GAIA Egerton Equity	EUR	196,238
Schroder GAIA Helix	USD	970,085
Schroder GAIA Oaktree Credit	USD	-
Schroder GAIA Sirios US Equity	USD	371,583
Schroder GAIA Two Sigma Diversified	USD	139,920
Schroder GAIA UK Dynamic Absolute Return Fund	GBP	25,767
Schroder GAIA Wellington Pagosa	USD	553,239

Dividends

During the period under review, the following sub-funds paid dividend distributions:

Exchange Rate

The exchange rate used for the calculation of the combined total in EUR of the Financial Statements as at 31 March 2022 is:

1 Euro = 1.10625 US Dollar

1 Euro = 0.84212 Sterling Pound

Significant events during the period

The Company's Depository and Administrative Agent Brown Brothers Harriman (Luxembourg) S.C.A. ("BBH") has entered into an agreement with State Street Corporation ("State Street") under which State Street will acquire BBH's Investor Services business; which includes its custody, fund accounting and administration, transfer agency, depository, foreign exchange, trustee and securities lending services. The completion of the transaction is subject to customary closing conditions and regulatory approvals.

Ukraine/Russia sanctions

The invasion of Ukraine by Russia which began on 24 February has increased valuation, liquidity and market risk for securities issued by Ukraine, Belarus and Russia, and to a certain extent, most global markets. As of the date of this report the resolution of this event, and the potential impact on the funds, continues to be uncertain. The Board are closely monitoring the situation with respect to all securities held in our funds. In relation to securities of Russian issuers held in our funds, these continue to be impacted by a range of actions taken by governments, stock exchanges and counterparties, including sanctions regimes, leading to severe valuation and liquidity issues. Russian markets have been suspended, and the funds will not be investing in Russian or Belarusian equities for the foreseeable future. The board will continue to apply appropriate valuation principles in accordance with our pricing processes. Because of these issues and due to our inability to transact or transfer these assets, the value of Russian securities in our funds has become de minimis and this is expected to be reflected until further notice in the NAV of any relevant funds.

The following sub fund has exposure to Russian and Ukrainian securities:

Schroder GAIA Helix

Subsequent Events

On 11 May 2022 the following share classes were launched in Schroder GAIA Oaktree Credit:

Class A2 Dis, Class A2 Dis CHF Hedged, Class A2 Dis GBP Hedged, Class C Dis, Class C Dis CHF Hedged, Class C Dis GBP Hedged, Class E Dis, Class E Dis CHF Hedged and Class E Dis GBP Hedged.

Appendix I – Securities Financing Transactions

The sub-funds engage in Securities Financing Transactions (SFT) (as defined in Article 3 of Regulation (EU) 2015/2365, securities financing transactions include repurchase transactions, securities or commodities lending and securities or commodities borrowing, buy-sell back transactions or sell-buy back transactions and margin lending transactions). In accordance with Article 13 of the Regulation, the sub-fund involvement relating to their exposure on total return swaps for the period ended 31 March 2022 is detailed below:

Schroder GAIA Egerton Equity

Global Data

Amount of assets engaged in total return swaps

Amount of Assets - Long Positions EUR	% of AUM
17,048,614	2.03%
Amount of Assets - Short Positions EUR	% of AUM
27,840,742	3.33%
Amount of Assets - Total EUR	% of AUM
44,889,356	5.36%

Concentration Data

Ten largest collateral issuers (across all SFT and total return swaps)

As at 31 March 2022, there are no collateral securities and commodities received in respect of total return swaps.

Top ten counterparties

Counterparty	Gross volume of outstanding transactions EUR
Goldman Sachs	20,300,010
Morgan Stanley	15,311,620
J.P. Morgan	7,108,992
Merrill Lynch	2,113,506
UBS	55,228
	44,889,356

The sub-fund deals with all of the above mentioned counterparties for its total return swaps.

Aggregate transaction data

Type and quality of collateral

The aggregate transaction data for collateral received in respect of total return swaps is as follows:

Type	Market Value EUR
Cash	10,519,003
	10,519,003

Maturity tenor of collateral

Maturity	Market Value EUR
less than 1 day	10,519,003
1 to 7 days	-
1 to 4 weeks	-
1 to 3 months	-
3 to 12 months	-
more than 1 year	-
open maturity	-
	10,519,003

Appendix I – Securities Financing Transactions (cont)

Schroder GAIA Egerton Equity (cont)

Currency of collateral

Currency	Market Value EUR
EUR	10,519,003
	10,519,003

Maturity tenor of total return swaps

Maturity	Long Positions EUR	Short Positions EUR	Total EUR
less than 1 day	-	-	-
1 to 7 days	-	-	-
1 to 4 weeks	-	-	-
1 to 3 months	-	192,777	192,777
3 to 12 months	9,601,510	12,868,885	22,470,395
more than 1 year	7,447,104	14,779,080	22,226,184
open maturity	-	-	-
	17,048,614	27,840,742	44,889,356

Country in which counterparties for total return swaps are established

Counterparty	Country
Goldman Sachs	United States of America
Morgan Stanley	United States of America
J.P. Morgan	United Kingdom
Merrill Lynch	United States of America
UBS	Switzerland

Settlement and clearing

The sub-fund utilises bi-lateral settlement and clearing with its counterparty for total return swaps.

Reuse of collateral

The sub-fund does not reuse or reinvest collaterals received, if any, on total return swaps.

Safekeeping of collateral

Collateral received

Custody of collateral received in respect of total return swaps is as follows:

Custodian	Market Value EUR
Morgan Stanley	10,519,003
	10,519,003

Collateral granted

The proportion of collateral held in segregated accounts or in pooled accounts, or in any other accounts in respect of total return swaps is as follows:

Account Type	Market Value EUR
Segregated	27,982,538
Pooled	-
Other	-
	27,982,538

OTC derivative transactions entered into by the sub-fund under an ISDA Master agreement are netted together for collateral purposes. Therefore, collateral disclosures provided above are in respect of all OTC derivative transactions and not just total return swaps.

Appendix I – Securities Financing Transactions (cont)

Schroder GAIA Egerton Equity (cont)

Return and Cost

For the period ended 31 March 2022, data on return and cost in respect of total return swaps are as follows:

	% of Overall Returns	Return EUR*
Net interest on swaps	–	–
Net realised gains	73.78%	30,907,296
Net change in unrealised depreciation	26.22%	10,982,366
	100.00%	41,889,662

* expressed in absolute terms.

Return on total return swaps disclosed above are included as part of 'Net income on swaps' disclosed in the Statement of Operations and 'Net realised gains/(losses) on total return swaps contracts' and 'Net change in unrealised appreciation/(depreciation) on total return swaps contracts' in the Statement of Changes in Net Assets.

Cost

The costs attributed to total return swaps are included in the spread.

Schroder GAIA Helix

Country in which counterparties for total return swaps are established

Counterparty	Country
J.P. Morgan	United Kingdom
Goldman Sachs	United States of America
Morgan Stanley	United States of America

Settlement and clearing

The sub-fund utilises bi-lateral settlement and clearing with its counterparty for total return swaps.

Reuse of collateral

The sub-fund does not reuse or reinvest collaterals received, if any, on total return swaps.

Safekeeping of collateral

Collateral received

Custody of collateral received in respect of total return swaps is as follows:

Custodian	Market Value USD
Goldman Sachs	4,610,000
J.P. Morgan	4,330,000
	8,940,000

Appendix I – Securities Financing Transactions (cont)

Schroder GAIA Helix (cont)

Collateral granted

As at 31 March 2022, no collateral was granted in respect of total return swaps.

OTC derivative transactions entered into by the sub-fund under an ISDA Master agreement are netted together for collateral purposes. Therefore, collateral disclosures provided above are in respect of all OTC derivative transactions and not just total return swaps.

Return and Cost

For the period ended 31 March 2022, data on return and cost in respect of total return swaps are as follows:

	% of Overall Returns	Return USD*
Net interest on swaps	–	–
Net realised gains	76.90%	132,629,087
Net change in unrealised depreciation	23.10%	39,831,226
	100.00%	172,460,313

* expressed in absolute terms.

Return on total return swaps disclosed above are included as part of 'Net income on swaps' disclosed in the Statement of Operations and 'Net realised gains/(losses) on total return swaps contracts' and 'Net change in unrealised appreciation/(depreciation) on total return swaps contracts' in the Statement of Changes in Net Assets.

Cost

The costs attributed to total return swaps are included in the spread.
