Financial portfolio management

Regarding the delegation of the management of the investment portfolio, please see the information concerning the sub-funds.

Financial service providers

The financial services providers in Belgium are:
KBC Bank NV, Havenlaan 2, B-1080 Brussels

Custodian

KBC Bank NV, Havenlaan 2, B-1080 Brussels.

Custodian's activities

The custodian:

- Ensures the safe-keeping of the assets of the Bevek and compliance with the standard obligations in this regard;
- Ensures that the sale, issue, purchase, redemption and withdrawal of shares in the Bevek occur in compliance with the applicable legal and regulatory provisions, the articles of association and the prospectus;
- Ensures that the net asset value of the shares in the Bevek is calculated in accordance with the applicable legal and regulatory provisions, the articles of association and the prospectus;
- Carries out the instructions of , provided that these do not contravene the applicable legal and regulatory provisions, the articles of association and/or the prospectus;
- Ensures that in transactions relating to the assets of the Bevek, the equivalent value is transferred to the Bevek within the usual terms;
- Ascertains that:
 - The assets in custody correspond with the assets stated in the accounts of the Bevek;
 - The number of shares in circulation stated in the accounts corresponds with the number of shares in circulation as stated in the accounts of the Bevek;
 - The investment restrictions specified in the applicable legal and regulatory provisions, the articles of association and the prospectus are respected;

- iv. The rules regarding fees and costs specified in the applicable legal and regulatory provisions, the articles of association and the prospectus are respected;
- v. The returns of the Bevek are appropriated in accordance with the applicable legal and regulatory provisions, the articles of association and the prospectus.

The custodian ensures that the cash flows of the Bevek are correctly monitored and in particular that all payments by or on behalf of subscribers on subscription to shares in the Bevek, have been received and that all the cash of has been booked to cash accounts that:

- 1. Have been opened in the name of the Bevek, in the name of the management company acting on its behalf, or in the name of the custodian acting on its behalf;
- 2. Have been opened at an entity as intended in Article 18(1a, b and c) of Directive 2006/73/EC; and
- 3. Are held in accordance with the principles set out in Article 16 of Directive 2006/73/EC.

If the cash accounts have been opened in the name of the custodian acting in name of the Bevek, no cash from the entity intended in Article 18(1a, b and c) of Directive 2006/73/EC and none of the custodian's own cash may be booked to these accounts.

The assets of the Bevek are placed in custody with a custodian as follows:

- a) For financial instruments that may be held in custody:
 - i. The custodian will hold in custody all financial instruments that may be registered in a financial instrument account in the books of the custodian, as well as all financial instruments that can be physically delivered to the custodian;
 - ii. the custodian will ensure that all financial instruments that can be registered in a financial instrument account in the custodian's books, are registered in the custodian's books in separate accounts in accordance with the principles set out in Article 16 of Directive 2006/73/EC; these separate accounts have been opened in the name of the Bevek or in the name of the management company acting on its account, so that it can be clearly ascertained at all times that they belong to the Bevek, in accordance with the applicable law.
- b) For other assets:
 - i. The custodian will verify that the Bevek or the management company acting on its behalf is the owner of the assets by checking based on information or documents provided by the Bevek or the management company and, where appropriate, of available external proofs, whether the Bevek or the management company acting on its behalf has ownership;
 - ii. The custodian will maintain a register of the assets from which it is clear that the Bevek or the management company acting on its behalf is the owner thereof and will keep that register up-to-date.

The custodian's duty to return the financial instruments only applies to financial instruments that may be held in custody.

Custody tasks delegated by the custodian

The custodian of the Bevek has delegated a number of custody tasks as of the publication date of this annual/half-year report. The tasks delegated to this sub-custodian are:

- Holding the required accounts in financial instruments and cash;
- Carrying out the custodian's instructions regarding the financial instruments and cash;
- Where required, the timely delivery of the relevant financial instruments to other parties involved with holding them;
- The collection of every type of return from the financial instruments;
- The appropriate communication to the custodian of all information that the sub-custodian receives directly or indirectly from the issuers via the chain of depositaries and performing the required formalities with regard to the financial instruments, with the exception of exercising voting rights, unless otherwise agreed in writing;
- Maintaining and communicating to the custodian all required details regarding the financial instruments;
- Processing corporate events on financial instruments, whether or not after the holder of these instruments has made a choice;
- Providing the services that have been agreed between the custodian and the sub-custodian and are legally permitted, with the exception of investment advice and asset management and/or any other form of advice relating to transactions in or the simple holding of financial instruments;
- Maintaining and communicating to the custodian all required details regarding the financial instruments.

List of sub-custodians and sub-sub-custodians

The updated list of entities to which the custodian has delegated custody duties and, where applicable, the entities to which the delegated custody duties have been sub-delegated, can be consulted at www.kbc.be/investment-legal-documents.

The custodian is liable for the loss of financial instruments held in custody in the sense of Article 55 of the Law of 3 August 2012 relative to undertakings for collective investment complying with the conditions of Directive 2009/65/EC and the undertakings for investment in receivables.

Investors can approach the institutions providing the financial services for up-to-date information regarding the identity of the custodian and its principal duties, as well as the delegation of these duties, and the identity of the institutions to which these duties have been delegated or sub-delegated, and also regarding any conflicts of interest as specified below.

Conflicts of interest

The custodian will take all reasonable measures to identify conflicts of interest that may arise in the execution of its activities between

- The custodian and management company of the Bevek, or the management companies of other beveks or funds of which the custodian holds assets;
- The custodian and the Bevek whose assets the custodian holds, or other beveks or funds of which the custodian holds assets;
- The custodian and the investors in this Bevek whose assets the custodian holds, or other beveks or funds of which the custodian holds assets;
- These parties themselves.

The custodian of the Bevek will implement and maintain effective organisational and administrative procedures in order to take all reasonable measures to detect, prevent, manage and control conflicts of interest so that they do not prejudice the interests of the aforementioned parties.

If these procedures are not sufficient to be able to assume with reasonable certainty that the interests of the aforementioned parties have not been harmed, the investors will be notified of the general nature or causes of conflicts of interest according to the procedure described on the following website: www.kbc.be/investment-legal-documents (About Us > Code of conduct for conflicts of interest). Investors who wish to be informed personally of such conflicts of interest can contact the financial services providers. If necessary, the open-ended investment company's custodian will adjust its processes.

Remuneration policy and remuneration paid by the management company

General:

The KBC group has a specific management structure, under which KBC Group NV and the various group companies are brought together within one or more business units, for operational purposes.

KBC Asset Management NV is part of the KBC Asset Management product factory within the International Markets Division of the KBC group.

In 2010, the KBC group introduced the KBC Remuneration Policy, which lays down general remuneration guidelines for all staff and specific guidelines for those employees who could have a material impact on the risk profile of the company. Further information about the remuneration policy is available in the 'KBC Asset Management Group Compensation Report', which you can read at <https://kbcam.kbc.be/en/about-us>. The compensation report includes information from the level of the KBC Asset Management group entities about the remuneration principles and contains remuneration figures for the relevant fiscal year according to EU and national legislation. The report comprises the following sections:

- Overview of remuneration
- Risk adjustments
- Corporate governance
- Information provided on remuneration

Remuneration paid by the management company for book year endings on 31 December 2024

The figures below show remuneration within KBC Asset Management NV as a whole (without breakdown).

the total reward over the fiscal year, broken down into the fixed and variable pay that the manager pays to its staff, the number of recipients and, where appropriate: <ul style="list-style-type: none">- the carried interest paid by the sicav; or- any amount paid direct by the bevek/sicav, including any performance rewards.	Fixed pay: € 43.981.064 Variable pay: € 4.888.638 Number of recipients: 380
the aggregate pay amount, broken down into the highest management and the manager's staff whose acts significantly affect the fund's risk profile.	Management rewards: € 2.354.909 Reward for the manager's staff whose acts affect the risk profile: € 453.233

Note: the figures contained in this table have not yet been approved by the Management Company's shareholders in general meeting, which is not scheduled until later this year. Any correction is made in the subsequent annual report.

The annual evaluation required by Article 213/2, 3rd and 4th of the Law of 3 August 2012 on undertakings for collective investment meeting the conditions of Directive 2009/65/EC and undertakings for investment in debt securities did not find any irregularities in compliance with the remuneration policy.

List of sub-funds and share classes of Horizon

The table below contains an overview of the sub-funds sold and their share classes. If no share class is mentioned for a sub-fund, that means that only capitalisation- and/or distribution units are available.
The characteristics of the different share classes are given in the prospectus.

1.2. Management report

1.2.1. Information for the shareholders

Pursuant to Article 3:6 of the Code of Companies and associations, information is supplied regarding the following:

- The balance sheet and profit and loss account provide a true and fair view of the performance and results of the undertaking for collective investment. The 'General market overview' section includes a description of the main risks and uncertainties facing the undertaking for collective investment.
- No important events took place after the close of the financial year.
- As regards events that might have a material impact on the development of the undertaking for collective investment, please refer to the 'Outlook' heading in the 'General market overview' section.
- The undertaking for collective investment does not conduct any research and development.
- The undertaking for collective investment does not have any branch offices.
- In establishing and applying the valuation rules, it is assumed that the undertaking for collective investment will continue to pursue its activities, even if the profit and loss account shows a loss for two consecutive financial years.
- All information required by the Code of Companies and associations has been included in this report.
- The risk profile of the undertaking for collective investment specified in the prospectus provides an overview regarding risk management.

Reclaims of foreign withholding taxes on dividends.

In some Member States of the European Union domestic investment funds benefit from exemptions or refunds of withholding taxes when they receive dividends from a domestic entity. The same tax benefits do not apply to non-resident investment funds investing cross-border. Such tax system is not in accordance with the free movement of capital within the European Union.

Since 2006 KBC investment funds yearly file requests for a refund of discriminatory withholding tax paid on dividends in France, Spain, Italy, Germany, Finland, Sweden, Norway and Austria. Refunds have already been received from French, Norwegian, Swedish, Spanish and Austrian fiscal administration.

The funds no longer file requests in The Netherlands as a consequence of recent Dutch Court decisions.

There were no refunds this period.

Fees for special assignments conducted within the bevek by the statutory auditor

1.2.1.1. Securities Financing Transactions (SFTs)

Except for the sub-fund applies:

General

Each sub-fund may lend financial instruments within the limits set by law and regulations.

Lending financial instruments is a transaction where one a sub-fund transfers financial instruments to a counterparty in exchange for financial collateral and subject to an undertaking on the part of that counterparty to supply the sub-fund with comparable financial instruments at some future date or on the sub-fund's request. The counterparty pays a fee for this to the sub-fund.

This takes place within the framework of a securities lending system managed by either a 'principal' or an 'agent'. If it is managed by a principal, a sub-fund has a relationship only with the principal of the securities lending system which acts as counterparty and to whom title to the loaned securities is transferred. If it is managed by an agent, a sub-fund has a relationship with the agent (as manager of the system) and with one or more counterparties to whom title to the loaned securities is transferred. The agent acts as intermediary between a sub-fund and the counterparty or counterparties.

The sub-funds use the lending of financial instruments to generate additional income. This might consist of a fee paid by the principal or, in the event that the fund performs the securities lending through an agent, by the counterparty, as well as income generated through reinvestments.

The sub-funds are not permitted to agree forms of SFTs other than lending financial instruments.

General information on the SFTs used

Type of SFT	Types of asset that the SFT can involve	Maximum percentage of the assets under management that can be involved in the SFT	Anticipated percentage of the assets under management that will be involved in the SFT
Lending financial instruments	Only shares and bonds will be lent	When lending financial instruments a maximum of 30% of the assets under management will be involved.	Depending on market conditions 0–30% of the assets under management will be involved in the lending of financial instruments

Criteria for the selection of counterparties

Lending financial instruments only occurs with high-quality counterparties. The management company selects which counterparties qualify for the lending of financial instruments.

The selected counterparties must meet the following minimum requirements to this end:

Legal status	Minimum rating	Country of origin
<p>The counterparty must belong to one of the following categories:</p> <p>a) A credit institution; or</p> <p>b) An investment firm; or</p> <p>c) A settlement or clearing institution; or</p> <p>d) A central bank of a member state of the European Economic Area, the European Central Bank, the European Investment Bank or a public international financial institution in which one or more European Economic Area member states participate.</p>	<p>Only counterparties rated as investment grade may be considered.</p> <p>An investment-grade rating means: a rating equal to or higher than BBB- or Baa3 according to one or more of the following accredited rating agencies:</p> <ul style="list-style-type: none"> - Moody's (Moody's Investors Service); - S&P (Standard & Poor's, a division of the McGraw-Hill Companies); en - Fitch (Fitch Ratings). <p>If the counterparty does not have a rating, the rating of the counterparty's parent company may be taken into consideration.</p>	<p>All geographical regions may be considered when selecting counterparties.</p>

The relationship with the counterparty or counterparties is governed by standard international agreements.

Description of acceptable financial collateral and its valuation

When a sub-fund lends financial instruments, it receives financial collateral in return. This financial collateral protects the sub-fund fund from default on the part of the counterparty to which the financial instruments have been lent.

Each sub-fund may accept the following forms of financial collateral:

- **Cash**; and/or
- **Bonds and other debt instruments**, issued or guaranteed by the central bank of a member state of the European Economic Area, the European Central Bank, the European Union or the European Investment Bank, a member state of the European Economic Area or the Organisation for Economic Cooperation and Development, or by a public international institution in which one or more member states of the European Economic Area participate, other than the counterparty or a person associated with it, and which are permitted to trade on a regulated market; and/or
- **Participation rights in a monetary undertaking for collective investment** that complies with Directive 2009/65/EC or which meets the conditions of Article 52(1:6) of the Royal Decree of 12 November 2012 on certain public institutions for collective investment which meet the conditions of Directive 2009/65/EC, and the net asset value of which is calculated and published daily.

The valuation of the financial collateral occurs daily in accordance with the most applicable and accurate method: mark-to-market. A daily variation margin applies based on the daily valuation. Consequently, daily margin calls are possible.

There are no limits regarding the term of the financial collateral.

Reuse of financial collateral

If a sub-fund receives collateral in the form of cash, it can reinvest this cash in

- **deposits with credit institutions** which can be withdrawn immediately and which mature within a period not exceeding twelve months, provided that the office of the credit institution is situated within a member state of the EEA, or if the office is established in a third country, provided that it is subject to prudential supervisory rules which the FSMA considers as being equivalent to the rules under European Law.
- **short term money market funds** as defined in Regulation (EU) 2017/1131 of the European Parliament and of the Council of 14 June 2017 on money market funds.
- **government bonds** that are denominated in the same currency as the cash received and that meet the terms and conditions set out in the Royal Decree of 7 March 2006 on securities lending by certain undertakings for collective investment.

Reinvesting in this way can eliminate the credit risk to which a sub-fund is exposed concerning the collateral in respect of the financial institution where the cash account is held, but there is still a credit risk in respect of the issuer or issuers of the debt instrument(s). The management company may delegate implementation of the reinvestment policy to a third party, including the agent managing the securities lending system.

Reinvestment in deposits at the same credit institution may not exceed 10% of the sub-fund's total assets. Reinvestment in bonds issued by the same public authority may not exceed 20% of the sub-fund's total assets.

Policy on the diversification of collateral and the correlation policy

A sub-fund is not permitted to accept financial collateral issued by the party offering them.

A sub-fund's exposure to financial collateral issued by the same issuer may not exceed 20% of the sub-fund's net assets.

Holding of the financial collateral

The financial collateral will be held in the following manner:

- for cash: held in a cash account; and
- for financial collateral that is not cash: registration in a custody account.

The custodian of the financial collateral and/or the entity to which certain tasks relating to the custody of the financial collateral has been delegated is not necessarily the same entity as the custodian of the Beveke's assets, as stated under 'B. Service providers to the Beveke'.

Influence of SFTs on a sub-fund's risk profile

This lending does not affect a sub-fund's risk profile since:

- The choice of principal, agent and every counterparty is subject to strict selection criteria.
- The return of securities similar to the securities that have been lent can be requested at any time, which means that the lending of securities does not affect management of a sub-fund's assets.
- A margin management system is used to ensure that a sub-fund is at all times the beneficiary of financial security (collateral) in the form of cash or other specific types of securities with a low risk, such as

government bonds, in case the principal or the counterparty (if a sub-fund uses an agent) does not return similar securities. The actual value of the collateral in the form of specific types of securities with a low risk must at all times exceed the actual value of the loaned securities by 5%. Furthermore, when calculating the value of the specific types of securities with a low risk provided as collateral, a margin of 3% is applied, which should prevent a negative change in price resulting in their actual value no longer exceeding the actual value of the securities. The value of the collateral in the form of cash must at all times exceed the actual value of the loaned securities.

- The criteria met by the collateral are such as to limit the credit risk. A rating of at least investment grade is required in the case of collateral in the form of bonds and other debt instruments. In the case of collateral in the form of participation rights in monetary undertakings for collective investment, the inherent diversification of these undertakings limits the credit risk. In the case of cash that is reinvested, a rating of at least investment grade is required when reinvesting in either deposits or government bonds. In the case of reinvestment in short-term money-market funds, the inherent diversification of these funds limits the credit risk.
- The criteria met by these types of collateral are such as to limit the liquidity risk. It must be possible to value the financial collateral on a daily basis by market price or to withdraw it on demand (on reinvestment of cash in deposits).
- In the case of reinvestment of cash, there are additional criteria to limit the market risk associated with the initial values in cash. When reinvesting bonds, only bonds with a remaining term to maturity of no more than one year may be considered. The shortness of this remaining term results in a low sensitivity to interest rate movements. In the case of reinvestment in short-term money-market funds, the low duration of these funds limits the market risk with respect to the initial value in cash.
- The custody of financial collateral consisting of securities occurs by placing the securities in custody accounts which, in the event of the custodian's bankruptcy, are held outside its insolvent estate. The custody of financial collateral consisting of cash occurs by holding it in cash accounts, whether or not segregated. The extent to which the custody of financial collateral consisting of cash occurs in non-segregated accounts has no influence, however, on the sub-fund's risk profile.
- Operational risks are limited by operational controls, in the shape of daily control of the market values of loaned securities and collateral and reconciliation of internal and external data.

Distribution policy for returns on the utilised SFTs

By lending securities, a sub-fund can generate additional income, which might consist of a fee paid by the principal or the counterparty (if a sub-fund uses an agent) as well as income generated through reinvestments. After deducting the direct and indirect charges – set at a flat rate of 35% of the fee received and consisting of the charges for the clearing services provided by KBC Bank NV, the charges paid to the management company for setting up and monitoring the system for lending securities, the charges for margin management, the charges associated with cash and custody accounts and cash and securities transactions, the fee paid for any management of reinvestments and, if a sub-fund uses an agent, the fee paid to the agent. This income is paid to a sub-fund. It should be noted in this regard that KBC Bank NV is an entity affiliated with the management company.

1.2.1.2. General strategy for hedging the exchange rate risk

In order to protect its assets against exchange rate fluctuations and within the limitations laid down in the articles of association, a sub-fund may perform transactions relating to the sale and/or the purchase of forward currency contracts, as well as the sale of call options and the purchase of put options on currencies. The transactions in question may relate solely to contracts traded on a regulated market that operates regularly, that is recognised and that is open to the public or, that are traded with a recognised, prime financial institution specialising in such transactions and dealing in the over-the-counter (OTC) market in options. With the same objective, a sub-fund may also sell currencies forward or exchange them in private transactions with prime financial institutions specialising in such transactions.

1.2.1.3. Social, ethical and environmental aspects

The following shall apply in the case of structured sub-funds (CSOB Global 100 BestOf 2, Investicna Prilezitost, Start 100, Start 100 Plus):

For the investments described in the individual information regarding the sub-funds in 'Characteristics of bonds and other debt instruments' certain social ethical and environmental aspects are taken into account against which issuers are being assessed.

Investments may not be made in, amongst others:

- financial instruments issued by manufacturers of controversial weapon systems that are prohibited by international (and national) law or for which there is a broad consensus that they should be banned. These weapon systems include: cluster bombs and sub-munitions, chemical or biological weapons, anti-personnel mines (including Claymore mines), weapons containing depleted uranium;
- financial instruments issued by manufacturers of weapons containing white phosphorus and nuclear weapons;
- financial instruments issued by companies where there are serious indications that they are perpetrators of, accomplices or accessories to, or stand to benefit from the violation of globally recognised standards of Responsible investing. The main criteria used cover human rights, employee rights, the environment and anticorruption.

In this way, not only is a purely financial reality represented, but also the social reality of the sector or region. This list of exclusion criteria is not exhaustive.

A complete overview of the exclusion criteria can be found at www.kbc.be/investment-legal-documents > > General exclusion policies for conventional and Responsible Investing funds. These exclusion criteria can be modified at any time by the management company.

For structured sub-funds whose return is linked to a basket of shares, certain exclusion criteria may apply to the composition of the basket. More information on these exclusion criteria and their degree of applicability can be found in the 'Information concerning the sub-fund – 2. Investment information – Selected strategy'.

Structured sub-funds whose return is linked to an index, may not have any exposure to controversial weapons as described by national law at launch. More information can be found at www.kbc.be/investment-legal-documents > General exclusion policies for conventional and Responsible Investing funds.

The following shall apply in the case of non-structured sub-funds (2030, 2035, 2040, Access Fund China, Access India Fund, Business Dynamic DBI-RDT Responsible Investing, Comfort Pro August 90, Comfort Pro February 90, Comfort Pro May 90, Comfort Pro November 90, Dollar Obligatiedepot, Europees Obligatiedepot, Flexible Plan, Flexible Portfolio January Responsible Investing, Flexible Portfolio July, Global Flexible Allocation, Global Flexible Allocation Wealth January, Global Flexible Allocation Wealth July, High Interest Obligatiedepot, KBC Defensive, KBC Defensive Balanced, KBC Defensive Balanced Responsible Investing, KBC Defensive Conservative Responsible Investing, KBC Defensive Responsible Investing, KBC Defensive Tolerant, KBC Defensive Tolerant Responsible Investing, KBC Dynamic, KBC Dynamic Balanced, KBC Dynamic Balanced Responsible Investing, KBC Dynamic Responsible Investing, KBC Dynamic Tolerant, KBC Dynamic Tolerant Responsible Investing, KBC ExpertEase Dynamic, KBC ExpertEase Dynamic Responsible Investing, KBC Highly Dynamic, KBC Highly Dynamic Responsible Investing, KBC Highly Dynamic Tolerant, KBC Highly Dynamic Tolerant Responsible Investing, Platinum Portfolio, Private Banking Active Stock Selection, Privileged Portfolio Defensive, Privileged Portfolio Dynamic, Privileged Portfolio Pro 90 August, Privileged Portfolio Pro 90 February, Privileged Portfolio Pro 90 May, Privileged Portfolio Pro 90 November, Strategisch Obligatiedepot Responsible Investing, USD Low) :

The investment policy takes into account certain social, ethical and environmental aspects against which issuers are being assessed.

Investments may not be made in, amongst others:

- financial instruments issued by manufacturers of controversial weapon systems that are prohibited by international (and national) law or for which there is a broad consensus that they should be banned. These weapon systems include: cluster bombs and sub-munitions, chemical or biological weapons, anti-personnel mines (including Claymore mines), weapons containing depleted uranium;
- financial instruments issued by manufacturers of weapons containing white phosphorus and nuclear weapons;
- financial instruments issued by companies where there are serious indications that they are perpetrators of, accomplices or accessories to, or stand to benefit from the violation of globally recognised standards of Responsible Investing. The main criteria used cover human rights, employee rights, the environment and anticorruption.

In this way, not only is a purely financial reality represented, but also the social reality of the sector or region. This list of exclusion criteria is not exhaustive.

A complete overview of the exclusion criteria can be found at www.kbc.be/investment-legal-documents > General exclusion policies for conventional and Responsible Investing funds. These exclusion criteria can be modified at any time by the management company.

For some sub-funds, additional criteria relating to Responsible Investing may apply. These are further specified in 'Information concerning the sub-fund – 2. Investment information – Selected strategy' and on

www.kbc.be/investment-legal-documents > *Exclusion policies for Responsible Investment funds.*

For sub-funds that are passively managed and therefore replicate the composition of a financial index, only the following limitation applies:

Investments may not be made in financial instruments issued by manufacturers of controversial weapon systems that are prohibited by national law. These weapon systems include: cluster bombs and sub-munitions, anti-personnel mines (including Claymore mines), weapons containing depleted uranium (More information can be found at www.kbc.be/investment-legal-documents > *General exclusion policies for conventional and Responsible Investing funds.*

Integration of sustainability risk into the investment policy:

In the investment policy, the management company shall take into account the sustainability risk as defined in prospectus under title "F. Information on the risk profile of the UCITS" as follows:

- I. by defining an exclusion policy (the "Exclusion Criteria") applicable to all funds and Sicavs. (Further information can be found at www.kbc.be/investment-legal-documents > *General exclusion policies for conventional and Responsible Investing funds*); and
- II. additional criteria relating to Responsible Investing may apply for certain sub-funds. If applicable these additional criteria are specified under title '2. Investment information - Selected Strategy' and on www.kbc.be/investment-legal-documents > *Exclusion policies for responsible investment funds.*

In its investment policy, the management company constantly assesses the underlying investments at issuer level, but also (if relevant) at the level of the asset allocation and the regional or sectoral allocation. In these regular assessments, the sustainability risk is considered as one of the various elements that can influence the return. The Responsible Investing research team assigns an ESG risk rating to the majority of companies included in the best-known benchmarks and to a selection of small and medium-sized companies, based on input from an ESG data provider, where ESG stands for "Environmental, Social and Governance". The ESG risk ratings are shared internally with portfolio managers and strategists so that they can use them as a factor in the investment decision-making process. Responsible Investing funds additionally have a target to improve the weighted average ESG risk rating (of companies) of the fund versus its asset allocation. More information on our Responsible Investing methodology can be found in this policy document: www.kbc.be/investment-legal-documents > Investment policy for Responsible Investing funds.

1.2.1.4. Summary risk indicator

In accordance with Commission Regulation (EU) No.1286/2014, the Commission Delegated Regulation 2017/653 (EC) of March 8, 2017 as amended by the Commission Delegated Regulation 2021/2268 (EC) of September 6, 2021, a summary risk indicator has been calculated per sub-fund, or where relevant per share class or type of shares. The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. It is given as a figure between 1 and 7. The higher the figure, the greater the potential return, but also the more difficult it is to predict this return. Losses are possible too. The lowest figure does not mean that the investment is entirely free of risk. However, it does indicate that, compared with the higher figures, this product will generally provide a lower, but more predictable return.

The summary risk indicator is assessed regularly and can therefore go up or down based on data from the past. Data from the past is not always a reliable indicator of future risk and return.

The most recent indicator can be found under the 'What are the risks and what could I get in return?' heading in the 'Key Information' document.

1.2.1.5. Ongoing charges

The ongoing charges which consist of management fees and other administrative or operating costs on the one hand and transaction costs on the other hand, as calculated in accordance with the provisions of the Commission Delegated Regulation 2017/653 (EC) of March 8, 2017 as amended by the Commission Delegated Regulation 2021/2268 (EC) of September 6, 2021.

The ongoing charges are the charges taken from the UCITS over a financial year. They are shown per sub-fund, or where relevant per share class or type of shares, in a figure for management fees and other administrative or operating costs and a figure for transaction costs. The figure for management fees and other administrative or operating costs represents all annual expenses and other payments from a sub-fund's assets over the given period that is based on the previous year's figures. The transaction cost figure is an estimate of both annual explicit and implicit transaction costs and is based on the transactions of the previous 36 months. For sub-funds, share classes or types of shares that have been in existence for less than 36 months, the Commission Delegated Regulation 2017/653 (EC) of March 8, 2017 as amended by the Commission Delegated Regulation 2021/2268 (EC) of September 6, 2021 establishes a modified estimation method. These figures are expressed as a percentage of the average net assets per sub-fund or, where relevant, of the share class or type of shares.

The following are not included in the charges shown: entry and exit charges paid by the investor, incidental costs such as performance fees and payments made with a view to providing collateral in the context of derivative financial instruments.

1.2.1.6. Existence of fee sharing agreements and rebates

The management company may share its fee with the distributor, and institutional and/or professional parties.

In the information for each sub-fund – under '2.4.6. Expenses' – you can see the percentage of the fee that has actually been shared for each sub-fund.

If the management company invests the assets of the undertaking for collective investment in units of undertakings for collective investment that are not managed by an entity of KBC Groep NV, and receives a fee for doing so, it will pay this fee to the undertaking for collective investment.

Fee sharing heeft geen invloed op de hoogte van de beheercommissie die a sub-fund to the management company. This management fee is subject to the limitations laid down in the articles of association. The limitations may only be amended after approval by the General Meeting.

The management company has concluded a distribution agreement with the distributor in order to facilitate the wider distribution of the sub-fund's shares by using multiple distribution channels.

It is in the interests of the holders of shares of a sub-fund and of the distributor for the largest possible number of shares to be sold and for the assets of a sub-fund to be maximised in this way. In this respect, there is therefore no question of any conflict of interest.

1.2.1.7. Existence of Commission Sharing Agreements

For the following sub-funds exist Commission Sharing Agreements: Business Dynamic DBI-RDT Responsible Investing, Private Banking Active Stock Selection

For the following sub-funds don't exist Commission Sharing Agreements: 2030, 2035, 2040, Access Fund China, Access India Fund, Comfort Pro August 90, Comfort Pro February 90, Comfort Pro May 90, Comfort Pro November 90, CSOB Global 100 BestOf 2, Dollar Obligatiedepot, Europees Obligatiedepot, Flexible Plan, Flexible Portfolio January Responsible Investing, Flexible Portfolio July, Global Flexible Allocation, Global Flexible Allocation Wealth January, Global Flexible Allocation Wealth July, High Interest Obligatiedepot, Investicna Prilezitost, KBC Defensive, KBC Defensive Balanced, KBC Defensive Balanced Responsible Investing, KBC Defensive Conservative Responsible Investing, KBC Defensive Responsible Investing, KBC Defensive Tolerant, KBC Defensive Tolerant Responsible Investing, KBC Dynamic, KBC Dynamic Balanced, KBC Dynamic Balanced Responsible Investing, KBC Dynamic Responsible Investing, KBC Dynamic Tolerant, KBC Dynamic Tolerant Responsible Investing, KBC ExpertEase Dynamic, KBC ExpertEase Dynamic Responsible Investing, KBC Highly Dynamic, KBC Highly Dynamic Responsible Investing, KBC Highly Dynamic Tolerant, KBC Highly Dynamic Tolerant Responsible Investing, Platinum Portfolio, Privileged Portfolio Defensive, Privileged Portfolio Dynamic, Privileged Portfolio Pro 90 August, Privileged Portfolio Pro 90 February, Privileged Portfolio Pro 90 May, Privileged Portfolio Pro 90 November, Start 100, Start 100 Plus, Strategisch Obligatiedepot Responsible Investing, USD Low

The Management Company, or where applicable, the appointed manager has entered into a Commission Sharing Agreement with one or more brokers for transactions in shares on behalf of one or more sub-funds. This agreement specifically concerns the execution of orders and the delivery of research reports.

What the Commission Sharing Agreement entails:

The Management Company, or where appropriate, the appointed manager can ask the broker to pay invoices on their behalf for a number of goods and services provided. The broker will then pay those invoices using the savings that have been built up to a certain percentage above the gross commission that it receives from the sub-funds for carrying out transactions.

N.B.:

Only goods and services that assist the Management Company, or where applicable, the appointed manager in managing the sub-funds in the interest of this a sub-fund can be covered by a Commission Sharing Agreement.

Goods and services eligible for a Commission Sharing Agreement:

- Research-related and advice-related services;
- Portfolio valuation and analysis;
- Market information and related services;
- Return analysis;
- Services related to market prices;
- Computer hardware linked to specialised computer software or research services;
- Dedicated telephone lines;
- Fees for seminars when the topic is relevant to investment services;
- Publications when the topic is relevant to investment services;
- All other goods and services that contribute directly or indirectly to achieving the investment objectives of the sub-funds.

The Management Company, or where appropriate, the appointed manager has laid down an internal policy as regards entering into Commission Sharing Agreements and avoiding possible conflicts of interest in this respect, and has put appropriate internal controls in place to ensure this policy is observed.

No CSA accrual during this period.

1.2.1.8. Recurrent fees and charges

Recurrent fees and charges paid by the Bevek	
Fees paid to directors insofar as the General Meeting has approved said fees.	250 EUR per meeting attended, linked to the director's actual attendance of/participation in the meetings of the Board of Directors. This fee is divided across all the sub-funds marketed.
Recurrent fees and charges paid by the sub-fund	
Fee paid to the statutory auditor of the Bevek	Fee of the statutory auditor: 6150 EUR/year (excluding VAT) and: 980 EUR/year (excluding VAT) for non-structured sub-funds. 1800 EUR/year (excluding VAT) for structured sub-funds. These amounts can be indexed on an annual basis in accordance with the decision of the General Meeting.

1.2.1.9. Non-recurrent fees and charges borne by the investor

If, at a certain time, the Management Company detects exceptionally high net entries in or exits from a sub-fund, it may decide to impose an additional charge (anti-dilution levy) on the entering or exiting investors concerned, intended for the sub-fund and aimed at neutralising the negative impact on the net asset value caused by investors' entries or exits.

This anti-dilution levy will only be charged in very exceptional situations where, due to exceptional market conditions, the transaction charges resulting from the entries and exits of investors are so high that they would have too great a negative impact on the net asset value (and therefore on existing investors in that sub-fund). At that time, the amount of this anti-dilution levy will be determined by the Management Company in function of the transaction charges.

This anti-dilution levy can be applied in the following sub-funds: 2030, 2035, 2040, Access Fund China, Access India Fund, Business Dynamic DBI-RDT Responsible Investing, Comfort Pro August 90, Comfort Pro February 90, Comfort Pro May 90, Comfort Pro November 90, Dollar Obligatiedepot (In Liquidation), Europees Obligatiedepot, Flexible Plan, Flexible Portfolio January Responsible Investing, Flexible Portfolio July, Global Flexible Allocation, Global Flexible Allocation Wealth January, Global Flexible Allocation Wealth July, High Interest Obligatiedepot, KBC Defensive, KBC Defensive Balanced, KBC Defensive Balanced Responsible Investing, KBC Defensive Conservative Responsible Investing, KBC Defensive Responsible Investing, KBC Defensive Tolerant, KBC Defensive Tolerant Responsible Investing, KBC Dynamic, KBC Dynamic Balanced, KBC Dynamic Balanced Responsible Investing, KBC Dynamic Responsible Investing, KBC Dynamic Tolerant, KBC Dynamic Tolerant Responsible Investing, KBC ExpertEase Dynamic, KBC ExpertEase Dynamic Responsible Investing, KBC Highly Dynamic, KBC Highly Dynamic Responsible Investing, KBC Highly Dynamic Tolerant, KBC Highly Dynamic Tolerant Responsible Investing, Platinum Portfolio, Private Banking Active Stock Selection, Privileged Portfolio Defensive, Privileged Portfolio Dynamic, Privileged Portfolio Pro 90 August, Privileged Portfolio Pro 90 February, Privileged Portfolio Pro 90 May, Privileged Portfolio Pro 90 November, Strategisch Obligatiedepot Responsible Investing, USD Low.

1.2.2. General market overview

1 January 2024 – 31 December 2024

General overview

The economic context

There were a number of notable developments over the reporting period. Central banks eventually paused the hikes in interest rates they had initiated in their fight against inflation. Although interest rates started rising again in early 2024, the markets maintained their positive performance until the summer of 2024, driven mainly by tech stocks. This was followed by a difficult period for stock markets during the summer. Investors seemed to be cooling towards the narrative around AI, and we have seen some weakening of labour market data in the US. Investors sought safe havens, and again found them among other things in bonds. Business confidence in the manufacturing sector also remains very weak in Western economies. On the other hand, inflation does appear to be moving in the right direction. This economic weakness had in fact been evident in Europe for some time. Falling inflation and a weak economic environment allowed the ECB to cut interest rates as early as June 2024. The Fed has now also begun to soften its interest rate policy. The markets nevertheless perked up again and the rally was resumed towards the end of the year, once again driven mainly by US tech stocks.

Monetary policy

After having raised rates sharply in recent years in their fight against inflation, the central banks were due for a break. However, just before the summer of 2024 the ECB started cutting interest rates for the first time, followed in the autumn by the US central bank (Fed). Both banks delivered another few rate cuts in the autumn, leading the ECB to bring its deposit rate to 3%. Hovering between 4.25% and 4.5%, US key rates are slightly higher still. The general expectation is that both regions will maintain this momentum in 2025.

A historic reversal of Japan's interest rate policy appears to be on the cards, with Japanese inflation still slightly above target. Markets already seem to be anticipating this, sending the yen higher.

Currency markets

The euro lost -6.21% against the dollar during the reporting period. The euro gained 1.21% against the Swiss franc and fell by -4.55% against sterling. Against the Japanese yen, by contrast, the euro gained 4.53

Stock markets

The global stock market (euro-denominated MSCI World AC) gained 25.61% over the reporting period.

The different regions

US growth held up surprisingly strongly in 2024. Although GDP growth slowed to around 1.5% year-on-year in the first quarter, it rebounded in the second and third quarters to nearly 3%. The European economy also seemed to be gathering pace again from the start of 2024, though this trend faltered in the third quarter. Corporate earnings growth was again strong in the second and third quarters, further supporting stock markets. On the other hand, long-term interest rates in the US remained around 4-4.5%, a good deal higher than in Europe.

Among traditional markets, US equities performed strongly, gaining 33.19% and thereby outperforming the broad market. This year, too, technology companies, and in particular the large 'mega caps', were the drivers of stock-market gains. New developments around artificial intelligence continue to excite investors. Despite the still staggering figures for semiconductors and investments announced in AI projects, we noted a sense of fatigue around the AI narrative over the summer. The third quarter of 2024 also saw handsome gains in corporate earnings (+8%) in the US. However, turnover and earnings growth, as well as the strong performance of the US stock markets, were attributable primarily to the large technology companies, with most other sectors largely marking time. At the end of the reporting period, the rally in US equities was boosted further by the re-election of former president Donald Trump. His 'America First' discourse also resonates with investors.

The euro area remains somewhat sluggish economically. After its strong performance in the first half of the year, the euro area equity index remained virtually flat in subsequent months. It concluded the year with handsome gains (+9.45%), but underperformed the broad equity index. Weak demand from China hurt European export companies, and Donald Trump's re-election added fuel to the fire. Export companies from the rest of the world, including those in Europe, came under fire as a result. The summer brought some volatility on the back of the early French elections and later turmoil over the unwinding of yen carry trades. The Japanese stock market was hit hard in the summer months. The prospects of rising yen interest rates and the resultant smaller interest rate spread versus Western countries prompted an accelerated unwinding of a substantial volume of 'carry trades', i.e. borrowing in a low-yielding currency and investing in a higher-yielding currency. Although this weighed on sentiment, the Japanese stock market recovered fairly quickly, gaining around 15.79% over the reporting period as a result. That was better than the euro area, but still a lot less than the US.

Equities from emerging markets (countries or regions that are expected to experience rapid economic growth to make up their lag with the West) present a very mixed picture. Chinese stocks have been struggling for several years, as a combination of a real estate crisis, high debt, deflation, an ageing population and declining producer and consumer confidence weighed on stock market sentiment. Right at the end of the third quarter, however, the Chinese government announced a number of major interventions and promises, cutting interest rates and simultaneously announcing a package of stimulus measures targeting the real estate market, consumption and the stock market; in response, the Chinese stock market immediately went up 25%, though did lose some ground again in October, and November also brought no improvement. The rally was short-lived but powerful enough to temporarily push the Chinese stock market substantially higher, leading to gains of 27.94%. India's economy is still booming and its stock market gained 18.9%. Latin America declined further, ending the period down some -21.29%.

The different sectors

Cyclical companies fared better in the second half of 2024. However, certain risks remained, such as the war in Ukraine and tensions in the Middle East, elections, and potentially lower margins due to lower inflation. Conditions also became more challenging in the summer. Corporate earnings again did not support the sector in the third quarter. Materials (chemicals, mining companies) fell by -1.95%. Industrials fared much better, recording an increase of 19.77%.

Consumer Discretionary sectors also posted solid gains (28.38%), mainly thanks to a strong October.

The financial sector gained around 32.63%. Higher long-term interest rates are good for banks, and the upward revision of the economic growth outlook was also positive as it reduced the likelihood of defaults. Moreover, Trump's re-election is seen as good for the financial sector, especially given his enthusiasm for deregulation. On top of that, Trump's likely policies could be perceived as relatively inflationary, potentially keeping interest rates at higher levels, with a concomitant positive impact on banks' earnings models.

Consumer Staples, traditionally a defensive sector, enjoyed a positive second and third quarter overall, posting gains of around 11.04%.

While Health Care, another defensive sector, gained around 7.8%, Trump's election weighed on 'Big Pharma' companies, due mainly to his decision to appoint Robert Kennedy Jr. as Health Chief.

IT had another strong period, gaining some 40.38%. Communication Services also performed well, climbing 40.36%. The rise of ChatGPT and new applications for AI boosted demand for semiconductors, with strong share price gains in the first half of the year and a (brief) correction in August. Semiconductor producer Nvidia also briefly became the world's largest company by market capitalisation. The first applications are now also being rolled out in a number of software packages, gradually introducing both businesses and consumers to the potential of AI in everyday life. The more defensive Software subsector was supported by good third-quarter results. The cyclical Hardware subsector also had a strong half-year, partly thanks to Apple's stock market recovery. Some AI fatigue was seen in the market during the reporting period, with an increasing number of market researchers questioning the valuation of certain tech players and doubting whether these players can live up to the high expectations. Although not visible in the results, the sector experienced some severe fluctuations.

Conventional portfolio:

We conclude with two sectors that are rarely, if at all, included in RI portfolios, but which do form part of the conventional portfolio. Utilities, typically a defensive sector, still gained around 19.29%.

The Traditional Energy sector made hay in 2024 on the back of rising oil prices, but only managed to gain around 8.45% over the reporting period. The conflict in the Middle East raised tensions for a while, but increased production by Saudi Arabia seeking to protect its market share drove both oil and gas prices down again. Oil prices are also fluctuating quite a lot and are continuously flirting with the 70-80 dollars a barrel bandwidth, with a concomitant impact on oil company share prices.

Bond markets

Despite fears last summer of a hard landing, US economic growth is solid, with third-quarter GDP growth remaining close to 3%. The euro area economy may be creeping out of the doldrums, with estimates pointing to growth of 1.6% for the July-September period. The picture is currently one of modest growth everywhere in the world. Inflation is slowly approaching the targets set by the Fed and ECB.

In the US, the battle against inflation is moving in the right direction and the labour market is no longer overheating. Consequently, the Fed decided in September that there was room to cut rates for the first time in 14 months. The reference rate has since been cut by 1% to 4.25-4.5%. The ECB has already cut its deposit rates several times, reducing them by 1% during 2024 to their current level of 3%. Confidence that inflation is slowly easing towards 2% was confirmed. The heads of both central banks share the view that key rates are still restrictive, acting as a drag on the economy. They therefore expect further interest rate cuts to follow.

The last few months have seen big swings in bond yields. Investors were convinced that there was plenty of room for central banks to cut key rates. This fuelled a bond rally, especially between April and September. Following strong GDP figures and uncertainty around policy under Trump, investors have revised their expectations upwards for post-election key rates in the US due to fears of inflation rising again. This translated into a sharp climb in 10-year yields in the last quarter of 2024, especially in the US. Over the reporting period, the picture has been rather divided. Ten-year yields are about 0.69% higher in the US and only half of that figure – around 0.34% – higher in Germany.

The overall picture for bond investors has therefore been quite favourable, thanks to a combination of slightly falling interest rates in the euro area and investor appetite for higher-risk bond themes. Euro-denominated government bonds generated solid returns during the reporting period, with the reference index with a term to maturity of between one and five years gaining 2.85%, and a diversified basket of maturities posting returns of 1.78%. Investors assess the risk of recession as low, as a result of which the credit premium for euro-denominated corporate bonds issued by companies with strong balance sheets has fallen slightly. This had a positive impact on the total return of this theme, which came in at roughly 4.56%. Growth market bonds in local currency were up 3.47% (in euro terms). High-yield bonds had an even higher return at 8.58%.

Outlook

Economic context

Economic growth remained stronger than first thought in 2024, particularly in the US. Growth figures for the third quarter were also better than expected. The strong labour market is pushing up wages and increasing purchasing power for households. Productivity is increasing along with the population, due to immigration and other factors, while public spending and investment remain at high levels. A soft landing for the economy remains the baseline scenario: a gradual slowdown in the US in early 2025 followed by an acceleration in growth as the year progresses.

For Europe, by contrast, the picture has become somewhat more sombre since the election of President Trump II.

General inflation is now cooling, but core inflation remains stubbornly high. Some disappointing labour market figures in the US, combined with market turmoil in late July and early August, prompted the Federal Reserve to shift its stance and lower interest rates by a total of 100 basis points, while announcing a further interest rate cut of around 50 basis points by the end of 2025. Core inflation also remains high in Europe, forcing the European Central Bank (ECB) to strike a delicate balance between containing inflation (by keeping interest rates permanently high) and avoiding a recession (where it will have to cut interest rates if necessary). The ECB cut interest rates by 25 basis points in June, September, October and December, and may do so again in early 2025. This will further improve the investment climate.

Monetary policy

Both the ECB and the Fed have recently cut their key rates and further cuts are expected this year, with the market anticipating more rate cuts in both the euro area and the US. According to our economists' forecasts, there will be another four rate cuts in the euro area and three in the US by the end of 2025.

Currency markets

We are assuming a fairly flat USD for the rest of the year and are therefore neutral on the US dollar.

Financial markets

The risk of a deep recession seems off the table. The results from major technology companies propelled markets, but other sectors were not always able to match expectations. We are therefore now neutrally positioned in our share investments. We regularly make tactical switches to take advantage of the momentum.

Bond markets remain in the grip of interest rate movements, and have recently been particularly volatile as a result. The rapid fall in interest rates in the last two months of 2023 was followed by a slight rise in rates since the beginning of 2024, before another sudden dip during the summer. At year-end 2024, rates – long-term rates in particular – slowly began to rise again. Bonds are still offering attractive current returns, which can provide a useful buffer in an investment portfolio. This is enabling bonds to resume their role as a safe haven. Here again, we are maintaining a neutral stance, but are taking advantage of volatile interest rates to tactically shift the portfolio's remaining term to maturity.

As always, we are holding a limited cash position to respond to opportunities as they arise. Cash is currently also delivering a healthy net return.

Stock markets

Regional allocation

We are adopting a slightly overweight position in the US. The economy is still in good shape, which is also positive for US companies. The earnings season was also good in the third quarter of 2024 in the US, with earnings up around 9%, mainly driven by the technology sector. Trump's election as president will herald a return to an 'America first' policy, with lower taxes for US companies. We are maintaining a slightly underweight position in the euro area. The economy in the euro area is still struggling a bit more than in the US, and certain sectors are vulnerable to protectionism. In addition, we have a substantial position in small and medium-sized enterprises in the euro area. Given that these companies have somewhat lagged behind in recent years, a revaluation may be on the cards. Moreover, they are less export-oriented and, therefore, less vulnerable to protectionist measures. The expected further fall in key rates in the euro area should also provide support for these companies. Europe excluding the EMU is being bolstered by the increased presence of more defensive industries (like health care) as well as financials, leading us to recommend an overweight position for Europe excluding the EMU.

We are maintaining our underweight position in Emerging Asia, reflecting our negative view on China in particular. The Chinese economy continues to struggle with what is – by Chinese standards – weak economic growth. It has become clear over the last two years that the problems in the Chinese real estate sector have not yet been resolved. Limited demand, reflecting weak consumer and producer confidence, is actually leading to deflation (falling prices). This weakness is particularly noticeable in the manufacturing sector, mirroring the situation in the euro area and the US. Although the service sector is doing somewhat better, in September last year, the Chinese government announced new measures intended to stabilise real estate prices and boost confidence. This prompted a brief yet powerful rally in the Chinese stock markets. Trump's election as president is bad news; he has previously announced that China would be hit with import tariffs of up to 60%. Other Asian countries did manage to maintain fairly strong growth: the Indian economy remains in good shape, while growth also accelerated in South Korea. These countries also seem to be less affected by a Trump presidency.

Within Asia, we are also underweight in the Pacific region, which consists mainly of Japanese companies. Japan found itself in the eye of the storm for a moment as monetary policy became more stringent than anticipated and impacted the global trade in derivatives. In August, however, we saw a sharp increase in volatility both in the stock market and in the value of the currency, giving rise to doubts about the safety of the Japanese stock market. However, uncertainty in the region could increase with the election of President Trump. Japanese exporters could certainly be affected by this.

Sector allocation

Cyclical sectors

We are underweight in cyclical stocks. Economic figures on the manufacturing industry remain weak across the globe, and in the euro area in particular. The latest figures once again confirm this picture. Cyclical companies also posted less positive figures in the past quarter. A further structural recovery in corporate earnings and margins in cyclical sectors is needed for us to become positive again. We remain invested below the benchmark level for Industrials (such as capital goods and transport companies) but have moved to a slightly overweight position in Materials (chemicals and mining). These could benefit from stimulus measures in China and investment in the US.

We are recommending a more neutral position for the Consumer Discretionary sectors. Consumer confidence in the US remains ambiguous but is set to improve gradually on the back of lower inflation and mortgage rates. Corporate earnings reveal that US consumers are still spending their money but are becoming more price-conscious. Traditional retailers, such as DIY shops, stand to benefit from the lower interest rates. We are keeping the automotive sub-segment underweight due to fears of waning demand. Meanwhile, electric cars have entered a price war, which is not good for these companies' margins. We are somewhat less positive towards the European luxury sector, however. Demand remains quite weak after a few good years, and the Chinese stimulus package is targeted at struggling sectors such as real estate and infrastructure, rather than general consumption by the wealthy Chinese. In addition, the sector is vulnerable to import tariffs.

Defensive sectors

We are still focusing on defensive sectors, but not as much as before. Health Care is a defensive sector which is posting better-than-expected corporate earnings and where the risk of increased regulation in the US has eased. The flipside of that coin is that the new Trump administration may well set its sights on 'big Pharma'. We are overweighting companies in the health care sector, which on average perform better in an environment of weak economic growth. That is certainly still the case in Europe. We are overweighting the Medical Technology subsector: the outlook for these companies has improved thanks to the expected further cuts in interest rates and stronger margins.

We are maintaining our underweight recommendation for Consumer Staples. Food and beverage companies continue to struggle with margin pressure. Volumes are under pressure, while severe pricing pressure remains an issue and regulation could also be tightened up under the 'Make America Healthy Again' campaign. Manufacturers of household and personal products are facing similar problems. Retailers (underweight position) enjoyed a strong rally, but have become particularly expensive.

We recently increased our position in telecoms companies, the defensive arm of the Communication Services sector, as the earnings outlook for these companies is improving. Trump's election means reduced regulation in the US. While some consolidation through mergers and acquisitions is still possible, the sector will feel little impact from potential trade wars.

We are maintaining our structural underweighting of Utilities due to sustainability concerns.

Financials

We are optimistic towards the financial sector, both for insurance companies and banks. Interest margins remain high, and the expected movements of the yield curve will further reinforce this effect in the coming months. At sector level, we prefer US financials. The vulnerabilities of US banks seem to be over, so we have shifted our overweight position in European banks to US banks. These are cashing in on Trump's presidency, which promises deregulation, less supervision and lower taxes. We are also overweight in US asset managers and payment service providers.

Broad technology sector

We are positive towards the technology sector, which is heavily slanted towards America, with clear differences within industry segments. We are neutral towards the hardware subsector owing to the prospect of lower growth in the short term. On a positive note, the PC and laptop market seems to be bottoming out. We are maintaining an overweight stance on the semiconductor subsector. This segment is still quite expensive due to the strong AI- and ChatGPT-linked rally, but the long-term prospects seem favourable. Earnings at these companies are still consistently beating expectations. With their strong pricing power, we expect these companies to continue making higher profits for some time. We are overweight for software companies. The performance of a number of major players in the sector was somewhat disappointing over the third quarter of last year, but their future looks brighter. These growth stocks will generally also benefit from lower interest rates. We also take a positive view of media companies: this strongly Americanised consumer sector is quite expensive but has rock-solid fundamentals.

Real estate sector

Real estate companies have been under considerable pressure from higher interest rates for several years now. Meanwhile, central banks in Western countries are clearly indicating that they intend to cut interest rates. Although central banks influence short-term interest rates directly through key rates, we observe that long-term rates remain high, especially in the US. This continues to put pressure on this theme as it impacts the financing conditions for these companies. Consequently, there is enough reason to take a step back and reset the theme to neutral.

Energy (conventional portfolio)

For share investors with no specific sustainability preference, we are underweighting the Energy sector. The conflict in the Middle East has been pushing oil prices higher still since the start of the year, enabling these companies to rally nicely. The conflict is still ongoing, and could therefore create additional pressure on oil and gas prices in the event of further escalation. However, constantly changing economic prospects translate into highly fluctuating oil prices. Saudi Arabia stated recently that it would pump more oil to protect its market share, which testifies to the OPEC cartel's diminished effectiveness. Volatility remains high, making income streams for the sector highly variable as well.

Bond markets

Following a period of high inflation, the ECB's target of 2% is coming closer, but things are proving more difficult for the Fed. Economic growth forecasts point to continued weak growth in the euro area, while the solid GDP figures in the US are likely to ease back towards average growth. The policies of newly-elected President Trump are introducing uncertainty to the economic outlook. The question is when his programme could be implemented and to what extent. US import tariffs could weigh on growth in Europe. On the other hand counter-actions, with higher import tariffs being imposed by Europe, would fuel inflation in the euro area. Likely higher inflation under Trump could also affect central banks and bond yields in 2025.

After 14 months without a change to the key rate, there was room for the Fed to lower it in September. The reference rate has since been cut by 1% to 4.25%-4.5%. Yet monetary policy remains restrictive, putting a brake on the economy. Chairman Jerome Powell indicated in December that there were more uncertainties, with the projected inflation picture for 2025 deviating from the target. The Fed has become more cautious and needs better inflation data to push key rates down further. Following Trump's election victory, investors sharply adjusted their expectations for inflation, and consequently for key rates, compared to September: instead of a Fed rate of around 2.7% at the end of 2025, they are now targeting 3.9%. KBC is projecting rates to hit 3.625% by the end of 2025.

After an initial rate cut in June, the ECB cut interest rates several times by a total of 1%, taking deposit rates to their current level of 3%. Confidence that inflation is gradually slowing towards the 2% target was confirmed and lower interest rates were announced. ECB President Christine Lagarde stressed that monetary policy remains restrictive and is confident that the inflation targets are coming within reach. KBC expects deposit rates to hit 2% from mid-2025.

The normalisation of interest rates in 2022-2023 has made bonds an interesting proposition once again. KBC regards the likelihood of a recession as low, and we therefore prefer corporate bonds to government paper. Within the corporate bond segment, we mainly prefer blue-chip companies, though we are maintaining a small position in companies with weaker balance sheets. We are supplementing these investments to a limited extent with attractive yields in emerging markets, and where the investment framework allows we are also investing in US (government) bonds. Within EMU government bonds segment, we continue to underweight the peripheral countries and maintain a neutral stance on France.

Maturities have been regularly adjusted in recent months and this strategy is contributing to overall returns. After reducing maturities in late November and early December, the duration is now below the benchmark at the end of 2024. In early 2025, maturities were adjusted again and our investment horizon exceeds the benchmark.

1.3. Auditor's report

HORIZON NV

Auditor's report

For the year ended 31.12.2024

Statutory auditor's report to the shareholders' meeting of HORIZON NV for the year ended on 31 December 2024 – Annual Accounts

(Free translation)

In the context of the statutory audit of the annual accounts of HORIZON NV ("**COMPANY**"), we hereby submit our statutory audit report. This report includes our report on the annual accounts and the other legal and regulatory requirements. These parts should be considered as integral to the report.

We were appointed in our capacity as statutory auditor by the shareholders' meeting of 28 March 2024, in accordance with the proposal of the board of directors. Our mandate will expire on the date of the shareholders' meeting deliberating on the annual accounts for the year ending 31 December 2026. We have performed the statutory audit of the annual accounts of Horizon NV for 4 financial years.

Report on the annual accounts

Unqualified opinion

We have performed the statutory audit of the annual accounts of the Company, drafted in accordance with the financial reporting framework applicable in Belgium¹, which comprises the balance sheet as at 31 December 2024 and the income statement for the year then ended, as well as the explanatory notes. The annual accounts shows a balance sheet total of 30.024.311.558,23 EUR and the income statement shows a profit of 3.242.372.828,05 EUR.

In our opinion, the annual accounts give a true and fair view of the Company's net asset value and financial position as of 31 December 2024 and of its results for the year then ended, in accordance with the financial reporting framework applicable in Belgium.

Basis for the unqualified opinion

We conducted our audit in accordance with the International Standards on Auditing (ISA), as applicable in Belgium. Our responsibilities under those standards are further described in the section “Responsibilities of the statutory auditor for the audit of the annual accounts”. We have complied with all ethical requirements relevant to the statutory audit of the annual accounts in Belgium, including those regarding independence.

We have obtained from the board of directors and the company’s officials the explanations and information necessary for performing our audit.

We believe that the audit evidence obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of the board of directors for the preparation of the annual accounts

The board of directors is responsible for the preparation and fair presentation of the annual accounts in accordance with the financial reporting framework applicable in Belgium and for such internal control as the board of directors determines is necessary to enable the preparation of the annual accounts that are free from material misstatement, whether due to fraud or error.

In preparing the annual accounts, the board of directors is responsible for assessing the company’s ability to continue as a going concern, disclosing, as applicable, matters to be considered for going concern and using the going concern basis of accounting unless the board of directors either intends to liquidate the company or to cease operations, or has no realistic alternative but to do so.

Responsibilities of the statutory auditor for the audit of the annual accounts

Our objectives are to obtain reasonable assurance about whether the annual accounts as a whole are free from material misstatement, whether due to fraud or error, and to issue a statutory auditor’s report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISA will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these annual accounts.

During the performance of our audit, we comply with the legal, regulatory and normative framework as applicable to the audit of annual accounts in Belgium. The scope of the audit does neither comprise any assurance regarding the future viability of the Company nor regarding the efficiency or effectiveness demonstrated by the board of directors in the way that the Company’s business has been conducted or will be conducted.

As part of an audit in accordance with ISA, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- identify and assess the risks of material misstatement of the annual accounts, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from an error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control;
- obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the company’s internal control;
- evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the board of directors;

- conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our statutory auditor's report to the related disclosures in the annual accounts or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our statutory auditor's report. However, future events or conditions may cause the company to cease to continue as a going concern;
- evaluate the overall presentation, structure and content of the annual accounts, and whether the annual accounts represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, amongst other matters, the planned scope and timing of the audit and significant audit findings, if any, including any significant deficiencies in internal control that we might identify during our audit.

Other legal and regulatory requirements

Responsibilities of the board of directors

The board of directors is responsible for the preparation and the content of the directors' report on the annual accounts for maintaining the company's accounting records in compliance with the legal and regulatory requirements applicable in Belgium, as well as for the company's compliance with the Companies Code and the company's articles of association.

Responsibilities of the statutory auditor

As part of our mandate and in accordance with the Belgian standard complementary to the International Standards on Auditing (ISA) as applicable in Belgium, our responsibility is to verify, in all material respects, the director's report on the annual accounts and compliance with certain obligations referred to in the Code of Companies and associations and the articles of association, as well as to report on these matters.

Aspects regarding the directors' report

In our opinion, after performing the specific procedures on the annual report, the annual report is consistent with the annual accounts for that same year and has been established in accordance with the requirements of articles 3:5 and 3:6 of the Code of companies and associations.

In the context of our statutory audit of the annual accounts we are also responsible to consider, in particular based on information that we became aware of during the audit, if the annual report on the annual accounts is free of material misstatement, either by information that is incorrectly stated or otherwise misleading. In the context of the procedures performed, we are not aware of such material misstatement.

Statements regarding independence

Our audit firm and our network have not performed any prohibited services and our audit firm has remained independent from the company during the performance of our mandate.

Horizon NV

UCI set up in accordance with Belgian Law UCIT

Company number: BE0449.441.283

Other statements

- Without prejudice to certain formal aspects of minor importance, the accounting records are maintained in accordance with the legal and regulatory requirements applicable in Belgium.
- The appropriation of results proposed to the general meeting is in accordance with the relevant legal and regulatory requirements.
- Except for the non compliance with the deadlines for the convocation of the general shareholders' meeting, and the related documents to be transmitted, we do not have to report any transactions or decisions taken that are a breach to the Law on Companies and Associations.

1.6. Summary of recognition and valuation rules

1.6.1. Summary of the rules

Summary of the valuation rules pursuant to the Royal Decree of 10 November 2006 on the accounting, annual accounts and periodic reports of certain open-ended undertakings for collective investment.

The assets of the various sub-funds are valued as follows:

- When purchased or sold, securities, money market instruments, units in undertakings for collective investment and financial derivatives are recorded in the accounts at their acquisition price or sale price, respectively. Any additional expenses, such as trading and delivery costs, are charged directly to the profit and loss account.
- After initial recognition, securities, money market instruments and financial derivatives are measured at fair value on the basis of the following rules:
 - Securities that are traded on an active market without the involvement of third-party financial institutions are measured at fair value using the closing price;
 - Assets that have an active market which functions through third -party financial institutions that guarantee continuous bid and ask prices are measured using the current bid price set on that market. However, since most international benchmarks use mid-prices, and the data providers cannot supply bid prices (e.g., JP Morgan, iBoxx, MSCI, etc.), the midprices are used to measure debt instruments, as provided for in the Notes to the aforementioned Royal Decree. The method to correct these midprices and generate the bid price is not used, as it is not reliable enough and could result in major fluctuations.
 - Securities whose last known price is not representative and securities that are not admitted to official listing or admitted to another organised market are valued as follows:
 - 1 When measuring these securities at fair value, use is made of the current fair value of similar assets for which there is an active market, provided this fair value is adjusted to take account of the differences between the assets concerned.
 - 2 If no fair value for similar assets exists, the fair value is calculated on the basis of other valuation techniques which make maximum use of market data, which are consistent with generally accepted economic methods and which are verified and tested on a regular basis.
 - 3 If no organised or unofficial market exists for the assets being valued, account is also taken of the uncertain character of these assets, based on the risk that the counterparties involved might not meet their obligations.
 - Shares for which there is no organised or unofficial market, and whose fair value cannot be calculated reliably as set out above, are measured at cost. Impairment is applied to these shares if there are objective instructions to this end.
 - Units in undertakings for collective investment (for which there is no organised market) are measured at fair value using their last net asset value.
- Liquid assets, including assets on demand at credit institutions, obligations on current account vis-à-vis credit institutions, amounts payable and receivable in the short term that are not represented by negotiable securities or money market instruments (other than vis-à-vis credit institutions), tax assets and liabilities, are measured at nominal value. Other amounts receivable in the longer term that are not represented by negotiable securities are measured at fair value. Impairment is applied to assets, amounts to be received and receivables if there is uncertainty that they will be paid in full or in part at maturity, or if the realisation value of this asset is less than its acquisition value. Additional impairment is recorded on the assets, amounts to be received and receivables referred to in the previous paragraph to ensure that any change in their value, or risks inherent in the asset in question, are taken into account.
- The income generated by securities lending is recognised as other income (Income statement II.B.a.: Investment income and expenses – Interest – Securities and money market instruments) and is included on an accruals basis in the income statement over the term of the transaction.
- Securities issued in a currency other than that of the relevant sub-fund are converted into the currency of the sub-fund at the last known mid-market exchange rate.

In the case of sub-funds with equity/index linked, interest rate and inflation swaps structures, the bonds are valued by calculating the present value of projected payments on the basis of the risk-free yield curve. They may be marked down if payments in interest or principal are reduced, waived or deferred. The Board of Directors may then resolve to reduce the valuation described above or opt for a full mark-to-market valuation.

Differences

A minor difference may appear from time to time between the net asset value as published in the press and the net asset value shown in this report. These are minimal differences in the net asset value calculated that are identified after publication.

If these differences reach or exceed a certain tolerance limit, the difference will be compensated. For those buying or selling shares in the bevek and for the bevek itself, this tolerance limit will be a certain percentage of the net asset value and the net assets, respectively.

This tolerance limit is:

- money market funds: 0.25%
- bond funds, balanced funds and funds offering a capital guarantee: 0.50%
- equity funds: 1%
- other funds (real estate funds, etc.): 0.50%

1.7. Composition of the assets

To achieve their investment objectives, the sub-funds of the Bevek may invest in securities (including bonds and other debt instruments), money market instruments, units in collective investment undertakings, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable legislation and investment policy.

The financial mechanism used to achieve the capital protection at maturity or reaching a specified percentage compared with the initial subscription price at maturity entails investing the total amounts subscribed in bonds and other debt instruments, deposits and/or cash.

The deposits, bonds and other debt instruments must meet one of the following criteria:

- 1 An investment in deposits and/or debt instruments, placed with or issued by financial institutions under the prudential supervision of and established in a Member State of the European Economic Area.
- 2 Debt instruments issued or guaranteed by a Member State of the European Economic Area.
- 3 Investments with an analogous structure and identical counterparty risk as those referred to under (1) and (2) above.

These investments may involve an investment in exchange-listed notes issued by 18 Special Purpose Vehicles (SPVs).

These 18 SPVs were established under the sponsorship of KBC Asset Management NV and are managed by KBC Asset Management NV or one of its subsidiaries.

The underlying asset of the following 18 SPVs:

- Amethyst Structured Finance Plc
- Beechwood Structured Finance Plc
- Benbulbin Capital plc
- Eperon Finance Plc
- Espaccio Securities Plc
- Greenstreet Structured Financial Products Plc
- Ipanema Capital Plc
- Nimrod Capital Plc
- Opal Financial Products Plc
- Profile Finance Plc
- Recolte Securities Plc
- Silverstate Financial Investments Plc
- Vermillion Protective Bond Portfolio Plc
- Vespucci Structured Finance Products Plc
- Vigado Capital Plc
- Voyce Investments Plc
- Waterford Capital Investments Plc
- Waves Financial Investments Plc

consists of two diversified portfolios of deposits issued by financial institutions, bonds and other securities, the General Long Portfolio and the General Short Portfolio.

Further details of the criteria the underlying asset of these 18 SPVs must meet are provided in the base prospectuses for these SPVs, which can be viewed at or downloaded from <http://www.kbc.be/prospectus/spv>.

The composition of the assets of the SPVs discussed below have not been audited. The prospectus and audited annual report can be obtained free of charge from the offices of KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2. Information on Horizon 2030

2.1. Management report

2.1.1. Launch date and subscription price

Capitalisation

Launch date:	2 November 2015
Initial subscription price:	100 EUR
Currency:	EUR

2.1.2. Stock exchange listing

Not applicable.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main object of the sub-fund is to generate the highest possible return for its unit-holders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.
The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. **Consequently, there may be an impact on concentration risk.** Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

Horizon 2030 aims to generate as high a return as possible by investing, either directly or indirectly (e.g., via other UCIs), in various asset classes, such as shares and/or share-related investments, bonds and/or bond-related investments, money market instruments and cash.

A target allocation is applied to these assets, which changes over time. The weighting of the stock component is gradually reduced as the target date of 31 October 2030 approaches. This sub-fund is aimed at investors with an investment horizon corresponding to the target date.

The target allocation for the stock component is 25% plus (number of full years until target date) multiplied by 1.25% and, after the target date, always amounts to 25%. The target allocation for the bond component is 100% minus the target allocation for the stock component.

The target allocation of the asset classes can be substantially deviated from, including after the target date, based on changing market conditions. On the one hand, the manager can overweight the stock component by up to 25% above the target allocation. On the other, the manager may temporarily reduce the stock component to zero.

The manager will rearrange the weighting at least once a month:

- If the stock component has performed better than the bond component in the recent past, the share position will be increased.
- If the stock component has performed less well than the bond component in the recent past, the bond position will be increased.

The scale of this rearrangement will depend on the stability with which the difference in recent performance between the stock and bond components has come about.

The fund is actively managed without referring to any benchmark.

The stock component invests directly or indirectly in shares in accordance with the investment strategy for shares drawn up by KBC Asset Management NV, for which all regions, sectors and themes can be taken into consideration. (see www.kbc.be/investment-strategy)

The bond component invests directly or indirectly in bonds in accordance with the investment strategy for bonds drawn up by KBC Asset Management NV. (see www.kbc.be/investment-strategy)
For details of the bond component, please see the 'Characteristics of the bonds and debt instruments' section, below.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

Transparency of adverse sustainability impacts:

The sub-fund considers the principal adverse impacts of its investment decisions on sustainability factors ('PAI') as described by the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector ('SFDR').

The principal adverse impacts on sustainability factors were explicitly taken into account through the General exclusion policy. More information on the principal adverse impact indicators that are taken into account can be found at www.kbc.be/investment-legal-documents > General exclusion policy for conventional and Responsible Investing funds and www.kbc.be/investment-legal-documents > Exclusion policies for Responsible Investing funds.

In addition, the principal adverse impacts on sustainability factors were implicitly taken into account through the Proxy Voting and Engagement Policy of KBC Asset Management NV (more information can be found at www.kbc.be/investment-legal-documents > Retrospective Proxy Voting - overview > Proxy Voting and Engagement Policy).

Characteristics of the bonds and debt instruments

The sub-fund invests in bonds and debt instruments issued by both companies and public authorities.

The sub-fund invests directly and/or indirectly at least 50% of its assets in bonds and debt instruments

- in securities rated investment grade (at least BBB-/Baa3 for long-term debt, A3/F3/P3 for short-term debt) by at least one of the following rating agencies: Moody's Investors Service, Standard & Poor's or Fitch Ratings, and/or
- in government bonds issued in local currency or non-subordinated corporate bonds* which do not have a credit rating from the rating agencies mentioned above but the issuer of which has an investment grade rating by at least one of the rating agencies mentioned above, and/or
- in money market instruments whose issuer has an investment grade rating (minimum A3/F3/P3 for short-term debt) from at least one of the above rating agencies.

This means that the sub-fund may invest up to 50% of its assets invested in bonds and debt instruments that do not have a credit rating from the above-mentioned rating agencies and/or which do not comply with the above-mentioned credit requirements.

All maturities are taken into consideration in the selection of bonds and debt instruments.

*In the event of the bankruptcy of the relevant issuer, subordinated bonds are subordinated to the company's other debts: the company's other debts are paid first, then and only if there is still capital left, the holders of the subordinated bonds are fully or partially repaid; the holder of the subordinated bond does, however, have priority over the shareholders of the issuer in question.

Investments in assets other than securities or money market instruments

The sub-fund will invest primarily in units of undertakings for collective investment.

Securities Financing Transactions (SFTs)

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.1. Securities Financing Transactions (SFTs)'.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'.

2.1.4. Financial portfolio management

The intellectual management, with the exception of the creation of the sub-fund and its maintenance in terms of the technical, product-specific and legal aspects has been delegated by the management company to KBC Fund Management Limited, 4th Floor, Scotch House, 6/7 Burgh Quay, Dublin 2, D02 VK44, Ireland.

2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2.1.6. Index and benchmark

Not applicable.

2.1.7. Policy pursued during the financial year

Following weekly strategy of KBC AM

2.1.8. Future policy

Following weekly strategy of KBC AM

2.1.9. Summary risk indicator (SRI)

3 on a scale of 1 (lowest risk) to 7 (highest risk)

- a moderate level of inflation risk: the bond component does not provide any protection against an increase in inflation.

- a moderate level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a real chance that the value of an investment will be affected by movements in exchange rates.
 - a moderate level of credit risk: the bond component invests primarily - but not exclusively- in bonds with an investment grade rating. Consequently, the risk that an issuer can no longer meet its obligations is higher than in an investment that consists only of bonds with an investment grade rating. If investors are in doubt about the creditworthiness of the issuers of the bonds, the value of those bonds can fall.
 - a moderate level of market risk: the level of the risk reflects the volatility of the equity component.
 - a moderate level of performance risk: the level of the risk reflects the volatility of the equity component.
- There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

2.1.10. Leveraged finance

The total amount of leveraged finance used by the sub-fund is 576 690.33 EUR.

This amount was calculated by multiplying the leverage ratio calculated using the UCITS-commitment method by the sub-fund's total assets under management.

2.1.11. Value-at-Risk

The internal classification system, on the basis of which this sectoral spread is calculated, has been changed as of 31/12/2023. In order to provide a meaningful comparison of the sectoral spread across reporting periods, the sectoral spread calculations will be de-duplicated in the annual reports. This means that a summary table will be shown for each classification system.

Currency breakdown (as a % of net assets)

The currency distribution of the sub-fund's investments is calculated based on the currency distribution of the underlying investments of the UCIs in which the sub-fund invests (look through).

2.4.2. Changes in the composition of the assets of Horizon 2030 (in Euro)

	1 st half of year	2 nd half of year	Year
Purchases	20,211,692.87	11,800,711.15	32,012,404.02
Sales	21,591,125.72	12,938,756.18	34,529,881.89
Total 1	41,802,818.59	24,739,467.33	66,542,285.92
Subscriptions	571,712.90	518,839.05	1,090,551.95
Redemptions	1,717,333.88	1,184,918.38	2,902,252.26
Total 2	2,289,046.78	1,703,757.43	3,992,804.21
Monthly average of total assets	35,094,215.34	35,545,459.27	35,324,479.73
Turnover rate	112.59%	64.81%	177.07%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period. A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions.

A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio. Active asset management may result in high turnover rates (monthly percentage >50%), reason: The risk profile of the fund is moderate. During the seven months of the year, the weight of the equity asset class remained within the 48%-56% band. From August there was a drop in the Equity Allocation to an average of 42%, finishing up at end of December with 46% Equity 54% Fixed Income.

The detailed list of transactions can be consulted free of charge at the company designated as financial service: KBC Bank NV, Havenlaan 2, B-1080 Brussels

2.4.3. Amount of commitments in respect of financial derivatives positions

2.4.5. Performance figures

BE6279064602
Horizon 2030 CAP

Annual performance from 01/01/2016 through 31/12/2024 (in EUR)

Cap Div	ISIN Code	Currency	1 year		3 years		5 years		10 years		Since Launch*	
			Share classes	Bench mark	Share classes	Bench mark	Share classes	Bench mark	Share classes	Bench mark	Starting date	Share classes
CAP	BE6279064602	EUR	9.71%		0.25%		2.41%				02/11/2015	2.02%

Risk warning: Past performance is not a guide to future performance.

* Return on annual basis.

- The bar chart shows the performance for full financial years.
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage.
- Calculation method for date D, where NAV stands for net asset value:

Capitalisation units (CAP)

Return on date D over a period of X years :

$$[\text{NIW}(\text{D}) / \text{NIW}(\text{Y})] ^ {1 / \text{X}} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[\text{NIW}(\text{D}) / \text{NIW}(\text{S})] ^ {1 / \text{F}} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation shares.

2.4.6. Costs

Ongoing Charges:

Management fees and other administrative or operating costs: 1,729%

Transaction costs: 0,351%

Percentage calculated at reporting date: 31 December 2024 .

A more detailed explanation with respect to the method of calculating ongoing charges and the relevant exclusions can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.5. Ongoing charges'

Existence of Commission Sharing Agreements

Not applicable

Existence of fee sharing agreements and rebates

The management company has shared 53,25% of its fee with the distributor, and institutional and/or professional parties.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.6. Fee-sharing agreements and rebates'.

2.4.7. Notes to the financial statements and other data

Fee for managing the investment portfolio	Max 1.54%	<p>per yearcalculated on the basis of the average total net assets of the sub-fund.</p> <p>For the portion of net assets corresponding to an investment in undertakings for collective investment(*) managed by a financial institution belonging to the KBC group, the fee for managing the investment portfolio equals the difference between the fee for managing the investment portfolio of the aforementioned undertakings for collective investment and the percentage (to the left) that is paid for managing the investment portfolio.</p> <p>KBC Fund Management Limited receives a fee from the management company of max. 1,54% per year calculated on the basis of the average total net assets of the sub-fund, without the total fees and charges received by the management company being exceeded.</p> <p>(*) The fee for the management of the investment portfolio of the undertakings for collective investment in which the sub-fund invests will amount to a year.</p>
Administration fee	0.10%	per year calculated on the basis of the average total net assets of the sub-fund.
Fee for financial services	Max 950 EUR	per year. However, the fee will never exceed a maximum of 0.005% calculated on the basis of the average total net assets of the sub-fund.
Custodian's fee	Max 0.04%	per year and calculated monthly on the basis of the value of the securities held in custody by the custodian on the last banking day of the preceding month, except on those assets invested in underlying undertakings for collective Investment managed by a financial institution of the KBC group.
Fee paid to the bevek's statutory auditor	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Fee paid to the directors	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Annual tax	See prospectus General Part : 'Information concerning the Bevek - H. Tax treatment'	
Other charges (estimation)	0.10%	of the net assets of the sub-fund per year.

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

Financial derivatives on financial indices

The following financial indices were used as the underlying for financial derivatives::

The EURO STOXX 50® (Bloomberg code: SX5E Index) is a weighted equity index computed by Stoxx Ltd. The dividend is not reinvested. The main purpose of this index is to provide a continuous indication of market trends on the European stock markets. The base value of the index is 1000, calculated on the basis of the underlying prices recorded on 31 December 1991.

The Euro Stoxx 50® consists solely of shares from countries participating in the Economic and Monetary Union, with the exception of Luxembourg. On 10 April 1998, the following countries were included in the index: Belgium, Cyprus, Germany, Estonia, Finland, France, Greece, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, the Netherlands, Austria, Portugal, Slovakia, Slovenia and Spain.

The index consists of the 50 largest European shares in terms of shares that are freely negotiable, and the shares are accordingly weighted on the basis of this criterion.

The Euro Stoxx 50® is published daily in L'Echo, De Tijd, The Financial Times and The Wall Street Journal Europe.

Stoxx Limited has all proprietary rights with respect to the index. In no way Stoxx Limited endorses, sponsors or is otherwise involved in the issue and offering the shares of Horizon 2030. Stoxx Limited disclaims any liability for the issue and offering of the shares of this undertaking for collective investment.

The **S&P 500** is an equity index computed by Standard & Poor's that is made up of 500 shares. The dividend is not reinvested. The S&P 500 serves primarily as a continuous indicator of market trends on the US stock markets. The value of the S&P 500 index is calculated on the basis of the market value of the shares of 500 companies at a given point in time, compared to the market value of the shares of 500 similar companies during the reference period from 1941 to 1943. The index is published daily in L'Echo, De Tijd, The Financial Times and The Wall Street Journal Europe.

Standard & Poor's has all proprietary rights with respect to the index. In no way Standard & Poor's endorses, sponsors or is otherwise involved in the issue and offering the shares of this undertaking for collective investment. Standard & Poor's disclaims any liability for the issue and offering of the shares of this undertaking for collective investment.

The value and, if available for distribution, the composition of the aforementioned financial indices may be obtained from the branches providing the financial service.

2. Information on Horizon 2035

2.1. Management report

2.1.1. Launch date and subscription price

Capitalisation

Launch date:	2 November 2015
Initial subscription price:	100 EUR
Currency:	EUR

2.1.2. Stock exchange listing

Not applicable.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main object of the sub-fund is to generate the highest possible return for its unit-holders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.
The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. **Consequently, there may be an impact on concentration risk.** Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

Horizon 2035 aims to generate as high a return as possible by investing, either directly or indirectly (e.g., via other UCIs), in various asset classes, such as shares and/or share-related investments, bonds and/or bond-related investments, money market instruments and cash.

A target allocation is applied to these assets, which changes over time. The weighting of the stock component is gradually reduced as the target date of 31 October 2035 approaches. This sub-fund is aimed at investors with an investment horizon corresponding to the target date.

The target allocation for the stock component is 25% plus (number of full years until target date) multiplied by 1.25% and, after the target date, always amounts to 25%. The target allocation for the bond component is 100% minus the target allocation for the stock component.

The target allocation of the asset classes can be substantially deviated from, including after the target date, based on changing market conditions. On the one hand, the manager can overweight the stock component by up to 25% above the target allocation. On the other, the manager may temporarily reduce the stock component to zero.

The manager will rearrange the weighting at least once a month:

- If the stock component has performed better than the bond component in the recent past, the share position will be increased.

- If the stock component has performed less well than the bond component in the recent past, the bond position will be increased.

The scale of this rearrangement will depend on the stability with which the difference in recent performance between the stock and bond components has come about.

The fund is actively managed without referring to any benchmark.

The stock component invests directly or indirectly in shares in accordance with the investment strategy for shares drawn up by KBC Asset Management NV, for which all regions, sectors and themes can be taken into consideration. (see www.kbc.be/investment-strategy)

The bond component invests directly or indirectly in bonds in accordance with the investment strategy for bonds drawn up by KBC Asset Management NV. (see www.kbc.be/investment-strategy) For details of the bond component, please see the 'Characteristics of the bonds and debt instruments' section, below.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

Transparency of adverse sustainability impacts:

The sub-fund considered the principal adverse impacts of its investment decisions on sustainability factors ('PAI') as described by the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector ('SFDR').

The principal adverse impacts on sustainability factors were explicitly taken into account through the General exclusion policy. More information on the principal adverse impact indicators that are taken into account can be found at www.kbc.be/investment-legal-documents > General exclusion policy for conventional and Responsible Investing funds and www.kbc.be/investment-legal-documents > Exclusion policies for Responsible Investing funds.

In addition, the principal adverse impacts on sustainability factors were implicitly taken into account through the Proxy Voting and Engagement Policy of KBC Asset Management NV (more information can be found at www.kbc.be/investment-legal-documents > Retrospective Proxy Voting - overview > Proxy Voting and Engagement Policy).

Characteristics of the bonds and debt instruments

The sub-fund invests in bonds and debt instruments issued by both companies and public authorities.

The sub-fund invests directly and/or indirectly at least 50% of its assets in bonds and debt instruments

- in securities rated investment grade (at least BBB-/Baa3 for long-term debt, A3/F3/P3 for short-term debt) by at least one of the following rating agencies: Moody's Investors Service, Standard & Poor's or Fitch Ratings, and/or
- in government bonds issued in local currency or non-subordinated corporate bonds* which do not have a credit rating from the rating agencies mentioned above but the issuer of which has an investment grade rating by at least one of the rating agencies mentioned above, and/or
- in money market instruments whose issuer has an investment grade rating (minimum A3/F3/P3 for short-term debt) from at least one of the above rating agencies.

This means that the sub-fund may invest up to 50% of its assets invested in bonds and debt instruments that do not have a credit rating from the above-mentioned rating agencies and/or which do not comply with the above-mentioned credit requirements.

All maturities are taken into consideration in the selection of bonds and debt instruments.

*In the event of the bankruptcy of the relevant issuer, subordinated bonds are subordinated to the company's other debts: the company's other debts are paid first, then and only if there is still capital left, the holders of the subordinated bonds are fully or partially repaid; the holder of the subordinated bond does, however, have priority over the shareholders of the issuer in question.

Investments in assets other than securities or money market instruments

The sub-fund will invest primarily in units of undertakings for collective investment.

Securities Financing Transactions (SFTs)

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.1. Securities Financing Transactions (SFTs)'.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'.

2.1.4. Financial portfolio management

The intellectual management, with the exception of the creation of the sub-fund and its maintenance in terms of the technical, product-specific and legal aspects has been delegated by the management company to KBC Fund Management Limited, 4th Floor, Scotch House, 6/7 Burgh Quay, Dublin 2, D02 VK44, Ireland.

2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2.1.6. Index and benchmark

Not applicable.

2.1.7. Policy pursued during the financial year

Following weekly strategy of KBC AM

2.1.8. Future policy

Following weekly strategy of KBC AM

2.1.9. Summary risk indicator (SRI)

3 on a scale of 1 (lowest risk) to 7 (highest risk)

- a moderate level of inflation risk: the bond component does not provide any protection against an increase in inflation.

- a moderate level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a real chance that the value of an investment will be affected by movements in exchange rates.
 - a moderate level of credit risk: the bond component invests primarily - but not exclusively- in bonds with an investment grade rating. Consequently, the risk that an issuer can no longer meet its obligations is higher than in an investment that consists only of bonds with an investment grade rating. If investors are in doubt about the creditworthiness of the issuers of the bonds, the value of those bonds can fall.
 - a moderate level of market risk: the level of the risk reflects the volatility of the equity component.
 - a moderate level of performance risk: the level of the risk reflects the volatility of the equity component.
- There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

2.1.10. Leveraged finance

The total amount of leveraged finance used by the sub-fund is 286 612.75 EUR.

This amount was calculated by multiplying the leverage ratio calculated using the UCITS-commitment method by the sub-fund's total assets under management.

2.1.11. Value-at-Risk

The internal classification system, on the basis of which this sectoral spread is calculated, has been changed as of 31/12/2023. In order to provide a meaningful comparison of the sectoral spread across reporting periods, the sectoral spread calculations will be de-duplicated in the annual reports. This means that a summary table will be shown for each classification system.

Currency breakdown (as a % of net assets)

The currency distribution of the sub-fund's investments is calculated based on the currency distribution of the underlying investments of the UCIs in which the sub-fund invests (look through).

2.4.2. Changes in the composition of the assets of Horizon 2035 (in Euro)

	1 st half of year	2 nd half of year	Year
Purchases	9,128,580.62	6,596,765.86	15,725,346.48
Sales	9,454,025.06	7,179,508.82	16,633,533.88
Total 1	18,582,605.68	13,776,274.67	32,358,880.36
Subscriptions	588,644.72	316,795.92	905,440.64
Redemptions	700,823.88	771,694.93	1,472,518.81
Total 2	1,289,468.60	1,088,490.85	2,377,959.45
Monthly average of total assets	17,581,410.47	18,116,525.55	17.854.473.31
Turnover rate	98.36%	70.03%	167.92%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period. A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions.

A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio. Active asset management may result in high turnover rates (monthly percentage >50%), reason: The risk profile of the fund is moderate. During the seven months of the year, the weight of the equity asset class remained within the 57%-63.5% band. From August there was a drop in the Equity Allocation to an average of 50%, finishing up at end of December with 55% Equity 45% Fixed Income.

The detailed list of transactions can be consulted free of charge at the company designated as financial service: KBC Bank NV, Havenlaan 2, B-1080 Brussels

2.4.3. Amount of commitments in respect of financial derivatives positions

2023 - 12	16,929,496.98	111.55	
2024 - 12	18,264,936.18	124.20	

2.4.5. Performance figures

BE6279062580
Horizon 2035 CAP

Annual performance from 01/01/2016 through 31/12/2024 (in EUR)

Cap Div	ISIN Code	Currency	1 year		3 years		5 years		10 years		Since Launch*	
			Share classes	Bench mark	Share classes	Bench mark	Share classes	Bench mark	Share classes	Bench mark	Starting date	Share classes
CAP	BE6279062580	EUR	11.34%		0.72%		2.99%				02/11/2015	2.39%

Risk warning: Past performance is not a guide to future performance.

* Return on annual basis.

- The bar chart shows the performance for full financial years.
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage.
- Calculation method for date D, where NAV stands for net asset value:

Capitalisation units (CAP)

Return on date D over a period of X years :

$$[\text{NIW}(\text{D}) / \text{NIW}(\text{Y})] ^ {1 / \text{X}} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[\text{NIW}(\text{D}) / \text{NIW}(\text{S})] ^ {1 / \text{F}} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation shares.

2.4.6. Costs

Ongoing Charges:

Management fees and other administrative or operating costs: 1,745%

Transaction costs: 0,368%

Percentage calculated at reporting date: 31 December 2024 .

A more detailed explanation with respect to the method of calculating ongoing charges and the relevant exclusions can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.5. Ongoing charges'

Existence of Commission Sharing Agreements

Not applicable

Existence of fee sharing agreements and rebates

The management company has shared 54,58% of its fee with the distributor, and institutional and/or professional parties.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.6. Fee-sharing agreements and rebates'.

2.4.7. Notes to the financial statements and other data

Fee for managing the investment portfolio	Max 1.54%	<p>per yearcalculated on the basis of the average total net assets of the sub-fund.</p> <p>For the portion of net assets corresponding to an investment in undertakings for collective investment(*) managed by a financial institution belonging to the KBC group, the fee for managing the investment portfolio equals the difference between the fee for managing the investment portfolio of the aforementioned undertakings for collective investment and the percentage (to the left) that is paid for managing the investment portfolio.</p> <p>KBC Fund Management Limited receives a fee from the management company of max. 1,54% per year calculated on the basis of the average total net assets of the sub-fund, without the total fees and charges received by the management company being exceeded.</p> <p>(*) The fee for the management of the investment portfolio of the undertakings for collective investment in which the sub-fund invests will amount to a year.</p>
Administration fee	0.10%	per year calculated on the basis of the average total net assets of the sub-fund.
Fee for financial services	Max 950 EUR	per year. However, the fee will never exceed a maximum of 0.005% calculated on the basis of the average total net assets of the sub-fund.
Custodian's fee	Max 0.04%	per year and calculated monthly on the basis of the value of the securities held in custody by the custodian on the last banking day of the preceding month, except on those assets invested in underlying undertakings for collective Investment managed by a financial institution of the KBC group.
Fee paid to the bevek's statutory auditor	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Fee paid to the directors	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Annual tax	See prospectus General Part : 'Information concerning the Bevek - H. Tax treatment'	
Other charges (estimation)	0.10%	of the net assets of the sub-fund per year.

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

Financial derivatives on financial indices

The following financial indices were used as the underlying for financial derivatives::

The **S&P 500** is an equity index computed by Standard & Poor's that is made up of 500 shares. The dividend is not reinvested. The S&P 500 serves primarily as a continuous indicator of market trends on the US stock markets. The value of the S&P 500 index is calculated on the basis of the market value of the shares of 500 companies at a given point in time, compared to the market value of the shares of 500 similar companies during the reference period from 1941 to 1943. The index is published daily in L'Echo, De Tijd, The Financial Times and The Wall Street Journal Europe.

Standard & Poor's has all proprietary rights with respect to the index. In no way Standard & Poor's endorses, sponsors or is otherwise involved in the issue and offering of the shares of this undertaking for collective investment. Standard & Poor's disclaims any liability for the issue and offering of the shares of this undertaking for collective investment.

The value and, if available for distribution, the composition of the aforementioned financial indices may be obtained from the branches providing the financial service.

2. Information on Horizon 2040

2.1. Management report

2.1.1. Launch date and subscription price

Capitalisation

Launch date:	2 November 2015
Initial subscription price:	100 EUR
Currency:	EUR

2.1.2. Stock exchange listing

Not applicable.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main object of the sub-fund is to generate the highest possible return for its unit-holders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.
The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. **Consequently, there may be an impact on concentration risk.** Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

Horizon 2040 aims to generate as high a return as possible by investing, either directly or indirectly (e.g., via other UCIs), in various asset classes, such as shares and/or share-related investments, bonds and/or bond-related investments, money market instruments and cash.

A target allocation is applied to these assets, which changes over time. The weighting of the stock component is gradually reduced as the target date of 31 October 2040 approaches. This sub-fund is aimed at investors with an investment horizon corresponding to the target date.

The target allocation for the stock component is 25% plus (number of full years until target date) multiplied by 1.25% and, after the target date, always amounts to 25%. The target allocation for the bond component is 100% less the target allocation for the stock component.

The target allocation of the asset classes can be substantially deviated from, including after the target date, based on changing market conditions. On the one hand, the manager can overweight the stock component by up to 25% above the target allocation. On the other, the manager may temporarily reduce the stock component to zero.

The manager will rearrange the weighting at least once a month:

- If the stock component has performed better than the bond component in the recent past, the share position will be increased.

- If the stock component has performed less well than the bond component in the recent past, the bond position will be increased.

The scale of this rearrangement will depend on the stability with which the difference in recent performance between the stock and bond components has come about.

The fund is actively managed without referring to any benchmark.

The stock component invests directly or indirectly in shares in accordance with the investment strategy for shares drawn up by KBC Asset Management NV, for which all regions, sectors and themes can be taken into consideration. (see www.kbc.be/investment-strategy)

The bond component invests directly or indirectly in bonds in accordance with the investment strategy for bonds drawn up by KBC Asset Management NV. (see www.kbc.be/investment-strategy)
For details of the bond component, please see the 'Characteristics of the bonds and debt instruments' section, below.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

Transparency of adverse sustainability impacts:

The sub-fund considers the principal adverse impacts of its investment decisions on sustainability factors ('PAI') as described by the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector ('SFDR').

The principal adverse impacts on sustainability factors were explicitly taken into account through the General exclusion policy. More information on the principal adverse impact indicators that are taken into account can be found at www.kbc.be/investment-legal-documents > General exclusion policy for conventional and Responsible Investing funds and www.kbc.be/investment-legal-documents > Exclusion policies for Responsible Investing funds.

In addition, the principal adverse impacts on sustainability factors were implicitly taken into account through the Proxy Voting and Engagement Policy of KBC Asset Management NV (more information can be found at www.kbc.be/investment-legal-documents > Retrospective Proxy Voting - overview > Proxy Voting and Engagement Policy).

Characteristics of the bonds and debt instruments

The sub-fund invests in bonds and debt instruments issued by both companies and public authorities.

The sub-fund invests directly and/or indirectly at least 50% of its assets in bonds and debt instruments

- in securities rated investment grade (at least BBB-/Baa3 for long-term debt, A3/F3/P3 for short-term debt) by at least one of the following rating agencies: Moody's Investors Service, Standard & Poor's or Fitch Ratings, and/or
- in government bonds issued in local currency or non-subordinated corporate bonds* which do not have a credit rating from the rating agencies mentioned above but the issuer of which has an investment grade rating by at least one of the rating agencies mentioned above, and/or
- in money market instruments whose issuer has an investment grade rating (minimum A3/F3/P3 for short-term debt) from at least one of the above rating agencies.

This means that the sub-fund may invest up to 50% of its assets invested in bonds and debt instruments that do not have a credit rating from the above-mentioned rating agencies and/or which do not comply with the above-mentioned credit requirements.

All maturities are taken into consideration in the selection of bonds and debt instruments.

*In the event of the bankruptcy of the relevant issuer, subordinated bonds are subordinated to the company's other debts: the company's other debts are paid first, then and only if there is still capital left, the holders of the subordinated bonds are fully or partially repaid; the holder of the subordinated bond does, however, have priority over the shareholders of the issuer in question.

Investments in assets other than securities or money market instruments

The sub-fund will invest primarily in units of undertakings for collective investment.

Securities Financing Transactions (SFTs)

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.1. Securities Financing Transactions (SFTs)'.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'.

2.1.4. Financial portfolio management

The intellectual management, with the exception of the creation of the sub-fund and its maintenance in terms of the technical, product-specific and legal aspects has been delegated by the management company to KBC Fund Management Limited, 4th Floor, Scotch House, 6/7 Burgh Quay, Dublin 2, D02 VK44, Ireland.

2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2.1.6. Index and benchmark

Not applicable.

2.1.7. Policy pursued during the financial year

Following weekly strategy of KBC AM

2.1.8. Future policy

Following weekly strategy of KBC AM.

The **Horizon 2040 Cap** will merge with the **Horizon KBC Dynamic Balanced Responsible Investing**.

2.1.9. Summary risk indicator (SRI)

3 on a scale of 1 (lowest risk) to 7 (highest risk)

- a moderate level of inflation risk: the bond component does not provide any protection against an increase in inflation.
- a moderate level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a real chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of credit risk: the bond component invests primarily - but not exclusively- in bonds with an investment grade rating. Consequently, the risk that an issuer can no longer meet its obligations is higher than in an investment that consists only of bonds with an investment grade rating. If investors are in doubt about the creditworthiness of the issuers of the bonds, the value of those bonds can fall.
- a moderate level of market risk: the level of the risk reflects the volatility of the equity component.
- a moderate level of performance risk: the level of the risk reflects the volatility of the equity component.

There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

2.1.10. Leveraged finance

The total amount of leveraged finance used by the sub-fund is 0.00 EUR.

This amount was calculated by multiplying the leverage ratio calculated using the UCITS-commitment method by the sub-fund's total assets under management.

2.1.11. Value-at-Risk

Not applicable

2.2. Balance sheet

The internal classification system, on the basis of which this sectoral spread is calculated, has been changed as of 31/12/2023. In order to provide a meaningful comparison of the sectoral spread across reporting periods, the sectoral spread calculations will be de-duplicated in the annual reports. This means that a summary table will be shown for each classification system.

Currency breakdown (as a % of net assets)

The currency distribution of the sub-fund's investments is calculated based on the currency distribution of the underlying investments of the UCIs in which the sub-fund invests (look through).

2.4.2. Changes in the composition of the assets of Horizon 2040 (in Euro)

	1 st half of year	2 nd half of year	Year
Purchases	8,009,016.79	7,188,923.43	15,197,940.22
Sales	8,487,917.95	7,565,396.18	16,053,314.12
Total 1	16,496,934.74	14,754,319.61	31,251,254.34
Subscriptions	447,045.40	432,645.37	879,690.77
Redemptions	743,399.51	689,262.50	1,432,662.01
Total 2	1,190,444.91	1,121,907.87	2,312,352.78
Monthly average of total assets	17,494,646.74	18,155,494.88	17.831.869.66
Turnover rate	87.49%	75.09%	162.29%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period.

A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions.

A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio.

Active asset management may result in high turnover rates (monthly percentage >50%), reason: The risk profile of the fund is moderate. During the seven months of the year, the weight of the equity asset class remained within the 57%-69.7% band. From August there was a drop in the Equity Allocation to an average of 58%, finishing up at end of December with 62% Equity 38% Fixed Income.

The detailed list of transactions can be consulted free of charge at the company designated as financial service:
KBC Bank NV, Havenlaan 2, B-1080 Brussels

2.4.3. Amount of commitments in respect of financial derivatives positions

2.4.5. Performance figures

BE6279061574
Horizon 2040 CAP

Annual performance from 01/01/2016 through 31/12/2024 (in EUR)

Cap Div	ISIN Code	Curr ency	1 year		3 years		5 years		10 years		Since Launch*	
			Share classes	Bench mark	Share classes	Bench mark	Share classes	Bench mark	Share classes	Bench mark	Starting date	Share classes
CAP	BE6279061574	EUR	12.83%		1.15%		3.50%				02/11/2015	2.80%

Risk warning: Past performance is not a guide to future performance.

* Return on annual basis.

- The bar chart shows the performance for full financial years.
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage.
- Calculation method for date D, where NAV stands for net asset value:

Capitalisation units (CAP)

Return on date D over a period of X years :

$$[\text{NIW}(\text{D}) / \text{NIW}(\text{Y})] ^ {1 / \text{X}} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[\text{NIW}(\text{D}) / \text{NIW}(\text{S})] ^ {1 / \text{F}} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation shares.

2.4.6. Costs

Ongoing Charges:

Management fees and other administrative or operating costs: 1,758%

Transaction costs: 0,379%

Percentage calculated at reporting date: 31 December 2024 .

A more detailed explanation with respect to the method of calculating ongoing charges and the relevant exclusions can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.5. Ongoing charges'

Existence of Commission Sharing Agreements

Not applicable

Existence of fee sharing agreements and rebates

The management company has shared 52,98% of its fee with the distributor, and institutional and/or professional parties.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.6. Fee-sharing agreements and rebates'.

2.4.7. Notes to the financial statements and other data

Fee for managing the investment portfolio	Max 1.54%	<p>per yearcalculated on the basis of the average total net assets of the sub-fund.</p> <p>For the portion of net assets corresponding to an investment in undertakings for collective investment(*) managed by a financial institution belonging to the KBC group, the fee for managing the investment portfolio equals the difference between the fee for managing the investment portfolio of the aforementioned undertakings for collective investment and the percentage (to the left) that is paid for managing the investment portfolio.</p> <p>KBC Fund Management Limited receives a fee from the management company of max. 1,54% per year calculated on the basis of the average total net assets of the sub-fund, without the total fees and charges received by the management company being exceeded.</p> <p>(*) The fee for the management of the investment portfolio of the undertakings for collective investment in which the sub-fund invests will amount to a year.</p>
Administration fee	0.10%	per year calculated on the basis of the average total net assets of the sub-fund.
Fee for financial services	Max 950 EUR	per year. However, the fee will never exceed a maximum of 0.005% calculated on the basis of the average total net assets of the sub-fund.
Custodian's fee	Max 0.04%	per year and calculated monthly on the basis of the value of the securities held in custody by the custodian on the last banking day of the preceding month, except on those assets invested in underlying undertakings for collective Investment managed by a financial institution of the KBC group.
Fee paid to the bevek's statutory auditor	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Fee paid to the directors	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Annual tax	See prospectus General Part : 'Information concerning the Bevek - H. Tax treatment'	
Other charges (estimation)	0.10%	of the net assets of the sub-fund per year.

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

2.1.2. Stock exchange listing

Not applicable.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. **Consequently, there may be an impact on concentration risk.** Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

The sub-fund's portfolio is managed passively. More information with respect to this can be found under the 'Benchmark-tracking' title.

The assets are invested primarily, directly or indirectly, in Chinese A shares of companies included in the MSCI CHINA A INTERNATIONAL Net Return Index.

A shares are shares of Chinese companies listed on the Shanghai or Shenzhen stock exchange in the local currency (renminbi).

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

Transparency of adverse sustainability impacts:

The sub-fund considers the principal adverse impacts of its investment decisions on sustainability factors ('PAI') as described by the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector ('SFDR'), within the limited limits inherent to passive management, through the general exclusion policy and the Proxy Voting and Engagement Policy.

In particular, the sub-fund took into account exposure to controversial weapons ('indicator 14') by excluding companies involved in controversial weapon systems.

In addition, the principal adverse impacts on sustainability factors were implicitly taken into account within the limited limits inherent to passive management through the Proxy Voting and Engagement Policy of KBC Asset Management NV (more information can be found at www.kbc.be/investment-legal-documents > Retrospective Proxy Voting - overview > Proxy Voting and Engagement Policy).

Benchmark-tracking

The objective of the sub-fund is to track the composition of an benchmark in accordance with and within the limits of Article 63 of the Royal Decree of 12 November 2012 on undertakings for collective investment complying with the conditions of Directive 2009/65/EC.

Benchmark(s) in question: MSCI China A International Net Return Index. Additional information on this benchmark and its composition is available at www.msci.com.

Benchmark(s) tracking method: physical replication using optimised sampling: the benchmark is tracked using a selection of shares in the benchmark in order to best replicate the benchmark. In addition, an optimisation algorithm is used that balances the risk and the return of each of the portfolio positions, so optimising the selection. The sub-fund may also make limited use of synthetic replication by way of futures, primarily in order to cushion the effects of buying and selling and to avoid the attendant transaction charges.

The benchmark is rebalanced every quarter. The more often an benchmark is rebalanced, the greater the potential

impact on the transaction charges within the sub-fund.

Given normal market conditions, the expected tracking error is between 0% and 2%. Possible causes of this tracking error could be the method used to track the benchmark, transaction charges, dividend reinvestment, the general costs charged to the sub-fund, any income from lending financial instruments and the use of Depository Receipts.

If the composition of the benchmark is no longer sufficiently diversified or if the benchmark is no longer sufficiently representative of the market it relates to or if the value and composition of the benchmark is no longer published in a suitable manner, the management company will inform the Board of Directors without delay. The Board of Directors will consider what action to take in the interest of investors and may convene a general meeting of shareholders in order to amend the investment policy.

This fund is not sponsored, endorsed, sold or promoted by MSCI INC. ('MSCI'), any of its affiliates, any of its information providers or any other third party involved in, or related to, compiling, computing or creating any MSCI index (collectively, the 'MSCI parties'). None of the MSCI parties makes any representation or warranty, express or implied, to the issuer or owners of this fund or any other person or entity regarding the advisability of investing in funds generally or in this fund particularly or the ability of any MSCI index to track corresponding stock market performance. MSCI or its affiliates are the licensors of certain trademarks, service marks and trade names and of the MSCI indexes which are determined, composed and calculated by MSCI without regard to this fund or the issuer or owners of this fund or any other person or entity. None of the MSCI parties has any obligation to take the needs of the issuer or owners of this fund or any other person or entity into consideration in determining, composing or calculating the MSCI indexes. None of the MSCI parties is responsible for or has participated in the determination of the timing of, prices at, or quantities of this fund to be issued or in the determination or calculation of the equation by or the consideration into which this fund is redeemable. Further, none of the MSCI parties has any obligation or liability to the issuer or owners of this fund or any other person or entity in connection with the administration, marketing or offering of this fund.

Although MSCI shall obtain information for inclusion in or for use in the calculation of the MSCI indexes from sources that MSCI considers reliable, none of the MSCI parties warrants or guarantees the originality, accuracy and/or the completeness of any MSCI index or any data included therein. None of the MSCI parties makes any warranty, express or implied, as to results to be obtained by the issuer of the fund, owners of the fund, or any other person or entity, from the use of any MSCI index or any data included therein. None of the MSCI parties shall have any liability for any errors, omissions or interruptions of or in connection with any MSCI index or any data included therein. Further, none of the MSCI parties makes any express or implied warranties of any kind, and the MSCI parties hereby expressly disclaim all warranties of merchantability and fitness for a particular purpose, with respect to each MSCI index and any data included therein. Without limiting any of the foregoing, in no event shall any of the MSCI parties have any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages.

No purchaser, seller or holder of this fund, or any other person or entity, should use or refer to any MSCI trade name, trademark or service mark to sponsor, endorse, market or promote this fund without first contacting MSCI to determine whether MSCI's permission is required. Under no circumstances may any person or entity claim any affiliation with MSCI without the prior written permission of MSCI.

Volatility of the net asset value

The volatility of the net asset value may be high due to the composition of the portfolio.

Securities Financing Transactions (SFTs)

A more detailed explanation can be found in this report's General information on the Beveik under 'Information for shareholders – 1.2.1.1. Securities Financing Transactions (SFTs)'.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Beveik under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Beveik under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'.

2.1.4. Financial portfolio management

There is no delegation of the management of the asset allocation.

2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2.1.6. Index and benchmark

Tracking error and annual tracking difference for the Capitalisation share (ISIN-code: BE0948467015) calculated in the currency of the share.

Annual tracking difference: -1.59%

The annual tracking difference is the difference between the return of the unit in question and the return of its benchmark index over the financial year.

Tracking error: 0,64%

The tracking error is the annualised volatility of the differences between the daily returns of the unit in question and those of the benchmark index.

The Tracking error does not exceed the threshold.

Tracking error and annual tracking difference for the Distribution share (ISIN-code: BE0948466975) calculated in the currency of the share.

Annual tracking difference: -1.61%

The annual tracking difference is the difference between the return of the unit in question and the return of its benchmark index over the financial year.

Tracking error: 0,64%

The tracking error is the annualised volatility of the differences between the daily returns of the unit in question and those of the benchmark index.

The Tracking error does not exceed the threshold.

Tracking error and annual tracking difference for the Capitalisation share (ISIN-code: BE6228533665) calculated in the currency of the share.

Annual tracking difference: -0.42%

The annual tracking difference is the difference between the return of the unit in question and the return of its benchmark index over the financial year.

Tracking error: 0,64%

The tracking error is the annualised volatility of the differences between the daily returns of the unit in question and those of the benchmark index.

The Tracking error does not exceed the threshold.

Tracking error and annual tracking difference for the Capitalisation share (ISIN-code: BE6348029586) calculated in the currency of the share.

Annual tracking difference: % is shown where it relates to a period of at least one year.

The annual tracking difference is the difference between the return of the unit in question and the return of its benchmark index over the financial year.

Tracking error: is shown where it relates to a period of at least one year.

The tracking error is the annualised volatility of the differences between the daily returns of the unit in question and those of the benchmark index.

The Tracking error cannot be calculated yet because the share is less than a year old.

2.1.7. Policy pursued during the financial year

In line with the defined strategy, the fund was and is invested in a selection of China A shares listed on the Shanghai and Shenzhen exchanges.

2.1.8. Future policy

We refer to the General information on the SICAV of this report under '1.2.2. General overview of the markets' for an overview of the outlook.

2.1.9. Summary risk indicator (SRI)

Classic Shares: 5 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the US Dollar, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of risk dependent on external factors: there is uncertainty about the Chinese regulatory framework. As the Chinese A shares listed on the Shanghai and Shenzhen Stock Connect Exchanges will be traded via the Hong Kong Stock Exchange, there may be closing days that are not closing days on the Shanghai and Shenzhen exchanges. On these days, the subfund may temporarily deviate from the reference index.
- a high level of concentration risk: there is a concentration of the investments in shares of Chinese companies.
- a moderate level of liquidity risk: since there will be invested in the shares of companies from emerging

- economies, there is a risk that a position cannot be sold quickly at a reasonable price.
 - a high level of market risk: the level of the risk reflects the volatility of the stock market.
 - a high level of performance risk: the level of the risk reflects the volatility of the stock market.
- There is no capital protection.

Institutional B Shares: 5 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the US Dollar, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
 - a moderate level of risk dependent on external factors: there is uncertainty about the Chinese regulatory framework. As the Chinese A shares listed on the Shanghai and Shenzhen Stock Connect Exchanges will be traded via the Hong Kong Stock Exchange, there may be closing days that are not closing days on the Shanghai and Shenzhen exchanges. On these days, the subfund may temporarily deviate from the reference index.
 - a high level of concentration risk: there is a concentration of the investments in shares of Chinese companies.
 - a moderate level of liquidity risk: since there will be invested in the shares of companies from emerging economies, there is a risk that a position cannot be sold quickly at a reasonable price.
 - a high level of market risk: the level of the risk reflects the volatility of the stock market.
 - a high level of performance risk: the level of the risk reflects the volatility of the stock market.
- There is no capital protection.

Institutional Discretionary Shares: 5 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the US Dollar, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
 - a moderate level of risk dependent on external factors: there is uncertainty about the Chinese regulatory framework. As the Chinese A shares listed on the Shanghai and Shenzhen Stock Connect Exchanges will be traded via the Hong Kong Stock Exchange, there may be closing days that are not closing days on the Shanghai and Shenzhen exchanges. On these days, the subfund may temporarily deviate from the reference index.
 - a high level of concentration risk: there is a concentration of the investments in shares of Chinese companies.
 - a moderate level of liquidity risk: since there will be invested in the shares of companies from emerging economies, there is a risk that a position cannot be sold quickly at a reasonable price.
 - a high level of market risk: the level of the risk reflects the volatility of the stock market.
 - a high level of performance risk: the level of the risk reflects the volatility of the stock market.
- There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

2.1.10. Leveraged finance

The total amount of leveraged finance used by the sub-fund is 0.00 USD.

This amount was calculated by multiplying the leverage ratio calculated using the UCITS-commitment method by the sub-fund's total assets under management.

2.1.11. Value-at-Risk

Not applicable

2.2. Balance sheet

Balance sheet layout		31/12/2024 (in American dollar)	31/12/2023 (in American dollar)

The internal classification system, on the basis of which this sectoral spread is calculated, has been changed as of 31/12/2023. In order to provide a meaningful comparison of the sectoral spread across reporting periods, the sectoral spread calculations will be de-duplicated in the annual reports. This means that a summary table will be shown for each classification system.

2.4.2. Changes in the composition of the assets of Horizon Access Fund China (in American dollar)

	1 st half of year	2 nd half of year	Year
Purchases	5,274,096.87	3,676,123.05	8,950,219.91
Sales	8,099,464.19	6,219,547.55	14,319,011.74
Total 1	13,373,561.06	9,895,670.60	23,269,231.65
Subscriptions	4,083,604.89	3,827,656.88	7,911,261.77
Redemptions	6,630,301.80	6,715,484.90	13,345,786.70
Total 2	10,713,906.69	10,543,141.78	21,257,048.47
Monthly average of total assets	51,681,856.65	52,149,106.78	51,923,537.75
Turnover rate	5.15%	-1.24%	3.88%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period.

A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions.

A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio. Active asset management may result in high turnover rates (monthly percentage >50%).

The detailed list of transactions can be consulted free of charge at the company designated as financial service:
KBC Bank NV, Havenlaan 2, B-1080 Brussels

2.4.3. Amount of commitments in respect of financial derivatives positions

Nil

2.4.4. Changes in the number of subscriptions and redemptions and the net asset value

Risk warning: Past performance is not a guide to future performance.

* Return on annual basis.

Classic Shares

- The bar chart shows the performance for full financial years.
- The figures do not take account of any restructuring..
- Calculated in USD and in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage. In the case of units that pay dividends, the dividend is incorporated geometrically in the return.
- Calculation method for date D, where NAV stands for net asset value:

Capitalisation units (CAP)

Return on date D over a period of X years :

$$[\text{NIW}(D) / \text{NIW}(Y)]^{[1 / X] - 1}$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[\text{NIW}(D) / \text{NIW}(S)]^{[1 / F] - 1}$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

Distribution units (DIV)

Return on date D over a period of X years :

$$[C * \text{NIW}(D) / \text{NIW}(Y)]^{[1 / X] - 1}$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[C * \text{NIW}(D) / \text{NIW}(S)]^{[1 / F] - 1}$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

where C is a factor that is determined for all N dividends between the calculation date D and the reference date.

For dividend i on date Di with value Wi:

$$C_i = [\text{Wi} / \text{NIW}(D_i)] + 1$$

i = 1 ... N

from which C = C0 * * CN.

- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation and distribution shares

Dividend on ex-dividend date 28/03/2025: 14,3231 net (20,4616 gross).

Institutional B Shares

Fee for financial services	Max 950 EUR	per year. However, the fee will never exceed a maximum of 0.005% calculated on the basis of the average total net assets of the sub-fund.
Custodian's fee	Max 0.08%	per year and calculated monthly on the basis of the value of the securities held in custody by the custodian on the last banking day of the preceding month, except on those assets invested in underlying undertakings for collective Investment managed by a financial institution of the KBC group.
Fee paid to the bevek's statutory auditor	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Fee paid to the directors	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Annual tax	See prospectus General Part : 'Information concerning the Bevek - H. Tax treatment'	
Other charges (estimation) such as the regulator's fees, the cost of publication and any marketing costs	0.10%	of the net assets of the sub-fund per year.

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. **Consequently, there may be an impact on concentration risk.** Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

The sub-fund's portfolio is managed passively. More information with respect to this can be found under the 'Benchmark-tracking' title. The assets are invested primarily in equities (or equity-related investments) figuring in the MSCI India Net Return Index.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

Transparency of adverse sustainability impacts:

The sub-fund considered the principal adverse impacts of its investment decisions on sustainability factors ('PAI') as described by the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector ('SFDR'), within the limited limits inherent to passive management, through the general exclusion policy and the Proxy Voting and Engagement Policy.

In particular, the sub-fund took into account exposure to controversial weapons ('indicator 14') by excluding companies involved in controversial weapon systems.

In addition, the principal adverse impacts on sustainability factors were implicitly taken into account within the limited limits inherent to passive management through the Proxy Voting and Engagement Policy of KBC Asset Management NV (more information can be found at www.kbc.be/investment-legal-documents > Retrospective Proxy Voting - overview > Proxy Voting and Engagement Policy).

Benchmark-tracking

The object of the sub-fund is to track the composition of a benchmark within the meaning and limits of Article 63 of the Royal Decree of 12 November 2012 with respect to collective investment that meet the conditions of Directive 2009/65/EC.

Benchmark(s) in question: MSCI India Net Return Index. Additional information on this benchmark and its composition is available at: www.msci.com.

Method used to track the benchmark(s): physical replication based on full replication: The manager aims to include each share that forms a part of the benchmark in the sub-fund's investment portfolio, whereby each share is given the same weighting as it has in the benchmark. However, the manager retains the freedom to deviate slightly from the benchmark. Reasons for this may include: regulatory restrictions, limited liquidity of shares included in the benchmark, the restrictions mentioned in the 'Information concerning the Beveik – E. Social, ethical and environmental aspects'. The sub-fund may also make limited use of synthetic replication by way of futures, primarily in order to cushion the effects of buying and selling, and to avoid the attendant transaction charges.

The benchmark is re-balanced every quarter. The more often the sub-fund is re-balanced, the greater the potential impact on transaction charges within the sub-fund.

The anticipated tracking error under normal market conditions is between 0% and 2%. Other possible causes of tracking error may be: the method used to track the benchmark, transaction charges, reinvestment of dividends, general costs borne by the sub-fund, any income from loans of financial instruments and the use of Depositary Receipts.

Where the benchmark's composition is not sufficiently diversified, where the benchmark is insufficiently representative of the market to which it relates or where the benchmark's value and composition are no longer adequately communicated, the management company must immediately notify the Board of Directors. They will examine what measures to take in investors' interests and may, if required, call a General Meeting to change the investment policy.

This sub-fund is not sponsored, endorsed, sold or promoted by MSCI INC. ('MSCI'), any member company of its group or any of its data providers or by any other third party that is engaged or participates in the collation, calculation or creation of MSCI indexes (collectively, the 'MSCI parties'). The MSCI indexes are the exclusive property of MSCI. MSCI and the names of MSCI indexes are service marks owned by MSCI or members of its group and have been authorised for use in certain cases by KBC Asset Management. None of the MSCI parties makes any express or implied warranty or representation to the issuer, sub-fund unit holders or any other party or entity concerning the advisability of investing in funds in general or in this sub-fund in particular or concerning the MSCI index's ability to track the performance of the stock market in question. MSCI or its affiliates are the holders under licence of certain trading names, service marks and registered trademarks and

of the MSCI indexes, which are determined, composed and calculated by MSCI without regard to this sub-fund, the issuer or holders of units in this sub-fund or any other party or entity. None of the MSCI parties is under any obligation to pay heed to the needs of the issuer, holders of units in the sub-fund or any other party or entity in establishing, composing or calculating the MSCI indexes. None of the MSCI parties is responsible for establishing the time, price or number of units in the sub-fund needing to be issued or establishing or calculating the equation by which the sub-fund can be surrendered. Moreover, none of the MSCI parties has any obligation or responsibility towards the issuer or holders of units in the sub-fund concerning the managing, marketing or offering of this sub-fund.

Although MSCI obtains information to be incorporated into or used in calculating the MSCI indexes from sources that it regards as reliable, none of the MSCI parties warrants the originality, accuracy and/or completeness of any MSCI index or of any information incorporated therein. None of the MSCI parties makes any express or implied warranty as to the results that the issuer of the sub-fund, holders of units in the sub-fund or any other party or entity might receive from using any MSCI index or any information contained therein. None of the MSCI parties is liable for any error, omission or interruption in any MSCI index or in relation thereto or for any information incorporated therein. Furthermore, none of the MSCI parties makes any warranty whatsoever, express or implied, and the MSCI parties hereby disclaim all liability for merchantability or fitness for a particular purpose of any MSCI index or any information incorporated therein. Without prejudice to the generality of the foregoing, none of the MSCI parties will be liable for direct, indirect, special, punitive, consequential loss or damage or any other harm (including lost profits) even if notified of the possibility of such loss or damage.

No buyer, seller or holder of units in this sub-fund, nor any other party or entity, may use or make reference to any trading name, registered trademark or service mark of MSCI to sponsor, endorse, sell or promote this sub-fund without first verifying with MSCI whether it requires to obtain its authorisation. No party or entity may under any circumstances claim any affiliation whatsoever with MSCI without first obtaining written permission from MSCI.

Volatility of the net asset value

The volatility of the net asset value may be high due to the composition of the portfolio.

Securities Financing Transactions (SFTs)

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.1. Securities Financing Transactions (SFTs)'.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'.

2.1.4. Financial portfolio management

There is no delegation of the management of the asset allocation.

2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2.1.6. Index and benchmark

Tracking error and annual tracking difference for the Capitalisation share (ISIN-code: BE0944666800) calculated in the currency of the share.

Annual tracking difference: -1.22%

The annual tracking difference is the difference between the return of the unit in question and the return of its benchmark index over the financial year.

Tracking error: 0,67%

The tracking error is the annualised volatility of the differences between the daily returns of the unit in question and those of the benchmark index.

The Tracking error does not exceed the threshold.

Tracking error and annual tracking difference for the Distribution share (ISIN-code: BE0944665794) calculated in the currency of the share.

Annual tracking difference: -1.28%

The annual tracking difference is the difference between the return of the unit in question and the return of its benchmark index over the financial year.

Tracking error: 0,67%

The tracking error is the annualised volatility of the differences between the daily returns of the unit in question and those of the benchmark index.

The Tracking error does not exceed the threshold.

Tracking error and annual tracking difference for the Capitalisation share (ISIN-code: BE6348030592) calculated in the currency of the share.

Annual tracking difference: % is shown where it relates to a period of at least one year.

The annual tracking difference is the difference between the return of the unit in question and the return of its benchmark index over the financial year.

Tracking error: is shown where it relates to a period of at least one year.

The tracking error is the annualised volatility of the differences between the daily returns of the unit in question and those of the benchmark index.

The Tracking error cannot be calculated yet because the share is less than a year old.

2.1.7. Policy pursued during the financial year

As defined by the prospectus, the fund was managed with the objective to reflect the return of the MSCI India Index.

2.1.8. Future policy

As defined by the prospectus, the fund will continue tracking the return of the MSCI India Index.

2.1.9. Summary risk indicator (SRI)

Classic Shares: 5 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the US Dollar, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a high level of concentration risk: there is a concentration of the investments in shares of Indian companies.
- a moderate level of liquidity risk: since there will be invested in the shares of companies from emerging economies, there is a risk that a position cannot be sold quickly at a reasonable price.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Institutional Discretionary Shares: 5 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the US Dollar, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a high level of concentration risk: there is a concentration of the investments in shares of Indian companies.
- a moderate level of liquidity risk: since there will be invested in the shares of companies from emerging economies, there is a risk that a position cannot be sold quickly at a reasonable price.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

2.1.10. Leveraged finance

The total amount of leveraged finance used by the sub-fund is 0.00 USD.

This amount was calculated by multiplying the leverage ratio calculated using the UCITS-commitment method by the sub-fund's total assets under management.

2.1.11. Value-at-Risk

The internal classification system, on the basis of which this sectoral spread is calculated, has been changed as of 31/12/2023. In order to provide a meaningful comparison of the sectoral spread across reporting periods, the sectoral spread calculations will be de-duplicated in the annual reports. This means that a summary table will be shown for each classification system.

Currency breakdown (as a % of net assets)

	30/06/2023	31/12/2023	30/06/2024	31/12/2024

TOTAL	100.00	100.00	100.00	100.00

2.4.2. Changes in the composition of the assets of Horizon Access India Fund (in American dollar)

	1 st half of year	2 nd half of year	Year
Purchases	11,317,540.17	10,884,028.33	22,201,568.50
Sales	3,192,694.73	4,077,880.35	7,270,575.08
Total 1	14,510,234.90	14,961,908.68	29,472,143.58
Subscriptions	11,205,568.15	9,738,916.06	20,944,484.21
Redemptions	2,493,994.55	3,024,452.72	5,518,447.27
Total 2	13,699,562.70	12,763,368.78	26,462,931.48
Monthly average of total assets	54,504,217.83	68,802,359.35	61.862.675.60
Turnover rate	1.49%	3.19%	4.86%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period. A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions. A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio. Active asset management may result in high turnover rates (monthly percentage >50%).

The detailed list of transactions can be consulted free of charge at the company designated as financial service: KBC Bank NV, Havenlaan 2, B-1080 Brussels

2.4.3. Amount of commitments in respect of financial derivatives positions

Classic Shares

- The bar chart shows the performance for full financial years.
- The figures do not take account of any restructuring..
- Calculated in USD and in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage. In the case of units that pay dividends, the dividend is incorporated geometrically in the return.
- Calculation method for date D, where NAV stands for net asset value:

Capitalisation units (CAP)

Return on date D over a period of X years :

$$[\text{NIW}(D) / \text{NIW}(Y)]^{[1/X] - 1}$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[\text{NIW}(D) / \text{NIW}(S)]^{[1/F] - 1}$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

Distribution units (DIV)

Return on date D over a period of X years :

$$[C * \text{NIW}(D) / \text{NIW}(Y)]^{[1/X] - 1}$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[C * \text{NIW}(D) / \text{NIW}(S)]^{[1/F] - 1}$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

where C is a factor that is determined for all N dividends between the calculation date D and the reference date.

For dividend i on date Di with value Wi:

$$C_i = [W_i / \text{NIW}(D_i)] + 1$$

i = 1 ... N

from which C = C0 * * CN.

- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation and distribution shares

Dividend on ex-dividend date 28/03/2025: 13,2238 net (18,8912 gross).

Other charges (estimation) such as the regulator's fees, the cost of publication and any marketing costs	0.10%	of the net assets of the sub-fund per year.

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-

fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main object of the sub-fund is to generate the highest possible return for its unit holders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.
The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Strategy selected

The sub-fund invests directly or indirectly in various asset classes, such as shares and/or share-related investments ('the stock component'), bonds and/or bond-related investments ('the bond component'), money market instruments, cash and/or alternative investments (including real estate and financial instruments that are linked to price movements on commodity markets).

The target allocation for the asset classes is: 55% shares and/or share-related investments (stock component) and 45% bonds and/or bond-related investments (bond component). The target allocation may be deviated from. It is therefore possible for the sub-fund to invest in asset classes that are not included in the target allocation. The portfolio is generally evenly allocated between shares and bonds.

As regards the stock component, at least 50% is invested in shares whose dividends and capital gains qualify for the DRD system.

However, under normal circumstances, the sub-fund will aim to invest between 70% and 100% of the stock component in shares of which the dividends and capital gains qualify for the DRD system. This means that it is possible that not all of the share portfolio will be invested in shares of which the capital gains and dividends qualify for the DRD system.

Income received from interest and capital gains on bonds and debt instruments do not qualify for the DRD system. Given the target allocation, whereby a significant portion of the sub-fund consists of bonds and debt instruments, it is likely that part of the income distributed by the sub-fund will not qualify for DRD. It is also possible that in certain circumstances, such as if bonds outperform shares, a significant portion of the income distributed by the sub-fund may not qualify for DRD.

Information related to Responsible Investing

Within the above limits, the sub-fund pursues (directly or indirectly) responsible investment objectives based on a dualistic approach: a negative screening and a positive selection methodology.

KBC Asset Management NV has a team of specialist researchers responsible for this dualistic approach. They are assisted by an independent advisory board (the “**Responsible Investing Advisory Board**”) comprised of up to twelve persons, who are not affiliated to KBC Asset Management NV, and whose sole responsibility is to supervise the dualistic approach and activities of the specialist researchers. The secretariat of the advisory board is handled by a representative of KBC Asset Management NV. Moreover, KBC Asset Management NV works with data suppliers with expertise in Responsible Investing that provide data to the specialized researchers, who process and complete the data with publicly available information (including annual reports, press publications, etc.).

The sub-fund promotes a combination of environmental and/or social characteristics and, even though it does not have sustainable investments as an objective, it shall invest a minimum proportion of its assets in economic activities that contribute to the achievement of environmental or social objectives (i.e. ‘sustainable investments’).

The issuers in which it invests must follow good governance practices.

The sub-fund is compliant with the transparency obligations of article 11 (1) of Regulation (EU) 2019/2088 of the European Parliament and of the council of 27 November 2019 on sustainability-related disclosures in the financial services sector (‘SFDR’). More information on how the sub-fund promotes environmental and social characteristics can be found in the ‘Annex for Horizon Business Dynamic DBI-RDT Responsible Investing’ of this annual report. This annex specifically covers the periodic reports for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852.

Negative screening

In practical terms the end result of this negative screening procedure is that the sub-fund excludes issuers in advance from the Responsible Investment universe which fall foul of the exclusion policy available on www.kbc.be/investment-legal-documents > Exclusion policy for Responsible Investing funds.

The application of these policies means that issuers involved in such activities like the tobacco industry, weapons, gambling and adult entertainment are excluded from the sub-fund's investment universe. This screening also ensures that issuers who seriously violate fundamental principles of environmental protection, social responsibility and good governance are excluded from the sub-fund's investment universe.

These negative screening principles are not exhaustive and may be adapted from time to time under the supervision of the Responsible Investing Advisory Board.

Positive selection methodology

Within the defined investment universe and other limits described above, the responsible investment objectives of the sub-fund are the following:

- (1) promote the integration of sustainability into the policy decisions of issuers (companies, governments, supranational debtors and/or agencies linked to governments), by preferring issuers with a better **ESG (risk)score**, where ESG stands for ‘Environmental, Social and Governance’, and
- (2) promote climate change mitigation, by preferring issuers with lower **Greenhouse Gas Intensity**, with the objective of meeting a predetermined Greenhouse Gas intensity target;
- (3) support sustainable development, through ‘sustainable investments’ in accordance with art. 2(17) SFDR. Sustainable investments will consist of **bonds financing green and/or social projects** (3.1) and investments in issuers contributing to the achievement of the **UN Sustainable Development Goals** (3.2). However, no binding minimum percentage has been set for this latter category, although it contributes to the achievement of the minimum percentage of ‘sustainable investments’ for this sub-fund.

More information on the investment policy for Responsible Investing funds is available at www.kbc.be/investment-legal-documents > Investment policy for Responsible Investing funds.

(1) ESG-(risk)score

The contribution to the integration of sustainability into policy decisions of the issuers is measured based on an ESG (risk) score. For companies, an ESG risk score is assigned, for countries an ESG score. This score represents the aggregated performance assessment of a given issuer against a series of ESG criteria which are grounded to the extent possible against objective measures. The main factors underpinning the ESG criteria are:

- In the case of instruments issued by companies:
 - respect for the environment (e.g., reduction in greenhouse gas emissions);
 - attention to society (e.g., employee working conditions); and
 - corporate governance (e.g., independence and diversity of the board of directors).

At least 90% of the corporate investments in the portfolio, as measured by assets under management, must have an ESG risk score. The ESG risk score for companies is an ESG risk score supplied by a data provider.

- In the case of instruments issued by national governments, supranational debtors and/or agencies linked to governments, the following five pillars are used
 - overall economic performance and stability (e.g., quality of institutions and government);
 - socio-economic development and health of the population (e.g., education and employment);
 - equality, freedom and the rights of all citizens;

- environmental policy (e.g., climate change); and
- security, peace and international relations.

These lists are not exhaustive and may be changed under the supervision of the Responsible Investing Advisory Board.

KBC Asset Management NV assigns an ESG score to at least 90 % of the investments in countries within the portfolio, as measured by assets under management.

To achieve this objective, the ESG-risk score of the portfolio for companies is compared to following benchmarks: MSCI World-Net Return index and iBoxx Euro Corporate bonds Total Return Index.

The ESG score for countries of the portfolio is compared to a reference portfolio of global government bonds (composed of the following benchmarks: 67% developed markets: J.P. Morgan GBI Global Unhedged EUR and 33% emerging markets: J.P. Morgan GBI-EM Global Diversified Composite Unhedged EUR).

To calculate the ESG-(risk)score at portfolio level, the weighted average of the ESG-(risk)scores of the positions in the sub-fund are taken into account. Technical items such as cash and derivatives are not taken into account and also companies or countries for which no data is available are left out. The weights used in the calculation depend on the size of the positions in the sub-fund, rescaled for these items.

More information on the ESG-(risk)score and the concrete goals of the sub-fund can be found in the 'Annex for Horizon Business Dynamic DBI-RDT Responsible Investing' to the prospectus.

The targets can be revised upwards or downwards.

(2) Greenhouse Gas Intensity

The objective to promote climate change mitigation, by favoring lower greenhouse gas intensity issuers, with the goal of meeting a predetermined greenhouse gas intensity target covers at least 90% of the portfolio. The objective does not apply to issuers for which data is not available.

The contribution of issuers to climate change mitigation is measured based on their greenhouse gas intensity. For companies, greenhouse gas intensity is defined as absolute greenhouse gas emissions (in tonnes CO2 equivalent), divided by revenues (in mln USD). For countries, it is defined as the greenhouse gas emissions (in tonnes CO2 equivalent), divided by the Gross Domestic Product (in mln USD).

The targets for instruments issued by companies are different from those for instruments issued by national governments, supranational debtors and/or government-linked agencies.

More information on Greenhouse Gas Intensity and the concrete goals of the sub-fund can be found in the 'Annex for Horizon Business Dynamic DBI-RDT Responsible Investing' to the prospectus.

The targets may be revised upwards or downwards.

(3) Sustainable investments

(3.1) Bonds financing green and/or social projects

To encourage the transition to a more sustainable world, the sub-fund commits to invest a minimum proportion of the portfolio in bonds financing green and/or social projects. Bonds whose proceeds will be used exclusively to finance (a combination of) green and social projects that are aligned with the International Capital Market Association (ICMA) Green Bond Principles and Social Bond Principles on the Use of Proceeds are considered bonds financing green and/or social projects. Compliance with these principles is verified by an external party. Instruments that meet these requirements are labelled 'sustainable investments', in line with article 2(17) SFDR.

More information on bonds financing green and/or social projects and the concrete goals of the sub-fund can be found in the 'Annex for Horizon Business Dynamic DBI-RDT Responsible Investing' to the prospectus.

The targets may be revised upwards or downwards.

(3.2) UN Sustainable Development Goals

To support sustainable development, the sub-fund can invest part of its portfolio in issuers that contribute to the UN Sustainable Development Goals. The UN Sustainable Development Goals include both social and environmental objectives.

Companies are considered to contribute to sustainable development when at least 20% of the revenues are linked to the UN Sustainable Development Goals. The activities of the companies are assessed on multiple sustainable themes that can be linked to the UN Sustainable Development Goals.

Governments are assessed on the five pillars as described in the ESG score, which contain indicators that can be linked to the 17 UN Sustainable Development Goals. If a government scores sufficiently well on one of these pillars and not significantly poor on the other pillars, the bonds of this government and its sub-governments and agencies are considered to be instruments that contribute to sustainable development. Bonds of supranational governments contribute to the UN's Sustainable development goals if one of the two criteria is met:

- at least half of its members contribute to the UN Sustainable Development Goals (weighted by voting power/full paid-in capital/percentage of population (in order of availability)).
- the mission statement of the supranational institution has a sustainable objective and less than half of its members fall in the worst half of the screening for controversial regimes.

Instruments of issuers that meet these requirements are designated as "sustainable investments," according to Article 2(17) SFDR. In addition, the Responsible Investing Advisory Board can award the "sustainable development" label to instruments of companies and governments. In that case, these investments shall also qualify as "sustainable investments," according to Article 2(17) SFDR. However, the awarding of the 'sustainable development' label by the Responsible Investing Advisory Board to instruments of governments is very exceptional.

More information about the methodology used to qualify investments as investments which contribute to the UN Sustainable Development Goals can be found in the 'Annex for Horizon Business Dynamic DBI-RDT Responsible Investing' to the prospectus.

Potential Exceptions

It cannot be ruled out, however, that very limited investments may be made temporarily in assets that do not meet the above criteria. The reasons for this include the following:

- Developments as a result of which an issuer can no longer be regarded as eligible after purchase;
- Corporate events, such as a merger of one company with another, where the merged company can no longer be considered an eligible issuer based on the above criteria;
- Incorrect data as a result of which assets are invested (unintentionally and erroneously) in assets purchased when it should not have been eligible for the sub-fund;
- A planned update of the screening criteria as a result of which assets should be excluded from the sub-fund, but which the management company chooses to refrain from selling immediately in the best interest of the customer;
- External circumstances such as market movements and updates of external data can lead to investment solutions failing to achieve the abovementioned targets.

In these cases, the fund manager will replace the assets concerned with more appropriate assets as soon as possible, always taking into account the sole interest of the investor.

In addition, for the purpose of efficient portfolio management, the fund manager may to a significant degree use derivatives relating to assets issued by issuers that would not be eligible for inclusion in the sub-fund, in so far as there is no serviceable and comparable alternative available on the market. In addition, the counterparties with which the derivative transactions are entered into may not necessarily be issuers having a responsible nature.

The stock component is invested in a worldwide selection of shares that may come from any region, sector or theme.

For details of the bond component, please see the 'Characteristics of the bonds and debt instruments' section below.

The fund is actively managed with reference to the following benchmark: 55% MSCI World-Net Return index, 22.5% iBoxx Euro Corporate bonds Total Return Index, 22.5% JP Morgan EMU Government Bonds Investment Grade ALL Maturities - Total Return Index.

However, it is not the aim of the fund to replicate the benchmark. The composition of the benchmark is taken into account when compiling the portfolio.

In line with its investment policy, the sub-fund may not invest in all the instruments included in the benchmark.

When compiling the portfolio, the manager may also decide to invest in instruments that are not included in the benchmark, or indeed not to invest in instruments that are included.

The composition of the portfolio will vary from that of the benchmark, as the composition of the benchmark is not fully consistent with the environmental and/or social characteristics promoted by the sub-fund. The use of the benchmark does not detract from the responsible character of the portfolio. The responsible character is guaranteed by the aforementioned Responsible Investing methodology.

The benchmark is also used to determine the fund's risk limitation mechanism. This limits the extent to which the fund's return may deviate from the benchmark.

The longterm expected tracking error for this fund is 2.00%. The tracking error measures the volatility of the fund's return relative to that of the benchmark. The higher the tracking error, the more the fund's return fluctuates relative to the benchmark. Market conditions may cause the actual tracking error to differ from the expected tracking error.

Taxonomy related information

At the date of this prospectus, the sub-fund does not commit to invest a minimum proportion of its assets in environmentally sustainable economic activities which contribute to any of the environmental objectives set out in Article 9 of the Regulation (EU) 2020/852 of the European Parliament and of the Council of 18 June 2020 on the establishment of a framework to facilitate sustainable investment ('EU Taxonomy Framework'). The minimum proportion of investments in environmentally sustainable economic activities within the meaning of the EU Taxonomy Framework is 0%. This will be monitored on a regular basis and as soon as sufficiently reliable, timely and verifiable data from issuers or invested companies is available, the prospectus may be updated.

Companies are considered to contribute to sustainable development if at least 20% of sales are linked to the UN Sustainable Development Goals. This includes companies with at least 20% of sales aligned to the EU Taxonomy Framework based on Trucost data. Instruments of companies that meet these requirements are referred to as "sustainable investments," according to art. 2(17) SFDR. More information on the percentage in the portfolio that was considered "sustainable investments with an environmental objective aligned with the EU Taxonomy Framework" based on this criterion during the reporting period, can be found in the annual reports for this sub-fund published after Jan. 1, 2024.

More information on the EU Taxonomy Framework can be found in the 'Annex for Horizon Business Dynamic DBI-RDT Responsible Investing' to the prospectus.

Transparency of adverse sustainability impacts:

The sub-fund considers the principal adverse impacts of its investment decisions on sustainability factors by taking into account the principal adverse impact indicators ('PAI'), as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability disclosure in the financial services sector ('SFDR').

The principal adverse impacts on sustainability factors were explicitly taken into account through the general exclusion policy for conventional funds and Responsible Investing funds and the exclusion policy for Responsible Investing funds. The principal adverse impacts on sustainability factors that were taken into account through the exclusion policies can be found in the 'Annex for Horizon Business Dynamic DBI-RDT Responsible Investing'.

The principal adverse impacts on sustainability factors were implicitly taken into account through the Proxy Voting and Engagement Policy. The principal adverse impacts on sustainability factors that were taken into account through the Proxy Voting and Engagement Policy can be found in the 'Annex for Horizon Business Dynamic DBI-RDT Responsible Investing'.

More information on how the sub-fund aims to consider the principal adverse impacts on sustainability factors can also be found in the 'Annex for Horizon Business Dynamic DBI-RDT Responsible Investing'.

Characteristics of the bonds and debt instruments

The sub-fund invests in bonds and debt instruments issued by both companies and public authorities.

The sub-fund invests directly and/or indirectly at least 50% of its assets in bonds and debt instruments

- in securities rated investment grade (at least BBB-/Baa3 for long-term debt, A3/F3/P3 for short-term debt) by at least one of the following rating agencies: Moody's Investors Service, Standard & Poor's or Fitch Ratings, and/or
- in government bonds issued in local currency or non-subordinated corporate bonds* which do not have a credit rating from the rating agencies mentioned above but the issuer of which has an investment grade rating by at least one of the rating agencies mentioned above, and/or
- in money market instruments whose issuer has an investment grade rating (minimum A3/F3/P3 for short-term debt) from at least one of the above rating agencies.

This means that the sub-fund may invest up to 50% of its assets invested in bonds and debt instruments that do not have a credit rating from the above-mentioned rating agencies and/or which do not comply with the above-mentioned credit requirements.

All maturities are taken into consideration in the selection of bonds and debt instruments.

*In the event of the bankruptcy of the relevant issuer, subordinated bonds are subordinated to the company's other debts: the company's other debts are paid first, then and only if there is still capital left, the holders of the subordinated bonds are fully or partially repaid; the holder of the subordinated bond does, however, have priority over the shareholders of the issuer in question.

Investments in assets other than securities or money market instruments

The sub-fund will invest primarily in units of undertakings for collective investment.

Securities Financing Transactions (SFTs)

The sub-fund may not lend any financial instruments.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'.

2.1.4. Financial portfolio management

The intellectual management, with the exception of the creation of the sub-fund and its maintenance in terms of the technical, product-specific and legal aspects has been delegated by the management company to KBC Fund Management Limited, 4th Floor, Scotch House, 6/7 Burgh Quay, Dublin 2, D02 VK44, Ireland.

2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2.1.6. Index and benchmark

See 'Sub-fund's investment policy'.

2.1.7. Policy pursued during the financial year

The investment objective of the fund is to generate the highest possible return using a fundamental 'hold-to-grow' approach. The asset allocation is derived from the main KBC AM strategy. The target asset allocation of the portfolio is 55% equities and 45% bonds. Regarding the equity part, at least 50% of the assets are invested in shares whose dividends and capital gains qualify for the 'dividends received deduction' (DRD) system. This means that not all of the share portfolio may be invested in shares whose capital gains and dividends qualify for the DRD system. Income received in the form of interest and capital gains on bonds and debt instruments do not qualify for the DRD system.

2.1.8. Future policy

The future investment policy of the fund will be determined by the KBCAM NV investment strategy in anticipation of, and response to, financial markets movements.

2.1.9. Summary risk indicator (SRI)

Classic Shares: 3 on a scale of 1 (lowest risk) to 7 (highest risk)

- a moderate level of inflation risk: the bond component does not provide any protection against an increase in inflation.
- a moderate level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a real chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of credit risk: the bond component invests primarily - but not exclusively- in bonds with an investment grade rating. Consequently, the risk that an issuer can no longer meet its obligations is higher than in an investment that consists only of bonds with an investment grade rating. If investors are in doubt about the creditworthiness of the issuers of the bonds, the value of those bonds can fall.
- a moderate level of market risk: the level of the risk reflects the volatility of the equity component.
- a moderate level of performance risk: the level of the risk reflects the volatility of the equity component.

There is no capital protection.

Comfort Portfolio Shares: 3 on a scale of 1 (lowest risk) to 7 (highest risk)

- a moderate level of inflation risk: the bond component does not provide any protection against an increase in inflation.
- a moderate level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a real chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of credit risk: the bond component invests primarily - but not exclusively- in bonds with an investment grade rating. Consequently, the risk that an issuer can no longer meet its obligations is higher than in an investment that consists only of bonds with an investment grade rating. If investors are in doubt about the creditworthiness of the issuers of the bonds, the value of those bonds can fall.
- a moderate level of market risk: the level of the risk reflects the volatility of the equity component.
- a moderate level of performance risk: the level of the risk reflects the volatility of the equity component.

There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

2.1.10. Leveraged finance

The total amount of leveraged finance used by the sub-fund is 0.00 EUR.

This amount was calculated by multiplying the leverage ratio calculated using the UCITS-commitment method by the sub-fund's total assets under management.

2.1.11. Value-at-Risk

Not applicable

The internal classification system, on the basis of which this sectoral spread is calculated, has been changed as of 31/12/2023. In order to provide a meaningful comparison of the sectoral spread across reporting periods, the sectoral spread calculations will be de-duplicated in the annual reports. This means that a summary table will be shown for each classification system.

Currency breakdown (as a % of net assets)

The currency distribution of the sub-fund's investments is calculated based on the currency distribution of the underlying investments of the UCIs in which the sub-fund invests (look through).

2.4.2. Changes in the composition of the assets of Horizon Business Dynamic DBI-RDT Responsible Investing (in Euro)

	1 st half of year	2 nd half of year	Year
Purchases	288,805,435.24	274,458,398.51	563,263,833.74
Sales	143,903,496.35	186,092,467.35	329,995,963.70
Total 1	432,708,931.59	460,550,865.86	893,259,797.45
Subscriptions	174,545,284.47	138,435,443.30	312,980,727.77
Redemptions	24,971,142.78	43,952,298.09	68,923,440.87
Total 2	199,516,427.25	182,387,741.39	381,904,168.64
Monthly average of total assets	463,265,820.55	618,390,995.88	542,424,346.23
Turnover rate	50.34%	44.98%	94.27%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period. A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions.

A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio. Active asset management may result in high turnover rates (monthly percentage >50%), reason: The fund has a mixed structure. The equity model portfolio consist of direct lines while the cash and the fixed income model portfolio consist of fund certificates. The turnover can be higher in this fund because of the direct lines. The weekly strategy implementations and managing the daily subscriptions and redemptions also contributed to the high turnover.

The detailed list of transactions can be consulted free of charge at the company designated as financial service: KBC Bank NV, Havenlaan 2, B-1080 Brussels

2.4.3. Amount of commitments in respect of financial derivatives positions

Nil

2.4.4. Changes in the number of subscriptions and redemptions and the net asset value

Risk warning: Past performance is not a guide to future performance.

* Return on annual basis.

Classic Shares

- The bar chart shows the performance for full financial years.
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage. In the case of units that pay dividends, the dividend is incorporated geometrically in the return.
- Calculation method for date D, where NAV stands for net asset value:

Distribution units (DIV)

Return on date D over a period of X years :

$$[C * NIW(D) / NIW(Y)]^{1/X} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[C * NIW(D) / NIW(S)]^{1/F} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

where C is a factor that is determined for all N dividends between the calculation date D and the reference date.

For dividend i on date Di with value Wi:

$$Ci = [Wi / NIW(Di)] + 1$$

i = 1 ... N

from which C = C0 * ... * CN.

- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for distribution shares.

- The bar chart shows the performance for full financial years.
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage. In the case of units that pay dividends, the dividend is incorporated geometrically in the return.
- Calculation method for date D, where NAV stands for net asset value:
Distribution units (DIV)
 Return on date D over a period of X years :

$$\left[\frac{C * NIW(D)}{NIW(Y)} \right]^{1/X} - 1$$
 where $Y = D - X$
 Return on date D since the start date S of the unit:

$$\left[\frac{C * NIW(D)}{NIW(S)} \right]^{1/F} - 1$$
 where $F = 1$ if the unit has existed for less than one year on date D
 where $F = (D - S) / 365.25$ if the unit has existed for longer than one year on date D
 where C is a factor that is determined for all N dividends between the calculation date D and the reference date.
 For dividend i on date Di with value Wi:

$$C_i = \left[\frac{W_i}{NIW(D_i)} \right] + 1$$

$$i = 1 \dots N$$
 from which $C = C_0 * \dots * C_N$.
- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for distribution shares.

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU-Taxonomie** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☒ Yes

☒ No

☐ It made **sustainable investments with an environmental objective**: %

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 42.07% of sustainable investments

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ with a social objective

☐ It made **sustainable investments with a social objective**: %

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Unless otherwise stated, all actual data in this periodic report are expressed as weighted quarterly average.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

This sub-fund:

- has promoted the integration of sustainability into the policy decisions of issuers (companies, governments, supranational debtors and/or agencies linked to governments) by preferring issuers with a better ESG (risk)score;
- has promoted climate change mitigation by preferring issuers with lower greenhouse gas intensity, with the objective of meeting a predetermined greenhouse gas intensity target;
- has promoted sustainable development through 'sustainable investments' in accordance with art. 2(17) SFDR.

Sustainable investments consist of bonds financing green and/or social projects and investments in issuers contributing to the achievement of the UN Sustainable Development Goals.

However, no binding minimum percentage has been set for this latter category, although it contributes to the achievement of the minimum percentage of 'sustainable investments' for this sub-fund.

The specific objectives of the sub-fund can be found in the table under title 'How did the sustainability indicators perform?' of this annex.

The sub-fund invested 42.07% of the assets in "sustainable investments" as defined by art. 2.17 SFDR and 57.50% in other investments aligned with environmental or social characteristics.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by this sub-fund.

For investments issued by companies the benchmarks MSCI World - Net Return Index and iBoxx Euro Corporates - Total Return Index are used as a basis for comparison, to compare certain ESG characteristics promoted by the sub-fund.

For investments in instruments issued by governments, supranational debtors and/or government-linked agencies, the described reference portfolio of global government bonds is used as a basis for comparison, to compare certain ESG characteristics promoted by the sub-fund.

How did the sustainability indicators perform?

Sustainability indicators
measure how the environmental or social characteristics promoted by the financial product are attained.

	Target	Target applied	Actuals	Objective attained
Instruments issued by companies				
ESG risk score	Better than the following benchmarks: MSCI World - Net Return Index and iBoxx Euro Corporates - Total Return Index.	20.89	18.72	Yes
Greenhouse gas intensity	Companies are assessed on two targets whereby the most strict of the two will determine the target applied: 15% better than the MSCI World - Net Return Index and iBoxx Euro Corporates - Total Return Index and a reduction of 50% by 2030 based on the MSCI World - Net Return Index and iBoxx Euro Corporates - Total Return Index at end of 2019. An immediate reduction of 30% is envisaged for 2019, followed by an annual reduction of 3%.	87.3125	43.39	Yes
Bonds financing green and/or social projects	A minimum of 10% of corporate bonds invested in should qualify as bonds financing green and/or social projects.	10	15.52	Yes
Instruments issued by governments, supranational debtors and/or agencies linked to governments				
ESG Score	10% better than the reference portfolio of global government bonds (composed of the following benchmarks: 67% developed markets: J.P. Morgan GBI Global Unhedged EUR Index and 33% emerging markets: J.P. Morgan GBI-EM Global Diversified Composite Unhedged EUR Index).	0.77	0.81	Yes
Greenhouse gas intensity	25% better than the reference portfolio of global government bonds (composed of the following benchmarks: 67% developed markets: J.P. Morgan GBI Global Unhedged EUR Index and 33% emerging markets: J.P. Morgan GBI-EM Global Diversified Composite Unhedged EUR Index).	413.18	366.21	Yes
Bonds financing green and/or social projects	A minimum of 10% of the investments in bonds issued by governments, supranational debtors and/or agencies linked to governments should qualify as bonds financing green and/or social projects.	10	18.86	Yes
Minimum % Sustainable Investments	A minimum of 15.00% of sustainable investments. The sustainable investments for this sub-fund will consist of bonds financing green and/or social projects and investments in issuers contributing to the achievement of the UN Sustainable Development Goals. However, no binding minimum percentage has been set for the latter category.	15.00	42.07	Yes
Minimum % sustainable investments with an environmental objective in economic activities that do not qualify as environmentally sustainable according to the EU taxonomy	Minimum 1% ecologically sustainable investments in economic activities that do not qualify as ecologically sustainable according to the EU taxonomy.		17.34	Not available
Minimum % Sustainable Investments	Minimum 1% sustainable investments with a social objective.	1	24.00	Yes

with a social objective				
Minimum % of assets promoting E/S characteristics	Minimum 80% of assets promoting E/S characteristics.	80	99.57	Yes
Other specific objectives	not applicable			

As indicated in the table above, the sub-fund has reached all targets during the reference period.

The sub-fund pursued these objectives (directly or indirectly) based on a dualistic approach: the negative screening and the positive selection methodology.

All targets are also monitored by KBC Asset Management at month-end. Given the difference in the periodicity of the calculations, it cannot be excluded that the monitoring at month-end leads to different results than the weighted quarterly averages shown in the table above and section 2.1.7 of the general annual report.

No breaches at month-end have been identified for this sub-fund.

● ... and compared to previous periods?

Sustainability indicators	Achieved result	Achieved result	Achieved result
	31/12/2022	31/12/2023	31/12/2024
Instruments issued by companies			
ESG risk score		17.98	18.72
Greenhouse gas intensity		39.93	43.39
Bonds financing green and/or social projects		14.30	15.52
Instruments issued by governments, supranational debtors and/or agencies linked to governments			
ESG Score		0.82	0.81
Greenhouse gas intensity		343.62	366.21
Bonds financing green and/or social projects		16.23	18.86
Sustainable Investments	80.28	75.69	42.07
Sustainable Investments with an environmental objective in economic activities that do not qualify as environmentally sustainable according to the EU taxonomy (%)		24.99	18.07
Sustainable Investments with a social objective (%)		50.71	24.00
Assets promoting E/S characteristics (%)		96.89	99.57

For the reporting period 01/01/2022-31/12/2022, the results achieved were not reported for each sustainability indicator separately (except for the percentage of sustainable investments).

For the year 2022, it was only described in a general way whether or not the targets were achieved.

For the reporting periods 01/01/2022-31/12/2022 and 01/01/2023-31/12/2023, the results achieved described in this chapter only reflect the situation at the end of the sub-fund's financial year. Therefore, they are not a reliable indicator of future results.

For the reporting period 01/01/2024-31/12/2024, the results achieved are expressed as a weighted average per quarter.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The sub-fund promoted a combination of environmental and social characteristics and, even though it didn't have sustainable investments as an objective, the sub-fund invested 42.07% of the assets in 'sustainable investments' as defined by art. 2.17 SFDR.

(1) UN Sustainable Development Goals

To support sustainable development, the sub-fund invested a part of its portfolio in issuers that contribute to the UN Sustainable Development Goals.

Companies are considered to contribute to sustainable development when at least 20% of the revenues are linked to the UN Sustainable Development Goals. The activities of the companies are assessed on multiple sustainable themes that can be linked to the UN Sustainable Development Goals.

Governments were assessed on five pillars which contain indicators that can be linked to the 17 UN Sustainable Development Goals. If a government scored sufficiently well on one of these pillars and not significantly poor on the other pillars, the bonds of this government and its sub-governments and agencies were considered to be instruments that contribute to UN Sustainable Development Goals.

- The country is aligned with the ESG criteria: it has a score of at least 80 for one of the five pillars and does not score lower than 50 for any of the other pillars;
- The country is not excluded: it does not rank among the 50% most controversial regimes AND it does meet the criteria on respecting the sustainable principles AND it does not rank among the 10% worst scoring countries of the universe.

Supranational government bonds were considered to contribute to the UN Sustainable Development Goals if either of the following criteria is met:

- at least half of its members contribute to the UN Sustainable Development Goals (weighted by voting power/full paid-in capital/percentage of population (in order of availability)).
- the mission statement of the supranational institution has a sustainable objective and less than half of its members fall in the worst-scoring half of the screening for controversial regimes.

In addition, the Responsible Investing Advisory Board can award the 'sustainable development' label to instruments of companies and governments.

However, the awarding of the 'sustainable development' label by the Responsible Investing Advisory Board to instruments of governments is very exceptional. The possibility of deviating from the outcomes of the internal KBC country model is mainly intended for countries that just meet or just fall short of the requirements, with the aim of avoiding that countries that would 'leapfrog' the bar over the years (i.e. borderline sustainable or not sustainable or permitted) would have to be in and then out of the investment universe each time, and this in order to avoid transaction costs.

(2) Bonds financing green and/or social projects

To encourage the transition to a more sustainable world, the sub-fund invested a minimum part of its portfolio in bonds financing green and/or social projects (that are aligned with the International Capital Market Association (ICMA) Green Bond Principles and Social Bond Principles on the Use of Proceeds). Instruments that meet these requirements were labelled 'sustainable investments'. The percentage of the portfolio invested in bonds financing green and/or social projects can be found in the table under the "How did the sustainability indicators perform" section of this annex.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The sustainable investments that the sub-fund partially made did not cause significant harm to the sustainable investment objective through the negative screening. The sub-fund took into account the indicators of the principle adverse impacts of investment decisions on sustainability factors as stated in Table 1 of Annex I of Delegated Regulation (EU) 2022/1288, as well as the relevant indicators for the principle adverse impacts of investments decisions on sustainability factors in Tables 2 and 3 of Annex I of Delegated Regulation (EU) 2022/1288 through the negative screening.

The negative screening amounts to the sub-fund's a priori exclusion of issuers from the Responsible Investment universe which fall foul the exclusion policies.

The application of these policies means that issuers involved in activities such as fossil fuels, the tobacco industry, arms, gambling and adult entertainment are excluded from the sub-fund's investment universe. Investments in financial instruments linked to livestock and food prices are also excluded. All companies that derive at least 5% of their revenues from the production or 10% of their revenues from the sale of fur or special leather, are excluded. The negative screening also ensures that issuers based in countries that encourage unfair tax practices, that seriously violate

fundamental principles of environmental protection, social responsibility and good governance (through the normative screening, through a poor ESG risk rating, due to involvement in unsustainable countries by not meeting the sustainability criteria and controversial regimes, due to severe controversies related to water emissions, pollution or waste and gender diversity and due to high or severe controversies in the context of activities that have a negative impact on biodiversity and for which insufficient measures are taken to reduce their impact) are excluded from the sub-fund's investment universe.

These principles of negative screening are not exhaustive and may be modified on the advice of the Responsible Investing Advisory Board.

----- *How were the indicators for adverse impacts on sustainability factors taken into account?*

Through the exclusion policy for Responsible Investing funds and, in particular, the normative screening and ESG risk assessment, all indicators of the principle adverse impacts of investment decisions on sustainability factors as stated in Table 1 of Annex I of Delegated Regulation (EU) 2022/1288, as well as the relevant indicators for the principle adverse impacts of investments decisions on sustainability factors in Tables 2 and 3 of Annex I of Delegated Regulation (EU) 2022/1288 were taken into account for instruments issued by companies. The sub-fund did not invest in companies that seriously violate the principles of the United Nations Global Compact and the Organization for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises, and any companies involved in serious controversies related to environmental, social or good governance issues are also excluded. Also excluded were companies with an ESG risk score of more than 40 according to data provider Sustainalytics.

For investments in instruments issued by countries, the indicators of the principle adverse impacts of investment decisions on sustainability factors as stated in Table 1 of Annex I of Delegated Regulation (EU) 2022/1288, as well as the relevant indicators for the principle adverse impacts of investments decisions on sustainability factors in Tables 2 and 3 of Annex I of Delegated Regulation (EU) 2022/1288 were taken into account by excluding countries in the worst 10% according to the ESG score model, and by excluding countries that do not comply with sustainability criteria and are exposed to controversial regimes.

In addition to the normative screening and ESG risk assessment, through the positive selection methodology on greenhouse gas intensity and the exclusions in the exclusion policy for Responsible Investment funds, the following indicators of principle adverse impacts on sustainability factors were also considered for all investments of this sub-fund:

- **Indicator 3:** greenhouse gas ('GHG') intensity of investee companies was taken into account through the greenhouse gas intensity reduction target for companies.
- **Indicator 4:** exposure to companies active in the fossil fuel sector was taken into account as the sub-fund did not invest in companies that are active in the fossil fuel sector. In order to support companies in their transition to a more sustainable future, an exception is made for green bonds issued by companies that have been excluded solely on the basis of the fossil fuel policy.
- **Indicator 7:** Activities negatively affecting biodiversity-sensitive areas were taken into account as the sub-fund does not invest in companies that have high or severe controversies related to Land Use and Biodiversity as well as companies with activities that have a negative impact on biodiversity and that don't take sufficient measures to reduce their impact.
- **Indicator 10:** Violations of the United Nations Global Compact (UNGC) Principles and the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises was taken into account as the sub-fund did not invest in companies that seriously violate UNGC principles or OECD guidelines.
- **Indicator 14:** exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons) was taken into account as the sub-fund did not invest in companies that are active in controversial weapons.
- **Indicator 15:** GHG intensity of investee countries was taken into account through the greenhouse gas intensity reduction target for sovereign related investments.
- **Indicator 16:** Investee countries subject to social violations was taken into account as the sub-fund did not invest in (i) Countries that do not comply with sustainability criteria and (ii) countries exposed to controversial regimes. More information can be found in the exclusion policy for Responsible Investing funds.

In addition, the principal adverse impacts on sustainability factors were implicitly taken into account through the Proxy Voting and Engagement Policy of KBC Asset Management NV.

A complete overview of the indicators of principal adverse impacts on sustainability factors that the sub-fund can take into account can be found in Annex I of Delegated Regulation (EU) 2022/1288.

----- Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes.

Companies seriously violating the basic good practices in terms of environmental, social and governance issues, as assessed by the UN Global Compact Principles, were excluded from the sub-fund. The United Nations Global Compact has formulated ten guiding sustainability principles regarding human rights, labour, environment and anti-corruption which are part of the internal screening. In addition, KBC AM assessed the companies' involvement in violations of the International Labour Organization's (ILO) Conventions, the OECD Guidelines for multinational enterprises and the UN Guiding Principles on Business and Human Rights.

The sub-fund commits to respect the letter and the spirit of the United Nations Universal Declaration of Human Rights; the principles concerning fundamental rights in the eight International Labour Organisation core conventions as set out in the Declaration on Fundamental Principles and Rights at Work; the UN Declaration on the Rights of Indigenous Peoples; the UK Modern Slavery Act and other international and regional human rights treaties containing internationally recognised standards by which the business sector must abide.

KBC Asset Management NV assesses all companies on the 'Human Rights List' of KBC Group as well as all companies meeting the criteria below:

- a high or severe controversy score related to Human Rights, for subindustries for which Human Rights are considered a high or severe risk.
- a severe controversy score related to Human Rights, for all other subindustries.

Based on this assessment, appropriate measures were taken, ranging from engagement with the companies concerned to selling positions. More information on the Policy on Human Rights can be found on the KBC Asset Management NV website.

More information on negative screening can be found in the section on "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?" of this annex.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The principal adverse impacts on sustainability factors were explicitly taken into account for all investments of this sub-fund by the exclusion policies applied. In addition, the principle adverse impacts on sustainability factors were implicitly taken into account through KBC Asset Management NV's proxy voting and engagement policies.

More information on the principal adverse impacts on sustainability factors can be found under the heading 'How were the indicators for adverse impacts on sustainability factors taken into account' of this Annex.

What were the top investments of this financial product?

This list includes the investments constituting the greatest proportion of the financial product during the reference period which is:
01/01/2024-31/12/2024

Largest investments	Sector	% assets	Country

What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments was 42.07%.

Asset allocation
describes the
share of
investments
in
specific assets.

What was the asset allocation?

The sub-fund could invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described in the prospectus under title "Information concerning the sub-fund Business Dynamic DBI-RDT Responsible Investing".

Within these categories of eligible assets, the sub-fund invested 99.57% in assets that promote environmental or social characteristics and 0.43% in other investments.

Corporate and sovereign investments in issuers passing the negative screening and contributing to at least one specific positive selection of the investment policy for Responsible Investing funds were considered as 'assets promoting environmental and social characteristics'.

(Term) deposits whose counterparties pass the negative screening and have at least a +2 Net Alignment Score on one of the first 15 UN Sustainable Development Goals at MSCI were also considered as 'assets promoting environmental and social characteristics'.

More information on the MSCI Net Alignment Score can be found in the investment policy for Responsible Investing funds which is available on www.kbc.be/investment-legal-documents > Investment policy for Responsible Investing funds.

The category "other investments" contained technical items, such as cash and derivatives, and assets in which the sub-fund invests temporarily following a planned update of the eligible universe, which determines the assets that promote environmental and/or social characteristics, for which there are no environmental or social safeguards. The sub-fund held or invested in these types of assets to achieve investment objectives, to diversify the portfolio, for liquidity management purposes and to hedge risks.

Derivatives were used to hedge risks as described in permitted derivatives transactions as set out in section 2. 'Investment information' under title 'Information concerning the sub-fund Business Dynamic DBI-RDT Responsible Investing' of the prospectus.

Investments in derivatives are not used to attain the environmental or social characteristics promoted by the financial product and will not affect them.

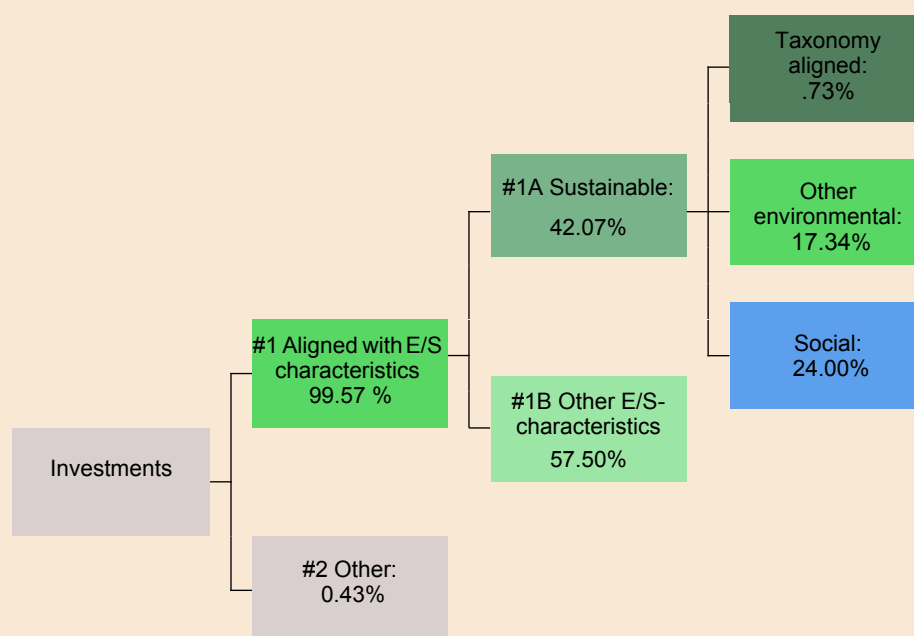

17.34% of sustainable investments are environmentally sustainable investments (not taxonomy-aligned), 0.73% are environmentally sustainable investments (taxonomy-aligned) and 24.00% are socially sustainable investments.

The sustainable investments are equal to the sum of investments that are considered "sustainable" based on the published methodology on contributing to the achievement of the UN Sustainable Development Goals, plus investments in bonds that can be considered as bonds financing green and/or social projects, plus instruments that are considered "sustainable" by the Responsible Investing Advisory Board.

In addition, companies that have at least 20% of their revenues aligned with the EU Taxonomy Framework according to data from Trucost, are considered to contribute to sustainable development. Instruments of companies that meet these requirements are referred to as "sustainable investments," according to art. 2(17) SFDR.

More information can be found at the section 'What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?' of this Annex.

To determine compliance with the EU taxonomy, the criteria for **fossil gas** include emission limits and conversion to renewable energy or low-carbon fuels by the end of 2023. For **nuclear power**, the criteria include comprehensive rules on safety and waste management.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product;

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S-characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

On 31/12/2024 the investments were made in the following sectors:

Sector	%Assets
National	15.75%
Health Care	10.82%
Banking	10.26%
Financial Services	9.64%
Tech Hardware & Semiconductors	9.21%
Software & Tech Services	8.03%
Media	6.07%
Insurance	4.41%
Retail & Wholesale - Discretionary	4.27%
Consumer Staple Products	4.24%
Materials	4.09%
Real Estate	3.19%
Consumer Discretionary Products	2.23%
Telecommunications	1.97%
Utilities	1.48%
Supranationals	1.41%
Consumer Discretionary Services	0.92%
Industrial Services	0.60%
Unclassifiable	0.49%
Industrial Products	0.47%
Retail & Wholesale - Staples	0.34%
Regional & Local	0.10%
Renewable Energy	0.01%

Sectors and sub-sectors of the economy that derive income from exploration, mining, extraction, production, processing, storage, refining or distribution - including transportation, storage and trading - in fossil fuels are excluded by the exclusion policy. Consequently, the sub-fund has not invested in these sectors and sub-sectors.

However, an exception is provided in the exclusion policy for investments in green bonds of these companies, which promote the energy transition. Consequently, for the portion invested in green bonds, there may be exposure to these sectors.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The sub-fund does not specifically seek to invest in environmentally sustainable economic activities within the meaning of the EU Taxonomy Framework ("investments aligned with the EU Taxonomy"). Although the sub-fund does not aim to invest in investments aligned with the EU Taxonomy, it cannot be ruled out that the sub-fund does contain investments aligned with the EU Taxonomy. The percentage of investments aligned with the EU taxonomy is 0.73% for this reporting period. This percentage is a weighted quarterly average and includes investments in companies that have at least 20% of their revenues aligned with the EU Taxonomy Framework according to data from Trucost. Asset managers depend on available sustainability data relating to their investee companies. Currently, there is a lack of sustainability data available. This has created the risk that investment funds currently report a very low percentage of investments that comply with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy⁽¹⁾?

Yes:

In fossil gas

In nuclear energy

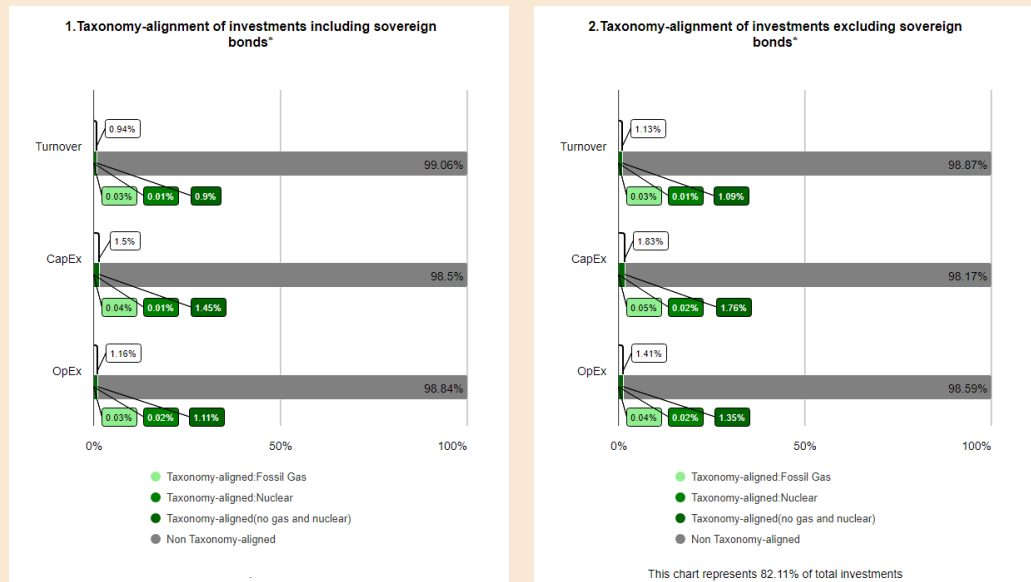

No

(1) Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The sub-fund has invested in activities in the fossil gas and/or nuclear energy sectors that comply with EU taxonomy based on data provided by Trucost. This data does not take into account the definition of 'taxonomy aligned' used by KBC AM NV. According to KBC AM NV's definition, investments in companies are taxonomy-aligned when at least 20% of revenues are aligned with the EU taxonomy framework.

Taxonomy-aligned activities are expressed as a share of:
-turnover reflecting the share of revenue from green activities of investee companies.
-capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
-operational expenditure (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

***For the purpose of these graphs, "sovereign bonds" consist of all sovereign exposures.**

The figure data in the above charts are from data provider Trucost and do not take into account the definition of 'taxonomy-aligned' used by KBC AM NV. According to KBC AM NV's definition, investments in companies are taxonomy-aligned when at least 20% of revenues are aligned with the EU taxonomy framework. Consequently, it is therefore possible that the percentage shown in green (EU taxonomy-aligned investments) in the above charts differs from the 'Taxonomy-aligned' percentage in the table under the 'What was the asset allocation?' section of this annex.

● **What was the share of investments made in transitional and enabling activities?**

The proportion of investments in transition activities was 0.03%.

The proportion of investments in enabling activities was 0.53%.

The figures described in this section are from data provider Trucost.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

During the previous reference period (which ran from 1 January 2023 to 31 December 2023) the percentage of investments aligned with the EU taxonomy was set at 0%. KBC Asset Management NV determined that, at that time, insufficient reliable, timely and verifiable data from issuers or investee companies was available for consistent reporting, based on its own research and services from data providers.

The percentage of investments aligned with the EU taxonomy of the current reference period is 0.73%. This percentage is a weighted quarterly average and includes investments in companies with at least 20% of sales aligned with the EU taxonomy framework (based on data from Trucost). According to KBC AM's definition, investments only qualify as "aligned with the EU taxonomy" when at least 20% of the turnover of investee companies is aligned with the EU taxonomy.

Asset managers depend on available sustainability data relating to their investee companies. Currently, there is a lack of sustainability data available. This has created the risk that investment funds currently report a very low percentage of investments that comply with the EU Taxonomy.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The sub-fund invested 42.07% in sustainable investments as defined in article 2(17) SFDR. The proportion of sustainable investments with an environmental objective that were not aligned with the EU taxonomy was 18.07%.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 24.00%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

During the reporting period, the “other” category could include the following investments:

Assets	Purpose of investments and presence of minimum environmental or social safeguards
Investments in cash	The sub-fund held or invested in these types of assets to achieve investment objectives, to diversify the portfolio, for liquidity management purposes and to hedge risks.
Investments in assets that no longer met screening criteria	The sub-fund held or invested in these types of assets to achieve investment objectives, to diversify the portfolio, for liquidity management purposes and to hedge risks.
Investments in derivatives	Derivatives were used to hedge risks as described in permitted derivatives transactions as set out in section 2. ‘Investment information’ under title ‘Information concerning the sub-fund Business Dynamic DBI-RDT Responsible Investing’ of the prospectus. Investments in derivatives were not used to attain the environmental or social characteristics promoted by the sub-fund and did not affect them.

For investments included under “#2 Other”, there were no environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The sub-fund

- promoted the integration of sustainability into the policy decisions of issuers (companies, governments, supranational debtors and/or agencies linked to governments), by preferring issuers with a better ESG (risk)score;
- promoted climate change mitigation, by preferring issuers with lower greenhouse gas Intensity, with the objective of meeting a predetermined greenhouse gas intensity target;
- promoted sustainable development through ‘sustainable investments’ in accordance with art. 2(17) SFDR.

Sustainable investments consist of bonds financing green and/or social projects and investments in issuers contributing to the achievement of the UN Sustainable Development Goals.

However, no binding minimum percentage has been set for this latter category, although it contributes to the achievement of the minimum percentage of ‘sustainable investments’ for this sub-fund.

The sub-fund excluded issuers involved in activities such as fossil fuels, the tobacco industry, weapons, gambling and adult entertainment from the sub-fund's investment universe. Investments in financial instruments linked to livestock and food prices were also excluded. Companies that derive at least 5% of their income from production or 10% of their income from the sale of fur or special leather were excluded. The negative screening also ensured that issuers based in countries that encourage unfair tax practices, that seriously violate fundamental principles of environmental protection, social responsibility and good governance (through the normative screening, through a poor ESG risk rating, due to involvement in countries that do not comply with sustainability principles by not meeting the sustainability criteria or are exposed to controversial regimes, due to severe controversies related to water emissions, pollution or waste and gender diversity and due to high or severe controversies in the context of activities that have a negative impact on biodiversity and for which insufficient measures are taken to reduce their impact) are excluded from the sub-fund's investment universe.

KBC Asset Management NV executed the voting rights of shares managed in the sub-fund according to the Proxy Voting and Engagement Policy. As such, KBC Asset Management monitored the companies in which the sub-fund is invested in, intervened with investee companies (avoiding insider information), took part in appropriate collective engagement initiatives and exercised voting rights in a considered way. These responsibilities were executed in the exclusive concern of defending the interests of the investors of the funds.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by this sub-fund.

For investments issued by companies the benchmarks MSCI World - Net Return Index and iBoxx Euro Corporates - Total Return Index were used as a basis for comparison, to compare certain ESG characteristics promoted by the sub-fund.

For investments in instruments issued by governments, supranational debtors and/or government-linked agencies, the described reference portfolio of global government bonds was used as a basis for comparison, to compare certain ESG characteristics promoted by the sub-fund.

More information can be found in the table under the "How did the sustainability indicators perform" section of this annex.

How did the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable.

Launch date:	12 November 2024
Initial subscription price:	10 EUR
Maturity date:	29 November 2030
Currency:	EUR

2.1.2. Stock exchange listing

Not applicable.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The object of the sub-fund is twofold (before deducting charges and taxes):

- (1) To repay per share the initial subscription price of 10 EUR at Maturity (i.e. the capital protection). This capital protection is provided through a financial mechanism that will be explained in more detail under the heading *Capital protection*. However, the capital protection does not apply to shareholders who sell their shares before Maturity.
- (2) To provide a potential return through an investment in swaps. The various types of swaps in which the sub-fund may invest are explained in more detail under the *Potential return*.

Capital Protection

The financial mechanism used to achieve capital protection

The financial mechanism used to achieve capital protection at Maturity consists of an investment of the total amount of the subscriptions in bonds and other debt instruments, deposits and/or liquid assets (including cash deposited on a time-deposit account or current account). These investments can have different maturities and coupon payment dates. Using the swaps described under the heading *Permitted swap transactions* (2), these investments are matched with the due dates of the obligations of the sub-fund.

Criteria the investments must meet

The investments must meet one of the following criteria:

- (1) An investment in deposits and/or debt instruments, placed with or issued by financial institutions under the prudential supervision of and established in a Member State of the European Economic Area.
- (2) An investment in debt instruments issued or guaranteed by a Member State of the European Economic Area.
- (3) An investment under an investment strategy with an analogous structure and identical counterparty risk as a direct investment in deposits and/or debt instruments as stated under (1) and (2) above.

The investments under (3) may consist of:

- (A) An investment in notes listed on a stock exchange that are issued by 'Special Purpose Vehicles' (SPVs).

These SPVs are managed by KBC Asset Management NV or a subsidiary.

The underlying assets of the bonds issued by the SPVs consist of a diversified portfolio of deposits issued by financial institutions, bonds, other debt instruments and financial derivatives. When selecting these underlying assets, account is taken of criteria relating to allocation and creditworthiness (see *Permitted asset classes* and *Characteristics of the bonds and other debt instruments*) in order to limit the counterparty risk.

Further details of the criteria these underlying deposits, bonds, other debt instruments and financial derivatives must meet are provided in the base prospectuses for the SPVs, which can be viewed at or downloaded from www.kbc.be/prospectus/spv.

Investors are provided with information on the investments made by both the sub-fund and the SPVs in the annual and half-yearly reports on the open-ended investment company under Belgian law (bevek) to which the sub-fund belongs. These reports can also be viewed at or downloaded from www.kbc.be.

- (B) An investment in:
- deposits with financial institutions under prudential supervision in the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia and/or
 - debt instruments issued by financial institutions under prudential supervision in the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia and/or
 - debt instruments issued or guaranteed by the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia.

Prudential supervision of financial institutions in the United Kingdom, Switzerland, the United States of America, Japan, Canada and Australia can be equated to prudential supervision of financial institutions in the member states of the European Economic Area.

The investments in debt instruments issued by financial institutions under prudential supervision in the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia or issued or guaranteed by the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia have a minimum credit rating as set out under the heading *Characteristics of the bonds and other debt instruments*.

- (C) The investments may also consist of a combination of the investments specified under (A) and (B).

No formal guarantee

No formal guarantee of repayment of the initial subscription price is provided to the sub-fund or to its shareholders. In other words, the capital protection is not binding for the sub-fund as regards the result generated, although achieving this objective through the operation of the financial mechanism is still the top priority.

If the financial mechanism fails and, as a result, the amount per share payable (before deducting charges and taxes) at Maturity is lower than the initial subscription price, KBC Asset Management NV may decide (but is not obliged) to use the management fee it has received during the current financial year from the sub-fund – and possibly also from other sub-funds of the bevek – to cover the shortfall. This is not a guarantee from KBC Asset Management NV, which may decide at any time and at its own discretion whether or not to use the management fee for this purpose.

The capital protection does not apply to shareholders who sell their shares before Maturity.

Potential return

To achieve a potential return, the sub-fund concludes swaps with one or more prime counterparties. Consequently, the sub-fund transfers a portion of the future income from the investments that were made to achieve capital protection to this counterparty (these counterparties) during the life of the sub-fund. In exchange, the counterparty (counterparties) undertake to provide a potential return as specified under the heading *Selected strategy*.

Sub-fund's investment policy

Permitted asset classes

Pursuant to the provisions of the Royal Decree of 12 November 2012 on undertakings for collective investment complying with the conditions of Directive 2009/65/EC, the sub-fund may invest in transferable securities (including bonds and other debt instruments), money market instruments, units (shares) in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as and to the extent permitted by the applicable legislation.

The investment limits and restrictions set out in the Royal Decree of 12 November 2012 on undertakings for collective investment complying with the conditions of Directive 2009/65/EC will be respected at all times.

Characteristics of the bonds and other debt instruments

During the sub-fund's life, the average credit rating of the bonds and other debt instruments shall be at least 'A-' from Standard & Poor's or an equivalent rating from Moody's or Fitch, or, if there is no credit rating available, an average credit risk profile that the manager considers to be at least equivalent.

At the start of the investment, the credit rating of the long-term bonds and other debt instruments shall be at least 'A-' from Standard & Poor's or an equivalent rating from Moody's or Fitch, or, if there is no credit rating available, a credit risk profile that the manager considers to be at least equivalent.

At the start of the investment, the credit rating of the short-term bonds and other debt instruments shall be at least 'A-1' from Standard & Poor's or an equivalent rating from Moody's or Fitch, or, if there is no credit rating available, a credit risk profile that the manager considers to be at least equivalent.

When selecting the bonds and other debt instruments, all maturities are taken into consideration.

Permitted swap transactions

The swaps described below have been concluded with a prime counterparty or prime counterparties within the limits laid down by law.

(1) To achieve a potential return, the sub-fund concludes swaps. Under such swap contracts, the sub-fund transfers a portion of the future income from the investments described under the heading 'Permitted asset classes' to the counterparty or counterparties during the life of the sub-fund. In exchange, the counterparty or counterparties undertake to provide a potential return as specified under the heading *Selected strategy*.

The swaps under (1) are essential to achieve the sub-fund's investment objectives, since this technique facilitates achievement of the goal of generating a potential return.

The sub-fund's risk profile is not affected by the use of these swaps.

(2) If necessary, the sub-fund also concludes swaps to match the due dates of the commitments of the sub-fund with those of the cash flows stemming from the deposits, bonds and other debt instruments described under the heading *Criteria the investments must meet*.

These swaps are essential to achieve the sub-fund's investment objectives, since there are not enough bonds and other debt instruments available on the market whose coupon payments and maturity dates always perfectly match the due dates of the sub-fund's obligations.

The sub-fund's risk profile is not affected by the use of these swaps.

(3) In addition, the sub-fund may conclude swaps to protect itself against the credit risk in respect of issuers of bonds and other debt instruments. Through this type of swap, one or more counterparties takes over the risk of an issuer of a bond or other debt instrument in the sub-fund's portfolio defaulting, in exchange for a fee payable by the sub-fund.

The swaps under (3) serve to hedge the credit risk.

The sub-fund's risk profile is not affected by the use of these swaps.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Strategie selected

Investment objectives and strategy:

The sub-fund has two investment objectives: firstly, it seeks to repay at Maturity 100% of the initial subscription price and secondly a possible capital gain that is contingent on the evolution of a basket of 30 shares of a worldwide selection of companies that are characterised by a high market capitalisation.

At Maturity, a capital gain will be distributed that will equal the best of two alternatives:

- on the one hand 1.50%, settled at 100% of the initial subscription price;
- on the other hand 100% of the increase in the basket of 30 shares, settled at 100% of the initial subscription price, where the maximum capital gain will be 40%. The evolution of the basket is calculated as follows: [end value of the basket minus the starting value of the basket], divided by the starting value of the basket. Decreases in the basket are not taken into account.

Consequently, the capital gain at the Maturity Date will be at least 1.50% (yield to maturity: 0.24% before fees and taxes) and maximum 40% (yield to maturity: 5.73% before costs and taxes).

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

Transparency of adverse sustainability impacts:

The sub-fund took into account the principal adverse impacts on sustainability factors of its investment decisions ("PAI") as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on disclosure on sustainability in the financial services sector ("SFDR") through the application of the KBC Group Investment Policy as well as through the KBC Group Policy on Blacklisted Companies.

Based on the KBC Group Policy on Blacklisted Companies, all companies on the 'KBC Group Blacklist' (including companies involved in controversial weapons such as those prohibited by Belgian law and nuclear and white phosphorus weapons) are excluded as well as the worst offenders of the UN Global Compact.

Consequently, the sub-fund took particular account of exposure to controversial weapons ('indicator 14') by excluding companies involved in controversial weapon systems, and to violations of UN Global Compact principles or Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises ('indicator 10') by excluding the worst offenders of the UN Global Compact.

Maturity

Friday 29 November 2030 (payment with a value date of D+1 banking day)

Currency

EUR, for all shares in the basket, changes in the value of the currency in which they are expressed relative to EUR are irrelevant.

Starting Value

Value of the basket based on the weighted average of the Value of the shares included in the basket during the first 10 Valuation Days, starting from Tuesday 19 November 2024 inclusive.

End Value

Value of the basket based on the weighted average of the Value of the shares included in the basket on the last Valuation Day of the month for the last 12 months before Maturity, more specifically from November 2029 through October 2030 (inclusive).

Value

For all the shares, except for those listed on the Milan stock exchange, the closing price, namely the price of a share in the basket as calculated and notified at closing of the stock exchange by the authority of the stock exchange on which the share is listed (or its legal successor). The reference price is used for shares listed on the Milan stock exchange.

Valuation day

A Valuation Day is set separately for each share in the basket.

A Valuation Day is a day that is a planned trading day both

- i) for the stock exchange on which the share is listed and
- ii) for the stock exchange whose activities have a substantial influence on the trading of options and futures on the share concerned

hereinafter referred to as 'the stock exchanges concerned'.

If on the Valuation Day,

- a) one of the stock exchanges concerned is unexpectedly closed or
- b) there is an event that disrupts the market for a stock exchange concerned or
- c) one of the stock exchanges concerned closes early,

the original Valuation Day is replaced by the following trading day when no event as referred to in a), b) or c) above occurs. An extraordinary closure that has been announced in advance is not considered as early closure.

If a valuation is made on consecutive Valuation Days, the trading day that replaces the original Valuation Day (i) may not coincide with another original Valuation Day and (ii) may not be a trading day that already replaces another original Valuation Day.

However, if an event as referred to under a), b) or c) above occurs on each of the eight trading days following the original Valuation Day,

- (i) the eighth trading day shall be considered as the original Valuation Day and
- (ii) the Bevek shall assess, in good faith and in consultation with the prime counterparty or counterparties with which it has concluded a swap agreement, the price of the share as it would have been traded on that eighth trading day and
- (iii) the Bevek will notify shareholders of any changes regarding setting the Starting Value and/or End Value and conditions of payment.

Relevant basket

In the table below, the columns from left to right reflect the number of the share, the name of the share, the Bloomberg code, the exchange on which it trades (City-MIC Code) and its initial weighting in the basket.

(i)	Name	Bloomberg Code	Exchange	Initial Weighting Coefficients
1	ALLIANZ SE	ALV GY Equity	FRANKFURT - XETR	2.0000%

Basket composition methodology

KBC Asset Management used the following methodology to determine the composition of the sub-fund's basket.

Step 1 :

The starting point is the global equities universe from which a selection of potential investments is derived in accordance with the economic criteria for the composition of the basket and subject to restrictions regarding stock market capitalisation and liquid assets.

The economic criteria for the composition of the basket determine the size of the final selection.

Step 2 :

The selection of shares obtained in step 1 is reduced to a short list using a quantitative selection based on past financial data. The shares selected are those of companies that achieve a good score in terms of management quality, a healthy balance-sheet structure and a positive trend in profitability.

Step 3 :

The selection of shares obtained in step 2 is then verified by KBC Asset Management analysts. Shares that are permanently monitored by the analysts and those for which there is a negative recommendation, when the product is launched, are then withdrawn from the selection.

Step 4 :

The last reduction of the selection provides the final basket. This selection was made using the technical parameters of options (including the term, volatility, dividend yield and interest rate).

The final basket must satisfy the legal requirements concerning the quantity of shares and adequate distribution in the weighting. In addition, care is taken to ensure compliance with the geographical and/or sector spread. The analysts make a qualitative assessment of each share used taking account of specific knowledge of these shares and the sectors/regions from which they come, in accordance with the term of the sub-fund.

For the sub-fund Horizon CSOB Global 100 BestOf 2, about 1706 equities were selected during step 1.

The initial selection was reduced by a maximum 20% in step 2.

This was again reduced by 10% (indicative) in step 3. The final basket set up during step 4 is described above under *Relevant basket*. This basket makes it possible to offer the sub-fund Horizon CSOB Global 100 BestOf 2 under the conditions set out in the investment policy referred to above. Here the selection process uses parameters that could affect the potential return on the investments.

Selection criteria for the basket :

A share/issuer may only form part of the basket if (i) it is listed on a stock exchange, (ii) it has a high market capitalisation, (iii) the Board of Directors of the Beveik has approved its inclusion in the basket, (iv) the issuer is not included in the KBC Group Policy on Blacklisted Companies* and (v) at the time the swap contracts are being concluded (see 'Permitted swap transactions'), the issuer of the share complies with the KBC Group Investment Policy* (the 'Selection criteria').

* The KBC Group Policy on Blacklisted Companies and the KBC Group Investment Policy can be found at www.kbc.be/investment-legal-documents > General exclusion policies for conventional funds and socially responsible investment funds, Paragraph 1 'KBC Group Policy on Blacklisted Companies' and 2 'KBC Group Investment Policy'.

Modifications to the basket due to mergers, acquisitions, demergers, nationalisation, bankruptcy or disqualification :

Mergers or acquisitions

If, during the life of the sub-fund, one or more issuers of shares in the basket are involved in a merger or acquisition, the shares of the relevant issuers which still meet the selection criteria and comply with the KBC Group Investment Policy* after these operations will be given a weighting in the basket equal to the sum of the weightings of the shares of all issuers involved in the operation. If, after the operation, none of the issuers involved in the operation meet the selection criteria or comply with the KBC Group Investment Policy*, the procedures described under 'Nationalisation, bankruptcy or disqualification' will apply.

* The KBC Group Investment Policy can be found at www.kbc.be/investment-legal-documents > General exclusion policies for conventional funds and responsible investment funds, Paragraph 2 'KBC Group Investment Policy'.

Demergers

If an issuer of a share in the basket proceeds to a demerger, then the share from the issuer concerned can be substituted either by one of the shares that came about as a result of the demerger and that meets the selection criteria and complies with the KBC Group Investment Policy*, or by a basket of shares arising from the demerger which meet the selection criteria and comply with the KBC Group Investment Policy*. This basket of shares will, when calculating the number of shares in the basket, be considered as one share. If, after the operation, none of the shares resulting from the demerger meet the selection criteria or comply with the KBC Group Investment Policy*, the procedures described under 'Nationalisation, bankruptcy or disqualification' will apply.

* The KBC Group Investment Policy can be found at www.kbc.be/investment-legal-documents > General exclusion policies for conventional funds and responsible investment funds, Paragraph 2 'KBC Group Investment Policy'.

Nationalisation, bankruptcy or disqualification

If an issuer of a share in the basket is nationalised, declared bankrupt or no longer meets the selection criteria ('disqualification'), this share will be sold at the last known price before removal. The amount thus realised will then be invested until Maturity at the rate of interest in force on money or bond markets at the moment of removal, and this for a term equal to the term remaining until Maturity of the sub-fund. The realised amount plus the interest will be taken into account at Maturity as the result achieved for that share in order to calculate the final increase in the value of the basket at Maturity.

Securities Financing Transactions (SFTs)

The sub-fund may not lend any financial instruments.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Beveik under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Beveik under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'.

2.1.4. Financial portfolio management

The intellectual management, with the exception of the creation of the sub-fund and its maintenance in terms of the technical, product-specific and legal aspects has been delegated by the management company to KBC Fund Management Limited, 4th Floor, Scotch House, 6/7 Burgh Quay, Dublin 2, D02 VK44, Ireland.

2.1.8. Summary risk indicator

- 2 on a scale of 1 (lowest risk) to 7 (highest risk)
- a moderate level of inflation risk: there is no protection against an increase of the inflation.
 - a moderate level of market risk: the level of the risk reflects the volatility of the stock market.
 - a moderate level of performance risk: the level of the risk reflects the volatility of the stock market.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

2.1.9. Leveraged finance

The total amount of leveraged finance used by the sub-fund is 1 274 000.00 EUR.

This amount was calculated by multiplying the leverage ratio calculated using the UCITS-commitment method by the sub-fund's total assets under management.

Ongoing Charges:

Not applicable

Existence of Commission Sharing Agreements

Not applicable

Fee sharing agreements en rebates

The management company has shared 70.00% of its fee with the distributor, and institutional and/or professional parties.

This percentage has been calculated relative to the fee for managing the investment portfolio of the sub-fund when it was launched.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.6 Bestaan van fee sharing agreements en rebates'.

2.4.7. Notes to the financial statements and other data

Fee for managing the investment portfolio	max. 0.20 EUR	per unit per year, as described below. The management fee is payable at the end of each month.
Administration fee	max. 0.01 EUR	per unit per year, based on the number of units issued at the start of each six-month period and is payable at the end of each month.
Fee for financial services	Max 950 EUR	per year. However, the fee will never exceed a maximum of 0.005% calculated on the basis of the average total net assets of the sub-fund.
Custodian's fee	max. 0.05%	per year and calculated monthly on the basis of the value of the securities held in custody by the custodian on the last banking day of the preceding month, except on those assets invested in underlying undertakings for collective Investment managed by a financial institution of the KBC group.
Fee paid to the bevek's statutory auditor	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges' for this structured sub-fund.	
Fee paid to the directors	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Other charges (estimation) such as the regulator's fees, the cost of publication and any marketing costs		* During the first year following the initial subscription period: 0.30% of the net assets of the sub-fund per year. * After that: 0.10% of the net assets of the sub-fund per year.

Fee for managing the investment portfolio

KBC Asset Management NV receives a fee for managing the sub-fund's investments. This fee consists of a varying amount of max. 0.2 EUR per unit per year (with a maximum of EUR per unit per year for risk management).

This fee, which is calculated every six months, is paid monthly on the last banking day of each month. It can change from one six-month period to the next, within the limits set out below, and is based on the number of units issued at the start of each six-month period.

In the calculation, account is taken of the difference between:

- the return generated by the investments in bonds and other debt instruments, deposits, and/or liquid assets in order to achieve the capital protection on the Maturity date (see *The financial mechanism used to achieve capital protection*), and
- the expenses borne by the sub-fund to achieve a potential return (see *Permitted 'swap' transactions*),
- after deducting the expected fixed and variable expenses of the sub-fund, as mentioned above.

Of this, KBC Fund Management Ltd. receives a fee of no more than 0.19 EUR per unit per year from KBC Asset Management NV for the intellectual management of the sub-fund. KBC Fund Management Ltd. is a wholly owned subsidiary of KBC Asset Management NV.

KBC Asset Management NV has informed the bevek that, if due to the failure of the financial mechanism, the amount that should be paid per unit (after deducting taxes and charges) on the Maturity date, as relevant, is lower than the initial subscription price, KBC Asset Management NV may decide (but is not obliged to) to use the management fee it receives during the current financial year from the sub-fund – and possibly also from other sub-funds of the bevek – to cover this shortfall. This is not a guarantee from KBC Asset Management NV, which may decide at any time and at its own discretion whether or not to use the management fee for this purpose.

KBC Asset Management NV or one of its subsidiaries has also been appointed manager of the SPVs in which the sub-fund may invest (see *Criteria the investments must meet*). KBC Asset Management NV or one of its subsidiaries, as the case may be, receives an annual fee from the relevant SPVs for their management. This

management fee may not exceed 0.15% per year and is calculated on the assets managed at the end of the quarter.

The sum of (i) the fee for managing the investment portfolio that the sub-fund pays to the management company and (ii) the management fee that the SPVs in which the sub-fund invests pay to the asset manager, shall never exceed 0.20 EUR per unit per year, as described above.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main object of the sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.
The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. **Consequently, there may be an impact on concentration risk.** Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

The sub-fund invests directly or indirectly in more risky assets (such as shares, share UCIs, medium and longer-term bonds, medium and longer-term bond UCIs, certain money market instruments, and alternative investments (like real estate and financial instruments that are linked to price movements on the commodity markets) and/or less risky assets (such as certain money market instruments, shorter-term bonds, shorter-term bond UCIs and cash,...). Compared with bond UCIs classified as riskier assets, bond UCIs in the less risky assets category invest more in instruments with a shorter term to maturity, which means that they are less sensitive to movements in interest rates. In principle, therefore, they are less volatile.

The sub-fund may invest up to 95% in shares, up to 65% in medium and longer-term bonds and up to 100% in shorter-term bonds.

The sub-fund has two objectives:

1. to achieve the highest possible return by making investments in accordance with the investment strategy of KBC Asset Management NV.

The target allocation for the asset classes is 55% shares and/or share-related investments ('the stock component') and 45% bonds and/or bond-related investments ('the bond component').

It is permitted to deviate from the target allocation based on the investment strategy of KBC Asset Management NV (see www.kbc.be/investment-strategy) and/or to protect the floor price, as described in section 2. It is therefore possible for the sub-fund to invest in asset classes that have not been included in the target allocation.

2. to protect a floor price.

The sub-fund also aims to set a floor price for the net asset value each year. This floor price is valid for one year and is always equal to 90% of the net asset value on the last Belgian banking day of the previous July. The initial floor price is equal to 90% of the initial net asset value and is valid from 30 June 2014 to the last banking day of July 2015, inclusive. Achieving the objective to protect the floor price becomes increasingly important the closer the net asset value gets to the floor price. In such a situation, the asset allocation will be increasingly focused on protecting the floor price and will deviate from the target allocation specified in point 1 above.

The floor price changes each year in line with the net asset value. Any fall in the net asset value at the time the new floor price is determined will mean that the new floor price is lower than the current floor price. Any increase in the net asset value at the time the new floor price is determined will mean that the new floor price is higher than the current floor price.

The sub-fund does not provide any capital protection or capital guarantee; nor does it offer a guaranteed return. It is therefore possible for the net asset value to be lower than the floor price.

The allocation of the assets is influenced by whether they involve more or less risk. Riskier assets are intended to generate the return, while less risky assets are designed to protect the floor.

During the year, the manager may deviate from the target allocation in the following ways:

1) If the net asset value falls towards the floor price, the manager may intervene and replace investments in riskier assets with investments in less risky ones. If the net asset value hits the floor price, the manager may switch completely to investments in money market instruments, shorter-term bonds, shorter-term bond funds and/or cash. Conversely, if the net asset value moves away from the floor price and goes up to a strong enough extent, the manager may intervene and gradually reallocate the assets by replacing the less risky assets with more risky ones.

2) If markets develop favourably and provided the net asset value is sufficiently high relative to the floor price, and for as long as both these conditions are met, the stock component can temporarily go up sharply relative to the percentage determined when the floor price was set.

3) The bond component will be monitored separately and, if its performance is negative, the exposure within this component may be reduced periodically, for instance by reducing investments in bonds in favour of investments in money market instruments and cash.

The stock component is invested in a worldwide selection of shares that may come from any region, sector or theme.

For details of the bond component, please see the 'Characteristics of the bonds and debt instruments' section below.

The fund is actively managed without referring to any benchmark.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

Transparency of adverse sustainability impacts:

The sub-fund considers the principal adverse impacts of its investment decisions on sustainability factors ('PAI') as

described by the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector ('SFDR').

The principal adverse impacts on sustainability factors were explicitly taken into account through the General exclusion policy. More information on the principal adverse impact indicators that are taken into account can be found at www.kbc.be/investment-legal-documents > General exclusion policy for conventional and Responsible Investing funds and www.kbc.be/investment-legal-documents > Exclusion policies for Responsible Investing funds.

In addition, the principal adverse impacts on sustainability factors were implicitly taken into account through the Proxy Voting and Engagement Policy of KBC Asset Management NV (more information can be found at www.kbc.be/investment-legal-documents > Retrospective Proxy Voting - overview > Proxy Voting and Engagement Policy).

Characteristics of the bonds and debt instruments

The sub-fund invests in bonds and debt instruments issued by both companies and public authorities.

The sub-fund invests directly and/or indirectly at least 50% of its assets in bonds and debt instruments

- in securities rated investment grade (at least BBB-/Baa3 for long-term debt, A3/F3/P3 for short-term debt) by at least one of the following rating agencies: Moody's Investors Service, Standard & Poor's or Fitch Ratings, and/or
- in government bonds issued in local currency or non-subordinated corporate bonds* which do not have a credit rating from the rating agencies mentioned above but the issuer of which has an investment grade rating by at least one of the rating agencies mentioned above, and/or
- in money market instruments whose issuer has an investment grade rating (minimum A3/F3/P3 for short-term debt) from at least one of the above rating agencies.

This means that the sub-fund may invest up to 50% of its assets invested in bonds and debt instruments that do not have a credit rating from the above-mentioned rating agencies and/or which do not comply with the above-mentioned credit requirements.

All maturities are taken into consideration in the selection of bonds and debt instruments.

*In the event of the bankruptcy of the relevant issuer, subordinated bonds are subordinated to the company's other debts: the company's other debts are paid first, then and only if there is still capital left, the holders of the subordinated bonds are fully or partially repaid; the holder of the subordinated bond does, however, have priority over the shareholders of the issuer in question.

Investments in assets other than securities or money market instruments

The sub-fund will invest primarily in units of undertakings for collective investment.

Securities Financing Transactions (SFTs)

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.1. Securities Financing Transactions (SFTs)'.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'.

2.1.4. Financial portfolio management

The intellectual management, with the exception of the creation of the sub-fund and its maintenance in terms of the technical, product-specific and legal aspects has been delegated by the management company to KBC Fund Management Limited, 4th Floor, Scotch House, 6/7 Burgh Quay, Dublin 2, D02 VK44, Ireland.

2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2.1.6. Index and benchmark

Not applicable.

2.1.7. Policy pursued during the financial year

The objective of the fund is to achieve the highest possible return, while aiming at maintaining the NAV above the floor level. The allocation in equity, bond and money market investments is determined by a dynamic portfolio insurance algorithm. The fund has three profiles, defensive, dynamic and very dynamic and the gearing is determined by the NAV distance to the floor.

Horizon Comfort Pro 90 Aug NAV 12/12/2024 Floor NAV

1221.6 1099.44

As we started into 2024, positive momentum continued for global stock markets. Better-than-expected economic growth, especially in the resilient US economy, and solid corporate earnings prevailed over expensive valuations. The enthusiasm for the Artificial Intelligence theme provided to be a tail-wind for the market driving momentum, especially in tech linked names.

Equity markets dipped briefly in April as the US economy appeared to be gradually slowing down. Persistent inflation (especially in the services sector and housing) and recent volatile oil prices meant that the disinflation process proceeded at pace slower than previously anticipated. This sticky inflation meant that the Federal Reserve and other major central banks remained on hold for much of the first half of the year. Although, the European Central Bank bucked this trend and cut interest rates by 25bps in June.

As the second half of the year got underway, a confluence of events caused equity markets to stumble. The Biden administration in the US sought to tighten restrictions on export of technological equipment to China, which caused investors to reassess their outlook of technology stocks and rotate into other sectors. It also appeared that economic growth, which had remained surprisingly resilient to many, might be coming to an end, as the unemployment rate in the US hit its highest level since the Covid pandemic in July. Ultimately, these concerns were short lived, as it allowed the policy rate-cutting cycle to gather momentum, corporate earnings remained resilient and economic indicators (especially in for US economy) remained strong.

This US exceptionalism largely continued for the remainder of the year, with the results of the US elections further contributing to investor optimism. This largely allowed investors to look past the (seemingly increasing) macro risks - including the ongoing wars in the Middle East/Ukraine, fiscal sustainability concerns, political uncertainty in many countries and weak EU/Chinese growth.

2.1.8. Future policy

Future investments and the level of participation in risky assets will be determined by the dynamic portfolio insurance model, ensuring that the bottom line is protected.

The **Horizon Comfort Pro August 90** will merge with the **Horizon KBC Dynamic Balanced Responsible Investing**.

2.1.9. Summary risk indicator (SRI)

3 on a scale of 1 (lowest risk) to 7 (highest risk)

- a moderate level of inflation risk: the bond component does not provide any protection against an increase in inflation.
- a moderate level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a real chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of credit risk: the bond component invests primarily - but not exclusively- in bonds with an investment grade rating. Consequently, the risk that an issuer can no longer meet its obligations is higher than in an investment that consists only of bonds with an investment grade rating. If investors are in doubt about the creditworthiness of the issuers of the bonds, the value of those bonds can fall.
- a moderate level of market risk: the level of the risk reflects the volatility of the equity component.
- a moderate level of performance risk: the level of the risk reflects the volatility of the equity component.

There is no capital protection.

A more detailed explanation can be found in this report's General information on the Beveik under 'Information for

shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

2.1.10. Leveraged finance

The total amount of leveraged finance used by the sub-fund is 0.00 EUR.

This amount was calculated by multiplying the leverage ratio calculated using the UCITS-commitment method by the sub-fund's total assets under management.

2.1.11. Value-at-Risk

Not applicable

The internal classification system, on the basis of which this sectoral spread is calculated, has been changed as of 31/12/2023. In order to provide a meaningful comparison of the sectoral spread across reporting periods, the sectoral spread calculations will be de-duplicated in the annual reports. This means that a summary table will be shown for each classification system.

Currency breakdown (as a % of net assets)

The currency distribution of the sub-fund's investments is calculated based on the currency distribution of the underlying investments of the UCIs in which the sub-fund invests (look through).

2.4.2. Changes in the composition of the assets of Horizon Comfort Pro August 90 (in Euro)

	1 st half of year	2 nd half of year	Year
Purchases	15,473,434.30	39,665,571.24	55,139,005.55
Sales	19,109,500.72	41,435,895.81	60,545,396.53
Total 1	34,582,935.03	81,101,467.05	115,684,402.08
Subscriptions	193,531.02	264,620.30	458,151.32
Redemptions	4,061,570.90	907,049.47	4,968,620.37
Total 2	4,255,101.92	1,171,669.77	5,426,771.69
Monthly average of total assets	31,423,402.23	30,585,071.56	30.995.612.09
Turnover rate	96.51%	261.33%	355.72%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period. A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions. A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio. Active asset management may result in high turnover rates (monthly percentage >50%).

The detailed list of transactions can be consulted free of charge at the company designated as financial service: KBC Bank NV, Havenlaan 2, B-1080 Brussels

2.4.3. Amount of commitments in respect of financial derivatives positions

Nil

2.4.4. Changes in the number of subscriptions and redemptions and the net asset value

Period	Change in number of shares in circulation						
Year	Subscriptions		Redemptions		End of period

2.4.5. Performance figures

* These performances were achieved under circumstances that no longer apply

Cap Div	ISIN Code	Curr ency	1 year		3 years		5 years		10 years		Since Launch*	
			Share classes	Bench mark	Share classes	Bench mark	Share classes	Bench mark	Share classes	Bench mark	Starting date	Share classes
CAP	BE6266330339	EUR	12.47%		0.67%		2.38%		2.07%		30/06/2014	2.19%

Risk warning: Past performance is not a guide to future performance.

* Return on annual basis.

- The bar chart shows the performance for full financial years.
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage.
- Calculation method for date D, where NAV stands for net asset value:
Capitalisation units (CAP)
Return on date D over a period of X years :

$$[\text{NIW}(\text{D}) / \text{NIW}(\text{Y})]^{[1 / \text{X}] - 1}$$
 where Y = D-X
 Return on date D since the start date S of the unit:

$$[\text{NIW}(\text{D}) / \text{NIW}(\text{S})]^{[1 / \text{F}] - 1}$$
 where F = 1 if the unit has existed for less than one year on date D
 where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D
- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation shares.

2.4.6. Costs

Ongoing Charges:

Management fees and other administrative or operating costs: 1,655%

Transaction costs: 0,464%

Percentage calculated at reporting date: 31 December 2024 .

A more detailed explanation with respect to the method of calculating ongoing charges and the relevant exclusions can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.5. Ongoing charges'

Fee for managing the investment portfolio

The management fee amounts to 251,664.21 EUR. An additional fee of 93,848.84 EUR was charged regarding commissions and charges for allocating the assets.

Existence of Commission Sharing Agreements

Not applicable

Existence of fee sharing agreements and rebates

The management company has shared 41,63% of its fee with the distributor, and institutional and/or professional parties.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.6. Fee-sharing agreements and rebates'.

2.4.7. Notes to the financial statements and other data

Fee for managing the investment portfolio	Max 1.49%	<p>per year (0.30% of which is for the protection of the floor price) calculated on the basis of the average total net assets of the sub-fund.</p> <p>For the portion of net assets corresponding to an investment in undertakings for collective investment(*) managed by a financial institution belonging to the KBC group, the fee for managing the investment portfolio equals the difference between the fee for managing the investment portfolio of the aforementioned undertakings for collective investment and the percentage (to the left) that is paid for managing the investment portfolio.</p> <p>KBC Fund Management Limited receives a fee from the management company of max. 1.49% per year calculated on the basis of the average total net assets of the sub-fund, without the total fees and charges received by the management company being exceeded.</p> <p>(*) The fee for the management of the investment portfolio of the undertakings for collective investment in which the sub-fund invests will amount to a year.</p>
Administration fee	0.10%	per year calculated on the basis of the average total net assets of the sub-fund.
Fee for financial services	Max 950 EUR	per year. However, the fee will never exceed a maximum of 0.005% calculated on the basis of the average total net assets of the sub-fund.
Custodian's fee	Max 0.04%	per year and calculated monthly on the basis of the value of the securities held in custody by the custodian on the last banking day of the preceding month, except on those assets invested in underlying undertakings for collective investment managed by a financial institution of the KBC group.
Fee paid to the bevek's statutory auditor	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Fee paid to the directors	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Annual tax	See prospectus General Part : 'Information concerning the Bevek - H. Tax treatment'	
Other charges (estimation) such as the regulator's fees, the cost of publication and any marketing costs	0.10%	of the net assets of the sub-fund per year.

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

Launch date:	13 May 2015
Initial subscription price:	1 000 EUR
Currency:	EUR

2.1.2. Stock exchange listing

Not applicable.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main object of the sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. **Consequently, there may be an impact on concentration risk.** Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

The sub-fund invests directly or indirectly in more risky assets (such as shares, share UCIs, medium and longer-term bonds, medium and longer-term bond UCIs, certain money market instruments, and alternative investments (like real estate and financial instruments that are linked to price movements on the commodity markets)) and/or less risky assets (such as certain money market instruments, shorter-term bonds, shorter-term bond UCIs and cash,...). Compared with bond UCIs classified as riskier assets, bond UCIs in the less risky assets category invest more in instruments with a shorter term to maturity, which means that they are less sensitive to movements in interest rates. In principle, therefore, they are less volatile.

The sub-fund may invest up to 95% in shares, up to 65% in medium and longer-term bonds and up to 100% in shorter-term bonds.

The sub-fund has two objectives:

1. to achieve the highest possible return by making investments in accordance with the investment strategy of KBC Asset Management NV.

The target allocation for the asset classes is 55% shares and/or share-related investments ('the stock component') and 45% bonds and/or bond-related investments ('the bond component'). It is permitted to deviate from the target allocation based on the investment strategy of KBC Asset Management NV (see www.kbc.be/investment-strategy) and/or to protect the floor price, as described in section 2. It is therefore possible for the sub-fund to invest in asset classes that have not been included in the target allocation.

2. to protect a floor price.

The sub-fund also aims to set a floor price for the net asset value each year. This floor price is valid for one year and is always equal to 90% of the net asset value on the last Belgian banking day of the previous January. The initial floor price is equal to 90% of the initial net asset value and is valid from 18 May 2015 to 29 January 2016, inclusive. Achieving the objective to protect the floor price becomes increasingly important the closer the net asset value gets to the floor price. In such a situation, the asset allocation will be increasingly focused on protecting the floor price and will deviate from the target allocation specified in point 1 above.

The floor price changes each year in line with the net asset value. Any fall in the net asset value at the time the new floor price is determined will mean that the new floor price is lower than the current floor price. Any increase in the net asset value at the time the new floor price is determined will mean that the new floor price is higher than the current floor price.

The sub-fund does not provide any capital protection or capital guarantee; nor does it offer a guaranteed return. It is therefore possible for the net asset value to be lower than the floor price.

The allocation of the assets is influenced by whether they involve more or less risk. Riskier assets are intended to generate the return, while less risky assets are designed to protect the floor.

During the year, the manager may deviate from the target allocation in the following ways:

1) If the net asset value falls towards the floor price, the manager may intervene and replace investments in riskier assets with investments in less risky ones. If the net asset value hits the floor price, the manager may switch completely to investments in money market instruments, shorter-term bonds, shorter-term bond funds and/or cash. Conversely, if the net asset value moves away from the floor price and goes up to a strong enough extent, the manager may intervene and gradually reallocate the assets by replacing the less risky assets with more risky ones.

2) If markets develop favourably and provided the net asset value is sufficiently high relative to the floor price, and for as long as both these conditions are met, the stock component can temporarily go up sharply relative to the percentage determined when the floor price was set.

3) The bond component will be monitored separately and, if its performance is negative, the exposure within this component may be reduced periodically, for instance by reducing investments in bonds in favour of investments in money market instruments and cash.

The stock component is invested in a worldwide selection of shares that may come from any region, sector or theme.

For details of the bond component, please see the 'Characteristics of the bonds and debt instruments' section below. The fund is actively managed without referring to any benchmark.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

Transparency of adverse sustainability impacts:

The sub-fund considers the principal adverse impacts of its investment decisions on sustainability factors ('PAI') as

described by the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector ('SFDR').

The principal adverse impacts on sustainability factors were explicitly taken into account through the General exclusion policy. More information on the principal adverse impact indicators that are taken into account can be found at www.kbc.be/investment-legal-documents > General exclusion policy for conventional and Responsible Investing funds and www.kbc.be/investment-legal-documents > Exclusion policies for Responsible Investing funds.

In addition, the principal adverse impacts on sustainability factors were implicitly taken into account through the Proxy Voting and Engagement Policy of KBC Asset Management NV (more information can be found at www.kbc.be/investment-legal-documents > Retrospective Proxy Voting - overview > Proxy Voting and Engagement Policy).

Characteristics of the bonds and debt instruments

The sub-fund invests in bonds and debt instruments issued by both companies and public authorities.

The sub-fund invests directly and/or indirectly at least 50% of its assets in bonds and debt instruments

- in securities rated investment grade (at least BBB-/Baa3 for long-term debt, A3/F3/P3 for short-term debt) by at least one of the following rating agencies: Moody's Investors Service, Standard & Poor's or Fitch Ratings, and/or
- in government bonds issued in local currency or non-subordinated corporate bonds* which do not have a credit rating from the rating agencies mentioned above but the issuer of which has an investment grade rating by at least one of the rating agencies mentioned above, and/or
- in money market instruments whose issuer has an investment grade rating (minimum A3/F3/P3 for short-term debt) from at least one of the above rating agencies.

This means that the sub-fund may invest up to 50% of its assets invested in bonds and debt instruments that do not have a credit rating from the above-mentioned rating agencies and/or which do not comply with the above-mentioned credit requirements.

All maturities are taken into consideration in the selection of bonds and debt instruments.

*In the event of the bankruptcy of the relevant issuer, subordinated bonds are subordinated to the company's other debts: the company's other debts are paid first, then and only if there is still capital left, the holders of the subordinated bonds are fully or partially repaid; the holder of the subordinated bond does, however, have priority over the shareholders of the issuer in question.

Investments in assets other than securities or money market instruments

The sub-fund will invest primarily in units of undertakings for collective investment managed by a KBC-group company.

Securities Financing Transactions (SFTs)

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.1. Securities Financing Transactions (SFTs)'.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'.

2.1.4. Financial portfolio management

The intellectual management, with the exception of the creation of the sub-fund and its maintenance in terms of the technical, product-specific and legal aspects has been delegated by the management company to KBC Fund Management Limited, 4th Floor, Scotch House, 6/7 Burgh Quay, Dublin 2, D02 VK44, Ireland.

2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2.1.6. Index and benchmark

Not applicable.

2.1.7. Policy pursued during the financial year

The objective of the fund is to achieve the highest possible return, while aiming at maintaining the NAV above the floor level. The allocation in equity, bond and money market investments is determined by a dynamic portfolio insurance algorithm. The fund has three profiles, defensive, dynamic and very dynamic and the gearing is determined by the NAV distance to the floor.

Horizon Comfort Pro 90 Feb NAV 12/12/2024 Floor NAV

1003.26 902.93

As we started into 2024, positive momentum continued for global stock markets. Better-than-expected economic growth, especially in the resilient US economy, and solid corporate earnings prevailed over expensive valuations. The enthusiasm for the Artificial Intelligence theme provided to be a tail-wind for the market driving momentum, especially in tech linked names.

Equity markets dipped briefly in April as the US economy appeared to be gradually slowing down. Persistent inflation (especially in the services sector and housing) and recent volatile oil prices meant that the disinflation process proceeded at pace slower than previously anticipated. This sticky inflation meant that the Federal Reserve and other major central banks remained on hold for much of the first half of the year. Although, the European Central Bank bucked this trend and cut interest rates by 25bps in June.

As the second half of the year got underway, a confluence of events caused equity markets to stumble. The Biden administration in the US sought to tighten restrictions on export of technological equipment to China, which caused investors to reassess their outlook of technology stocks and rotate into other sectors. It also appeared that economic growth, which had remained surprisingly resilient to many, might be coming to an end, as the unemployment rate in the US hit its highest level since the Covid pandemic in July. Ultimately, these concerns were short lived, as it allowed the policy rate-cutting cycle to gather momentum, corporate earnings remained resilient and economic indicators (especially in for US economy) remained strong.

This US exceptionalism largely continued for the remainder of the year, with the results of the US elections further contributing to investor optimism. This largely allowed investors to look past the (seemingly increasing) macro risks - including the ongoing wars in the Middle East/Ukraine, fiscal sustainability concerns, political uncertainty in many countries and weak EU/Chinese growth.

2.1.8. Future policy

Future investments and the level of participation in risky assets will be determined by the dynamic portfolio insurance model, ensuring that the bottom line is protected.

The **Horizon Comfort Pro February 90** will merge with the **Horizon KBC Dynamic Balanced Responsible Investing**.

2.1.9. Summary risk indicator (SRI)

3 on a scale of 1 (lowest risk) to 7 (highest risk)

- a moderate level of inflation risk: the bond component does not provide any protection against an increase in inflation.
- a moderate level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a real chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of credit risk: the bond component invests primarily - but not exclusively- in bonds with an investment grade rating. Consequently, the risk that an issuer can no longer meet its obligations is higher than in an investment that consists only of bonds with an investment grade rating. If investors are in doubt about the creditworthiness of the issuers of the bonds, the value of those bonds can fall.
- a moderate level of market risk: the level of the risk reflects the volatility of the equity component.
- a moderate level of performance risk: the level of the risk reflects the volatility of the equity component.

There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

2.1.10. Leveraged finance

The total amount of leveraged finance used by the sub-fund is 0.00 EUR.

This amount was calculated by multiplying the leverage ratio calculated using the UCITS-commitment method by the sub-fund's total assets under management.

2.1.11. Value-at-Risk

Not applicable

2.2. Balance sheet

Balance sheet layout		31/12/2024 (in Euro)	31/12/2023 (in Euro)

The internal classification system, on the basis of which this sectoral spread is calculated, has been changed as of 31/12/2023. In order to provide a meaningful comparison of the sectoral spread across reporting periods, the sectoral spread calculations will be de-duplicated in the annual reports. This means that a summary table will be shown for each classification system.

Currency breakdown (as a % of net assets)

The currency distribution of the sub-fund's investments is calculated based on the currency distribution of the underlying investments of the UCIs in which the sub-fund invests (look through).

2.4.2. Changes in the composition of the assets of Horizon Comfort Pro February 90 (in Euro)

	1 st half of year	2 nd half of year	Year
Purchases	32,043,740.31	17,750,666.02	49,794,406.33
Sales	35,842,317.67	22,572,437.84	58,414,755.51
Total 1	67,886,057.99	40,323,103.86	108,209,161.85
Subscriptions	352,084.58	187,284.13	539,368.71
Redemptions	4,162,239.34	4,667,290.46	8,829,529.80
Total 2	4,514,323.92	4,854,574.59	9,368,898.51
Monthly average of total assets	30,350,572.93	28,902,540.58	29,611,659.30
Turnover rate	208.80%	122.72%	333.79%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period. A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions. A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio. Active asset management may result in high turnover rates (monthly percentage >50%).

The detailed list of transactions can be consulted free of charge at the company designated as financial service: KBC Bank NV, Havenlaan 2, B-1080 Brussels

2.4.3. Amount of commitments in respect of financial derivatives positions

Nil

2.4.4. Changes in the number of subscriptions and redemptions and the net asset value

Period	Change in number of shares in circulation						
Year	Subscriptions		Redemptions		End of period		
	Capitalization	Distribution	Capitalization	Distribution	Capitalization	Distribution	Totaal

2.4.5. Performance figures

* These performances were achieved under circumstances that no longer apply

Cap Div	ISIN Code	Curr ency	1 year		3 years		5 years		10 years		Since Launch*	
			Share classes	Bench mark	Share classes	Bench mark	Share classes	Bench mark	Share classes	Bench mark	Starting date	Share classes
CAP	BE6277711659	EUR	12.42%		1.22%		1.17%				13/05/2015	1.07%

Risk warning: Past performance is not a guide to future performance.

* Return on annual basis.

- The bar chart shows the performance for full financial years.
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage.
- Calculation method for date D, where NAV stands for net asset value:
Capitalisation units (CAP)
Return on date D over a period of X years :

$$[\text{NIW}(\text{D}) / \text{NIW}(\text{Y})]^{[1 / \text{X}]} - 1$$
 where Y = D-X
 Return on date D since the start date S of the unit:

$$[\text{NIW}(\text{D}) / \text{NIW}(\text{S})]^{[1 / \text{F}]} - 1$$
 where F = 1 if the unit has existed for less than one year on date D
 where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D
- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation shares.

2.4.6. Costs

Ongoing Charges:

Management fees and other administrative or operating costs: 1,674%

Transaction costs: 0,526%

Percentage calculated at reporting date: 31 December 2024 .

A more detailed explanation with respect to the method of calculating ongoing charges and the relevant exclusions can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.5. Ongoing charges'

Fee for managing the investment portfolio

The management fee amounts to 240,416.29 EUR. An additional fee of 89,661.14 EUR was charged regarding commissions and charges for allocating the assets.

Existence of Commission Sharing Agreements

Not applicable

Existence of fee sharing agreements and rebates

The management company has shared 41,63% of its fee with the distributor, and institutional and/or professional parties.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.6. Fee-sharing agreements and rebates'.

2.4.7. Notes to the financial statements and other data

Fee for managing the investment portfolio	Max 1.49%	<p>per year (0.30% of which is for the protection of the floor price) calculated on the basis of the average total net assets of the sub-fund.</p> <p>For the portion of net assets corresponding to an investment in undertakings for collective investment(*) managed by a financial institution belonging to the KBC group, the fee for managing the investment portfolio equals the difference between the fee for managing the investment portfolio of the aforementioned undertakings for collective investment and the percentage (to the left) that is paid for managing the investment portfolio.</p> <p>KBC Fund Management Limited receives a fee from the management company of max. 1.49% per year calculated on the basis of the average total net assets of the sub-fund, without the total fees and charges received by the management company being exceeded.</p> <p>(*) The fee for the management of the investment portfolio of the undertakings for collective investment in which the sub-fund invests will amount to a year.</p>
Administration fee	0.10%	per year calculated on the basis of the average total net assets of the sub-fund.
Fee for financial services	Max 950 EUR	per year. However, the fee will never exceed a maximum of 0.005% calculated on the basis of the average total net assets of the sub-fund.
Custodian's fee	Max 0.04%	per year and calculated monthly on the basis of the value of the securities held in custody by the custodian on the last banking day of the preceding month, except on those assets invested in underlying undertakings for collective investment managed by a financial institution of the KBC group.
Fee paid to the bevek's statutory auditor	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Fee paid to the directors	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Annual tax	See prospectus General Part : 'Information concerning the Bevek - H. Tax treatment'	
Other charges (estimation) such as the regulator's fees, the cost of publication and any marketing costs	0.10%	of the net assets of the sub-fund per year.

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

Capitalisation

Launch date:	29 April 2016
Initial subscription price:	1 000 EUR
Currency:	EUR

2.1.2. Stock exchange listing

Not applicable.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main object of the sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.
The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. **Consequently, there may be an impact on concentration risk.** Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

The sub-fund invests directly or indirectly in more risky assets (such as shares, share UCIs, medium and longer-term bonds, medium and longer-term bond UCIs, certain money market instruments, and alternative investments (like real estate and financial instruments that are linked to price movements on the commodity markets)) and/or less risky assets (such as certain money market instruments, shorter-term bonds, shorter-term bond UCIs and cash,...). Compared with bond UCIs classified as riskier assets, bond UCIs in the less risky assets category invest more in instruments with a shorter term to maturity, which means that they are less sensitive to movements in interest rates. In principle, therefore, they are less volatile.

The sub-fund may invest up to 95% in shares, up to 65% in medium and longer-term bonds and up to 100% in shorter-term bonds.

The sub-fund has two objectives:

1. to achieve the highest possible return by making investments in accordance with the investment strategy of KBC Asset Management NV.

The target allocation for the asset classes is 55% shares and/or share-related investments ('the stock component') and 45% bonds and/or bond-related investments ('the bond component').

It is permitted to deviate from the target allocation based on the investment strategy of KBC Asset Management NV (see www.kbc.be/investment-strategy) and/or to protect the floor price, as described in section 2. It is therefore possible for the sub-fund to invest in asset classes that have not been included in the target allocation.

2. to protect a floor price.

The sub-fund also aims to set a floor price for the net asset value each year. This floor price is valid for one year and is always equal to 90% of the net asset value on the last Belgian banking day of the previous April. The initial floor price is equal to 90% of the initial net asset value and is valid from 29 April 2016 to 28 April 2017, inclusive. Achieving the objective to protect the floor price becomes increasingly important the closer the net asset value gets to the floor price. In such a situation, the asset allocation will be increasingly focused on protecting the floor price and will deviate from the target allocation specified in point 1 above.

The floor price changes each year in line with the net asset value. Any fall in the net asset value at the time the new floor price is determined will mean that the new floor price is lower than the current floor price. Any increase in the net asset value at the time the new floor price is determined will mean that the new floor price is higher than the current floor price.

The sub-fund does not provide any capital protection or capital guarantee, nor does it offer a guaranteed return. It is therefore possible for the net asset value to be lower than the floor price.

The allocation of the assets is influenced by whether they involve more or less risk. Riskier assets are intended to generate the return, while less risky assets are designed to protect the floor.

During the year, the manager may deviate from the target allocation in the following ways:

1) If the net asset value falls towards the floor price, the manager may intervene and replace investments in riskier assets with investments in less risky ones. If the net asset value hits the floor price, the manager may switch completely to investments in money market instruments, shorter-term bonds, shorter-term bond funds and/or cash.

Conversely, if the net asset value moves away from the floor price and goes up to a strong enough extent, the manager may intervene and gradually reallocate the assets by replacing the less risky assets with more risky ones.

2) If markets develop favourably and provided the net asset value is sufficiently high relative to the floor price, and for as long as both these conditions are met, the stock component can temporarily go up sharply relative to the percentage determined when the floor price was set.

3) The bond component will be monitored separately and, if its performance is negative, the exposure within this component may be reduced periodically, for instance by reducing investments in bonds in favour of investments in money market instruments and cash.

The stock component is invested in a worldwide selection of shares that may come from any region, sector or theme.

For details of the bond component, please see the 'Characteristics of the bonds and debt instruments' section below. The fund is actively managed without referring to any benchmark.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

Transparency of adverse sustainability impacts:

The sub-fund considered the principal adverse impacts of its investment decisions on sustainability factors ('PAI') as

described by the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector ('SFDR').

The principal adverse impacts on sustainability factors were explicitly taken into account through the General exclusion policy. More information on the principal adverse impact indicators that are taken into account can be found at www.kbc.be/investment-legal-documents > General exclusion policy for conventional and Responsible Investing funds and www.kbc.be/investment-legal-documents > Exclusion policies for Responsible Investing funds.

In addition, the principal adverse impacts on sustainability factors were implicitly taken into account through the Proxy Voting and Engagement Policy of KBC Asset Management NV (more information can be found at www.kbc.be/investment-legal-documents > Retrospective Proxy Voting - overview > Proxy Voting and Engagement Policy).

Characteristics of the bonds and debt instruments

The sub-fund invests in bonds and debt instruments issued by both companies and public authorities.

The sub-fund invests directly and/or indirectly at least 50% of its assets in bonds and debt instruments

- in securities rated investment grade (at least BBB-/Baa3 for long-term debt, A3/F3/P3 for short-term debt) by at least one of the following rating agencies: Moody's Investors Service, Standard & Poor's or Fitch Ratings, and/or
- in government bonds issued in local currency or non-subordinated corporate bonds* which do not have a credit rating from the rating agencies mentioned above but the issuer of which has an investment grade rating by at least one of the rating agencies mentioned above, and/or
- in money market instruments whose issuer has an investment grade rating (minimum A3/F3/P3 for short-term debt) from at least one of the above rating agencies.

This means that the sub-fund may invest up to 50% of its assets invested in bonds and debt instruments that do not have a credit rating from the above-mentioned rating agencies and/or which do not comply with the above-mentioned credit requirements.

All maturities are taken into consideration in the selection of bonds and debt instruments.

*In the event of the bankruptcy of the relevant issuer, subordinated bonds are subordinated to the company's other debts: the company's other debts are paid first, then and only if there is still capital left, the holders of the subordinated bonds are fully or partially repaid; the holder of the subordinated bond does, however, have priority over the shareholders of the issuer in question.

Investments in assets other than securities or money market instruments

The sub-fund will invest primarily in units in undertakings for collective investment (UCIs) managed by a KBC group company.

Securities Financing Transactions (SFTs)

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.1. Securities Financing Transactions (SFTs)'.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'.

2.1.4. Financial portfolio management

The intellectual management, with the exception of the creation of the sub-fund and its maintenance in terms of the technical, product-specific and legal aspects has been delegated by the management company to KBC Fund Management Limited, 4th Floor, Scotch House, 6/7 Burgh Quay, Dublin 2, D02 VK44, Ireland.

2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2.1.6. Index and benchmark

Not applicable.

2.1.7. Policy pursued during the financial year

The objective of the fund is to achieve the highest possible return, while aiming at maintaining the NAV above the floor level. The allocation in equity, bond and money market investments is determined by a dynamic portfolio insurance algorithm. The fund has three profiles, defensive, dynamic and very dynamic and the gearing is determined by the NAV distance to the floor.

Horizon Comfort Pro 90 May NAV 12/12/2024 Floor NAV

1222.11 1099.899

As we started into 2024, positive momentum continued for global stock markets. Better-than-expected economic growth, especially in the resilient US economy, and solid corporate earnings prevailed over expensive valuations. The enthusiasm for the Artificial Intelligence theme provided to be a tail-wind for the market driving momentum, especially in tech linked names.

Equity markets dipped briefly in April as the US economy appeared to be gradually slowing down. Persistent inflation (especially in the services sector and housing) and recent volatile oil prices meant that the disinflation process proceeded at pace slower than previously anticipated. This sticky inflation meant that the Federal Reserve and other major central banks remained on hold for much of the first half of the year. Although, the European Central Bank bucked this trend and cut interest rates by 25bps in June.

As the second half of the year got underway, a confluence of events caused equity markets to stumble. The Biden administration in the US sought to tighten restrictions on export of technological equipment to China, which caused investors to reassess their outlook of technology stocks and rotate into other sectors. It also appeared that economic growth, which had remained surprisingly resilient to many, might be coming to an end, as the unemployment rate in the US hit its highest level since the Covid pandemic in July. Ultimately, these concerns were short lived, as it allowed the policy rate-cutting cycle to gather momentum, corporate earnings remained resilient and economic indicators (especially in for US economy) remained strong.

This US exceptionalism largely continued for the remainder of the year, with the results of the US elections further contributing to investor optimism. This largely allowed investors to look past the (seemingly increasing) macro risks - including the ongoing wars in the Middle East/Ukraine, fiscal sustainability concerns, political uncertainty in many countries and weak EU/Chinese growth.

2.1.8. Future policy

Future investments and level of participation in risky assets will be determined by the dynamic portfolio insurance model, ensuring that the floor is protected

The **Horizon Comfort Pro May 90**, will merge with the **Horizon KBC Dynamic Balanced Responsible Investing**.

2.1.9. Summary risk indicator (SRI)

3 on a scale of 1 (lowest risk) to 7 (highest risk)

- a moderate level of inflation risk: the bond component does not provide any protection against an increase in inflation.
- a moderate level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a real chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of credit risk: the bond component invests primarily - but not exclusively- in bonds with an investment grade rating. Consequently, the risk that an issuer can no longer meet its obligations is higher than in an investment that consists only of bonds with an investment grade rating. If investors are in doubt about the creditworthiness of the issuers of the bonds, the value of those bonds can fall.
- a moderate level of market risk: the level of the risk reflects the volatility of the equity component.
- a moderate level of performance risk: the level of the risk reflects the volatility of the equity component.

There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

2.1.10. Leveraged finance

The total amount of leveraged finance used by the sub-fund is 0.00 EUR.

This amount was calculated by multiplying the leverage ratio calculated using the UCITS-commitment method by the sub-fund's total assets under management.

2.1.11. Value-at-Risk

The internal classification system, on the basis of which this sectoral spread is calculated, has been changed as of 31/12/2023. In order to provide a meaningful comparison of the sectoral spread across reporting periods, the sectoral spread calculations will be de-duplicated in the annual reports. This means that a summary table will be shown for each classification system.

Currency breakdown (as a % of net assets)

The currency distribution of the sub-fund's investments is calculated based on the currency distribution of the underlying investments of the UCIs in which the sub-fund invests (look through).

2.4.2. Changes in the composition of the assets of Horizon Comfort Pro May 90 (in Euro)

	1 st half of year	2 nd half of year	Year
Purchases	29,922,475.13	35,856,761.39	65,779,236.53
Sales	32,449,979.23	39,368,281.97	71,818,261.20
Total 1	62,372,454.37	75,225,043.36	137,597,497.73
Subscriptions	43,943.38	100,220.80	144,164.18
Redemptions	2,557,400.64	3,058,200.98	5,615,601.62
Total 2	2,601,344.02	3,158,421.78	5,759,765.80
Monthly average of total assets	39,234,407.59	37,597,645.73	38,399,187.54
Turnover rate	152.34%	191.68%	343.33%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period. A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions. A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio. Active asset management may result in high turnover rates (monthly percentage >50%).

The detailed list of transactions can be consulted free of charge at the company designated as financial service:
KBC Bank NV, Havenlaan 2, B-1080 Brussels

2.4.3. Amount of commitments in respect of financial derivatives positions

Nil

2.4.4. Changes in the number of subscriptions and redemptions and the net asset value

Period	Change in number of shares in circulation						
Year	Subscriptions		Redemptions		End of period

2.4.5. Performance figures

* These performances were achieved under circumstances that no longer apply

Cap Div	ISIN Code	Curr ency	1 year		3 years		5 years		10 years		Since Launch*	
			Share classes	Bench mark	Share classes	Bench mark	Share classes	Bench mark	Share classes	Bench mark	Starting date	Share classes
CAP	BE6285342331	EUR	12.27%		0.52%		3.48%				29/04/2016	3.05%

Risk warning: Past performance is not a guide to future performance.

* Return on annual basis.

- The bar chart shows the performance for full financial years.
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage.
- Calculation method for date D, where NAV stands for net asset value:
Capitalisation units (CAP)
Return on date D over a period of X years :

$$[\text{NIW}(D) / \text{NIW}(Y)]^{1/X} - 1$$
 where Y = D-X
 Return on date D since the start date S of the unit:

$$[\text{NIW}(D) / \text{NIW}(S)]^{1/F} - 1$$
 where F = 1 if the unit has existed for less than one year on date D
 where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D
- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation shares.

2.4.6. Costs

Ongoing Charges:

Management fees and other administrative or operating costs: 1,676%

Transaction costs: 0,663%

Percentage calculated at reporting date: 31 December 2024 .

A more detailed explanation with respect to the method of calculating ongoing charges and the relevant exclusions can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.5. Ongoing charges'

Fee for managing the investment portfolio

The management fee amounts to 312,248.48 EUR. An additional fee of 116,256.54 EUR was charged regarding commissions and charges for allocating the assets.

Existence of Commission Sharing Agreements

Not applicable

Existence of fee sharing agreements and rebates

The management company has shared 41,63% of its fee with the distributor, and institutional and/or professional parties.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.6. Fee-sharing agreements and rebates'.

2.4.7. Notes to the financial statements and other data

Fee for managing the investment portfolio	Max 1.49%	<p>per year (0.30% of which is for the protection of the floor price) calculated on the basis of the average total net assets of the sub-fund.</p> <p>For the portion of net assets corresponding to an investment in undertakings for collective investment(*) managed by a financial institution belonging to the KBC group, the fee for managing the investment portfolio equals the difference between the fee for managing the investment portfolio of the aforementioned undertakings for collective investment and the percentage (to the left) that is paid for managing the investment portfolio.</p> <p>KBC Fund Management Limited receives a fee from the management company of max. 1.49% per year calculated on the basis of the average total net assets of the sub-fund, without the total fees and charges received by the management company being exceeded.</p> <p>(*) The fee for the management of the investment portfolio of the undertakings for collective investment in which the sub-fund invests will amount to a year.</p>
Administration fee	0.10%	per year calculated on the basis of the average total net assets of the sub-fund.
Fee for financial services	Max 950 EUR	per year. However, the fee will never exceed a maximum of 0.005% calculated on the basis of the average total net assets of the sub-fund.
Custodian's fee	Max 0.04%	per year and calculated monthly on the basis of the value of the securities held in custody by the custodian on the last banking day of the preceding month, except on those assets invested in underlying undertakings for collective investment managed by a financial institution of the KBC group.
Fee paid to the bevek's statutory auditor	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Fee paid to the directors	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Annual tax	See prospectus General Part : 'Information concerning the Bevek - H. Tax treatment'	
Other charges (estimation) such as the regulator's fees, the cost of publication and any marketing costs	0.10%	of the net assets of the sub-fund per year.

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

2. Information on Horizon Comfort Pro November 90

2.1. Management report

2.1.1. Launch date and subscription price

Capitalisation

Launch date:	15 December 2015
Initial subscription price:	1 000 EUR
Currency:	EUR

2.1.2. Stock exchange listing

Not applicable.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main object of the sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.
The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. **Consequently, there may be an impact on concentration risk.** Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

The sub-fund invests directly or indirectly in more risky assets (such as shares, share UCIs, medium and longer-term bonds, medium and longer-term bond UCIs, certain money market instruments, and alternative investments (like real estate and financial instruments that are linked to price movements on the commodity markets)) and/or less risky assets (such as certain money market instruments, shorter-term bonds, shorter-term bond UCIs and cash,...). Compared with bond UCIs classified as riskier assets, bond UCIs in the less risky assets category invest more in instruments with a shorter term to maturity, which means that they are less sensitive to movements in interest rates. In principle, therefore, they are less volatile.

The sub-fund may invest up to 95% in shares, up to 65% in medium and longer-term bonds and up to 100% in shorter-term bonds.

The sub-fund has two objectives:

1. to achieve the highest possible return by making investments in accordance with the investment strategy of KBC Asset Management NV.

The target allocation for the asset classes is 55% shares and/or share-related investments ('the stock component') and 45% bonds and/or bond-related investments ('the bond component'). It is permitted to deviate from the target allocation based on the investment strategy of KBC Asset Management NV (see www.kbc.be/investment-strategy) and/or to protect the floor price, as described in section 2. It is therefore possible for the sub-fund to invest in asset classes that have not been included in the target allocation.

2. to protect a floor price.

The sub-fund also aims to set a floor price for the net asset value each year. This floor price is valid for one year and is always equal to 90% of the net asset value on the last Belgian banking day of the previous October. The initial floor price is equal to 90% of the initial net asset value and is valid from 15 December 2015 to 31 October 2016, inclusive. Achieving the objective to protect the floor price becomes increasingly important the closer the net asset value gets to the floor price. In such a situation, the asset allocation will be increasingly focused on protecting the floor price and will deviate from the target allocation specified in point 1 above.

The floor price changes each year in line with the net asset value. Any fall in the net asset value at the time the new floor price is determined will mean that the new floor price is lower than the current floor price. Any increase in the net asset value at the time the new floor price is determined will mean that the new floor price is higher than the current floor price.

The sub-fund does not provide any capital protection or capital guarantee; nor does it offer a guaranteed return. It is therefore possible for the net asset value to be lower than the floor price.

The allocation of the assets is influenced by whether they involve more or less risk. Riskier assets are intended to generate the return, while less risky assets are designed to protect the floor.

During the year, the manager may deviate from the target allocation in the following ways:

1) If the net asset value falls towards the floor price, the manager may intervene and replace investments in riskier assets with investments in less risky ones. If the net asset value hits the floor price, the manager may switch completely to investments in money market instruments, shorter-term bonds, shorter-term bond funds and/or cash.

Conversely, if the net asset value moves away from the floor price and goes up to a strong enough extent, the manager may intervene and gradually reallocate the assets by replacing the less risky assets with more risky ones.

2) If markets develop favourably and provided the net asset value is sufficiently high relative to the floor price, and for as long as both these conditions are met, the stock component can temporarily go up sharply relative to the percentage determined when the floor price was set.

3) The bond component will be monitored separately and, if its performance is negative, the exposure within this component may be reduced periodically, for instance by reducing investments in bonds in favour of investments in money market instruments and cash.

The stock component is invested in a worldwide selection of shares that may come from any region, sector or theme.

For details of the bond component, please see the 'Characteristics of the bonds and debt instruments' section below.

The fund is actively managed without referring to any benchmark.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable

economic activities.

Transparency of adverse sustainability impacts:

The sub-fund considered the principal adverse impacts of its investment decisions on sustainability factors ('PAI') as described by the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector ('SFDR').

The principal adverse impacts on sustainability factors were explicitly taken into account through the General exclusion policy. More information on the principal adverse impact indicators that are taken into account can be found at www.kbc.be/investment-legal-documents > General exclusion policy for conventional and Responsible Investing funds and www.kbc.be/investment-legal-documents > Exclusion policies for Responsible Investing funds.

In addition, the principal adverse impacts on sustainability factors were implicitly taken into account through the Proxy Voting and Engagement Policy of KBC Asset Management NV (more information can be found at www.kbc.be/investment-legal-documents > Retrospective Proxy Voting - overview > Proxy Voting and Engagement Policy).

Characteristics of the bonds and debt instruments

The sub-fund invests in bonds and debt instruments issued by both companies and public authorities.

The sub-fund invests directly and/or indirectly at least 50% of its assets in bonds and debt instruments

- in securities rated investment grade (at least BBB-/Baa3 for long-term debt, A3/F3/P3 for short-term debt) by at least one of the following rating agencies: Moody's Investors Service, Standard & Poor's or Fitch Ratings, and/or
- in government bonds issued in local currency or non-subordinated corporate bonds* which do not have a credit rating from the rating agencies mentioned above but the issuer of which has an investment grade rating by at least one of the rating agencies mentioned above, and/or
- in money market instruments whose issuer has an investment grade rating (minimum A3/F3/P3 for short-term debt) from at least one of the above rating agencies.

This means that the sub-fund may invest up to 50% of its assets invested in bonds and debt instruments that do not have a credit rating from the above-mentioned rating agencies and/or which do not comply with the above-mentioned credit requirements.

All maturities are taken into consideration in the selection of bonds and debt instruments.

*In the event of the bankruptcy of the relevant issuer, subordinated bonds are subordinated to the company's other debts: the company's other debts are paid first, then and only if there is still capital left, the holders of the subordinated bonds are fully or partially repaid; the holder of the subordinated bond does, however, have priority over the shareholders of the issuer in question.

Investments in assets other than securities or money market instruments

The sub-fund will invest primarily in units of undertakings for collective investment managed by a KBC-group company.

Securities Financing Transactions (SFTs)

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.1. Securities Financing Transactions (SFTs)'.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'.

2.1.4. Financial portfolio management

The intellectual management, with the exception of the creation of the sub-fund and its maintenance in terms of the technical, product-specific and legal aspects has been delegated by the management company to KBC Fund Management Limited, 4th Floor, Scotch House, 6/7 Burgh Quay, Dublin 2, D02 VK44, Ireland.

2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2.1.6. Index and benchmark

Not applicable.

2.1.7. Policy pursued during the financial year

The objective of the fund is to achieve the highest possible return, while aiming at maintaining the NAV above the floor level. The allocation in equity, bond and money market investments is determined by a dynamic portfolio insurance algorithm. The fund has three profiles, defensive, dynamic and very dynamic and the gearing is determined by the NAV distance to the floor.

Horizon Comfort Pro 90 Nov NAV 12/12/2024 Floor NAV

1242.69 1118.42

As we started into 2024, positive momentum continued for global stock markets. Better-than-expected economic growth, especially in the resilient US economy, and solid corporate earnings prevailed over expensive valuations. The enthusiasm for the Artificial Intelligence theme provided to be a tail-wind for the market driving momentum, especially in tech linked names.

Equity markets dipped briefly in April as the US economy appeared to be gradually slowing down. Persistent inflation (especially in the services sector and housing) and recent volatile oil prices meant that the disinflation process proceeded at pace slower than previously anticipated. This sticky inflation meant that the Federal Reserve and other major central banks remained on hold for much of the first half of the year. Although, the European Central Bank bucked this trend and cut interest rates by 25bps in June.

As the second half of the year got underway, a confluence of events caused equity markets to stumble. The Biden administration in the US sought to tighten restrictions on export of technological equipment to China, which caused investors to reassess their outlook of technology stocks and rotate into other sectors. It also appeared that economic growth, which had remained surprisingly resilient to many, might be coming to an end, as the unemployment rate in the US hit its highest level since the Covid pandemic in July. Ultimately, these concerns were short lived, as it allowed the policy rate-cutting cycle to gather momentum, corporate earnings remained resilient and economic indicators (especially in for US economy) remained strong.

This US exceptionalism largely continued for the remainder of the year, with the results of the US elections further contributing to investor optimism. This largely allowed investors to look past the (seemingly increasing) macro risks - including the ongoing wars in the Middle East/Ukraine, fiscal sustainability concerns, political uncertainty in many countries and weak EU/Chinese growth.

2.1.8. Future policy

Future investments and the level of participation in risky assets will be determined by the dynamic portfolio insurance model, ensuring that the bottom line is protected.

The **Horizon Comfort Pro November 90** will merge with the **Horizon KBC Dynamic Balanced Responsible Investing**.

2.1.9. Summary risk indicator (SRI)

3 on a scale of 1 (lowest risk) to 7 (highest risk)

- a moderate level of inflation risk: the bond component does not provide any protection against an increase in inflation.
- a moderate level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a real chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of credit risk: the bond component invests primarily - but not exclusively- in bonds with an investment grade rating. Consequently, the risk that an issuer can no longer meet its obligations is higher than in an investment that consists only of bonds with an investment grade rating. If investors are in doubt about the creditworthiness of the issuers of the bonds, the value of those bonds can fall.
- a moderate level of market risk: the level of the risk reflects the volatility of the equity component.
- a moderate level of performance risk: the level of the risk reflects the volatility of the equity component.

There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

2.1.10. Leveraged finance

The total amount of leveraged finance used by the sub-fund is 0.00 EUR.

This amount was calculated by multiplying the leverage ratio calculated using the UCITS-commitment method by the sub-fund's total assets under management.

2.1.11. Value-at-Risk

The internal classification system, on the basis of which this sectoral spread is calculated, has been changed as of 31/12/2023. In order to provide a meaningful comparison of the sectoral spread across reporting periods, the sectoral spread calculations will be de-duplicated in the annual reports. This means that a summary table will be shown for each classification system.

Currency breakdown (as a % of net assets)

The currency distribution of the sub-fund's investments is calculated based on the currency distribution of the underlying investments of the UCIs in which the sub-fund invests (look through).

2.4.2. Changes in the composition of the assets of Horizon Comfort Pro November 90 (in Euro)

	1 st half of year	2 nd half of year	Year
Purchases	7,428,433.08	15,776,242.89	23,204,675.96
Sales	9,157,010.27	18,398,114.88	27,555,125.15
Total 1	16,585,443.34	34,174,357.77	50,759,801.11
Subscriptions	120,134.56	50,157.76	170,292.32
Redemptions	2,105,788.99	1,916,469.60	4,022,258.59
Total 2	2,225,923.55	1,966,627.36	4,192,550.91
Monthly average of total assets	24,626,462.82	24,632,630.48	24,629,610.10
Turnover rate	58.31%	130.75%	189.07%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period. A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions. A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio. Active asset management may result in high turnover rates (monthly percentage >50%).

The detailed list of transactions can be consulted free of charge at the company designated as financial service: KBC Bank NV, Havenlaan 2, B-1080 Brussels

2.4.3. Amount of commitments in respect of financial derivatives positions

Nil

2.4.4. Changes in the number of subscriptions and redemptions and the net asset value

Period	Change in number of shares in circulation						
Year	Subscriptions		Redemptions		End of period		
	Capitalization	Distribution	Capitalization	Distribution	Capitalization	Distribution	Totaal

2.4.5. Performance figures

* These performances were achieved under circumstances that no longer apply

Cap Div	ISIN Code	Curr ency	1 year		3 years		5 years		10 years		Since Launch*	
			Share classes	Bench mark	Share classes	Bench mark	Share classes	Bench mark	Share classes	Bench mark	Starting date	Share classes
CAP	BE6282172640	EUR	14.76%		2.95%		3.85%				15/12/2015	2.83%

Risk warning: Past performance is not a guide to future performance.

* Return on annual basis.

- The bar chart shows the performance for full financial years.
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage.
- Calculation method for date D, where NAV stands for net asset value:
Capitalisation units (CAP)
Return on date D over a period of X years :

$$\left[\frac{NIW(D)}{NIW(Y)} \right]^{1/X} - 1$$
 where Y = D-X
 Return on date D since the start date S of the unit:

$$\left[\frac{NIW(D)}{NIW(S)} \right]^{1/F} - 1$$
 where F = 1 if the unit has existed for less than one year on date D
 where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D
- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation shares.

2.4.6. Costs

Ongoing Charges:

Management fees and other administrative or operating costs: 1,655%

Transaction costs: 0,519%

Percentage calculated at reporting date: 31 December 2024 .

A more detailed explanation with respect to the method of calculating ongoing charges and the relevant exclusions can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.5. Ongoing charges'

Fee for managing the investment portfolio

The management fee amounts to 199,783.17 EUR. An additional fee of 74,532.00 EUR was charged regarding commissions and charges for allocating the assets.

Existence of Commission Sharing Agreements

Not applicable

Existence of fee sharing agreements and rebates

The management company has shared 41,63% of its fee with the distributor, and institutional and/or professional parties.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.6. Fee-sharing agreements and rebates'.

2.4.7. Notes to the financial statements and other data

Fee for managing the investment portfolio	Max 1.49%	<p>per year (0.30% of which is for the protection of the floor price) calculated on the basis of the average total net assets of the sub-fund.</p> <p>For the portion of net assets corresponding to an investment in undertakings for collective investment(*) managed by a financial institution belonging to the KBC group, the fee for managing the investment portfolio equals the difference between the fee for managing the investment portfolio of the aforementioned undertakings for collective investment and the percentage (to the left) that is paid for managing the investment portfolio.</p> <p>KBC Fund Management Limited receives a fee from the management company of max. 1.49% per year calculated on the basis of the average total net assets of the sub-fund, without the total fees and charges received by the management company being exceeded.</p> <p>(*) The fee for the management of the investment portfolio of the undertakings for collective investment in which the sub-fund invests will amount to a year.</p>
Administration fee	0.10%	per year calculated on the basis of the average total net assets of the sub-fund.
Fee for financial services	Max 950 EUR	per year. However, the fee will never exceed a maximum of 0.005% calculated on the basis of the average total net assets of the sub-fund.
Custodian's fee	Max 0.04%	per year and calculated monthly on the basis of the value of the securities held in custody by the custodian on the last banking day of the preceding month, except on those assets invested in underlying undertakings for collective investment managed by a financial institution of the KBC group.
Fee paid to the bevek's statutory auditor	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Fee paid to the directors	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Annual tax	See prospectus General Part : 'Information concerning the Bevek - H. Tax treatment'	
Other charges (estimation) such as the regulator's fees, the cost of publication and any marketing costs	0.10%	of the net assets of the sub-fund per year.

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

Initial subscription price:	500 USD
Currency:	USD

2.1.2. Stock exchange listing

Not applicable.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The sub-fund acts as a feeder fund that aims to invest at least 95% of its assets in units of a single UCITS, i.e. KBC Renta Dollarenta (the master fund as specified below).

Sub-fund's investment policy

Permitted asset classes

The sub-fund's investments consist of at least 95% units in the master fund (as determined below) and a maximum of 5% in cash and/or financial derivatives.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.
The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

It is possible to work with either listed or unlisted derivatives: these may be forward contracts, options or swaps on securities, indices, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions may only be concluded with prime financial institutions specialised in such transactions. **Subject to the applicable laws and regulations and the articles of association, the sub-fund will always seek to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.**

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of cash or investment grade bonds. When calculating the value of the bonds, a margin will be applied that varies depending on their residual term to maturity and the currency in which they are denominated. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives can also be used to hedge the assets of the sub-fund against open exchange risks in relation to the currency.

Strategy selected

The sub-fund (the feeder fund) always invests at least 95% of its assets in units of a single undertaking for collective investment, namely Dollarenta, a sub-fund of the SICAV under Luxembourg law opting for investments that comply with the conditions of Directive 2009/65/EC KBC Renta (the master fund).

Since the sub-fund as feeder fund will at all times invest at least 95% of its assets in the master fund, the feeder fund's results will be comparable with those of the master fund. For the following reasons, a limited deviation between the results of the master fund and those of the feeder fund may arise:

- The feeder fund may invest up to 5% of its assets in assets apart from the master fund, namely in cash and financial derivatives.
- The feeder fund bears certain charges that the master fund does not incur. Among other things, these include the payment made for the administration of the feeder fund, the fee paid to the feeder fund's auditor and the costs of publication of the feeder fund's net asset value.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

Transparency of adverse sustainability impacts:

The sub-fund considers the principal adverse impacts of its investment decisions on sustainability factors ('PAI') as described by the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector ('SFDR').

The principal adverse impacts on sustainability factors were explicitly taken into account through the General exclusion policy. More information on the principal adverse impact indicators that are taken into account can be found at www.kbc.be/investment-legal-documents > General exclusion policy for conventional and Responsible Investing funds and www.kbc.be/investment-legal-documents > Exclusion policies for Responsible Investing funds.

In addition, the principal adverse impacts on sustainability factors were implicitly taken into account through the Proxy Voting and Engagement Policy of KBC Asset Management NV (more information can be found at www.kbc.be/investment-legal-documents > Retrospective Proxy Voting - overview > Proxy Voting and Engagement Policy).

Information regarding the master

Name:

KBC Renta Dollarenta

Legal status:

Sub-fund of a Luxembourg SICAV that has opted for investments that comply with the terms of Directive 2009/65/EC, and that, as far as its operation and investments are concerned, is governed by Part 1 of the Luxembourg Act of 17 December 2010 on undertakings for collective investment.

Management company:

KBC Asset Management SA, Rue du Fort Wallis 4, L-2714 Luxembourg

Custodian:

Brown Brothers Harriman (Luxembourg) S.C.A., Route d'Esch 80, L-1470 Luxembourg

Auditor:

Deloitte Audit Sarl, Rue de Neudorf 560, L-2220 Luxembourg

Master investment policy:

The investment portfolio of the KBC Renta Dollarenta sub-fund is primarily invested, directly or indirectly, in securities with a preference for bonds denominated in US dollars ('USD').

The benchmark of the sub-fund is JP Morgan Government Bond Index (GBI) United States.

The aim of the sub-fund is to outperform the benchmark.

The sub-fund is actively managed and doesn't aim to replicate the benchmark. The benchmark is used to measure the performance and composition of the portfolio. Most of the bonds held by the sub-fund are included in the benchmark. Managers may use their discretionary power to invest in bonds not included in the benchmark in order to benefit from the sub-fund's specific investment opportunities.

The sub-fund's investment policy limits the extent to which the portfolio's positions may deviate from the benchmark. This deviation is measured using the tracking error, which indicates the extent of volatility between the sub-fund's performance and the benchmark. The expected tracking error is 1.25%. Investors should be aware that the actual tracking error may change, depending on market conditions. A sub-fund with a small deviation from the benchmark is expected to outperform that benchmark to a lesser degree.

Required disclaimer for benchmark providers:

Information has been obtained from sources believed to be reliable but J.P. Morgan does not warrant its completeness or accuracy. The Index is used with permission. The Index may not be copied, used, or distributed without J.P. Morgan's prior written approval. Copyright 201(7), J.P. Morgan Chase & Co. All rights reserved.

The sub-fund invests directly and/or indirectly at least 75% of its assets

- in bonds and debt instruments rated with an investment grade (at least BBB-/Baa3 for long-term debt, A3/F3/P3 for

short-term debt) from at least one of the following rating agencies: Moody's Investors Service, Standard & Poor's or Fitch Ratings and/or

- in government bonds issued in local currency which do not have a credit rating from the rating agencies mentioned above but where the issuer does have an investment grade rating by at least one of the above rating agencies.

This means that the sub-fund may invest up to 25% of its assets invested in bonds and debt instruments that do not have a credit rating from the above-mentioned rating agencies and/or which do not fulfil the above-mentioned credit requirements.

The sub-fund shall not invest in transferable securities where the issuer is in difficulty and unable to meet its financial commitments. If a security goes into difficulty and defaults, the manager will always seek to sell the position taking into account the interests of the investor and if market conditions allow (for example, sufficient liquidity).

The net asset value of the sub-fund is denominated in US dollars.

Master risk profile:

The risk and return profile of the master is set out in the key investor information for the master. A summary of the risks as appraised by the master is set out in the master's prospectus.

Ongoing charges of the master:

The ongoing charges of the master may be found in the key investor information for the master.

Prospectus and key investor information of the master:

The prospectus and the key investor information of the master may be obtained free of charge from the financial services providers. These documents may also be consulted on www.kbc.be/investing.

Information regarding the agreement between the master and the feeder

In accordance with Article 78 (1) of the Act of 3 August 2012 on undertakings for collective investment that meet the conditions of Directive 2009/65/EC and undertakings for investment in debt instruments, the master and feeder funds have concluded an agreement that governs the relationship between the master and feeder funds. This agreement includes:

- what categories of units in the master fund are available for investment by the feeder fund;
- the charges and expenses to be borne by the feeder fund in relation to the investment in the master fund;
- the schedule for the close of the order receipt period, the calculation of the net asset value, the publication of the net asset value and the date of payment or repayment of the orders;
- the consequences for the feeder fund of suspending determination of the master fund's net asset value;
- the way in which it is ensured that in the event of errors in calculating the net asset value of the units in the master fund, the necessary measures will be taken swiftly in relation to the feeder fund.

This agreement may be obtained free of charge from the financial service providers before or after subscription to the shares.

Securities Financing Transactions (SFTs)

The sub-fund may not lend any financial instruments.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Beveik under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main object of the sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested either directly, or indirectly via correlated financial instruments, primarily in bonds.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.
The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. **Consequently, there may be an impact on concentration risk.** Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

The aim of the sub-fund is to build up a diversified portfolio of units in other investment undertakings. The portfolio will consist primarily of units in investment undertakings that invest in fixed-income securities denominated in euros (EUR) or other currencies where the exchange risk against the EUR is hedged.

The sub-fund's net asset value is denominated in euros.

The sub-fund aims to use these investments to generate the following for its unit-holders:

- a return matching that of the reference currency, namely the euro;
- possible capital gains.

The fund is actively managed with reference to the following benchmark: 50% iBoxx Euro Corporate bonds Total Return Index, 50% JP Morgan EMU Government Bonds Investment Grade ALL Maturities - Total Return Index.

However, is not the aim of the fund to replicate the benchmark. The composition of the benchmark is taken into account when compiling the portfolio.

The composition of the portfolio will to a large extent be similar to that of the benchmark.

The benchmark is also used to assess the performance of the sub-fund.

The benchmark is also used to determine the fund's risk limitation mechanism. This limits the extent to which the fund's return may deviate from the benchmark.

The longterm expected tracking error for this fund is 0.50%. The tracking error measures the volatility of the fund's return relative to that of the benchmark. The higher the tracking error, the more the fund's return fluctuates relative to the benchmark. Market conditions may cause the actual tracking error to differ from the expected tracking error.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

Transparency of adverse sustainability impacts:

The sub-fund considered the principal adverse impacts of its investment decisions on sustainability factors ('PAI') as described by the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector ('SFDR').

The principal adverse impacts on sustainability factors were explicitly taken into account through the General exclusion policy. More information on the principal adverse impact indicators that are taken into account can be found at www.kbc.be/investment-legal-documents > General exclusion policy for conventional and Responsible Investing funds and www.kbc.be/investment-legal-documents > Exclusion policies for Responsible Investing funds.

In addition, the principal adverse impacts on sustainability factors were implicitly taken into account through the Proxy Voting and Engagement Policy of KBC Asset Management NV (more information can be found at www.kbc.be/investment-legal-documents > Retrospective Proxy Voting - overview > Proxy Voting and Engagement Policy).

Characteristics of the bonds and debt instruments

The sub-fund invests in bonds and debt instruments issued by both companies and public authorities.

The sub-fund invests directly and/or indirectly at least 75% of its assets in bonds and debt instruments

- in bonds and debt instruments rated investment grade (at least BBB-/Baa3 for long-term debt, A3/F3/P3 for short-term debt) by at least one of the following rating agencies: Moody's Investors Service, Standard & Poor's or Fitch Ratings, and/or
- in government bonds issued in local currency or non-subordinated corporate bonds* which do not have a credit rating from the rating agencies mentioned above but the issuer of which has an investment grade rating by at least one of the rating agencies mentioned above, and/or

This means that the sub-fund may invest up to 25% of its assets invested in bonds and debt instruments that do not have a credit rating from the above-mentioned rating agencies and/or which do not comply with the above-mentioned credit requirements.

All maturities are taken into consideration in the selection of bonds and debt instruments.

*In the event of the bankruptcy of the relevant issuer, subordinated bonds are subordinated to the company's other debts: the company's other debts are paid first, then and only if there is still capital left, the holders of the subordinated bonds are fully or partially repaid; the holder of the subordinated bond does, however, have priority over the shareholders of the issuer in question.

Investments in assets other than securities or money market instruments

The sub-fund will invest primarily in units of undertakings for collective investment.

Securities Financing Transactions (SFTs)

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.1. Securities Financing Transactions (SFTs)'.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'

2.1.4. Financial portfolio management

The intellectual management, with the exception of the creation of the sub-fund and its maintenance in terms of the technical, product-specific and legal aspects has been delegated by the management company to KBC Fund Management Limited, 4th Floor, Scotch House, 6/7 Burgh Quay, Dublin 2, D02 VK44, Ireland.

2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2.1.6. Index and benchmark

See 'Sub-fund's investment policy'.

2.1.7. Policy pursued during the financial year

We refer to the General information on the SICAV of this report under '1.2.2. General overview of the markets' for a review of the market.

2.1.8. Future policy

We refer to the General information on the SICAV of this report under '1.2.2. General overview of the markets' for an overview of the outlook.

2.1.9. Summary risk indicator (SRI)

2 on a scale of 1 (lowest risk) to 7 (highest risk)

- a moderate level of inflation risk: there is no protection against an increase of the inflation.
- a moderate level of credit risk: the assets are primarily - but not exclusively - invested in bonds with an investment grade rating. Consequently the risk that an issuer can no longer meet its obligations is higher than in an investment that consists only of bonds with an investment grade rating. If investors are in doubt about the creditworthiness of the issuers of the bonds, the value of those bonds can fall.

There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

2.1.10. Leveraged finance

The total amount of leveraged finance used by the sub-fund is 1 135 807.06 EUR.

This amount was calculated by multiplying the leverage ratio calculated using the UCITS-commitment method by the sub-fund's total assets under management.

2.1.11. Value-at-Risk

The internal classification system, on the basis of which this sectoral spread is calculated, has been changed as of 31/12/2023. In order to provide a meaningful comparison of the sectoral spread across reporting periods, the sectoral spread calculations will be de-duplicated in the annual reports. This means that a summary table will be shown for each classification system.

Currency breakdown (as a % of net assets)

The currency distribution of the sub-fund's investments is calculated based on the currency distribution of the underlying investments of the UCIs in which the sub-fund invests (look through).

	30/06/2023	31/12/2023	30/06/2024	31/12/2024

2.4.2. Changes in the composition of the assets of Horizon Europees Obligatiedepot (in Euro)

	1 st half of year	2 nd half of year	Year
Purchases	1,128,412.06	6,986,200.93	8,114,612.99
Sales	4,233,353.55	8,866,399.29	13,099,752.84
Total 1	5,361,765.61	15,852,600.22	21,214,365.83
Subscriptions	12,621.59	60,017.17	72,638.76
Redemptions	2,352,712.77	2,156,494.13	4,509,206.90
Total 2	2,365,334.36	2,216,511.30	4,581,845.66
Monthly average of total assets	36,493,852.29	35,183,496.77	35.828.191.68
Turnover rate	8.21%	38.76%	46.42%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period. A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions. A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio. Active asset management may result in high turnover rates (monthly percentage >50%).

The detailed list of transactions can be consulted free of charge at the company designated as financial service:

2.4.5. Performance figures

BE0941634553

Horizon Europees Obligatiedepot DIS

Annual performance compared to the benchmark from 01/01/2015 through 31/12/2024 (in EUR)

Cap Div	ISIN Code	Curr ency	1 year		3 years		5 years		10 years		Since Launch*	
			Share classes	Bench mark	Share classes	Bench mark	Share classes	Bench mark	Share classes	Bench mark	Starting date	Share classes
DIS	BE0941634553	EUR	3.07%	3.16%	-1.97%	-2.32%	-1.45%	-1.42%	-0.60%	-0.31%	26/09/2003	1.63%

Risk warning: Past performance is not a guide to future performance.

* Return on annual basis.

- The bar chart shows the performance for full financial years.
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage. In the case of units that pay dividends, the dividend is incorporated geometrically in the return.
- Calculation method for date D, where NAV stands for net asset value:
Distribution units (DIV)
 Return on date D over a period of X years :

$$\left[\frac{C * NIW(D)}{NIW(Y)} \right]^{1/X} - 1$$
 where $Y = D - X$
 Return on date D since the start date S of the unit:

$$\left[\frac{C * NIW(D)}{NIW(S)} \right]^{1/F} - 1$$
 where $F = 1$ if the unit has existed for less than one year on date D
 where $F = (D - S) / 365.25$ if the unit has existed for longer than one year on date D
 where C is a factor that is determined for all N dividends between the calculation date D and the reference date.
 For dividend i on date Di with value Wi:

$$C_i = \left[\frac{W_i}{NIW(D_i)} \right] + 1$$

$$i = 1 \dots N$$
 from which $C = C_0 * \dots * C_N$.
- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for distribution shares.

Dividend on ex-dividend date 28/03/2025: 7,3159 net (10,4514 gross).

2.4.6. Costs

Ongoing Charges:

Management fees and other administrative or operating costs: 0,822%

Transaction costs: 0,169%

Percentage calculated at reporting date: 31 December 2024 .

A more detailed explanation with respect to the method of calculating ongoing charges and the relevant exclusions can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.5. Ongoing charges'

Existence of Commission Sharing Agreements

Not applicable

Existence of fee sharing agreements and rebates

The management company has shared 49,51% of its fee with the distributor, and institutional and/or professional parties.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.6. Fee-sharing agreements and rebates'.

2.4.7. Notes to the financial statements and other data

Fee for managing the investment portfolio	Max 0.70%	<p>per yearcalculated on the basis of the average total net assets of the sub-fund.</p> <p>For the portion of net assets corresponding to an investment in undertakings for collective investment(*) managed by a financial institution belonging to the KBC group, the fee for managing the investment portfolio equals the difference between the fee for managing the investment portfolio of the aforementioned undertakings for collective investment and the percentage (to the left) that is paid for managing the investment portfolio.</p> <p>KBC Fund Management Limited receives a fee from the management company of max. 0,70% per year calculated on the basis of the average total net assets of the sub-fund, without the total fees and charges received by the management company being exceeded.</p> <p>(*) The fee for the management of the investment portfolio of the undertakings for collective investment in which the sub-fund invests will amount to a year.</p>
Administration fee	0.10%	per year calculated on the basis of the average total net assets of the sub-fund.
Fee for financial services	Max 950 EUR	per year. However, the fee will never exceed a maximum of 0.005% calculated on the basis of the average total net assets of the sub-fund.
Custodian's fee	0.02%	per year and calculated monthly on the basis of the value of the securities held in custody by the custodian on the last banking day of the preceding month, except on those assets invested in underlying undertakings for collective Investment managed by a financial institution of the KBC group.
Fee paid to the bevek's statutory auditor	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Fee paid to the directors	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Annual tax	See prospectus General Part : 'Information concerning the Bevek - H. Tax treatment'	
Other charges (estimation)	0.10%	of the net assets of the sub-fund per year.

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

Launch date:	3 February 2014
Initial subscription price:	50 EUR
Currency:	EUR

2.1.2. Stock exchange listing

Not applicable.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main object of the sub-fund is to generate the highest possible return for its unit holders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.
The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. **Consequently, there may be an impact on concentration risk.** Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

Horizon Flexible Plan aims to generate a potential return by investing, either directly or indirectly (via funds), primarily in a worldwide selection of shares and bonds.

The sub-fund comprises two parts: a fixed part (fixed relationship between bonds and shares) and a variable part (variable relationship between bonds and shares).

At the start of each period (no later than the last banking day in January), the ratio between the fixed part and the variable part is determined. This ratio depends on the volatility of the market: the higher the volatility, the more the sub-fund will invest in the fixed part. At least once a month, the ratio between the fixed part and the variable part will be adjusted on the basis of a mathematical model that is particularly determined by the sub-fund's performance.

The fixed part entails a fixed ratio between bonds and shares and will at all times comprise more bonds than shares.

The variable part is made up equally of bonds and shares at the start of the period. At least once a month, the weighting will be adjusted in accordance with a mathematical model based on the relative performance of the shares compared to that of the bonds since the beginning of the annual period. If the shares generate a lower return than the bonds, for instance, the weighting of the shares relative to the bonds will be reduced. Conversely, if the shares generate a higher return than the bonds, the weighting of the shares relative to the bonds will be increased. At the end of each period, the variable part aims to be invested entirely in the asset class that has generated the best return during the period relative to the other asset class.

The sub-fund may not invest more than 85% in shares.

Horizon Flexible Plan may make limited use of derivatives. This means it can use derivatives to help achieve the investment objectives (for instance, to increase or decrease the exposure to one or more market segments in line with the investment strategy).

The share component is allocated in accordance with the equity investment strategy drawn up by KBC Asset Management NV (see www.kbc.be/investment-strategy).

Investments may be selected from any region, sector or theme.

The bond component is allocated in accordance with the bond investment strategy drawn up by KBC Asset Management NV (see www.kbc.be/investment-strategy).

Investments may be selected from any region, sector or theme.

The fund is actively managed without referring to any benchmark.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

Transparency of adverse sustainability impacts:

The sub-fund considered the principal adverse impacts of its investment decisions on sustainability factors ('PAI') as described by the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector ('SFDR').

The principal adverse impacts on sustainability factors were explicitly taken into account through the General exclusion policy. More information on the principal adverse impact indicators that are taken into account can be found at www.kbc.be/investment-legal-documents > General exclusion policy for conventional and Responsible Investing funds and www.kbc.be/investment-legal-documents > Exclusion policies for Responsible Investing funds.

In addition, the principal adverse impacts on sustainability factors were implicitly taken into account through the Proxy Voting and Engagement Policy of KBC Asset Management NV (more information can be found at www.kbc.be/investment-legal-documents > Retrospective Proxy Voting - overview > Proxy Voting and Engagement Policy).

Characteristics of the bonds and debt instruments

The sub-fund invests in bonds and debt instruments issued by both companies and public authorities.

The sub-fund invests directly and/or indirectly at least 50% of its assets in bonds and debt instruments

- in securities rated investment grade (at least BBB-/Baa3 for long-term debt, A3/F3/P3 for short-term debt) by at least one of the following rating agencies: Moody's Investors Service, Standard & Poor's or Fitch Ratings, and/or
- in government bonds issued in local currency or non-subordinated corporate bonds* which do not have a credit rating from the rating agencies mentioned above but the issuer of which has an investment grade rating by at least one of the rating agencies mentioned above, and/or
- in money market instruments whose issuer has an investment grade rating (minimum A3/F3/P3 for short-term debt) from at least one of the above rating agencies.

This means that the sub-fund may invest up to 50% of its assets invested in bonds and debt instruments that do not have a credit rating from the above-mentioned rating agencies and/or which do not comply with the above-mentioned credit requirements.

All maturities are taken into consideration in the selection of bonds and debt instruments.

*In the event of the bankruptcy of the relevant issuer, subordinated bonds are subordinated to the company's other debts: the company's other debts are paid first, then and only if there is still capital left, the holders of the subordinated bonds are fully or partially repaid; the holder of the subordinated bond does, however, have priority over the shareholders of the issuer in question.

Investments in assets other than securities or money market instruments

The sub-fund will invest primarily in units of undertakings for collective investment.

Securities Financing Transactions (SFTs)

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.1. Securities Financing Transactions (SFTs)'.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'.

2.1.4. Financial portfolio management

The intellectual management, with the exception of the creation of the sub-fund and its maintenance in terms of the technical, product-specific and legal aspects has been delegated by the management company to KBC Fund Management Limited, 4th Floor, Scotch House, 6/7 Burgh Quay, Dublin 2, D02 VK44, Ireland.

2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2.1.6. Index and benchmark

Not applicable.

2.1.7. Policy pursued during the financial year

We refer to the General information on the SICAV of this report under '1.2.2. General overview of the markets' for a review of the market.

2.1.8. Future policy

This fund's policy is a result of actual market fluctuations observed day-to-day and which are incorporated into the mathematical model. As soon as the bond and equity market climate changes, the policy of this fund shifts accordingly.

2.1.9. Summary risk indicator (SRI)

3 on a scale of 1 (lowest risk) to 7 (highest risk)

- a moderate level of inflation risk: the bond component does not provide any protection against an increase in inflation.
- a moderate level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a real chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of credit risk: the bond component invests primarily - but not exclusively- in bonds with an investment grade rating. Consequently, the risk that an issuer can no longer meet its obligations is higher than in an investment that consists only of bonds with an investment grade rating. If investors are in doubt about the creditworthiness of the issuers of the bonds, the value of those bonds can fall.
- a moderate level of market risk: the level of the risk reflects the volatility of the equity component.
- a moderate level of performance risk: the level of the risk reflects the volatility of the equity component.

There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

2.1.10. Leveraged finance

The total amount of leveraged finance used by the sub-fund is 0.00 EUR.

This amount was calculated by multiplying the leverage ratio calculated using the UCITS-commitment method by the sub-fund's total assets under management.

2.1.11. Value-at-Risk

Not applicable

The internal classification system, on the basis of which this sectoral spread is calculated, has been changed as of 31/12/2023. In order to provide a meaningful comparison of the sectoral spread across reporting periods, the sectoral spread calculations will be de-duplicated in the annual reports. This means that a summary table will be shown for each classification system.

Currency breakdown (as a % of net assets)

The currency distribution of the sub-fund's investments is calculated based on the currency distribution of the underlying investments of the UCIs in which the sub-fund invests (look through).

2.4.2. Changes in the composition of the assets of Horizon Flexible Plan (in Euro)

	1 st half of year	2 nd half of year	Year
Purchases	61,922,676.16	51,488,619.06	113,411,295.22
Sales	69,431,741.95	56,889,914.64	126,321,656.59
Total 1	131,354,418.10	108,378,533.71	239,732,951.81
Subscriptions	1,033,230.39	735,792.89	1,769,023.28
Redemptions	7,311,720.38	5,981,032.40	13,292,752.78
Total 2	8,344,950.77	6,716,825.29	15,061,776.06
Monthly average of total assets	81,355,506.66	78,935,580.88	80,120,647.42
Turnover rate	151.20%	128.79%	280.42%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period.

A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions.

A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio.

Active asset management may result in high turnover rates (monthly percentage >50%), reason: The fund trades inline with market fluctuations moving into the better performing asset class using Futures on a day to day basis. Futures are closed periodically and moved to Fund Certificates. The fund gets reset annually with Fund Certificates.

The detailed list of transactions can be consulted free of charge at the company designated as financial service:

KBC Bank NV, Havenlaan 2, B-1080 Brussels

2.4.3. Amount of commitments in respect of financial derivatives positions

CAP	BE6261308553	EUR	8.47%		-0.13%		1.43%		1.42%		03/02/2014	1.97%

Risk warning: Past performance is not a guide to future performance.

* Return on annual basis.

- The bar chart shows the performance for full financial years.
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage.
- Calculation method for date D, where NAV stands for net asset value:

Capitalisation units (CAP)

Return on date D over a period of X years :

$$[\text{NIW}(\text{D}) / \text{NIW}(\text{Y})] ^ {1 / \text{X}} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[\text{NIW}(\text{D}) / \text{NIW}(\text{S})] ^ {1 / \text{F}} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation shares.

2.4.6. Costs

Ongoing Charges:

Management fees and other administrative or operating costs: 1,561%

Transaction costs: 0,223%

Percentage calculated at reporting date: 31 December 2024 .

A more detailed explanation with respect to the method of calculating ongoing charges and the relevant exclusions can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.5. Ongoing charges'

Existence of Commission Sharing Agreements

Not applicable

Existence of fee sharing agreements and rebates

The management company has shared 57,06% of its fee with the distributor, and institutional and/or professional parties.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.6. Fee-sharing agreements and rebates'.

2.4.7. Notes to the financial statements and other data

Fee for managing the investment portfolio	Max 1.36%	<p>per yearcalculated on the basis of the average total net assets of the sub-fund.</p> <p>For the portion of net assets corresponding to an investment in undertakings for collective investment(*) managed by a financial institution belonging to the KBC group, the fee for managing the investment portfolio equals the difference between the fee for managing the investment portfolio of the aforementioned undertakings for collective investment and the percentage (to the left) that is paid for managing the investment portfolio.</p> <p>KBC Fund Management Limited receives a fee from the management company of max. 1,36% per year calculated on the basis of the average total net assets of the sub-fund, without the total fees and charges received by the management company being exceeded.</p> <p>(*) The fee for the management of the investment portfolio of the undertakings for collective investment in which the sub-fund invests will amount to a year.</p>
Administration fee	0.10%	per year calculated on the basis of the average total net assets of the sub-fund.
Fee for financial services	Max 950 EUR	per year. However, the fee will never exceed a maximum of 0.005% calculated on the basis of the average total net assets of the sub-fund.
Custodian's fee	Max 0.04%	per year and calculated monthly on the basis of the value of the securities held in custody by the custodian on the last banking day of the preceding month, except on those assets invested in underlying undertakings for collective Investment managed by a financial institution of the KBC group.
Fee paid to the bevek's statutory auditor	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Fee paid to the directors	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Annual tax	See prospectus General Part : 'Information concerning the Bevek - H. Tax treatment'	
Other charges (estimation) such as the regulator's fees, the cost of publication and any marketing costs	0.10%	of the net assets of the sub-fund per year.

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-

fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

Not applicable.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. **Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.**

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

Horizon Flexible Portfolio January Responsible Investing aims to generate a potential return by investing, directly or indirectly, primarily in a worldwide selection of shares and bonds.

At the start of each period (no later than the fifth Belgian banking day of January every year), the sub-fund aims to invest equally in shares and bonds.

During this annual period, the weighting of the assets will be reviewed at least every month based on a mathematical model. The allocation between shares and bonds will depend primarily on the relative performance of both asset classes since the beginning of the annual period. If shares generate a lower return than bonds, for instance, the weighting of shares relative to bonds will be reduced. Conversely, if shares generate a higher return than bonds, the weighting of shares relative to bonds will be increased. During the annual period, the portfolio may temporarily be composed entirely of shares or of bonds.

At the end of the period, the sub-fund aims to be invested entirely in the asset class that has generated the best return during the period relative to the other asset class.

Information related to Responsible Investing

Within the above limits, the sub-fund pursues (directly or indirectly) responsible investment objectives based on a dualistic approach: a negative screening and a positive selection methodology.

KBC Asset Management NV has a team of specialist researchers responsible for this dualistic approach. They are assisted by an independent advisory board (the “**Responsible Investing Advisory Board**”) comprised of up to twelve persons, who are not affiliated to KBC Asset Management NV, and whose sole responsibility is to supervise the dualistic approach and activities of the specialist researchers. The secretariat of the advisory board is handled by a representative of KBC Asset Management NV. Moreover, KBC Asset Management NV works with data suppliers with expertise in Responsible Investing that provide data to the specialized researchers, who process and complete the data with publicly available information (including annual reports, press publications, etc.).

The sub-fund promotes a combination of environmental and/or social characteristics and, even though it does not have sustainable investments as an objective, it shall invest a minimum proportion of its assets in economic activities that contribute to the achievement of environmental or social objectives (i.e. ‘sustainable investments’).

The issuers in which it invests must follow good governance practices.

The sub-fund is compliant with the transparency obligations of article 11 (1) of Regulation (EU) 2019/2088 of the European Parliament and of the council of 27 November 2019 on sustainability-related disclosures in the financial services sector (‘SFDR’). More information on how the sub-fund promotes environmental and social characteristics can be found in the ‘Annex for Horizon Flexible Portfolio January Responsible Investing’ of this annual report. This

annex specifically covers the periodic reports for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852.

Negative screening

In practical terms the end result of this negative screening procedure is that the sub-fund excludes issuers in advance from the Responsible Investment universe which fall foul of the exclusion policy available on www.kbc.be/investment-legal-documents > Exclusion policy for Responsible Investing funds.

The application of these policies means that issuers involved in such activities like the tobacco industry, weapons, gambling and adult entertainment are excluded from the sub-fund's investment universe. This screening also ensures that issuers who seriously violate fundamental principles of environmental protection, social responsibility and good governance are excluded from the sub-fund's investment universe.

These negative screening principles are not exhaustive and may be adapted from time to time under the supervision of the Responsible Investing Advisory Board.

Positive selection methodology

Within the defined investment universe and other limits described above, the responsible investment objectives of the sub-fund are the following:

- (1) promote the integration of sustainability into the policy decisions of issuers (companies, governments, supranational debtors and/or agencies linked to governments), by preferring issuers with a better **ESG (risk)score**, where ESG stands for 'Environmental, Social and Governance', and
- (2) promote climate change mitigation, by preferring issuers with lower **Greenhouse Gas Intensity**, with the objective of meeting a predetermined Greenhouse Gas intensity target;
- (3) support sustainable development, through 'sustainable investments' in accordance with art. 2(17) SFDR. Sustainable investments will consist of **bonds financing green and/or social projects** (3.1) and investments in issuers contributing to the achievement of the **UN Sustainable Development Goals** (3.2). However, no binding minimum percentage has been set for this latter category, although it contributes to the achievement of the minimum percentage of 'sustainable investments' for this sub-fund.

More information on the investment policy for Responsible Investing funds is available at www.kbc.be/investment-legal-documents > Investment policy for Responsible Investing funds.

(1) ESG-(risk)score

The contribution to the integration of sustainability into policy decisions of the issuers is measured based on an ESG (risk) score. For companies, an ESG risk score is assigned, for countries an ESG score. This score represents the aggregated performance assessment of a given issuer against a series of ESG criteria which are grounded to the extent possible against objective measures. The main factors underpinning the ESG criteria are:

- In the case of instruments issued by companies:
 - respect for the environment (e.g., reduction in greenhouse gas emissions);
 - attention to society (e.g., employee working conditions); and
 - corporate governance (e.g., independence and diversity of the board of directors).

At least 90% of the corporate investments in the portfolio, as measured by assets under management, must have an ESG risk score. The ESG risk score for companies is an ESG risk score supplied by a data provider.

- In the case of instruments issued by national governments, supranational debtors and/or agencies linked to governments, the following five pillars are used
 - overall economic performance and stability (e.g., quality of institutions and government);
 - socio-economic development and health of the population (e.g., education and employment);
 - equality, freedom and the rights of all citizens;
 - environmental policy (e.g., climate change); and
 - security, peace and international relations.

These lists are not exhaustive and may be changed under the supervision of the Responsible Investing Advisory Board.

KBC Asset Management NV assigns an ESG score to at least 90 % of the investments in countries within the portfolio, as measured by assets under management.

To achieve this objective, the ESG-risk score of the portfolio for companies is compared to a reference portfolio determined on the basis of the following target allocation: 55% stocks and 45% bonds.

The ESG score for countries of the portfolio is compared to a reference portfolio of global government bonds (composed of the following benchmarks: 67% developed markets: J.P. Morgan GBI Global Unhedged EUR and 33% emerging markets: J.P. Morgan GBI-EM Global Diversified Composite Unhedged EUR).

To calculate the ESG-(risk)score at portfolio level, the weighted average of the ESG-(risk)scores of the positions in the sub-fund are taken into account. Technical items such as cash and derivatives are not taken into account and also companies or countries for which no data is available are left out. The weights used in the calculation depend on the size of the positions in the sub-fund, rescaled for these items.

More information on the ESG-(risk)score and the concrete goals of the sub-fund can be found in the 'Annex for Horizon Flexible Portfolio January Responsible Investing' to the prospectus.

The targets can be revised upwards or downwards.

(2) Greenhouse Gas Intensity

The objective to promote climate change mitigation, by favoring lower greenhouse gas intensity issuers, with the goal of meeting a predetermined greenhouse gas intensity target covers at least 90% of the portfolio. The objective does not apply to issuers for which data is not available.

The contribution of issuers to climate change mitigation is measured based on their greenhouse gas intensity. For companies, greenhouse gas intensity is defined as absolute greenhouse gas emissions (in tonnes CO₂ equivalent), divided by revenues (in mln USD). For countries, it is defined as the greenhouse gas emissions (in tonnes CO₂ equivalent), divided by the Gross Domestic Product (in mln USD).

The targets for instruments issued by companies are different from those for instruments issued by national governments, supranational debtors and/or government-linked agencies.

More information on Greenhouse Gas Intensity and the concrete goals of the sub-fund can be found in the 'Annex for Horizon Flexible Portfolio January Responsible Investing' to the prospectus.

The targets may be revised upwards or downwards.

(3) Sustainable investments

(3.1) Bonds financing green and/or social projects

To encourage the transition to a more sustainable world, the sub-fund commits to invest a minimum proportion of the portfolio in bonds financing green and/or social projects. Bonds whose proceeds will be used exclusively to finance (a combination of) green and social projects that are aligned with the International Capital Market Association (ICMA) Green Bond Principles and Social Bond Principles on the Use of Proceeds are considered bonds financing green and/or social projects. Compliance with these principles is verified by an external party. Instruments that meet these requirements are labelled 'sustainable investments', in line with article 2(17) SFDR.

More information on bonds financing green and/or social projects and the concrete goals of the sub-fund can be found in the 'Annex for Horizon Flexible Portfolio January Responsible Investing' to the prospectus.

The targets may be revised upwards or downwards.

(3.2) UN Sustainable Development Goals

To support sustainable development, the sub-fund can invest part of its portfolio in issuers that contribute to the UN Sustainable Development Goals. The UN Sustainable Development Goals include both social and environmental objectives.

Companies are considered to contribute to sustainable development when at least 20% of the revenues are linked to the UN Sustainable Development Goals. The activities of the companies are assessed on multiple sustainable themes that can be linked to the UN Sustainable Development Goals.

Governments are assessed on the five pillars as described in the ESG score, which contain indicators that can be linked to the 17 UN Sustainable Development Goals. If a government scores sufficiently well on one of these pillars and not significantly poor on the other pillars, the bonds of this government and its sub-governments and agencies are considered to be instruments that contribute to sustainable development. Bonds of supranational governments contribute to the UN's Sustainable development goals if one of the two criteria is met:

- at least half of its members contribute to the UN Sustainable Development Goals (weighted by voting power/full paid-in capital/percentage of population (in order of availability)).
- the mission statement of the supranational institution has a sustainable objective and less than half of its members fall in the worst half of the screening for controversial regimes.

Instruments of issuers that meet these requirements are designated as "sustainable investments," according to Article 2(17) SFDR. In addition, the Responsible Investing Advisory Board can award the "sustainable development" label to instruments of companies and governments. In that case, these investments shall also qualify as "sustainable investments," according to Article 2(17) SFDR. However, the awarding of the 'sustainable development' label by the Responsible Investing Advisory Board to instruments of governments is very exceptional.

More information about the methodology used to qualify investments as investments which contribute to the UN Sustainable Development Goals can be found in the 'Annex for Horizon Flexible Portfolio January Responsible Investing' to the prospectus.

Potential Exceptions

It cannot be ruled out, however, that very limited investments may be made temporarily in assets that do not meet the above criteria. The reasons for this include the following:

- Developments as a result of which an issuer can no longer be regarded as eligible after purchase;
- Corporate events, such as a merger of one company with another, where the merged company can no longer be considered an eligible issuer based on the above criteria;
- Incorrect data as a result of which assets are invested (unintentionally and erroneously) in assets purchased when it should not have been eligible for the sub-fund;
- A planned update of the screening criteria as a result of which assets should be excluded from the sub-fund, but which the management company chooses to refrain from selling immediately in the best interest of the customer;
- External circumstances such as market movements and updates of external data can lead to investment

solutions failing to achieve the abovementioned targets.

In these cases, the fund manager will replace the assets concerned with more appropriate assets as soon as possible, always taking into account the sole interest of the investor.

In addition, for the purpose of efficient portfolio management, the fund manager may to a significant degree use derivatives relating to assets issued by issuers that would not be eligible for inclusion in the sub-fund, in so far as there is no serviceable and comparable alternative available on the market. In addition, the counterparties with which the derivative transactions are entered into may not necessarily be issuers having a responsible nature.

The stock component is invested in accordance with the investment strategy for shares drawn up by KBC Asset Management NV (see www.kbc.be/investment-strategy).

Investments may be selected from any region, sector or theme.

The bond component is invested in accordance with the investment strategy for bonds drawn up by KBC Asset Management NV (see www.kbc.be/investment-strategy).

Investments may be selected from any region, sector or theme. For details of the bond component, please see the 'Characteristics of the bonds and debt instruments' section below.

The fund is actively managed without referring to any benchmark.

The responsible character is guaranteed by the aforementioned Responsible Investing methodology.

Taxonomy related information

At the date of this prospectus, the sub-fund does not commit to invest a minimum proportion of its assets in environmentally sustainable economic activities which contribute to any of the environmental objectives set out in Article 9 of the Regulation (EU) 2020/852 of the European Parliament and of the Council of 18 June 2020 on the establishment of a framework to facilitate sustainable investment ('EU Taxonomy Framework'). The minimum proportion of investments in environmentally sustainable economic activities within the meaning of the EU Taxonomy Framework is 0%. This will be monitored on a regular basis and as soon as sufficiently reliable, timely and verifiable data from issuers or invested companies is available, the prospectus may be updated.

Companies are considered to contribute to sustainable development if at least 20% of sales are linked to the UN Sustainable Development Goals. This includes companies with at least 20% of sales aligned to the EU Taxonomy Framework based on Trucost data. Instruments of companies that meet these requirements are referred to as "sustainable investments," according to art. 2(17) SFDR. More information on the percentage in the portfolio that was considered "sustainable investments with an environmental objective aligned with the EU Taxonomy Framework " based on this criterion during the reporting period, can be found in the annual reports for this sub-fund published after Jan. 1, 2024.

More information on the EU Taxonomy Framework can be found in the 'Annex for Horizon Flexible Portfolio January Responsible Investing' to the prospectus.

Transparency of adverse sustainability impacts:

The sub-fund considers the principal adverse impacts of its investment decisions on sustainability factors by taking into account the principal adverse impact indicators ('PAI'), as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability disclosure in the financial services sector ('SFDR').

The principal adverse impacts on sustainability factors were explicitly taken into account through the general exclusion policy for conventional funds and Responsible Investing funds and the exclusion policy for Responsible Investing funds. The principal adverse impacts on sustainability factors that were taken into account through the exclusion policies can be found in the 'Annex for Horizon Flexible Portfolio January Responsible Investing'.

The principal adverse impacts on sustainability factors were implicitly taken into account through the Proxy Voting and Engagement Policy. The principal adverse impacts on sustainability factors that were taken into account through the Proxy Voting and Engagement Policy can be found in the 'Annex for Horizon Flexible Portfolio January Responsible Investing'.

More information on how the sub-fund aims to consider the principal adverse impacts on sustainability factors can also be found in the 'Annex for Horizon Flexible Portfolio January Responsible Investing'.

Characteristics of the bonds and debt instruments

The sub-fund invests in bonds and debt instruments issued by both companies and public authorities.

The sub-fund invests directly and/or indirectly at least 50% of its assets in bonds and debt instruments

- in securities rated investment grade (at least BBB-/Baa3 for long-term debt, A3/F3/P3 for short-term debt) by at least one of the following rating agencies: Moody's Investors Service, Standard & Poor's or Fitch Ratings, and/or
- in government bonds issued in local currency or non-subordinated corporate bonds* which do not have a credit rating from the rating agencies mentioned above but the issuer of which has an investment grade rating by at least one of the rating agencies mentioned above, and/or
- in money market instruments whose issuer has an investment grade rating (minimum A3/F3/P3 for short-term debt) from at least one of the above rating agencies.

This means that the sub-fund may invest up to 50% of its assets invested in bonds and debt instruments that do not have a credit rating from the above-mentioned rating agencies and/or which do not comply with the above-mentioned credit requirements.

All maturities are taken into consideration in the selection of bonds and debt instruments.

*In the event of the bankruptcy of the relevant issuer, subordinated bonds are subordinated to the company's other debts: the company's other debts are paid first, then and only if there is still capital left, the holders of the subordinated bonds are fully or partially repaid; the holder of the subordinated bond does, however, have priority over the shareholders of the issuer in question.

Investments in assets other than securities or money market instruments

The sub-fund will invest primarily in units of undertakings for collective investment.

Securities Financing Transactions (SFTs)

The sub-fund may not lend any financial instruments.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects

2.1.4. Financial portfolio management

The intellectual management, with the exception of the creation of the sub-fund and its maintenance in terms of the technical, product-specific and legal aspects has been delegated by the management company to KBC Fund Management Limited, 4th Floor, Scotch House, 6/7 Burgh Quay, Dublin 2, D02 VK44, Ireland.

2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2.1.6. Index and benchmark

Not applicable.

2.1.7. Policy pursued during the financial year

The fund is managed using a mathematical model. The split between equity and bonds is determined by the relative performance evolution of the two asset classes, together with their volatility and time to maturity. At the end of the annual term we carry out a repositioning within the fund, at which point a new performance reference date is determined. The equity and bond components follow the overall strategy of KBC Asset Management. Since the annual fund reset in January 2024, the equity allocation grew steadily throughout the year to be fully invested in equities from October.

2.1.8. Future policy

This fund's policy is a result of actual market fluctuations observed day-to-day and which are incorporated into the mathematical model. As soon as the bond and equity market climate changes, the policy of this fund shifts accordingly.

2.1.9. Summary risk indicator (SRI)

3 on a scale of 1 (lowest risk) to 7 (highest risk)

- a moderate level of inflation risk: the bond component does not provide any protection against an increase in inflation.
- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of credit risk: the bond component invests primarily - but not exclusively- in bonds with an investment grade rating. Consequently, the risk that an issuer can no longer meet its obligations is higher than in an investment that consists only of bonds with an investment grade rating. If investors are in doubt about the creditworthiness of the issuers of the bonds, the value of those bonds can fall.
- a moderate level of market risk: the level of the risk reflects the volatility of the equity component.
- a moderate level of performance risk: the level of the risk reflects the volatility of the equity component.

There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

2.1.10. Leveraged finance

The total amount of leveraged finance used by the sub-fund is 0.00 EUR.

This amount was calculated by multiplying the leverage ratio calculated using the UCITS-commitment method by the sub-fund's total assets under management.

2.1.11. Value-at-Risk

Not applicable

2.2. Balance sheet

Balance sheet layout		31/12/2024 (in Euro)	31/12/2023 (in Euro)
	TOTAL NET ASSETS	38,795,223.85	40,121,983.61
II.	Securities, money market instruments, UCIs and derivatives		
E.	Open-end undertakings for collective investment	38,531,636.45	40,007,010.37

The internal classification system, on the basis of which this sectoral spread is calculated, has been changed as of 31/12/2023. In order to provide a meaningful comparison of the sectoral spread across reporting periods, the sectoral spread calculations will be de-duplicated in the annual reports. This means that a summary table will be shown for each classification system.

Currency breakdown (as a % of net assets)

The currency distribution of the sub-fund's investments is calculated based on the currency distribution of the underlying investments of the UCIs in which the sub-fund invests (look through).

2.4.2. Changes in the composition of the assets of Horizon Flexible Portfolio January Responsible Investing (in Euro)

	1 st half of year	2 nd half of year	Year
Purchases	26,927,006.03	25,819,921.76	52,746,927.79
Sales	32,898,851.89	28,063,188.60	60,962,040.49
Total 1	59,825,857.92	53,883,110.36	113,708,968.28
Subscriptions	164,379.87	166,753.14	331,133.01
Redemptions	4,729,237.38	1,903,766.84	6,633,004.22
Total 2	4,893,617.25	2,070,519.98	6,964,137.23
Monthly average of total assets	38,766,845.99	38,040,635.74	38.396.269.57
Turnover rate	141.70%	136.20%	278.01%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period.

A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions.

A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio.

Active asset management may result in high turnover rates (monthly percentage >50%), reason: It is a model driven funds that trade based on market movements in addition to regular strategy changes and subscriptions and redemptions. In addition, the annual fund reset also contributes to the higher turnover.

The detailed list of transactions can be consulted free of charge at the company designated as financial service:

KBC Bank NV, Havenlaan 2, B-1080 Brussels

2.4.3. Amount of commitments in respect of financial derivatives positions

Risk warning: Past performance is not a guide to future performance.

* Return on annual basis.

- The bar chart shows the performance for full financial years.
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage. In the case of units that pay dividends, the dividend is incorporated geometrically in the return.
- Calculation method for date D, where NAV stands for net asset value:
Capitalisation units (CAP)
 Return on date D over a period of X years :

$$[NIW(D) / NIW(Y)]^{[1 / X]} - 1$$
 where Y = D-X
 Return on date D since the start date S of the unit:

$$[NIW(D) / NIW(S)]^{[1 / F]} - 1$$
 where F = 1 if the unit has existed for less than one year on date D
 where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D
Distribution units (DIV)
 Return on date D over a period of X years :

$$[C * NIW(D) / NIW(Y)]^{[1 / X]} - 1$$
 where Y = D-X
 Return on date D since the start date S of the unit:

$$[C * NIW(D) / NIW(S)]^{[1 / F]} - 1$$
 where F = 1 if the unit has existed for less than one year on date D
 where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D
 where C is a factor that is determined for all N dividends between the calculation date D and the reference date.
 For dividend i on date Di with value Wi:

$$Ci = [Wi / NIW(Di)] + 1$$

$$i = 1 \dots N$$
 from which $C = C0 * \dots * CN$.
- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation and distribution shares

Dividend on ex-dividend date 28/03/2025: 15,5719 net (22,2456 gross).

2.4.6. Costs

Ongoing Charges:

Capitalisation :

Management fees and other administrative or operating costs: 1,802%
Transaction costs: 0,727%

Distribution :

Management fees and other administrative or operating costs: 1,801%
Transaction costs: 0,735%

Percentage calculated at reporting date: 31 December 2024 .

A more detailed explanation with respect to the method of calculating ongoing charges and the relevant exclusions can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.5. Ongoing charges'

Existence of Commission Sharing Agreements

Not applicable

Existence of fee sharing agreements and rebates

The management company has shared 52,99% of its fee with the distributor, and institutional and/or professional parties.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.6. Fee-sharing agreements and rebates'.

2.4.7. Notes to the financial statements and other data

Fee for managing the investment portfolio	Max 1.50%	<p>per yearcalculated on the basis of the average total net assets of the sub-fund.</p> <p>For the portion of net assets corresponding to an investment in undertakings for collective investment(*) managed by a financial institution belonging to the KBC group, the fee for managing the investment portfolio equals the difference between the fee for managing the investment portfolio of the aforementioned undertakings for collective investment and the percentage (to the left) that is paid for managing the investment portfolio.</p> <p>KBC Fund Management Limited receives a fee from the management company of max. 1,50% per year calculated on the basis of the average total net assets of the sub-fund, without the total fees and charges received by the management company being exceeded.</p> <p>(*) The fee for the management of the investment portfolio of the undertakings for collective investment in which the sub-fund invests will amount to a year.</p>
Administration fee	0.10%	per year calculated on the basis of the average total net assets of the sub-fund.
Fee for financial services	Max 950 EUR	per year. However, the fee will never exceed a maximum of 0.005% calculated on the basis of the average total net assets of the sub-fund.
Custodian's fee	Max 0.04%	per year and calculated monthly on the basis of the value of the securities held in custody by the custodian on the last banking day of the preceding month, except on those assets invested in underlying undertakings for collective Investment managed by a financial institution of the KBC group.
Fee paid to the bevek's statutory auditor	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Fee paid to the directors	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Annual tax	See prospectus General Part : 'Information concerning the Bevek - H. Tax treatment'	
Other charges (estimation) such as the regulator's fees, the cost of publication and any marketing costs	0.10%	of the net assets of the sub-fund per year.

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and article 6, first paragraph of Regulation (EU) 2020/852

Product Name:
Horizon Flexible Portfolio January Responsible Investing

Legal entity identifier:
875500JZQJXCH2EC4775

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU-Taxonomie** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☒ Yes

☒ No

☐ It made **sustainable investments with an environmental objective**: %

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 34.37% of sustainable investments

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ with a social objective

☐ It made **sustainable investments with a social objective**: %

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Unless otherwise stated, all actual data in this periodic report are expressed as weighted quarterly average.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

This sub-fund:

- has promoted the integration of sustainability into the policy decisions of issuers (companies, governments, supranational debtors and/or agencies linked to governments) by preferring issuers with a better ESG (risk)score;
- has promoted climate change mitigation by preferring issuers with lower greenhouse gas intensity, with the objective of meeting a predetermined greenhouse gas intensity target;
- has promoted sustainable development through 'sustainable investments' in accordance with art. 2(17) SFDR.

Sustainable investments consist of bonds financing green and/or social projects and investments in issuers contributing to the achievement of the UN Sustainable Development Goals.

However, no binding minimum percentage has been set for this latter category, although it contributes to the achievement of the minimum percentage of 'sustainable investments' for this sub-fund.

The specific objectives of the sub-fund can be found in the table under title 'How did the sustainability indicators perform?' of this annex.

The sub-fund invested 34.37% of the assets in "sustainable investments" as defined by art. 2.17 SFDR and 65.14% in other investments aligned with environmental or social characteristics.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by this sub-fund.

For investments in instruments issued by governments, supranational debtors and/or government-linked agencies, the described reference portfolio of global government bonds is used as a basis for comparison, to compare certain ESG characteristics promoted by the sub-fund.

How did the sustainability indicators perform?

Sustainability indicators
measure how the environmental or social characteristics promoted by the financial product are attained.

	Target	Target applied	Actuals	Objective attained
Instruments issued by companies				
ESG risk score	Better than the target allocation as described in the prospectus under the title 'information concerning the sub-fund Flexible Portfolio January Responsible Investing'.	21.04	19.38	Yes
Greenhouse gas intensity	Companies are assessed on two targets whereby the most strict of the two will determine the target applied: 15% better than the target allocation as described in the prospectus under the title 'information concerning the sub-fund Flexible Portfolio January Responsible Investing' and a reduction of 50% by 2030 compared to the target allocation at end of 2019. An immediate reduction of 30% is envisaged for 2019, followed by an annual reduction of 3%.	104.68	46.16	Yes
Bonds financing green and/or social projects	A minimum of 10% of corporate bonds invested in should qualify as bonds financing green and/or social projects.	10	18.39	Yes
Instruments issued by governments, supranational debtors and/or agencies linked to governments				
ESG Score	10% better than the reference portfolio of global government bonds (composed of the following benchmarks: 67% developed markets: J.P. Morgan GBI Global Unhedged EUR Index and 33% emerging markets: J.P. Morgan GBI-EM Global Diversified Composite Unhedged EUR Index).	0.77	0.82	Yes
Greenhouse gas intensity	25% better than the reference portfolio of global government bonds (composed of the following benchmarks: 67% developed markets: J.P. Morgan GBI Global Unhedged EUR Index and 33% emerging markets: J.P. Morgan GBI-EM Global Diversified Composite Unhedged EUR Index).	413.18	356.25	Yes
Bonds financing green and/or social projects	A minimum of 10% of the investments in bonds issued by governments, supranational debtors and/or agencies linked to governments should qualify as bonds financing green and/or social projects.	10	22.62	Yes
Minimum % Sustainable Investments	A minimum of 20.00% of sustainable investments. The sustainable investments for this sub-fund will consist of bonds financing green and/or social projects and investments in issuers contributing to the achievement of the UN Sustainable Development Goals. However, no binding minimum percentage has been set for the latter category.	20.00	34.37	Yes
Minimum % sustainable investments with an environmental objective in economic activities that do not qualify as environmentally sustainable according to the EU taxonomy	Minimum 1% ecologically sustainable investments in economic activities that do not qualify as ecologically sustainable according to the EU taxonomy.		18.57	Not available
Minimum % Sustainable	Minimum 1% sustainable investments with a social objective.	1	15.45	Yes

Investments with a social objective				
Minimum % of assets promoting E/S characteristics	Minimum 80% of assets promoting E/S characteristics.	80	99.52	Yes
Other specific objectives	not applicable			

As indicated in the table above, the sub-fund has reached all targets during the reference period.

The sub-fund pursued these objectives (directly or indirectly) based on a dualistic approach: the negative screening and the positive selection methodology.

All targets are also monitored by KBC Asset Management at month-end. Given the difference in the periodicity of the calculations, it cannot be excluded that the monitoring at month-end leads to different results than the weighted quarterly averages shown in the table above and section 2.1.7 of the general annual report.

No breaches at month-end have been identified for this sub-fund.

... and compared to previous periods?

Sustainability indicators	Achieved result	Achieved result	Achieved result
	31/12/2022	31/12/2023	31/12/2024
Instruments issued by companies			
ESG risk score		18.60	19.38
Greenhouse gas intensity		44.61	46.16
Bonds financing green and/or social projects		0.00	18.39
Instruments issued by governments, supranational debtors and/or agencies linked to governments			
ESG Score		0.00	0.82
Greenhouse gas intensity		0.00	356.25
Bonds financing green and/or social projects		0.00	22.62
Sustainable Investments	74.12	75.37	34.37
Sustainable Investments with an environmental objective in economic activities that do not qualify as environmentally sustainable according to the EU taxonomy (%)		29.06	18.92
Sustainable Investments with a social objective (%)		46.31	15.45
Assets promoting E/S characteristics (%)		99.55	99.52

For the reporting period 01/01/2022-31/12/2022, the results achieved were not reported for each sustainability indicator separately (except for the percentage of sustainable investments).

For the year 2022, it was only described in a general way whether or not the targets were achieved.

For the reporting periods 01/01/2022-31/12/2022 and 01/01/2023-31/12/2023, the results achieved described in this chapter only reflect the situation at the end of the sub-fund's financial year. Therefore, they are not a reliable indicator of future results.

For the reporting period 01/01/2024-31/12/2024, the results achieved are expressed as a weighted average per quarter.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sub-fund promoted a combination of environmental and social characteristics and, even though it didn't have sustainable investments as an objective, the sub-fund invested 34.37% of the assets in 'sustainable investments' as defined by art. 2.17 SFDR.

(1) UN Sustainable Development Goals

To support sustainable development, the sub-fund invested a part of its portfolio in issuers that contribute to the UN Sustainable Development Goals.

Companies are considered to contribute to sustainable development when at least 20% of the revenues are linked to the UN Sustainable Development Goals. The activities of the companies are assessed on multiple sustainable themes that can be linked to the UN Sustainable Development Goals.

Governments were assessed on five pillars which contain indicators that can be linked to the 17 UN Sustainable Development Goals. If a government scored sufficiently well on one of these pillars and not significantly poor on the other pillars, the bonds of this government and its sub-governments and agencies were considered to be instruments that contribute to UN Sustainable Development Goals.

- The country is aligned with the ESG criteria: it has a score of at least 80 for one of the five pillars and does not score lower than 50 for any of the other pillars;
- The country is not excluded: it does not rank among the 50% most controversial regimes AND it does meet the criteria on respecting the sustainable principles AND it does not rank among the 10% worst scoring countries of the universe.

Supranational government bonds were considered to contribute to the UN Sustainable Development Goals if either of the following criteria is met:

- at least half of its members contribute to the UN Sustainable Development Goals (weighted by voting power/full paid-in capital/percentage of population (in order of availability)).
- the mission statement of the supranational institution has a sustainable objective and less than half of its members fall in the worst-scoring half of the screening for controversial regimes.

In addition, the Responsible Investing Advisory Board can award the 'sustainable development' label to instruments of companies and governments.

However, the awarding of the 'sustainable development' label by the Responsible Investing Advisory Board to instruments of governments is very exceptional. The possibility of deviating from the outcomes of the internal KBC country model is mainly intended for countries that just meet or just fall short of the requirements, with the aim of avoiding that countries that would 'leapfrog' the bar over the years (i.e. borderline sustainable or not sustainable or permitted) would have to be in and then out of the investment universe each time, and this in order to avoid transaction costs.

(2) Bonds financing green and/or social projects

To encourage the transition to a more sustainable world, the sub-fund invested a minimum part of its portfolio in bonds financing green and/or social projects (that are aligned with the International Capital Market Association (ICMA) Green Bond Principles and Social Bond Principles on the Use of Proceeds). Instruments that meet these requirements were labelled 'sustainable investments'. The percentage of the portfolio invested in bonds financing green and/or social projects can be found in the table under the "How did the sustainability indicators perform" section of this annex.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The sustainable investments that the sub-fund partially made did not cause significant harm to the sustainable investment objective through the negative screening. The sub-fund took into account the indicators of the principle adverse impacts of investment decisions on sustainability factors as stated in Table 1 of Annex I of Delegated Regulation (EU) 2022/1288, as well as the relevant indicators for the principle adverse impacts of investments decisions on sustainability factors in Tables 2 and 3 of Annex I of Delegated Regulation (EU) 2022/1288 through the negative screening.

The negative screening amounts to the sub-fund's a priori exclusion of issuers from the Responsible Investment universe which fall foul the exclusion policies.

The application of these policies means that issuers involved in activities such as fossil fuels, the tobacco industry, arms, gambling and adult entertainment are excluded from the sub-fund's investment universe. Investments in financial instruments linked to livestock and food prices are also excluded. All companies that derive at least 5% of their revenues from the production or 10% of their revenues from the sale of fur or special leather, are excluded. The negative screening also ensures that issuers based in countries that encourage unfair tax practices, that seriously violate

fundamental principles of environmental protection, social responsibility and good governance (through the normative screening, through a poor ESG risk rating, due to involvement in unsustainable countries by not meeting the sustainability criteria and controversial regimes, due to severe controversies related to water emissions, pollution or waste and gender diversity and due to high or severe controversies in the context of activities that have a negative impact on biodiversity and for which insufficient measures are taken to reduce their impact) are excluded from the sub-fund's investment universe.

These principles of negative screening are not exhaustive and may be modified on the advice of the Responsible Investing Advisory Board.

----- *How were the indicators for adverse impacts on sustainability factors taken into account?*

Through the exclusion policy for Responsible Investing funds and, in particular, the normative screening and ESG risk assessment, all indicators of the principle adverse impacts of investment decisions on sustainability factors as stated in Table 1 of Annex I of Delegated Regulation (EU) 2022/1288, as well as the relevant indicators for the principle adverse impacts of investments decisions on sustainability factors in Tables 2 and 3 of Annex I of Delegated Regulation (EU) 2022/1288 were taken into account for instruments issued by companies. The sub-fund did not invest in companies that seriously violate the principles of the United Nations Global Compact and the Organization for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises, and any companies involved in serious controversies related to environmental, social or good governance issues are also excluded. Also excluded were companies with an ESG risk score of more than 40 according to data provider Sustainalytics.

For investments in instruments issued by countries, the indicators of the principle adverse impacts of investment decisions on sustainability factors as stated in Table 1 of Annex I of Delegated Regulation (EU) 2022/1288, as well as the relevant indicators for the principle adverse impacts of investments decisions on sustainability factors in Tables 2 and 3 of Annex I of Delegated Regulation (EU) 2022/1288 were taken into account by excluding countries in the worst 10% according to the ESG score model, and by excluding countries that do not comply with sustainability criteria and are exposed to controversial regimes.

In addition to the normative screening and ESG risk assessment, through the positive selection methodology on greenhouse gas intensity and the exclusions in the exclusion policy for Responsible Investment funds, the following indicators of principle adverse impacts on sustainability factors were also considered for all investments of this sub-fund:

- **Indicator 3:** greenhouse gas ('GHG') intensity of investee companies was taken into account through the greenhouse gas intensity reduction target for companies.
- **Indicator 4:** exposure to companies active in the fossil fuel sector was taken into account as the sub-fund did not invest in companies that are active in the fossil fuel sector. In order to support companies in their transition to a more sustainable future, an exception is made for green bonds issued by companies that have been excluded solely on the basis of the fossil fuel policy.
- **Indicator 7:** Activities negatively affecting biodiversity-sensitive areas were taken into account as the sub-fund does not invest in companies that have high or severe controversies related to Land Use and Biodiversity as well as companies with activities that have a negative impact on biodiversity and that don't take sufficient measures to reduce their impact.
- **Indicator 10:** Violations of the United Nations Global Compact (UNGC) Principles and the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises was taken into account as the sub-fund did not invest in companies that seriously violate UNGC principles or OECD guidelines.
- **Indicator 14:** exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons) was taken into account as the sub-fund did not invest in companies that are active in controversial weapons.
- **Indicator 15:** GHG intensity of investee countries was taken into account through the greenhouse gas intensity reduction target for sovereign related investments.
- **Indicator 16:** Investee countries subject to social violations was taken into account as the sub-fund did not invest in (i) Countries that do not comply with sustainability criteria and (ii) countries exposed to controversial regimes. More information can be found in the exclusion policy for Responsible Investing funds.

In addition, the principal adverse impacts on sustainability factors were implicitly taken into account through the Proxy Voting and Engagement Policy of KBC Asset Management NV.

A complete overview of the indicators of principal adverse impacts on sustainability factors that the sub-fund can take into account can be found in Annex I of Delegated Regulation (EU) 2022/1288.

----- Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes.

Companies seriously violating the basic good practices in terms of environmental, social and governance issues, as assessed by the UN Global Compact Principles, were excluded from the sub-fund. The United Nations Global Compact has formulated ten guiding sustainability principles regarding human rights, labour, environment and anti-corruption which are part of the internal screening. In addition, KBC AM assessed the companies' involvement in violations of the International Labour Organization's (ILO) Conventions, the OECD Guidelines for multinational enterprises and the UN Guiding Principles on Business and Human Rights.

The sub-fund commits to respect the letter and the spirit of the United Nations Universal Declaration of Human Rights; the principles concerning fundamental rights in the eight International Labour Organisation core conventions as set out in the Declaration on Fundamental Principles and Rights at Work; the UN Declaration on the Rights of Indigenous Peoples; the UK Modern Slavery Act and other international and regional human rights treaties containing internationally recognised standards by which the business sector must abide.

KBC Asset Management NV assesses all companies on the 'Human Rights List' of KBC Group as well as all companies meeting the criteria below:

- a high or severe controversy score related to Human Rights, for subindustries for which Human Rights are considered a high or severe risk.
- a severe controversy score related to Human Rights, for all other subindustries.

Based on this assessment, appropriate measures were taken, ranging from engagement with the companies concerned to selling positions. More information on the Policy on Human Rights can be found on the KBC Asset Management NV website.

More information on negative screening can be found in the section on "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?" of this annex.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The principal adverse impacts on sustainability factors were explicitly taken into account for all investments of this sub-fund by the exclusion policies applied. In addition, the principle adverse impacts on sustainability factors were implicitly taken into account through KBC Asset Management NV's proxy voting and engagement policies.

More information on the principal adverse impacts on sustainability factors can be found under the heading 'How were the indicators for adverse impacts on sustainability factors taken into account' of this Annex.

What were the top investments of this financial product?

This list includes the investments constituting the **greatest proportion** of the financial product during the reference period which is:

01/01/2024-31/12/2024

Largest investments	Sector	% assets	Country
KBC Equity Fund World Responsible Investing -ISB	Financial Services	17.89%	Belgium
KBC Eq F N.Am.Cont. Responsible Investing - ISB EUR	Financial Services	16.22%	Belgium
KBC Eq Fd USA & Canada Responsible Investing -ISB	Financial Services	16.22%	Belgium

What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments was 34.37%.

Asset allocation
describes the
share of
investments
in
specific assets.

What was the asset allocation?

The sub-fund could invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described in the prospectus under title "Information concerning the sub-fund Flexible Portfolio January Responsible Investing".

Within these categories of eligible assets, the sub-fund invested 99.52% in assets that promote environmental or social characteristics and 0.48% in other investments.

Corporate and sovereign investments in issuers passing the negative screening and contributing to at least one specific positive selection of the investment policy for Responsible Investing funds were considered as 'assets promoting environmental and social characteristics'.

(Term) deposits whose counterparties pass the negative screening and have at least a +2 Net Alignment Score on one of the first 15 UN Sustainable Development Goals at MSCI were also considered as 'assets promoting environmental and social characteristics'.

More information on the MSCI Net Alignment Score can be found in the investment policy for Responsible Investing funds which is available on www.kbc.be/investment-legal-documents > Investment policy for Responsible Investing funds.

The category "other investments" contained technical items, such as cash and derivatives, and assets in which the sub-fund invests temporarily following a planned update of the eligible universe, which determines the assets that promote environmental and/or social characteristics, for which there are no environmental or social safeguards. The sub-fund held or invested in these types of assets to achieve investment objectives, to diversify the portfolio, for liquidity management purposes and to hedge risks.

Derivatives were used to hedge risks as described in permitted derivatives transactions as set out in section 2. 'Investment information' under title 'Information concerning the sub-fund Flexible Portfolio January Responsible Investing' of the prospectus.

Investments in derivatives are not used to attain the environmental or social characteristics promoted by the financial product and will not affect them.

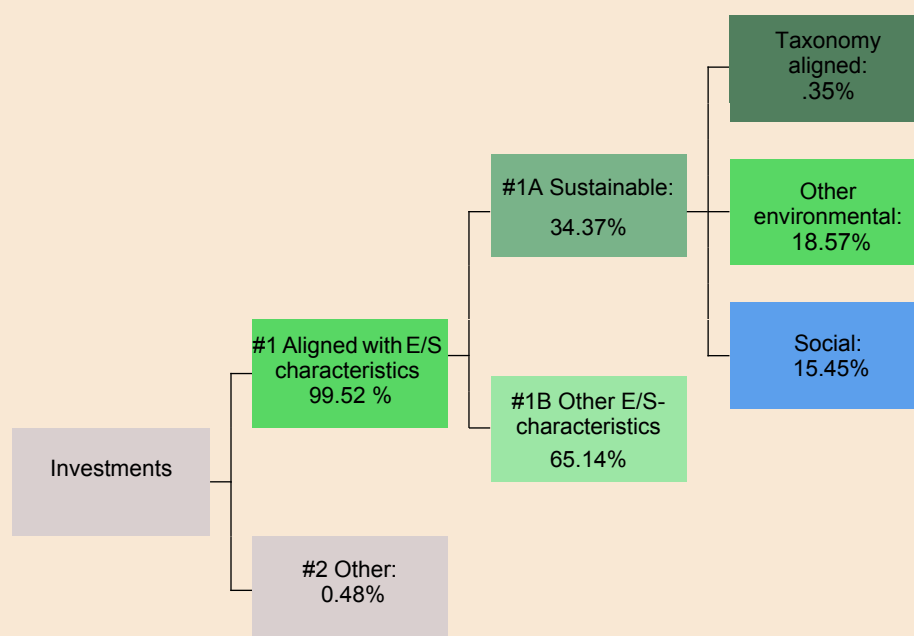

18.57% of sustainable investments are environmentally sustainable investments (not taxonomy-aligned), 0.35% are environmentally sustainable investments (taxonomy-aligned) and 15.45% are socially sustainable investments.

The sustainable investments are equal to the sum of investments that are considered "sustainable" based on the published methodology on contributing to the achievement of the UN Sustainable Development Goals, plus investments in bonds that can be considered as bonds financing green and/or social projects, plus instruments that are considered "sustainable" by the Responsible Investing Advisory Board.

In addition, companies that have at least 20% of their revenues aligned with the EU Taxonomy Framework according to data from Trucost, are considered to contribute to sustainable development. Instruments of companies that meet these requirements are referred to as "sustainable investments," according to art. 2(17) SFDR.

More information can be found at the section 'What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?' of this Annex.

To determine compliance with the EU taxonomy, the criteria for **fossil gas** include emission limits and conversion to renewable energy or low-carbon fuels by the end of 2023. For **nuclear power**, the criteria include comprehensive rules on safety and waste management.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product;

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S-characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

On 31/12/2024 the investments were made in the following sectors:

Sector	%Assets
Tech Hardware & Semiconductors	15.66%
Health Care	14.15%
Software & Tech Services	11.04%
Banking	9.71%
Media	8.53%
Unclassifiable	6.96%
Financial Services	6.30%
Retail & Wholesale - Discretionary	5.84%
Consumer Staple Products	5.30%
Insurance	5.10%

Renewable Energy	0.06%
Regional & Local	0.03%

Sectors and sub-sectors of the economy that derive income from exploration, mining, extraction, production, processing, storage, refining or distribution - including transportation, storage and trading - in fossil fuels are excluded by the exclusion policy. Consequently, the sub-fund has not invested in these sectors and sub-sectors.

However, an exception is provided in the exclusion policy for investments in green bonds of these companies, which promote the energy transition. Consequently, for the portion invested in green bonds, there may be exposure to these sectors.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The sub-fund does not specifically seek to invest in environmentally sustainable economic activities within the meaning of the EU Taxonomy Framework ("investments aligned with the EU Taxonomy"). Although the sub-fund does not aim to invest in investments aligned with the EU Taxonomy, it cannot be ruled out that the sub-fund does contain investments aligned with the EU Taxonomy. The percentage of investments aligned with the EU taxonomy is 0.35% for this reporting period. This percentage is a weighted quarterly average and includes investments in companies that have at least 20% of their revenues aligned with the EU Taxonomy Framework according to data from Trucost. Asset managers depend on available sustainability data relating to their investee companies. Currently, there is a lack of sustainability data available. This has created the risk that investment funds currently report a very low percentage of investments that comply with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy⁽¹⁾?

Yes:

In fossil gas

In nuclear energy

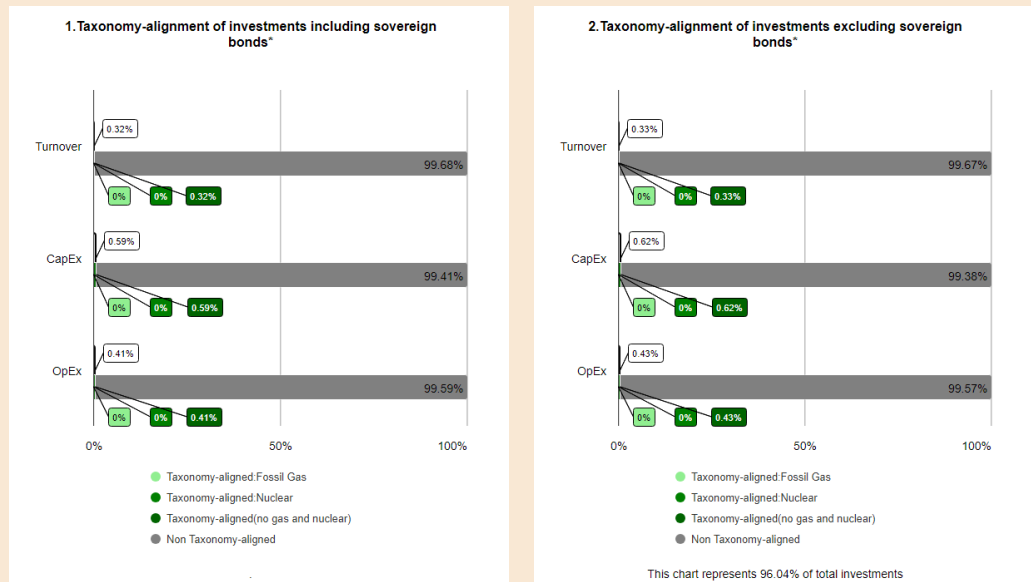

No

(1) Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The sub-fund has invested in activities in the fossil gas and/or nuclear energy sectors that comply with EU taxonomy based on data provided by Trucost. This data does not take into account the definition of 'taxonomy aligned' used by KBC AM NV. According to KBC AM NV's definition, investments in companies are taxonomy-aligned when at least 20% of revenues are aligned with the EU taxonomy framework.

Taxonomy-aligned activities are expressed as a share of:
-turnover reflecting the share of revenue from green activities of investee companies.
-capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
-operational expenditure (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

***For the purpose of these graphs, "sovereign bonds" consist of all sovereign exposures.**

The figure data in the above charts are from data provider Trucost and do not take into account the definition of 'taxonomy-aligned' used by KBC AM NV. According to KBC AM NV's definition, investments in companies are taxonomy-aligned when at least 20% of revenues are aligned with the EU taxonomy framework. Consequently, it is therefore possible that the percentage shown in green (EU taxonomy-aligned investments) in the above charts differs from the 'Taxonomy-aligned' percentage in the table under the 'What was the asset allocation?' section of this annex.

● **What was the share of investments made in transitional and enabling activities?**

The proportion of investments in transition activities was 0.02%.

The proportion of investments in enabling activities was 0.19%.

The figures described in this section are from data provider Trucost.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

During the previous reference period (which ran from 1 January 2023 to 31 December 2023) the percentage of investments aligned with the EU taxonomy was set at 0%. KBC Asset Management NV determined that, at that time, insufficient reliable, timely and verifiable data from issuers or investee companies was available for consistent reporting, based on its own research and services from data providers.

The percentage of investments aligned with the EU taxonomy of the current reference period is 0.35%. This percentage is a weighted quarterly average and includes investments in companies with at least 20% of sales aligned with the EU taxonomy framework (based on data from Trucost). According to KBC AM's definition, investments only qualify as "aligned with the EU taxonomy" when at least 20% of the turnover of investee companies is aligned with the EU taxonomy.

Asset managers depend on available sustainability data relating to their investee companies. Currently, there is a lack of sustainability data available. This has created the risk that investment funds currently report a very low percentage of investments that comply with the EU Taxonomy.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The sub-fund invested 34.37% in sustainable investments as defined in article 2(17) SFDR. The proportion of sustainable investments with an environmental objective that were not aligned with the EU taxonomy was 18.92%.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 15.45%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

During the reporting period, the “other” category could include the following investments:

Assets	Purpose of investments and presence of minimum environmental or social safeguards
Investments in cash	The sub-fund held or invested in these types of assets to achieve investment objectives, to diversify the portfolio, for liquidity management purposes and to hedge risks.
Investments in assets that no longer met screening criteria	The sub-fund held or invested in these types of assets to achieve investment objectives, to diversify the portfolio, for liquidity management purposes and to hedge risks.
Investments in derivatives	Derivatives were used to hedge risks as described in permitted derivatives transactions as set out in section 2. ‘Investment information’ under title ‘Information concerning the sub-fund Flexible Portfolio January Responsible Investing’ of the prospectus. Investments in derivatives were not used to attain the environmental or social characteristics promoted by the sub-fund and did not affect them.

For investments included under “#2 Other”, there were no environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The sub-fund

- promoted the integration of sustainability into the policy decisions of issuers (companies, governments, supranational debtors and/or agencies linked to governments), by preferring issuers with a better ESG (risk)score;
- promoted climate change mitigation, by preferring issuers with lower greenhouse gas Intensity, with the objective of meeting a predetermined greenhouse gas intensity target;
- promoted sustainable development through ‘sustainable investments’ in accordance with art. 2(17) SFDR.

Sustainable investments consist of bonds financing green and/or social projects and investments in issuers contributing to the achievement of the UN Sustainable Development Goals.

However, no binding minimum percentage has been set for this latter category, although it contributes to the achievement of the minimum percentage of ‘sustainable investments’ for this sub-fund.

The sub-fund excluded issuers involved in activities such as fossil fuels, the tobacco industry, weapons, gambling and adult entertainment from the sub-fund's investment universe. Investments in financial instruments linked to livestock and food prices were also excluded. Companies that derive at least 5% of their income from production or 10% of their income from the sale of fur or special leather were excluded. The negative screening also ensured that issuers based in countries that encourage unfair tax practices, that seriously violate fundamental principles of environmental protection, social responsibility and good governance (through the normative screening, through a poor ESG risk rating, due to involvement in countries that do not comply with sustainability principles by not meeting the sustainability criteria or are exposed to controversial regimes, due to severe controversies related to water emissions, pollution or waste and gender diversity and due to high or severe controversies in the context of activities that have a negative impact on biodiversity and for which insufficient measures are taken to reduce their impact) are excluded from the sub-fund's investment universe.

KBC Asset Management NV executed the voting rights of shares managed in the sub-fund according to the Proxy Voting and Engagement Policy. As such, KBC Asset Management monitored the companies in which the sub-fund is invested in, intervened with investee companies (avoiding insider information), took part in appropriate collective engagement initiatives and exercised voting rights in a considered way. These responsibilities were executed in the exclusive concern of defending the interests of the investors of the funds.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by this sub-fund.

For investments issued by companies the described reference portfolio was used as a basis for comparison, to compare certain ESG characteristics promoted by the sub-fund.

For investments in instruments issued by governments, supranational debtors and/or government-linked agencies, the described reference portfolio of global government bonds was used as a basis for comparison, to compare certain ESG characteristics promoted by the sub-fund.

More information can be found in the table under the "How did the sustainability indicators perform" section of this annex.

● *How did the reference benchmark differ from a broad market index?*

Not applicable.

● *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

Not applicable.

● *How did this financial product perform compared with the reference benchmark?*

Not applicable.

● *How did this financial product perform compared with the broad market index?*

Not applicable.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main object of the sub-fund is to generate the highest possible return for its unit holders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. **Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.**

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

Horizon Flexible Portfolio July aims to generate a potential return by investing, directly or indirectly (via funds), primarily in a worldwide selection of shares and bonds.

At the start of each period (no later than the first Belgian bank business day of July every year), the sub-fund aims to invest equally in shares and bonds.

During this annual period, the weighting of the assets will be reviewed at least every month based on a mathematical model. The allocation of shares and bonds will depend primarily on the relative performance of shares relative to bonds since the beginning of the annual period. If the shares generate a lower return than the bonds, for instance, the weighting of the shares relative to the bonds will be reduced. Conversely, if the shares generate a higher return than the bonds, the weighting of the shares relative to the bonds will be increased. In the course of the period, the portfolio may be composed temporarily entirely of shares or of bonds.

At the end of the period, the sub-fund aims to be invested entirely in the asset class that has generated the best return during the period relative to the other asset class.

Horizon Flexible Portfolio July may make limited use of derivatives. This means it can use derivatives to help achieve the investment objectives (for instance, to increase or decrease the exposure to one or more market segments in line with the investment strategy).

The equity component is allocated in accordance with the investment strategy for shares drawn up by KBC Asset Management NV (see. www.kbc.be/investment-strategy). All regions, sectors and themes may be taken into consideration.

The bond component is allocated in accordance with the investment strategy for bonds drawn up by KBC Asset Management NV (see. www.kbc.be/investment-strategy). All regions, sectors and themes may be taken into consideration.

The fund is actively managed without referring to any benchmark.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

Transparency of adverse sustainability impacts:

The sub-fund considers the principal adverse impacts of its investment decisions on sustainability factors ('PAI') as described by the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector ('SFDR').

The principal adverse impacts on sustainability factors were explicitly taken into account through the General exclusion policy. More information on the principal adverse impact indicators that are taken into account can be found at www.kbc.be/investment-legal-documents > General exclusion policy for conventional and Responsible Investing funds and www.kbc.be/investment-legal-documents > Exclusion policies for Responsible Investing funds.

In addition, the principal adverse impacts on sustainability factors were implicitly taken into account through the Proxy Voting and Engagement Policy of KBC Asset Management NV (more information can be found at www.kbc.be/investment-legal-documents > Retrospective Proxy Voting - overview > Proxy Voting and Engagement Policy).

Characteristics of the bonds and debt instruments

The sub-fund invests in bonds and debt instruments issued by both companies and public authorities.

The sub-fund invests directly and/or indirectly at least 50% of its assets in bonds and debt instruments

- in securities rated investment grade (at least BBB-/Baa3 for long-term debt, A3/F3/P3 for short-term debt) by at least one of the following rating agencies: Moody's Investors Service, Standard & Poor's or Fitch Ratings, and/or
- in government bonds issued in local currency or non-subordinated corporate bonds* which do not have a credit rating from the rating agencies mentioned above but the issuer of which has an investment grade rating by at least one of the rating agencies mentioned above, and/or
- in money market instruments whose issuer has an investment grade rating (minimum A3/F3/P3 for short-term debt) from at least one of the above rating agencies.

This means that the sub-fund may invest up to 50% of its assets invested in bonds and debt instruments that do not have a credit rating from the above-mentioned rating agencies and/or which do not comply with the above-mentioned credit requirements.

All maturities are taken into consideration in the selection of bonds and debt instruments.

*In the event of the bankruptcy of the relevant issuer, subordinated bonds are subordinated to the company's other debts: the company's other debts are paid first, then and only if there is still capital left, the holders of the subordinated bonds are fully or partially repaid; the holder of the subordinated bond does, however, have priority over the shareholders of the issuer in question.

Investments in assets other than securities or money market instruments

The sub-fund will invest primarily in units of undertakings for collective investment.

Securities Financing Transactions (SFTs)

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.1. Securities Financing Transactions (SFTs)'.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'.

2.1.4. Financial portfolio management

The intellectual management, with the exception of the creation of the sub-fund and its maintenance in terms of the technical, product-specific and legal aspects has been delegated by the management company to KBC Fund Management Limited, 4th Floor, Scotch House, 6/7 Burgh Quay, Dublin 2, D02 VK44, Ireland.

2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2.1.6. Index and benchmark

Not applicable.

2.1.7. Policy pursued during the financial year

We refer to the General information on the SICAV of this report under '1.2.2. General overview of the markets' for a review of the market.

2.1.8. Future policy

This fund's policy is a result of actual market fluctuations observed day-to-day and which are incorporated into the mathematical model. As soon as the bond and equity market climate changes, the policy of this fund shifts accordingly.

2.1.9. Summary risk indicator (SRI)

3 on a scale of 1 (lowest risk) to 7 (highest risk)

- a moderate level of inflation risk: the bond component does not provide any protection against an increase in inflation.
- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of credit risk: the bond component invests primarily - but not exclusively- in bonds with an investment grade rating. Consequently, the risk that an issuer can no longer meet its obligations is higher than in an investment that consists only of bonds with an investment grade rating. If investors are in doubt about the creditworthiness of the issuers of the bonds, the value of those bonds can fall.
- a moderate level of market risk: the level of the risk reflects the volatility of the equity component.
- a moderate level of performance risk: the level of the risk reflects the volatility of the equity component.

There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

2.1.10. Leveraged finance

The total amount of leveraged finance used by the sub-fund is 11 461 705.18 EUR.

This amount was calculated by multiplying the leverage ratio calculated using the UCITS-commitment method by the sub-fund's total assets under management.

The internal classification system, on the basis of which this sectoral spread is calculated, has been changed as of 31/12/2023. In order to provide a meaningful comparison of the sectoral spread across reporting periods, the sectoral spread calculations will be de-duplicated in the annual reports. This means that a summary table will be shown for each classification system.

Currency breakdown (as a % of net assets)

The currency distribution of the sub-fund's investments is calculated based on the currency distribution of the underlying investments of the UCIs in which the sub-fund invests (look through).

2.4.2. Changes in the composition of the assets of Horizon Flexible Portfolio July (in Euro)

	1 st half of year	2 nd half of year	Year
Purchases	200,669,826.45	137,220,935.62	337,890,762.07
Sales	232,261,857.20	152,801,205.05	385,063,062.25
Total 1	432,931,683.65	290,022,140.66	722,953,824.32
Subscriptions	1,013,709.01	1,003,187.51	2,016,896.52
Redemptions	28,638,621.61	12,976,792.63	41,615,414.24
Total 2	29,652,330.62	13,979,980.14	43,632,310.76
Monthly average of total assets	226,556,595.11	224,432,235.94	225,472,559.97
Turnover rate	178.00%	123.00%	301.29%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period.

A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions.

A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio.

Active asset management may result in high turnover rates (monthly percentage >50%), reason: The increase in the Equity Markets led to an increase in the Equity Position towards 99%. This was reset to 50% in July 2024, but again the markets lead to an increase moving back towards 100% equity holding.

The detailed list of transactions can be consulted free of charge at the company designated as financial service:

KBC Bank NV, Havenlaan 2, B-1080 Brussels

2024 - 12	223,013,970.60	1,171.83	1,012.88

2.4.5. Performance figures

Cap Div	ISIN Code	Currency	1 year		3 years		5 years		10 years		Since Launch*	
			Share classes	Bench mark	Share classes	Bench mark	Share classes	Bench mark	Share classes	Bench mark	Starting date	Share classes
CAP	BE6278667512	EUR	15.97%		-0.13%		2.74%				30/06/2015	1.68%
DIS	BE6278669534	EUR	15.97%		-0.13%		2.74%				30/06/2015	1.69%

Risk warning: Past performance is not a guide to future performance.

* Return on annual basis.

- The bar chart shows the performance for full financial years.
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage. In the case of units that pay dividends, the dividend is incorporated geometrically in the return.
- Calculation method for date D, where NAV stands for net asset value:
Capitalisation units (CAP)
Return on date D over a period of X years :

$$[\text{NIW}(\text{D}) / \text{NIW}(\text{Y})] ^ { [1 / \text{X}] } - 1$$
where Y = D-X
Return on date D since the start date S of the unit:

$$[\text{NIW}(\text{D}) / \text{NIW}(\text{S})] ^ { [1 / \text{F}] } - 1$$
where F = 1 if the unit has existed for less than one year on date D
where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D
Distribution units (DIV)
Return on date D over a period of X years :

$$[\text{C} * \text{NIW}(\text{D}) / \text{NIW}(\text{Y})] ^ { [1 / \text{X}] } - 1$$
where Y = D-X
Return on date D since the start date S of the unit:

$$[\text{C} * \text{NIW}(\text{D}) / \text{NIW}(\text{S})] ^ { [1 / \text{F}] } - 1$$
where F = 1 if the unit has existed for less than one year on date D
where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D
where C is a factor that is determined for all N dividends between the calculation date D and the reference date.
For dividend i on date Di with value Wi:

$$\text{Ci} = [\text{Wi} / \text{NIW}(\text{Di})] + 1$$
i = 1 ... N
from which $\text{C} = \text{C0} * \dots * \text{CN}$.
- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation and distribution shares

Dividend on ex-dividend date 28/03/2025: 15,8537 net (22,6482 gross).

2.4.6. Costs

Ongoing Charges:

Capitalisation :

Management fees and other administrative or operating costs: 1,736%
Transaction costs: 0,607%

Distribution :

Management fees and other administrative or operating costs: 1,736%
Transaction costs: 0,605%

Percentage calculated at reporting date: 31 December 2024 .

A more detailed explanation with respect to the method of calculating ongoing charges and the relevant exclusions can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.5. Ongoing charges'

Existence of Commission Sharing Agreements

Not applicable

Existence of fee sharing agreements and rebates

The management company has shared 52,99% of its fee with the distributor, and institutional and/or professional parties.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.6. Fee-sharing agreements and rebates'.

2.4.7. Notes to the financial statements and other data

Fee for managing the investment portfolio	Max 1.50%	<p>per yearcalculated on the basis of the average total net assets of the sub-fund.</p> <p>For the portion of net assets corresponding to an investment in undertakings for collective investment(*) managed by a financial institution belonging to the KBC group, the fee for managing the investment portfolio equals the difference between the fee for managing the investment portfolio of the aforementioned undertakings for collective investment and the percentage (to the left) that is paid for managing the investment portfolio.</p> <p>KBC Fund Management Limited receives a fee from the management company of max. 1,50% per year calculated on the basis of the average total net assets of the sub-fund, without the total fees and charges received by the management company being exceeded.</p> <p>(*) The fee for the management of the investment portfolio of the undertakings for collective investment in which the sub-fund invests will amount to a year.</p>
Administration fee	0.10%	per year calculated on the basis of the average total net assets of the sub-fund.
Fee for financial services	Max 950 EUR	per year. However, the fee will never exceed a maximum of 0.005% calculated on the basis of the average total net assets of the sub-fund.
Custodian's fee	Max 0.04%	per year and calculated monthly on the basis of the value of the securities held in custody by the custodian on the last banking day of the preceding month, except on those assets invested in underlying undertakings for collective Investment managed by a financial institution of the KBC group.
Fee paid to the bevek's statutory auditor	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Fee paid to the directors	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Annual tax	See prospectus General Part : 'Information concerning the Bevek - H. Tax treatment'	
Other charges (estimation) such as the regulator's fees, the cost of publication and any marketing costs	Max 0.10%	of the net assets of the sub-fund per year.

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

Financial derivatives on financial indices

The following financial indices were used as the underlying for financial derivatives::

The EURO STOXX 50® (Bloomberg code: SX5E Index) is a weighted equity index computed by Stoxx Ltd. The dividend is not reinvested. The main purpose of this index is to provide a continuous indication of market trends on the European stock markets. The base value of the index is 1000, calculated on the basis of the underlying prices recorded on 31 December 1991.

The Euro Stoxx 50® consists solely of shares from countries participating in the Economic and Monetary Union, with the exception of Luxembourg. On 10 April 1998, the following countries were included in the index: Belgium, Cyprus, Germany, Estonia, Finland, France, Greece, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, the Netherlands, Austria, Portugal, Slovakia, Slovenia and Spain.

The index consists of the 50 largest European shares in terms of shares that are freely negotiable, and the shares are accordingly weighted on the basis of this criterion.

The Euro Stoxx 50® is published daily in L'Echo, De Tijd, The Financial Times and The Wall Street Journal Europe.

Stoxx Limited has all proprietary rights with respect to the index. In no way Stoxx Limited endorses, sponsors or is otherwise involved in the issue and offering the shares of Horizon Flexible Portfolio July. Stoxx Limited disclaims any liability for the issue and offering of the shares of this undertaking for collective investment.

The Nikkei 225 is an equity index computed by Nikkei, Inc. The dividend is not reinvested. It comprises 225 shares. The Nikkei 225 serves primarily as a continuous indicator of market trends on the Japanese stock market. The value of the Nikkei 225 is based on the market value of the shares of 225 companies. These are the 225 leading and most liquid shares on the first section of the Tokyo Stock Exchange. The index was launched on 16 May 1949, with a base value of 176.21.

The Nikkei 225 is published daily in the leading financial newspapers, i.e. The Financial Times and The Wall Street Journal Europe. In Belgium, the index is published in De Tijd and L'Echo.

Nikkei, Inc has all proprietary rights with respect to the index. In no way Nikkei, Inc endorses, sponsors or is otherwise involved in the issue and offering the shares of this undertaking for collective investment. Nikkei, Inc. disclaims any liability for the issue and offering of the shares of this undertaking for collective investment.

The value and, if available for distribution, the composition of the aforementioned financial indices may be obtained from the branches providing the financial service.

2. Information on Horizon Global Flexible Allocation

2.1. Management report

2.1.1. Launch date and subscription price

Capitalisation

Launch date:	15 January 2016
Initial subscription price:	1 000 EUR
Currency:	EUR

2.1.2. Stock exchange listing

Not applicable.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main object of the sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. The sub-fund also aims to set a floor price for the net asset value each year.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.
The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. **Consequently, there may be an impact on concentration risk.** Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

The sub-fund invests directly or indirectly in more risky assets (such as shares, share UCIs, medium and longer-term bonds, medium and longer-term bond UCIs, certain money market instruments, and alternative investments (like real estate and financial instruments that are linked to price movements on the commodity markets)) and/or less risky assets (such as certain money market instruments, shorter-term bonds, shorter-term bond UCIs and cash). Compared with bond UCIs classified as riskier assets, bond UCIs in the less risky assets category invest more in instruments with a shorter term to maturity, which means that they are less sensitive to movements in interest rates. In principle, therefore, they are less volatile.

The sub-fund may invest up to 65% in shares, up to 85% in medium and longer-term bonds and up to 100% in shorter-term bonds.

The sub-fund has two objectives:

1. to achieve the highest possible return

The target allocation for the asset classes is 40% shares and/or share-related investments ('the stock component') and 60% bonds and/or bond-related investments ('the bond component'). It is permitted to deviate from the target allocation based on the investment strategy of KBC Asset Management NV (see www.kbcam.be/en/our-market-vision) and/or to protect the floor price, as described in section 2. It is therefore possible for the sub-fund to invest in asset classes that have not been included in the target allocation.

2. to protect a floor price.

The sub-fund also aims to set a floor price for the net asset value each year. The floor price is valid for one year and is always equal to 90% of the net asset value on the 15^e calendar day of the previous January (or the nearest Belgian banking day preceding if this is not a banking day in Belgium).

Achieving the objective to protect the floor price becomes increasingly important the closer the net asset value gets to the floor price. In such a situation, the asset allocation will be increasingly focused on protecting the floor price and will deviate from the target allocation specified in point 1 above.

The floor price changes each year in line with the net asset value. Any fall in the net asset value at the time the new floor price is determined will mean that the new floor price is lower than the current floor price. Any increase in the net asset value at the time the new floor price is determined will mean that the new floor price is higher than the current floor price.

In addition, the floor price can be increased during the yearly periods, more specifically if the net asset value on the previous banking day (or the day before if this is not a banking day in Belgium) of the months of March, June or September is higher than the net asset value on which the current floor price was based. The floor price will then be increased to 90% of the higher net asset value. From that moment on, the new floor price will apply.

The sub-fund does not provide any capital protection or capital guarantee; nor does it offer a guaranteed return. It is therefore possible for the net asset value to be lower than the floor price.

The allocation of the assets is influenced by whether they involve more or less risk. Riskier assets are intended to generate the return, while less risky assets are designed to protect the floor.

During the year, the manager may deviate from the target allocation in the following ways:

1) If the net asset value falls towards the floor price, the manager may intervene and replace investments in riskier assets with investments in less risky ones. If the net asset value hits the floor price, the manager may switch completely to investments in money market instruments, shorter-term bonds, shorter-term bond funds and/or cash. Conversely, if the net asset value moves away from the floor price and goes up to a strong enough extent, the manager may intervene and gradually reallocate the assets by replacing the less risky assets with more risky ones.

2) If markets develop favourably and provided the net asset value is sufficiently high relative to the floor price, and for as long as both these conditions are met, the stock component can temporarily go up sharply relative to the percentage determined when the floor price was set.

3) The bond component will be monitored separately and, if its performance is negative, the exposure within this component may be reduced periodically, for instance by reducing investments in bonds in favour of investments in money market instruments and cash.

The stock component is invested in a worldwide selection of shares that may come from any region, sector or theme.

For details of the bond component, please see the 'Characteristics of the bonds and debt instruments' section below.

The fund is actively managed without referring to any benchmark.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

Transparency of adverse sustainability impacts:

The sub-fund considers the principal adverse impacts of its investment decisions on sustainability factors ('PAI') as described by the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector ('SFDR').

The principal adverse impacts on sustainability factors were explicitly taken into account through the General exclusion policy. More information on the principal adverse impact indicators that are taken into account can be found at www.kbc.be/investment-legal-documents > General exclusion policy for conventional and Responsible Investing funds and www.kbc.be/investment-legal-documents > Exclusion policies for Responsible Investing funds.

In addition, the principal adverse impacts on sustainability factors were implicitly taken into account through the Proxy Voting and Engagement Policy of KBC Asset Management NV (more information can be found at www.kbc.be/investment-legal-documents > Retrospective Proxy Voting - overview > Proxy Voting and Engagement Policy).

Characteristics of the bonds and debt instruments

The sub-fund invests in bonds and debt instruments issued by both companies and public authorities.

The sub-fund invests directly and/or indirectly at least 50% of its assets in bonds and debt instruments

- in securities rated investment grade (at least BBB-/Baa3 for long-term debt, A3/F3/P3 for short-term debt) by at least one of the following rating agencies: Moody's Investors Service, Standard & Poor's or Fitch Ratings, and/or
- in government bonds issued in local currency or non-subordinated corporate bonds* which do not have a credit rating from the rating agencies mentioned above but the issuer of which has an investment grade rating by at least one of the rating agencies mentioned above, and/or
- in money market instruments whose issuer has an investment grade rating (minimum A3/F3/P3 for short-term debt) from at least one of the above rating agencies.

This means that the sub-fund may invest up to 50% of its assets invested in bonds and debt instruments that do not have a credit rating from the above-mentioned rating agencies and/or which do not comply with the above-mentioned credit requirements.

All maturities are taken into consideration in the selection of bonds and debt instruments.

*In the event of the bankruptcy of the relevant issuer, subordinated bonds are subordinated to the company's other debts: the company's other debts are paid first, then and only if there is still capital left, the holders of the subordinated bonds are fully or partially repaid; the holder of the subordinated bond does, however, have priority over the shareholders of the issuer in question.

Investments in assets other than securities or money market instruments

The sub-fund will invest primarily in units of undertakings for collective investment.

Securities Financing Transactions (SFTs)

A more detailed explanation can be found in this report's General information on the Beveik under 'Information for shareholders – 1.2.1.1. Securities Financing Transactions (SFTs)'.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Beveik under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Beveik under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'.

2.1.4. Financial portfolio management

The intellectual management, with the exception of the creation of the sub-fund and its maintenance in terms of the technical, product-specific and legal aspects has been delegated by the management company to KBC Fund Management Limited, 4th Floor, Scotch House, 6/7 Burgh Quay, Dublin 2, D02 VK44, Ireland.

2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2.1.6. Index and benchmark

Not applicable.

2.1.7. Policy pursued during the financial year

The objective of the fund is to achieve the highest possible return, while aiming at maintaining the NAV above the floor level. The allocation in equity, bond and money market investment is determined by a dynamic portfolio insurance algorithm. The fund has three profiles, defensive dynamic and very dynamic, and the gearing is determined by the NAV distance to the floor. The current floor vs the NAV is shown below as at the end of the annual period.

	NAV 31/12/2024	Floor NAV
Horizon Global Flexible Allocation	1267.26	1113.19

Overall, the fund has performed positively over the reporting period. The Fund had its Annual Reset on 15th January whereby it reset to its Dynamic gear from the Very Dynamic gear. Quarter 1 recorded strong positive returns with the market maintaining positive momentum into 2024 after better-than-expected figures on economic growth and corporate earnings prevailed over the expensive valuation of the market and the further postponement of rate cuts by central bankers. Into Quarter 2 and Equity markets recovered from their April dip. The first quarter reporting season is behind us. In the US, profits beat estimates by 8% knowing that earnings growth is 8%. For Europe, we saw a 6% earnings contraction, beating expectations by 9%. Economic data points in manufacturing and services seem to be slowly stabilizing, even in Europe. The U.S. economy appeared to be gradually shifting down gears. Persistent underlying inflation (especially in the services sector) and recent volatile oil prices mean that the disinflation process is proceeding somewhat more slowly than previously thought. Especially in the US, we still saw inflation rates surprise in the interim. As expected, the ECB cut policy rates and the Fed kept rates unchanged in June. Interest rates appear to have peaked. However, a range of inflation data (especially in the US) cast doubt on the timing and magnitude of the expected cut in policy rates. As a result, we still see interest rates making occasional bucks.

Into Quarter 3 and after keeping rates on hold for 14 months, the Fed finally reversed course and delivered a 50bp cut in September. The rate cut indicated that the Fed was confident that inflation risk has abated and the focus was now on supporting the labour market. ECB had already taken a second step earlier in September by cutting its policy rate with another 0.25%. While stocks markets fell at the very end of December it was still a positive month and quarter on global markets, with a stellar year overall for returns. Both the Fed and the ECB are currently walking the path of interest rate cuts. Both lowered their policy rates by 25bp in December. The divergence in economic growth between the US and Europe combined with Trump's expected policies (planned deregulation and fiscal stimulus) means that the market expects fewer interest rate cuts by the Fed for 2025 than before. However, the conflict in the Middle East and Ukraine could continue to cause nervousness. Trump's policy decisions could certainly have a major impact

2.1.8. Future policy

Future investment and the participation level in risky assets will be determined by the dynamic portfolio insurance model while ensuring that the floor is protected.

2.1.9. Summary risk indicator (SRI)

3 on a scale of 1 (lowest risk) to 7 (highest risk)

- a moderate level of inflation risk: the bond component does not provide any protection against an increase in inflation.
- a moderate level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a real chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of credit risk: the bond component invests primarily - but not exclusively- in bonds with an investment grade rating. Consequently, the risk that an issuer can no longer meet its obligations is higher than in an investment that consists only of bonds with an investment grade rating. If investors are in doubt about the creditworthiness of the issuers of the bonds, the value of those bonds can fall.
- a moderate level of market risk: the level of the risk reflects the volatility of the equity component.
- a moderate level of performance risk: the level of the risk reflects the volatility of the equity component.

There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

2.1.10. Leveraged finance

The total amount of leveraged finance used by the sub-fund is 0.00 EUR.

This amount was calculated by multiplying the leverage ratio calculated using the UCITS-commitment method by the sub-fund's total assets under management.

2.1.11. Value-at-Risk

Not applicable

The internal classification system, on the basis of which this sectoral spread is calculated, has been changed as of 31/12/2023. In order to provide a meaningful comparison of the sectoral spread across reporting periods, the sectoral spread calculations will be de-duplicated in the annual reports. This means that a summary table will be shown for each classification system.

Currency breakdown (as a % of net assets)

The currency distribution of the sub-fund's investments is calculated based on the currency distribution of the underlying investments of the UCIs in which the sub-fund invests (look through).

2.4.2. Changes in the composition of the assets of Horizon Global Flexible Allocation (in Euro)

	1 st half of year	2 nd half of year	Year
Purchases	15,884,075.01	15,683,562.60	31,567,637.61
Sales	19,602,352.89	17,509,923.33	37,112,276.22
Total 1	35,486,427.90	33,193,485.93	68,679,913.83
Subscriptions	0.00	0.00	0.00
Redemptions	3,315,188.45	1,709,605.80	5,024,794.25
Total 2	3,315,188.45	1,709,605.80	5,024,794.25
Monthly average of total assets	26,457,829.34	26,155,842.97	26,303,123.21
Turnover rate	121.59%	120.37%	242.00%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period. A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions.

A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio. Active asset management may result in high turnover rates (monthly percentage >50%), reason: The turnover in assets is primarily determined by the dynamic portfolio insurance algorithm employed in the fund, which determines its allocation to risky assets (equity, bonds, etc.) or less risky assets (cash). Additionally, the fund uses an active investment strategy and is positioned to benefit from the investment views of KBC Asset Management NV.

The detailed list of transactions can be consulted free of charge at the company designated as financial service: KBC Bank NV, Havenlaan 2, B-1080 Brussels

2.4.3. Amount of commitments in respect of financial derivatives positions

2.4.5. Performance figures

BE6282715257
Horizon Global Flexible Allocation CAP
Annual performance from 01/01/2017 through 31/12/2024 (in EUR)

Cap Div	ISIN Code	Currency	1 year		3 years		5 years		10 years		Since Launch*	
			Share classes	Bench mark	Share classes	Bench mark	Share classes	Bench mark	Share classes	Bench mark	Starting date	Share classes
CAP	BE6282715257	EUR	10.29%		1.16%		0.29%				15/01/2016	2.68%

Risk warning: Past performance is not a guide to future performance.

* Return on annual basis.

- The bar chart shows the performance for full financial years.
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage.
- Calculation method for date D, where NAV stands for net asset value:

Capitalisation units (CAP)

Return on date D over a period of X years :

$$[\text{NIW}(\text{D}) / \text{NIW}(\text{Y})] ^ {1 / \text{X}} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[\text{NIW}(\text{D}) / \text{NIW}(\text{S})] ^ {1 / \text{F}} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation shares.

2.4.6. Costs

Ongoing Charges:

Management fees and other administrative or operating costs: 1,078%

Transaction costs: 0,441%

Percentage calculated at reporting date: 31 December 2024 .

A more detailed explanation with respect to the method of calculating ongoing charges and the relevant exclusions can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.5. Ongoing charges'

Fee for managing the investment portfolio

The management fee amounts to 1,093.13 EUR. An additional fee of 132,619.37 EUR was charged regarding commissions and charges for allocating the assets.

Existence of Commission Sharing Agreements

Not applicable

Existence of fee sharing agreements and rebates

The management company has shared 19,65% of its fee with the distributor, and institutional and/or professional parties.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.6. Fee-sharing agreements and rebates'.

2.4.7. Notes to the financial statements and other data

Fee for managing the investment portfolio	Max 0.80%	<p>per year (0.50% of which is for the protection of the floor price) calculated on the basis of the average total net assets of the sub-fund.</p> <p>For the portion of net assets corresponding to an investment in undertakings for collective investment(*) managed by a financial institution belonging to the KBC group, the fee for managing the investment portfolio equals the difference between the fee for managing the investment portfolio of the aforementioned undertakings for collective investment and the percentage (to the left) that is paid for managing the investment portfolio.</p> <p>KBC Fund Management Limited receives a fee from the management company of max. 0,80% per year calculated on the basis of the average total net assets of the sub-fund, without the total fees and charges received by the management company being exceeded.</p> <p>(*) The fee for the management of the investment portfolio of the undertakings for collective investment in which the sub-fund invests will amount to a year.</p>
Administration fee	0.10%	per year calculated on the basis of the average total net assets of the sub-fund.
Fee for financial services	Max 950 EUR	per year. However, the fee will never exceed a maximum of 0.005% calculated on the basis of the average total net assets of the sub-fund.
Custodian's fee	Max 0.04%	per year and calculated monthly on the basis of the value of the securities held in custody by the custodian on the last banking day of the preceding month, except on those assets invested in underlying undertakings for collective investment managed by a financial institution of the KBC group.
Fee paid to the bevek's statutory auditor	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Fee paid to the directors	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Annual tax	See prospectus General Part : 'Information concerning the Bevek - H. Tax treatment'	
Other charges (estimation) such as the regulator's fees, the cost of publication and any marketing costs	0.10%	of the net assets of the sub-fund per year.

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

2. Information on Horizon Global Flexible Allocation Wealth January

2.1. Management report

2.1.1. Launch date and subscription price

Capitalisation

Launch date:	31 March 2015
Initial subscription price:	1 000 EUR
Currency:	EUR

2.1.2. Stock exchange listing

Not applicable.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main object of the sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. The sub-fund also aims to set a floor price for the net asset value each year.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.
The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. **Consequently, there may be an impact on concentration risk.** Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

The sub-fund invests directly or indirectly in more risky assets (such as shares, share UCIs, medium and longer-term bonds, medium and longer-term bond UCIs, certain money market instruments, and alternative investments (like real estate and financial instruments that are linked to price movements on the commodity markets)) and/or less risky assets (such as certain money market instruments, shorter-term bonds, shorter-term bond UCIs and cash). Compared with bond UCIs classified as riskier assets, bond UCIs in the less risky assets category invest more in instruments with a shorter term to maturity, which means that they are less sensitive to movements in interest rates. In principle, therefore, they are less volatile.

The sub-fund may invest up to 85% in shares, up to 75% in medium and longer-term bonds and up to 100% in shorter-term bonds.

The sub-fund has two objectives:

1. to achieve the highest possible return by making investments in accordance with the investment strategy of KBC AssetManagement NV.

The target allocation for the asset classes is 55% shares and/or share-related investments ('the stock component') and 45% bonds and/or bond-related investments ('the bond component'). It is permitted to deviate from the target allocation based on the investment strategy of KBC Asset Management NV (see www.kbc.be/investment-strategy) and/or to protect the floor price, as described in section 2. It is therefore possible for the sub-fund to invest in asset classes that have not been included in the target allocation.

2. to protect a floor price.

The sub-fund also aims to set a floor price for the net asset value each year. The floor price is valid for one year and is always equal to 90% of the net asset value on the seventh calendar day of the previous January (or the nearest Belgian banking day preceding this if the seventh day is not a banking day in Belgium). The initial floor price is equal to 90% of the initial net asset value and is valid from 1 April 2015 to 7 January 2016, inclusive.

Achieving the objective to protect the floor price becomes increasingly important the closer the net asset value gets to the floor price. In such a situation, the asset allocation will be increasingly focused on protecting the floor price and will deviate from the target allocation specified in point 1 above.

The floor price changes each year in line with the net asset value. Any fall in the net asset value at the time the new floor price is determined will mean that the new floor price is lower than the current floor price. Any increase in the net asset value at the time the new floor price is determined will mean that the new floor price is higher than the current floor price.

In addition, the floor price can be increased during the yearly periods, more specifically if the net asset value on the seventh calendar day (or the day before if the seventh day is not a banking day in Belgium) of the months of April, July or October is higher than the net asset value on which the current floor price was based. The floor price will then be increased to 90% of the higher net asset value. From that moment on, the new floor price will apply.

The sub-fund does not provide any capital protection or capital guarantee; nor does it offer a guaranteed return. It is therefore possible for the net asset value to be lower than the floor price.

The allocation of the assets is influenced by whether they involve more or less risk. Riskier assets are intended to generate the return, while less risky assets are designed to protect the floor.

During the year, the manager may deviate from the target allocation in the following ways:

- If the net asset value falls towards the floor price, the manager may intervene and replace investments in riskier assets with investments in less risky ones. If the net asset value hits the floor price, the manager may switch completely to investments in money market instruments, shorter-term bonds, shorter-term bond funds and/or cash. Conversely, if the net asset value moves away from the floor price and goes up to a strong enough extent, the manager may intervene and gradually reallocate the assets by replacing the less risky assets with more risky ones.
- If markets develop favourably and provided the net asset value is sufficiently high relative to the floor price, and for as long as both these conditions are met, the stock component can temporarily go up sharply relative to the percentage determined when the floor price was set.
- The bond component will be monitored separately and, if its performance is negative, the exposure within this component may be reduced periodically, for instance by reducing investments in bonds in favour of investments in money market instruments and cash.

The stock component is invested in a worldwide selection of shares that may come from any region, sector or theme.

For details of the bond component, please see the 'Characteristics of the bonds and debt instruments' section below. The fund is actively managed without referring to any benchmark.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

Transparency of adverse sustainability impacts:

The sub-fund considered the principal adverse impacts of its investment decisions on sustainability factors ('PAI') as described by the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector ('SFDR').

The principal adverse impacts on sustainability factors were explicitly taken into account through the General exclusion policy. More information on the principal adverse impact indicators that are taken into account can be found at www.kbc.be/investment-legal-documents > General exclusion policy for conventional and Responsible Investing funds and www.kbc.be/investment-legal-documents > Exclusion policies for Responsible Investing funds.

In addition, the principal adverse impacts on sustainability factors were implicitly taken into account through the Proxy Voting and Engagement Policy of KBC Asset Management NV (more information can be found at www.kbc.be/investment-legal-documents > Retrospective Proxy Voting - overview > Proxy Voting and Engagement Policy).

Characteristics of the bonds and debt instruments

The sub-fund invests in bonds and debt instruments issued by both companies and public authorities.

The sub-fund invests directly and/or indirectly at least 50% of its assets in bonds and debt instruments

- in securities rated investment grade (at least BBB-/Baa3 for long-term debt, A3/F3/P3 for short-term debt) by at least one of the following rating agencies: Moody's Investors Service, Standard & Poor's or Fitch Ratings, and/or
- in government bonds issued in local currency or non-subordinated corporate bonds* which do not have a credit rating from the rating agencies mentioned above but the issuer of which has an investment grade rating by at least one of the rating agencies mentioned above, and/or
- in money market instruments whose issuer has an investment grade rating (minimum A3/F3/P3 for short-term debt) from at least one of the above rating agencies.

This means that the sub-fund may invest up to 50% of its assets invested in bonds and debt instruments that do not have a credit rating from the above-mentioned rating agencies and/or which do not comply with the above-mentioned credit requirements.

All maturities are taken into consideration in the selection of bonds and debt instruments.

*In the event of the bankruptcy of the relevant issuer, subordinated bonds are subordinated to the company's other debts: the company's other debts are paid first, then and only if there is still capital left, the holders of the subordinated bonds are fully or partially repaid; the holder of the subordinated bond does, however, have priority over the shareholders of the issuer in question.

Investments in assets other than securities or money market instruments

The sub-fund will invest primarily in units of undertakings for collective investment.

Securities Financing Transactions (SFTs)

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.1. Securities Financing Transactions (SFTs)'.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'.

2.1.4. Financial portfolio management

The intellectual management, with the exception of the creation of the sub-fund and its maintenance in terms of the technical, product-specific and legal aspects has been delegated by the management company to KBC Fund Management Limited, 4th Floor, Scotch House, 6/7 Burgh Quay, Dublin 2, D02 VK44, Ireland.

2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2.1.6. Index and benchmark

Not applicable.

2.1.7. Policy pursued during the financial year

The investment objective of each fund is to generate the highest possible return while aiming to maintain the NAV above a floor value. The allocation is determined by a dynamic portfolio insurance model and is a function of volatility of the underlying assets and distance from the floor. As such there is a dynamic allocation between more risky assets and less risky assets. The risky assets that the funds invested in are determined by the KBC AM NV strategy.

Horizon Global Flex Allocation Wealth Jan

NAV 31/12/2024: 1156.93

Floor NAV 31/12/2024: 1007.91

The fund recorded a positive performance over the reporting period of approximately 12.06%. The Sub-Fund's NAV remained above the Fixed Floor for the period.

Global Flexible Allocation Wealth January had its annual reset during the reporting period, which resulted in a Reset NAV above that of 2023.

Quarter 1 recorded strong positive returns with the market maintaining positive momentum into 2024 after better-than-expected figures on economic growth and corporate earnings prevailed over the expensive valuation of the market and the further postponement of rate cuts by central bankers. Into Quarter 2 and Equity markets recovered from their April dip. The first quarter reporting season is behind us. In the US, profits beat estimates by 8% knowing that earnings growth is 8%. For Europe, we saw a 6% earnings contraction, beating expectations by 9%. Economic data points in manufacturing and services seem to be slowly stabilizing, even in Europe. The U.S. economy appeared to be gradually shifting down gears. Persistent underlying inflation (especially in the services sector) and recent volatile oil prices mean that the disinflation process is proceeding somewhat more slowly than previously thought. Especially in the US, we still saw inflation rates surprise in the interim. As expected, the ECB cut policy rates and the Fed kept rates unchanged in June. Interest rates appear to have peaked. However, a range of inflation data (especially in the US) cast doubt on the timing and magnitude of the expected cut in policy rates. As a result, we still see interest rates making occasional bucks.

Into Quarter 3 and after keeping rates on hold for 14 months, the Fed finally reversed course and delivered a 50bp cut in September. The rate cut indicated that the Fed was confident that inflation risk has abated and the focus was now on supporting the labour market. ECB had already taken a second step earlier in September by cutting its policy rate with another 0.25%. While stocks markets fell at the very end of December it was still a positive month and quarter on global markets, with a stellar year overall for returns. Both the Fed and the ECB are currently walking the path of interest rate cuts. Both lowered their policy rates by 25bp in December. The divergence in economic growth between the US and Europe combined with Trump's expected policies (planned deregulation and fiscal stimulus) means that the market expects fewer interest rate cuts by the Fed for 2025 than before. However, the conflict in the Middle East and Ukraine could continue to cause nervousness. Trump's policy decisions could certainly have a major impact.

2.1.8. Future policy

The dynamic portfolio algorithm will determine the future investment policy and participation rate in risk assets while ensuring that the floor is not breached.

The **Horizon Global Flexible Allocation Wealth January Cap** will merge with the **Horizon KBC Dynamic Balanced Responsible Investing**.

2.1.9. Summary risk indicator (SRI)

- 3 on a scale of 1 (lowest risk) to 7 (highest risk)
- a moderate level of inflation risk: the bond component does not provide any protection against an increase in inflation.
- a moderate level of exchange rate risk: since there are investments in securities that are denominated in

currencies other than the Euro, there is a real chance that the value of an investment will be affected by movements in exchange rates.

- a moderate level of credit risk: the bond component invests primarily - but not exclusively- in bonds with an investment grade rating. Consequently, the risk that an issuer can no longer meet its obligations is higher than in an investment that consists only of bonds with an investment grade rating. If investors are in doubt about the creditworthiness of the issuers of the bonds, the value of those bonds can fall.
- a moderate level of market risk: the level of the risk reflects the volatility of the equity component.
- a moderate level of performance risk: the level of the risk reflects the volatility of the equity component.

There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

2.1.10. Leveraged finance

The total amount of leveraged finance used by the sub-fund is 0.00 EUR.

This amount was calculated by multiplying the leverage ratio calculated using the UCITS-commitment method by the sub-fund's total assets under management.

2.1.11. Value-at-Risk

The internal classification system, on the basis of which this sectoral spread is calculated, has been changed as of 31/12/2023. In order to provide a meaningful comparison of the sectoral spread across reporting periods, the sectoral spread calculations will be de-duplicated in the annual reports. This means that a summary table will be shown for each classification system.

Currency breakdown (as a % of net assets)

2.4.2. Changes in the composition of the assets of Horizon Global Flexible Allocation Wealth January (in Euro)

	1 st half of year	2 nd half of year	Year
Purchases	13,766,092.75	11,358,182.66	25,124,275.41
Sales	14,340,948.66	11,686,768.94	26,027,717.60
Total 1	28,107,041.41	23,044,951.59	51,151,993.01
Subscriptions	0.00	0.00	0.00
Redemptions	558,406.88	72,366.52	630,773.40
Total 2	558,406.88	72,366.52	630,773.40
Monthly average of total assets	10,370,236.42	10,536,102.70	10,454,876.00
Turnover rate	265.65%	218.04%	483.23%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period.

A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions.

A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio.

Active asset management may result in high turnover rates (monthly percentage >50%), reason: Active asset management may result in high turnover rates (monthly percentage >50%), reason: Model driven funds that trade based on market movements in addition to regular strategy changes and subscriptions and redemptions.

The detailed list of transactions can be consulted free of charge at the company designated as financial service:

KBC Bank NV, Havenlaan 2, B-1080 Brussels

2.4.5. Performance figures

Cap Div	ISIN Code	Curr ency	1 year		3 years		5 years		10 years		Since Launch*	
			Share classes	Bench mark	Share classes	Bench mark	Share classes	Bench mark	Share classes	Bench mark	Starting date	Share classes
CAP	BE6276291034	EUR	11.88%		2.68%		1.82%				31/03/2015	1.51%

Risk warning: Past performance is not a guide to future performance.

* Return on annual basis.

- The bar chart shows the performance for full financial years.
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage.
- Calculation method for date D, where NAV stands for net asset value:

Capitalisation units (CAP)

Return on date D over a period of X years :

$$[\text{NIW}(\text{D}) / \text{NIW}(\text{Y})] ^ {1 / \text{X}} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[\text{NIW}(\text{D}) / \text{NIW}(\text{S})] ^ {1 / \text{F}} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation shares.

2.4.6. Costs

Ongoing Charges:

Management fees and other administrative or operating costs: 1,073%

Transaction costs: 0,426%

Percentage calculated at reporting date: 31 December 2024 .

A more detailed explanation with respect to the method of calculating ongoing charges and the relevant exclusions can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.5. Ongoing charges'

Fee for managing the investment portfolio

The management fee amounts to 23,456.90 EUR. An additional fee of 31,633.49 EUR was charged regarding commissions and charges for allocating the assets.

Existence of Commission Sharing Agreements

Not applicable

Existence of fee sharing agreements and rebates

The management company has shared 33,54% of its fee with the distributor, and institutional and/or professional parties.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.6. Fee-sharing agreements and rebates'.

2.4.7. Notes to the financial statements and other data

Fee for managing the investment portfolio	Max 0.82%	<p>per year (0.30% of which is for the protection of the floor price) calculated on the basis of the average total net assets of the sub-fund.</p> <p>For the portion of net assets corresponding to an investment in undertakings for collective investment(*) managed by a financial institution belonging to the KBC group, the fee for managing the investment portfolio equals the difference between the fee for managing the investment portfolio of the aforementioned undertakings for collective investment and the percentage (to the left) that is paid for managing the investment portfolio.</p> <p>KBC Fund Management Limited receives a fee from the management company of max. 0.82% per year calculated on the basis of the average total net assets of the sub-fund, without the total fees and charges received by the management company being exceeded.</p> <p>(*) The fee for the management of the investment portfolio of the undertakings for collective investment in which the sub-fund invests will amount to a year.</p>
Administration fee	0.10%	per year calculated on the basis of the average total net assets of the sub-fund.
Fee for financial services	Max 950 EUR	per year. However, the fee will never exceed a maximum of 0.005% calculated on the basis of the average total net assets of the sub-fund.
Custodian's fee	0.03%	per year and calculated monthly on the basis of the value of the securities held in custody by the custodian on the last banking day of the preceding month, except on those assets invested in underlying undertakings for collective investment managed by a financial institution of the KBC group.
Fee paid to the bevek's statutory auditor	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Fee paid to the directors	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Annual tax	See prospectus General Part : 'Information concerning the Bevek - H. Tax treatment'	
Other charges (estimation) such as the regulator's fees, the cost of publication and any marketing costs	0.10%	of the net assets of the sub-fund per year.

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main object of the sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. The sub-fund also aims to set a floor price for the net asset value each year.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.
The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. **Consequently, there may be an impact on concentration risk.** Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

The sub-fund invests directly or indirectly in more risky assets (such as shares, share UCIs, medium and longer-term bonds, medium and longer-term bond UCIs, certain money market instruments, and alternative investments (like real estate and financial instruments that are linked to price movements on the commodity markets)) and/or less risky assets (such as certain money market instruments, shorter-term bonds, shorter-term bond UCIs and cash). Compared with bond UCIs classified as riskier assets, bond UCIs in the less risky assets category invest more in instruments with a shorter term to maturity, which means that they are less sensitive to movements in interest rates. In principle, therefore, they are less volatile.

The sub-fund may invest up to 85% in shares, up to 75% in medium and longer-term bonds and up to 100% in shorter-term bonds.

The sub-fund has two objectives:

1. to achieve the highest possible return by making investments in accordance with the investment strategy of KBC AssetManagement NV.

The target allocation for the asset classes is 55% shares and/or share-related investments ('the stock component') and 45% bonds and/or bond-related investments ('the bond component'). It is permitted to deviate from the target allocation based on the investment strategy of KBC Asset Management NV (see www.kbc.be/investment-strategy) and/or to protect the floor price, as described in section 2. It is therefore possible for the sub-fund to invest in asset classes that have not been included in the target allocation.

2. to protect a floor price.

The sub-fund also aims to set a floor price for the net asset value each year. The floor price is valid for one year and is always equal to 90% of the net asset value on the seventh calendar day of the previous January (or the nearest Belgian banking day preceding this if the seventh day is not a banking day in Belgium). The initial floor price is equal to 90% of the initial net asset value and is valid from 1 April 2015 to 7 January 2016, inclusive.

Achieving the objective to protect the floor price becomes increasingly important the closer the net asset value gets to the floor price. In such a situation, the asset allocation will be increasingly focused on protecting the floor price and will deviate from the target allocation specified in point 1 above.

The floor price changes each year in line with the net asset value. Any fall in the net asset value at the time the new floor price is determined will mean that the new floor price is lower than the current floor price. Any increase in the net asset value at the time the new floor price is determined will mean that the new floor price is higher than the current floor price.

In addition, the floor price can be increased during the yearly periods, more specifically if the net asset value on the seventh calendar day (or the day before if the seventh day is not a banking day in Belgium) of the months of April, July or October is higher than the net asset value on which the current floor price was based. The floor price will then be increased to 90% of the higher net asset value. From that moment on, the new floor price will apply.

The sub-fund does not provide any capital protection or capital guarantee; nor does it offer a guaranteed return. It is therefore possible for the net asset value to be lower than the floor price.

The allocation of the assets is influenced by whether they involve more or less risk. Riskier assets are intended to generate the return, while less risky assets are designed to protect the floor.

During the year, the manager may deviate from the target allocation in the following ways:

- If the net asset value falls towards the floor price, the manager may intervene and replace investments in riskier assets with investments in less risky ones. If the net asset value hits the floor price, the manager may switch completely to investments in money market instruments, shorter-term bonds, shorter-term bond funds and/or cash. Conversely, if the net asset value moves away from the floor price and goes up to a strong enough extent, the manager may intervene and gradually reallocate the assets by replacing the less risky assets with more risky ones.
- If markets develop favourably and provided the net asset value is sufficiently high relative to the floor price, and for as long as both these conditions are met, the stock component can temporarily go up sharply relative to the percentage determined when the floor price was set.
- The bond component will be monitored separately and, if its performance is negative, the exposure within this component may be reduced periodically, for instance by reducing investments in bonds in favour of investments in money market instruments and cash.

The stock component is invested in a worldwide selection of shares that may come from any region, sector or theme.

For details of the bond component, please see the 'Characteristics of the bonds and debt instruments' section below.

The fund is actively managed without referring to any benchmark.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

Transparency of adverse sustainability impacts:

The sub-fund considers the principal adverse impacts of its investment decisions on sustainability factors ('PAI') as described by the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector ('SFDR').

The principal adverse impacts on sustainability factors were explicitly taken into account through the General exclusion policy. More information on the principal adverse impact indicators that are taken into account can be found at www.kbc.be/investment-legal-documents > General exclusion policy for conventional and Responsible Investing funds and www.kbc.be/investment-legal-documents > Exclusion policies for Responsible Investing funds.

In addition, the principal adverse impacts on sustainability factors were implicitly taken into account through the Proxy Voting and Engagement Policy of KBC Asset Management NV (more information can be found at www.kbc.be/investment-legal-documents > Retrospective Proxy Voting - overview > Proxy Voting and Engagement Policy).

Characteristics of the bonds and debt instruments

The sub-fund invests in bonds and debt instruments issued by both companies and public authorities.

The sub-fund invests directly and/or indirectly at least 50% of its assets in bonds and debt instruments

- in securities rated investment grade (at least BBB-/Baa3 for long-term debt, A3/F3/P3 for short-term debt) by at least one of the following rating agencies: Moody's Investors Service, Standard & Poor's or Fitch Ratings, and/or
- in government bonds issued in local currency or non-subordinated corporate bonds* which do not have a credit rating from the rating agencies mentioned above but the issuer of which has an investment grade rating by at least one of the rating agencies mentioned above, and/or
- in money market instruments whose issuer has an investment grade rating (minimum A3/F3/P3 for short-term debt) from at least one of the above rating agencies.

This means that the sub-fund may invest up to 50% of its assets invested in bonds and debt instruments that do not have a credit rating from the above-mentioned rating agencies and/or which do not comply with the above-mentioned credit requirements.

All maturities are taken into consideration in the selection of bonds and debt instruments.

*In the event of the bankruptcy of the relevant issuer, subordinated bonds are subordinated to the company's other debts: the company's other debts are paid first, then and only if there is still capital left, the holders of the subordinated bonds are fully or partially repaid; the holder of the subordinated bond does, however, have priority over the shareholders of the issuer in question.

Investments in assets other than securities or money market instruments

The sub-fund will invest primarily in units of undertakings for collective investment.

Securities Financing Transactions (SFTs)

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.1. Securities Financing Transactions (SFTs)'.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'.

2.1.4. Financial portfolio management

The intellectual management, with the exception of the creation of the sub-fund and its maintenance in terms of the technical, product-specific and legal aspects has been delegated by the management company to KBC Fund Management Limited, 4th Floor, Scotch House, 6/7 Burgh Quay, Dublin 2, D02 VK44, Ireland.

2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2.1.6. Index and benchmark

Not applicable.

2.1.7. Policy pursued during the financial year

The investment objective of each fund is to generate the highest possible return while aiming to maintain the NAV above a floor value. The allocation is determined by a dynamic portfolio insurance model and is a function of volatility of the underlying assets and distance from the floor. As such there is a dynamic allocation between more risky assets and less risky assets. The risky assets that the funds invested in are determined by the KBC AM NV strategy.

Horizon Global Flex Allocation Wealth Jul

NAV 31/12/2024: 1253.34

Floor NAV 31/12/2024: 1091.93

The fund recorded a positive performance over the reporting period of approximately 12.09%. The Sub-Fund's NAV remained above the Fixed Floor for the period.

Global Flexible Allocation Wealth July had its annual reset during the reporting period, which resulted in a Reset NAV above that of 2023.

Quarter 1 recorded strong positive returns with the market maintaining positive momentum into 2024 after better-than-expected figures on economic growth and corporate earnings prevailed over the expensive valuation of the market and the further postponement of rate cuts by central bankers. Into Quarter 2 and Equity markets recovered from their April dip. The first quarter reporting season is behind us. In the US, profits beat estimates by 8% knowing that earnings growth is 8%. For Europe, we saw a 6% earnings contraction, beating expectations by 9%. Economic data points in manufacturing and services seem to be slowly stabilizing, even in Europe. The U.S. economy appeared to be gradually shifting down gears. Persistent underlying inflation (especially in the services sector) and recent volatile oil prices mean that the disinflation process is proceeding somewhat more slowly than previously thought. Especially in the US, we still saw inflation rates surprise in the interim. As expected, the ECB cut policy rates and the Fed kept rates unchanged in June. Interest rates appear to have peaked. However, a range of inflation data (especially in the US) cast doubt on the timing and magnitude of the expected cut in policy rates. As a result, we still see interest rates making occasional bucks.

Into Quarter 3 and after keeping rates on hold for 14 months, the Fed finally reversed course and delivered a 50bp cut in September. The rate cut indicated that the Fed was confident that inflation risk has abated and the focus was now on supporting the labour market. ECB had already taken a second step earlier in September by cutting its policy rate with another 0.25%. While stocks markets fell at the very end of December it was still a positive month and quarter on global markets, with a stellar year overall for returns. Both the Fed and the ECB are currently walking the path of interest rate cuts. Both lowered their policy rates by 25bp in December. The divergence in economic growth between the US and Europe combined with Trump's expected policies (planned deregulation and fiscal stimulus) means that the market expects fewer interest rate cuts by the Fed for 2025 than before. However, the conflict in the Middle East and Ukraine could continue to cause nervousness. Trump's policy decisions could certainly have a major impact.

2.1.8. Future policy

The dynamic portfolio algorithm will determine the future investment policy and participation rate in risk assets while ensuring that the floor is not breached.

The **Horizon Global Flexible Allocation Wealth July Cap** will merge with the **Horizon KBC Dynamic Balanced RI**.

2.1.9. Summary risk indicator (SRI)

3 on a scale of 1 (lowest risk) to 7 (highest risk)

- a moderate level of inflation risk: the bond component does not provide any protection against an increase in inflation.
- a moderate level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a real chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of credit risk: the bond component invests primarily - but not exclusively- in bonds with an investment grade rating. Consequently, the risk that an issuer can no longer meet its obligations is higher than in an investment that consists only of bonds with an investment grade rating. If investors are in doubt about the creditworthiness of the issuers of the bonds, the value of those bonds can fall.
- a moderate level of market risk: the level of the risk reflects the volatility of the equity component.
- a moderate level of performance risk: the level of the risk reflects the volatility of the equity component.

There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

2.1.10. Leveraged finance

The total amount of leveraged finance used by the sub-fund is 0.00 EUR.

This amount was calculated by multiplying the leverage ratio calculated using the UCITS-commitment method by the sub-fund's total assets under management.

2.1.11. Value-at-Risk

Subscriptions	0.00	0.00	0.00
Redemptions	313,627.08	702,189.52	1,015,816.60
Total 2	313,627.08	702,189.52	1,015,816.60
Monthly average of total assets	5,950,432.39	5,624,201.48	5,783,960.65
Turnover rate	261.64%	220.16%	483.25%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period.

A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions.

A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio.

Active asset management may result in high turnover rates (monthly percentage >50%), reason: Active asset management may result in high turnover rates (monthly percentage >50%), reason: Model driven funds that trade based on market movements in addition to regular strategy changes and subscriptions and redemptions.

The detailed list of transactions can be consulted free of charge at the company designated as financial service:
KBC Bank NV, Havenlaan 2, B-1080 Brussels

2.4.3. Amount of commitments in respect of financial derivatives positions

2023 - 12	0.00		823,967.83	
2024 - 12	0.00		1,015,816.60	

Period	Net asset value End of period (in Euro)		
Year	Of the sub-fund	Of one share	
		Capitalization	Distribution
2022 - 12	6,160,562.38	1,032.79	
2023 - 12	5,815,140.93	1,119.80	
2024 - 12	5,439,499.66	1,253.34	

2.4.5. Performance figures

BE6280653971
Horizon Global Flexible Allocation Wealth July CAP
Annual performance from 01/01/2016 through 31/12/2024 (in EUR)

Cap Div	ISIN Code	Curr ency	1 year		3 years		5 years		10 years		Since Launch*	
			Share classes	Bench mark	Share classes	Bench mark	Share classes	Bench mark	Share classes	Bench mark	Starting date	Share classes
CAP	BE6280653971	EUR	11.93%		2.27%		2.99%				25/09/2015	2.47%

Risk warning: Past performance is not a guide to future performance.

* Return on annual basis.

- The bar chart shows the performance for full financial years.
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage.
- Calculation method for date D, where NAV stands for net asset value:

Capitalisation units (CAP)

Return on date D over a period of X years :

$$[\text{NIW}(\text{D}) / \text{NIW}(\text{Y})] ^ {1 / \text{X}} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[\text{NIW}(\text{D}) / \text{NIW}(\text{S})] ^ {1 / \text{F}} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation shares.

2.4.6. Costs

Ongoing Charges:

Management fees and other administrative or operating costs: 1,078%

Transaction costs: 0,491%

Percentage calculated at reporting date: 31 December 2024 .

A more detailed explanation with respect to the method of calculating ongoing charges and the relevant exclusions can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.5. Ongoing charges'

Fee for managing the investment portfolio

The management fee amounts to 12,979.63 EUR. An additional fee of 17,495.00 EUR was charged regarding commissions and charges for allocating the assets.

Existence of Commission Sharing Agreements

Not applicable

Existence of fee sharing agreements and rebates

The management company has shared 33,55% of its fee with the distributor, and institutional and/or professional parties.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.6. Fee-sharing agreements and rebates'.

2.4.7. Notes to the financial statements and other data

Fee for managing the investment portfolio	Max 0.82%	<p>per year (0.30% of which is for the protection of the floor price) calculated on the basis of the average total net assets of the sub-fund.</p> <p>For the portion of net assets corresponding to an investment in undertakings for collective investment(*) managed by a financial institution belonging to the KBC group, the fee for managing the investment portfolio equals the difference between the fee for managing the investment portfolio of the aforementioned undertakings for collective investment and the percentage (to the left) that is paid for managing the investment portfolio.</p> <p>KBC Fund Management Limited receives a fee from the management company of max. 0.82% per year calculated on the basis of the average total net assets of the sub-fund, without the total fees and charges received by the management company being exceeded.</p> <p>(*) The fee for the management of the investment portfolio of the undertakings for collective investment in which the sub-fund invests will amount to a year.</p>
Administration fee	0.10%	per year calculated on the basis of the average total net assets of the sub-fund.
Fee for financial services	Max 950 EUR	per year. However, the fee will never exceed a maximum of 0.005% calculated on the basis of the average total net assets of the sub-fund.
Custodian's fee	0.03%	per year and calculated monthly on the basis of the value of the securities held in custody by the custodian on the last banking day of the preceding month, except on those assets invested in underlying undertakings for collective investment managed by a financial institution of the KBC group.
Fee paid to the bevek's statutory auditor	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Fee paid to the directors	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Annual tax	See prospectus General Part : 'Information concerning the Bevek - H. Tax treatment'	
Other charges (estimation) such as the regulator's fees, the cost of publication and any marketing costs	0.10%	of the net assets of the sub-fund per year.

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The sub-fund acts as a feeder fund that aims to invest at least 95% of its assets in units of a single UCITS, i.e. KBC Bonds High Interest (the master fund as specified below).

Sub-fund's investment policy

Permitted asset classes

The sub-fund's investments consist of at least 95% units in the master fund (as determined below) and a maximum of 5% in cash and/or financial derivatives.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.
The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

It is possible to work with either listed or unlisted derivatives: these may be forward contracts, options or swaps on securities, indices, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions may only be concluded with prime financial institutions specialised in such transactions. **Subject to the applicable laws and regulations and the articles of association, the sub-fund will always seek to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.**

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of cash or investment grade bonds. When calculating the value of the bonds, a margin will be applied that varies depending on their residual term to maturity and the currency in which they are denominated. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives can also be used to hedge the assets of the sub-fund against open exchange risks in relation to the currency.

Strategy selected

The sub-fund (the feeder fund) always invests at least 95% of its assets in units of a single undertaking for collective investment, namely High Interest, a sub-fund of the SICAV under Luxembourg law opting for investments that comply with the conditions of Directive 2009/65/EC KBC Bonds (the master fund).

Since the sub-fund as feeder fund will at all times invest at least 95% of its assets in the master fund, the feeder fund's results will be comparable with those of the master fund. For the following reasons, a limited deviation between the results of the master fund and those of the feeder fund may arise:

- The feeder fund may invest up to 5% of its assets in assets apart from the master fund, namely in cash and financial derivatives.
- The feeder fund bears certain charges that the master fund does not incur. Among other things, these include the payment made for the administration of the feeder fund, the fee paid to the feeder fund's auditor and the costs of publication of the feeder fund's net asset value.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

Transparency of adverse sustainability impacts:

The sub-fund considers the principal adverse impacts of its investment decisions on sustainability factors ('PAI') as described by the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector ('SFDR').

The principal adverse impacts on sustainability factors were explicitly taken into account through the General exclusion policy. More information on the principal adverse impact indicators that are taken into account can be found at www.kbc.be/investment-legal-documents > General exclusion policy for conventional and Responsible Investing funds and www.kbc.be/investment-legal-documents > Exclusion policies for Responsible Investing funds.

In addition, the principal adverse impacts on sustainability factors were implicitly taken into account through the Proxy Voting and Engagement Policy of KBC Asset Management NV (more information can be found at www.kbc.be/investment-legal-documents > Retrospective Proxy Voting - overview > Proxy Voting and Engagement Policy).

Information regarding the master

Name:

KBC Bonds High Interest

Legal status:

Sub-fund of a Luxembourg SICAV that has opted for investments that comply with the terms of Directive 2009/65/EC, and that, as far as its operation and investments are concerned, is governed by Part 1 of the Luxembourg Act of 17 December 2010 on undertakings for collective investment.

Management company:

KBC Asset Management SA, Rue du Fort Wallis 4, L-2714 Luxembourg

Custodian:

Brown Brothers Harriman (Luxembourg) S.C.A., Route d'Esch 80, L-1470 Luxembourg

Auditor:

Deloitte Audit Sarl, Rue de Neudorf 560, L-2220 Luxembourg

Master investment policy:

At least two thirds of the sub-fund's assets are invested in bonds that are chiefly denominated in currencies with a significantly higher return than that offered by strong currencies.

The benchmark of the sub-fund is 66.67% JPM GBI Global Unhedged EUR + 33.33% JPM GBI Emerging Markets Global Diversified Composite Unhedged EUR.

The aim of the sub-fund is to outperform the benchmark.

The sub-fund is actively managed and doesn't aim to replicate the benchmark. The benchmark is used to measure the performance and composition of the portfolio. Most of the bonds held by the sub-fund are included in the benchmark. Managers may use their discretionary power to invest in bonds not included in the benchmark in order to benefit from the sub-fund's specific investment opportunities.

The sub-fund's investment policy limits the extent to which the portfolio's positions may deviate from the benchmark. This deviation is measured using the tracking error, which indicates the extent of volatility between the sub-fund's performance and the benchmark. The expected tracking error is 1.50%. Investors should be aware that the actual tracking error may change, depending on market conditions. A sub-fund with a small deviation from the benchmark is expected to outperform that benchmark to a lesser degree.

Required disclaimer for benchmark providers:

Currencies with a significantly higher return are those with a return at least 0.5% higher than the interest offered by

bonds issued by the Federal Republic of Germany.

The sub-fund invests directly and/or indirectly at least 75% of its assets

- in bonds and debt instruments rated with an investment grade (at least BBB-/Baa3 for long-term debt, A3/F3/P3 for short-term debt) from at least one of the following rating agencies: Moody's Investors Service, Standard & Poor's or Fitch Ratings, and/or
- in government bonds issued in local currency or non-subordinated corporate bonds* which do not have a credit rating from the rating agencies mentioned above but where the issuer does have an investment grade rating by at least one of the above rating agencies.

* In the event of the bankruptcy of the relevant issuer, subordinated bonds are subordinated to the company's other debts: the company's other debts are paid first, then and only if there is still capital left, the holders of the subordinated bonds are fully or partially repaid; the holder of the subordinated bond does, however, have priority over the shareholders of issuer in question.

This means that the sub-fund may invest up to 25% of its assets invested in bonds and debt instruments that do not have a credit rating from the above-mentioned rating agencies and/or which do not fulfil the above-mentioned credit requirements.

The sub-fund shall not invest in transferable securities where the issuer is in difficulty and unable to meet its financial commitments. If a security goes into difficulty and defaults, the manager will always seek to sell the position taking into account the interests of the investor and if market conditions allow (for example, sufficient liquidity).

The sub-fund may not invest more than 25% of its assets in bonds that are convertible and subject to options, more than 10% of its assets in equities or participation-entitled instruments, more than one third of its assets in money market instruments and more than one third of its assets in bank deposits.

The higher than average exchange rate risk associated with currencies with a significantly higher return frequently appears to be more than offset in the medium term by the high interest return. In the short term, investments in high-yield bonds offer a high global return, as periods in which a currency declines in value alternate with periods in which the value of the currency stabilises or rises.

The sub-fund seeks through judicious timing of the investments and hedging of the exchange rate and interest rate risk to achieve the aforementioned investment objectives as effectively as possible. In addition, the value of high-yield bonds can fluctuate sharply at times without there being any causal link with the exchange rate risk: the sub-fund seeks to address this factor in a manner that respects the return.

An additional benefit to the investor is that the sub-fund can invest in the market for bonds denominated in currencies with a significantly higher return and which, through a variety of measures, seek to protect the currency or to restrict the outflow of capital and are often closed or not easily accessible to private investors.

The sub-fund is thus designed for investors looking for high returns (distributed or capitalised, according to whether the investor opts for distribution or capitalisation shares) and the potential to collect capital gains, and who are willing to accept a higher than average risk but also want to offset this risk to as great an extent as possible through judicious selection of the investments and professional management techniques. The net asset value will be denominated in euros.

Master risk profile:

The risk and return profile of the master is set out in the key investor information for the master. A summary of the risks as appraised by the master is set out in the master's prospectus.

Ongoing charges of the master:

The ongoing charges of the master may be found in the key investor information for the master.

Prospectus and key investor information of the master:

The prospectus and the key investor information of the master may be obtained free of charge from the financial services providers. These documents may also be consulted on www.kbc.be/investing.

Information regarding the agreement between the master and the feeder

In accordance with Article 78 (1) of the Act of 3 August 2012 on undertakings for collective investment that meet the conditions of Directive 2009/65/EC and undertakings for investment in debt instruments, the master and feeder funds have concluded an agreement that governs the relationship between the master and feeder funds. This agreement includes:

- what categories of units in the master fund are available for investment by the feeder fund;
- the charges and expenses to be borne by the feeder fund in relation to the investment in the master fund;
- the schedule for the close of the order receipt period, the calculation of the net asset value, the publication of the net asset value and the date of payment or repayment of the orders;
- the consequences for the feeder fund of suspending determination of the master fund's net asset value;
- the way in which it is ensured that in the event of errors in calculating the net asset value of the units in the master fund, the necessary measures will be taken swiftly in relation to the feeder fund.

This agreement may be obtained free of charge from the financial service providers before or after subscription to the shares.

Securities Financing Transactions (SFTs)

The sub-fund may not lend any financial instruments.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'.

2.1.4. Financial portfolio management

The intellectual management, with the exception of the creation of the sub-fund and its maintenance in terms of the technical, product-specific and legal aspects has been delegated by the management company to KBC Fund Management Limited, 4th Floor, Scotch House, 6/7 Burgh Quay, Dublin 2, D02 VK44, Ireland.

2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2.1.6. Index and benchmark

See 'Sub-fund's investment policy'.

2.1.7. Policy pursued during the financial year

We refer to the General information on the SICAV of this report under '1.2.2. General overview of the markets' for a review of the market.

2.1.8. Future policy

We refer to the General information on the SICAV of this report under '1.2.2. General overview of the markets' for an overview of the outlook.

2.1.9. Summary risk indicator (SRI)

3 on a scale of 1 (lowest risk) to 7 (highest risk)

- a moderate level of inflation risk: there is no protection against an increase of the inflation.
- a high level of exchange rate risk: since the master invests in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of credit risk: the assets of the master are primarily - but not exclusively - invested in bonds with an investment grade rating. Consequently the risk that an issuer can no longer meet its obligations is higher than in an investment that consists only of bonds with an investment grade rating. If investors are in doubt about the creditworthiness of the issuers of the bonds, the value of those bonds can fall.
- a moderate level of market risk: the level of the risk reflects the interest rate sensitivity of the bonds in the master and the exchange rate risk in relation to the euro.
- a moderate level of performance risk: the level of the risk reflects the interest rate sensitivity of the bonds in the master and the exchange rate risk in relation to the euro.

There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'.

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

2.1.10. Leveraged finance

The total amount of leveraged finance used by the sub-fund is 0.00 EUR.

This amount was calculated by multiplying the leverage ratio calculated using the UCITS-commitment method by the sub-fund's total assets under management.

2.4.2. Changes in the composition of the assets of Horizon High Interest Obligatiedepot (in Euro)

	1 st half of year	2 nd half of year	Year
Purchases	0.00	0.00	0.00
Sales	19,758,195.28	11,759,937.45	31,518,132.73
Total 1	19,758,195.28	11,759,937.45	31,518,132.73
Subscriptions	164,010.85	87,931.72	251,942.57
Redemptions	17,301,315.70	11,760,891.07	29,062,206.77
Total 2	17,465,326.55	11,848,822.79	29,314,149.34
Monthly average of total assets	125,925,709.05	111,953,206.65	118.827.677.83
Turnover rate	1.82%	-0.08%	1.85%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period. A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions. A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio. Active asset management may result in high turnover rates (monthly percentage >50%).

The detailed list of transactions can be consulted free of charge at the company designated as financial service: KBC Bank NV, Havenlaan 2, B-1080 Brussels

2.4.3. Amount of commitments in respect of financial derivatives positions

2.4.5. Performance figures

BE0945431691

Horizon High Interest Obligatiedepot DIS

Annual performance compared to the benchmark from 01/01/2015 through 31/12/2024 (in EUR)

* These performances were achieved under circumstances that no longer apply

Cap Div	ISIN Code	Curr ency	1 year		3 years		5 years		10 years		Since Launch*	
			Share classes	Bench mark	Share classes	Bench mark	Share classes	Bench mark	Share classes	Bench mark	Starting date	Share classes
DIS	BE0945431691	EUR	1.46%	3.25%	-2.00%	-1.28%	-2.07%	-1.03%	-0.89%	-0.15%	04/11/2005	0.90%

Risk warning: Past performance is not a guide to future performance.

* Return on annual basis.

- The bar chart shows the performance for full financial years.
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage. In the case of units that pay dividends, the dividend is incorporated geometrically in the return.
- Calculation method for date D, where NAV stands for net asset value:
Distribution units (DIV)
 Return on date D over a period of X years :

$$\left[\frac{C * NIW(D)}{NIW(Y)} \right]^{1/X} - 1$$
 where $Y = D - X$
 Return on date D since the start date S of the unit:

$$\left[\frac{C * NIW(D)}{NIW(S)} \right]^{1/F} - 1$$
 where $F = 1$ if the unit has existed for less than one year on date D
 where $F = (D - S) / 365.25$ if the unit has existed for longer than one year on date D
 where C is a factor that is determined for all N dividends between the calculation date D and the reference date.
 For dividend i on date Di with value Wi:

$$C_i = \left[\frac{W_i}{NIW(D_i)} \right] + 1$$

$$i = 1 \dots N$$
 from which $C = C_0 * \dots * C_N$.
- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for distribution shares.

Dividend on ex-dividend date 28/03/2025: 6,2911 net (8,9874 gross).

2.4.6. Costs

Ongoing Charges:

Management fees and other administrative or operating costs: 1,008%

Transaction costs: 0,121%

Percentage calculated at reporting date: 31 December 2024 .

A more detailed explanation with respect to the method of calculating ongoing charges and the relevant exclusions can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.5. Ongoing charges'

Existence of Commission Sharing Agreements

Not applicable

Existence of fee sharing agreements and rebates

The management company has shared 51,41% of its fee with the distributor, and institutional and/or professional parties.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.6. Fee-sharing agreements and rebates'.

2.4.7. Notes to the financial statements and other data

Fee for managing the investment portfolio	Max 0.60%	<p>per yearcalculated on the basis of the average total net assets of the sub-fund.</p> <p>For the portion of net assets corresponding to an investment in undertakings for collective investment(*) managed by a financial institution belonging to the KBC group, the fee for managing the investment portfolio equals the difference between the fee for managing the investment portfolio of the aforementioned undertakings for collective investment and the percentage (to the left) that is paid for managing the investment portfolio.</p> <p>KBC Fund Management Limited receives a fee from the management company of max. 0,60% per year calculated on the basis of the average total net assets of the sub-fund, without the total fees and charges received by the management company being exceeded.</p> <p>(*) The fee for the management of the investment portfolio of the undertakings for collective investment in which the sub-fund invests will amount to a year.</p>
Administration fee	0.01%	per year calculated on the basis of the average total net assets of the sub-fund.
Fee for financial services	Max 950 EUR	per year. However, the fee will never exceed a maximum of 0.005% calculated on the basis of the average total net assets of the sub-fund.
Custodian's fee	Max 0.02%	per year and calculated monthly on the basis of the value of the securities held in custody by the custodian on the last banking day of the preceding month, except on those assets invested in underlying undertakings for collective Investment managed by a financial institution of the KBC group.
Fee paid to the bevek's statutory auditor	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Fee paid to the directors	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Annual tax	See prospectus General Part : 'Information concerning the Bevek - H. Tax treatment'	
Other charges (estimation) such as the regulator's fees, the cost of publication and any marketing costs	0.10%	of the net assets of the sub-fund per year.

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-

fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

2.1. Management report

2.1.1. Launch date and subscription price

Launch date:	26 August 2019
Initial subscription price:	10 EUR
Maturity date:	30 September 2025
Currency:	EUR

2.1.2. Stock exchange listing

Not applicable.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The object of the sub-fund is twofold (before deducting charges and taxes):

- (1) To repay per share at least 97% of the initial subscription price of 10 EUR at Maturity, i.e. 9.7 EUR using the investments described under the heading *Permitted asset classes*.
- (2) To provide a potential return through an investment in swaps.
To this end, the sub-fund assigns a portion of the future income from the investments described under *Permitted asset classes* to the counterparty or counterparties during the life of the sub-fund. In exchange, the counterparty or counterparties undertakes (undertake) to provide a potential return.
The various types of swaps in which the sub-fund may invest are explained in more detail under the heading *Permitted swap transactions*.

No formal guarantee of repayment of at least 97% of the initial subscription price is provided to the sub-fund or to its shareholders. In other words, this objective is not binding for the sub-fund as regards the result generated, although achieving this objective through the investments described under the heading *Permitted asset classes* is still the top priority.

If the objective to repay per share at least 97% of the initial subscription price at Maturity is not achieved, KBC Asset Management NV may decide (but is not obliged to) to use the management fee it has received during the current financial year from the sub-fund – and possibly also from other sub-funds of the Bevek – to cover the shortfall. This is not a guarantee from KBC Asset Management NV, which may decide at any time and at its own discretion whether or not to use the management fee for this purpose.

This objective to repay per share at least 97% of the initial subscription price does not apply to shareholders who sell their shares before Maturity.

Sub-fund's investment policy

Permitted asset classes

Pursuant to the provisions of the Royal Decree of 12 November 2012 on undertakings for collective investment complying with the conditions of Directive 2009/65/EC, the sub-fund may invest in transferable securities (including bonds and other debt instruments), money market instruments, units (shares) in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as and to the extent permitted by the applicable legislation. These investments can have different maturities and coupon payment dates. Using the swaps described under the heading *Permitted swap transactions* (2), these investments are matched with the obligations of the sub-fund.

The investment limits and restrictions set out in the Royal Decree of 12 November 2012 on undertakings for collective investment complying with the conditions of Directive 2009/65/EC will be respected at all times.

The sub-fund may invest in, among other things, listed bonds issued by 'Special Purpose Vehicles' (SPVs).

These SPVs are managed by KBC Asset Management NV or a subsidiary.

The underlying assets of the bonds issued by the SPVs consist of a diversified portfolio of deposits issued by financial institutions, bonds, other debt instruments and financial derivatives. When selecting these underlying assets, account is taken of criteria relating to allocation and creditworthiness (see *Permitted asset classes* and *Characteristics of the bonds and other debt instruments*) in order to limit the counterparty risk.

Further details of the criteria these underlying deposits, bonds, other debt instruments and financial derivatives must meet are provided in the base prospectuses for the SPVs, which can be viewed at or downloaded from www.kbc.be/prospectus/spv.

Investors are provided with information on the investments made by both the sub-fund and the SPVs in the annual and half-yearly reports on the open-ended investment company under Belgian law (Bevek) to which the sub-fund belongs. These reports can also be viewed at or downloaded from www.kbc.be.

Characteristics of the bonds and other debt instruments

During the sub-fund's life, the average credit rating of the bonds and other debt instruments shall be at least 'A-' from Standard & Poor's or an equivalent rating from Moody's or Fitch, or, if there is no credit rating available, an average credit risk profile that the manager considers to be at least equivalent.

At the start of the investment, the credit rating of the long-term bonds and other debt instruments shall be at least 'A-' from Standard & Poor's or an equivalent rating from Moody's or Fitch, or, if there is no credit rating available, a credit risk profile that the manager considers to be at least equivalent.

At the start of the investment, the credit rating of the short-term bonds and other debt instruments shall be at least 'A-1' from Standard & Poor's or an equivalent rating from Moody's or Fitch, or, if there is no credit rating available, a credit risk profile that the manager considers to be at least equivalent.

When selecting the bonds and other debt instruments, all maturities are taken into consideration.

Permitted swap transactions

The swaps described below have been concluded with a prime counterparty or prime counterparties within the limits laid down by law.

(1) To achieve a potential return, the sub-fund concludes swaps. Under such swap contracts, the sub-fund transfers a portion of the future income from the investments described under the heading *Permitted asset classes* to the counterparty or counterparties during the life of the sub-fund. In exchange, the counterparty or counterparties undertake to provide a potential return as specified under the heading *Selected strategy*.

The use of swaps in this sub-fund can lead to a loss of no more than 3% of the initial invested capital.

The swaps under (1) are essential to achieve the sub-fund's investment objectives, since this technique facilitates achievement of the goal of generating a potential return.

The sub-fund's risk profile is not affected by the use of these swaps.

(2) If necessary, the sub-fund also concludes swaps to match the due dates of the commitments of the sub-fund with those of the cash flows stemming from the investments described under the heading *Permitted asset classes*.

These swaps are essential to achieve the sub-fund's investment objectives, since there are not enough bonds and other debt instruments available on the market whose coupon payments and maturity dates always perfectly match the due dates of the sub-fund's obligations.

The sub-fund's risk profile is not affected by the use of these swaps.

(3) In addition, the sub-fund may conclude swaps to protect itself against the credit risk in respect of issuers of bonds and other debt instruments. Through this type of swap, one or more counterparties takes over the risk of an issuer of a bond or other debt instrument in the sub-fund's portfolio defaulting, in exchange for a fee payable by the sub-fund.

The swaps under (3) serve to hedge the credit risk.

The sub-fund's risk profile is not affected by the use of these swaps.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Strategie selected

Investment objectives and strategy:

The sub-fund has two investment objectives: firstly, it seeks to repay at Maturity at least 97% of the initial subscription price and secondly a possible capital gain that is contingent on the evolution of a basket of 30 shares of a worldwide selection of companies that are characterised by a high market capitalisation.

If the Value of the basket of 30 shares of a worldwide selection of companies that are characterised by a high market capitalisation has risen relative to its Starting Value, 100% of this increase in Value (=End Value minus the Starting Value) divided by the Starting Value) will be taken into account at Maturity with regard to 100% of the initial subscription price. The capital gain will be capped at 20% (yield to maturity of 3.04% before taxes and charges). If the Value of the basket of 30 shares of a worldwide selection of companies that are characterised by a high market capitalisation has fallen relative to its Starting Value, 100% of this fall in Value will be taken into account at Maturity with regard to 100% of the initial subscription price. The capital loss will be capped at 3% (yield to maturity of -0.50% before taxes and charges).

The sub-fund does not, therefore, provide any guaranteed return or capital protection, either during its life or at Maturity.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

Transparency of adverse sustainability impacts:

At launch, the sub-fund took into account the principal adverse impacts on sustainability factors of its investment decisions ("PAI") as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on disclosure on sustainability in the financial services sector ("SFDR") through the application of the KBC Group Investment Policy as well as through the KBC Group Policy on Blacklisted Companies.

Based on the KBC Group Policy on Blacklisted Companies, all companies on the 'KBC Group Blacklist' (including companies involved in controversial weapons such as those prohibited by Belgian law and nuclear and white phosphorus weapons) are excluded as well as the worst offenders of the UN Global Compact.

Consequently, at launch, the sub-fund took particular account of exposure to controversial weapons ('indicator 14') by excluding companies involved in controversial weapon systems, and to violations of UN Global Compact principles or Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises ('indicator 10') by excluding the worst offenders of the UN Global Compact. During its lifetime, the sub-fund did also not include any new shares that are the result of a corporate action if the company in question has since been excluded on the basis of the KBC Group Investment Policy.

Maturity

Tuesday 30 September 2025 (payment with a value date of D+1 banking day)

Currency

EUR, for all shares in the basket, changes in the value of the currency in which they are expressed relative to EUR are irrelevant.

Starting Value

Value of the basket based on the weighted average of the Value of the shares included in the basket during the first 10 Valuation Days, starting from Tuesday 3 September 2019 inclusive.

End Value

Value of the basket based on the weighted average of the Value of the shares included in the basket on the last Valuation Day of the month for the last 12 months before Maturity, more specifically from September 2024 through August 2025 (inclusive).

Value

For all the shares, except for those listed on the Milan stock exchange, the closing price, namely the price of a share in the basket as calculated and notified at closing of the stock exchange by the authority of the stock exchange on which the share is listed (or its legal successor). The reference price is used for shares listed on the Milan stock exchange.

Valuation day

A Valuation Day is set separately for each share in the basket.

A Valuation Day is a day that is a planned trading day both

- i) for the stock exchange on which the share is listed and
- ii) for the stock exchange whose activities have a substantial influence on the trading of options and futures on the share concerned

hereinafter referred to as 'the stock exchanges concerned'.

If on the Valuation Day,

- a) one of the stock exchanges concerned is unexpectedly closed or
- b) there is an event that disrupts the market for a stock exchange concerned or
- c) one of the stock exchanges concerned closes early,

the original Valuation Day is replaced by the following trading day when no event as referred to in a), b) or c) above occurs. An extraordinary closure that has been announced in advance is not considered as early closure.

If a valuation is made on consecutive Valuation Days, the trading day that replaces the original Valuation Day (i) may not coincide with another original Valuation Day and (ii) may not be a trading day that already replaces another original Valuation Day.

However, if an event as referred to under a), b) or c) above occurs on each of the eight trading days following the original Valuation Day,

- (i) the eighth trading day shall be considered as the original Valuation Day and
- (ii) the Bevek shall assess, in good faith and in consultation with the prime counterparty or counterparties with which it has concluded a swap agreement, the price of the share as it would have been traded on that eighth trading day and
- (iii) the Bevek will notify shareholders of any changes regarding setting the Starting Value and/or End Value and conditions of payment.

Relevant basket

In the table below, the columns from left to right reflect the number of the share, the name of the share, the Bloomberg code, the exchange on which it trades (City-MIC Code) and its initial weighting in the basket.

Basket composition methodology

KBC Asset Management used the following methodology to determine the composition of the sub-fund's basket.

Step 1 :

The starting point is the global equities universe from which a selection of potential investments is derived in accordance with the economic criteria for the composition of the basket and subject to restrictions regarding stock market capitalisation and liquid assets.

The economic criteria for the composition of the basket determine the size of the final selection.

Step 2 :

The selection of shares obtained in step 1 is reduced to a short list using a quantitative selection based on past financial data. The shares selected are those of companies that achieve a good score in terms of management quality, a healthy balance-sheet structure and a positive trend in profitability.

Step 3 :

The selection of shares obtained in step 2 is then verified by KBC Asset Management analysts. Shares that are permanently monitored by the analysts and those for which there is a negative recommendation, when the product is launched, are then withdrawn from the selection.

Step 4 :

The last reduction of the selection provides the final basket. This selection was made using the technical parameters of options (including the term, volatility, dividend yield and interest rate).

The final basket must satisfy the legal requirements concerning the quantity of shares and adequate distribution in the weighting. In addition, care is taken to ensure compliance with the geographical and/or sector spread. The analysts make a qualitative assessment of each share used taking account of specific knowledge of these shares and the sectors/regions from which they come, in accordance with the term of the sub-fund.

For the sub-fund Horizon Investicna Prilezitost, about 3062 equities were selected during step 1.

The initial selection was reduced by a maximum 20% in step 2.

This was again reduced by 10% (indicative) in step 3. The final basket set up during step 4 is described above under *Relevant basket*. This basket makes it possible to offer the sub-fund Horizon Investicna Prilezitost under the conditions set out in the investment policy referred to above. Here the selection process uses parameters that could affect the potential return on the investments.

Selection criteria for the basket :

A share/issuer may only form part of the basket if (i) it is listed on a stock exchange, (ii) it has a high market capitalisation, and (iii) the Board of Directors of the Bevek has approved its inclusion in the basket (the 'Selection criteria').

Modifications to the basket due to mergers, acquisitions, demergers, nationalisation, bankruptcy or disqualification :

Mergers or acquisitions

If, during the life of the sub-fund, one or more issuers of shares in the basket are involved in a merger or acquisition, the shares of the relevant issuers which still meet the selection criteria after these operations will be given a weighting in the basket equal to the sum of the weightings of the shares of all issuers involved in the operation. If, after the operation, none of the issuers involved in the operation meet the selection criteria, the procedures described under 'Nationalisation, bankruptcy or disqualification' will apply.

Demergers

If an issuer of a share in the basket proceeds to a demerger, then the share from the issuer concerned can be substituted either by one of the shares that came about as a result of the demerger and that meets the selection criteria, or by a basket of shares arising from the demerger which meet the selection criteria. This basket of shares will, when calculating the number of shares in the basket, be considered as one share. If, after the operation, none of the shares resulting from the demerger meet the selection criteria, the procedures described under 'Nationalisation, bankruptcy or disqualification' will apply.

Nationalisation, bankruptcy or disqualification

If an issuer of a share in the basket is nationalised, declared bankrupt or no longer meets the selection criteria ('disqualification'), this share will be sold at the last known price before removal. The amount thus realised will then be invested until Maturity at the rate of interest in force on money or bond markets at the moment of removal, and this for a term equal to the term remaining until Maturity of the sub-fund. The realised amount plus the interest will be taken into account at Maturity as the result achieved for that share in order to calculate the final increase in the value of the basket at Maturity.

Securities Financing Transactions (SFTs)

The sub-fund may not lend any financial instruments.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'

2.1.4. Financial portfolio management

The intellectual management, with the exception of the creation of the sub-fund and its maintenance in terms of the technical, product-specific and legal aspects has been delegated by the management company to KBC Fund Management Limited, 4th Floor, Scotch House, 6/7 Burgh Quay, Dublin 2, D02 VK44, Ireland.

2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2.1.8. Summary risk indicator

- 2 on a scale of 1 (lowest risk) to 7 (highest risk)
- a moderate level of inflation risk: there is no protection against an increase of the inflation.
 - a moderate level of market risk: the level of the risk reflects the volatility of the stock market.
 - a moderate level of performance risk: the level of the risk reflects the volatility of the stock market.
- There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

2.1.9. Leveraged finance

The total amount of leveraged finance used by the sub-fund is 7 905 040.86 EUR.

This amount was calculated by multiplying the leverage ratio calculated using the UCITS-commitment method by the sub-fund's total assets under management.

2022 - 12	11,754,146.92	9.37	
2023 - 12	11,538,406.76	9.70	
2024 - 12	11,366,315.09	10.79	

2.4.5. Performance figures

BE6314556505
Horizon Investicna Prilezitost CAP
Annual performance from 01/01/2020 through 31/12/2024 (in EUR)

Cap Div	ISIN Code	Currency	1 year		3 years		5 years		10 years		Since Launch*	
			Share classes	Bench mark	Share classes	Bench mark	Share classes	Bench mark	Share classes	Bench mark	Starting date	Share classes
CAP	BE6314556505	EUR	11.24%		1.36%		1.43%				26/08/2019	1.44%

Risk warning: Past performance is not a guide to future performance.

* Return on annual basis.

- The bar chart shows the performance for full financial years.
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage.
- Calculation method for date D, where NAV stands for net asset value:
Capitalisation units (CAP)
 Return on date D over a period of X years :

$$[NIW(D) / NIW(Y)]^{1/X} - 1$$
 where Y = D-X
 Return on date D since the start date S of the unit:

$$[NIW(D) / NIW(S)]^{1/F} - 1$$
 where F = 1 if the unit has existed for less than one year on date D
 where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D
- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation shares.

2.4.6. Costs

Ongoing Charges:

Management fees and other administrative or operating costs: 0,646%

Transaction costs: 0,000%

Percentage calculated at reporting date: 31 December 2024 .

A more detailed explanation with respect to the method of calculating ongoing charges and the relevant exclusions can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.5. Ongoing charges'

Existence of Commission Sharing Agreements

Not applicable

Fee sharing agreements en rebates

The management company has shared 35.79% of its fee with the distributor, and institutional and/or professional parties.

This percentage has been calculated relative to the fee for managing the investment portfolio of the sub-fund when it was launched.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.6 Bestaan van fee sharing agreements en rebates'.

2.4.7. Notes to the financial statements and other data

Fee for managing the investment portfolio	max. 0.20 EUR	per unit per year, as described below. The management fee is payable at the end of each month.
Administration fee	max. 0.01 EUR	per unit per year, based on the number of units issued at the start of each six-month period and is payable at the end of each month.
Fee for financial services	Max 950 EUR	per year. However, the fee will never exceed a maximum of 0.005% calculated on the basis of the average total net assets of the sub-fund.
Custodian's fee	max. 0.05%	per year and calculated monthly on the basis of the value of the securities held in custody by the custodian on the last banking day of the preceding month, except on those assets invested in underlying undertakings for collective Investment managed by a financial institution of the KBC group.
Fee paid to the bevek's statutory auditor	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges' for this structured sub-fund.	
Fee paid to the directors	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Other charges (estimation) such as the regulator's fees, the cost of publication and any marketing costs		* During the first year following the initial subscription period: 0.30% of the net assets of the sub-fund per year. * After that: 0.10% of the net assets of the sub-fund per year.

Fee for managing the investment portfolio

KBC Asset Management NV receives a fee for managing the sub-fund's investments. This fee consists of a varying amount of max. 0.2 EUR per unit per year (with a maximum of EUR per unit per year for risk management).

This fee, which is calculated every six months, is paid monthly on the last banking day of each month. It can change from one six-month period to the next, within the limits set out below, and is based on the number of units issued at the start of each six-month period.

In the calculation, account is taken of the difference between:

- the return generated by the investments described under *Permitted asset classes* at Maturity and
- the expenses borne by the sub-fund to achieve a potential return (see *Permitted 'swap' transactions*),
- after deducting the expected fixed and variable expenses of the sub-fund, as mentioned above.

Of this, KBC Fund Management Ltd. receives a fee of no more than 0.19 EUR per unit per year from KBC Asset Management NV for the intellectual management of the sub-fund. KBC Fund Management Ltd. is a wholly owned subsidiary of KBC Asset Management NV.

KBC Asset Management NV has informed the bevek that, if the objective to repay at least 97% of the initial subscription price of 10 EUR per share at Maturity is not achieved, KBC Asset Management NV may decide (but is not obliged to) to use the management fee it receives during the current financial year from the sub-fund – and possibly also from other sub-funds of the bevek – to cover this shortfall. This is not a guarantee from KBC Asset

Management NV, which may decide at any time and at its own discretion whether or not to use the management fee for this purpose.

KBC Asset Management NV or one of its subsidiaries has also been appointed manager of the SPVs in which the sub-fund may invest (see *Criteria the investments must meet*). KBC Asset Management NV or one of its subsidiaries, as the case may be, receives an annual fee from the relevant SPVs for their management. This management fee may not exceed 0.15% per year and is calculated on the assets managed at the end of the quarter.

The sum of (i) the fee for managing the investment portfolio that the sub-fund pays to the management company and (ii) the management fee that the SPVs in which the sub-fund invests pay to the asset manager, shall never exceed 0.20 EUR per unit per year, as described above.

2.1.2. Stock exchange listing

Not applicable.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main object of the sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

The sub-fund invests directly or indirectly in various asset classes, such as shares and/or share-related investments, bonds and/or bond-related investments, money market instruments, cash and/or alternative investments (including real estate, and financial instruments that are linked to price movements on the commodity market).

The target allocation for the asset classes is 30% shares and/or share-related investments ('the stock component') and 70% bonds and/or bond-related investments ('the bond component').

The target allocation may be deviated from in line with the investment strategy of KBC Asset Management NV (see www.kbc.be/investment-strategy). It is therefore possible for the sub-fund to invest in asset classes that are not included in the target allocation. The portfolio systematically contains more bonds than shares.

The stock component is invested in a worldwide selection of shares that may come from any region, sector or theme.

For details of the bond component, please see the 'Characteristics of the bonds and debt instruments' section below.

The fund is actively managed with reference to the following benchmark: 35% JP Morgan EMU Government Bonds Investment Grade ALL Maturities - Total Return Index, 35% iBoxx Euro Corporate bonds Total Return Index, 30% MSCI All Countries World - Net Return Index.

However, is not the aim of the fund to replicate the benchmark. The composition of the benchmark is taken into account when compiling the portfolio.

The composition of the portfolio will to a large extent be similar to that of the benchmark.

The benchmark is also used to assess the performance of the sub-fund.

The benchmark is also used to determine the fund's risk limitation mechanism. This limits the extent to which the fund's return may deviate from the benchmark.

The longterm expected tracking error for this fund is 1.50%. The tracking error measures the volatility of the fund's return relative to that of the benchmark. The higher the tracking error, the more the fund's return fluctuates relative to the benchmark. Market conditions may cause the actual tracking error to differ from the expected tracking error.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

Transparency of adverse sustainability impacts:

The sub-fund considered the principal adverse impacts of its investment decisions on sustainability factors ('PAI') as described by the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector ('SFDR').

The principal adverse impacts on sustainability factors were explicitly taken into account through the General exclusion policy. More information on the principal adverse impact indicators that are taken into account can be found at www.kbc.be/investment-legal-documents > General exclusion policy for conventional and Responsible Investing funds and www.kbc.be/investment-legal-documents > Exclusion policies for Responsible Investing funds.

In addition, the principal adverse impacts on sustainability factors were implicitly taken into account through the Proxy Voting and Engagement Policy of KBC Asset Management NV (more information can be found at www.kbc.be/investment-legal-documents > Retrospective Proxy Voting - overview > Proxy Voting and Engagement Policy).

Characteristics of the bonds and debt instruments

The sub-fund invests in bonds and debt instruments issued by both companies and public authorities.

The sub-fund invests directly and/or indirectly at least 50% of its assets in bonds and debt instruments

- in securities rated investment grade (at least BBB-/Baa3 for long-term debt, A3/F3/P3 for short-term debt) by at least one of the following rating agencies: Moody's Investors Service, Standard & Poor's or Fitch Ratings, and/or
- in government bonds issued in local currency or non-subordinated corporate bonds* which do not have a credit rating from the rating agencies mentioned above but the issuer of which has an investment grade rating by at least one of the rating agencies mentioned above, and/or
- in money market instruments whose issuer has an investment grade rating (minimum A3/F3/P3 for short-term debt) from at least one of the above rating agencies.

This means that the sub-fund may invest up to 50% of its assets invested in bonds and debt instruments that do not have a credit rating from the above-mentioned rating agencies and/or which do not comply with the above-mentioned credit requirements.

All maturities are taken into consideration in the selection of bonds and debt instruments.

*In the event of the bankruptcy of the relevant issuer, subordinated bonds are subordinated to the company's other debts: the company's other debts are paid first, then and only if there is still capital left, the holders of the subordinated bonds are fully or partially repaid; the holder of the subordinated bond does, however, have priority over the shareholders of the issuer in question.

Investments in assets other than securities or money market instruments

The sub-fund will invest primarily in units of undertakings for collective investment.

Securities Financing Transactions (SFTs)

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.1. Securities Financing Transactions (SFTs)'.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'.

2.1.4. Financial portfolio management

The intellectual management, with the exception of the creation of the sub-fund and its maintenance in terms of the technical, product-specific and legal aspects has been delegated by the management company to KBC Fund Management Limited, 4th Floor, Scotch House, 6/7 Burgh Quay, Dublin 2, D02 VK44, Ireland.

2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2.1.6. Index and benchmark

See 'Sub-fund's investment policy'.

2.1.7. Policy pursued during the financial year

Following weekly strategy of KBC AM

2.1.8. Future policy

The future investment policy of the fund will be determined by the KBCAM NV investment strategy in anticipation of, and response to, financial markets movements

2.1.9. Summary risk indicator (SRI)

Comfort Portfolio Shares: 3 on a scale of 1 (lowest risk) to 7 (highest risk)

- a moderate level of inflation risk: the bond component does not provide any protection against an increase in inflation.
- a moderate level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a real chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of credit risk: the bond component invests primarily - but not exclusively- in bonds with an investment grade rating. Consequently, the risk that an issuer can no longer meet its obligations is higher than in an investment that consists only of bonds with an investment grade rating. If investors are in doubt about the creditworthiness of the issuers of the bonds, the value of those bonds can fall.
- a moderate level of market risk: the level of the risk reflects the volatility of the equity component.
- a moderate level of performance risk: the level of the risk reflects the volatility of the equity component.

There is no capital protection.

Classic Shares CSOB Private Banking: 3 on a scale of 1 (lowest risk) to 7 (highest risk)

There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

2.1.10. Leveraged finance

The total amount of leveraged finance used by the sub-fund is 0.00 EUR.

This amount was calculated by multiplying the leverage ratio calculated using the UCITS-commitment method by the sub-fund's total assets under management.

2.1.11. Value-at-Risk

The internal classification system, on the basis of which this sectoral spread is calculated, has been changed as of 31/12/2023. In order to provide a meaningful comparison of the sectoral spread across reporting periods, the sectoral spread calculations will be de-duplicated in the annual reports. This means that a summary table will be shown for each classification system.

Currency breakdown (as a % of net assets)

The currency distribution of the sub-fund's investments is calculated based on the currency distribution of the underlying investments of the UCIs in which the sub-fund invests (look through).

2.4.2. Changes in the composition of the assets of Horizon KBC Defensive (in Euro)

	1 st half of year	2 nd half of year	Year
Purchases	77,865,140.93	88,886,041.47	166,751,182.40
Sales	133,191,338.43	144,746,502.98	277,937,841.40
Total 1	211,056,479.36	233,632,544.45	444,689,023.80
Subscriptions	18,691,590.20	17,214,110.75	35,905,700.95
Redemptions	69,114,434.95	54,144,070.82	123,258,505.77
Total 2	87,806,025.15	71,358,181.57	159,164,206.72
Monthly average of total assets	1,084,302,514.97	1,088,609,634.83	1.086.500.025.10
Turnover rate	11.37%	14.91%	26.28%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period. A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions. A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio. Active asset management may result in high turnover rates (monthly percentage >50%).

The detailed list of transactions can be consulted free of charge at the company designated as financial service: KBC Bank NV, Havenlaan 2, B-1080 Brussels

2.4.3. Amount of commitments in respect of financial derivatives positions

Risk warning: Past performance is not a guide to future performance.

* Return on annual basis.

Comfort Portfolio Shares

- The bar chart shows the performance for full financial years.
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage. In the case of units that pay dividends, the dividend is incorporated geometrically in the return.
- Calculation method for date D, where NAV stands for net asset value:

Capitalisation units (CAP)

Return on date D over a period of X years :

$$[\text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[\text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

Distribution units (DIV)

Return on date D over a period of X years :

$$[C * \text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[C * \text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

where C is a factor that is determined for all N dividends between the calculation date D and the reference date.

For dividend i on date Di with value Wi:

$$C_i = [\text{Wi} / \text{NIW}(D_i)] + 1$$

i = 1 ... N

from which C = C0 * * CN.

- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation and distribution shares

Dividend on ex-dividend date 28/03/2025: 15,2841 net (21,8345 gross).

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

2.1.2. Stock exchange listing

Not applicable.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

The sub-fund sets out to achieve the highest possible return by investing in line with the investment view of KBC Asset Management NV (see www.kbc.be/investment-view). To this end, the fund invests directly or indirectly in various asset classes, such as shares and/or share-related investments ('equity component'), bonds and/or bond-related investments ('bond component'), money market instruments, cash and cash equivalents, and/or alternative investments (including real estate and financial instruments that are linked to price movements on commodity markets).

The target allocation for the asset classes is 30% for the equity component and 70% for the bond component. This allocation may be significantly deviated from in line with the investment view of KBC Asset Management NV, as illustrated below.

Therefore, the sub-fund may invest a sizeable portion of its assets in asset classes that are not included in the target allocation (such as money market instruments and cash). The equity component can amount to a maximum of 45% of the sub-fund.

When applying KBC Asset Management NV's investment view, the management bases their investment decisions on the analysis of the financial and economic developments and prospects for specific regions, sectors and themes. If conditions on the financial markets are uncertain, volatile or both, part of the portfolio can also be converted into investments with a lower level of risk (such as money market instruments and cash). If the equity component outperforms the bond component, or vice versa, the managers can likewise use part of the portfolio to buy additional assets in the best-performing of these two classes and sell assets in the worst-performing one.

When applying KBC Asset Management NV's investment view, the managers pay twice as much attention to the downside risk as to the upside potential. The more attention that is paid to downside risk, the larger the portion of the portfolio that can be converted into investments with a lower level of risk, such as cash and money market instruments, in times of uncertain and/or volatile markets. This part of the portfolio will ultimately amount to between 40% and 80% of the assets. This limit is indicative and may be reviewed annually based on the long-term trend of the financial markets. Any change to this indicative limit does not imply a change in the strategy of the sub-fund. However, under certain market conditions, the sub-fund's assets will not be invested in these asset classes in accordance with the pre-set target allocation.

The equity component is invested in a worldwide selection of shares that may come from any region, sector or theme.

For details of the bond component, please see the 'Characteristics of the bonds and debt instruments' section below.

The fund is actively managed without referring to any benchmark.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

Transparency of adverse sustainability impacts:

The sub-fund considers the principal adverse impacts of its investment decisions on sustainability factors ('PAI') as described by the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector ('SFDR').

The principal adverse impacts on sustainability factors were explicitly taken into account through the General exclusion policy. More information on the principal adverse impact indicators that are taken into account can be found at www.kbc.be/investment-legal-documents > General exclusion policy for conventional and Responsible Investing funds and www.kbc.be/investment-legal-documents > Exclusion policies for Responsible Investing funds.

In addition, the principal adverse impacts on sustainability factors were implicitly taken into account through the Proxy Voting and Engagement Policy of KBC Asset Management NV (more information can be found at www.kbc.be/investment-legal-documents > Retrospective Proxy Voting - overview > Proxy Voting and Engagement Policy).

Characteristics of the bonds and debt instruments

The sub-fund invests in bonds and debt instruments issued by both companies and public authorities.

The sub-fund invests directly and/or indirectly at least 50% of its assets in bonds and debt instruments

- in securities rated investment grade (at least BBB-/Baa3 for long-term debt, A3/F3/P3 for short-term debt) by at least one of the following rating agencies: Moody's Investors Service, Standard & Poor's or Fitch Ratings, and/or
- in government bonds issued in local currency or non-subordinated corporate bonds* which do not have a credit rating from the rating agencies mentioned above but the issuer of which has an investment grade rating by at least one of the rating agencies mentioned above, and/or
- in money market instruments whose issuer has an investment grade rating (minimum A3/F3/P3 for short-term debt) from at least one of the above rating agencies.

This means that the sub-fund may invest up to 50% of its assets invested in bonds and debt instruments that do not have a credit rating from the above-mentioned rating agencies and/or which do not comply with the above-mentioned credit requirements.

All maturities are taken into consideration in the selection of bonds and debt instruments.

*In the event of the bankruptcy of the relevant issuer, subordinated bonds are subordinated to the company's other debts: the company's other debts are paid first, then and only if there is still capital left, the holders of the subordinated bonds are fully or partially repaid; the holder of the subordinated bond does, however, have priority over the shareholders of the issuer in question.

Investments in assets other than securities or money market instruments

The sub-fund will invest primarily in units of undertakings for collective investment.

Securities Financing Transactions (SFTs)

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.1. Securities Financing Transactions (SFTs)'.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'.

2.1.4. Financial portfolio management

The intellectual management, with the exception of the creation of the sub-fund and its maintenance in terms of the technical, product-specific and legal aspects has been delegated by the management company to KBC Fund Management Limited, 4th Floor, Scotch House, 6/7 Burgh Quay, Dublin 2, D02 VK44, Ireland.

2.1.8. Future policy

We refer to the General information on the SICAV of this report under '1.2.2. General overview of the markets' for an overview of the outlook.

2.1.9. Summary risk indicator (SRI)

Classic Shares: 3 on a scale of 1 (lowest risk) to 7 (highest risk)

- a moderate level of inflation risk: the bond component does not provide any protection against an increase in inflation.
- a moderate level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a real chance that the value of an investment will be affected by movements in exchange rates.

- a moderate level of credit risk: the bond component invests primarily - but not exclusively- in bonds with an investment grade rating. Consequently, the risk that an issuer can no longer meet its obligations is higher than in an investment that consists only of bonds with an investment grade rating. If investors are in doubt about the creditworthiness of the issuers of the bonds, the value of those bonds can fall.
- a moderate level of market risk: the level of the risk reflects the volatility of the equity component.
- a moderate level of performance risk: the level of the risk reflects the volatility of the equity component.

There is no capital protection.

Comfort Portfolio Shares: 3 on a scale of 1 (lowest risk) to 7 (highest risk)

- a moderate level of inflation risk: the bond component does not provide any protection against an increase in inflation.
- a moderate level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a real chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of credit risk: the bond component invests primarily - but not exclusively- in bonds with an investment grade rating. Consequently, the risk that an issuer can no longer meet its obligations is higher than in an investment that consists only of bonds with an investment grade rating. If investors are in doubt about the creditworthiness of the issuers of the bonds, the value of those bonds can fall.
- a moderate level of market risk: the level of the risk reflects the volatility of the equity component.
- a moderate level of performance risk: the level of the risk reflects the volatility of the equity component.

There is no capital protection.

Institutional F shares BG EUR: 3 on a scale of 1 (lowest risk) to 7 (highest risk)

- a moderate level of inflation risk: the bond component does not provide any protection against an increase in inflation.
- a moderate level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a real chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of credit risk: the bond component invests primarily - but not exclusively- in bonds with an investment grade rating. Consequently, the risk that an issuer can no longer meet its obligations is higher than in an investment that consists only of bonds with an investment grade rating. If investors are in doubt about the creditworthiness of the issuers of the bonds, the value of those bonds can fall.
- a moderate level of market risk: the level of the risk reflects the volatility of the equity component.
- a moderate level of performance risk: the level of the risk reflects the volatility of the equity component.

There is no capital protection.

Institutional F shares BG BGN: 3 on a scale of 1 (lowest risk) to 7 (highest risk)

- a moderate level of inflation risk: the bond component does not provide any protection against an increase in inflation.
- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Bulgarian Leva, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of credit risk: the bond component invests primarily - but not exclusively- in bonds with an investment grade rating. Consequently, the risk that an issuer can no longer meet its obligations is higher than in an investment that consists only of bonds with an investment grade rating. If investors are in doubt about the creditworthiness of the issuers of the bonds, the value of those bonds can fall.
- a moderate level of market risk: the level of the risk reflects the volatility of the equity component.
- a moderate level of performance risk: the level of the risk reflects the volatility of the equity component.

There is no capital protection.

Comfort Shares: 3 on a scale of 1 (lowest risk) to 7 (highest risk)

- a moderate level of performance risk: the level of the risk reflects the volatility of the equity component.

There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

2.1.10. Leveraged finance

The total amount of leveraged finance used by the sub-fund is 47 456 470.11 EUR.

This amount was calculated by multiplying the leverage ratio calculated using the UCITS-commitment method by the sub-fund's total assets under management.

2.1.11. Value-at-Risk

Not applicable

Sector breakdown (as a % of securities portfolio)

The sectoral distribution of the sub-fund's investments is calculated based on the sectoral distribution of the underlying investments of the UCIs in which the sub-fund invests (look through).

The internal classification system, on the basis of which this sectoral spread is calculated, has been changed as of 31/12/2023. In order to provide a meaningful comparison of the sectoral spread across reporting periods, the sectoral spread calculations will be de-duplicated in the annual reports. This means that a summary table will be shown for each classification system.

Currency breakdown (as a % of net assets)

The currency distribution of the sub-fund's investments is calculated based on the currency distribution of the underlying investments of the UCIs in which the sub-fund invests (look through).

2.4.2. Changes in the composition of the assets of Horizon KBC Defensive Balanced (in Euro)

	1 st half of year	2 nd half of year	Year
Purchases	1,110,145,516.23	551,874,571.06	1,662,020,087.29
Sales	1,199,564,541.42	666,000,061.85	1,865,564,603.27
Total 1	2,309,710,057.65	1,217,874,632.91	3,527,584,690.56
Subscriptions	19,981,621.26	18,900,377.10	38,881,998.36
Redemptions	93,722,524.70	104,940,712.95	198,663,237.65
Total 2	113,704,145.96	123,841,090.05	237,545,236.01
Monthly average of total assets	1,678,449,172.89	1,657,457,846.82	1,667,737,549.71
Turnover rate	130.84%	66.01%	197.28%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period. A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions. A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio. Active asset management may result in high turnover rates (monthly percentage >50%), reason: This is a model-driven ExpertEase fund whose targets change daily. On any day, the fund could trade in case of significant deviation between current and target allocation; this is typically done via futures intra-month. On a monthly basis, the fund also implements new models if any, and may fully rebalance whenever needed with the corresponding closure of futures positions. On any day, the need to cover inflows or outflows outside of normal ranges may cause trading. Finally, FX transactions are needed from time to time as not all holdings are EUR-denominated.

The detailed list of transactions can be consulted free of charge at the company designated as financial service: KBC Bank NV, Havenlaan 2, B-1080 Brussels

2.4.3. Amount of commitments in respect of financial derivatives positions

Risk warning: Past performance is not a guide to future performance.

* Return on annual basis.

Classic Shares

- The bar chart shows the performance for full financial years.
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage. In the case of units that pay dividends, the dividend is incorporated geometrically in the return.
- Calculation method for date D, where NAV stands for net asset value:

Capitalisation units (CAP)

Return on date D over a period of X years :

$$[\text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[\text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

Distribution units (DIV)

Return on date D over a period of X years :

$$[C * \text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[C * \text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

where C is a factor that is determined for all N dividends between the calculation date D and the reference date.

For dividend i on date Di with value Wi:

$$C_i = [\text{Wi} / \text{NIW}(D_i)] + 1$$

i = 1 ... N

from which C = C0 * * CN.

- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation and distribution shares

Dividend on ex-dividend date 28/03/2025: 14,1817 net (20,2596 gross).

Comfort Portfolio Shares

- The bar chart shows the performance for full financial years.
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage. In the case of units that pay dividends, the dividend is incorporated geometrically in the return.
- Calculation method for date D, where NAV stands for net asset value:

Capitalisation units (CAP)

Return on date D over a period of X years :

$$[NIW(D) / NIW(Y)] ^ [1 / X] - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[NIW(D) / NIW(S)] ^ [1 / F] - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

Distribution units (DIV)

Return on date D over a period of X years :

$$[C * NIW(D) / NIW(Y)] ^ [1 / X] - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[C * NIW(D) / NIW(S)] ^ [1 / F] - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

where C is a factor that is determined for all N dividends between the calculation date D and the reference date.

For dividend i on date Di with value Wi:

$$Ci = [Wi / NIW(Di)] + 1$$

i = 1 ... N

from which C = C0 * * CN.

- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation and distribution shares

Dividend on ex-dividend date 28/03/2025: 15,2954 net (21,8506 gross).

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Beveik of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Beveik's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Beveik.

Financial derivatives on financial indices

The following financial indices were used as the underlying for financial derivatives::

The EURO STOXX 50® (Bloomberg code: SX5E Index) is a weighted equity index computed by Stoxx Ltd. The dividend is not reinvested. The main purpose of this index is to provide a continuous indication of market trends on the European stock markets. The base value of the index is 1000, calculated on the basis of the underlying prices recorded on 31 December 1991.

The Euro Stoxx 50® consists solely of shares from countries participating in the Economic and Monetary Union, with the exception of Luxembourg. On 10 April 1998, the following countries were included in the index: Belgium, Cyprus, Germany, Estonia, Finland, France, Greece, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, the Netherlands, Austria, Portugal, Slovakia, Slovenia and Spain.

The index consists of the 50 largest European shares in terms of shares that are freely negotiable, and the shares are accordingly weighted on the basis of this criterion.

The Euro Stoxx 50® is published daily in L'Echo, De Tijd, The Financial Times and The Wall Street Journal Europe.

Stoxx Limited has all proprietary rights with respect to the index. In no way Stoxx Limited endorses, sponsors or is otherwise involved in the issue and offering the shares of Horizon KBC Defensive Balanced. Stoxx Limited disclaims any liability for the issue and offering of the shares of this undertaking for collective investment.

The **FTSE 100** is an equity index computed by the Financial Times Ltd. The dividend is not reinvested. It comprises 100 shares. The FTSE 100 serves primarily as a continuous indicator of market trends on the UK stock market. The value of the FTSE 100 is based on the market value of the shares of 100 companies listed on the London Stock Exchange. These are the companies with the biggest market capitalisation, and the shares are weighted accordingly. The base value of the index is 1000, calculated on the basis of the underlying prices recorded on 3 January 1984.

The FTSE 100 is published daily in the leading financial newspapers, i.e. The Financial Times and The Wall Street Journal Europe. In Belgium, the index is published in De Tijd and L'Echo.

Financial Times Ltd has all proprietary rights with respect to the index. In no way Financial Times Ltd endorses, sponsors or is otherwise involved in the issue and offering the shares of this undertaking for collective investment. Financial Times Ltd disclaims any liability for the issue and offering of the shares of this undertaking for collective investment.

The **Nikkei 225** is an equity index computed by Nikkei, Inc. The dividend is not reinvested. It comprises 225 shares. The Nikkei 225 serves primarily as a continuous indicator of market trends on the Japanese stock market. The value of the Nikkei 225 is based on the market value of the shares of 225 companies. These are the 225 leading and most liquid shares on the first section of the Tokyo Stock Exchange. The index was launched on 16 May 1949, with a base value of 176.21.

The Nikkei 225 is published daily in the leading financial newspapers, i.e. The Financial Times and The Wall Street Journal Europe. In Belgium, the index is published in De Tijd and L'Echo.

Nikkei, Inc has all proprietary rights with respect to the index. In no way Nikkei, Inc endorses, sponsors or is otherwise involved in the issue and offering the shares of this undertaking for collective investment. The **S&P 500** is an equity index computed by Standard & Poor's that is made up of 500 shares. The dividend is not reinvested. The S&P 500 serves primarily as a continuous indicator of market trends on the US stock markets. The value of the S&P 500 index is calculated on the basis of the market value of the shares of 500 companies at a given point in time, compared to the market value of the shares of 500 similar companies during the reference period from 1941 to 1943. The index is published daily in L'Echo, De Tijd, The Financial Times and The Wall Street Journal Europe.

Standard & Poor's has all proprietary rights with respect to the index. In no way Standard & Poor's endorses, sponsors or is otherwise involved in the issue and offering the shares of this undertaking for collective investment. Standard & Poor's disclaims any liability for the issue and offering of the shares of this undertaking for collective investment.

The value and, if available for distribution, the composition of the aforementioned financial indices may be obtained from the branches providing the financial service.

Not applicable.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. **Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk.** In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

The sub-fund sets out to achieve the highest possible return by investing in line with the investment view of KBC Asset Management NV (see www.kbc.be/investment-view). To this end, the fund invests directly or indirectly in various asset classes, such as shares and/or share-related investments ('stock component'), bonds and/or bond-related investments ('bond component'), money market instruments, cash and cash equivalents, and/or alternative investments (including real estate and financial instruments that are linked to price movements on commodity markets).

The target allocation for the asset classes is 30% for the stock component and 70% for the bond component.

This allocation may be significantly deviated from in line with the investment view of KBC Asset Management NV, as illustrated below.

Therefore, the sub-fund may invest a sizeable portion of its assets in asset classes that are not included in the target allocation (such as money market instruments and cash). The stock component may comprise up to 45% of the sub-fund.

When applying KBC Asset Management NV's investment view, the management bases their investment decisions on the analysis of the financial and economic developments and prospects for specific regions, sectors and themes. If conditions on the financial markets are uncertain, volatile or both, part of the portfolio may also be converted into investments with a lower level of risk (such as money market instruments and cash). If the stock component outperforms the bond component, or vice versa, the managers may likewise use part of the portfolio to buy additional assets in the best-performing of these two classes and sell assets in the worst-performing one.

When applying KBC Asset Management NV's investment view, the managers pay twice as much attention to the downside risk as to the upside potential. The more attention that is paid to downside risk, the larger the portion of the portfolio that may be converted into investments with a lower level of risk, such as cash and money market instruments, in times of uncertain and/or volatile markets. This part of the portfolio will ultimately amount to between 40% and 80% of the assets. This limit is indicative and may be reviewed annually based on the long-term trend of the financial markets. Any change to this indicative limit does not imply a change in the strategy of the sub-fund. However, under certain market conditions, the sub-fund's assets will not be invested in these asset classes in accordance with the pre-set target allocation.

Information related to Responsible Investing

Within the above limits, the sub-fund pursues (directly or indirectly) responsible investment objectives based on a dualistic approach: a negative screening and a positive selection methodology.

KBC Asset Management NV has a team of specialist researchers responsible for this dualistic approach. They are assisted by an independent advisory board (the "**Responsible Investing Advisory Board**") comprised of up to twelve persons, who are not affiliated to KBC Asset Management NV, and whose sole responsibility is to supervise the dualistic approach and activities of the specialist researchers. The secretariat of the advisory board is handled by a representative of KBC Asset Management NV. Moreover, KBC Asset Management NV works with data suppliers with expertise in Responsible Investing that provide data to the specialized researchers, who process and complete the data with publicly available information (including annual reports, press publications, etc.).

The sub-fund promotes a combination of environmental and/or social characteristics and, even though it does not have sustainable investments as an objective, it shall invest a minimum proportion of its assets in economic activities that contribute to the achievement of environmental or social objectives (i.e. 'sustainable investments').

The issuers in which it invests must follow good governance practices.

The sub-fund is compliant with the transparency obligations of article 11 (1) of Regulation (EU) 2019/2088 of the European Parliament and of the council of 27 November 2019 on sustainability-related disclosures in the financial services sector ('SFDR'). More information on how the sub-fund promotes environmental and social characteristics can be found in the 'Annex for Horizon KBC Defensive Balanced Responsible Investing' of this annual report. This annex specifically covers the periodic reports for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852.

Negative screening

In practical terms the end result of this negative screening procedure is that the sub-fund excludes issuers in advance from the Responsible Investment universe which fall foul of the exclusion policy available on www.kbc.be/investment-legal-documents > Exclusion policy for Responsible Investing funds.

The application of these policies means that issuers involved in such activities like the tobacco industry, weapons, gambling and adult entertainment are excluded from the sub-fund's investment universe. This screening also ensures that issuers who seriously violate fundamental principles of environmental protection, social responsibility and good governance are excluded from the sub-fund's investment universe.

These negative screening principles are not exhaustive and may be adapted from time to time under the supervision of the Responsible Investing Advisory Board.

Positive selection methodology

Within the defined investment universe and other limits described above, the responsible investment objectives of the sub-fund are the following:

- (1) promote the integration of sustainability into the policy decisions of issuers (companies, governments, supranational debtors and/or agencies linked to governments), by preferring issuers with a better **ESG (risk)score**, where ESG stands for 'Environmental, Social and Governance', and
- (2) promote climate change mitigation, by preferring issuers with lower **Greenhouse Gas Intensity**, with the objective of meeting a predetermined Greenhouse Gas intensity target;

(3) support sustainable development, through 'sustainable investments' in accordance with art. 2(17) SFDR. Sustainable investments will consist of **bonds financing green and/or social projects** (3.1) and investments in issuers contributing to the achievement of the **UN Sustainable Development Goals** (3.2). However, no binding minimum percentage has been set for this latter category, although it contributes to the achievement of the minimum percentage of 'sustainable investments' for this sub-fund.

More information on the investment policy for Responsible Investing funds is available at www.kbc.be/investment-legal-documents > Investment policy for Responsible Investing funds.

(1) ESG-(risk)score

The contribution to the integration of sustainability into policy decisions of the issuers is measured based on an ESG (risk) score. For companies, an ESG risk score is assigned, for countries an ESG score. This score represents the aggregated performance assessment of a given issuer against a series of ESG criteria which are grounded to the extent possible against objective measures. The main factors underpinning the ESG criteria are:

- In the case of instruments issued by companies:
 - respect for the environment (e.g., reduction in greenhouse gas emissions);
 - attention to society (e.g., employee working conditions); and
 - corporate governance (e.g., independence and diversity of the board of directors).

At least 90% of the corporate investments in the portfolio, as measured by assets under management, must have an ESG risk score. The ESG risk score for companies is an ESG risk score supplied by a data provider.

- In the case of instruments issued by national governments, supranational debtors and/or agencies linked to governments, the following five pillars are used
 - overall economic performance and stability (e.g., quality of institutions and government);
 - socio-economic development and health of the population (e.g., education and employment);
 - equality, freedom and the rights of all citizens;
 - environmental policy (e.g., climate change); and
 - security, peace and international relations.

These lists are not exhaustive and may be changed under the supervision of the Responsible Investing Advisory Board.

KBC Asset Management NV assigns an ESG score to at least 90 % of the investments in countries within the portfolio, as measured by assets under management.

To achieve this objective, the ESG-risk score of the portfolio for companies is compared to a reference portfolio determined on the basis of the above-mentioned target spread.

The ESG score for countries of the portfolio is compared to a reference portfolio of global government bonds (composed of the following benchmarks: 67% developed markets: J.P. Morgan GBI Global Unhedged EUR and 33% emerging markets: J.P. Morgan GBI-EM Global Diversified Composite Unhedged EUR).

To calculate the ESG-(risk)score at portfolio level, the weighted average of the ESG-(risk)scores of the positions in the sub-fund are taken into account. Technical items such as cash and derivatives are not taken into account and also companies or countries for which no data is available are left out. The weights used in the calculation depend on the size of the positions in the sub-fund, rescaled for these items.

More information on the ESG-(risk)score and the concrete goals of the sub-fund can be found in the 'Annex for Horizon KBC Defensive Balanced Responsible Investing' to the prospectus.

The targets can be revised upwards or downwards.

(2) Greenhouse Gas Intensity

The objective to promote climate change mitigation, by favoring lower greenhouse gas intensity issuers, with the goal of meeting a predetermined greenhouse gas intensity target covers at least 90% of the portfolio. The objective does not apply to issuers for which data is not available.

The contribution of issuers to climate change mitigation is measured based on their greenhouse gas intensity. For companies, greenhouse gas intensity is defined as absolute greenhouse gas emissions (in tonnes CO₂ equivalent), divided by revenues (in mln USD). For countries, it is defined as the greenhouse gas emissions (in tonnes CO₂ equivalent), divided by the Gross Domestic Product (in mln USD).

The targets for instruments issued by companies are different from those for instruments issued by national governments, supranational debtors and/or government-linked agencies.

More information on Greenhouse Gas Intensity and the concrete goals of the sub-fund can be found in the 'Annex for Horizon KBC Defensive Balanced Responsible Investing' to the prospectus.

The targets may be revised upwards or downwards.

(3) Sustainable investments

(3.1) Bonds financing green and/or social projects

To encourage the transition to a more sustainable world, the sub-fund commits to invest a minimum proportion of the portfolio in bonds financing green and/or social projects. Bonds whose proceeds will be used exclusively to finance (a combination of) green and social projects that are aligned with the International Capital Market

Association (ICMA) Green Bond Principles and Social Bond Principles on the Use of Proceeds are considered bonds financing green and/or social projects. Compliance with these principles is verified by an external party. Instruments that meet these requirements are labelled 'sustainable investments', in line with article 2(17) SFDR. More information on bonds financing green and/or social projects and the concrete goals of the sub-fund can be found in the 'Annex for Horizon KBC Defensive Balanced Responsible Investing' to the prospectus. The targets may be revised upwards or downwards.

(3.2) UN Sustainable Development Goals

To support sustainable development, the sub-fund can invest part of its portfolio in issuers that contribute to the UN Sustainable Development Goals. The UN Sustainable Development Goals include both social and environmental objectives.

Companies are considered to contribute to sustainable development when at least 20% of the revenues are linked to the UN Sustainable Development Goals. The activities of the companies are assessed on multiple sustainable themes that can be linked to the UN Sustainable Development Goals.

Governments are assessed on the five pillars as described in the ESG score, which contain indicators that can be linked to the 17 UN Sustainable Development Goals. If a government scores sufficiently well on one of these pillars and not significantly poor on the other pillars, the bonds of this government and its sub-governments and agencies are considered to be instruments that contribute to sustainable development. Bonds of supranational governments contribute to the UN's Sustainable development goals if one of the two criteria is met:

- at least half of its members contribute to the UN Sustainable Development Goals (weighted by voting power/full paid-in capital/percentage of population (in order of availability)).
- the mission statement of the supranational institution has a sustainable objective and less than half of its members fall in the worst half of the screening for controversial regimes.

Instruments of issuers that meet these requirements are designated as "sustainable investments," according to Article 2(17) SFDR. In addition, the Responsible Investing Advisory Board can award the "sustainable development" label to instruments of companies and governments. In that case, these investments shall also qualify as "sustainable investments," according to Article 2(17) SFDR. However, the awarding of the 'sustainable development' label by the Responsible Investing Advisory Board to instruments of governments is very exceptional.

More information about the methodology used to qualify investments as investments which contribute to the UN Sustainable Development Goals can be found in the 'Annex for Horizon KBC Defensive Balanced Responsible Investing' to the prospectus.

Potential Exceptions

It cannot be ruled out, however, that very limited investments may be made temporarily in assets that do not meet the above criteria. The reasons for this include the following:

- Developments as a result of which an issuer can no longer be regarded as eligible after purchase;
- Corporate events, such as a merger of one company with another, where the merged company can no longer be considered an eligible issuer based on the above criteria;
- Incorrect data as a result of which assets are invested (unintentionally and erroneously) in assets purchased when it should not have been eligible for the sub-fund;
- A planned update of the screening criteria as a result of which assets should be excluded from the sub-fund, but which the management company chooses to refrain from selling immediately in the best interest of the customer;
- External circumstances such as market movements and updates of external data can lead to investment solutions failing to achieve the abovementioned targets.

In these cases, the fund manager will replace the assets concerned with more appropriate assets as soon as possible, always taking into account the sole interest of the investor.

In addition, for the purpose of efficient portfolio management, the fund manager may to a significant degree use derivatives relating to assets issued by issuers that would not be eligible for inclusion in the sub-fund, in so far as there is no serviceable and comparable alternative available on the market. In addition, the counterparties with which the derivative transactions are entered into may not necessarily be issuers having a responsible nature.

The stock component is invested in a worldwide selection of shares that may come from any region, sector or theme.

For details of the bond component, please see the 'Characteristics of the bonds and debt instruments' section below.

The fund is actively managed without referring to any benchmark.

The responsible character is guaranteed by the aforementioned Responsible Investing methodology.

Taxonomy related information

At the date of this prospectus, the sub-fund does not commit to invest a minimum proportion of its assets in environmentally sustainable economic activities which contribute to any of the environmental objectives set out in Article 9 of the Regulation (EU) 2020/852 of the European Parliament and of the Council of 18 June 2020 on the establishment of a framework to facilitate sustainable investment ('EU Taxonomy Framework'). The minimum proportion of investments in environmentally sustainable economic activities within the meaning of the EU Taxonomy Framework is 0%. This will be monitored on a regular basis and as soon as sufficiently reliable, timely and verifiable data from issuers or invested companies is available, the prospectus may be updated.

Companies are considered to contribute to sustainable development if at least 20% of sales are linked to the UN Sustainable Development Goals. This includes companies with at least 20% of sales aligned to the EU Taxonomy Framework based on Trucost data. Instruments of companies that meet these requirements are referred to as "sustainable investments," according to art. 2(17) SFDR. More information on the percentage in the portfolio that was considered "sustainable investments with an environmental objective aligned with the EU Taxonomy Framework " based on this criterion during the reporting period, can be found in the annual reports for this sub-fund published after Jan. 1, 2024.

More information on the EU Taxonomy Framework can be found in the 'Annex for Horizon KBC Defensive Balanced Responsible Investing' to the prospectus.

Transparency of adverse sustainability impacts:

The sub-fund considers the principal adverse impacts of its investment decisions on sustainability factors by taking into account the principal adverse impact indicators ('PAI'), as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability disclosure in the financial services sector ('SFDR').

The principal adverse impacts on sustainability factors were explicitly taken into account through the general exclusion policy for conventional funds and Responsible Investing funds and the exclusion policy for Responsible Investing funds. The principal adverse impacts on sustainability factors that were taken into account through the exclusion policies can be found in the 'Annex for Horizon KBC Defensive Balanced Responsible Investing'.

The principal adverse impacts on sustainability factors were implicitly taken into account through the Proxy Voting and Engagement Policy. The principal adverse impacts on sustainability factors that were taken into account through the Proxy Voting and Engagement Policy can be found in the 'Annex for Horizon KBC Defensive Balanced Responsible Investing'.

More information on how the sub-fund aims to consider the principal adverse impacts on sustainability factors can also be found in the 'Annex for Horizon KBC Defensive Balanced Responsible Investing'.

Characteristics of the bonds and debt instruments

The sub-fund invests in bonds and debt instruments issued by both companies and public authorities.

The sub-fund invests directly and/or indirectly at least 50% of its assets in bonds and debt instruments

- in securities rated investment grade (at least BBB-/Baa3 for long-term debt, A3/F3/P3 for short-term debt) by at least one of the following rating agencies: Moody's Investors Service, Standard & Poor's or Fitch Ratings, and/or
- in government bonds issued in local currency or non-subordinated corporate bonds* which do not have a credit rating from the rating agencies mentioned above but the issuer of which has an investment grade rating by at least one of the rating agencies mentioned above, and/or
- in money market instruments whose issuer has an investment grade rating (minimum A3/F3/P3 for short-term debt) from at least one of the above rating agencies.

This means that the sub-fund may invest up to 50% of its assets invested in bonds and debt instruments that do not have a credit rating from the above-mentioned rating agencies and/or which do not comply with the above-mentioned credit requirements.

All maturities are taken into consideration in the selection of bonds and debt instruments.

*In the event of the bankruptcy of the relevant issuer, subordinated bonds are subordinated to the company's other debts: the company's other debts are paid first, then and only if there is still capital left, the holders of the subordinated bonds are fully or partially repaid; the holder of the subordinated bond does, however, have priority over the shareholders of the issuer in question.

Investments in assets other than securities or money market instruments

The sub-fund will invest primarily in units of undertakings for collective investment.

Securities Financing Transactions (SFTs)

The sub-fund may not lend any financial instruments.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects

2.1.4. Financial portfolio management

The intellectual management, with the exception of the creation of the sub-fund and its maintenance in terms of the technical, product-specific and legal aspects has been delegated by the management company to KBC Fund Management Limited, 4th Floor, Scotch House, 6/7 Burgh Quay, Dublin 2, D02 VK44, Ireland.

2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2.1.6. Index and benchmark

Not applicable.

2.1.7. Policy pursued during the financial year

Following weekly strategy of KBC AM

2.1.8. Future policy

Following weekly strategy of KBC AM

2.1.9. Summary risk indicator (SRI)

Classic Shares: 3 on a scale of 1 (lowest risk) to 7 (highest risk)

- a moderate level of inflation risk: the bond component does not provide any protection against an increase in inflation.
- a moderate level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a real chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of credit risk: the bond component invests primarily - but not exclusively- in bonds with an investment grade rating. Consequently, the risk that an issuer can no longer meet its obligations is higher than in an investment that consists only of bonds with an investment grade rating. If investors are in doubt about the creditworthiness of the issuers of the bonds, the value of those bonds can fall.
- a moderate level of market risk: the level of the risk reflects the volatility of the equity component.
- a moderate level of performance risk: the level of the risk reflects the volatility of the equity component.

There is no capital protection.

Comfort Portfolio Shares: 3 on a scale of 1 (lowest risk) to 7 (highest risk)

- a moderate level of inflation risk: the bond component does not provide any protection against an increase in inflation.
- a moderate level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a real chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of credit risk: the bond component invests primarily - but not exclusively- in bonds with an investment grade rating. Consequently, the risk that an issuer can no longer meet its obligations is higher than in an investment that consists only of bonds with an investment grade rating. If investors are in doubt about the creditworthiness of the issuers of the bonds, the value of those bonds can fall.
- a moderate level of market risk: the level of the risk reflects the volatility of the equity component.
- a moderate level of performance risk: the level of the risk reflects the volatility of the equity component.

- a moderate level of performance risk: the level of the risk reflects the volatility of the equity component.

There is no capital protection.

Comfort Prime Shares: 3 on a scale of 1 (lowest risk) to 7 (highest risk)

- a moderate level of inflation risk: the bond component does not provide any protection against an increase in inflation.
- a moderate level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a real chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of credit risk: the bond component invests primarily - but not exclusively- in bonds with an investment grade rating. Consequently, the risk that an issuer can no longer meet its obligations is higher than in an investment that consists only of bonds with an investment grade rating. If investors are in doubt about the creditworthiness of the issuers of the bonds, the value of those bonds can fall.
- a moderate level of market risk: the level of the risk reflects the volatility of the equity component.
- a moderate level of performance risk: the level of the risk reflects the volatility of the equity component.

There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

2.1.10. Leveraged finance

The total amount of leveraged finance used by the sub-fund is 35 627 159.64 EUR.

This amount was calculated by multiplying the leverage ratio calculated using the UCITS-commitment method by the sub-fund's total assets under management.

2.1.11. Value-at-Risk

Not applicable

Sector breakdown (as a % of securities portfolio)

The sectoral distribution of the sub-fund's investments is calculated based on the sectoral distribution of the

underlying investments of the UCIs in which the sub-fund invests (look through).

The internal classification system, on the basis of which this sectoral spread is calculated, has been changed as of 31/12/2023. In order to provide a meaningful comparison of the sectoral spread across reporting periods, the sectoral spread calculations will be de-duplicated in the annual reports. This means that a summary table will be shown for each classification system.

Currency breakdown (as a % of net assets)

The currency distribution of the sub-fund's investments is calculated based on the currency distribution of the underlying investments of the UCIs in which the sub-fund invests (look through).

2.4.2. Changes in the composition of the assets of Horizon KBC Defensive Balanced Responsible Investing (in Euro)

	1 st half of year	2 nd half of year	Year
Purchases	78,088,679.01	406,026,844.52	484,115,523.53
Sales	137,402,149.85	468,709,229.01	606,111,378.85
Total 1	215,490,828.86	874,736,073.53	1,090,226,902.38
Subscriptions	25,562,205.91	21,627,165.67	47,189,371.58
Redemptions	71,667,594.14	75,342,285.82	147,009,879.96
Total 2	97,229,800.05	96,969,451.49	194,199,251.54
Monthly average of total assets	1,338,729,637.21	1,338,662,304.73	1,338,695,278.25
Turnover rate	8.83%	58.10%	66.93%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period. A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions. A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio. Active asset management may result in high turnover rates (monthly percentage >50%), reason: Active asset management may result in high turnover rates (monthly percentage >50%), reason: Model driven funds that trade based on market movements in addition to regular strategy changes and subscriptions and redemptions.

The detailed list of transactions can be consulted free of charge at the company designated as financial service: KBC Bank NV, Havenlaan 2, B-1080 Brussels

DIS	BE6290491412	EUR	8.05%		-0.02%		1.01%				31/01/2017	0.58%

Risk warning: Past performance is not a guide to future performance.

* Return on annual basis.

Classic Shares

- The bar chart shows the performance for full financial years.
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage. In the case of units that pay dividends, the dividend is incorporated geometrically in the return.
- Calculation method for date D, where NAV stands for net asset value:

Capitalisation units (CAP)

Return on date D over a period of X years :

$$[NIW(D) / NIW(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[NIW(D) / NIW(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

Distribution units (DIV)

Return on date D over a period of X years :

$$[C * NIW(D) / NIW(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[C * NIW(D) / NIW(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

where C is a factor that is determined for all N dividends between the calculation date D and the reference date.

For dividend i on date Di with value Wi:

$$Ci = [Wi / NIW(Di)] + 1$$

i = 1 ... N

from which C = C0 * * CN.

- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation and distribution shares

Dividend on ex-dividend date 28/03/2025: 13,5130 net (19,3043 gross).

Capitalisation units (CAP)
 Return on date D over a period of X years :

$$[\text{NIW}(\text{D}) / \text{NIW}(\text{Y})]^{[1 / \text{X}] - 1}$$
 where Y = D-X
 Return on date D since the start date S of the unit:

$$[\text{NIW}(\text{D}) / \text{NIW}(\text{S})]^{[1 / \text{F}] - 1}$$
 where F = 1 if the unit has existed for less than one year on date D
 where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D
- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation shares.

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

Financial derivatives on financial indices

The following financial indices were used as the underlying for financial derivatives::

The EURO STOXX 50® (Bloomberg code: SX5E Index) is a weighted equity index computed by Stoxx Ltd. The dividend is not reinvested. The main purpose of this index is to provide a continuous indication of market trends on the European stock markets. The base value of the index is 1000, calculated on the basis of the underlying prices recorded on 31 December 1991.

The Euro Stoxx 50® consists solely of shares from countries participating in the Economic and Monetary Union, with the exception of Luxembourg. On 10 April 1998, the following countries were included in the index: Belgium, Cyprus, Germany, Estonia, Finland, France, Greece, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, the Netherlands, Austria, Portugal, Slovakia, Slovenia and Spain.

The index consists of the 50 largest European shares in terms of shares that are freely negotiable, and the shares are accordingly weighted on the basis of this criterion.

The Euro Stoxx 50® is published daily in L'Echo, De Tijd, The Financial Times and The Wall Street Journal Europe.

Stoxx Limited has all proprietary rights with respect to the index. In no way Stoxx Limited endorses, sponsors or is otherwise involved in the issue and offering the shares of Horizon KBC Defensive Balanced Responsible Investing. Stoxx Limited disclaims any liability for the issue and offering of the shares of this undertaking for collective investment.

The FTSE 100 is an equity index computed by the Financial Times Ltd. The dividend is not reinvested. It comprises 100 shares. The FTSE 100 serves primarily as a continuous indicator of market trends on the UK stock market. The value of the FTSE 100 is based on the market value of the shares of 100 companies listed on the London Stock Exchange. These are the companies with the biggest market capitalisation, and the shares are weighted accordingly. The base value of the index is 1000, calculated on the basis of the underlying prices recorded on 3 January 1984.

The FTSE 100 is published daily in the leading financial newspapers, i.e. The Financial Times and The Wall Street Journal Europe. In Belgium, the index is published in De Tijd and L'Echo.

Financial Times Ltd has all proprietary rights with respect to the index. In no way Financial Times Ltd endorses, sponsors or is otherwise involved in the issue and offering the shares of this undertaking for collective investment. Financial Times Ltd disclaims any liability for the issue and offering of the shares of this undertaking for collective investment.

The Nikkei 225 is an equity index computed by Nikkei, Inc. The dividend is not reinvested. It comprises 225 shares. The Nikkei 225 serves primarily as a continuous indicator of market trends on the Japanese stock market. The value of the Nikkei 225 is based on the market value of the shares of 225 companies. These are the 225 leading and most liquid shares on the first section of the Tokyo Stock Exchange. The index was launched on 16 May 1949, with a base value of 176.21.

The Nikkei 225 is published daily in the leading financial newspapers, i.e. The Financial Times and The Wall Street Journal Europe. In Belgium, the index is published in De Tijd and L'Echo.

Nikkei, Inc has all proprietary rights with respect to the index. In no way Nikkei, Inc endorses, sponsors or is otherwise involved in the issue and offering the shares of this undertaking for collective investment. Nikkei, Inc. disclaims any liability for the issue and offering of the shares of this undertaking for collective investment.

The S&P 500 is an equity index computed by Standard & Poor's that is made up of 500 shares. The dividend is not reinvested. The S&P 500 serves primarily as a continuous indicator of market trends on the US stock markets. The value of the S&P 500 index is calculated on the basis of the market value of the shares of 500 companies at a given point in time, compared to the market value of the shares of 500 similar companies during the reference period from 1941 to 1943. The index is published daily in L'Echo, De Tijd, The Financial Times and The Wall Street Journal Europe.

Standard & Poor's has all proprietary rights with respect to the index. In no way Standard & Poor's endorses, sponsors or is otherwise involved in the issue and offering the shares of this undertaking for collective investment. Standard & Poor's disclaims any liability for the issue and offering of the shares of this undertaking for collective investment.

The value and, if available for distribution, the composition of the aforementioned financial indices may be obtained from the branches providing the financial service.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and article 6, first paragraph of Regulation (EU) 2020/852

Product Name:
Horizon KBC Defensive Balanced Responsible Investing

Legal entity identifier:
549300BPXKFQCUX77794

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU-Taxonomie** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☒ ☐ ☐ Yes

☒ ☐ ☒ No

☐ It made **sustainable investments with an environmental objective**: %

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 49.30% of sustainable investments

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ with a social objective

☐ It made **sustainable investments with a social objective**: %

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Unless otherwise stated, all actual data in this periodic report are expressed as weighted quarterly average.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

This sub-fund:

- has promoted the integration of sustainability into the policy decisions of issuers (companies, governments, supranational debtors and/or agencies linked to governments) by preferring issuers with a better ESG (risk)score;
- has promoted climate change mitigation by preferring issuers with lower greenhouse gas intensity, with the objective of meeting a predetermined greenhouse gas intensity target;
- has promoted sustainable development through 'sustainable investments' in accordance with art. 2(17) SFDR.

Sustainable investments consist of bonds financing green and/or social projects and investments in issuers contributing to the achievement of the UN Sustainable Development Goals.

However, no binding minimum percentage has been set for this latter category, although it contributes to the achievement of the minimum percentage of 'sustainable investments' for this sub-fund.

The specific objectives of the sub-fund can be found in the table under title 'How did the sustainability indicators perform?' of this annex.

The sub-fund invested 49.30% of the assets in "sustainable investments" as defined by art. 2.17 SFDR and 50.07% in other investments aligned with environmental or social characteristics.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by this sub-fund.

For investments in instruments issued by governments, supranational debtors and/or government-linked agencies, the described reference portfolio of global government bonds is used as a basis for comparison, to compare certain ESG characteristics promoted by the sub-fund.

How did the sustainability indicators perform?

Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

	Target	Target applied	Actuals	Objective attained
Instruments issued by companies				
ESG risk score	Better than the target allocation as described in the prospectus under the title 'information concerning the sub-fund KBC Defensive Balanced Responsible Investing'.	20.76	18.41	Yes
Greenhouse gas intensity	Companies are assessed on two targets whereby the most strict of the two will determine the target applied: 15% better than the target allocation as described in the prospectus under the title 'information concerning the sub-fund KBC Defensive Balanced Responsible Investing' and a reduction of 50% by 2030 compared to the target allocation at end of 2019. An immediate reduction of 30% is envisaged for 2019, followed by an annual reduction of 3%.	100.96	52.46	Yes
Bonds financing green and/or social projects	A minimum of 10% of corporate bonds invested in should qualify as bonds financing green and/or social projects.	10	17.74	Yes
Instruments issued by governments, supranational debtors and/or agencies linked to governments				
ESG Score	10% better than the reference portfolio of global government bonds (composed of the following benchmarks: 67% developed markets: J.P. Morgan GBI Global Unhedged EUR Index and 33% emerging markets: J.P. Morgan GBI-EM Global Diversified Composite Unhedged EUR Index).	0.77	0.82	Yes
Greenhouse gas intensity	25% better than the reference portfolio of global government bonds (composed of the following benchmarks: 67% developed markets: J.P. Morgan GBI Global Unhedged EUR Index and 33% emerging markets: J.P. Morgan GBI-EM Global Diversified Composite Unhedged EUR Index).	413.18	352.38	Yes
Bonds financing green and/or social projects	A minimum of 10% of the investments in bonds issued by governments, supranational debtors and/or agencies linked to governments should qualify as bonds financing green and/or social projects.	10	21.61	Yes
Minimum % Sustainable Investments	A minimum of 20.00% of sustainable investments. The sustainable investments for this sub-fund will consist of bonds financing green and/or social projects and investments in issuers contributing to the achievement of the UN Sustainable Development Goals. However, no binding minimum percentage has been set for the latter category.	20.00	49.30	Yes
Minimum % sustainable investments with an environmental objective in economic activities that do not qualify as environmentally sustainable according to the EU taxonomy	Minimum 1% ecologically sustainable investments in economic activities that do not qualify as ecologically sustainable according to the EU taxonomy.		19.05	Not available
Minimum % Sustainable	Minimum 1% sustainable investments with a social objective.	1	29.41	Yes

Investments with a social objective				
Minimum % of assets promoting E/S characteristics	Minimum 80% of assets promoting E/S characteristics.	80	99.38	Yes
Other specific objectives	not applicable			

As indicated in the table above, the sub-fund has reached all targets during the reference period.

The sub-fund pursued these objectives (directly or indirectly) based on a dualistic approach: the negative screening and the positive selection methodology.

All targets are also monitored by KBC Asset Management at month-end. Given the difference in the periodicity of the calculations, it cannot be excluded that the monitoring at month-end leads to different results than the weighted quarterly averages shown in the table above and section 2.1.7 of the general annual report.

No breaches at month-end have been identified for this sub-fund.

... and compared to previous periods?

Sustainability indicators	Achieved result	Achieved result	Achieved result
	31/12/2022	31/12/2023	31/12/2024
Instruments issued by companies			
ESG risk score		17.85	18.41
Greenhouse gas intensity		47.11	52.46
Bonds financing green and/or social projects		14.04	17.74
Instruments issued by governments, supranational debtors and/or agencies linked to governments			
ESG Score		0.82	0.82
Greenhouse gas intensity		343.62	352.38
Bonds financing green and/or social projects		15.40	21.61
Sustainable Investments	81.31	77.57	49.30
Sustainable Investments with an environmental objective in economic activities that do not qualify as environmentally sustainable according to the EU taxonomy (%)		23.38	19.90
Sustainable Investments with a social objective (%)		54.20	29.41
Assets promoting E/S characteristics (%)		98.39	99.38

For the reporting period 01/01/2022-31/12/2022, the results achieved were not reported for each sustainability indicator separately (except for the percentage of sustainable investments).

For the year 2022, it was only described in a general way whether or not the targets were achieved.

For the reporting periods 01/01/2022-31/12/2022 and 01/01/2023-31/12/2023, the results achieved described in this chapter only reflect the situation at the end of the sub-fund's financial year. Therefore, they are not a reliable indicator of future results.

For the reporting period 01/01/2024-31/12/2024, the results achieved are expressed as a weighted average per quarter.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sub-fund promoted a combination of environmental and social characteristics and, even though it didn't have sustainable investments as an objective, the sub-fund invested 49.30% of the assets in 'sustainable investments' as defined by art. 2.17 SFDR.

(1) UN Sustainable Development Goals

To support sustainable development, the sub-fund invested a part of its portfolio in issuers that contribute to the UN Sustainable Development Goals.

Companies are considered to contribute to sustainable development when at least 20% of the revenues are linked to the UN Sustainable Development Goals. The activities of the companies are assessed on multiple sustainable themes that can be linked to the UN Sustainable Development Goals.

Governments were assessed on five pillars which contain indicators that can be linked to the 17 UN Sustainable Development Goals. If a government scored sufficiently well on one of these pillars and not significantly poor on the other pillars, the bonds of this government and its sub-governments and agencies were considered to be instruments that contribute to UN Sustainable Development Goals.

- The country is aligned with the ESG criteria: it has a score of at least 80 for one of the five pillars and does not score lower than 50 for any of the other pillars;
- The country is not excluded: it does not rank among the 50% most controversial regimes AND it does meet the criteria on respecting the sustainable principles AND it does not rank among the 10% worst scoring countries of the universe.

Supranational government bonds were considered to contribute to the UN Sustainable Development Goals if either of the following criteria is met:

- at least half of its members contribute to the UN Sustainable Development Goals (weighted by voting power/full paid-in capital/percentage of population (in order of availability)).
- the mission statement of the supranational institution has a sustainable objective and less than half of its members fall in the worst-scoring half of the screening for controversial regimes.

In addition, the Responsible Investing Advisory Board can award the 'sustainable development' label to instruments of companies and governments.

However, the awarding of the 'sustainable development' label by the Responsible Investing Advisory Board to instruments of governments is very exceptional. The possibility of deviating from the outcomes of the internal KBC country model is mainly intended for countries that just meet or just fall short of the requirements, with the aim of avoiding that countries that would 'leapfrog' the bar over the years (i.e. borderline sustainable or not sustainable or permitted) would have to be in and then out of the investment universe each time, and this in order to avoid transaction costs.

(2) Bonds financing green and/or social projects

To encourage the transition to a more sustainable world, the sub-fund invested a minimum part of its portfolio in bonds financing green and/or social projects (that are aligned with the International Capital Market Association (ICMA) Green Bond Principles and Social Bond Principles on the Use of Proceeds). Instruments that meet these requirements were labelled 'sustainable investments'. The percentage of the portfolio invested in bonds financing green and/or social projects can be found in the table under the "How did the sustainability indicators perform" section of this annex.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti corruption and anti-bribery matters.

The sustainable investments that the sub-fund partially made did not cause significant harm to the sustainable investment objective through the negative screening. The sub-fund took into account the indicators of the principle adverse impacts of investment decisions on sustainability factors as stated in Table 1 of Annex I of Delegated Regulation (EU) 2022/1288, as well as the relevant indicators for the principle adverse impacts of investments decisions on sustainability factors in Tables 2 and 3 of Annex I of Delegated Regulation (EU) 2022/1288 through the negative screening.

The negative screening amounts to the sub-fund's a priori exclusion of issuers from the Responsible Investment universe which fall foul the exclusion policies.

The application of these policies means that issuers involved in activities such as fossil fuels, the tobacco industry, arms, gambling and adult entertainment are excluded from the sub-fund's investment universe. Investments in financial instruments linked to livestock and food prices are also excluded. All companies that derive at least 5% of their revenues from the production or 10% of their revenues from the sale of fur or special leather, are excluded. The negative screening also ensures that issuers based in countries that encourage unfair tax practices, that seriously violate

fundamental principles of environmental protection, social responsibility and good governance (through the normative screening, through a poor ESG risk rating, due to involvement in unsustainable countries by not meeting the sustainability criteria and controversial regimes, due to severe controversies related to water emissions, pollution or waste and gender diversity and due to high or severe controversies in the context of activities that have a negative impact on biodiversity and for which insufficient measures are taken to reduce their impact) are excluded from the sub-fund's investment universe.

These principles of negative screening are not exhaustive and may be modified on the advice of the Responsible Investing Advisory Board.

----- *How were the indicators for adverse impacts on sustainability factors taken into account?*

Through the exclusion policy for Responsible Investing funds and, in particular, the normative screening and ESG risk assessment, all indicators of the principle adverse impacts of investment decisions on sustainability factors as stated in Table 1 of Annex I of Delegated Regulation (EU) 2022/1288, as well as the relevant indicators for the principle adverse impacts of investments decisions on sustainability factors in Tables 2 and 3 of Annex I of Delegated Regulation (EU) 2022/1288 were taken into account for instruments issued by companies. The sub-fund did not invest in companies that seriously violate the principles of the United Nations Global Compact and the Organization for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises, and any companies involved in serious controversies related to environmental, social or good governance issues are also excluded. Also excluded were companies with an ESG risk score of more than 40 according to data provider Sustainalytics.

For investments in instruments issued by countries, the indicators of the principle adverse impacts of investment decisions on sustainability factors as stated in Table 1 of Annex I of Delegated Regulation (EU) 2022/1288, as well as the relevant indicators for the principle adverse impacts of investments decisions on sustainability factors in Tables 2 and 3 of Annex I of Delegated Regulation (EU) 2022/1288 were taken into account by excluding countries in the worst 10% according to the ESG score model, and by excluding countries that do not comply with sustainability criteria and are exposed to controversial regimes.

In addition to the normative screening and ESG risk assessment, through the positive selection methodology on greenhouse gas intensity and the exclusions in the exclusion policy for Responsible Investment funds, the following indicators of principle adverse impacts on sustainability factors were also considered for all investments of this sub-fund:

- **Indicator 3:** greenhouse gas ('GHG') intensity of investee companies was taken into account through the greenhouse gas intensity reduction target for companies.
- **Indicator 4:** exposure to companies active in the fossil fuel sector was taken into account as the sub-fund did not invest in companies that are active in the fossil fuel sector. In order to support companies in their transition to a more sustainable future, an exception is made for green bonds issued by companies that have been excluded solely on the basis of the fossil fuel policy.
- **Indicator 7:** Activities negatively affecting biodiversity-sensitive areas were taken into account as the sub-fund does not invest in companies that have high or severe controversies related to Land Use and Biodiversity as well as companies with activities that have a negative impact on biodiversity and that don't take sufficient measures to reduce their impact.
- **Indicator 10:** Violations of the United Nations Global Compact (UNGC) Principles and the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises was taken into account as the sub-fund did not invest in companies that seriously violate UNGC principles or OECD guidelines.
- **Indicator 14:** exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons) was taken into account as the sub-fund did not invest in companies that are active in controversial weapons.
- **Indicator 15:** GHG intensity of investee countries was taken into account through the greenhouse gas intensity reduction target for sovereign related investments.
- **Indicator 16:** Investee countries subject to social violations was taken into account as the sub-fund did not invest in (i) Countries that do not comply with sustainability criteria and (ii) countries exposed to controversial regimes. More information can be found in the exclusion policy for Responsible Investing funds.

In addition, the principal adverse impacts on sustainability factors were implicitly taken into account through the Proxy Voting and Engagement Policy of KBC Asset Management NV.

A complete overview of the indicators of principal adverse impacts on sustainability factors that the sub-fund can take into account can be found in Annex I of Delegated Regulation (EU) 2022/1288.

----- Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes.

Companies seriously violating the basic good practices in terms of environmental, social and governance issues, as assessed by the UN Global Compact Principles, were excluded from the sub-fund. The United Nations Global Compact has formulated ten guiding sustainability principles regarding human rights, labour, environment and anti-corruption which are part of the internal screening. In addition, KBC AM assessed the companies' involvement in violations of the International Labour Organization's (ILO) Conventions, the OECD Guidelines for multinational enterprises and the UN Guiding Principles on Business and Human Rights.

The sub-fund commits to respect the letter and the spirit of the United Nations Universal Declaration of Human Rights; the principles concerning fundamental rights in the eight International Labour Organisation core conventions as set out in the Declaration on Fundamental Principles and Rights at Work; the UN Declaration on the Rights of Indigenous Peoples; the UK Modern Slavery Act and other international and regional human rights treaties containing internationally recognised standards by which the business sector must abide.

KBC Asset Management NV assesses all companies on the 'Human Rights List' of KBC Group as well as all companies meeting the criteria below:

- a high or severe controversy score related to Human Rights, for subindustries for which Human Rights are considered a high or severe risk.
- a severe controversy score related to Human Rights, for all other subindustries.

Based on this assessment, appropriate measures were taken, ranging from engagement with the companies concerned to selling positions. More information on the Policy on Human Rights can be found on the KBC Asset Management NV website.

More information on negative screening can be found in the section on "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?" of this annex.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The principal adverse impacts on sustainability factors were explicitly taken into account for all investments of this sub-fund by the exclusion policies applied. In addition, the principle adverse impacts on sustainability factors were implicitly taken into account through KBC Asset Management NV's proxy voting and engagement policies.

More information on the principal adverse impacts on sustainability factors can be found under the heading 'How were the indicators for adverse impacts on sustainability factors taken into account' of this Annex.

What were the top investments of this financial product?

This list includes the investments constituting the **greatest proportion** of the financial product during the reference period which is:
01/01/2024-31/12/2024

Largest investments	Sector	% assets	Country
KBC Part. Corporate Bds Responsible Investing -ISB	Financial Services	11.67%	Belgium
KBC Bonds Strategic Broad 25/75 RI -ISB	Financial Services	10.71%	Luxembourg
KBC Bonds Strategic Broad 50/50 RI -ISB	Financial Services	10.71%	Luxembourg
KBC Bonds Strategic Broad 75/25 RI -ISB	Financial Services	10.70%	Luxembourg
KBC Renta Eurorenta Responsible Investing - ISB	Financial Services	10.64%	Luxembourg

What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments was 49.30%.

Asset allocation
describes the
share of
investments
in
specific assets.

What was the asset allocation?

The sub-fund could invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described in the prospectus under title "Information concerning the sub-fund KBC Defensive Balanced Responsible Investing".

Within these categories of eligible assets, the sub-fund invested 99.38% in assets that promote environmental or social characteristics and 0.62% in other investments.

Corporate and sovereign investments in issuers passing the negative screening and contributing to at least one specific positive selection of the investment policy for Responsible Investing funds were considered as 'assets promoting environmental and social characteristics'.

(Term) deposits whose counterparties pass the negative screening and have at least a +2 Net Alignment Score on one of the first 15 UN Sustainable Development Goals at MSCI were also considered as 'assets promoting environmental and social characteristics'.

More information on the MSCI Net Alignment Score can be found in the investment policy for Responsible Investing funds which is available on www.kbc.be/investment-legal-documents > Investment policy for Responsible Investing funds.

The category "other investments" contained technical items, such as cash and derivatives, and assets in which the sub-fund invests temporarily following a planned update of the eligible universe, which determines the assets that promote environmental and/or social characteristics, for which there are no environmental or social safeguards. The sub-fund held or invested in these types of assets to achieve investment objectives, to diversify the portfolio, for liquidity management purposes and to hedge risks.

Derivatives were used to hedge risks as described in permitted derivatives transactions as set out in section 2. 'Investment information' under title 'Information concerning the sub-fund KBC Defensive Balanced Responsible Investing' of the prospectus.

Investments in derivatives are not used to attain the environmental or social characteristics promoted by the financial product and will not affect them.

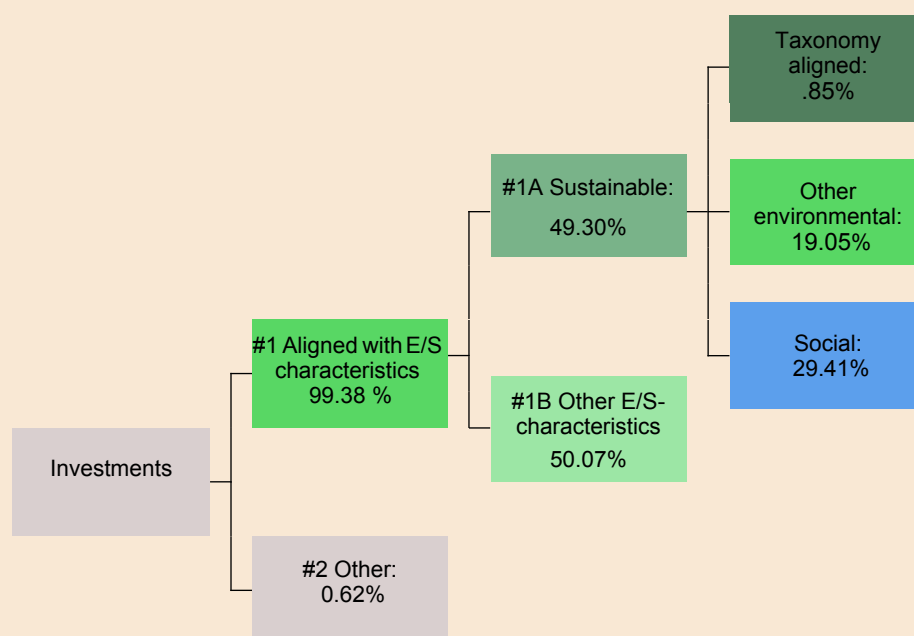

19.05% of sustainable investments are environmentally sustainable investments (not taxonomy-aligned), 0.85% are environmentally sustainable investments (taxonomy-aligned) and 29.41% are socially sustainable investments.

The sustainable investments are equal to the sum of investments that are considered "sustainable" based on the published methodology on contributing to the achievement of the UN Sustainable Development Goals, plus investments in bonds that can be considered as bonds financing green and/or social projects, plus instruments that are considered "sustainable" by the Responsible Investing Advisory Board.

In addition, companies that have at least 20% of their revenues aligned with the EU Taxonomy Framework according to data from Trucost, are considered to contribute to sustainable development. Instruments of companies that meet these requirements are referred to as "sustainable investments," according to art. 2(17) SFDR.

More information can be found at the section 'What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?' of this Annex.

To determine compliance with the EU taxonomy, the criteria for **fossil gas** include emission limits and conversion to renewable energy or low-carbon fuels by the end of 2023. For **nuclear power**, the criteria include comprehensive rules on safety and waste management.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product;

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S-characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

On 31/12/2024 the investments were made in the following sectors:

Sector	%Assets
National	24.16%
Banking	11.73%
Health Care	8.05%
Financial Services	7.78%
Tech Hardware & Semiconductors	6.38%
Software & Tech Services	5.39%
Media	4.65%
Materials	4.54%
Insurance	3.90%
Consumer Staple Products	3.60%
Real Estate	3.47%
Retail & Wholesale - Discretionary	3.12%
Supranationals	2.94%
Telecommunications	2.40%
Utilities	2.23%
Consumer Discretionary Products	2.09%
Consumer Discretionary Services	1.13%
Unclassifiable	0.97%
Industrial Services	0.46%
Industrial Products	0.44%
Retail & Wholesale - Staples	0.32%
Regional & Local	0.21%
Renewable Energy	0.04%

Sectors and sub-sectors of the economy that derive income from exploration, mining, extraction, production, processing, storage, refining or distribution - including transportation, storage and trading - in fossil fuels are excluded by the exclusion policy. Consequently, the sub-fund has not invested in these sectors and sub-sectors.

However, an exception is provided in the exclusion policy for investments in green bonds of these companies, which promote the energy transition. Consequently, for the portion invested in green bonds, there may be exposure to these sectors.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The sub-fund does not specifically seek to invest in environmentally sustainable economic activities within the meaning of the EU Taxonomy Framework ("investments aligned with the EU Taxonomy"). Although the sub-fund does not aim to invest in investments aligned with the EU Taxonomy, it cannot be ruled out that the sub-fund does contain investments aligned with the EU Taxonomy. The percentage of investments aligned with the EU taxonomy is 0.85% for this reporting period. This percentage is a weighted quarterly average and includes investments in companies that have at least 20% of their revenues aligned with the EU Taxonomy Framework according to data from Trucost. Asset managers depend on available sustainability data relating to their investee companies. Currently, there is a lack of sustainability data available. This has created the risk that investment funds currently report a very low percentage of investments that comply with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy⁽¹⁾?

Yes:

In fossil gas

In nuclear energy

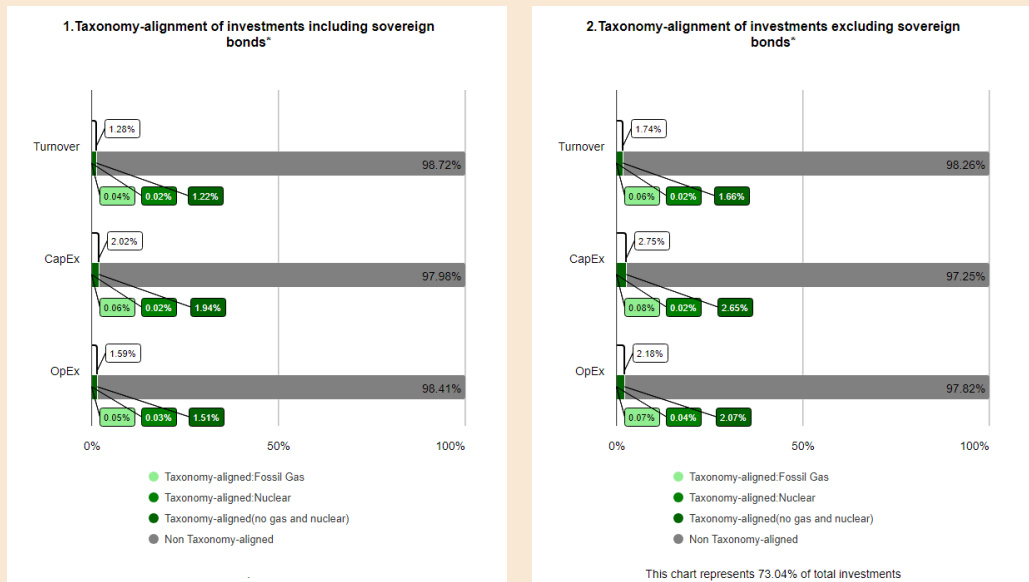

No

(1) Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The sub-fund has invested in activities in the fossil gas and/or nuclear energy sectors that comply with EU taxonomy based on data provided by Trucost. This data does not take into account the definition of 'taxonomy aligned' used by KBC AM NV. According to KBC AM NV's definition, investments in companies are taxonomy-aligned when at least 20% of revenues are aligned with the EU taxonomy framework.

Taxonomy-aligned activities are expressed as a share of:
-turnover reflecting the share of revenue from green activities of investee companies.
-capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
-operational expenditure (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

***For the purpose of these graphs, "sovereign bonds" consist of all sovereign exposures.**

The figure data in the above charts are from data provider Trucost and do not take into account the definition of 'taxonomy-aligned' used by KBC AM NV. According to KBC AM NV's definition, investments in companies are taxonomy-aligned when at least 20% of revenues are aligned with the EU taxonomy framework. Consequently, it is therefore possible that the percentage shown in green (EU taxonomy-aligned investments) in the above charts differs from the 'Taxonomy-aligned' percentage in the table under the 'What was the asset allocation?' section of this annex.

● **What was the share of investments made in transitional and enabling activities?**

The proportion of investments in transition activities was 0.04%.

The proportion of investments in enabling activities was 0.72%.

The figures described in this section are from data provider Trucost.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

During the previous reference period (which ran from 1 January 2023 to 31 December 2023) the percentage of investments aligned with the EU taxonomy was set at 0%. KBC Asset Management NV determined that, at that time, insufficient reliable, timely and verifiable data from issuers or investee companies was available for consistent reporting, based on its own research and services from data providers.

The percentage of investments aligned with the EU taxonomy of the current reference period is 0.85%. This percentage is a weighted quarterly average and includes investments in companies with at least 20% of sales aligned with the EU taxonomy framework (based on data from Trucost). According to KBC AM's definition, investments only qualify as "aligned with the EU taxonomy" when at least 20% of the turnover of investee companies is aligned with the EU taxonomy.

Asset managers depend on available sustainability data relating to their investee companies. Currently, there is a lack of sustainability data available. This has created the risk that investment funds currently report a very low percentage of investments that comply with the EU Taxonomy.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The sub-fund invested 49.30% in sustainable investments as defined in article 2(17) SFDR. The proportion of sustainable investments with an environmental objective that were not aligned with the EU taxonomy was 19.90%.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 29.41%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

During the reporting period, the “other” category could include the following investments:

Assets	Purpose of investments and presence of minimum environmental or social safeguards
Investments in cash	The sub-fund held or invested in these types of assets to achieve investment objectives, to diversify the portfolio, for liquidity management purposes and to hedge risks.
Investments in assets that no longer met screening criteria	The sub-fund held or invested in these types of assets to achieve investment objectives, to diversify the portfolio, for liquidity management purposes and to hedge risks.
Investments in derivatives	Derivatives were used to hedge risks as described in permitted derivatives transactions as set out in section 2. ‘Investment information’ under title ‘Information concerning the sub-fund KBC Defensive Balanced Responsible Investing’ of the prospectus. Investments in derivatives were not used to attain the environmental or social characteristics promoted by the sub-fund and did not affect them.

For investments included under “#2 Other”, there were no environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The sub-fund

- promoted the integration of sustainability into the policy decisions of issuers (companies, governments, supranational debtors and/or agencies linked to governments), by preferring issuers with a better ESG (risk)score;
- promoted climate change mitigation, by preferring issuers with lower greenhouse gas Intensity, with the objective of meeting a predetermined greenhouse gas intensity target;
- promoted sustainable development through ‘sustainable investments’ in accordance with art. 2(17) SFDR.

Sustainable investments consist of bonds financing green and/or social projects and investments in issuers contributing to the achievement of the UN Sustainable Development Goals.

However, no binding minimum percentage has been set for this latter category, although it contributes to the achievement of the minimum percentage of ‘sustainable investments’ for this sub-fund.

The sub-fund excluded issuers involved in activities such as fossil fuels, the tobacco industry, weapons, gambling and adult entertainment from the sub-fund's investment universe. Investments in financial instruments linked to livestock and food prices were also excluded. Companies that derive at least 5% of their income from production or 10% of their income from the sale of fur or special leather were excluded. The negative screening also ensured that issuers based in countries that encourage unfair tax practices, that seriously violate fundamental principles of environmental protection, social responsibility and good governance (through the normative screening, through a poor ESG risk rating, due to involvement in countries that do not comply with sustainability principles by not meeting the sustainability criteria or are exposed to controversial regimes, due to severe controversies related to water emissions, pollution or waste and gender diversity and due to high or severe controversies in the context of activities that have a negative impact on biodiversity and for which insufficient measures are taken to reduce their impact) are excluded from the sub-fund's investment universe.

KBC Asset Management NV executed the voting rights of shares managed in the sub-fund according to the Proxy Voting and Engagement Policy. As such, KBC Asset Management monitored the companies in which the sub-fund is invested in, intervened with investee companies (avoiding insider information), took part in appropriate collective engagement initiatives and exercised voting rights in a considered way. These responsibilities were executed in the exclusive concern of defending the interests of the investors of the funds.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by this sub-fund.

For investments issued by companies the described reference portfolio was used as a basis for comparison, to compare certain ESG characteristics promoted by the sub-fund.

For investments in instruments issued by governments, supranational debtors and/or government-linked agencies, the described reference portfolio of global government bonds was used as a basis for comparison, to compare certain ESG characteristics promoted by the sub-fund.

More information can be found in the table under the "How did the sustainability indicators perform" section of this annex.

● *How did the reference benchmark differ from a broad market index?*

Not applicable.

● *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

Not applicable.

● *How did this financial product perform compared with the reference benchmark?*

Not applicable.

● *How did this financial product perform compared with the broad market index?*

Not applicable.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main object of the sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

he sub-fund sets out to achieve the highest possible return by investing in line with the investment view of KBC Asset Management NV (see www.kbc.be/investment-view). To this end, the fund invests directly or indirectly in various asset classes, such as shares and/or share-related investments ('stock component'), bonds and/or bond-related investments ('bond component'), money market instruments, cash and cash equivalents, and/or alternative investments (including real estate and financial instruments that are linked to price movements on commodity markets).

The target allocation for the asset classes is 30% for the stock component and 70% for the bond component.

This allocation may be significantly deviated from in line with the investment view of KBC Asset Management NV, as illustrated below.

Therefore, the sub-fund may invest a sizeable portion of its assets in asset classes that are not included in the target allocation (such as money market instruments and cash). The stock component may comprise up to 45% of the sub-fund.

When applying KBC Asset Management NV's investment view, the management bases their investment decisions on the analysis of the financial and economic developments and prospects for specific regions, sectors and themes. If conditions on the financial markets are uncertain, volatile or both, part of the portfolio may also be converted into investments with a lower level of risk (such as money market instruments and cash). If the stock component outperforms the bond component, or vice versa, the managers may likewise use part of the portfolio to buy additional assets in the best-performing of these two classes and sell assets in the worst-performing one.

When applying KBC Asset Management NV's investment view, the managers pay 2.5 times as much attention to the downside risk as to the upside potential. The more attention that is paid to downside risk, the larger the portion of the portfolio that may be converted into investments with a lower level of risk, such as cash and money market instruments, in times of uncertain and/or volatile markets. This part of the portfolio will ultimately amount to between 60% and 95% of the assets. This limit is indicative and may be reviewed annually based on the long-term trend of the financial markets. Any change to this indicative limit does not imply a change in the strategy of the sub-fund. However, under certain market conditions, the sub-fund's assets will not be invested in these asset classes in accordance with the pre-set target allocation.

Information related to Responsible Investing

Within the above limits, the sub-fund pursues (directly or indirectly) responsible investment objectives based on a dualistic approach: a negative screening and a positive selection methodology.

KBC Asset Management NV has a team of specialist researchers responsible for this dualistic approach. They are assisted by an independent advisory board (the "**Responsible Investing Advisory Board**") comprised of up to twelve persons, who are not affiliated to KBC Asset Management NV, and whose sole responsibility is to supervise the dualistic approach and activities of the specialist researchers. The secretariat of the advisory board is handled by a representative of KBC Asset Management NV. Moreover, KBC Asset Management NV works with data suppliers with expertise in Responsible Investing that provide data to the specialized researchers, who process and complete the data with publicly available information (including annual reports, press publications, etc.).

The sub-fund promotes a combination of environmental and/or social characteristics and, even though it does not have sustainable investments as an objective, it shall invest a minimum proportion of its assets in economic activities that contribute to the achievement of environmental or social objectives (i.e. 'sustainable investments').

The issuers in which it invests must follow good governance practices.

The sub-fund is compliant with the transparency obligations of article 11 (1) of Regulation (EU) 2019/2088 of the European Parliament and of the council of 27 November 2019 on sustainability-related disclosures in the financial services sector ('SFDR'). More information on how the sub-fund promotes environmental and social characteristics can be found in the 'Annex for Horizon KBC Defensive Conservative Responsible Investing' of this annual report. This annex specifically covers the periodic reports for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852.

Negative screening

In practical terms the end result of this negative screening procedure is that the sub-fund excludes issuers in advance from the Responsible Investment universe which fall foul of the exclusion policy available on www.kbc.be/investment-legal-documents > Exclusion policy for Responsible Investing funds.

The application of these policies means that issuers involved in such activities like the tobacco industry, weapons, gambling and adult entertainment are excluded from the sub-fund's investment universe. This screening also ensures that issuers who seriously violate fundamental principles of environmental protection, social responsibility and good governance are excluded from the sub-fund's investment universe.

These negative screening principles are not exhaustive and may be adapted from time to time under the supervision of the Responsible Investing Advisory Board.

Positive selection methodology

Within the defined investment universe and other limits described above, the responsible investment objectives of the sub-fund are the following:

(1) promote the integration of sustainability into the policy decisions of issuers (companies, governments, supranational debtors and/or agencies linked to governments), by preferring issuers with a better **ESG (risk)score**,

where ESG stands for 'Environmental, Social and Governance', and

(2) promote climate change mitigation, by preferring issuers with lower **Greenhouse Gas Intensity**, with the objective of meeting a predetermined Greenhouse Gas intensity target;

(3) support sustainable development, through 'sustainable investments' in accordance with art. 2(17) SFDR. Sustainable investments will consist of **bonds financing green and/or social projects** (3.1) and investments in issuers contributing to the achievement of the **UN Sustainable Development Goals** (3.2). However, no binding minimum percentage has been set for this latter category, although it contributes to the achievement of the minimum percentage of 'sustainable investments' for this sub-fund.

More information on the investment policy for Responsible Investing funds is available at www.kbc.be/investment-legal-documents > Investment policy for Responsible Investing funds.

(1) ESG-(risk)score

The contribution to the integration of sustainability into policy decisions of the issuers is measured based on an ESG (risk) score. For companies, an ESG risk score is assigned, for countries an ESG score. This score represents the aggregated performance assessment of a given issuer against a series of ESG criteria which are grounded to the extent possible against objective measures. The main factors underpinning the ESG criteria are:

- In the case of instruments issued by companies:
 - respect for the environment (e.g., reduction in greenhouse gas emissions);
 - attention to society (e.g., employee working conditions); and
 - corporate governance (e.g., independence and diversity of the board of directors).

At least 90% of the corporate investments in the portfolio, as measured by assets under management, must have an ESG risk score. The ESG risk score for companies is an ESG risk score supplied by a data provider.

- In the case of instruments issued by national governments, supranational debtors and/or agencies linked to governments, the following five pillars are used
 - overall economic performance and stability (e.g., quality of institutions and government);
 - socio-economic development and health of the population (e.g., education and employment);
 - equality, freedom and the rights of all citizens;
 - environmental policy (e.g., climate change); and
 - security, peace and international relations.

These lists are not exhaustive and may be changed under the supervision of the Responsible Investing Advisory Board.

KBC Asset Management NV assigns an ESG score to at least 90 % of the investments in countries within the portfolio, as measured by assets under management.

To achieve this objective, the ESG-risk score of the portfolio for companies is compared to a reference portfolio determined on the basis of the above-mentioned target spread.

The ESG score for countries of the portfolio is compared to a reference portfolio of global government bonds (composed of the following benchmarks: 67% developed markets: J.P. Morgan GBI Global Unhedged EUR and 33% emerging markets: J.P. Morgan GBI-EM Global Diversified Composite Unhedged EUR).

To calculate the ESG-(risk)score at portfolio level, the weighted average of the ESG-(risk)scores of the positions in the sub-fund are taken into account. Technical items such as cash and derivatives are not taken into account and also companies or countries for which no data is available are left out. The weights used in the calculation depend on the size of the positions in the sub-fund, rescaled for these items.

More information on the ESG-(risk)score and the concrete goals of the sub-fund can be found in the 'Annex for Horizon KBC Defensive Conservative Responsible Investing' to the prospectus.

The targets can be revised upwards or downwards.

(2) Greenhouse Gas Intensity

The objective to promote climate change mitigation, by favoring lower greenhouse gas intensity issuers, with the goal of meeting a predetermined greenhouse gas intensity target covers at least 90% of the portfolio. The objective does not apply to issuers for which data is not available.

The contribution of issuers to climate change mitigation is measured based on their greenhouse gas intensity. For companies, greenhouse gas intensity is defined as absolute greenhouse gas emissions (in tonnes CO₂ equivalent), divided by revenues (in mln USD). For countries, it is defined as the greenhouse gas emissions (in tonnes CO₂ equivalent), divided by the Gross Domestic Product (in mln USD).

The targets for instruments issued by companies are different from those for instruments issued by national governments, supranational debtors and/or government-linked agencies.

More information on Greenhouse Gas Intensity and the concrete goals of the sub-fund can be found in the 'Annex for Horizon KBC Defensive Conservative Responsible Investing' to the prospectus.

The targets may be revised upwards or downwards.

(3) Sustainable investments

(3.1) Bonds financing green and/or social projects

To encourage the transition to a more sustainable world, the sub-fund commits to invest a minimum proportion of the portfolio in bonds financing green and/or social projects. Bonds whose proceeds will be used exclusively to finance (a combination of) green and social projects that are aligned with the International Capital Market Association (ICMA) Green Bond Principles and Social Bond Principles on the Use of Proceeds are considered bonds financing green and/or social projects. Compliance with these principles is verified by an external party. Instruments that meet these requirements are labelled 'sustainable investments', in line with article 2(17) SFDR. More information on bonds financing green and/or social projects and the concrete goals of the sub-fund can be found in the 'Annex for Horizon KBC Defensive Conservative Responsible Investing' to the prospectus. The targets may be revised upwards or downwards.

(3.2) UN Sustainable Development Goals

To support sustainable development, the sub-fund can invest part of its portfolio in issuers that contribute to the UN Sustainable Development Goals. The UN Sustainable Development Goals include both social and environmental objectives.

Companies are considered to contribute to sustainable development when at least 20% of the revenues are linked to the UN Sustainable Development Goals. The activities of the companies are assessed on multiple sustainable themes that can be linked to the UN Sustainable Development Goals.

Governments are assessed on the five pillars as described in the ESG score, which contain indicators that can be linked to the 17 UN Sustainable Development Goals. If a government scores sufficiently well on one of these pillars and not significantly poor on the other pillars, the bonds of this government and its sub-governments and agencies are considered to be instruments that contribute to sustainable development. Bonds of supranational governments contribute to the UN's Sustainable development goals if one of the two criteria is met:

- at least half of its members contribute to the UN Sustainable Development Goals (weighted by voting power/full paid-in capital/percentage of population (in order of availability)).
- the mission statement of the supranational institution has a sustainable objective and less than half of its members fall in the worst half of the screening for controversial regimes.

Instruments of issuers that meet these requirements are designated as "sustainable investments," according to Article 2(17) SFDR. In addition, the Responsible Investing Advisory Board can award the "sustainable development" label to instruments of companies and governments. In that case, these investments shall also qualify as "sustainable investments," according to Article 2(17) SFDR. However, the awarding of the 'sustainable development' label by the Responsible Investing Advisory Board to instruments of governments is very exceptional.

More information about the methodology used to qualify investments as investments which contribute to the UN Sustainable Development Goals can be found in the 'Annex for Horizon KBC Defensive Conservative Responsible Investing' to the prospectus.

Potential Exceptions

It cannot be ruled out, however, that very limited investments may be made temporarily in assets that do not meet the above criteria. The reasons for this include the following:

- Developments as a result of which an issuer can no longer be regarded as eligible after purchase;
- Corporate events, such as a merger of one company with another, where the merged company can no longer be considered an eligible issuer based on the above criteria;
- Incorrect data as a result of which assets are invested (unintentionally and erroneously) in assets purchased when it should not have been eligible for the sub-fund;
- A planned update of the screening criteria as a result of which assets should be excluded from the sub-fund, but which the management company chooses to refrain from selling immediately in the best interest of the customer;
- External circumstances such as market movements and updates of external data can lead to investment solutions failing to achieve the abovementioned targets.

In these cases, the fund manager will replace the assets concerned with more appropriate assets as soon as possible, always taking into account the sole interest of the investor.

In addition, for the purpose of efficient portfolio management, the fund manager may to a significant degree use derivatives relating to assets issued by issuers that would not be eligible for inclusion in the sub-fund, in so far as there is no serviceable and comparable alternative available on the market. In addition, the counterparties with which the derivative transactions are entered into may not necessarily be issuers having a responsible nature.

The stock component is invested in a worldwide selection of shares that may come from any region, sector or theme.

For details of the bond component, please see the 'Characteristics of the bonds and debt instruments' section below.

The fund is actively managed without referring to any benchmark.

The responsible character is guaranteed by the aforementioned Responsible Investing methodology.

Taxonomy related information

At the date of this prospectus, the sub-fund does not commit to invest a minimum proportion of its assets in environmentally sustainable economic activities which contribute to any of the environmental objectives set out in Article 9 of the Regulation (EU) 2020/852 of the European Parliament and of the Council of 18 June 2020 on the establishment of a framework to facilitate sustainable investment ('EU Taxonomy Framework'). The minimum proportion of investments in environmentally sustainable economic activities within the meaning of the EU Taxonomy Framework is 0%. This will be monitored on a regular basis and as soon as sufficiently reliable, timely and verifiable data from issuers or invested companies is available, the prospectus may be updated.

Companies are considered to contribute to sustainable development if at least 20% of sales are linked to the UN Sustainable Development Goals. This includes companies with at least 20% of sales aligned to the EU Taxonomy Framework based on Trucost data. Instruments of companies that meet these requirements are referred to as "sustainable investments," according to art. 2(17) SFDR. More information on the percentage in the portfolio that was considered "sustainable investments with an environmental objective aligned with the EU Taxonomy Framework " based on this criterion during the reporting period, can be found in the annual reports for this sub-fund published after Jan. 1, 2024.

More information on the EU Taxonomy Framework can be found in the 'Annex for Horizon KBC Defensive Conservative Responsible Investing' to the prospectus.

Transparency of adverse sustainability impacts:

The sub-fund considers the principal adverse impacts of its investment decisions on sustainability factors by taking into account the principal adverse impact indicators ('PAI'), as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability disclosure in the financial services sector ('SFDR').

The principal adverse impacts on sustainability factors were explicitly taken into account through the general exclusion policy for conventional funds and Responsible Investing funds and the exclusion policy for Responsible Investing funds. The principal adverse impacts on sustainability factors that were taken into account through the exclusion policies can be found in the 'Annex for Horizon KBC Defensive Conservative Responsible Investing'.

The principal adverse impacts on sustainability factors were implicitly taken into account through the Proxy Voting and Engagement Policy. The principal adverse impacts on sustainability factors that were taken into account through the Proxy Voting and Engagement Policy can be found in the 'Annex for Horizon KBC Defensive Conservative Responsible Investing'.

More information on how the sub-fund aims to consider the principal adverse impacts on sustainability factors can also be found in the 'Annex for Horizon KBC Defensive Conservative Responsible Investing'.

Characteristics of the bonds and debt instruments

The sub-fund invests in bonds and debt instruments issued by both companies and public authorities.

The sub-fund invests directly and/or indirectly at least 50% of its assets in bonds and debt instruments

- in securities rated investment grade (at least BBB-/Baa3 for long-term debt, A3/F3/P3 for short-term debt) by at least one of the following rating agencies: Moody's Investors Service, Standard & Poor's or Fitch Ratings, and/or
- in government bonds issued in local currency or non-subordinated corporate bonds* which do not have a credit rating from the rating agencies mentioned above but the issuer of which has an investment grade rating by at least one of the rating agencies mentioned above, and/or
- in money market instruments whose issuer has an investment grade rating (minimum A3/F3/P3 for short-term debt) from at least one of the above rating agencies.

This means that the sub-fund may invest up to 50% of its assets invested in bonds and debt instruments that do not have a credit rating from the above-mentioned rating agencies and/or which do not comply with the above-mentioned credit requirements.

All maturities are taken into consideration in the selection of bonds and debt instruments.

*In the event of the bankruptcy of the relevant issuer, subordinated bonds are subordinated to the company's other debts: the company's other debts are paid first, then and only if there is still capital left, the holders of the subordinated bonds are fully or partially repaid; the holder of the subordinated bond does, however, have priority over the shareholders of the issuer in question.

Investments in assets other than securities or money market instruments

The sub-fund will invest primarily in units of undertakings for collective investment.

Securities Financing Transactions (SFTs)

The sub-fund may not lend any financial instruments.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'.

2.1.4. Financial portfolio management

The intellectual management, with the exception of the creation of the sub-fund and its maintenance in terms of the technical, product-specific and legal aspects has been delegated by the management company to KBC Fund Management Limited, 4th Floor, Scotch House, 6/7 Burgh Quay, Dublin 2, D02 VK44, Ireland.

2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2.1.6. Index and benchmark

Not applicable.

2.1.7. Policy pursued during the financial year

Following weekly strategy of KBC AM

2.1.8. Future policy

Following weekly strategy of KBC AM

2.1.9. Summary risk indicator (SRI)

Classic Shares: 2 on a scale of 1 (lowest risk) to 7 (highest risk)

- a moderate level of inflation risk: the bond component does not provide any protection against an increase in inflation.
- a moderate level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a real chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of credit risk: the bond component invests primarily - but not exclusively- in bonds with an investment grade rating. Consequently, the risk that an issuer can no longer meet its obligations is higher than in an investment that consists only of bonds with an investment grade rating. If investors are in doubt about the creditworthiness of the issuers of the bonds, the value of those bonds can fall.
- a moderate level of market risk: the level of the risk reflects the volatility of the equity component.
- a moderate level of performance risk: the level of the risk reflects the volatility of the equity component.

There is no capital protection.

Institutional F shares BG: 2 on a scale of 1 (lowest risk) to 7 (highest risk)

- a moderate level of inflation risk: the bond component does not provide any protection against an increase in inflation.
- a moderate level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a real chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of credit risk: the bond component invests primarily - but not exclusively- in bonds with an investment grade rating. Consequently, the risk that an issuer can no longer meet its obligations is higher than in an investment that consists only of bonds with an investment grade rating. If investors are in doubt about the creditworthiness of the issuers of the bonds, the value of those bonds can fall.
- a moderate level of market risk: the level of the risk reflects the volatility of the equity component.
- a moderate level of performance risk: the level of the risk reflects the volatility of the equity component.

There is no capital protection.

Comfort Shares: 2 on a scale of 1 (lowest risk) to 7 (highest risk)

- a moderate level of inflation risk: the bond component does not provide any protection against an increase in inflation.
- a moderate level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a real chance that the value of an investment will be affected by

movements in exchange rates.

- a moderate level of credit risk: the bond component invests primarily - but not exclusively- in bonds with an investment grade rating. Consequently, the risk that an issuer can no longer meet its obligations is higher than in an investment that consists only of bonds with an investment grade rating. If investors are in doubt about the creditworthiness of the issuers of the bonds, the value of those bonds can fall.
- a moderate level of market risk: the level of the risk reflects the volatility of the equity component.
- a moderate level of performance risk: the level of the risk reflects the volatility of the equity component.

There is no capital protection.

Comfort Plus Shares: 2 on a scale of 1 (lowest risk) to 7 (highest risk)

- a moderate level of inflation risk: the bond component does not provide any protection against an increase in inflation.
- a moderate level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a real chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of credit risk: the bond component invests primarily - but not exclusively- in bonds with an investment grade rating. Consequently, the risk that an issuer can no longer meet its obligations is higher than in an investment that consists only of bonds with an investment grade rating. If investors are in doubt about the creditworthiness of the issuers of the bonds, the value of those bonds can fall.
- a moderate level of market risk: the level of the risk reflects the volatility of the equity component.
- a moderate level of performance risk: the level of the risk reflects the volatility of the equity component.

There is no capital protection.

There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

2.1.10. Leveraged finance

The total amount of leveraged finance used by the sub-fund is 16 802 669.86 EUR.

This amount was calculated by multiplying the leverage ratio calculated using the UCITS-commitment method by the sub-fund's total assets under management.

2.1.11. Value-at-Risk

The internal classification system, on the basis of which this sectoral spread is calculated, has been changed as of 31/12/2023. In order to provide a meaningful comparison of the sectoral spread across reporting periods, the sectoral spread calculations will be de-duplicated in the annual reports. This means that a summary table will be shown for each classification system.

Currency breakdown (as a % of net assets)

The currency distribution of the sub-fund's investments is calculated based on the currency distribution of the underlying investments of the UCIs in which the sub-fund invests (look through).

2.4.2. Changes in the composition of the assets of Horizon KBC Defensive Conservative Responsible Investing (in Euro)

	1 st half of year	2 nd half of year	Year
Purchases	22,271,316.65	168,832,049.20	191,103,365.85
Sales	47,874,287.91	193,656,207.20	241,530,495.11
Total 1	70,145,604.56	362,488,256.40	432,633,860.96
Subscriptions	6,237,573.91	5,043,730.58	11,281,304.49
Redemptions	29,609,030.15	26,993,900.31	56,602,930.46
Total 2	35,846,604.06	32,037,630.89	67,884,234.95
Monthly average of total assets	452,496,319.43	447,396,748.66	449,883,834.40
Turnover rate	7.58%	73.86%	81.08%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period. A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions. A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio. Active asset management may result in high turnover rates (monthly percentage >50%), reason: Active asset management may result in high turnover rates (monthly percentage >50%), reason: Model driven funds that trade based on market movements in addition to regular strategy changes and subscriptions and redemptions.

The detailed list of transactions can be consulted free of charge at the company designated as financial service:
KBC Bank NV, Havenlaan 2, B-1080 Brussels

2.4.5. Performance figures

Classic Shares

* These performances were achieved under circumstances that no longer apply

Classic Shares

* These performances were achieved under circumstances that no longer apply

Cap Div	ISIN Code	Currency	1 year		3 years		5 years		10 years		Since Launch*	
			Share classes	Bench mark	Share classes	Bench mark	Share classes	Bench mark	Share classes	Bench mark	Starting date	Share classes
CAP	BE0946105641	EUR	7.83%		0.97%		1.87%		1.13%		27/04/2006	1.82%
DIS	BE6330357409	EUR	7.83%								24/01/2022	1.90%

Risk warning: Past performance is not a guide to future performance.

* Return on annual basis.

Classic Shares

- The bar chart shows the performance for full financial years.
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage. In the case of units that pay dividends, the dividend is incorporated geometrically in the return.
- Calculation method for date D, where NAV stands for net asset value:

Capitalisation units (CAP)

Return on date D over a period of X years :

$$[\text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[\text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

Distribution units (DIV)

Return on date D over a period of X years :

$$[C * \text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[C * \text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

where C is a factor that is determined for all N dividends between the calculation date D and the reference date.

For dividend i on date Di with value Wi:

$$C_i = [\text{Wi} / \text{NIW}(D_i)] + 1$$

i = 1 ... N

from which C = C0 * * CN.

- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation and distribution shares

Dividend on ex-dividend date 28/03/2025: 3,6124 net (5,1607 gross).

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

Financial derivatives on financial indices

The following financial indices were used as the underlying for financial derivatives::

The EURO STOXX 50® (Bloomberg code: SX5E Index) is a weighted equity index computed by Stoxx Ltd. The dividend is not reinvested. The main purpose of this index is to provide a continuous indication of market trends on the European stock markets. The base value of the index is 1000, calculated on the basis of the underlying prices recorded on 31 December 1991.

The Euro Stoxx 50® consists solely of shares from countries participating in the Economic and Monetary Union, with the exception of Luxembourg. On 10 April 1998, the following countries were included in the index: Belgium, Cyprus, Germany, Estonia, Finland, France, Greece, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, the Netherlands, Austria, Portugal, Slovakia, Slovenia and Spain.

The index consists of the 50 largest European shares in terms of shares that are freely negotiable, and the shares are accordingly weighted on the basis of this criterion.

The Euro Stoxx 50® is published daily in L'Echo, De Tijd, The Financial Times and The Wall Street Journal Europe.

Stoxx Limited has all proprietary rights with respect to the index. In no way Stoxx Limited endorses, sponsors or is otherwise involved in the issue and offering the shares of Horizon KBC Defensive Conservative Responsible Investing. Stoxx Limited disclaims any liability for the issue and offering of the shares of this undertaking for collective investment.

The **FTSE 100** is an equity index computed by the Financial Times Ltd. The dividend is not reinvested. It comprises 100 shares. The FTSE 100 serves primarily as a continuous indicator of market trends on the UK stock market. The value of the FTSE 100 is based on the market value of the shares of 100 companies listed on the London Stock Exchange. These are the companies with the biggest market capitalisation, and the shares are weighted accordingly. The base value of the index is 1000, calculated on the basis of the underlying prices recorded on 3 January 1984.

The FTSE 100 is published daily in the leading financial newspapers, i.e. The Financial Times and The Wall Street Journal Europe. In Belgium, the index is published in De Tijd and L'Echo.

Financial Times Ltd has all proprietary rights with respect to the index. In no way Financial Times Ltd endorses, sponsors or is otherwise involved in the issue and offering the shares of this undertaking for collective investment. Financial Times Ltd disclaims any liability for the issue and offering of the shares of this undertaking for collective investment.

The **Nikkei 225** is an equity index computed by Nikkei, Inc. The dividend is not reinvested. It comprises 225 shares. The Nikkei 225 serves primarily as a continuous indicator of market trends on the Japanese stock market. The value of the Nikkei 225 is based on the market value of the shares of 225 companies. These are the 225 leading and most liquid shares on the first section of the Tokyo Stock Exchange. The index was launched on 16 May 1949, with a base value of 176.21.

The Nikkei 225 is published daily in the leading financial newspapers, i.e. The Financial Times and The Wall Street Journal Europe. In Belgium, the index is published in De Tijd and L'Echo.

Nikkei, Inc has all proprietary rights with respect to the index. In no way Nikkei, Inc endorses, sponsors or is otherwise involved in the issue and offering the shares of this undertaking for collective investment. Nikkei, Inc. disclaims any liability for the issue and offering of the shares of this undertaking for collective investment.

The **S&P 500** is an equity index computed by Standard & Poor's that is made up of 500 shares. The dividend is not reinvested. The S&P 500 serves primarily as a continuous indicator of market trends on the US stock markets. The value of the S&P 500 index is calculated on the basis of the market value of the shares of 500 companies at a given point in time, compared to the market value of the shares of 500 similar companies during the reference period from 1941 to 1943. The index is published daily in L'Echo, De Tijd, The Financial Times and The Wall Street Journal Europe.

Standard & Poor's has all proprietary rights with respect to the index. In no way Standard & Poor's endorses, sponsors or is otherwise involved in the issue and offering the shares of this undertaking for collective investment. Standard & Poor's disclaims any liability for the issue and offering of the shares of this undertaking for collective investment.

The value and, if available for distribution, the composition of the aforementioned financial indices may be obtained

from the branches providing the financial service.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and article 6, first paragraph of Regulation (EU) 2020/852

Product Name:
Horizon KBC Defensive Conservative Responsible Investing

Legal entity identifier:
549300XO261UKZRNQ624

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU-Taxonomie** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☒ Yes

☒ No

☐ It made **sustainable investments with an environmental objective**: %

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 50.62% of sustainable investments

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ with a social objective

☐ It made **sustainable investments with a social objective**: %

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Unless otherwise stated, all actual data in this periodic report are expressed as weighted quarterly average.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

This sub-fund:

- has promoted the integration of sustainability into the policy decisions of issuers (companies, governments, supranational debtors and/or agencies linked to governments) by preferring issuers with a better ESG (risk)score;
- has promoted climate change mitigation by preferring issuers with lower greenhouse gas intensity, with the objective of meeting a predetermined greenhouse gas intensity target;
- has promoted sustainable development through 'sustainable investments' in accordance with art. 2(17) SFDR.

Sustainable investments consist of bonds financing green and/or social projects and investments in issuers contributing to the achievement of the UN Sustainable Development Goals.

However, no binding minimum percentage has been set for this latter category, although it contributes to the achievement of the minimum percentage of 'sustainable investments' for this sub-fund.

The specific objectives of the sub-fund can be found in the table under title 'How did the sustainability indicators perform?' of this annex.

The sub-fund invested 50.62% of the assets in "sustainable investments" as defined by art. 2.17 SFDR and 48.73% in other investments aligned with environmental or social characteristics.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by this sub-fund.

For investments in instruments issued by governments, supranational debtors and/or government-linked agencies, the described reference portfolio of global government bonds is used as a basis for comparison, to compare certain ESG characteristics promoted by the sub-fund.

How did the sustainability indicators perform?

Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

	Target	Target applied	Actuals	Objective attained
Instruments issued by companies				
ESG risk score	Better than the target allocation as described in the prospectus under the title 'information concerning the sub-fund KBC Defensive Conservative Responsible Investing'.	20.76	18.29	Yes
Greenhouse gas intensity	Companies are assessed on two targets whereby the most strict of the two will determine the target applied: 15% better than the target allocation as described in the prospectus under the title 'information concerning the sub-fund KBC Defensive Conservative Responsible Investing' and a reduction of 50% by 2030 compared to the target allocation at end of 2019. An immediate reduction of 30% is envisaged for 2019, followed by an annual reduction of 3%.	100.96	53.23	Yes
Bonds financing green and/or social projects	A minimum of 10% of corporate bonds invested in should qualify as bonds financing green and/or social projects.	10	17.70	Yes
Instruments issued by governments, supranational debtors and/or agencies linked to governments				
ESG Score	10% better than the reference portfolio of global government bonds (composed of the following benchmarks: 67% developed markets: J.P. Morgan GBI Global Unhedged EUR Index and 33% emerging markets: J.P. Morgan GBI-EM Global Diversified Composite Unhedged EUR Index).	0.77	0.82	Yes
Greenhouse gas intensity	25% better than the reference portfolio of global government bonds (composed of the following benchmarks: 67% developed markets: J.P. Morgan GBI Global Unhedged EUR Index and 33% emerging markets: J.P. Morgan GBI-EM Global Diversified Composite Unhedged EUR Index).	413.18	352.40	Yes
Bonds financing green and/or social projects	A minimum of 10% of the investments in bonds issued by governments, supranational debtors and/or agencies linked to governments should qualify as bonds financing green and/or social projects.	10	21.49	Yes
Minimum % Sustainable Investments	A minimum of 20.00% of sustainable investments. The sustainable investments for this sub-fund will consist of bonds financing green and/or social projects and investments in issuers contributing to the achievement of the UN Sustainable Development Goals. However, no binding minimum percentage has been set for the latter category.	20.00	50.62	Yes
Minimum % sustainable investments with an environmental objective in economic activities that do not qualify as environmentally sustainable according to the EU taxonomy	Minimum 1% ecologically sustainable investments in economic activities that do not qualify as ecologically sustainable according to the EU taxonomy.		19.04	Not available
Minimum % Sustainable	Minimum 1% sustainable investments with a social objective.	1	30.68	Yes

Investments with a social objective				
Minimum % of assets promoting E/S characteristics	Minimum 80% of assets promoting E/S characteristics.	80	99.35	Yes
Other specific objectives	not applicable			

As indicated in the table above, the sub-fund has reached all targets during the reference period.

The sub-fund pursued these objectives (directly or indirectly) based on a dualistic approach: the negative screening and the positive selection methodology.

All targets are also monitored by KBC Asset Management at month-end. Given the difference in the periodicity of the calculations, it cannot be excluded that the monitoring at month-end leads to different results than the weighted quarterly averages shown in the table above and section 2.1.7 of the general annual report.

No breaches at month-end have been identified for this sub-fund.

... and compared to previous periods?

Sustainability indicators	Achieved result	Achieved result	Achieved result
	31/12/2022	31/12/2023	31/12/2024
Instruments issued by companies			
ESG risk score		17.76	18.29
Greenhouse gas intensity		47.39	53.23
Bonds financing green and/or social projects		14.00	17.70
Instruments issued by governments, supranational debtors and/or agencies linked to governments			
ESG Score		0.82	0.82
Greenhouse gas intensity		343.61	352.40
Bonds financing green and/or social projects		15.25	21.49
Sustainable Investments	82.57	77.84	50.62
Sustainable Investments with an environmental objective in economic activities that do not qualify as environmentally sustainable according to the EU taxonomy (%)		22.83	19.93
Sustainable Investments with a social objective (%)		55.01	30.68
Assets promoting E/S characteristics (%)		98.34	99.35

For the reporting period 01/01/2022-31/12/2022, the results achieved were not reported for each sustainability indicator separately (except for the percentage of sustainable investments).

For the year 2022, it was only described in a general way whether or not the targets were achieved.

For the reporting periods 01/01/2022-31/12/2022 and 01/01/2023-31/12/2023, the results achieved described in this chapter only reflect the situation at the end of the sub-fund's financial year. Therefore, they are not a reliable indicator of future results.

For the reporting period 01/01/2024-31/12/2024, the results achieved are expressed as a weighted average per quarter.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sub-fund promoted a combination of environmental and social characteristics and, even though it didn't have sustainable investments as an objective, the sub-fund invested 50.62% of the assets in 'sustainable investments' as defined by art. 2.17 SFDR.

(1) UN Sustainable Development Goals

To support sustainable development, the sub-fund invested a part of its portfolio in issuers that contribute to the UN Sustainable Development Goals.

Companies are considered to contribute to sustainable development when at least 20% of the revenues are linked to the UN Sustainable Development Goals. The activities of the companies are assessed on multiple sustainable themes that can be linked to the UN Sustainable Development Goals.

Governments were assessed on five pillars which contain indicators that can be linked to the 17 UN Sustainable Development Goals. If a government scored sufficiently well on one of these pillars and not significantly poor on the other pillars, the bonds of this government and its sub-governments and agencies were considered to be instruments that contribute to UN Sustainable Development Goals.

- The country is aligned with the ESG criteria: it has a score of at least 80 for one of the five pillars and does not score lower than 50 for any of the other pillars;
- The country is not excluded: it does not rank among the 50% most controversial regimes AND it does meet the criteria on respecting the sustainable principles AND it does not rank among the 10% worst scoring countries of the universe.

Supranational government bonds were considered to contribute to the UN Sustainable Development Goals if either of the following criteria is met:

- at least half of its members contribute to the UN Sustainable Development Goals (weighted by voting power/full paid-in capital/percentage of population (in order of availability).
- the mission statement of the supranational institution has a sustainable objective and less than half of its members fall in the worst-scoring half of the screening for controversial regimes.

In addition, the Responsible Investing Advisory Board can award the 'sustainable development' label to instruments of companies and governments.

However, the awarding of the 'sustainable development' label by the Responsible Investing Advisory Board to instruments of governments is very exceptional. The possibility of deviating from the outcomes of the internal KBC country model is mainly intended for countries that just meet or just fall short of the requirements, with the aim of avoiding that countries that would 'leapfrog' the bar over the years (i.e. borderline sustainable or not sustainable or permitted) would have to be in and then out of the investment universe each time, and this in order to avoid transaction costs.

(2) Bonds financing green and/or social projects

To encourage the transition to a more sustainable world, the sub-fund invested a minimum part of its portfolio in bonds financing green and/or social projects (that are aligned with the International Capital Market Association (ICMA) Green Bond Principles and Social Bond Principles on the Use of Proceeds). Instruments that meet these requirements were labelled 'sustainable investments'. The percentage of the portfolio invested in bonds financing green and/or social projects can be found in the table under the "How did the sustainability indicators perform" section of this annex.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The sustainable investments that the sub-fund partially made did not cause significant harm to the sustainable investment objective through the negative screening. The sub-fund took into account the indicators of the principle adverse impacts of investment decisions on sustainability factors as stated in Table 1 of Annex I of Delegated Regulation (EU) 2022/1288, as well as the relevant indicators for the principle adverse impacts of investments decisions on sustainability factors in Tables 2 and 3 of Annex I of Delegated Regulation (EU) 2022/1288 through the negative screening.

The negative screening amounts to the sub-fund's a priori exclusion of issuers from the Responsible Investment universe which fall foul the exclusion policies.

The application of these policies means that issuers involved in activities such as fossil fuels, the tobacco industry, arms, gambling and adult entertainment are excluded from the sub-fund's investment universe. Investments in financial instruments linked to livestock and food prices are also excluded. All companies that derive at least 5% of their revenues from the production or 10% of their revenues from the sale of fur or special leather, are excluded. The negative screening also ensures that issuers based in countries that encourage unfair tax practices, that seriously violate

fundamental principles of environmental protection, social responsibility and good governance (through the normative screening, through a poor ESG risk rating, due to involvement in unsustainable countries by not meeting the sustainability criteria and controversial regimes, due to severe controversies related to water emissions, pollution or waste and gender diversity and due to high or severe controversies in the context of activities that have a negative impact on biodiversity and for which insufficient measures are taken to reduce their impact) are excluded from the sub-fund's investment universe.

These principles of negative screening are not exhaustive and may be modified on the advice of the Responsible Investing Advisory Board.

----- *How were the indicators for adverse impacts on sustainability factors taken into account?*

Through the exclusion policy for Responsible Investing funds and, in particular, the normative screening and ESG risk assessment, all indicators of the principle adverse impacts of investment decisions on sustainability factors as stated in Table 1 of Annex I of Delegated Regulation (EU) 2022/1288, as well as the relevant indicators for the principle adverse impacts of investments decisions on sustainability factors in Tables 2 and 3 of Annex I of Delegated Regulation (EU) 2022/1288 were taken into account for instruments issued by companies. The sub-fund did not invest in companies that seriously violate the principles of the United Nations Global Compact and the Organization for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises, and any companies involved in serious controversies related to environmental, social or good governance issues are also excluded. Also excluded were companies with an ESG risk score of more than 40 according to data provider Sustainalytics.

For investments in instruments issued by countries, the indicators of the principle adverse impacts of investment decisions on sustainability factors as stated in Table 1 of Annex I of Delegated Regulation (EU) 2022/1288, as well as the relevant indicators for the principle adverse impacts of investments decisions on sustainability factors in Tables 2 and 3 of Annex I of Delegated Regulation (EU) 2022/1288 were taken into account by excluding countries in the worst 10% according to the ESG score model, and by excluding countries that do not comply with sustainability criteria and are exposed to controversial regimes.

In addition to the normative screening and ESG risk assessment, through the positive selection methodology on greenhouse gas intensity and the exclusions in the exclusion policy for Responsible Investment funds, the following indicators of principle adverse impacts on sustainability factors were also considered for all investments of this sub-fund:

- **Indicator 3:** greenhouse gas ('GHG') intensity of investee companies was taken into account through the greenhouse gas intensity reduction target for companies.
- **Indicator 4:** exposure to companies active in the fossil fuel sector was taken into account as the sub-fund did not invest in companies that are active in the fossil fuel sector. In order to support companies in their transition to a more sustainable future, an exception is made for green bonds issued by companies that have been excluded solely on the basis of the fossil fuel policy.
- **Indicator 7:** Activities negatively affecting biodiversity-sensitive areas were taken into account as the sub-fund does not invest in companies that have high or severe controversies related to Land Use and Biodiversity as well as companies with activities that have a negative impact on biodiversity and that don't take sufficient measures to reduce their impact.
- **Indicator 10:** Violations of the United Nations Global Compact (UNGC) Principles and the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises was taken into account as the sub-fund did not invest in companies that seriously violate UNGC principles or OECD guidelines.
- **Indicator 14:** exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons) was taken into account as the sub-fund did not invest in companies that are active in controversial weapons.
- **Indicator 15:** GHG intensity of investee countries was taken into account through the greenhouse gas intensity reduction target for sovereign related investments.
- **Indicator 16:** Investee countries subject to social violations was taken into account as the sub-fund did not invest in (i) Countries that do not comply with sustainability criteria and (ii) countries exposed to controversial regimes. More information can be found in the exclusion policy for Responsible Investing funds.

In addition, the principal adverse impacts on sustainability factors were implicitly taken into account through the Proxy Voting and Engagement Policy of KBC Asset Management NV.

A complete overview of the indicators of principal adverse impacts on sustainability factors that the sub-fund can take into account can be found in Annex I of Delegated Regulation (EU) 2022/1288.

----- Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes.

Companies seriously violating the basic good practices in terms of environmental, social and governance issues, as assessed by the UN Global Compact Principles, were excluded from the sub-fund. The United Nations Global Compact has formulated ten guiding sustainability principles regarding human rights, labour, environment and anti-corruption which are part of the internal screening. In addition, KBC AM assessed the companies' involvement in violations of the International Labour Organization's (ILO) Conventions, the OECD Guidelines for multinational enterprises and the UN Guiding Principles on Business and Human Rights.

The sub-fund commits to respect the letter and the spirit of the United Nations Universal Declaration of Human Rights; the principles concerning fundamental rights in the eight International Labour Organisation core conventions as set out in the Declaration on Fundamental Principles and Rights at Work; the UN Declaration on the Rights of Indigenous Peoples; the UK Modern Slavery Act and other international and regional human rights treaties containing internationally recognised standards by which the business sector must abide.

KBC Asset Management NV assesses all companies on the 'Human Rights List' of KBC Group as well as all companies meeting the criteria below:

- a high or severe controversy score related to Human Rights, for subindustries for which Human Rights are considered a high or severe risk.
- a severe controversy score related to Human Rights, for all other subindustries.

Based on this assessment, appropriate measures were taken, ranging from engagement with the companies concerned to selling positions. More information on the Policy on Human Rights can be found on the KBC Asset Management NV website.

More information on negative screening can be found in the section on "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?" of this annex.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The principal adverse impacts on sustainability factors were explicitly taken into account for all investments of this sub-fund by the exclusion policies applied. In addition, the principle adverse impacts on sustainability factors were implicitly taken into account through KBC Asset Management NV's proxy voting and engagement policies.

More information on the principal adverse impacts on sustainability factors can be found under the heading 'How were the indicators for adverse impacts on sustainability factors taken into account' of this Annex.

What were the top investments of this financial product?

This list includes the investments constituting the **greatest proportion** of the financial product during the reference period which is:
01/01/2024-31/12/2024

Largest investments	Sector	% assets	Country
KBC Part. Corporate Bds Responsible Investing -ISB	Financial Services	12.49%	Belgium
KBC Bonds Strategic Broad 25/75 RI -ISB	Financial Services	11.47%	Luxembourg
KBC Bonds Strategic Broad 50/50 RI -ISB	Financial Services	11.47%	Luxembourg
KBC Bonds Strategic Broad 75/25 RI -ISB	Financial Services	11.46%	Luxembourg
KBC Renta Eurorenta Responsible Investing - ISB	Financial Services	11.39%	Luxembourg

What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments was 50.62%.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

The sub-fund could invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described in the prospectus under title "Information concerning the sub-fund KBC Defensive Conservative Responsible Investing".

Within these categories of eligible assets, the sub-fund invested 99.35% in assets that promote environmental or social characteristics and 0.65% in other investments.

Corporate and sovereign investments in issuers passing the negative screening and contributing to at least one specific positive selection of the investment policy for Responsible Investing funds were considered as 'assets promoting environmental and social characteristics'.

(Term) deposits whose counterparties pass the negative screening and have at least a +2 Net Alignment Score on one of the first 15 UN Sustainable Development Goals at MSCI were also considered as 'assets promoting environmental and social characteristics'.

More information on the MSCI Net Alignment Score can be found in the investment policy for Responsible Investing funds which is available on www.kbc.be/investment-legal-documents > Investment policy for Responsible Investing funds.

The category "other investments" contained technical items, such as cash and derivatives, and assets in which the sub-fund invests temporarily following a planned update of the eligible universe, which determines the assets that promote environmental and/or social characteristics, for which there are no environmental or social safeguards. The sub-fund held or invested in these types of assets to achieve investment objectives, to diversify the portfolio, for liquidity management purposes and to hedge risks.

Derivatives were used to hedge risks as described in permitted derivatives transactions as set out in section 2. 'Investment information' under title 'Information concerning the sub-fund KBC Defensive Conservative Responsible Investing' of the prospectus.

Investments in derivatives are not used to attain the environmental or social characteristics promoted by the financial product and will not affect them.

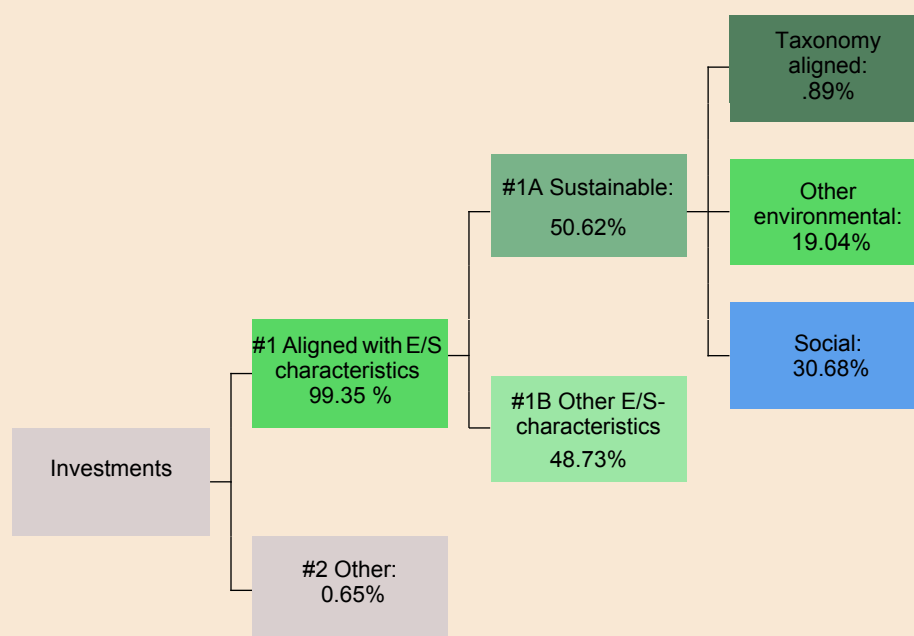

19.04% of sustainable investments are environmentally sustainable investments (not taxonomy-aligned), 0.89% are environmentally sustainable investments (taxonomy-aligned) and 30.68% are socially sustainable investments.

The sustainable investments are equal to the sum of investments that are considered "sustainable" based on the published methodology on contributing to the achievement of the UN Sustainable Development Goals, plus investments in bonds that can be considered as bonds financing green and/or social projects, plus instruments that are considered "sustainable" by the Responsible Investing Advisory Board.

In addition, companies that have at least 20% of their revenues aligned with the EU Taxonomy Framework according to data from Trucost, are considered to contribute to sustainable development. Instruments of companies that meet these requirements are referred to as "sustainable investments," according to art. 2(17) SFDR.

More information can be found at the section 'What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?' of this Annex.

To determine compliance with the EU taxonomy, the criteria for **fossil gas** include emission limits and conversion to renewable energy or low-carbon fuels by the end of 2023. For **nuclear power**, the criteria include comprehensive rules on safety and waste management.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product;

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S-characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

On 31/12/2024 the investments were made in the following sectors:

Sector	%Assets
National	26.22%
Banking	11.87%
Financial Services	7.58%
Health Care	7.49%
Tech Hardware & Semiconductors	5.55%
Software & Tech Services	4.88%
Materials	4.63%
Media	4.29%
Insurance	3.77%
Real Estate	3.52%
Consumer Staple Products	3.42%
Supranationals	3.15%
Retail & Wholesale - Discretionary	2.88%
Telecommunications	2.54%
Utilities	2.37%
Consumer Discretionary Products	2.06%
Unclassifiable	1.28%
Consumer Discretionary Services	1.17%
Industrial Services	0.40%
Industrial Products	0.38%
Retail & Wholesale - Staples	0.30%
Regional & Local	0.22%
Renewable Energy	0.03%

Sectors and sub-sectors of the economy that derive income from exploration, mining, extraction, production, processing, storage, refining or distribution - including transportation, storage and trading - in fossil fuels are excluded by the exclusion policy. Consequently, the sub-fund has not invested in these sectors and sub-sectors.

However, an exception is provided in the exclusion policy for investments in green bonds of these companies, which promote the energy transition. Consequently, for the portion invested in green bonds, there may be exposure to these sectors.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The sub-fund does not specifically seek to invest in environmentally sustainable economic activities within the meaning of the EU Taxonomy Framework ("investments aligned with the EU Taxonomy"). Although the sub-fund does not aim to invest in investments aligned with the EU Taxonomy, it cannot be ruled out that the sub-fund does contain investments aligned with the EU Taxonomy. The percentage of investments aligned with the EU taxonomy is 0.89% for this reporting period. This percentage is a weighted quarterly average and includes investments in companies that have at least 20% of their revenues aligned with the EU Taxonomy Framework according to data from Trucost. Asset managers depend on available sustainability data relating to their investee companies. Currently, there is a lack of sustainability data available. This has created the risk that investment funds currently report a very low percentage of investments that comply with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy⁽¹⁾?

Yes:

In fossil gas

In nuclear energy

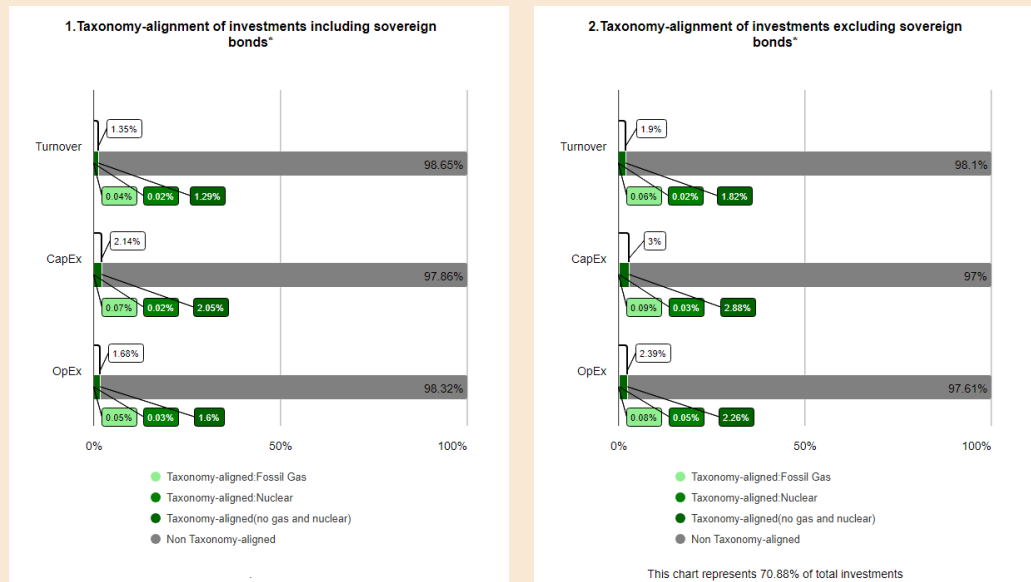

No

(1) Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The sub-fund has invested in activities in the fossil gas and/or nuclear energy sectors that comply with EU taxonomy based on data provided by Trucost. This data does not take into account the definition of 'taxonomy aligned' used by KBC AM NV. According to KBC AM NV's definition, investments in companies are taxonomy-aligned when at least 20% of revenues are aligned with the EU taxonomy framework.

Taxonomy-aligned activities are expressed as a share of:
-turnover reflecting the share of revenue from green activities of investee companies.
-capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
-operational expenditure (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

***For the purpose of these graphs, "sovereign bonds" consist of all sovereign exposures.**

The figure data in the above charts are from data provider Trucost and do not take into account the definition of 'taxonomy-aligned' used by KBC AM NV. According to KBC AM NV's definition, investments in companies are taxonomy-aligned when at least 20% of revenues are aligned with the EU taxonomy framework. Consequently, it is therefore possible that the percentage shown in green (EU taxonomy-aligned investments) in the above charts differs from the 'Taxonomy-aligned' percentage in the table under the 'What was the asset allocation?' section of this annex.

● **What was the share of investments made in transitional and enabling activities?**

The proportion of investments in transition activities was 0.05%.

The proportion of investments in enabling activities was 0.77%.

The figures described in this section are from data provider Trucost.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

During the previous reference period (which ran from 1 January 2023 to 31 December 2023) the percentage of investments aligned with the EU taxonomy was set at 0%. KBC Asset Management NV determined that, at that time, insufficient reliable, timely and verifiable data from issuers or investee companies was available for consistent reporting, based on its own research and services from data providers.

The percentage of investments aligned with the EU taxonomy of the current reference period is 0.89%. This percentage is a weighted quarterly average and includes investments in companies with at least 20% of sales aligned with the EU taxonomy framework (based on data from Trucost). According to KBC AM's definition, investments only qualify as "aligned with the EU taxonomy" when at least 20% of the turnover of investee companies is aligned with the EU taxonomy.

Asset managers depend on available sustainability data relating to their investee companies. Currently, there is a lack of sustainability data available. This has created the risk that investment funds currently report a very low percentage of investments that comply with the EU Taxonomy.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The sub-fund invested 50.62% in sustainable investments as defined in article 2(17) SFDR. The proportion of sustainable investments with an environmental objective that were not aligned with the EU taxonomy was 19.93%.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 30.68%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

During the reporting period, the “other” category could include the following investments:

Assets	Purpose of investments and presence of minimum environmental or social safeguards
Investments in cash	The sub-fund held or invested in these types of assets to achieve investment objectives, to diversify the portfolio, for liquidity management purposes and to hedge risks.
Investments in assets that no longer met screening criteria	The sub-fund held or invested in these types of assets to achieve investment objectives, to diversify the portfolio, for liquidity management purposes and to hedge risks.
Investments in derivatives	Derivatives were used to hedge risks as described in permitted derivatives transactions as set out in section 2. ‘Investment information’ under title ‘Information concerning the sub-fund KBC Defensive Conservative Responsible Investing’ of the prospectus. Investments in derivatives were not used to attain the environmental or social characteristics promoted by the sub-fund and did not affect them.

For investments included under “#2 Other”, there were no environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The sub-fund

- promoted the integration of sustainability into the policy decisions of issuers (companies, governments, supranational debtors and/or agencies linked to governments), by preferring issuers with a better ESG (risk)score;
- promoted climate change mitigation, by preferring issuers with lower greenhouse gas Intensity, with the objective of meeting a predetermined greenhouse gas intensity target;
- promoted sustainable development through ‘sustainable investments’ in accordance with art. 2(17) SFDR.

Sustainable investments consist of bonds financing green and/or social projects and investments in issuers contributing to the achievement of the UN Sustainable Development Goals.

However, no binding minimum percentage has been set for this latter category, although it contributes to the achievement of the minimum percentage of ‘sustainable investments’ for this sub-fund.

The sub-fund excluded issuers involved in activities such as fossil fuels, the tobacco industry, weapons, gambling and adult entertainment from the sub-fund's investment universe. Investments in financial instruments linked to livestock and food prices were also excluded. Companies that derive at least 5% of their income from production or 10% of their income from the sale of fur or special leather were excluded. The negative screening also ensured that issuers based in countries that encourage unfair tax practices, that seriously violate fundamental principles of environmental protection, social responsibility and good governance (through the normative screening, through a poor ESG risk rating, due to involvement in countries that do not comply with sustainability principles by not meeting the sustainability criteria or are exposed to controversial regimes, due to severe controversies related to water emissions, pollution or waste and gender diversity and due to high or severe controversies in the context of activities that have a negative impact on biodiversity and for which insufficient measures are taken to reduce their impact) are excluded from the sub-fund's investment universe.

KBC Asset Management NV executed the voting rights of shares managed in the sub-fund according to the Proxy Voting and Engagement Policy. As such, KBC Asset Management monitored the companies in which the sub-fund is invested in, intervened with investee companies (avoiding insider information), took part in appropriate collective engagement initiatives and exercised voting rights in a considered way. These responsibilities were executed in the exclusive concern of defending the interests of the investors of the funds.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by this sub-fund.

For investments issued by companies the described reference portfolio was used as a basis for comparison, to compare certain ESG characteristics promoted by the sub-fund.

For investments in instruments issued by governments, supranational debtors and/or government-linked agencies, the described reference portfolio of global government bonds was used as a basis for comparison, to compare certain ESG characteristics promoted by the sub-fund.

More information can be found in the table under the "How did the sustainability indicators perform" section of this annex.

● *How did the reference benchmark differ from a broad market index?*

Not applicable.

● *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

Not applicable.

● *How did this financial product perform compared with the reference benchmark?*

Not applicable.

● *How did this financial product perform compared with the broad market index?*

Not applicable.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main object of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

The sub-fund sets out to achieve the highest possible return by investing in line with the investment view of KBC Asset Management NV (see www.kbc.be/investment-strategy). To this end, the fund invests directly or indirectly in various asset classes, such as shares and/or share-related investments (the 'equity component'), bonds and/or bond-related investments (the 'bond component'), money market instruments, cash and cash equivalents, and/or alternative investments (including real estate and financial instruments that are linked to price movements on commodity markets).

The target allocation for the asset classes is 30% shares and/or share-related investments and 70% bonds and/or bond-related investments. The target allocation may be deviated from in line with the investment strategy of KBC Asset Management NV. It is therefore possible for the sub-fund to invest in asset classes that are not included in the target allocation.

Information related to Responsible Investing

Within the above limits, the sub-fund pursues (directly or indirectly) responsible investment objectives based on a dualistic approach: a negative screening and a positive selection methodology.

KBC Asset Management NV has a team of specialist researchers responsible for this dualistic approach. They are

assisted by an independent advisory board (the “**Responsible Investing Advisory Board**”) comprised of up to twelve persons, who are not affiliated to KBC Asset Management NV, and whose sole responsibility is to supervise the dualistic approach and activities of the specialist researchers. The secretariat of the advisory board is handled by a representative of KBC Asset Management NV. Moreover, KBC Asset Management NV works with data suppliers with expertise in Responsible Investing that provide data to the specialized researchers, who process and complete the data with publicly available information (including annual reports, press publications, etc.).

The sub-fund promotes a combination of environmental and/or social characteristics and, even though it does not have sustainable investments as an objective, it shall invest a minimum proportion of its assets in economic activities that contribute to the achievement of environmental or social objectives (i.e. ‘sustainable investments’).

The issuers in which it invests must follow good governance practices.

The sub-fund is compliant with the transparency obligations of article 11 (1) of Regulation (EU) 2019/2088 of the European Parliament and of the council of 27 November 2019 on sustainability-related disclosures in the financial services sector (‘SFDR’). More information on how the sub-fund promotes environmental and social characteristics can be found in the ‘Annex for Horizon KBC Defensive Responsible Investing’ of this annual report. This annex specifically covers the periodic reports for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852.

Negative screening

In practical terms the end result of this negative screening procedure is that the sub-fund excludes issuers in advance from the Responsible Investment universe which fall foul of the exclusion policy available on www.kbc.be/investment-legal-documents > Exclusion policy for Responsible Investing funds.

The application of these policies means that issuers involved in such activities like the tobacco industry, weapons, gambling and adult entertainment are excluded from the sub-fund's investment universe. This screening also ensures that issuers who seriously violate fundamental principles of environmental protection, social responsibility and good governance are excluded from the sub-fund's investment universe.

These negative screening principles are not exhaustive and may be adapted from time to time under the supervision of the Responsible Investing Advisory Board.

Positive selection methodology

Within the defined investment universe and other limits described above, the responsible investment objectives of the sub-fund are the following:

- (1) promote the integration of sustainability into the policy decisions of issuers (companies, governments, supranational debtors and/or agencies linked to governments), by preferring issuers with a better **ESG (risk)score**, where ESG stands for ‘Environmental, Social and Governance’, and
- (2) promote climate change mitigation, by preferring issuers with lower **Greenhouse Gas Intensity**, with the objective of meeting a predetermined Greenhouse Gas intensity target;
- (3) support sustainable development, through ‘sustainable investments’ in accordance with art. 2(17) SFDR. Sustainable investments will consist of **bonds financing green and/or social projects** (3.1) and investments in issuers contributing to the achievement of the **UN Sustainable Development Goals** (3.2). However, no binding minimum percentage has been set for this latter category, although it contributes to the achievement of the minimum percentage of ‘sustainable investments’ for this sub-fund.

More information on the investment policy for Responsible Investing funds is available at www.kbc.be/investment-legal-documents > Investment policy for Responsible Investing funds.

(1) ESG-(risk)score

The contribution to the integration of sustainability into policy decisions of the issuers is measured based on an ESG (risk) score. For companies, an ESG risk score is assigned, for countries an ESG score. This score represents the aggregated performance assessment of a given issuer against a series of ESG criteria which are grounded to the extent possible against objective measures. The main factors underpinning the ESG criteria are:

- In the case of instruments issued by companies:
 - respect for the environment (e.g., reduction in greenhouse gas emissions);
 - attention to society (e.g., employee working conditions); and
 - corporate governance (e.g., independence and diversity of the board of directors).

At least 90% of the corporate investments in the portfolio, as measured by assets under management, must have an ESG risk score. The ESG risk score for companies is an ESG risk score supplied by a data provider.

- In the case of instruments issued by national governments, supranational debtors and/or agencies linked to governments, the following five pillars are used
 - overall economic performance and stability (e.g., quality of institutions and government);
 - socio-economic development and health of the population (e.g., education and employment);
 - equality, freedom and the rights of all citizens;
 - environmental policy (e.g., climate change); and
 - security, peace and international relations.

These lists are not exhaustive and may be changed under the supervision of the Responsible Investing Advisory Board.

KBC Asset Management NV assigns an ESG score to at least 90 % of the investments in countries within the portfolio, as measured by assets under management.

To achieve this objective, the ESG-risk score of the portfolio for companies is compared to following benchmarks: MSCI All Countries World - Net Return Index and iBoxx Euro Corporate bonds Total Return Index.

The ESG score for countries of the portfolio is compared to a reference portfolio of global government bonds (composed of the following benchmarks: 67% developed markets: J.P. Morgan GBI Global Unhedged EUR and 33% emerging markets: J.P. Morgan GBI-EM Global Diversified Composite Unhedged EUR).

To calculate the ESG-(risk)score at portfolio level, the weighted average of the ESG-(risk)scores of the positions in the sub-fund are taken into account. Technical items such as cash and derivatives are not taken into account and also companies or countries for which no data is available are left out. The weights used in the calculation depend on the size of the positions in the sub-fund, rescaled for these items.

More information on the ESG-(risk)score and the concrete goals of the sub-fund can be found in the 'Annex for Horizon KBC Defensive Responsible Investing' to the prospectus.

The targets can be revised upwards or downwards.

(2) Greenhouse Gas Intensity

The objective to promote climate change mitigation, by favoring lower greenhouse gas intensity issuers, with the goal of meeting a predetermined greenhouse gas intensity target covers at least 90% of the portfolio. The objective does not apply to issuers for which data is not available.

The contribution of issuers to climate change mitigation is measured based on their greenhouse gas intensity. For companies, greenhouse gas intensity is defined as absolute greenhouse gas emissions (in tonnes CO₂ equivalent), divided by revenues (in mln USD). For countries, it is defined as the greenhouse gas emissions (in tonnes CO₂ equivalent), divided by the Gross Domestic Product (in mln USD).

The targets for instruments issued by companies are different from those for instruments issued by national governments, supranational debtors and/or government-linked agencies.

More information on Greenhouse Gas Intensity and the concrete goals of the sub-fund can be found in the 'Annex for Horizon KBC Defensive Responsible Investing' to the prospectus.

The targets may be revised upwards or downwards.

(3) Sustainable investments

(3.1) Bonds financing green and/or social projects

To encourage the transition to a more sustainable world, the sub-fund commits to invest a minimum proportion of the portfolio in bonds financing green and/or social projects. Bonds whose proceeds will be used exclusively to finance (a combination of) green and social projects that are aligned with the International Capital Market Association (ICMA) Green Bond Principles and Social Bond Principles on the Use of Proceeds are considered bonds financing green and/or social projects. Compliance with these principles is verified by an external party. Instruments that meet these requirements are labelled 'sustainable investments', in line with article 2(17) SFDR.

More information on bonds financing green and/or social projects and the concrete goals of the sub-fund can be found in the 'Annex for Horizon KBC Defensive Responsible Investing' to the prospectus.

The targets may be revised upwards or downwards.

(3.2) UN Sustainable Development Goals

To support sustainable development, the sub-fund can invest part of its portfolio in issuers that contribute to the UN Sustainable Development Goals. The UN Sustainable Development Goals include both social and environmental objectives.

Companies are considered to contribute to sustainable development when at least 20% of the revenues are linked to the UN Sustainable Development Goals. The activities of the companies are assessed on multiple sustainable themes that can be linked to the UN Sustainable Development Goals.

Governments are assessed on the five pillars as described in the ESG score, which contain indicators that can be linked to the 17 UN Sustainable Development Goals. If a government scores sufficiently well on one of these pillars and not significantly poor on the other pillars, the bonds of this government and its sub-governments and agencies are considered to be instruments that contribute to sustainable development. Bonds of supranational governments contribute to the UN's Sustainable development goals if one of the two criteria is met:

- at least half of its members contribute to the UN Sustainable Development Goals (weighted by voting power/full paid-in capital/percentage of population (in order of availability)).
- the mission statement of the supranational institution has a sustainable objective and less than half of its members fall in the worst half of the screening for controversial regimes.

Instruments of issuers that meet these requirements are designated as "sustainable investments," according to Article 2(17) SFDR. In addition, the Responsible Investing Advisory Board can award the "sustainable development" label to instruments of companies and governments. In that case, these investments shall also qualify as "sustainable investments," according to Article 2(17) SFDR. However, the awarding of the 'sustainable development' label by the Responsible Investing Advisory Board to instruments of governments is very exceptional.

More information about the methodology used to qualify investments as investments which contribute to the UN Sustainable Development Goals can be found in the 'Annex for Horizon KBC Defensive Responsible Investing' to the prospectus.

Potential Exceptions

It cannot be ruled out, however, that very limited investments may be made temporarily in assets that do not meet the above criteria. The reasons for this include the following:

- Developments as a result of which an issuer can no longer be regarded as eligible after purchase;
- Corporate events, such as a merger of one company with another, where the merged company can no longer be considered an eligible issuer based on the above criteria;
- Incorrect data as a result of which assets are invested (unintentionally and erroneously) in assets purchased when it should not have been eligible for the sub-fund;
- A planned update of the screening criteria as a result of which assets should be excluded from the sub-fund, but which the management company chooses to refrain from selling immediately in the best interest of the customer;
- External circumstances such as market movements and updates of external data can lead to investment solutions failing to achieve the abovementioned targets.

In these cases, the fund manager will replace the assets concerned with more appropriate assets as soon as possible, always taking into account the sole interest of the investor.

In addition, for the purpose of efficient portfolio management, the fund manager may to a significant degree use derivatives relating to assets issued by issuers that would not be eligible for inclusion in the sub-fund, in so far as there is no serviceable and comparable alternative available on the market. In addition, the counterparties with which the derivative transactions are entered into may not necessarily be issuers having a responsible nature.

The stock component is invested in a worldwide selection of shares that may come from any region, sector or theme.

For details of the bond component, please see the 'Characteristics of the bonds and debt instruments' section below.

The fund is actively managed with reference to the following benchmark: 30% MSCI All Countries World - Net Return Index, 35% JP Morgan EMU Government Bonds Investment Grade ALL Maturities - Total Return Index, 35% iBoxx Euro Corporate bonds Total Return Index.

However, it is not the aim of the fund to replicate the benchmark. The composition of the benchmark is taken into account when compiling the portfolio.

The composition of the portfolio will vary from that of the benchmark, as the composition of the benchmark is not fully consistent with the environmental and/or social characteristics promoted by the sub-fund. The use of the benchmark does not detract from the responsible character of the portfolio. The responsible character is guaranteed by the aforementioned Responsible Investing methodology.

The benchmark is also used to determine the fund's risk limitation mechanism. This limits the extent to which the fund's return may deviate from the benchmark.

The longterm expected tracking error for this fund is 1.50%. The tracking error measures the volatility of the fund's return relative to that of the benchmark. The higher the tracking error, the more the fund's return fluctuates relative to the benchmark. Market conditions may cause the actual tracking error to differ from the expected tracking error.

Taxonomy related information

At the date of this prospectus, the sub-fund does not commit to invest a minimum proportion of its assets in environmentally sustainable economic activities which contribute to any of the environmental objectives set out in Article 9 of the Regulation (EU) 2020/852 of the European Parliament and of the Council of 18 June 2020 on the establishment of a framework to facilitate sustainable investment ('EU Taxonomy Framework'). The minimum proportion of investments in environmentally sustainable economic activities within the meaning of the EU Taxonomy Framework is 0%. This will be monitored on a regular basis and as soon as sufficiently reliable, timely and verifiable data from issuers or invested companies is available, the prospectus may be updated.

Companies are considered to contribute to sustainable development if at least 20% of sales are linked to the UN Sustainable Development Goals. This includes companies with at least 20% of sales aligned to the EU Taxonomy Framework based on Trucost data. Instruments of companies that meet these requirements are referred to as "sustainable investments," according to art. 2(17) SFDR. More information on the percentage in the portfolio that was considered "sustainable investments with an environmental objective aligned with the EU Taxonomy Framework" based on this criterion during the reporting period, can be found in the annual reports for this sub-fund published after Jan. 1, 2024.

More information on the EU Taxonomy Framework can be found in the 'Annex for Horizon KBC Defensive Responsible Investing' to the prospectus.

Transparency of adverse sustainability impacts:

The sub-fund considers the principal adverse impacts of its investment decisions on sustainability factors by taking into account the principal adverse impact indicators ('PAI'), as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability disclosure in the financial services sector ('SFDR').

The principal adverse impacts on sustainability factors were explicitly taken into account through the general exclusion policy for conventional funds and Responsible Investing funds and the exclusion policy for Responsible Investing funds. The principal adverse impacts on sustainability factors that were taken into account through the exclusion policies can be found in the 'Annex for Horizon KBC Defensive Responsible Investing'.

The principal adverse impacts on sustainability factors were implicitly taken into account through the Proxy Voting and Engagement Policy. The principal adverse impacts on sustainability factors that were taken into account through the Proxy Voting and Engagement Policy can be found in the 'Annex for Horizon KBC Defensive Responsible Investing'.

More information on how the sub-fund aims to consider the principal adverse impacts on sustainability factors can also be found in the 'Annex for Horizon KBC Defensive Responsible Investing'.

Characteristics of the bonds and debt instruments

The sub-fund invests in bonds and debt instruments issued by both companies and public authorities.

The sub-fund invests directly and/or indirectly at least 50% of its assets in bonds and debt instruments

- in securities rated investment grade (at least BBB-/Baa3 for long-term debt, A3/F3/P3 for short-term debt) by at least one of the following rating agencies: Moody's Investors Service, Standard & Poor's or Fitch Ratings, and/or
- in government bonds issued in local currency or non-subordinated corporate bonds* which do not have a credit rating from the rating agencies mentioned above but the issuer of which has an investment grade rating by at least one of the rating agencies mentioned above, and/or
- in money market instruments whose issuer has an investment grade rating (minimum A3/F3/P3 for short-term debt) from at least one of the above rating agencies.

This means that the sub-fund may invest up to 50% of its assets invested in bonds and debt instruments that do not have a credit rating from the above-mentioned rating agencies and/or which do not comply with the above-mentioned credit requirements.

All maturities are taken into consideration in the selection of bonds and debt instruments.

*In the event of the bankruptcy of the relevant issuer, subordinated bonds are subordinated to the company's other debts: the company's other debts are paid first, then and only if there is still capital left, the holders of the subordinated bonds are fully or partially repaid; the holder of the subordinated bond does, however, have priority over the shareholders of the issuer in question.

Investments in assets other than securities or money market instruments

The sub-fund will invest primarily in units of undertakings for collective investment.

Securities Financing Transactions (SFTs)

The sub-fund may not lend any financial instruments.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'.

2.1.4. Financial portfolio management

The intellectual management, with the exception of the creation of the sub-fund and its maintenance in terms of the technical, product-specific and legal aspects has been delegated by the management company to KBC Fund Management Limited, 4th Floor, Scotch House, 6/7 Burgh Quay, Dublin 2, D02 VK44, Ireland.

2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2.1.6. Index and benchmark

See 'Sub-fund's investment policy'.

2.1.7. Policy pursued during the financial year

Following weekly strategy of KBC AM

2.1.8. Future policy

Following weekly strategy of KBC AM.

Horizon Privileged Portfolio Defensive, KBC Master Fund Low, Sivek Global Low and Sivek Global Low RI will merge with the **Horizon KBC Defensive RI**.

2.1.9. Summary risk indicator (SRI)

Comfort Portfolio Shares: 3 on a scale of 1 (lowest risk) to 7 (highest risk)

- a moderate level of inflation risk: the bond component does not provide any protection against an increase in inflation.
- a moderate level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a real chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of credit risk: the bond component invests primarily - but not exclusively- in bonds with an investment grade rating. Consequently, the risk that an issuer can no longer meet its obligations is higher than in an investment that consists only of bonds with an investment grade rating. If investors are in doubt about the creditworthiness of the issuers of the bonds, the value of those bonds can fall.

There is no capital protection.

Classic Shares: 3 on a scale of 1 (lowest risk) to 7 (highest risk)

- a moderate level of inflation risk: the bond component does not provide any protection against an increase in inflation.
- a moderate level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a real chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of credit risk: the bond component invests primarily - but not exclusively- in bonds with an investment grade rating. Consequently, the risk that an issuer can no longer meet its obligations is higher than in an investment that consists only of bonds with an investment grade rating. If investors are in doubt about the creditworthiness of the issuers of the bonds, the value of those bonds can fall.

There is no capital protection.

Comfort Shares: 3 on a scale of 1 (lowest risk) to 7 (highest risk)

- a moderate level of inflation risk: the bond component does not provide any protection against an increase in inflation.
- a moderate level of exchange rate risk: since there are investments in securities that are denominated in

currencies other than the Euro, there is a real chance that the value of an investment will be affected by movements in exchange rates.

- a moderate level of credit risk: the bond component invests primarily - but not exclusively- in bonds with an investment grade rating. Consequently, the risk that an issuer can no longer meet its obligations is higher than in an investment that consists only of bonds with an investment grade rating. If investors are in doubt about the creditworthiness of the issuers of the bonds, the value of those bonds can fall.

There is no capital protection.

Comfort Plus Shares: 3 on a scale of 1 (lowest risk) to 7 (highest risk)

- a moderate level of inflation risk: the bond component does not provide any protection against an increase in inflation.
- a moderate level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a real chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of credit risk: the bond component invests primarily - but not exclusively- in bonds with an investment grade rating. Consequently, the risk that an issuer can no longer meet its obligations is higher than in an investment that consists only of bonds with an investment grade rating. If investors are in doubt about the creditworthiness of the issuers of the bonds, the value of those bonds can fall.

There is no capital protection.

Comfort Prime Shares: 3 on a scale of 1 (lowest risk) to 7 (highest risk)

- a moderate level of inflation risk: the bond component does not provide any protection against an increase in inflation.
- a moderate level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a real chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of credit risk: the bond component invests primarily - but not exclusively- in bonds with an investment grade rating. Consequently, the risk that an issuer can no longer meet its obligations is higher than in an investment that consists only of bonds with an investment grade rating. If investors are in doubt about the creditworthiness of the issuers of the bonds, the value of those bonds can fall.

There is no capital protection.

Institutional F Shares SK: 3 on a scale of 1 (lowest risk) to 7 (highest risk)

- a moderate level of inflation risk: the bond component does not provide any protection against an increase in inflation.
- a moderate level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a real chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of credit risk: the bond component invests primarily - but not exclusively- in bonds with an investment grade rating. Consequently, the risk that an issuer can no longer meet its obligations is higher than in an investment that consists only of bonds with an investment grade rating. If investors are in doubt about the creditworthiness of the issuers of the bonds, the value of those bonds can fall.

There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

2.1.10. Leveraged finance

The total amount of leveraged finance used by the sub-fund is 0.00 EUR.

This amount was calculated by multiplying the leverage ratio calculated using the UCITS-commitment method by the sub-fund's total assets under management.

2.1.11. Value-at-Risk

Not applicable

The internal classification system, on the basis of which this sectoral spread is calculated, has been changed as of 31/12/2023. In order to provide a meaningful comparison of the sectoral spread across reporting periods, the sectoral spread calculations will be de-duplicated in the annual reports. This means that a summary table will be shown for each classification system.

Currency breakdown (as a % of net assets)

The currency distribution of the sub-fund's investments is calculated based on the currency distribution of the underlying investments of the UCIs in which the sub-fund invests (look through).
