# 1. General information on the Bevek

## 1.1. Organisation of the Bevek

### Office

2 Havenlaan - B-1080 Brussels, Belgium.

### Date of incorporation

29 June 2006

### Life

Unlimited.

### Status

Public Bevek with various sub-funds that has opted for investments complying with the conditions of Directive 2009/65/EC and which, as far as its operations and investments are concerned, is governed by the Law of 3 August 2012 relative to undertakings for collective investment complying with the conditions of Directive 2009/65/EC and the undertakings for investment in receivables.

In the relationship between the investors, each sub-fund will be viewed as a separate entity. Investors have a right only to the assets of and return from the sub-fund in which they have invested. The liabilities of each individual sub-fund are covered only by the assets of that sub-fund.

### Board of directors of the Bevek

| Name                | Function                                                                                                | Mandat                                                                          |

## Auditor of the management company

KPMG Bedrijfsrevisoren Belgium, Brussels National Airport 1K, 1930 Zaventem, Belgium, represented by Kenneth Vermeire, company auditor and recognized auditor.

## Financial portfolio management

Regarding the delegation of the management of the investment portfolio, please see the information concerning the sub-funds.

## Financial service providers

The financial services providers in Belgium are:  
KBC Bank NV, Havenlaan 2, B-1080 Brussels

## Custodian

KBC Bank NV, Havenlaan 2, B-1080 Brussels.

### Custodian's activities

The custodian:

- Ensures the safe-keeping of the assets of the Bevek and compliance with the standard obligations in this regard;
- Ensures that the sale, issue, purchase, redemption and withdrawal of shares in the Bevek occur in compliance with the applicable legal and regulatory provisions, the articles of association and the prospectus;
- Ensures that the net asset value of the shares in the Bevek is calculated in accordance with the applicable legal and regulatory provisions, the articles of association and the prospectus;
- Carries out the instructions of , provided that these do not contravene the applicable legal and regulatory provisions, the articles of association and/or the prospectus;
- Ensures that in transactions relating to the assets of the Bevek, the equivalent value is transferred to the Bevekwitwithin the usual terms;
- Ascertains that:

- i. The assets in custody correspond with the assets stated in the accounts of the Bevek;
- ii. The number of shares in circulation stated in the accounts corresponds with the number of shares in circulation as stated in the accounts of the Bevek;
- iii. The investment restrictions specified in the applicable legal and regulatory provisions, the articles of association and the prospectus are respected;
- iv. The rules regarding fees and costs specified in the applicable legal and regulatory provisions, the articles of association and the prospectus are respected;
- v. The returns of the Bevek are appropriated in accordance with the applicable legal and regulatory provisions, the articles of association and the prospectus.

The custodian ensures that the cash flows of the Bevek are correctly monitored and in particular that all payments by or on behalf of subscribers on subscription to shares in the Bevek, have been received and that all the cash of has been booked to cash accounts that:

1. Have been opened in the name of the Bevek, in the name of the management company acting on its behalf, or in the name of the custodian acting on its behalf;
2. Have been opened at an entity as intended in Article 18(1a, b and c) of Directive 2006/73/EC; and
3. Are held in accordance with the principles set out in Article 16 of Directive 2006/73/EC.

If the cash accounts have been opened in the name of the custodian acting in name of the Bevek, no cash from the entity intended in Article 18(1a, b and c) of Directive 2006/73/EC and none of the custodian's own cash may be booked to these accounts.

The assets of the Bevek are placed in custody with a custodian as follows:

- a) For financial instruments that may be held in custody:
  - i. The custodian will hold in custody all financial instruments that may be registered in a financial instrument account in the books of the custodian, as well as all financial instruments that can be physically delivered to the custodian;
  - ii. the custodian will ensure that all financial instruments that can be registered in a financial instrument account in the custodian's books, are registered in the custodian's books in separate accounts in accordance with the principles set out in Article 16 of Directive 2006/73/EC; these separate accounts have been opened in the name of the Bevek or in the name of the management company acting on its account, so that it can be clearly ascertained at all times that they belong to the Bevek, in accordance with the applicable law.
- b) For other assets:
  - i. The custodian will verify that the Bevek or the management company acting on its behalf is the owner of the assets by checking based on information or documents provided by the Bevek or the management company and, where appropriate, of available external proofs, whether the Bevek or the management company acting on its behalf has ownership;
  - ii. The custodian will maintain a register of the assets from which it is clear that the Bevek or the management company acting on its behalf is the owner thereof and will keep that register up-to-date.

The custodian's duty to return the financial instruments only applies to financial instruments that may be held in custody.

### ***Custody tasks delegated by the custodian***

The custodian of the Bevek has delegated a number of custody tasks as of the publication date of this annual/half-year report. The tasks delegated to this sub-custodian are:

- Holding the required accounts in financial instruments and cash;
- Carrying out the custodian's instructions regarding the financial instruments and cash;
- Where required, the timely delivery of the relevant financial instruments to other parties involved with holding them;
- The collection of every type of return from the financial instruments;
- The appropriate communication to the custodian of all information that the sub-custodian receives directly or indirectly from the issuers via the chain of depositaries and performing the required formalities with regard to the financial instruments, with the exception of exercising voting rights, unless otherwise agreed in writing;
- Maintaining and communicating to the custodian all required details regarding the financial instruments;
- Processing corporate events on financial instruments, whether or not after the holder of these instruments has made a choice;
- Providing the services that have been agreed between the custodian and the sub-custodian and are legally permitted, with the exception of investment advice and asset management and/or any other form of advice relating to transactions in or the simple holding of financial instruments;
- Maintaining and communicating to the custodian all required details regarding the financial instruments.

### List of sub-custodians and sub-sub-custodians

The updated list of entities to which the custodian has delegated custody duties and, where applicable, the entities to which the delegated custody duties have been sub-delegated, can be consulted at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents).

The custodian is liable for the loss of financial instruments held in custody in the sense of Article 55 of the Law of 3 August 2012 relative to undertakings for collective investment complying with the conditions of Directive 2009/65/EC and the undertakings for investment in receivables.

Investors can approach the institutions providing the financial services for up-to-date information regarding the identity of the custodian and its principal duties, as well as the delegation of these duties, and the identity of the institutions to which these duties have been delegated or sub-delegated, and also regarding any conflicts of interest as specified below.

### Conflicts of interest

The custodian will take all reasonable measures to identify conflicts of interest that may arise in the execution of its activities between

- The custodian and management company of the Bevek, or the management companies of other beveks or funds of which the custodian holds assets;
- The custodian and the Bevek whose assets the custodian holds, or other beveks or funds of which the custodian holds assets;
- The custodian and the investors in this Bevek whose assets the custodian holds, or other beveks or funds of which the custodian holds assets;
- These parties themselves.

The custodian of the Bevek will implement and maintain effective organisational and administrative procedures in order to take all reasonable measures to detect, prevent, manage and control conflicts of interest so that they do not prejudice the interests of the aforementioned parties.

If these procedures are not sufficient to be able to assume with reasonable certainty that the interests of the aforementioned parties have not been harmed, the investors will be notified of the general nature or causes of conflicts of interest according to the procedure described on the following website: [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) (About Us > Code of conduct for conflicts of interest). Investors who wish to be informed personally of such conflicts of interest can contact the financial services providers. If necessary, the open-ended investment company's custodian will adjust its processes.

## 1.2. Management report

### 1.2.1. Information for the shareholders

#### 1.2.1.1. Securities Financing Transactions (SFTs)

Except for the sub-fund ČSOB Airbag 1, ČSOB Airbag Amerika 1, ČSOB Digitalizace 1, ČSOB Globálních firem 5, ČSOB Globálních firem 7, ČSOB Globálních firem 8, ČSOB Krátkodobý 1, ČSOB Lookback 1, ČSOB Lookback 2, ČSOB Lookback 3, ČSOB Lookback 4, ČSOB Lookback Amerika 1, ČSOB Lookback farmacie a zdravotnictví 1, ČSOB Lookback farmacie a zdravotnictví 2, ČSOB Potraviny a zboží základní potřeby 2, ČSOB Potraviny a zboží základní potřeby 3, ČSOB Zdravotnictví a farmacie 4, Enhanced Intelligence Global Allocation Responsible Investing, K&H egészség, K&H egészség 2, K&H fix+ egészség, K&H fix+ egészség 2, K&H fix+ élelmiszeripari, K&H fix egészség 1, K&H fix egészség 2, K&H fix világcégek euró, K&H napjaink, World Fix 100-1, World Fix 100-2, World Fix 100-3, World Fix 100-4, World Selection 100-1 applies:

#### General

**Each sub-fund may lend financial instruments within the limits set by law and regulations.**

Lending financial instruments is a transaction where one a sub-fund transfers financial instruments to a counterparty in exchange for financial collateral and subject to an undertaking on the part of that counterparty to supply the sub-fund with comparable financial instruments at some future date or on the sub-fund's request. The counterparty pays a fee for this to the sub-fund.

This takes place within the framework of a securities lending system managed by either a 'principal' or an 'agent'. If it is managed by a principal, a sub-fund has a relationship only with the principal of the securities lending system which acts as counterparty and to whom title to the loaned securities is transferred. If it is managed by an agent, a sub-fund has a relationship with the agent (as manager of the system) and with one or more counterparties to whom title to the loaned securities is transferred. The agent acts as intermediary between a sub-fund and the counterparty or counterparties.

The sub-funds use the lending of financial instruments to generate additional income. This might consist of a fee paid by the principal or, in the event that the fund performs the securities lending through an agent, by the counterparty, as well as income generated through reinvestments.

**The sub-funds are not permitted to agree forms of SFTs other than lending financial instruments.**

#### General information on the SFTs used

| Type of SFT                   | Types of asset that the SFT can involve          | Maximum percentage of the assets under management that can be involved in the SFT                           | Anticipated percentage of the assets under management that will be involved in the SFT                                              |
|-------------------------------|--------------------------------------------------|-------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------|
| Lending financial instruments | Only <b>shares</b> and <b>bonds</b> will be lent | When lending financial instruments a <b>maximum of 30% of the assets under management</b> will be involved. | <b>Depending on market conditions 0–30% of the assets under management</b> will be involved in the lending of financial instruments |

## Criteria for the selection of counterparties

Lending financial instruments only occurs with high-quality counterparties. The management company selects which counterparties qualify for the lending of financial instruments.

The selected counterparties must meet the following minimum requirements to this end:

| Legal status                                                                                                                                                                                                                                                                                                                                                                                                                         | Minimum rating                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | Country of origin                                                         |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------|
| The counterparty must belong to one of the following categories:<br><br>a) A credit institution; or<br>b) An investment firm; or<br>c) A settlement or clearing institution; or<br>d) A central bank of a member state of the European Economic Area, the European Central Bank, the European Investment Bank or a public international financial institution in which one or more European Economic Area member states participate. | Only counterparties rated as investment grade may be considered.<br><br>An investment-grade rating means: a rating equal to or higher than BBB- or Baa3 according to one or more of the following accredited rating agencies:<br><br>- Moody's (Moody's Investors Service);<br>- S&P (Standard & Poor's, a division of the McGraw-Hill Companies); en<br>- Fitch (Fitch Ratings).<br><br>If the counterparty does not have a rating, the rating of the counterparty's parent company may be taken into consideration. | All geographical regions may be considered when selecting counterparties. |

The relationship with the counterparty or counterparties is governed by standard international agreements.

## Description of acceptable financial collateral and its valuation

When a sub-fund lends financial instruments, it receives financial collateral in return. This financial collateral protects the sub-fund fund from default on the part of the counterparty to which the financial instruments have been lent.

Each sub-fund may accept the following forms of financial collateral:

- **Cash**; and/or
- **Bonds and other debt instruments**, issued or guaranteed by the central bank of a member state of the European Economic Area, the European Central Bank, the European Union or the European Investment Bank, a member state of the European Economic Area or the Organisation for Economic Cooperation and Development, or by a public international institution in which one or more member states of the European Economic Area participate, other than the counterparty or a person associated with it, and which are permitted to trade on a regulated market; and/or
- **Participation rights in a monetary undertaking for collective investment** that complies with Directive 2009/65/EC or which meets the conditions of Article 52(1:6) of the Royal Decree of 12 November 2012 on certain public institutions for collective investment which meet the conditions of Directive 2009/65/EC, and the net asset value of which is calculated and published daily.

The valuation of the financial collateral occurs daily in accordance with the most applicable and accurate method: mark-to-market. A daily variation margin applies based on the daily valuation. Consequently, daily margin calls are possible.

There are no limits regarding the term of the financial collateral.

## Reuse of financial collateral

If a sub-fund receives collateral in the form of cash, it can reinvest this cash in

- **deposits with credit institutions** which can be withdrawn immediately and which mature within a period not exceeding twelve months, provided that the office of the credit institution is situated within a member state of the EEA, or if the office is established in a third country, provided that it is subject to prudential supervisory rules which the FSMA considers as being equivalent to the rules under European Law.
- **short term money market funds** as defined in Regulation (EU) 2017/1131 of the European Parliament and of the Council of 14 June 2017 on money market funds.
- **government bonds** that are denominated in the same currency as the cash received and that meet the terms and conditions set out in the Royal Decree of 7 March 2006 on securities lending by certain undertakings for collective investment.

Reinvesting in this way can eliminate the credit risk to which a sub-fund is exposed concerning the collateral in respect of the financial institution where the cash account is held, but there is still a credit risk in respect of the issuer or issuers of the debt instrument(s). The management company may delegate implementation of the reinvestment policy to a third party, including the agent managing the securities lending system.

Reinvestment in deposits at the same credit institution may not exceed 10% of the sub-fund's total assets. Reinvestment in bonds issued by the same public authority may not exceed 20% of the sub-fund's total assets.

### ***Policy on the diversification of collateral and the correlation policy***

**A sub-fund is not permitted to accept financial collateral issued by the party offering them.**

A sub-fund's exposure to financial collateral issued by the same issuer may not exceed 20% of the sub-fund's net assets.

### ***Holding of the financial collateral***

The financial collateral will be held in the following manner:

- for cash: held in a cash account; and
- for financial collateral that is not cash: registration in a custody account.

The custodian of the financial collateral and/or the entity to which certain tasks relating to the custody of the financial collateral has been delegated is not necessarily the same entity as the custodian of the Bevek's assets, as stated under 'B. Service providers to the Bevek'.

### ***Influence of SFTs on a sub-fund's risk profile***

**This lending does not affect a sub-fund's risk profile since:**

- The choice of principal, agent and every counterparty is subject to strict selection criteria.
- The return of securities similar to the securities that have been lent can be requested at any time, which means that the lending of securities does not affect management of a sub-fund's assets.
- A margin management system is used to ensure that a sub-fund is at all times the beneficiary of financial security (collateral) in the form of cash or other specific types of securities with a low risk, such as government bonds, in case the principal or the counterparty (if a sub-fund uses an agent) does not return similar securities. The actual value of the collateral in the form of specific types of securities with a low risk must at all times exceed the actual value of the loaned securities by 5%. Furthermore, when calculating the value of the specific types of securities with a low risk provided as collateral, a margin of 3% is applied, which should prevent a negative change in price resulting in their actual value no longer exceeding the actual value of the securities. The value of the collateral in the form of cash must at all times exceed the actual value of the loaned securities.
- The criteria met by the collateral are such as to limit the credit risk. A rating of at least investment grade is required in the case of collateral in the form of bonds and other debt instruments. In the case of collateral in the form of participation rights in monetary undertakings for collective investment, the inherent diversification of these undertakings limits the credit risk. In the case of cash that is reinvested, a rating of at least investment grade is required when reinvesting in either deposits or government bonds. In the case of reinvestment in short-term money-market funds, the inherent diversification of these funds limits the credit risk.
- The criteria met by these types of collateral are such as to limit the liquidity risk. It must be possible to value the financial collateral on a daily basis by market price or to withdraw it on demand (on reinvestment of cash in deposits).
- In the case of reinvestment of cash, there are additional criteria to limit the market risk associated with the initial values in cash. When reinvesting bonds, only bonds with a remaining term to maturity of no more than one year may be considered. The shortness of this remaining term results in a low sensitivity to interest rate movements. In the case of reinvestment in short-term money-market funds, the low duration of these funds limits the market risk with respect to the initial value in cash.
- The custody of financial collateral consisting of securities occurs by placing the securities in custody accounts which, in the event of the custodian's bankruptcy, are held outside its insolvent estate. The custody of financial collateral consisting of cash occurs by holding it in cash accounts, whether or not segregated. The extent to which the custody of financial collateral consisting of cash occurs in non-segregated accounts has no influence, however, on the sub-fund's risk profile.
- Operational risks are limited by operational controls, in the shape of daily control of the market values of loaned securities and collateral and reconciliation of internal and external data.

### ***Distribution policy for returns on the utilised SFTs***

**By lending securities, a sub-fund can generate additional income, which might consist of a fee paid by the principal or the counterparty (if a sub-fund uses an agent) as well as income generated through reinvestments. After deducting the direct and indirect charges – set at a flat rate of 35% of the fee received and consisting of the charges for the clearing services provided by KBC Bank NV, the charges paid to the management company for setting up and monitoring the system for lending securities, the charges for margin management, the charges associated with cash and custody accounts and cash and securities transactions, the fee paid for any management of reinvestments and, if a sub-fund uses an agent, the fee paid to the agent. This income is paid to a sub-fund. It**

should be noted in this regard that KBC Bank NV is an entity affiliated with the management company.

#### ***1.2.1.2. General strategy for hedging the exchange rate risk***

In order to protect its assets against exchange rate fluctuations and within the limitations laid down in the articles of association, a sub-fund may perform transactions relating to the sale and/or the purchase of forward currency contracts, as well as the sale of call options and the purchase of put options on currencies. The transactions in question may relate solely to contracts traded on a regulated market that operates regularly, that is recognised and that is open to the public or, that are traded with a recognised, prime financial institution specialising in such transactions and dealing in the over-the-counter (OTC) market in options. With the same objective, a sub-fund may also sell currencies forward or exchange them in private transactions with prime financial institutions specialising in such transactions.

### 1.2.1.3. Social, ethical and environmental aspects

The following shall apply in the case of structured sub-funds (ČSOB Airbag 1, ČSOB Airbag Amerika 1, ČSOB Digitalizace 1, ČSOB Globálních firem 5, ČSOB Globálních firem 7, ČSOB Globálních firem 8, ČSOB Krátkodobý 1, ČSOB Lookback 1, ČSOB Lookback 2, ČSOB Lookback 3, ČSOB Lookback 4, ČSOB Lookback Amerika 1, ČSOB Lookback farmacie a zdravotnictví 1, ČSOB Lookback farmacie a zdravotnictví 2, ČSOB Potraviny a zboží základní potřeby 2, ČSOB Potraviny a zboží základní potřeby 3, ČSOB Zdravotnictví a farmacie 4, K&H egészség, K&H egészség 2, K&H fix egészség 1, K&H fix egészség 2, K&H fix világcégek euró, K&H fix+ egészség, K&H fix+ egészség 2, K&H fix+ élelmiszeripari, K&H napjaink, World Fix 100-1, World Fix 100-2, World Fix 100-3, World Fix 100-4, World Selection 100-1):

For the investments described in the individual information regarding the sub-funds in 'Characteristics of bonds and other debt instruments' certain social ethical and environmental aspects are taken into account against which issuers are being assessed.

Investments may not be made in, amongst others:

- financial instruments issued by manufacturers of controversial weapon systems that are prohibited by international (and national) law or for which there is a broad consensus that they should be banned. These weapon systems include: cluster bombs and sub-munitions, chemical or biological weapons, anti-personnel mines (including Claymore mines), weapons containing depleted uranium;
- financial instruments issued by manufacturers of weapons containing white phosphorus;
- financial instruments issued by companies where there are serious indications that they are perpetrators of, accomplices or accessories to, or stand to benefit from the violation of globally recognised standards of Responsible investing. The main criteria used cover human rights, employee rights, the environment and anticorruption.

In this way, not only is a purely financial reality represented, but also the social reality of the sector or region. This list of exclusion criteria is not exhaustive.

A complete overview of the exclusion criteria can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > > General exclusion policies for conventional and Responsible Investing funds. These exclusion criteria can be modified at any time by the management company.

For structured sub-funds whose return is linked to a basket of shares, certain exclusion criteria may apply to the composition of the basket. More information on these exclusion criteria and their degree of applicability can be found in the 'Information concerning the sub-fund – 2. Investment information – Selected strategy'.

Structured sub-funds whose return is linked to an index, may not have any exposure to controversial weapons as described by national law at launch. More information can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > General exclusion policies for conventional and Responsible Investing funds.

**The following shall apply in the case of non-structured sub-funds (ČSOB Krátkodobých dluhopisu, ČSOB Odvážný, ČSOB Opatrný, ČSOB Velmi odvážný, ČSOB Velmi opatrný, Enhanced Intelligence Global Allocation Responsible Investing) :**

The investment policy takes into account certain social, ethical and environmental aspects against which issuers are being assessed.

Investments may not be made in, amongst others:

- financial instruments issued by manufacturers of controversial weapon systems that are prohibited by international (and national) law or for which there is a broad consensus that they should be banned. These weapon systems include: cluster bombs and sub-munitions, chemical or biological weapons, anti-personnel mines (including Claymore mines), weapons containing depleted uranium;
- financial instruments issued by manufacturers of weapons containing white phosphorus;
- financial instruments issued by companies where there are serious indications that they are perpetrators of, accomplices or accessories to, or stand to benefit from the violation of globally recognised standards of Responsible Investing. The main criteria used cover human rights, employee rights, the environment and anticorruption.

In this way, not only is a purely financial reality represented, but also the social reality of the sector or region. This list of exclusion criteria is not exhaustive.

A complete overview of the exclusion criteria can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > General exclusion policies for conventional and Responsible Investing funds. These exclusion criteria can be modified at any time by the management company.

For some sub-funds, additional criteria relating to Responsible Investing may apply. These are further specified in 'Information concerning the sub-fund – 2. Investment information – Selected strategy' and on [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > Exclusion policies for Responsible Investment funds.

For sub-funds that are passively managed and therefore replicate the composition of a financial index, only the following limitation applies:

Investments may not be made in financial instruments issued by manufacturers of controversial weapon systems that are prohibited by national law. These weapon systems include: cluster bombs and sub-munitions, anti-personnel mines (including Claymore mines), weapons containing depleted uranium (More information can be found

at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > General exclusion policies for conventional and Responsible Investing funds.

## Integration of sustainability risk into the investment policy:

In the investment policy, the management company shall take into account the sustainability risk as defined in prospectus under title "F. Information on the risk profile of the UCITS" as follows:

- I. by defining an exclusion policy (the "Exclusion Criteria") applicable to all funds and Sicavs. (Further information can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > General exclusion policies for conventional and Responsible Investing funds); and
- II. additional criteria relating to Responsible Investing may apply for certain sub-funds. If applicable these additional criteria are specified under title '2. Investment information - Selected Strategy' and on [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > Exclusion policies for responsible investment funds.

In its investment policy, the management company constantly assesses the underlying investments at issuer level, but also (if relevant) at the level of the asset allocation and the regional or sectoral allocation. In these regular assessments, the sustainability risk is considered as one of the various elements that can influence the return. The Responsible Investing research team assigns an ESG risk score to the majority of companies included in the best-known benchmarks and to a selection of small and medium-sized companies, based on input from an ESG data provider as well as internal research, where ESG stands for "Environmental, Social and Governance". The ESG risk scores are shared internally with portfolio managers and strategists so that they can use them as a factor in the investment decision-making process. Responsible Investing funds additionally have a target to improve the weighted average ESG risk score (of companies) of the fund versus its asset allocation. More information on our Responsible Investing methodology can be found in this policy document: [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > Investment policy for Responsible Investing funds.

### 1.2.1.4. Summary risk indicator

In accordance with Commission Regulation (EU) No.1286/2014, the Commission Delegated Regulation 2017/653 (EC) of March 8, 2017 as amended by the Commission Delegated Regulation 2021/2268 (EC) of September 6, 2021, a summary risk indicator has been calculated per sub-fund, or where relevant per share class or type of shares. The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. It is given as a figure between 1 and 7. The higher the figure, the greater the potential return, but also the more difficult it is to predict this return. Losses are possible too. The lowest figure does not mean that the investment is entirely free of risk. However, it does indicate that, compared with the higher figures, this product will generally provide a lower, but more predictable return.

The summary risk indicator is assessed regularly and can therefore go up or down based on data from the past. Data from the past is not always a reliable indicator of future risk and return.

The most recent indicator can be found under the 'What are the risks and what could I get in return?' heading in the 'Key Information' document.

### 1.2.1.5. Ongoing charges

The ongoing charges which consist of management fees and other administrative or operating costs on the one hand and transaction costs on the other hand, as calculated in accordance with the provisions of the Commission Delegated Regulation 2017/653 (EC) of March 8, 2017 as amended by the Commission Delegated Regulation 2021/2268 (EC) of September 6, 2021.

The ongoing charges are the charges taken from the UCITS over a financial year. They are shown per sub-fund, or where relevant per share class or type of shares, in a figure for management fees and other administrative or operating costs and a figure for transaction costs. The figure for management fees and other administrative or operating costs represents all annual expenses and other payments from a sub-fund's assets over the given period that is based on the previous year's figures. The transaction cost figure is an estimate of both annual explicit and implicit transaction costs and is based on the transactions of the previous 36 months. For sub-funds, share classes or types of shares that have been in existence for less than 36 months, the Commission Delegated Regulation 2017/653 (EC) of March 8, 2017 as amended by the Commission Delegated Regulation 2021/2268 (EC) of September 6, 2021 establishes a modified estimation method. These figures are expressed as a percentage of the average net assets per sub-fund or, where relevant, of the share class or type of shares.

The following are not included in the charges shown: entry and exit charges paid by the investor, incidental costs such as performance fees and payments made with a view to providing collateral in the context of derivative financial instruments.

### 1.2.1.6. Existence of fee sharing agreements and rebates

The management company may share its fee with the distributor, and institutional and/or professional parties.

In the information for each sub-fund – under '2.4.6. Costs' – you can see the percentage of the fee that has actually been shared for each sub-fund.

If the management company invests the assets of the undertaking for collective investment in units of undertakings for collective investment that are not managed by an entity of KBC Groep NV, and receives a fee for doing so, it will pay this fee to the undertaking for collective investment.

Fee sharing heeft geen invloed op de hoogte van de beheercommissie die a sub-fund to the management company. This management fee is subject to the limitations laid down in the articles of association. The limitations may only be amended after approval by the General Meeting.

The management company has concluded a distribution agreement with the distributor in order to facilitate the wider

distribution of the sub-fund's shares by using multiple distribution channels.

It is in the interests of the holders of shares of a sub-fund and of the distributor for the largest possible number of shares to be sold and for the assets of a sub-fund to be maximised in this way. In this respect, there is therefore no question of any conflict of interest.

#### 1.2.1.7. Existence of Commission Sharing Agreements

For the following sub-funds exist Commission Sharing Agreements: ČSOB Odvážný, ČSOB Opatrný, Enhanced Intelligence Global Allocation Responsible Investing

For the following sub-funds don't exist Commission Sharing Agreements: ČSOB Airbag 1, ČSOB Airbag Amerika 1, ČSOB Digitalizace 1, ČSOB Globálních firem 5, ČSOB Globálních firem 7, ČSOB Globálních firem 8, ČSOB Krátkodobý 1, ČSOB Krátkodobých dluhopisu, ČSOB Lookback 1, ČSOB Lookback 2, ČSOB Lookback 3, ČSOB Lookback 4, ČSOB Lookback Amerika 1, ČSOB Lookback farmacie a zdravotnictví 1, ČSOB Lookback farmacie a zdravotnictví 2, ČSOB Potraviny a zboží základní potřeby 2, ČSOB Potraviny a zboží základní potřeby 3, ČSOB Velmi odvážný, ČSOB Velmi opatrný, ČSOB Zdravotnictví a farmacie 4, K&H egészség, K&H egészség 2, K&H fix+ egészség, K&H fix+ egészség 2, K&H fix+ élelmiszeripari, K&H fix egészség 1, K&H fix egészség 2, K&H fix világcégek euró, K&H napjaink, World Fix 100-1, World Fix 100-2, World Fix 100-3, World Fix 100-4, World Selection 100-1

The Management Company, or where applicable, the appointed manager has entered into a Commission Sharing Agreement with one or more brokers for transactions in shares on behalf of one or more sub-funds. This agreement specifically concerns the execution of orders and the delivery of research reports.

#### What the Commission Sharing Agreement entails:

The Management Company, or where appropriate, the appointed manager can ask the broker to pay invoices on their behalf for a number of goods and services provided. The broker will then pay those invoices using the savings that have been built up to a certain percentage above the gross commission that it receives from the sub-funds for carrying out transactions.

#### N.B.:

Only goods and services that assist the Management Company, or where applicable, the appointed manager in managing the sub-funds in the interest of this a sub-fund can be covered by a Commission Sharing Agreement.

#### Goods and services eligible for a Commission Sharing Agreement:

- Research-related and advice-related services;
- Portfolio valuation and analysis;
- Market information and related services;
- Return analysis;
- Services related to market prices;
- Computer hardware linked to specialised computer software or research services;
- Dedicated telephone lines;
- Fees for seminars when the topic is relevant to investment services;
- Publications when the topic is relevant to investment services;
- All other goods and services that contribute directly or indirectly to achieving the investment objectives of the sub-funds.

The Management Company, or where appropriate, the appointed manager has laid down an internal policy as regards entering into Commission Sharing Agreements and avoiding possible conflicts of interest in this respect, and has put appropriate internal controls in place to ensure this policy is observed.

No CSA accrual during this period.

#### 1.2.1.8. Recurrent fees and charges

| Recurrent fees and charges paid by the Bevek                                  |                                                                                                                                                                                             |
|-------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Fees paid to directors insofar as the General Meeting has approved said fees. | 250 EUR per meeting attended, linked to the director's actual attendance of/participation in the meetings of the Board of Directors. This fee is divided across all the sub-funds marketed. |

#### **1.2.1.9. Non-recurrent fees and charges borne by the investor**

If, at a certain time, the Management Company detects exceptionally high net entries in or exits from a sub-fund, it may decide to impose an additional charge (anti-dilution levy) on the entering or exiting investors concerned, intended for the sub-fund and aimed at neutralising the negative impact on the net asset value caused by investors' entries or exits.

This anti-dilution levy will only be charged in very exceptional situations where, due to exceptional market conditions, the transaction charges resulting from the entries and exits of investors are so high that they would have too great a negative impact on the net asset value (and therefore on existing investors in that sub-fund). At that time, the amount of this anti-dilution levy will be determined by the Management Company in function of the transaction charges.

This anti-dilution levy can be applied in the following sub-funds: ČSOB Kratkodobych dluhopisu, ČSOB Odvážný, ČSOB Opatrný, ČSOB Velmi odvážný, ČSOB Velmi opatrný, Enhanced Intelligence Global Allocation Responsible Investing.

## 1.2.2. General market overview

1 September 2025 – 28 February 2026

### General Investment Climate

#### The economic context

There were a number of notable developments over the reporting period.

In Europe, the economy continued to grow slowly. Inflation remained close to the ECB's 2% target. Producer confidence was mainly at contraction level, but managed to rise above 50 by the end of the reporting period. The service sector remained stronger in relative terms.

In the US, producer confidence remained low until after the turn of the new year, during which time the service sector expanded and grew even stronger. Inflation gradually fell but remained above target. After a weak start to the year, US economic growth picked up pace again with solid figures in the second half of the year. Doubts surrounding the trade war subsided during the third quarter due to a number of agreements, resulting in a further improvement in confidence. A long government shutdown clouded the figures, though the impact was limited. Only the job market weakened somewhat, but consumption was relatively unaffected by it. At the start of 2026, this trend looks set to continue.

#### Monetary policy

Both the American central bank (Fed) and the European Central Bank (ECB) have indicated that there are a great many uncertainties. The Fed cut interest rates several times between September and December 2025, reducing them from 4.375% to 3.625%. Chairman Powell called this 'risk management' due to weakness in the labour market. The key rate remained unchanged in January. Monetary policy is close to its neutral level and growth is considered to be robust. Moreover, the risks to the unemployment rate and inflation are slightly more balanced. The Fed would therefore prefer to wait for more economic data before making a decision on whether to ease its policy.

Between June 2024 and June 2025, the ECB cut the deposit rate several times, reducing it by 2% to the current 2%. President Lagarde stressed that the key rate has reached its lowest point. She is confident that inflation will remain close to the 2% target in subsequent quarters.

#### Currency markets

Despite volatility during the reporting period, the euro closed the period having strengthened only 1.08% against the dollar. It lost 2.89% against the Swiss franc but gained 1.26% against sterling. The euro appreciated against the Japanese yen by 7.27%.

#### Stock markets

The global stock market index (MSCI World ACWI expressed in euros) increased by 10.66% over the past six months, from the end of August 2025 to the end of February 2026.

##### The different regions

America remains the largest region for shares. Some doubts around growth arose in early 2025, due mainly to President Trump's uncertain policies. Like the economy, the stock market also turned in a strong performance, with North American shares gaining around 5.95% in euro terms over the reporting period. However, there was clear variation between different countries: in the US, the stock market climbed 5.38%, while the Canadian market is now 18.73% higher than at the beginning of the period. The market seemed relatively unaffected by the US government shutdown. Technology companies, and especially the large 'mega caps', are again the drivers of stock-market gains. New developments around artificial intelligence continue to excite investors and this theme was eagerly picked up again in 2025, starting in May. We did see a rotation in early 2026, with both the Magnificent 7 shares and shares impacted by the disruptive nature of AI being exchanged for defensive assets and companies with fixed-income assets.

The euro area remains somewhat sluggish economically, but European shares kept pace with US stocks and the market grew by 10.3%. Moreover, robust stimulus programmes may be on the European agenda. At the most recent NATO summit, for example, new commitments were made to step up investments in defence to a larger share of GDP. Germany is also creating budgetary scope for investments in infrastructure.

There were impressive corporate earnings for the third and fourth quarters in our largest regions for shares, especially in the US, where earnings grew by around 15% year-on-year. Earnings figures in Europe remain somewhat flatter. After a weaker period, the dollar remained generally stable against the euro and thus had little impact.

The Japanese stock market also rebounded after a number of uncertain months due to tariffs. The appointment of a new prime minister fuelled optimism among investors, primarily on account of her economic stimulus programme. The Japanese stock market climbed roughly 21.2% over the past six months.

Shares from emerging markets (countries or regions that are expected to experience rapid economic growth to make up their lag with the West) present a very mixed picture. Chinese shares have been struggling for several years, as a combination of a real estate crisis, high debt, deflation, an ageing population and declining producer and

consumer confidence have weighed on stock market sentiment. However, the Chinese government came through with long-awaited stimulus measures. Interest rates were cut and measures were announced simultaneously to stimulate the real estate market, consumption and the stock market. China also showed that it has made great strides in developments around AI. Investors renewed their attention for Chinese shares, particularly in the third quarter, which was then followed by a weaker fourth quarter. On balance, the Chinese market remained virtually flat throughout the reporting period (-0.63%).

India's economy continues to boom, but unfavourable exchange rate movements meant that the stock market only gained around 0.43% in euro terms. The Indian market was somewhat more expensive compared to other emerging regions, and investors seem to be taking some profits. On top of that, Trump slapped India with a steep import tariff, weighing on forecast growth. Latin America was a surprise winner, given Trump's trade war against Mexico and his tough stance against Brazil. The region was up around 36.7% compared to the beginning of the reporting period.

### The different sectors

There were still some clear risks for cyclical shares, such as the war in Ukraine, import tariffs, a government shutdown, etc. As calm returned in the summer months, cyclical shares also recovered. Materials (chemicals, mining companies) recovered during the reporting period (+32.64%), partly driven by the rush to invest in gold and a sharp rise in, for example, the price of copper. Industrials also staged a nice recovery (+18.75%). Capital Goods (+25.44%) and the Transport sector (+13.42%), in particular, performed well, whereas commercial service providers lagged behind (-15.23%). Competition from AI is having an adverse impact on the latter.

Consumer Discretionary (+0.19%) was hit hard just before the reporting period due to President Trump's trade war, but subsequently staged a rally. However, not all subsectors within the sector recovered to the same degree. Consumer Services (including tourism and restaurants) struggled (-8.11%), as did Retail (-4.66%), while Consumer Discretionary – including luxury goods – gained new momentum. Over the entire period, however, these sectors remained flat. The Automotive sector (+17.13%) had a good six months thanks to Tesla's robust performance.

Financials performed reasonably well during the reporting period (+5.22%). Higher long-term interest rates play in banks' favour, while the upward revision of the economic growth outlook was also positive as it reduces the likelihood of defaults. Moreover, Trump's policy is seen as good for the financial sector, specifically given his enthusiasm for deregulation. In addition, most economists – including those at the US central bank – expect Trump's tariff policies to be inflationary. This should keep long-term market interest rates, in particular, at higher levels, while short-term rates were lowered by the central bank. This will have a positive impact on banks' earnings models. The financial sector is also doing particularly well in Europe.

In the meantime, financial shares have enjoyed a good run. There was some profit-taking here and there, but the boom continues. Within the sector, banks delivered the best returns of around 15.62% during the reporting period. Insurers also provided a positive return of 4.10%. The financial services subsector, which is heavily slanted towards the US and includes payment services and wealth management, posted a negative return of 6.37%, partly driven by fears of AI disruption.

Consumer Staples, traditionally regarded as a defensive sector, enjoyed a particularly good start to 2026. This made up for the entire reporting period (+11.43%). Given the defensive nature of these shares, investors were less eager to press the 'Sell' button than in other sectors during the peak of the trade war. However, investors have been avoiding the shares since the tariff storm calmed down. Retailers turned in the strongest performance (+16.03%). It wasn't until January 2026 that food and beverage companies (+10.87%) and home and personal care products (6.31%) were able to recover their losses and post gains.

Health Care – another defensive sector – recovered strongly, particularly during the reporting period (+14.51%). Although Medical Technology is still having a tough time (remaining flat), big pharmaceutical companies have been rallying since October (+22.04%). The initial pricing deals that these companies struck with the Trump administration were not as bad as feared, causing relief on the financial markets.

The small Real Estate sector – which is also strongly US-focused – saw the pressure from higher interest rates ease slightly but failed to benefit from it to any real extent. Performing well at the start of 2026 in particular, the sector ended the period with a positive result (+7.14%).

Technology continued its boom during the reporting period, posting a return of 9.80%, though the pace slowed towards the end of the year. We even saw a correction in early 2026. The roll-out of ChatGPT and new AI applications triggered a surge in demand for semiconductors. The first applications are gradually being rolled out in current software packages. As a result, businesses and consumers are gradually learning about what AI can do in everyday life. After some doubts at the start of 2025, the Semiconductor sector ultimately gained about 29.47% thanks to robust quarterly results and mounting demand. Hardware (+25.50%) also made steady gains, leaving behind concerns about Trump's tariff policy. Software companies clearly struggled amid fears that AI may disrupt their business models (-23.66%). Those fears only increased in early 2026 and even Microsoft did less well than expected.

Communication Services (+7.29%) kept pace with the strong Technology sector. Media (+7.54%), influenced by the Big Tech names, also turned in an excellent performance despite a mixed reaction to its third-quarter results. Even though it posted solid results, this sector had to settle for less than it had bargained for at the start of 2026. The defensive Telecom sector was volatile, ending up in slightly positive territory, owing primarily to solid results in early 2026 (+5.11%).

### Conventional portfolio:

We conclude with two sectors that are rarely, if ever, included in RI portfolios, but which do form part of the conventional portfolio. Utilities, usually a defensive sector, turned in a robust performance (+18.37%) thanks to the high demand for energy to power AI data centres.

The traditional Energy sector fluctuates in line with energy prices. In early 2026, oil prices soared amid fears of a new war between the US and Iran, and the sector closed the reporting period with a gain of around 23.07%.

### **Bond markets**

German 10-year yields have fallen by around 0.1% over the last six months. While inflation is not a problem, concerns about the sustainability of public debt remain. The economic conditions in many Southern European countries are better than their Northern counterparts. Partly as a result of this, the 10-year rate spread between Italy and Germany narrowed by 0.2%. US 10-year yields fell by 0.3% over the same period.

The overall picture for bond investors has been positive (in euro terms) over the last six months. Returns on EMU government bonds have reached 1.4% for benchmark maturities of between one and five years. The return on a broad basket across all maturities is 2.8%. Investors assess the likelihood of a recession in the euro area as fairly low. The credit premium for euro-denominated corporate bonds issued by companies with strong balance sheets has remained virtually unchanged over the past six months. As a result, this theme has delivered a total return of 2%. Bonds issued by companies with weak balance sheets ('High Yield') also rose by 2%. Growth market bonds in local currency top the list, gaining 7.5% (in euro terms). Lastly, the US dollar exchange rate against the euro fell 1.1% over the reporting period, putting a damper on the total return from bonds in that currency.

### **Precious metals**

During the reporting period, we added a position in gold to the strategy funds. The period saw gold continue trending upwards, with prices rising 51.61% in euro terms. Central banks and investors alike eagerly bought the metal. Precious metals experienced increased volatility around the year-end.

## Outlook

### The economic context

The recent economic picture was fairly robust, especially in the US. KBC's economists predict that growth in both the US and the euro area will be at near-average levels in 2026. Although growth remains quite weak in the euro area, it's expected to pick up during the year. Germany's exceptional infrastructure project and European plans to step up investments in defence, together with a potential uptick in consumption thanks to large savings reserves and good employment figures, could boost activity. US economic growth is stronger than Europe's. A slight slowdown in growth over the next few quarters compared to the very strong third quarter of 2025 seems inevitable. The labour market has been weakening for some time now and slightly too high inflation is weighing on consumer confidence, but AI investments and President Trump's 'One Beautiful Bill Act' may provide some support. Lastly, growth in China has also remained at a respectable level, according to the new five-year plan.

Inflation stabilised further in 2025, cooling to around 2% in Europe, while US inflation also fell below 3%. No new inflation surge is expected for 2026.

### Monetary policy

The US central bank's monetary policy is close to its neutral level and growth is considered to be robust. Moreover, the risks to the unemployment rate and inflation are slightly more balanced. The Fed would therefore prefer to wait for more economic data before making a decision on whether to ease its policy. KBC expects the key rate to hit 3.125% over the course of 2026.

Between June 2024 and 2025, the ECB cut the key rate several times by a total of 2%, taking deposit rates to their current level of 2%. However, President Lagarde has recently stressed on several occasions that the key rate has likely reached its lowest point. KBC expects the deposit rate to remain at 2% until the end of 2026.

### Currency markets

The dollar experienced significant volatility against the euro during the reporting period. We expect the dollar to weaken slightly over the course of 2026.

### Financial markets

The economic context and expectations have been volatile over the past year, partly influenced by US trade and international policy. The weakening labour market in the US could trigger further interest rate cuts. We are expecting economic growth to pick up again and we are investing in shares at slightly above benchmark level. We regularly make tactical switches to take advantage of the momentum.

Bonds are still offering attractive current returns, which can provide a useful buffer in an investment portfolio. This is enabling bonds to resume their role as a safe haven. Here too, we are invested in line with the benchmark, but use volatile interest rates as a means to effect a tactical adjustment to the portfolio's remaining term to maturity.

As always, we are holding a limited cash position to respond to opportunities as they arise. Cash is currently also delivering a healthy net return.

### Stock markets

#### Regional allocation

The US remains by some margin the largest position in our portfolio. This is a consequence of the benchmark choice. Although we reduced the positions somewhat for tactical reasons following the strong performance in the second half of last year, we are maintaining a neutral stance with a slightly underweight position. President Trump advocates an 'America First' policy, with lower taxes for US companies, which seems like good news for US companies in the long run. After several difficult months, trade agreements were finally sealed with the likes of Japan and the EU, requiring companies from these countries to pay additional import duties if they want to export to the US, thereby favouring US companies. US corporate earnings for the fourth quarter grew by around +12% and the outlook for 2026 also looks strong. The weaker dollar is weighing on returns for European investors, but on the other hand is good news for US exporting companies.

We are taking a neutral stance in the euro area, with a tactically overweighted position. Its economy is still struggling a bit more than in the US and certain sectors are vulnerable to protectionism. Germany continues to flirt with fairly weak growth, although we expect to see it pick up somewhat in 2026. However, the euro area is cheaper than the US, and this provides a buffer against potential risks. We are also maintaining a position in small and medium-sized companies based in the euro area. The share prices of these companies have lagged behind somewhat in the past few years and a revaluation might be appropriate. Moreover, they are less export-oriented and, therefore, less vulnerable to protectionist measures. For non-EU countries, the picture is somewhat more varied.

The recommendation for the entire Emerging Asia region has been switched to positive. The Chinese economy grew by about 5% last year and is expected to expand by around 4.6% in 2026. It has become clear over the last two years that the problems in the Chinese Real Estate sector have not yet been resolved. Limited demand,

reflecting weak consumer and producer confidence, is actually leading to deflation (falling prices). This weakness is particularly noticeable in the Manufacturing sector, mirroring the situation in the euro area and the US. The Service sector is doing somewhat better. The Chinese government regularly announces new measures to stabilise real estate prices and boost confidence. After several turbulent months, the US-China trade war cooled in November. The two countries agreed to reduce trade barriers for a year. The emergence of the DeepSeek model also showed that Chinese companies are continuing to innovate and compete with the US. The new five-year plan also focuses on that innovation leadership role.

Other Asian countries did manage to maintain fairly strong growth: the Indian economy remains in good shape, while growth also accelerated in South Korea, thanks in part to the AI boom. These countries also seem to be less affected by Trump's policies. The shares of companies from emerging markets remain relatively cheap as well, and the outlook for corporate earnings there is the best anywhere in the world, which underpins our belief in the region.

Within Asia, we are also significantly underweight in the Pacific region, which consists mainly of Japanese companies. Japanese shares did stage a rally, though, and new Prime Minister Takaichi was also well received. The currency is still more volatile than usual, however, which may raise questions about how safe the Japanese stock market is. Higher long-term interest rates are also worrying investors. Uncertainty in the region may increase under President Trump, although Japan did manage to strike a trade deal. Japanese export companies - such as the large Automotive sector - do have to pay around 15% import duties when exporting to the US, however.

## **Sector allocation**

### **Cyclical sectors**

Economic news on manufacturing remains weak worldwide. A further recovery in corporate earnings and margins in cyclical sectors is needed for us to become positive again. We remain structurally invested below the benchmark weight in industrial sectors. At the end of last year, we opted to somewhat build up the sector, and more specifically Capital Goods, in light of the improved investment outlook for companies such as in data centres in the US. We are also slightly overweight for transport companies. We are invested around the benchmark level for Materials (chemicals and mining). These companies could still benefit from stimulus measures in China and investment in the US.

We are underweight in Consumer Discretionary sectors. US consumer confidence has been hit hard in recent months due to the political uncertainty and rising unemployment. Corporate earnings reveal that US consumers are still spending their money but are becoming more price-conscious. We are keeping the automobile sub-segment at a neutral weighting. There are question marks over US policy at the moment: traditional carmakers may have the wind in their sails, but electric vehicles are struggling. The European Automotive sector is very cheap and could potentially benefit if regulation is scaled back somewhat. Tesla's share price has surged in recent months. Following the de-escalation in the conflict with China, we have upped the weighting of Consumer Discretionary (luxury goods). Consumer Services sectors, such as tourism and hotels, remain underweight, however.

### **Defensive sectors**

Defensive sectors can hold up well in uncertain times. We remain confident about Health Care, which posted better-than-expected operating results in 2025. Expectations for 2026 are also low, and could therefore easily be beaten. Question marks remain around Trump's policies. An executive order is expected to bring down the prices of US medication, although the sector has been given some breathing room. Companies shifting production to the US would also be exempt from tariffs. Last year, we increased the weight of both the Big Pharma giants and the Medical Technology subsector, both of which had become historically cheap. The outlook for Medical Technology remains good thanks to stronger margins, although this sector was one of the weakest in recent months mainly due to increased uncertainty and cost-cutting. Meanwhile, we scaled back Big Pharma companies following a strong run.

We slightly increased our holdings in Consumer Staples. The entire sector had become particularly cheap following a remarkably weak 2025. Food and beverage companies posted excellent results in the fourth quarter, much to investors' appreciation. We therefore increased the weighting to neutral. Manufacturers of household and personal products still face some problems in terms of volumes and margins, but there appears to be light at the end of the tunnel. Our recommendation for this subsector is now also neutral. Retailers (underweight in portfolio) enjoyed a strong rally, but have become particularly expensive, and we are maintaining our underweight position.

We are maintaining our structural underweighting of Utilities due to sustainability concerns, for instance with regard to nuclear energy.

### **Financials**

We are optimistic about the Financial sector, especially banks. Interest margins remain high and the expected movements of the yield curve further reinforce this effect, as was demonstrated once again in the fourth-quarter results. European banks remain inexpensive even after the recent rally. We expect the yield curve to continue to develop favourably, so we are further increasing the weighting of European banks. Even so, we have adopted a neutral stance on US banks. They have been cashing in on Trump's presidency, which promises deregulation, less supervision and tax cuts, but have been unsettled recently by news of a possible cap on credit card interest rates and other potential new incentives to support US consumers. US asset managers and payment service providers are being kept at a neutral weighting, as are (more defensive) insurers.

## **Broad technology sector**

We are overweight in the Technology sector, with its strong leaning towards the US, despite taking some profits at the end of October 2025. The strong rally by AI-linked stocks in particular raises fears that an AI bubble may be in the making. We do not share that view, despite the heavy concentration of these companies in the stock market. We remain confident in the Semiconductor subsector, which is vital to the AI revolution. This segment is still quite expensive due to the strong AI rally, but the long-term prospects seem favourable. These companies' earnings are still consistently beating expectations. With their strong pricing power, we expect these companies to continue making higher profits for some time, though interim corrections may occur. We further downgraded the Software subsector at the start of this year. A large number of software packages are considered 'replaceable by AI', causing this sector to end up on sale. We are maintaining a slightly underweight position for this sector. We also have a neutral positioning in the Hardware subsector owing to the prospect of lower growth in the short term. On a positive note, the PC and laptop market seems to be bottoming out.

Our outlook for the Communications sector, which is closely linked to IT, is positive, but less so than it was a few months ago. We decreased the weighting of the media companies. This highly Americanised Consumer sector is quite expensive but has rock-solid fundamentals. Within this sector, we also scaled back Alphabet, which had become expensive following a particularly strong performance.

Within the broader Communication Services sector, we are maintaining the more defensive telecom companies at a neutral weighting. The sector's performance has recently improved somewhat. Investors appear to be seeking out (defensive) sectors with a high proportion of fixed assets in their portfolios, making them 'resilient' to AI disruption.

## **Real estate sector**

Real estate companies have been under considerable pressure from higher interest rates for several years now. Meanwhile, central banks in Western countries brought interest rates down to somewhat lower levels. Although central banks influence short-term interest rates directly through key rates, we observe that long-term rates remain high, especially in the US. This continues to put pressure on this theme as it influences the financing conditions for these companies. That is sufficient reason for us to take a step back from the theme to a more neutral weight.

## **Energy (conventional portfolio)**

For share investors without a specific sustainability preference, we are underweighting the Energy sector. The conflicts in the Middle East and Ukraine drove up oil prices again at the start of this year, enabling these companies to rally nicely. A war with Iran and closure of the Strait of Hormuz could certainly lead to new price spikes. This was the case last year, too, although the rise in oil prices around the Twelve-Day War between Iran and Israel proved to be short-lived. On the other hand, new sanctions on Russia do seem to be pushing the risk premium on oil up again slightly. Trump's policies could certainly cause a supply shock (higher production) and lower prices, despite higher demand due to a stronger economy. Volatility remains high, making income streams for the sector highly variable.

## **Bond markets**

There are sometimes concerns about the sustainability of public debt in light of several countries' plans for tackling high or higher budget deficits. It should be noted that, partly as a result of this situation, yields on long-term bonds are again much higher than on cash. Bond yields are close to their all-time highs.

Maturities within the bond strategy have been adjusted regularly in recent months. The recent turbulence in the financial markets has prompted investors to seek safer havens. As a result, German 10-year yields dropped in February, but we fear this is just a temporary dip. The duration was therefore reduced and is now below the benchmark level, at around five years, making the portfolio less vulnerable should bond yields rise again.

The economic outlook seems relatively favourable. KBC sees little likelihood of a recession in the euro area and investors' risk appetite is high. Because of their higher yield, we prefer corporate bonds to government bonds. Within the corporate bond segment, we mainly prefer blue-chip companies. We are supplementing these positions with bonds from companies with weaker balance sheets ('High Yield') as well as bonds issued by emerging markets, which offer more attractive returns. These positions have very little exposure to the broader AI concerns and are currently not experiencing any major impact from the related tensions in the financial markets.

### 1.3. Aggregate balance sheet (in EUR)

| Balance sheet layout |                                                                   | 28/02/2026       | 28/02/2025       |
|----------------------|-------------------------------------------------------------------|------------------|------------------|
|                      | <b>TOTAL NET ASSETS</b>                                           | 3,367,531,416.75 | 2,574,342,102.24 |

## 1.5. Summary of recognition and valuation rules

### 1.5.1. Summary of the rules

Summary of the valuation rules pursuant to the Royal Decree of 10 November 2006 on the accounting, annual accounts and periodic reports of certain open-ended undertakings for collective investment.

The assets of the various sub-funds are valued as follows:

- When purchased or sold, securities, money market instruments, units in undertakings for collective investment and financial derivatives are recorded in the accounts at their acquisition price or sale price, respectively. Any additional expenses, such as trading and delivery costs, are charged directly to the profit and loss account.
- After initial recognition, securities, money market instruments and financial derivatives are measured at fair value on the basis of the following rules:
  - Securities that are traded on an active market without the involvement of third-party financial institutions are measured at fair value using the closing price;
  - Assets that have an active market which functions through third -party financial institutions that guarantee continuous bid and ask prices are measured using the current bid price set on that market. However, since most international benchmarks use mid-prices, and the data providers cannot supply bid prices (e.g., JP Morgan, iBoxx, MSCI, etc.), the midprices are used to measure debt instruments, as provided for in the Notes to the aforementioned Royal Decree. The method to correct these midprices and generate the bid price is not used, as it is not reliable enough and could result in major fluctuations.
  - Securities whose last known price is not representative and securities that are not admitted to official listing or admitted to another organised market are valued as follows:
    - 1 When measuring these securities at fair value, use is made of the current fair value of similar assets for which there is an active market, provided this fair value is adjusted to take account of the differences between the assets concerned.
    - 2 If no fair value for similar assets exists, the fair value is calculated on the basis of other valuation techniques which make maximum use of market data, which are consistent with generally accepted economic methods and which are verified and tested on a regular basis.
    - 3 If no organised or unofficial market exists for the assets being valued, account is also taken of the uncertain character of these assets, based on the risk that the counterparties involved might not meet their obligations.
  - Shares for which there is no organised or unofficial market, and whose fair value cannot be calculated reliably as set out above, are measured at cost. Impairment is applied to these shares if there are objective instructions to this end.
  - Units in undertakings for collective investment (for which there is no organised market) are measured at fair value using their last net asset value.
- Liquid assets, including assets on demand at credit institutions, obligations on current account vis-à-vis credit institutions, amounts payable and receivable in the short term that are not represented by negotiable securities or money market instruments (other than vis-à-vis credit institutions), tax assets and liabilities, are measured at nominal value. Other amounts receivable in the longer term that are not represented by negotiable securities are measured at fair value. Impairment is applied to assets, amounts to be received and receivables if there is uncertainty that they will be paid in full or in part at maturity, or if the realisation value of this asset is less than its acquisition value. Additional impairment is recorded on the assets, amounts to be received and receivables referred to in the previous paragraph to ensure that any change in their value, or risks inherent in the asset in question, are taken into account.
- The income generated by securities lending is recognised as other income (Income statement II.B.a.: Investment income and expenses – Interest – Securities and money market instruments) and is included on an accruals basis in the income statement over the term of the transaction.
- Securities issued in a currency other than that of the relevant sub-fund are converted into the currency of the sub-fund at the last known mid-market exchange rate.

In the case of sub-funds with equity/index linked, interest rate and inflation swaps structures, the bonds are valued by calculating the present value of projected payments on the basis of the risk-free yield curve. They may be marked down if payments in interest or principal are reduced, waived or deferred. The Board of Directors may then resolve to reduce the valuation described above or opt for a full mark-to-market valuation.

## Differences

A minor difference may appear from time to time between the net asset value as published in the press and the net asset value shown in this report. These are minimal differences in the net asset value calculated that are identified after publication.

If these differences reach or exceed a certain tolerance limit, the difference will be compensated. For those buying or selling shares in the bevek and for the bevek itself, this tolerance limit will be a certain percentage of the net asset value and the net assets, respectively.

This tolerance limit is:

- money market funds: 0.25%
- bond funds, balanced funds and funds offering a capital guarantee: 0.50%
- equity funds: 1%
- other funds (real estate funds, etc.): 0.50%

## 1.6. Composition of the assets

To achieve their investment objectives, the sub-funds of the Bevek may invest in securities (including bonds and other debt instruments), money market instruments, units in collective investment undertakings, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable legislation and investment policy.

The financial mechanism used to achieve the capital protection at maturity or reaching a specified percentage compared with the initial subscription price at maturity entails investing the total amounts subscribed in bonds and other debt instruments, deposits and/or cash.

The deposits, bonds and other debt instruments must meet one of the following criteria:

- 1 An investment in deposits and/or debt instruments, placed with or issued by financial institutions under the prudential supervision of and established in a Member State of the European Economic Area.
- 2 Debt instruments issued or guaranteed by a Member State of the European Economic Area.
- 3 Investments with an analogous structure and identical counterparty risk as those referred to under (1) and (2) above.

These investments may involve an investment in exchange-listed notes issued by 18 Special Purpose Vehicles (SPVs).

These 18 SPVs were established under the sponsorship of KBC Asset Management NV and are managed by KBC Asset Management NV or one of its subsidiaries.

The underlying asset of the following 18 SPVs:

- Amethyst Structured Finance Plc
- Beechwood Structured Finance Plc
- Benbulbin Capital plc
- Eperon Finance Plc
- Espaccio Securities Plc
- Greenstreet Structured Financial Products Plc
- Ipanema Capital Plc
- Nimrod Capital Plc
- Opal Financial Products Plc
- Profile Finance Plc
- Recolte Securities Plc
- Silverstate Financial Investments Plc
- Vermillion Protective Bond Portfolio Plc
- Vespucci Structured Finance Products Plc
- Vigado Capital Plc
- Voyce Investments Plc
- Waterford Capital Investments Plc
- Waves Financial Investments Plc

consists of two diversified portfolios of deposits issued by financial institutions, bonds and other securities, the General Long Portfolio and the General Short Portfolio.

Further details of the criteria the underlying asset of these 18 SPVs must meet are provided in the base prospectuses for these SPVs, which can be viewed at or downloaded from <http://www.kbc.be/prospectus/spv>.

The composition of the assets of the SPVs discussed below have not been audited. The prospectus and audited annual report can be obtained free of charge from the offices of KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

Not applicable.

#### 2.1.3. Goal and key principles of the investment policy

##### Object of the sub-fund

The object of the sub-fund is to generate the highest possible return for its shareholders. To this end, an investment strategy has been developed that consists of:

- (1) An investment in transferable securities (including bonds and other debt instruments), money market instruments, units (shares) in undertakings for collective investment, deposits and liquid assets (including cash deposited on a time-deposit account or current account) (see the heading *Permitted asset classes*).
- (2) An investment in swaps. To this end, the sub-fund transfers a portion of the future income from the investments described under the heading *Permitted asset classes* to the counterparty or counterparties during the life of the sub-fund. In exchange, the counterparty or counterparties undertake to provide a potential return. The various types of swaps in which the sub-fund may invest are explained in more detail under the heading *Permitted swap transactions*.

No formal guarantee is provided either to the sub-fund or to its shareholders. The sub-fund does not provide any guaranteed return or capital protection either during the life of the sub-fund or at Maturity.

##### Sub-fund's investment policy

##### Permitted asset classes

Pursuant to the provisions of the Royal Decree of 12 November 2012 on undertakings for collective investment complying with the conditions of Directive 2009/65/EC, the sub-fund may invest in transferable securities (including bonds and other debt instruments), money market instruments, units (shares) in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as and to the extent permitted by the applicable legislation. These investments can have different maturities and coupon payment dates. Using the swaps described under the heading *Permitted swap transactions* (2), these investments are matched with the obligations of the sub-fund.

The investment limits and restrictions set out in the Royal Decree of 12 November 2012 on undertakings for collective investment complying with the conditions of Directive 2009/65/EC will be respected at all times.

The sub-fund may invest in, among other things, listed bonds issued by 'Special Purpose Vehicles' (SPVs).

These SPVs are managed by KBC Asset Management NV or a subsidiary.

The underlying assets of the bonds issued by the SPVs consist of a diversified portfolio of deposits issued by financial institutions, bonds, other debt instruments and financial derivatives. When selecting these underlying assets, account is taken of criteria relating to allocation and creditworthiness (see *Permitted asset classes* and *Characteristics of the bonds and other debt instruments*) in order to limit the counterparty risk.

Further details of the criteria these underlying deposits, bonds, other debt instruments and financial derivatives must meet are provided in the base prospectuses for the SPVs, which can be viewed at or downloaded from [www.kbc.be/prospectus/spv](http://www.kbc.be/prospectus/spv).

Investors are provided with information on the investments made by both the sub-fund and the SPVs in the annual and half-yearly reports on the open-ended investment company under Belgian law (bevek) to which the sub-fund belongs. These reports can also be viewed at or downloaded from [www.kbc.be](http://www.kbc.be).

### **Characteristics of the bonds and other debt instruments**

During the sub-fund's life, the average credit rating of the bonds and other debt instruments shall be at least 'A-' from Standard & Poor's or an equivalent rating from Moody's or Fitch, or, if there is no credit rating available, an average credit risk profile that the manager considers to be at least equivalent.

At the start of the investment, the credit rating of the long-term bonds and other debt instruments shall be at least 'A-' from Standard & Poor's or an equivalent rating from Moody's or Fitch, or, if there is no credit rating available, a credit risk profile that the manager considers to be at least equivalent.

At the start of the investment, the credit rating of the short-term bonds and other debt instruments shall be at least 'A-1' from Standard & Poor's or an equivalent rating from Moody's or Fitch, or, if there is no credit rating available, a credit risk profile that the manager considers to be at least equivalent.

When selecting the bonds and other debt instruments, all maturities are taken into consideration.

### **Permitted swap transactions**

**The swaps described below have been concluded with a prime counterparty or prime counterparties within the limits laid down by law.**

(1) To achieve a potential return, the sub-fund concludes swaps. Under such swap contracts, the sub-fund transfers a portion of the future income from the investments described under the heading 'Permitted asset classes' to the counterparty or counterparties during the life of the sub-fund. In exchange, the counterparty or counterparties undertake to provide a potential return as specified under the heading *Selected strategy*.

The use of swaps in this sub-fund can lead to a loss of part or all of the capital initially invested.

**The swaps under (1) are essential to achieve the sub-fund's investment objectives, since this technique facilitates achievement of the goal of generating a potential return.**

**The sub-fund's risk profile is not affected by the use of these swaps.**

(2) If necessary, the sub-fund also concludes swaps to match the due dates of the commitments of the sub-fund with those of the cash flows stemming from the investments described under the heading *Permitted asset classes*.

**These swaps are essential to achieve the sub-fund's investment objectives, since there are not enough bonds and other debt instruments available on the market whose coupon payments and maturity dates always perfectly match the due dates of the sub-fund's obligations.**

**The sub-fund's risk profile is not affected by the use of these swaps.**

(3) In addition, the sub-fund may conclude swaps to protect itself against the credit risk in respect of issuers of bonds and other debt instruments. Through this type of swap, one or more counterparties takes over the risk of an issuer of a bond or other debt instrument in the sub-fund's portfolio defaulting, in exchange for a fee payable by the sub-fund.

**The swaps under (3) serve to hedge the credit risk.**

**The sub-fund's risk profile is not affected by the use of these swaps.**

### **Restrictions of the investment policy**

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

## Strategie selected

### Investment objectives and strategy:

The investment objective of the sub-fund is to generate a potential capital gain at Maturity based on the performance of a basket of 30 shares of a worldwide selection of companies that are characterised by a high market capitalisation.

- If the basket has not fallen in value (End Value  $\geq$  Starting Value), 100% of the increase of the basket of 30 shares of a worldwide selection of companies that are characterised by a high market capitalisation. (= (End Value minus Starting Value) divided by Starting Value) will be paid out at Maturity, in addition to the Initial Subscription Price. Any capital gain is capped at 60% (yield to maturity of 8.43% before taxes and charges).

- If the basket has fallen in value (End Value  $<$  Starting Value), there are two possibilities:

#### Scenario 1

If the End Value has fallen in value, but not below 80% of the Starting Value, this decline in value will not be subtracted from Initial Subscription Price at Maturity.

#### Scenario 2

If the End Value has fallen below 80% of the Starting Value, 100% of the decline in the value of the basket of 30 shares of a worldwide selection of companies that are characterised by a high market capitalisation, relative to the Starting Value (= (End Value minus Starting Value) divided by Starting Value) will be subtracted from the Initial Subscription Price. This result will be increased with 20% of the Initial Subscription Price. In such a scenario the repayment at Maturity is below the Initial Subscription Price.

The sub-fund does not, therefore, provide any guaranteed return or capital protection, either during its life or at Maturity.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

### Transparency of adverse sustainability impacts

The sub-fund took into account the principal adverse impacts of its investment decisions on sustainability factors ("PAI") as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on disclosure on sustainability in the financial services sector ("SFDR") through KBC Group's Investment Policy and KBC Group Policy on Blacklisted Companies.

Based on the KBC Group Policy on Blacklisted Companies, all companies on the 'KBC Group Blacklist' (including companies involved in controversial weapons such as those prohibited by Belgian law and white phosphorus weapons) are excluded as well as the worst offenders of the UN Global Compact.

Consequently, the sub-fund took into account exposure to controversial weapons ('indicator 14') by excluding companies dealing with controversial weapon systems, and violations of the principles of the UN Global Compact or the Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises ('indicator 10') by excluding the worst offenders of the UN Global Compact. During the lifetime of the sub-fund, no new shares will be included in the underlying basket of shares resulting from a corporate action if the company in question is excluded on the basis of the 'KBC Group Blacklist'.

### Maturity

Friday 29 May 2026 (payment with a value date of D+1 banking day)

### Currency

CZK, for all shares in the basket, changes in the value of the currency in which they are expressed relative to CZK are irrelevant. The investor pays the subscription amount in CZK and will be paid in CZK at Maturity (or earlier). The investor is not protected against any decline in the value of the currency in which the sub-fund is denominated relative to the euro.

### Starting Value

Value of the basket based on the weighted average of the Value of the shares included in the basket during the first 10 Valuation Days, starting from Monday 10 August 2020 inclusive.

### End Value

Value of the basket based on the weighted average of the Value of the shares included in the basket on the last Valuation Day of the month for the last 18 months before Maturity, more specifically from November 2024 through April 2026 (inclusive).

## Value

For all the shares, except for those listed on the Milan stock exchange, the closing price, namely the price of a share in the basket as calculated and notified at closing of the stock exchange by the authority of the stock exchange on which the share is listed (or its legal successor). The reference price is used for shares listed on the Milan stock exchange.

## Valuation day

A Valuation Day is set separately for each share in the basket.

A Valuation Day is a day that is a planned trading day both

- i) for the stock exchange on which the share is listed and
- ii) for the stock exchange whose activities have a substantial influence on the trading of options and futures on the share concerned

hereinafter referred to as 'the stock exchanges concerned'.

If on the Valuation Day,

- a) one of the stock exchanges concerned is unexpectedly closed or
- b) there is an event that disrupts the market for a stock exchange concerned or
- c) one of the stock exchanges concerned closes early,

the original Valuation Day is replaced by the following trading day when no event as referred to in a), b) or c) above occurs. An extraordinary closure that has been announced in advance is not considered as early closure.

If a valuation is made on consecutive Valuation Days, the trading day that replaces the original Valuation Day (i) may not coincide with another original Valuation Day and (ii) may not be a trading day that already replaces another original Valuation Day.

However, if an event as referred to under a), b) or c) above occurs on each of the eight trading days following the original Valuation Day,

- (i) the eighth trading day shall be considered as the original Valuation Day and
- (ii) the Bevek shall assess, in good faith and in consultation with the prime counterparty or counterparties with which it has concluded a swap agreement, the price of the share as it would have been traded on that eighth trading day and
- (iii) the Bevek will notify shareholders of any changes regarding setting the Starting Value and/or End Value and conditions of payment.

### Relevant basket

In the table below, the columns from left to right reflect the number of the share, the name of the share, the Bloomberg code, the exchange on which it trades (City-MIC Code) and its initial weighting in the basket.

### Basket composition methodology

KBC Asset Management used the following methodology to determine the composition of the sub-fund's basket.

#### Step 1 :

The starting point is the global equities universe from which a selection of potential investments is derived in accordance with the economic criteria for the composition of the basket and subject to restrictions regarding stock market capitalisation and liquid assets.

The economic criteria for the composition of the basket determine the size of the final selection.

#### Step 2 :

The selection of shares obtained in step 1 is reduced to a short list using a quantitative selection based on past financial data. The shares selected are those of companies that achieve a good score in terms of management quality, a healthy balance-sheet structure and a positive trend in profitability.

#### Step 3 :

The selection of shares obtained in step 2 is then verified by KBC Asset Management analysts. Shares that are permanently monitored by the analysts and those for which there is a negative recommendation, when the product is launched, are then withdrawn from the selection.

Step 4 :

The last reduction of the selection provides the final basket. This selection was made using the technical parameters of options (including the term, volatility, dividend yield and interest rate).

The final basket must satisfy the legal requirements concerning the quantity of shares and adequate distribution in the weighting. In addition, care is taken to ensure compliance with the geographical and/or sector spread. The analysts make a qualitative assessment of each share used taking account of specific knowledge of these shares and the sectors/regions from which they come, in accordance with the term of the sub-fund.

For the sub-fund Optimum Fund ČSOB Airbag 1, about 3059 equities were selected during step 1.

The initial selection was reduced by a maximum 20% in step 2.

This was again reduced by 10% (indicative) in step 3. The final basket set up during step 4 is described above under *Relevant basket*. This basket makes it possible to offer the sub-fund Optimum Fund ČSOB Airbag 1 under the conditions set out in the investment policy referred to above. Here the selection process uses parameters that could affect the potential return on the investments.

*Selection criteria for the basket :*

A share/issuer may only form part of the basket if (i) it is listed on a stock exchange, (ii) it has a high market capitalisation, and (iii) the Board of Directors of the Bevek has approved its inclusion in the basket (the 'Selection criteria').

### **Modifications to the basket due to mergers, acquisitions, demergers, nationalisation, bankruptcy or disqualification :**

#### **Mergers or acquisitions**

If, during the life of the sub-fund, one or more issuers of shares in the basket are involved in a merger or acquisition, the shares of the relevant issuers which still meet the selection criteria after these operations will be given a weighting in the basket equal to the sum of the weightings of the shares of all issuers involved in the operation. If, after the operation, none of the issuers involved in the operation meet the selection criteria, the procedures described under 'Nationalisation, bankruptcy or disqualification' will apply.

#### **Demergers**

If an issuer of a share in the basket proceeds to a demerger, then the share from the issuer concerned can be substituted either by one of the shares that came about as a result of the demerger and that meets the selection criteria, or by a basket of shares arising from the demerger which meet the selection criteria. This basket of shares will, when calculating the number of shares in the basket, be considered as one share. If, after the operation, none of the shares resulting from the demerger meet the selection criteria, the procedures described under 'Nationalisation, bankruptcy or disqualification' will apply.

#### **Nationalisation, bankruptcy or disqualification**

If an issuer of a share in the basket is nationalised, declared bankrupt or no longer meets the selection criteria ('disqualification'), this share will be sold at the last known price before removal. The amount thus realised will then be invested until Maturity at the rate of interest in force on money or bond markets at the moment of removal, and this for a term equal to the term remaining until Maturity of the sub-fund. The realised amount plus the interest will be taken into account at Maturity as the result achieved for that share in order to calculate the final increase in the value of the basket at Maturity.

### **Securities Financing Transactions (SFTs)**

**The sub-fund may not lend any financial instruments.**

#### **General strategy for hedging the exchange risk**

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

#### **Social, ethical and environmental aspects**

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'

## **2.1.4. Financial portfolio management**

The intellectual management, with the exception of the creation of the sub-fund and its maintenance in terms of the technical, product-specific and legal aspects has been delegated by the management company to KBC Fund Management Limited, 4th Floor, Scotch House, 6/7 Burgh Quay, Dublin 2, D02 VK44, Ireland.

## **2.1.5. Distributors**

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

## **2.1.6. Index and benchmark**

Not applicable

## 2.1.7. Policy pursued during the financial year

### 2.1.8. Summary risk indicator

2 on a scale of 1 (lowest risk) to 7 (highest risk)

- a moderate level of inflation risk: there is no protection against an increase of the inflation.
- a moderate level of market risk: the level of the risk reflects the volatility of the stock market and the exchange rate risk in relation to the euro.
- a moderate level of performance risk: the level of the risk reflects the volatility of the stock market and the exchange rate risk in relation to the euro.

There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

## 2.2. Balance sheet

## 2.4.5. Performance figures

BE6321625384  
Optimum Fund ČSOB Airbag 1 CAP  
Annual performance from 01/03/2020 through 28/02/2026 (in CZK)

If the results are expressed in a currency other than the euro, the return may be higher or lower due to exchange rate fluctuations.

| Cap Div | ISIN Code    | Curr<br>ency | 1 year           |               | 3 years          |               | 5 years          |               | 10 years         |               | Since Launch*    |                  |

Risk warning: Past performance is not a guide to future performance.

\* Return on annual basis.

- The bar chart shows the performance for full financial years(period of 12 months prior to the half-yearly closing).
- The figures do not take account of any restructuring..
- Calculated in CZK and in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage.
- Calculation method for date D, where NAV stands for net asset value:  
Capitalisation units (CAP)  
Return on date D over a period of X years :  

$$[\text{NIW}(\text{D}) / \text{NIW}(\text{Y})]^{1/X} - 1$$
 where Y = D-X  
 Return on date D since the start date S of the unit:  

$$[\text{NIW}(\text{D}) / \text{NIW}(\text{S})]^{1/F} - 1$$
 where F = 1 if the unit has existed for less than one year on date D  
 where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D
- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation shares.

## 2.4.6. Costs

### Ongoing Charges:

Management fees and other administrative or operating costs: 0,863%  
Transaction costs: 0,000%

Percentage calculated at reporting date: 28 February 2026 (period of 12 months prior to the half-yearly closing).

A more detailed explanation with respect to the method of calculating ongoing charges and the relevant exclusions can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.5. Ongoing charges'

### Existence of Commission Sharing Agreements

Not applicable

### Fee sharing agreements en rebates

The management company has shared 70.00% of its fee with the distributor, and institutional and/or professional parties.

This percentage has been calculated relative to the fee for managing the investment portfolio of the sub-fund when it was launched.

## 2.4.7. Notes to the financial statements and other data

|                                                                                                          |                                                                                                                                                                                                     |                                                                                                                                                                                                                                                                                                        |

### Fee for managing the investment portfolio

KBC Asset Management NV receives a fee for managing the sub-fund's investments. This fee consists of a varying amount of max. 0.2 CZK per unit per year (with a maximum of CZK per unit per year for risk management).

This fee, which is calculated every six months, is paid monthly on the last banking day of each month. It can change from one six-month period to the next, within the limits set out below, and is based on the number of units issued at the start of each six-month period.

In the calculation, account is taken of the difference between:

- the return generated by the investments described under *Permitted asset classes* at Maturity and
- the expenses borne by the sub-fund to achieve a potential return (see *Permitted 'swap' transactions*),
- after deducting the expected fixed and variable expenses of the sub-fund, as mentioned above.

Of this, KBC Fund Management Ltd. receives a fee of no more than 0.19 CZK per unit per year from KBC Asset Management NV for the intellectual management of the sub-fund. KBC Fund Management Ltd. is a wholly owned subsidiary of KBC Asset Management NV.

KBC Asset Management NV or one of its subsidiaries has also been appointed manager of the SPVs in which the sub-fund may invest (see *Criteria the investments must meet*). KBC Asset Management NV or one of its subsidiaries, as the case may be, receives an annual fee from the relevant SPVs for their management. This management fee may not exceed 0.15% per year and is calculated on the assets managed at the end of the quarter.

The sum of (i) the fee for managing the investment portfolio that the sub-fund pays to the management company and (ii) the management fee that the SPVs in which the sub-fund invests pay to the asset manager, shall never

exceed 0.20 CZK per unit per year, as described above.

#### 2.1.3. Goal and key principles of the investment policy

##### Object of the sub-fund

The object of the sub-fund is to generate the highest possible return for its shareholders. To this end, an investment strategy has been developed that consists of:

- (1) An investment in transferable securities (including bonds and other debt instruments), money market instruments, units (shares) in undertakings for collective investment, deposits and liquid assets (including cash deposited on a time-deposit account or current account) (see the heading *Permitted asset classes*).
- (2) An investment in swaps. To this end, the sub-fund transfers a portion of the future income from the investments described under the heading *Permitted asset classes* to the counterparty or counterparties during the life of the sub-fund. In exchange, the counterparty or counterparties undertake to provide a potential return. The various types of swaps in which the sub-fund may invest are explained in more detail under the heading *Permitted swap transactions*.

No formal guarantee is provided either to the sub-fund or to its shareholders. The sub-fund does not provide any guaranteed return or capital protection either during the life of the sub-fund or at Maturity.

##### Sub-fund's investment policy

##### Permitted asset classes

Pursuant to the provisions of the Royal Decree of 12 November 2012 on undertakings for collective investment complying with the conditions of Directive 2009/65/EC, the sub-fund may invest in transferable securities (including bonds and other debt instruments), money market instruments, units (shares) in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as and to the extent permitted by the applicable legislation. These investments can have different maturities and coupon payment dates. Using the swaps described under the heading *Permitted swap transactions* (2), these investments are matched with the obligations of the sub-fund.

The investment limits and restrictions set out in the Royal Decree of 12 November 2012 on undertakings for collective investment complying with the conditions of Directive 2009/65/EC will be respected at all times.

The sub-fund may invest in, among other things, listed bonds issued by 'Special Purpose Vehicles' (SPVs).

These SPVs are managed by KBC Asset Management NV or a subsidiary.

The underlying assets of the bonds issued by the SPVs consist of a diversified portfolio of deposits issued by financial institutions, bonds, other debt instruments and financial derivatives. When selecting these underlying assets, account is taken of criteria relating to allocation and creditworthiness (see *Permitted asset classes* and *Characteristics of the bonds and other debt instruments*) in order to limit the counterparty risk.

Further details of the criteria these underlying deposits, bonds, other debt instruments and financial derivatives must meet are provided in the base prospectuses for the SPVs, which can be viewed at or downloaded from [www.kbc.be/prospectus/spv](http://www.kbc.be/prospectus/spv).

Investors are provided with information on the investments made by both the sub-fund and the SPVs in the annual and half-yearly reports on the open-ended investment company under Belgian law (bevek) to which the sub-fund belongs. These reports can also be viewed at or downloaded from [www.kbc.be](http://www.kbc.be).

### **Characteristics of the bonds and other debt instruments**

During the sub-fund's life, the average credit rating of the bonds and other debt instruments shall be at least 'A-' from Standard & Poor's or an equivalent rating from Moody's or Fitch, or, if there is no credit rating available, an average credit risk profile that the manager considers to be at least equivalent.

At the start of the investment, the credit rating of the long-term bonds and other debt instruments shall be at least 'A-' from Standard & Poor's or an equivalent rating from Moody's or Fitch, or, if there is no credit rating available, a credit risk profile that the manager considers to be at least equivalent.

At the start of the investment, the credit rating of the short-term bonds and other debt instruments shall be at least 'A-1' from Standard & Poor's or an equivalent rating from Moody's or Fitch, or, if there is no credit rating available, a credit risk profile that the manager considers to be at least equivalent.

When selecting the bonds and other debt instruments, all maturities are taken into consideration.

### **Permitted swap transactions**

**The swaps described below have been concluded with a prime counterparty or prime counterparties within the limits laid down by law.**

(1) To achieve a potential return, the sub-fund concludes swaps. Under such swap contracts, the sub-fund transfers a portion of the future income from the investments described under the heading 'Permitted asset classes' to the counterparty or counterparties during the life of the sub-fund. In exchange, the counterparty or counterparties undertake to provide a potential return as specified under the heading *Selected strategy*.

The use of swaps in this sub-fund can lead to a loss of part or all of the capital initially invested.

**The swaps under (1) are essential to achieve the sub-fund's investment objectives, since this technique facilitates achievement of the goal of generating a potential return.**

**The sub-fund's risk profile is not affected by the use of these swaps.**

(2) If necessary, the sub-fund also concludes swaps to match the due dates of the commitments of the sub-fund with those of the cash flows stemming from the investments described under the heading *Permitted asset classes*.

**These swaps are essential to achieve the sub-fund's investment objectives, since there are not enough bonds and other debt instruments available on the market whose coupon payments and maturity dates always perfectly match the due dates of the sub-fund's obligations.**

**The sub-fund's risk profile is not affected by the use of these swaps.**

(3) In addition, the sub-fund may conclude swaps to protect itself against the credit risk in respect of issuers of bonds and other debt instruments. Through this type of swap, one or more counterparties takes over the risk of an issuer of a bond or other debt instrument in the sub-fund's portfolio defaulting, in exchange for a fee payable by the sub-fund.

**The swaps under (3) serve to hedge the credit risk.**

**The sub-fund's risk profile is not affected by the use of these swaps.**

### **Restrictions of the investment policy**

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

## Strategie selected

### Investment objectives and strategy:

The investment objective of the sub-fund is to generate a potential capital gain at Maturity based on the performance of a basket of 30 shares of North-American large-cap companies.

- If the basket has not fallen in value (End Value  $\geq$  Starting Value), 100% of the increase of the basket of 30 shares of North-American large-cap companies (= (End Value minus Starting Value) divided by Starting Value) will be paid out at Maturity, in addition to the Initial Subscription Price. Any capital gain is capped at 60% (yield to maturity of (8.41% before taxes and charges).
- If the basket has fallen in value (End Value  $<$  Starting Value), there are two possibilities:

#### Scenario 1

If the End Value has fallen in value, but not below 85% of the Starting Value, this decline in value will not be subtracted from Initial Subscription Price at Maturity.

#### Scenario 2

If the End Value has fallen below 85% of the Starting Value, 100% of the decline in the value of the basket of 30 shares of North-American large-cap companies, relative to the Starting Value (= (End Value minus Starting Value) divided by Starting Value) will be subtracted from the Initial Subscription Price. This result will be increased with 15% of the Initial Subscription Price. In such a scenario the repayment at Maturity is below the Initial Subscription Price.

The sub-fund does not, therefore, provide any guaranteed return or capital protection, either during its life or at Maturity.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

### Transparency of adverse sustainability impacts

The sub-fund took into account the principal adverse impacts of its investment decisions on sustainability factors ("PAI") as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on disclosure on sustainability in the financial services sector ("SFDR") through KBC Group's Investment Policy and KBC Group Policy on Blacklisted Companies.

Based on the KBC Group Policy on Blacklisted Companies, all companies on the 'KBC Group Blacklist' (including companies involved in controversial weapons such as those prohibited by Belgian law and white phosphorus weapons) are excluded as well as the worst offenders of the UN Global Compact.

Consequently, the sub-fund took into account exposure to controversial weapons ('indicator 14') by excluding companies dealing with controversial weapon systems, and violations of the principles of the UN Global Compact or the Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises ('indicator 10') by excluding the worst offenders of the UN Global Compact. During the lifetime of the sub-fund, no new shares will be included in the underlying basket of shares resulting from a corporate action if the company in question is excluded on the basis of the 'KBC Group Blacklist'.

## Maturity

Friday 31 July 2026 (payment with a value date of D+1 banking day)

## Currency

CZK, for all shares in the basket, changes in the value of the currency in which they are expressed relative to CZK are irrelevant. The investor pays the subscription amount in CZK and will be paid in CZK at Maturity (or earlier). The investor is not protected against any decline in the value of the currency in which the sub-fund is denominated relative to the euro.

## Starting Value

Value of the basket based on the weighted average of the Value of the shares included in the basket during the first 10 Valuation Days, starting from Thursday 8 October 2020 inclusive.

## End Value

Value of the basket based on the weighted average of the Value of the shares included in the basket on the last Valuation Day of the month for the last 18 months before Maturity, more specifically from January 2025 through June 2026 (inclusive).

## Value

For all the shares, except for those listed on the Milan stock exchange, the closing price, namely the price of a share in the basket as calculated and notified at closing of the stock exchange by the authority of the stock exchange on which the share is listed (or its legal successor). The reference price is used for shares listed on the Milan stock exchange.

## Valuation day

A Valuation Day is set separately for each share in the basket.

A Valuation Day is a day that is a planned trading day both

- i) for the stock exchange on which the share is listed and
- ii) for the stock exchange whose activities have a substantial influence on the trading of options and futures on the share concerned

hereinafter referred to as 'the stock exchanges concerned'.

If on the Valuation Day,

- a) one of the stock exchanges concerned is unexpectedly closed or
- b) there is an event that disrupts the market for a stock exchange concerned or
- c) one of the stock exchanges concerned closes early,

the original Valuation Day is replaced by the following trading day when no event as referred to in a), b) or c) above occurs. An extraordinary closure that has been announced in advance is not considered as early closure.

If a valuation is made on consecutive Valuation Days, the trading day that replaces the original Valuation Day (i) may not coincide with another original Valuation Day and (ii) may not be a trading day that already replaces another original Valuation Day.

However, if an event as referred to under a), b) or c) above occurs on each of the eight trading days following the original Valuation Day,

- (i) the eighth trading day shall be considered as the original Valuation Day and
- (ii) the Bevek shall assess, in good faith and in consultation with the prime counterparty or counterparties with which it has concluded a swap agreement, the price of the share as it would have been traded on that eighth trading day and
- (iii) the Bevek will notify shareholders of any changes regarding setting the Starting Value and/or End Value and conditions of payment.

### Relevant basket

In the table below, the columns from left to right reflect the number of the share, the name of the share, the Bloomberg code, the exchange on which it trades (City-MIC Code) and its initial weighting in the basket.

| (i) | Name                             | Bloomberg Code  | Exchange        | Initial Weighting Coefficients |
|-----|----------------------------------|-----------------|-----------------|--------------------------------|
| 1   | ABBVIE INC                       | ABBV UN Equity  | NEW YORK - XNYS | 5.0000%                        |

### Basket composition methodology

KBC Asset Management used the following methodology to determine the composition of the sub-fund's basket.

#### Step 1 :

The starting point is the global equities universe from which a selection of potential investments is derived in accordance with the economic criteria for the composition of the basket and subject to restrictions regarding stock market capitalisation and liquid assets.

The economic criteria for the composition of the basket determine the size of the final selection.

#### Step 2 :

The selection of shares obtained in step 1 is reduced to a short list using a quantitative selection based on past financial data. The shares selected are those of companies that achieve a good score in terms of management quality, a healthy balance-sheet structure and a positive trend in profitability.

#### Step 3 :

The selection of shares obtained in step 2 is then verified by KBC Asset Management analysts. Shares that are permanently monitored by the analysts and those for which there is a negative recommendation, when the product is launched, are then withdrawn from the selection.

Step 4 :

The last reduction of the selection provides the final basket. This selection was made using the technical parameters of options (including the term, volatility, dividend yield and interest rate).

The final basket must satisfy the legal requirements concerning the quantity of shares and adequate distribution in the weighting. In addition, care is taken to ensure compliance with the geographical and/or sector spread. The analysts make a qualitative assessment of each share used taking account of specific knowledge of these shares and the sectors/regions from which they come, in accordance with the term of the sub-fund.

For the sub-fund Optimum Fund ČSOB Airbag Amerika 1, about 1306 equities were selected during step 1.

The initial selection was reduced by a maximum 20% in step 2.

This was again reduced by 10% (indicative) in step 3. The final basket set up during step 4 is described above under *Relevant basket*. This basket makes it possible to offer the sub-fund Optimum Fund ČSOB Airbag Amerika 1 under the conditions set out in the investment policy referred to above. Here the selection process uses parameters that could affect the potential return on the investments.

*Selection criteria for the basket :*

A share/issuer may only form part of the basket if (i) it is listed on a stock exchange, (ii) it is an North-American company with a high market capitalisation, and (iii) the Board of Directors of the Bevek has approved its inclusion in the basket (the 'Selection criteria').

### **Modifications to the basket due to mergers, acquisitions, demergers, nationalisation, bankruptcy or disqualification :**

#### **Mergers or acquisitions**

If, during the life of the sub-fund, one or more issuers of shares in the basket are involved in a merger or acquisition, the shares of the relevant issuers which still meet the selection criteria after these operations will be given a weighting in the basket equal to the sum of the weightings of the shares of all issuers involved in the operation. If, after the operation, none of the issuers involved in the operation meet the selection criteria, the procedures described under 'Nationalisation, bankruptcy or disqualification' will apply.

#### **Demergers**

If an issuer of a share in the basket proceeds to a demerger, then the share from the issuer concerned can be substituted either by one of the shares that came about as a result of the demerger and that meets the selection criteria, or by a basket of shares arising from the demerger which meet the selection criteria. This basket of shares will, when calculating the number of shares in the basket, be considered as one share. If, after the operation, none of the shares resulting from the demerger meet the selection criteria, the procedures described under 'Nationalisation, bankruptcy or disqualification' will apply.

#### **Nationalisation, bankruptcy or disqualification**

If an issuer of a share in the basket is nationalised, declared bankrupt or no longer meets the selection criteria ('disqualification'), this share will be sold at the last known price before removal. The amount thus realised will then be invested until Maturity at the rate of interest in force on money or bond markets at the moment of removal, and this for a term equal to the term remaining until Maturity of the sub-fund. The realised amount plus the interest will be taken into account at Maturity as the result achieved for that share in order to calculate the final increase in the value of the basket at Maturity.

### **Securities Financing Transactions (SFTs)**

**The sub-fund may not lend any financial instruments.**

### **General strategy for hedging the exchange risk**

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

### **Social, ethical and environmental aspects**

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'.

## **2.1.4. Financial portfolio management**

The intellectual management, with the exception of the creation of the sub-fund and its maintenance in terms of the technical, product-specific and legal aspects has been delegated by the management company to KBC Fund Management Limited, 4th Floor, Scotch House, 6/7 Burgh Quay, Dublin 2, D02 VK44, Ireland.

## **2.1.5. Distributors**

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

## **2.1.6. Index and benchmark**

Not applicable

## 2.1.7. Policy pursued during the financial year

## 2.1.8. Summary risk indicator

- 2 on a scale of 1 (lowest risk) to 7 (highest risk)
- a moderate level of inflation risk: there is no protection against an increase of the inflation.
  - a moderate level of concentration risk: there is a concentration of investments in the shares of North American companies.
  - a moderate level of market risk: the level of the risk reflects the volatility of the stock market and the exchange rate risk in relation to the euro.
  - a moderate level of performance risk: the level of the risk reflects the volatility of the stock market and the exchange rate risk in relation to the euro.
- There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

## 2.2. Balance sheet

| Balance sheet layout |                                                                   | 28/02/2026<br>(in Czech koruna) | 28/02/2025<br>(in Czech koruna) |

## 2.4.5. Performance figures

BE6322583269  
Optimum Fund ČSOB Airbag Amerika 1 CAP  
Annual performance from 01/03/2020 through 28/02/2026 (in CZK)

If the results are expressed in a currency other than the euro, the return may be higher or lower due to exchange rate fluctuations.

| Cap Div | ISIN Code    | Curr<br>ency | 1 year        |            | 3 years       |            | 5 years       |            | 10 years      |            | Since Launch* |               |
|---------|--------------|--------------|---------------|------------|---------------|------------|---------------|------------|---------------|------------|---------------|---------------|
|         |              |              | Share classes | Bench mark | Share classes | Bench mark | Share classes | Bench mark | Share classes | Bench mark | Starting date | Share classes |
| CAP     | BE6322583269 | CZK          | 11.79%        |            | 10.12%        |            | 6.81%         |            |               |            | 01/10/2020    | 5.94%         |

Risk warning: Past performance is not a guide to future performance.

\* Return on annual basis.

- The bar chart shows the performance for full financial years(period of 12 months prior to the half-yearly closing).
- The figures do not take account of any restructuring..
- Calculated in CZK and in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage.
- Calculation method for date D, where NAV stands for net asset value:  
Capitalisation units (CAP)  
Return on date D over a period of X years :  

$$[NIW(D) / NIW(Y)]^{1/X} - 1$$
 where Y = D-X  
 Return on date D since the start date S of the unit:  

$$[NIW(D) / NIW(S)]^{1/F} - 1$$
 where F = 1 if the unit has existed for less than one year on date D  
 where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D
- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation shares.

## 2.4.6. Costs

### Ongoing Charges:

Management fees and other administrative or operating costs: 0,894%  
Transaction costs: 0,000%

Percentage calculated at reporting date: 28 February 2026 (period of 12 months prior to the half-yearly closing).

A more detailed explanation with respect to the method of calculating ongoing charges and the relevant exclusions can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.5. Ongoing charges'

### Existence of Commission Sharing Agreements

Not applicable

### Fee sharing agreements en rebates

The management company has shared 70.00% of its fee with the distributor, and institutional and/or professional parties.

This percentage has been calculated relative to the fee for managing the investment portfolio of the sub-fund when it was launched.

## 2.4.7. Notes to the financial statements and other data

### Fee for managing the investment portfolio

KBC Asset Management NV receives a fee for managing the sub-fund's investments. This fee consists of a varying amount of max. 0.2 CZK per unit per year (with a maximum of CZK per unit per year for risk management).

This fee, which is calculated every six months, is paid monthly on the last banking day of each month. It can change from one six-month period to the next, within the limits set out below, and is based on the number of units issued at the start of each six-month period.

In the calculation, account is taken of the difference between:

- the return generated by the investments described under *Permitted asset classes* at Maturity and
- the expenses borne by the sub-fund to achieve a potential return (see *Permitted 'swap' transactions*),
- after deducting the expected fixed and variable expenses of the sub-fund, as mentioned above.

Of this, KBC Fund Management Ltd. receives a fee of no more than 0.19 CZK per unit per year from KBC Asset Management NV for the intellectual management of the sub-fund. KBC Fund Management Ltd. is a wholly owned subsidiary of KBC Asset Management NV.

KBC Asset Management NV or one of its subsidiaries has also been appointed manager of the SPVs in which the sub-fund may invest (see *Criteria the investments must meet*). KBC Asset Management NV or one of its subsidiaries, as the case may be, receives an annual fee from the relevant SPVs for their management. This management fee may not exceed 0.15% per year and is calculated on the assets managed at the end of the quarter.

The sum of (i) the fee for managing the investment portfolio that the sub-fund pays to the management company and (ii) the management fee that the SPVs in which the sub-fund invests pay to the asset manager, shall never

exceed 0.20 CZK per unit per year, as described above.

#### 2.1.2. Stock exchange listing

Not applicable.

#### 2.1.3. Goal and key principles of the investment policy

##### Object of the sub-fund

The object of the sub-fund is twofold (before deducting charges and taxes):

- (1) To repay per share the initial subscription price of 10 CZK at Maturity.(i.e. the capital protection). This capital protection is provided through a financial mechanism that will be explained in more detail under the heading *Capital protection*. However, the capital protection does not apply to shareholders who sell their shares before Maturity.
- (2) To provide a potential return through an investment in swaps. The various types of swaps in which the sub-fund may invest are explained in more detail under the *Potential return*.

##### Capital Protection

###### The financial mechanism used to achieve capital protection

The financial mechanism used to achieve capital protection at Maturity consists of an investment of the total amount of the subscriptions in bonds and other debt instruments, deposits and/or liquid assets (including cash deposited on a time-deposit account or current account). These investments can have different maturities and coupon payment dates. Using the swaps described under the heading *Permitted swap transactions* (2), these investments are matched with the due dates of the obligations of the sub-fund.

###### Criteria the investments must meet

The investments must meet one of the following criteria:

- (1) An investment in deposits and/or debt instruments, placed with or issued by financial institutions under the prudential supervision of and established in a Member State of the European Economic Area.
- (2) An investment in debt instruments issued or guaranteed by a Member State of the European Economic Area.
- (3) An investment under an investment strategy with an analogous structure and identical counterparty risk as a direct investment in deposits and/or debt instruments as stated under (1) and (2) above.

The investments under (3) may consist of:

- (A) An investment in notes listed on a stock exchange that are issued by 'Special Purpose Vehicles' (SPVs).

These SPVs are managed by KBC Asset Management NV or a subsidiary.

The underlying assets of the bonds issued by the SPVs consist of a diversified portfolio of deposits issued by financial institutions, bonds, other debt instruments and financial derivatives. When selecting these underlying assets, account is taken of criteria relating to allocation and creditworthiness (see *Permitted asset classes* and *Characteristics of the bonds and other debt instruments*) in order to limit the counterparty risk.

Further details of the criteria these underlying deposits, bonds, other debt instruments and financial derivatives must meet are provided in the base prospectuses for the SPVs, which can be viewed at or downloaded from [www.kbc.be/prospectus/spv](http://www.kbc.be/prospectus/spv).

Investors are provided with information on the investments made by both the sub-fund and the SPVs in the annual and half-yearly reports on the open-ended investment company under Belgian law (bevek) to which the sub-fund belongs. These reports can also be viewed at or downloaded from [www.kbc.be](http://www.kbc.be).

- (B) An investment in:
- deposits with financial institutions under prudential supervision in the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia and/or
  - debt instruments issued by financial institutions under prudential supervision in the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia and/or
  - debt instruments issued or guaranteed by the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia.

Prudential supervision of financial institutions in the United Kingdom, Switzerland, the United States of America, Japan, Canada and Australia can be equated to prudential supervision of financial institutions in the member states of the European Economic Area.

The investments in debt instruments issued by financial institutions under prudential supervision in the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia or issued or guaranteed by the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia have a minimum credit rating as set out under the heading *Characteristics of the bonds and other debt instruments*.

- (C) The investments may also consist of a combination of the investments specified under (A) and (B).

### **No formal guarantee**

No formal guarantee of repayment of the initial subscription price is provided to the sub-fund or to its shareholders. In other words, the capital protection is not binding for the sub-fund as regards the result generated, although achieving this objective through the operation of the financial mechanism is still the top priority.

If the financial mechanism fails and, as a result, the amount per share payable (before deducting charges and taxes) at Maturity is lower than the initial subscription price, KBC Asset Management NV may decide (but is not obliged) to use the management fee it has received during the current financial year from the sub-fund – and possibly also from other sub-funds of the bevek – to cover the shortfall. This is not a guarantee from KBC Asset Management NV, which may decide at any time and at its own discretion whether or not to use the management fee for this purpose.

The capital protection does not apply to shareholders who sell their shares before Maturity.

### **Potential return**

To achieve a potential return, the sub-fund concludes swaps with one or more prime counterparties. Consequently, the sub-fund transfers a portion of the future income from the investments that were made to achieve capital protection to this counterparty (these counterparties) during the life of the sub-fund. In exchange, the counterparty (counterparties) undertake to provide a potential return as specified under the heading *Selected strategy*.

### **Sub-fund's investment policy**

#### **Permitted asset classes**

Pursuant to the provisions of the Royal Decree of 12 November 2012 on undertakings for collective investment complying with the conditions of Directive 2009/65/EC, the sub-fund may invest in transferable securities (including bonds and other debt instruments), money market instruments, units (shares) in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as and to the extent permitted by the applicable legislation.

The investment limits and restrictions set out in the Royal Decree of 12 November 2012 on undertakings for collective investment complying with the conditions of Directive 2009/65/EC will be respected at all times.

### **Characteristics of the bonds and other debt instruments**

During the sub-fund's life, the average credit rating of the bonds and other debt instruments shall be at least 'A-' from Standard & Poor's or an equivalent rating from Moody's or Fitch, or, if there is no credit rating available, an average credit risk profile that the manager considers to be at least equivalent.

At the start of the investment, the credit rating of the long-term bonds and other debt instruments shall be at least 'A-' from Standard & Poor's or an equivalent rating from Moody's or Fitch, or, if there is no credit rating available, a credit risk profile that the manager considers to be at least equivalent.

At the start of the investment, the credit rating of the short-term bonds and other debt instruments shall be at least 'A-1' from Standard & Poor's or an equivalent rating from Moody's or Fitch, or, if there is no credit rating available, a credit risk profile that the manager considers to be at least equivalent.

When selecting the bonds and other debt instruments, all maturities are taken into consideration.

### Permitted swap transactions

**The swaps described below have been concluded with a prime counterparty or prime counterparties within the limits laid down by law.**

(1) To achieve a potential return, the sub-fund concludes swaps. Under such swap contracts, the sub-fund transfers a portion of the future income from the investments described under the heading 'Permitted asset classes' to the counterparty or counterparties during the life of the sub-fund. In exchange, the counterparty or counterparties undertake to provide a potential return as specified under the heading *Selected strategy*.

**The swaps under (1) are essential to achieve the sub-fund's investment objectives, since this technique facilitates achievement of the goal of generating a potential return.**

**The sub-fund's risk profile is not affected by the use of these swaps.**

(2) If necessary, the sub-fund also concludes swaps to match the due dates of the commitments of the sub-fund with those of the cash flows stemming from the deposits, bonds and other debt instruments described under the heading *Criteria the investments must meet*.

**These swaps are essential to achieve the sub-fund's investment objectives, since there are not enough bonds and other debt instruments available on the market whose coupon payments and maturity dates always perfectly match the due dates of the sub-fund's obligations.**

**The sub-fund's risk profile is not affected by the use of these swaps.**

(3) In addition, the sub-fund may conclude swaps to protect itself against the credit risk in respect of issuers of bonds and other debt instruments. Through this type of swap, one or more counterparties takes over the risk of an issuer of a bond or other debt instrument in the sub-fund's portfolio defaulting, in exchange for a fee payable by the sub-fund.

**The swaps under (3) serve to hedge the credit risk.**

**The sub-fund's risk profile is not affected by the use of these swaps.**

### Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

### Strategie selected

#### Investment objectives and strategy:

The sub-fund has two investment objectives: firstly, it seeks to repay at Maturity 100% of the initial subscription price and secondly a possible capital gain that is contingent on the evolution of a basket of 30 corporate shares which are active in the sector of e-commerce and information technology (IT).

At Maturity, a capital gain will be distributed that will equal the best of two alternatives:

- on the one hand 3.00%, settled at 100% of the initial subscription price;
- on the other hand 80% of the increase in the basket of 30 shares, settled at 100% of the initial subscription price, where the maximum capital gain will be 50%. The evolution of the basket is calculated as follows: [end value of the basket minus the starting value of the basket], divided by the starting value of the basket. Decreases in the basket are not taken into account.

Consequently, the capital gain at the Maturity Date will be at least 3.00% (yield to maturity: 0.53% before fees and taxes) and maximum 50% (yield to maturity: 7.57% before costs and taxes).

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

### Transparency of adverse sustainability impacts

The sub-fund took into account the principal adverse impacts of its investment decisions on sustainability factors ("PAI") as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on disclosure on sustainability in the financial services sector ("SFDR") through KBC Group's Investment Policy and KBC Group Policy on Blacklisted Companies.

Based on the KBC Group Policy on Blacklisted Companies, all companies on the 'KBC Group Blacklist' (including companies involved in controversial weapons such as those prohibited by Belgian law and white phosphorus weapons) are excluded as well as the worst offenders of the UN Global Compact.

Consequently, the sub-fund took into account exposure to controversial weapons ('indicator 14') by excluding companies dealing with controversial weapon systems, and violations of the principles of the UN Global Compact or the Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises ('indicator 10') by excluding the worst offenders of the UN Global Compact.

## **Maturity**

Friday 30 November 2029 (payment with a value date of D+1 banking day)

## **Currency**

CZK, for all shares in the basket, changes in the value of the currency in which they are expressed relative to CZK are irrelevant. The investor pays the subscription amount in CZK and will be paid in CZK at Maturity (or earlier). The investor is not protected against any decline in the value of the currency in which the sub-fund is denominated relative to the euro.

## **Starting Value**

Value of the basket based on the weighted average of the Value of the shares included in the basket during the first 10 Valuation Days, starting from Monday 13 May 2024 inclusive.

## **End Value**

Value of the basket based on the weighted average of the Value of the shares included in the basket on the last Valuation Day of the month for the last 18 months before Maturity, more specifically from May 2028 through October 2029 (inclusive).

## **Value**

For all the shares, except for those listed on the Milan stock exchange, the closing price, namely the price of a share in the basket as calculated and notified at closing of the stock exchange by the authority of the stock exchange on which the share is listed (or its legal successor). The reference price is used for shares listed on the Milan stock exchange.

## **Valuation day**

A Valuation Day is set separately for each share in the basket.

A Valuation Day is a day that is a planned trading day both

- i) for the stock exchange on which the share is listed and
- ii) for the stock exchange whose activities have a substantial influence on the trading of options and futures on the share concerned

hereinafter referred to as 'the stock exchanges concerned'.

If on the Valuation Day,

- a) one of the stock exchanges concerned is unexpectedly closed or
- b) there is an event that disrupts the market for a stock exchange concerned or
- c) one of the stock exchanges concerned closes early,

the original Valuation Day is replaced by the following trading day when no event as referred to in a), b) or c) above occurs. An extraordinary closure that has been announced in advance is not considered as early closure.

If a valuation is made on consecutive Valuation Days, the trading day that replaces the original Valuation Day (i) may not coincide with another original Valuation Day and (ii) may not be a trading day that already replaces another original Valuation Day.

However, if an event as referred to under a), b) or c) above occurs on each of the eight trading days following the original Valuation Day,

- (i) the eighth trading day shall be considered as the original Valuation Day and
- (ii) the Bevek shall assess, in good faith and in consultation with the prime counterparty or counterparties with which it has concluded a swap agreement, the price of the share as it would have been traded on that eighth trading day and
- (iii) the Bevek will notify shareholders of any changes regarding setting the Starting Value and/or End Value and conditions of payment.

### Relevant basket

In the table below, the columns from left to right reflect the number of the share, the name of the share, the Bloomberg code, the exchange on which it trades (City-MIC Code) and its initial weighting in the basket.

| (i) | Name                           | Bloomberg Code  | Exchange         | Initial Weighting Coefficients |

### Basket composition methodology

KBC Asset Management used the following methodology to determine the composition of the sub-fund's basket.

#### Step 1 :

The starting point is the global equities universe from which a selection of potential investments is derived in accordance with the economic criteria for the composition of the basket and subject to restrictions regarding stock market capitalisation and liquid assets.

The economic criteria for the composition of the basket determine the size of the final selection.

#### Step 2 :

The selection of shares obtained in step 1 is reduced to a short list using a quantitative selection based on past financial data. The shares selected are those of companies that achieve a good score in terms of management quality, a healthy balance-sheet structure and a positive trend in profitability.

#### Step 3 :

The selection of shares obtained in step 2 is then verified by KBC Asset Management analysts. Shares that are permanently monitored by the analysts and those for which there is a negative recommendation, when the product is launched, are then withdrawn from the selection.

#### Step 4 :

The last reduction of the selection provides the final basket. This selection was made using the technical parameters of options (including the term, volatility, dividend yield and interest rate).

The final basket must satisfy the legal requirements concerning the quantity of shares and adequate distribution in the weighting. In addition, care is taken to ensure compliance with the geographical and/or sector spread. The analysts make a qualitative assessment of each share used taking account of specific knowledge of these shares and the sectors/regions from which they come, in accordance with the term of the sub-fund.

For the sub-fund Optimum Fund ČSOB Digitalizace 1, about 295 equities were selected during step 1.

The initial selection was reduced by a maximum 20% in step 2.

This was again reduced by 10% (indicative) in step 3. The final basket set up during step 4 is described above under *Relevant basket*. This basket makes it possible to offer the sub-fund Optimum Fund ČSOB Digitalizace 1 under the conditions set out in the investment policy referred to above. Here the selection process uses parameters that could affect the potential return on the investments.

#### *Selection criteria for the basket :*

A share/issuer may only form part of the basket if (i) it is listed on a stock exchange, (ii) the issuer is a company active in the e-commerce of information technology sector (IT), (iii) the Board of Directors of the Bevek has approved its inclusion in the basket, (iv) the issuer is not included in the KBC Group Policy on Blacklisted Companies\* and (v) at the time the swap contracts are being concluded (see 'Permitted swap transactions'), the issuer of the share complies with the KBC Group Investment Policy\* (the 'Selection criteria').

\* The KBC Group Policy on Blacklisted Companies and the KBC Group Investment Policy can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > General exclusion policies for conventional funds and socially responsible investment funds, Paragraph 1 'KBC Group Policy on Blacklisted Companies' and 2 'KBC Group Investment Policy'.

### **Modifications to the basket due to mergers, acquisitions, demergers, nationalisation, bankruptcy or disqualification :**

#### **Mergers or acquisitions**

If, during the life of the sub-fund, one or more issuers of shares in the basket are involved in a merger or acquisition, the shares of the relevant issuers which still meet the selection criteria and comply with the KBC Group Investment Policy\* after these operations will be given a weighting in the basket equal to the sum of the weightings of the shares of all issuers involved in the operation. If, after the operation, none of the issuers involved in the operation meet the selection criteria or comply with the KBC Group Investment Policy\*, the procedures described under 'Nationalisation, bankruptcy or disqualification' will apply.

\* The KBC Group Investment Policy can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > General exclusion policies for conventional funds and responsible investment funds, Paragraph 2 'KBC Group Investment Policy'.

#### **Demergers**

If an issuer of a share in the basket proceeds to a demerger, then the share from the issuer concerned can be substituted either by one of the shares that came about as a result of the demerger and that meets the selection criteria and complies with the KBC Group Investment Policy\*, or by a basket of shares arising from the demerger which meet the selection criteria and comply with the KBC Group Investment Policy\*. This basket of shares will, when calculating the number of shares in the basket, be considered as one share. If, after the operation, none of the shares resulting from the demerger meet the selection criteria or comply with the KBC Group Investment Policy\*, the procedures described under 'Nationalisation, bankruptcy or disqualification' will apply.

\* The KBC Group Investment Policy can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > General exclusion policies for conventional funds and responsible investment funds, Paragraph 2 'KBC Group Investment Policy'.

#### **Nationalisation, bankruptcy or disqualification**

If an issuer of a share in the basket is nationalised, declared bankrupt or no longer meets the selection criteria ('disqualification'), this share will be sold at the last known price before removal. The amount thus realised will then be invested until Maturity at the rate of interest in force on money or bond markets at the moment of removal, and this for a term equal to the term remaining until Maturity of the sub-fund. The realised amount plus the interest will be taken into account at Maturity as the result achieved for that share in order to calculate the final increase in the value of the basket at Maturity.

#### **Volatility of the net asset value**

The volatility of the net asset value may be high due to the composition of the portfolio.

#### **Securities Financing Transactions (SFTs)**

The sub-fund may not lend any financial instruments.

#### **General strategy for hedging the exchange risk**

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

## Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'

### 2.1.4. Financial portfolio management

The intellectual management, with the exception of the creation of the sub-fund and its maintenance in terms of the technical, product-specific and legal aspects has been delegated by the management company to KBC Fund Management Limited, 4th Floor, Scotch House, 6/7 Burgh Quay, Dublin 2, D02 VK44, Ireland.

### 2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

### 2.1.6. Index and benchmark

Not applicable

### 2.1.7. Policy pursued during the financial year

## 2.1.8. Summary risk indicator

3 on a scale of 1 (lowest risk) to 7 (highest risk)

- a moderate level of inflation risk: there is no protection against an increase of the inflation.
- a moderate level of concentration risk: there is a concentration of the investments in shares of companies in the technology industry.
- a high level of market risk: the level of the risk reflects the volatility of the stock market and the exchange rate risk in relation to the euro.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market and the exchange rate risk in relation to the euro.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

## 2.2. Balance sheet

## 2.4.5. Performance figures

BE6348266048  
Optimum Fund ČSOB Digitalizace 1 CAP  
Annual performance from 01/03/2024 through 28/02/2026 (in CZK)

If the results are expressed in a currency other than the euro, the return may be higher or lower due to exchange rate fluctuations.

| Cap Div | ISIN Code    | Curr<br>ency | 1 year        |            | 3 years       |            | 5 years       |            | 10 years      |            | Since Launch* |               |
|---------|--------------|--------------|---------------|------------|---------------|------------|---------------|------------|---------------|------------|---------------|---------------|
|         |              |              | Share classes | Bench mark | Share classes | Bench mark | Share classes | Bench mark | Share classes | Bench mark | Starting date | Share classes |
| CAP     | BE6348266048 | CZK          | 2.64%         |            |               |            |               |            |               |            | 02/05/2024    | 6.82%         |

Risk warning: Past performance is not a guide to future performance.

\* Return on annual basis.

- The bar chart shows the performance for full financial years(period of 12 months prior to the half-yearly closing).
- The figures do not take account of any restructuring..
- Calculated in CZK and in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage.
- Calculation method for date D, where NAV stands for net asset value:  
Capitalisation units (CAP)  
Return on date D over a period of X years :  

$$[NIW(D) / NIW(Y)] ^ {1 / X} - 1$$
 where Y = D-X  
 Return on date D since the start date S of the unit:  

$$[NIW(D) / NIW(S)] ^ {1 / F} - 1$$
 where F = 1 if the unit has existed for less than one year on date D  
 where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D
- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation shares.

## 2.4.6. Costs

### Ongoing Charges:

Management fees and other administrative or operating costs: 1,244%  
Transaction costs: 0,000%

Percentage calculated at reporting date: 28 February 2026 (period of 12 months prior to the half-yearly closing).

A more detailed explanation with respect to the method of calculating ongoing charges and the relevant exclusions can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.5. Ongoing charges'

### Existence of Commission Sharing Agreements

Not applicable

### Fee sharing agreements en rebates

The management company has shared 70.00% of its fee with the distributor, and institutional and/or professional parties.

This percentage has been calculated relative to the fee for managing the investment portfolio of the sub-fund when it was launched.

## 2.4.7. Notes to the financial statements and other data

### Fee for managing the investment portfolio

KBC Asset Management NV receives a fee for managing the sub-fund's investments. This fee consists of a varying amount of max. 0.2 CZK per unit per year (with a maximum of CZK per unit per year for risk management).

This fee, which is calculated every six months, is paid monthly on the last banking day of each month. It can change from one six-month period to the next, within the limits set out below, and is based on the number of units issued at the start of each six-month period.

In the calculation, account is taken of the difference between:

- the return generated by the investments in bonds and other debt instruments, deposits, and/or liquid assets in order to achieve the capital protection on the Maturity date (see *The financial mechanism used to achieve capital protection*), and
- the expenses borne by the sub-fund to achieve a potential return (see *Permitted 'swap' transactions*),
- after deducting the expected fixed and variable expenses of the sub-fund, as mentioned above.

Of this, KBC Fund Management Ltd. receives a fee of no more than 0.19 CZK per unit per year from KBC Asset Management NV for the intellectual management of the sub-fund. KBC Fund Management Ltd. is a wholly owned subsidiary of KBC Asset Management NV.

KBC Asset Management NV has informed the bevek that, if due to the failure of the financial mechanism, the amount that should be paid per unit (after deducting taxes and charges) on the Maturity date, as relevant, is lower than the initial subscription price, KBC Asset Management NV may decide (but is not obliged to) to use the management fee it receives during the current financial year from the sub-fund – and possibly also from other sub-funds of the bevek – to cover this shortfall. This is not a guarantee from KBC Asset Management NV, which may

decide at any time and at its own discretion whether or not to use the management fee for this purpose. KBC Asset Management NV or one of its subsidiaries has also been appointed manager of the SPVs in which the sub-fund may invest (see *Criteria the investments must meet*). KBC Asset Management NV or one of its subsidiaries, as the case may be, receives an annual fee from the relevant SPVs for their management. This management fee may not exceed 0.15% per year and is calculated on the assets managed at the end of the quarter.

The sum of (i) the fee for managing the investment portfolio that the sub-fund pays to the management company and (ii) the management fee that the SPVs in which the sub-fund invests pay to the asset manager, shall never exceed 0.20 CZK per unit per year, as described above.

#### 2.1.2. Stock exchange listing

Not applicable.

#### 2.1.3. Goal and key principles of the investment policy

##### Object of the sub-fund

The object of the sub-fund is twofold (before deducting charges and taxes):

- (1) To repay per share at least 90% of the initial subscription price of 10 CZK at Maturity, i.e. 9 CZK using the investments described under the heading *Permitted asset classes*.
- (2) To provide a potential return through an investment in swaps.  
To this end, the sub-fund assigns a portion of the future income from the investments described under *Permitted asset classes* to the counterparty or counterparties during the life of the sub-fund. In exchange, the counterparty or counterparties undertakes (undertake) to provide a potential return.  
The various types of swaps in which the sub-fund may invest are explained in more detail under the heading *Permitted swap transactions*.

No formal guarantee of repayment of at least 90% of the initial subscription price is provided to the sub-fund or to its shareholders. In other words, this objective is not binding for the sub-fund as regards the result generated, although achieving this objective through the investments described under the heading *Permitted asset classes* is still the top priority.

If the objective to repay per share at least 90% of the initial subscription price at Maturity is not achieved, KBC Asset Management NV may decide (but is not obliged to) to use the management fee it has received during the current financial year from the sub-fund – and possibly also from other sub-funds of the Bevek – to cover the shortfall. This is not a guarantee from KBC Asset Management NV, which may decide at any time and at its own discretion whether or not to use the management fee for this purpose.

This objective to repay per share at least 90% of the initial subscription price does not apply to shareholders who sell their shares before Maturity.

##### Sub-fund's investment policy

###### Permitted asset classes

Pursuant to the provisions of the Royal Decree of 12 November 2012 on undertakings for collective investment complying with the conditions of Directive 2009/65/EC, the sub-fund may invest in transferable securities (including bonds and other debt instruments), money market instruments, units (shares) in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as and to the extent permitted by the applicable legislation. These investments can have different maturities and coupon payment dates. Using the swaps described under the heading *Permitted swap transactions* (2), these investments are matched with the obligations of the sub-fund.

The investment limits and restrictions set out in the Royal Decree of 12 November 2012 on undertakings for collective investment complying with the conditions of Directive 2009/65/EC will be respected at all times.

The sub-fund may invest in, among other things, listed bonds issued by 'Special Purpose Vehicles' (SPVs).

These SPVs are managed by KBC Asset Management NV or a subsidiary.

The underlying assets of the bonds issued by the SPVs consist of a diversified portfolio of deposits issued by financial institutions, bonds, other debt instruments and financial derivatives. When selecting these underlying assets, account is taken of criteria relating to allocation and creditworthiness (see *Permitted asset classes* and *Characteristics of the bonds and other debt instruments*) in order to limit the counterparty risk.

Further details of the criteria these underlying deposits, bonds, other debt instruments and financial derivatives must meet are provided in the base prospectuses for the SPVs, which can be viewed at or downloaded from [www.kbc.be/prospectus/spv](http://www.kbc.be/prospectus/spv).

Investors are provided with information on the investments made by both the sub-fund and the SPVs in the annual and half-yearly reports on the open-ended investment company under Belgian law (Bevek) to which the sub-fund belongs. These reports can also be viewed at or downloaded from [www.kbc.be](http://www.kbc.be).

### **Characteristics of the bonds and other debt instruments**

During the sub-fund's life, the average credit rating of the bonds and other debt instruments shall be at least 'A-' from Standard & Poor's or an equivalent rating from Moody's or Fitch, or, if there is no credit rating available, an average credit risk profile that the manager considers to be at least equivalent.

At the start of the investment, the credit rating of the long-term bonds and other debt instruments shall be at least 'A-' from Standard & Poor's or an equivalent rating from Moody's or Fitch, or, if there is no credit rating available, a credit risk profile that the manager considers to be at least equivalent.

At the start of the investment, the credit rating of the short-term bonds and other debt instruments shall be at least 'A-1' from Standard & Poor's or an equivalent rating from Moody's or Fitch, or, if there is no credit rating available, a credit risk profile that the manager considers to be at least equivalent.

When selecting the bonds and other debt instruments, all maturities are taken into consideration.

### **Permitted swap transactions**

**The swaps described below have been concluded with a prime counterparty or prime counterparties within the limits laid down by law.**

(1) To achieve a potential return, the sub-fund concludes swaps. Under such swap contracts, the sub-fund transfers a portion of the future income from the investments described under the heading *Permitted asset classes* to the counterparty or counterparties during the life of the sub-fund. In exchange, the counterparty or counterparties undertake to provide a potential return as specified under the heading *Selected strategy*.

The use of swaps in this sub-fund can lead to a loss of no more than 10% of the initial invested capital.

**The swaps under (1) are essential to achieve the sub-fund's investment objectives, since this technique facilitates achievement of the goal of generating a potential return.**

**The sub-fund's risk profile is not affected by the use of these swaps.**

(2) If necessary, the sub-fund also concludes swaps to match the due dates of the commitments of the sub-fund with those of the cash flows stemming from the investments described under the heading *Permitted asset classes*.

**These swaps are essential to achieve the sub-fund's investment objectives, since there are not enough bonds and other debt instruments available on the market whose coupon payments and maturity dates always perfectly match the due dates of the sub-fund's obligations.**

**The sub-fund's risk profile is not affected by the use of these swaps.**

(3) In addition, the sub-fund may conclude swaps to protect itself against the credit risk in respect of issuers of bonds and other debt instruments. Through this type of swap, one or more counterparties takes over the risk of an issuer of a bond or other debt instrument in the sub-fund's portfolio defaulting, in exchange for a fee payable by the sub-fund.

**The swaps under (3) serve to hedge the credit risk.**

**The sub-fund's risk profile is not affected by the use of these swaps.**

### **Restrictions of the investment policy**

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

## Strategie selected

### Investment objectives and strategy:

The sub-fund has two investment objectives: firstly, it seeks to repay at Maturity at least 90% of the initial subscription price and secondly a possible capital gain that is contingent on the evolution of a basket of 30 shares of a worldwide selection of companies that are characterised by a high market capitalisation.

If the Value of the basket of 30 shares of a worldwide selection of companies that are characterised by a high market capitalisation has risen relative to its Starting Value, 70% of this increase in Value  $(= (\text{End Value} - \text{Starting Value}) / \text{Starting Value})$  will be taken into account at Maturity with regard to 100% of the initial subscription price. The capital gain will be capped at 40% (yield to maturity of 5.69% before taxes and charges). If the Value of the basket of 30 shares of a worldwide selection of companies that are characterised by a high market capitalisation has fallen relative to its Starting Value, 100% of this fall in Value will be taken into account at Maturity with regard to 100% of the initial subscription price. The capital loss will be capped at 10% (yield to maturity of -1.73% before taxes and charges).

The sub-fund does not, therefore, provide any guaranteed return or capital protection, either during its life or at Maturity.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

### Transparency of adverse sustainability impacts

The sub-fund took into account the principal adverse impacts of its investment decisions on sustainability factors ("PAI") as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on disclosure on sustainability in the financial services sector ("SFDR") through KBC Group's Investment Policy and KBC Group Policy on Blacklisted Companies.

Based on the KBC Group Policy on Blacklisted Companies, all companies on the 'KBC Group Blacklist' (including companies involved in controversial weapons such as those prohibited by Belgian law and white phosphorus weapons) are excluded as well as the worst offenders of the UN Global Compact.

Consequently, the sub-fund took into account exposure to controversial weapons ('indicator 14') by excluding companies dealing with controversial weapon systems, and violations of the principles of the UN Global Compact or the Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises ('indicator 10') by excluding the worst offenders of the UN Global Compact. During the lifetime of the sub-fund, no new shares will be included in the underlying basket of shares resulting from a corporate action if the company in question is excluded on the basis of the 'KBC Group Blacklist'.

### Maturity

Friday 29 January 2027 (payment with a value date of D+1 banking day)

### Currency

CZK, for all shares in the basket, changes in the value of the currency in which they are expressed relative to CZK are irrelevant. The investor pays the subscription amount in CZK and will be paid in CZK at Maturity (or earlier). The investor is not protected against any decline in the value of the currency in which the sub-fund is denominated relative to the euro.

### Starting Value

Value of the basket based on the weighted average of the Value of the shares included in the basket during the first 10 Valuation Days, starting from Monday 4 January 2021 inclusive.

### End Value

Value of the basket based on the weighted average of the Value of the shares included in the basket on the last Valuation Day of the month for the last 18 months before Maturity, more specifically from July 2025 through December 2026 (inclusive).

### Value

For all the shares, except for those listed on the Milan stock exchange, the closing price, namely the price of a share in the basket as calculated and notified at closing of the stock exchange by the authority of the stock exchange on which the share is listed (or its legal successor). The reference price is used for shares listed on the Milan stock exchange.

## Valuation day

A Valuation Day is set separately for each share in the basket.

A Valuation Day is a day that is a planned trading day both

- i) for the stock exchange on which the share is listed and
- ii) for the stock exchange whose activities have a substantial influence on the trading of options and futures on the share concerned

hereinafter referred to as 'the stock exchanges concerned'.

If on the Valuation Day,

- a) one of the stock exchanges concerned is unexpectedly closed or
- b) there is an event that disrupts the market for a stock exchange concerned or
- c) one of the stock exchanges concerned closes early,

the original Valuation Day is replaced by the following trading day when no event as referred to in a), b) or c) above occurs. An extraordinary closure that has been announced in advance is not considered as early closure.

If a valuation is made on consecutive Valuation Days, the trading day that replaces the original Valuation Day (i) may not coincide with another original Valuation Day and (ii) may not be a trading day that already replaces another original Valuation Day.

However, if an event as referred to under a), b) or c) above occurs on each of the eight trading days following the original Valuation Day,

- (i) the eighth trading day shall be considered as the original Valuation Day and
- (ii) the Bevek shall assess, in good faith and in consultation with the prime counterparty or counterparties with which it has concluded a swap agreement, the price of the share as it would have been traded on that eighth trading day and
- (iii) the Bevek will notify shareholders of any changes regarding setting the Starting Value and/or End Value and conditions of payment.

### Relevant basket

In the table below, the columns from left to right reflect the number of the share, the name of the share, the Bloomberg code, the exchange on which it trades (City-MIC Code) and its initial weighting in the basket.

| (i) | Name                          | Bloomberg Code   | Exchange         | Initial Weighting Coefficients |

### Basket composition methodology

KBC Asset Management used the following methodology to determine the composition of the sub-fund's basket.

#### Step 1 :

The starting point is the global equities universe from which a selection of potential investments is derived in accordance with the economic criteria for the composition of the basket and subject to restrictions regarding stock market capitalisation and liquid assets.

The economic criteria for the composition of the basket determine the size of the final selection.

#### Step 2 :

The selection of shares obtained in step 1 is reduced to a short list using a quantitative selection based on past financial data. The shares selected are those of companies that achieve a good score in terms of management quality, a healthy balance-sheet structure and a positive trend in profitability.

#### Step 3 :

The selection of shares obtained in step 2 is then verified by KBC Asset Management analysts. Shares that are permanently monitored by the analysts and those for which there is a negative recommendation, when the product is launched, are then withdrawn from the selection.

Step 4 :

The last reduction of the selection provides the final basket. This selection was made using the technical parameters of options (including the term, volatility, dividend yield and interest rate).

The final basket must satisfy the legal requirements concerning the quantity of shares and adequate distribution in the weighting. In addition, care is taken to ensure compliance with the geographical and/or sector spread. The analysts make a qualitative assessment of each share used taking account of specific knowledge of these shares and the sectors/regions from which they come, in accordance with the term of the sub-fund.

For the sub-fund Optimum Fund ČSOB Globálních firem 5, about 1884 equities were selected during step 1.

The initial selection was reduced by a maximum 20% in step 2.

This was again reduced by 10% (indicative) in step 3. The final basket set up during step 4 is described above under *Relevant basket*. This basket makes it possible to offer the sub-fund Optimum Fund ČSOB Globálních firem 5 under the conditions set out in the investment policy referred to above. Here the selection process uses parameters that could affect the potential return on the investments.

*Selection criteria for the basket :*

A share/issuer may only form part of the basket if (i) it is listed on a stock exchange, (ii) it has a high market capitalisation, and (iii) the Board of Directors of the Bevek has approved its inclusion in the basket (the 'Selection criteria').

### **Modifications to the basket due to mergers, acquisitions, demergers, nationalisation, bankruptcy or disqualification :**

#### **Mergers or acquisitions**

If, during the life of the sub-fund, one or more issuers of shares in the basket are involved in a merger or acquisition, the shares of the relevant issuers which still meet the selection criteria after these operations will be given a weighting in the basket equal to the sum of the weightings of the shares of all issuers involved in the operation. If, after the operation, none of the issuers involved in the operation meet the selection criteria, the procedures described under 'Nationalisation, bankruptcy or disqualification' will apply.

#### **Demergers**

If an issuer of a share in the basket proceeds to a demerger, then the share from the issuer concerned can be substituted either by one of the shares that came about as a result of the demerger and that meets the selection criteria, or by a basket of shares arising from the demerger which meet the selection criteria. This basket of shares will, when calculating the number of shares in the basket, be considered as one share. If, after the operation, none of the shares resulting from the demerger meet the selection criteria, the procedures described under 'Nationalisation, bankruptcy or disqualification' will apply.

#### **Nationalisation, bankruptcy or disqualification**

If an issuer of a share in the basket is nationalised, declared bankrupt or no longer meets the selection criteria ('disqualification'), this share will be sold at the last known price before removal. The amount thus realised will then be invested until Maturity at the rate of interest in force on money or bond markets at the moment of removal, and this for a term equal to the term remaining until Maturity of the sub-fund. The realised amount plus the interest will be taken into account at Maturity as the result achieved for that share in order to calculate the final increase in the value of the basket at Maturity.

#### **Volatility of the net asset value**

**The volatility of the net asset value may be high due to the composition of the portfolio.**

#### **Securities Financing Transactions (SFTs)**

**The sub-fund may not lend any financial instruments.**

#### **General strategy for hedging the exchange risk**

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

#### **Social, ethical and environmental aspects**

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'

## **2.1.4. Financial portfolio management**

The intellectual management, with the exception of the creation of the sub-fund and its maintenance in terms of the technical, product-specific and legal aspects has been delegated by the management company to KBC Fund Management Limited, 4th Floor, Scotch House, 6/7 Burgh Quay, Dublin 2, D02 VK44, Ireland.

## **2.1.5. Distributors**

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

## 2.1.6. Index and benchmark

Not applicable

## 2.1.7. Policy pursued during the financial year

### Composition of the basket on report date

| Name                          | Value         |

## 2.1.8. Summary risk indicator

- 1 on a scale of 1 (lowest risk) to 7 (highest risk)
  - a moderate level of inflation risk: there is no protection against an increase of the inflation.
  - a high level of market risk: the level of the risk reflects the volatility of the stock market and the exchange rate risk in relation to the euro.
  - a high level of performance risk: the level of the risk reflects the volatility of the stock market and the exchange rate risk in relation to the euro.
- There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

## 2.2. Balance sheet

Risk warning: Past performance is not a guide to future performance.

\* Return on annual basis.

- The bar chart shows the performance for full financial years(period of 12 months prior to the half-yearly closing).
- The figures do not take account of any restructuring..
- Calculated in CZK and in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage.
- Calculation method for date D, where NAV stands for net asset value:  
Capitalisation units (CAP)  
Return on date D over a period of X years :  

$$[NIW(D) / NIW(Y)] ^ {1 / X} - 1$$
 where Y = D-X  
 Return on date D since the start date S of the unit:  

$$[NIW(D) / NIW(S)] ^ {1 / F} - 1$$
 where F = 1 if the unit has existed for less than one year on date D  
 where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D
- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation shares.

## 2.4.6. Costs

### Ongoing Charges:

Management fees and other administrative or operating costs: 0,697%  
Transaction costs: 0,000%

Percentage calculated at reporting date: 28 February 2026 (period of 12 months prior to the half-yearly closing).

A more detailed explanation with respect to the method of calculating ongoing charges and the relevant exclusions can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.5. Ongoing charges'

### Existence of Commission Sharing Agreements

Not applicable

### Fee sharing agreements en rebates

The management company has shared 70.00% of its fee with the distributor, and institutional and/or professional parties.

This percentage has been calculated relative to the fee for managing the investment portfolio of the sub-fund when it was launched.

## 2.4.7. Notes to the financial statements and other data

|                                                                                                          |                                                                                                                                                                                                     |                                                                                                                                                                                                                                                                                                        |

### Fee for managing the investment portfolio

KBC Asset Management NV receives a fee for managing the sub-fund's investments. This fee consists of a varying amount of max. 0.2 CZK per unit per year (with a maximum of CZK per unit per year for risk management).

This fee, which is calculated every six months, is paid monthly on the last banking day of each month. It can change from one six-month period to the next, within the limits set out below, and is based on the number of units issued at the start of each six-month period.

In the calculation, account is taken of the difference between:

- the return generated by the investments described under *Permitted asset classes* at Maturity and
- the expenses borne by the sub-fund to achieve a potential return (see *Permitted 'swap' transactions*),
- after deducting the expected fixed and variable expenses of the sub-fund, as mentioned above.

Of this, KBC Fund Management Ltd. receives a fee of no more than 0.19 CZK per unit per year from KBC Asset Management NV for the intellectual management of the sub-fund. KBC Fund Management Ltd. is a wholly owned subsidiary of KBC Asset Management NV.

KBC Asset Management NV has informed the bevek that, if the objective to repay at least 90% of the initial subscription price of 10 CZK per share at Maturity is not achieved, KBC Asset Management NV may decide (but is not obliged to) to use the management fee it receives during the current financial year from the sub-fund – and possibly also from other sub-funds of the bevek – to cover this shortfall. This is not a guarantee from KBC Asset Management NV, which may decide at any time and at its own discretion whether or not to use the management fee for this purpose.

KBC Asset Management NV or one of its subsidiaries has also been appointed manager of the SPVs in which the

sub-fund may invest (see *Criteria the investments must meet*). KBC Asset Management NV or one of its subsidiaries, as the case may be, receives an annual fee from the relevant SPVs for their management. This management fee may not exceed 0.15% per year and is calculated on the assets managed at the end of the quarter.

The sum of (i) the fee for managing the investment portfolio that the sub-fund pays to the management company and (ii) the management fee that the SPVs in which the sub-fund invests pay to the asset manager, shall never exceed 0.20 CZK per unit per year, as described above.

#### 2.1.2. Stock exchange listing

Not applicable.

#### 2.1.3. Goal and key principles of the investment policy

##### Object of the sub-fund

The object of the sub-fund is twofold (before deducting charges and taxes):

- (1) To repay per share the initial subscription price of 10 CZK at Maturity.(i.e. the capital protection). This capital protection is provided through a financial mechanism that will be explained in more detail under the heading *Capital protection*. However, the capital protection does not apply to shareholders who sell their shares before Maturity.
- (2) To provide a potential return through an investment in swaps. The various types of swaps in which the sub-fund may invest are explained in more detail under the *Potential return*.

##### Capital Protection

###### The financial mechanism used to achieve capital protection

The financial mechanism used to achieve capital protection at Maturity consists of an investment of the total amount of the subscriptions in bonds and other debt instruments, deposits and/or liquid assets (including cash deposited on a time-deposit account or current account). These investments can have different maturities and coupon payment dates. Using the swaps described under the heading *Permitted swap transactions* (2), these investments are matched with the due dates of the obligations of the sub-fund.

###### Criteria the investments must meet

The investments must meet one of the following criteria:

- (1) An investment in deposits and/or debt instruments, placed with or issued by financial institutions under the prudential supervision of and established in a Member State of the European Economic Area.
- (2) An investment in debt instruments issued or guaranteed by a Member State of the European Economic Area.
- (3) An investment under an investment strategy with an analogous structure and identical counterparty risk as a direct investment in deposits and/or debt instruments as stated under (1) and (2) above.

The investments under (3) may consist of:

- (A) An investment in notes listed on a stock exchange that are issued by 'Special Purpose Vehicles' (SPVs).

These SPVs are managed by KBC Asset Management NV or a subsidiary.

The underlying assets of the bonds issued by the SPVs consist of a diversified portfolio of deposits issued by financial institutions, bonds, other debt instruments and financial derivatives. When selecting these underlying assets, account is taken of criteria relating to allocation and creditworthiness (see *Permitted asset classes* and *Characteristics of the bonds and other debt instruments*) in order to limit the counterparty risk.

Further details of the criteria these underlying deposits, bonds, other debt instruments and financial derivatives must meet are provided in the base prospectuses for the SPVs, which can be viewed at or downloaded from [www.kbc.be/prospectus/spv](http://www.kbc.be/prospectus/spv).

Investors are provided with information on the investments made by both the sub-fund and the SPVs in the annual and half-yearly reports on the open-ended investment company under Belgian law (bevek) to which the sub-fund belongs. These reports can also be viewed at or downloaded from [www.kbc.be](http://www.kbc.be).

- (B) An investment in:
- deposits with financial institutions under prudential supervision in the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia and/or
  - debt instruments issued by financial institutions under prudential supervision in the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia and/or
  - debt instruments issued or guaranteed by the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia.

Prudential supervision of financial institutions in the United Kingdom, Switzerland, the United States of America, Japan, Canada and Australia can be equated to prudential supervision of financial institutions in the member states of the European Economic Area.

The investments in debt instruments issued by financial institutions under prudential supervision in the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia or issued or guaranteed by the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia have a minimum credit rating as set out under the heading *Characteristics of the bonds and other debt instruments*.

- (C) The investments may also consist of a combination of the investments specified under (A) and (B).

### **No formal guarantee**

No formal guarantee of repayment of the initial subscription price is provided to the sub-fund or to its shareholders. In other words, the capital protection is not binding for the sub-fund as regards the result generated, although achieving this objective through the operation of the financial mechanism is still the top priority.

If the financial mechanism fails and, as a result, the amount per share payable (before deducting charges and taxes) at Maturity is lower than the initial subscription price, KBC Asset Management NV may decide (but is not obliged) to use the management fee it has received during the current financial year from the sub-fund – and possibly also from other sub-funds of the bevek – to cover the shortfall. This is not a guarantee from KBC Asset Management NV, which may decide at any time and at its own discretion whether or not to use the management fee for this purpose.

The capital protection does not apply to shareholders who sell their shares before Maturity.

### **Potential return**

To achieve a potential return, the sub-fund concludes swaps with one or more prime counterparties. Consequently, the sub-fund transfers a portion of the future income from the investments that were made to achieve capital protection to this counterparty (these counterparties) during the life of the sub-fund. In exchange, the counterparty (counterparties) undertake to provide a potential return as specified under the heading *Selected strategy*.

### **Sub-fund's investment policy**

#### **Permitted asset classes**

Pursuant to the provisions of the Royal Decree of 12 November 2012 on undertakings for collective investment complying with the conditions of Directive 2009/65/EC, the sub-fund may invest in transferable securities (including bonds and other debt instruments), money market instruments, units (shares) in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as and to the extent permitted by the applicable legislation.

The investment limits and restrictions set out in the Royal Decree of 12 November 2012 on undertakings for collective investment complying with the conditions of Directive 2009/65/EC will be respected at all times.

### **Characteristics of the bonds and other debt instruments**

During the sub-fund's life, the average credit rating of the bonds and other debt instruments shall be at least 'A-' from Standard & Poor's or an equivalent rating from Moody's or Fitch, or, if there is no credit rating available, an average credit risk profile that the manager considers to be at least equivalent.

At the start of the investment, the credit rating of the long-term bonds and other debt instruments shall be at least 'A-' from Standard & Poor's or an equivalent rating from Moody's or Fitch, or, if there is no credit rating available, a credit risk profile that the manager considers to be at least equivalent.

At the start of the investment, the credit rating of the short-term bonds and other debt instruments shall be at least 'A-1' from Standard & Poor's or an equivalent rating from Moody's or Fitch, or, if there is no credit rating available, a credit risk profile that the manager considers to be at least equivalent.

When selecting the bonds and other debt instruments, all maturities are taken into consideration.

### Permitted swap transactions

**The swaps described below have been concluded with a prime counterparty or prime counterparties within the limits laid down by law.**

(1) To achieve a potential return, the sub-fund concludes swaps. Under such swap contracts, the sub-fund transfers a portion of the future income from the investments described under the heading 'Permitted asset classes' to the counterparty or counterparties during the life of the sub-fund. In exchange, the counterparty or counterparties undertake to provide a potential return as specified under the heading *Selected strategy*.

**The swaps under (1) are essential to achieve the sub-fund's investment objectives, since this technique facilitates achievement of the goal of generating a potential return.**

**The sub-fund's risk profile is not affected by the use of these swaps.**

(2) If necessary, the sub-fund also concludes swaps to match the due dates of the commitments of the sub-fund with those of the cash flows stemming from the deposits, bonds and other debt instruments described under the heading *Criteria the investments must meet*.

**These swaps are essential to achieve the sub-fund's investment objectives, since there are not enough bonds and other debt instruments available on the market whose coupon payments and maturity dates always perfectly match the due dates of the sub-fund's obligations.**

**The sub-fund's risk profile is not affected by the use of these swaps.**

(3) In addition, the sub-fund may conclude swaps to protect itself against the credit risk in respect of issuers of bonds and other debt instruments. Through this type of swap, one or more counterparties takes over the risk of an issuer of a bond or other debt instrument in the sub-fund's portfolio defaulting, in exchange for a fee payable by the sub-fund.

**The swaps under (3) serve to hedge the credit risk.**

**The sub-fund's risk profile is not affected by the use of these swaps.**

### Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

### Strategie selected

#### Investment objectives and strategy:

The sub-fund has two investment objectives: firstly, it seeks to repay at Maturity 100% of the initial subscription price and secondly a possible capital gain that is contingent on the evolution of a basket of 30 shares of a worldwide selection of companies that are characterised by a high market capitalisation.

If the Value of the basket of 30 shares of a worldwide selection of companies that are characterised by a high market capitalisation has risen relative to its Starting Value, 75% of this increase in Value (= (End Value minus the Starting Value) divided by the Starting Value) will be taken into account at Maturity with regard to 100% of the initial subscription price. The capital gain will be capped at 50% (yield to maturity of 7.01% before taxes and charges).

Negative performances of the basket are not taken into account.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

### Transparency of adverse sustainability impacts

The sub-fund took into account the principal adverse impacts of its investment decisions on sustainability factors ("PAI") as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on disclosure on sustainability in the financial services sector ("SFDR") through KBC Group's Investment Policy and KBC Group Policy on Blacklisted Companies.

Based on the KBC Group Policy on Blacklisted Companies, all companies on the 'KBC Group Blacklist' (including companies involved in controversial weapons such as those prohibited by Belgian law and white phosphorus weapons) are excluded as well as the worst offenders of the UN Global Compact.

Consequently, the sub-fund took into account exposure to controversial weapons ('indicator 14') by excluding companies dealing with controversial weapon systems, and violations of the principles of the UN Global Compact or the Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises ('indicator 10') by excluding the worst offenders of the UN Global Compact.

## **Maturity**

Thursday 30 September 2027 (payment with a value date of D+1 banking day)

## **Currency**

CZK, for all shares in the basket, changes in the value of the currency in which they are expressed relative to CZK are irrelevant. The investor pays the subscription amount in CZK and will be paid in CZK at Maturity (or earlier). The investor is not protected against any decline in the value of the currency in which the sub-fund is denominated relative to the euro.

## **Starting Value**

Value of the basket based on the weighted average of the Value of the shares included in the basket during the first 10 Valuation Days, starting from Friday 8 October 2021 inclusive.

## **End Value**

Value of the basket based on the weighted average of the Value of the shares included in the basket on the last Valuation Day of the month for the last 18 months before Maturity, more specifically from March 2026 through August 2027 (inclusive).

## **Value**

For all the shares, except for those listed on the Milan stock exchange, the closing price, namely the price of a share in the basket as calculated and notified at closing of the stock exchange by the authority of the stock exchange on which the share is listed (or its legal successor). The reference price is used for shares listed on the Milan stock exchange.

## **Valuation day**

A Valuation Day is set separately for each share in the basket.

A Valuation Day is a day that is a planned trading day both

- i) for the stock exchange on which the share is listed and
- ii) for the stock exchange whose activities have a substantial influence on the trading of options and futures on the share concerned

hereinafter referred to as 'the stock exchanges concerned'.

If on the Valuation Day,

- a) one of the stock exchanges concerned is unexpectedly closed or
- b) there is an event that disrupts the market for a stock exchange concerned or
- c) one of the stock exchanges concerned closes early,

the original Valuation Day is replaced by the following trading day when no event as referred to in a), b) or c) above occurs. An extraordinary closure that has been announced in advance is not considered as early closure.

If a valuation is made on consecutive Valuation Days, the trading day that replaces the original Valuation Day (i) may not coincide with another original Valuation Day and (ii) may not be a trading day that already replaces another original Valuation Day.

However, if an event as referred to under a), b) or c) above occurs on each of the eight trading days following the original Valuation Day,

- (i) the eighth trading day shall be considered as the original Valuation Day and
- (ii) the Bevek shall assess, in good faith and in consultation with the prime counterparty or counterparties with which it has concluded a swap agreement, the price of the share as it would have been traded on that eighth trading day and
- (iii) the Bevek will notify shareholders of any changes regarding setting the Starting Value and/or End Value and conditions of payment.

## Relevant basket

In the table below, the columns from left to right reflect the number of the share, the name of the share, the Bloomberg code, the exchange on which it trades (City-MIC Code) and its initial weighting in the basket.

| (i) | Name                             | Bloomberg Code  | Exchange         | Initial Weighting Coefficients |

## Basket composition methodology

KBC Asset Management used the following methodology to determine the composition of the sub-fund's basket.

### Step 1 :

The starting point is the global equities universe from which a selection of potential investments is derived in accordance with the economic criteria for the composition of the basket and subject to restrictions regarding stock market capitalisation and liquid assets.

The economic criteria for the composition of the basket determine the size of the final selection.

### Step 2 :

The selection of shares obtained in step 1 is reduced to a short list using a quantitative selection based on past financial data. The shares selected are those of companies that achieve a good score in terms of management quality, a healthy balance-sheet structure and a positive trend in profitability.

### Step 3 :

The selection of shares obtained in step 2 is then verified by KBC Asset Management analysts. Shares that are permanently monitored by the analysts and those for which there is a negative recommendation, when the product is launched, are then withdrawn from the selection.

#### Step 4 :

The last reduction of the selection provides the final basket. This selection was made using the technical parameters of options (including the term, volatility, dividend yield and interest rate).

The final basket must satisfy the legal requirements concerning the quantity of shares and adequate distribution in the weighting. In addition, care is taken to ensure compliance with the geographical and/or sector spread. The analysts make a qualitative assessment of each share used taking account of specific knowledge of these shares and the sectors/regions from which they come, in accordance with the term of the sub-fund.

For the sub-fund Optimum Fund ČSOB Globálních firem 7, about 1969 equities were selected during step 1.

The initial selection was reduced by a maximum 20% in step 2.

This was again reduced by 10% (indicative) in step 3. The final basket set up during step 4 is described above under *Relevant basket*. This basket makes it possible to offer the sub-fund Optimum Fund ČSOB Globálních firem 7 under the conditions set out in the investment policy referred to above. Here the selection process uses parameters that could affect the potential return on the investments.

#### *Selection criteria for the basket :*

A share/issuer may only form part of the basket if (i) it is listed on a stock exchange, (ii) it has a high market capitalisation, (iii) the Board of Directors of the Bevek has approved its inclusion in the basket, (iv) the issuer is not included in the KBC Group Policy on Blacklisted Companies\* and (v) at the time the swap contracts are being concluded (see 'Permitted swap transactions'), the issuer of the share complies with the KBC Group Investment Policy\* (the 'Selection criteria').

\* The KBC Group Policy on Blacklisted Companies and the KBC Group Investment Policy can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > General exclusion policies for conventional funds and socially responsible investment funds, Paragraph 1 'KBC Group Policy on Blacklisted Companies' and 2 'KBC Group Investment Policy'.

### **Modifications to the basket due to mergers, acquisitions, demergers, nationalisation, bankruptcy or disqualification :**

#### **Mergers or acquisitions**

If, during the life of the sub-fund, one or more issuers of shares in the basket are involved in a merger or acquisition, the shares of the relevant issuers which still meet the selection criteria and comply with the KBC Group Investment Policy\* after these operations will be given a weighting in the basket equal to the sum of the weightings of the shares of all issuers involved in the operation. If, after the operation, none of the issuers involved in the operation meet the selection criteria or comply with the KBC Group Investment Policy\*, the procedures described under 'Nationalisation, bankruptcy or disqualification' will apply.

\* The KBC Group Investment Policy can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > General exclusion policies for conventional funds and responsible investment funds, Paragraph 2 'KBC Group Investment Policy'.

#### **Demergers**

If an issuer of a share in the basket proceeds to a demerger, then the share from the issuer concerned can be substituted either by one of the shares that came about as a result of the demerger and that meets the selection criteria and complies with the KBC Group Investment Policy\*, or by a basket of shares arising from the demerger which meet the selection criteria and comply with the KBC Group Investment Policy\*. This basket of shares will, when calculating the number of shares in the basket, be considered as one share. If, after the operation, none of the shares resulting from the demerger meet the selection criteria or comply with the KBC Group Investment Policy\*, the procedures described under 'Nationalisation, bankruptcy or disqualification' will apply.

\* The KBC Group Investment Policy can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > General exclusion policies for conventional funds and responsible investment funds, Paragraph 2 'KBC Group Investment Policy'.

#### **Nationalisation, bankruptcy or disqualification**

If an issuer of a share in the basket is nationalised, declared bankrupt or no longer meets the selection criteria ('disqualification'), this share will be sold at the last known price before removal. The amount thus realised will then be invested until Maturity at the rate of interest in force on money or bond markets at the moment of removal, and this for a term equal to the term remaining until Maturity of the sub-fund. The realised amount plus the interest will be taken into account at Maturity as the result achieved for that share in order to calculate the final increase in the value of the basket at Maturity.

#### **Volatility of the net asset value**

The volatility of the net asset value may be high due to the composition of the portfolio.

#### **Securities Financing Transactions (SFTs)**

The sub-fund may not lend any financial instruments.

#### **General strategy for hedging the exchange risk**

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

## Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'

### 2.1.4. Financial portfolio management

The intellectual management, with the exception of the creation of the sub-fund and its maintenance in terms of the technical, product-specific and legal aspects has been delegated by the management company to KBC Fund Management Limited, 4th Floor, Scotch House, 6/7 Burgh Quay, Dublin 2, D02 VK44, Ireland.

### 2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

### 2.1.6. Index and benchmark

Not applicable

### 2.1.7. Policy pursued during the financial year

## 2.1.8. Summary risk indicator

- 2 on a scale of 1 (lowest risk) to 7 (highest risk)
- a moderate level of inflation risk: there is no protection against an increase of the inflation.
  - a high level of market risk: the level of the risk reflects the volatility of the stock market and the exchange rate risk in relation to the euro.
  - a high level of performance risk: the level of the risk reflects the volatility of the stock market and the exchange rate risk in relation to the euro.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

## 2.2. Balance sheet

## 2.4.5. Performance figures

BE6329232795  
Optimum Fund ČSOB Globálních firem 7 CAP  
Annual performance from 01/03/2022 through 28/02/2026 (in CZK)

If the results are expressed in a currency other than the euro, the return may be higher or lower due to exchange rate fluctuations.

| Cap Div | ISIN Code    | Curr<br>ency | 1 year        |            | 3 years       |            | 5 years       |            | 10 years      |            | Since Launch* |               |
|---------|--------------|--------------|---------------|------------|---------------|------------|---------------|------------|---------------|------------|---------------|---------------|
|         |              |              | Share classes | Bench mark | Share classes | Bench mark | Share classes | Bench mark | Share classes | Bench mark | Starting date | Share classes |
| CAP     | BE6329232795 | CZK          | 16.65%        |            | 10.28%        |            |               |            |               |            | 01/10/2021    | 3.50%         |

Risk warning: Past performance is not a guide to future performance.

\* Return on annual basis.

- The bar chart shows the performance for full financial years(period of 12 months prior to the half-yearly closing).
- The figures do not take account of any restructuring..
- Calculated in CZK and in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage.
- Calculation method for date D, where NAV stands for net asset value:  
Capitalisation units (CAP)  
Return on date D over a period of X years :  

$$[NIW(D) / NIW(Y)]^{1/X} - 1$$
 where Y = D-X  
 Return on date D since the start date S of the unit:  

$$[NIW(D) / NIW(S)]^{1/F} - 1$$
 where F = 1 if the unit has existed for less than one year on date D  
 where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D
- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation shares.

## 2.4.6. Costs

### Ongoing Charges:

Management fees and other administrative or operating costs: 1,232%  
Transaction costs: 0,000%

Percentage calculated at reporting date: 28 February 2026 (period of 12 months prior to the half-yearly closing).

A more detailed explanation with respect to the method of calculating ongoing charges and the relevant exclusions can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.5. Ongoing charges'

### Existence of Commission Sharing Agreements

Not applicable

### Fee sharing agreements en rebates

The management company has shared 70.00% of its fee with the distributor, and institutional and/or professional parties.

This percentage has been calculated relative to the fee for managing the investment portfolio of the sub-fund when it was launched.

## 2.4.7. Notes to the financial statements and other data

### Fee for managing the investment portfolio

KBC Asset Management NV receives a fee for managing the sub-fund's investments. This fee consists of a varying amount of max. 0.2 CZK per unit per year (with a maximum of CZK per unit per year for risk management).

This fee, which is calculated every six months, is paid monthly on the last banking day of each month. It can change from one six-month period to the next, within the limits set out below, and is based on the number of units issued at the start of each six-month period.

In the calculation, account is taken of the difference between:

- the return generated by the investments in bonds and other debt instruments, deposits, and/or liquid assets in order to achieve the capital protection on the Maturity date (see *The financial mechanism used to achieve capital protection*), and
- the expenses borne by the sub-fund to achieve a potential return (see *Permitted 'swap' transactions*),
- after deducting the expected fixed and variable expenses of the sub-fund, as mentioned above.

Of this, KBC Fund Management Ltd. receives a fee of no more than 0.19 CZK per unit per year from KBC Asset Management NV for the intellectual management of the sub-fund. KBC Fund Management Ltd. is a wholly owned subsidiary of KBC Asset Management NV.

KBC Asset Management NV has informed the bevek that, if due to the failure of the financial mechanism, the amount that should be paid per unit (after deducting taxes and charges) on the Maturity date, as relevant, is lower than the initial subscription price, KBC Asset Management NV may decide (but is not obliged to) to use the management fee it receives during the current financial year from the sub-fund – and possibly also from other sub-funds of the bevek – to cover this shortfall. This is not a guarantee from KBC Asset Management NV, which may

decide at any time and at its own discretion whether or not to use the management fee for this purpose. KBC Asset Management NV or one of its subsidiaries has also been appointed manager of the SPVs in which the sub-fund may invest (see *Criteria the investments must meet*). KBC Asset Management NV or one of its subsidiaries, as the case may be, receives an annual fee from the relevant SPVs for their management. This management fee may not exceed 0.15% per year and is calculated on the assets managed at the end of the quarter.

The sum of (i) the fee for managing the investment portfolio that the sub-fund pays to the management company and (ii) the management fee that the SPVs in which the sub-fund invests pay to the asset manager, shall never exceed 0.20 CZK per unit per year, as described above.

#### 2.1.2. Stock exchange listing

Not applicable.

#### 2.1.3. Goal and key principles of the investment policy

##### Object of the sub-fund

The object of the sub-fund is twofold (before deducting charges and taxes):

- (1) To repay per share the initial subscription price of 10 CZK at Maturity.(i.e. the capital protection). This capital protection is provided through a financial mechanism that will be explained in more detail under the heading *Capital protection*. However, the capital protection does not apply to shareholders who sell their shares before Maturity.
- (2) To provide a potential return through an investment in swaps. The various types of swaps in which the sub-fund may invest are explained in more detail under the *Potential return*.

##### Capital Protection

###### The financial mechanism used to achieve capital protection

The financial mechanism used to achieve capital protection at Maturity consists of an investment of the total amount of the subscriptions in bonds and other debt instruments, deposits and/or liquid assets (including cash deposited on a time-deposit account or current account). These investments can have different maturities and coupon payment dates. Using the swaps described under the heading *Permitted swap transactions* (2), these investments are matched with the due dates of the obligations of the sub-fund.

###### Criteria the investments must meet

The investments must meet one of the following criteria:

- (1) An investment in deposits and/or debt instruments, placed with or issued by financial institutions under the prudential supervision of and established in a Member State of the European Economic Area.
- (2) An investment in debt instruments issued or guaranteed by a Member State of the European Economic Area.
- (3) An investment under an investment strategy with an analogous structure and identical counterparty risk as a direct investment in deposits and/or debt instruments as stated under (1) and (2) above.

The investments under (3) may consist of:

- (A) An investment in notes listed on a stock exchange that are issued by 'Special Purpose Vehicles' (SPVs).

These SPVs are managed by KBC Asset Management NV or a subsidiary.

The underlying assets of the bonds issued by the SPVs consist of a diversified portfolio of deposits issued by financial institutions, bonds, other debt instruments and financial derivatives. When selecting these underlying assets, account is taken of criteria relating to allocation and creditworthiness (see *Permitted asset classes* and *Characteristics of the bonds and other debt instruments*) in order to limit the counterparty risk.

Further details of the criteria these underlying deposits, bonds, other debt instruments and financial derivatives must meet are provided in the base prospectuses for the SPVs, which can be viewed at or downloaded from [www.kbc.be/prospectus/spv](http://www.kbc.be/prospectus/spv).

Investors are provided with information on the investments made by both the sub-fund and the SPVs in the annual and half-yearly reports on the open-ended investment company under Belgian law (bevek) to which the sub-fund belongs. These reports can also be viewed at or downloaded from [www.kbc.be](http://www.kbc.be).

- (B) An investment in:
- deposits with financial institutions under prudential supervision in the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia and/or
  - debt instruments issued by financial institutions under prudential supervision in the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia and/or
  - debt instruments issued or guaranteed by the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia.

Prudential supervision of financial institutions in the United Kingdom, Switzerland, the United States of America, Japan, Canada and Australia can be equated to prudential supervision of financial institutions in the member states of the European Economic Area.

The investments in debt instruments issued by financial institutions under prudential supervision in the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia or issued or guaranteed by the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia have a minimum credit rating as set out under the heading *Characteristics of the bonds and other debt instruments*.

- (C) The investments may also consist of a combination of the investments specified under (A) and (B).

### **No formal guarantee**

No formal guarantee of repayment of the initial subscription price is provided to the sub-fund or to its shareholders. In other words, the capital protection is not binding for the sub-fund as regards the result generated, although achieving this objective through the operation of the financial mechanism is still the top priority.

If the financial mechanism fails and, as a result, the amount per share payable (before deducting charges and taxes) at Maturity is lower than the initial subscription price, KBC Asset Management NV may decide (but is not obliged) to use the management fee it has received during the current financial year from the sub-fund – and possibly also from other sub-funds of the bevek – to cover the shortfall. This is not a guarantee from KBC Asset Management NV, which may decide at any time and at its own discretion whether or not to use the management fee for this purpose.

The capital protection does not apply to shareholders who sell their shares before Maturity.

### **Potential return**

To achieve a potential return, the sub-fund concludes swaps with one or more prime counterparties. Consequently, the sub-fund transfers a portion of the future income from the investments that were made to achieve capital protection to this counterparty (these counterparties) during the life of the sub-fund. In exchange, the counterparty (counterparties) undertake to provide a potential return as specified under the heading *Selected strategy*.

### **Sub-fund's investment policy**

#### **Permitted asset classes**

Pursuant to the provisions of the Royal Decree of 12 November 2012 on undertakings for collective investment complying with the conditions of Directive 2009/65/EC, the sub-fund may invest in transferable securities (including bonds and other debt instruments), money market instruments, units (shares) in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as and to the extent permitted by the applicable legislation.

The investment limits and restrictions set out in the Royal Decree of 12 November 2012 on undertakings for collective investment complying with the conditions of Directive 2009/65/EC will be respected at all times.

### **Characteristics of the bonds and other debt instruments**

During the sub-fund's life, the average credit rating of the bonds and other debt instruments shall be at least 'A-' from Standard & Poor's or an equivalent rating from Moody's or Fitch, or, if there is no credit rating available, an average credit risk profile that the manager considers to be at least equivalent.

At the start of the investment, the credit rating of the long-term bonds and other debt instruments shall be at least 'A-' from Standard & Poor's or an equivalent rating from Moody's or Fitch, or, if there is no credit rating available, a credit risk profile that the manager considers to be at least equivalent.

At the start of the investment, the credit rating of the short-term bonds and other debt instruments shall be at least 'A-1' from Standard & Poor's or an equivalent rating from Moody's or Fitch, or, if there is no credit rating available, a credit risk profile that the manager considers to be at least equivalent.

When selecting the bonds and other debt instruments, all maturities are taken into consideration.

### Permitted swap transactions

**The swaps described below have been concluded with a prime counterparty or prime counterparties within the limits laid down by law.**

(1) To achieve a potential return, the sub-fund concludes swaps. Under such swap contracts, the sub-fund transfers a portion of the future income from the investments described under the heading 'Permitted asset classes' to the counterparty or counterparties during the life of the sub-fund. In exchange, the counterparty or counterparties undertake to provide a potential return as specified under the heading *Selected strategy*.

**The swaps under (1) are essential to achieve the sub-fund's investment objectives, since this technique facilitates achievement of the goal of generating a potential return.**

**The sub-fund's risk profile is not affected by the use of these swaps.**

(2) If necessary, the sub-fund also concludes swaps to match the due dates of the commitments of the sub-fund with those of the cash flows stemming from the deposits, bonds and other debt instruments described under the heading *Criteria the investments must meet*.

**These swaps are essential to achieve the sub-fund's investment objectives, since there are not enough bonds and other debt instruments available on the market whose coupon payments and maturity dates always perfectly match the due dates of the sub-fund's obligations.**

**The sub-fund's risk profile is not affected by the use of these swaps.**

(3) In addition, the sub-fund may conclude swaps to protect itself against the credit risk in respect of issuers of bonds and other debt instruments. Through this type of swap, one or more counterparties takes over the risk of an issuer of a bond or other debt instrument in the sub-fund's portfolio defaulting, in exchange for a fee payable by the sub-fund.

**The swaps under (3) serve to hedge the credit risk.**

**The sub-fund's risk profile is not affected by the use of these swaps.**

### Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

### Strategie selected

#### Investment objectives and strategy:

The sub-fund has two investment objectives: firstly, it seeks to repay at Maturity 100% of the initial subscription price and secondly a possible capital gain that is contingent on the evolution of a basket of 30 shares of a worldwide selection of companies that are characterised by a high market capitalisation.

At Maturity, a capital gain will be distributed that will equal the best of two alternatives:

- on the one hand 8.00%, settled at 100% of the initial subscription price;
- on the other hand 100% of the increase in the basket of 30 shares, settled at 100% of the initial subscription price, where the maximum capital gain will be 50%. The evolution of the basket is calculated as follows: [end value of the basket minus the starting value of the basket], divided by the starting value of the basket. Decreases in the basket are not taken into account.

Consequently, the capital gain at the Maturity Date will be at least 8.00% (yield to maturity: 1.41% before fees and taxes) and maximum 50% (yield to maturity: 7.68% before costs and taxes).

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

### Transparency of adverse sustainability impacts

The sub-fund took into account the principal adverse impacts of its investment decisions on sustainability factors ("PAI") as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on disclosure on sustainability in the financial services sector ("SFDR") through KBC Group's Investment Policy and KBC Group Policy on Blacklisted Companies.

Based on the KBC Group Policy on Blacklisted Companies, all companies on the 'KBC Group Blacklist' (including companies involved in controversial weapons such as those prohibited by Belgian law and white phosphorus weapons) are excluded as well as the worst offenders of the UN Global Compact.

Consequently, the sub-fund took into account exposure to controversial weapons ('indicator 14') by excluding companies dealing with controversial weapon systems, and violations of the principles of the UN Global Compact or the Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises ('indicator 10') by excluding the worst offenders of the UN Global Compact.

## **Maturity**

Friday 28 February 2031 (payment with a value date of D+1 banking day)

## **Currency**

CZK, for all shares in the basket, changes in the value of the currency in which they are expressed relative to CZK are irrelevant. The investor pays the subscription amount in CZK and will be paid in CZK at Maturity (or earlier). The investor is not protected against any decline in the value of the currency in which the sub-fund is denominated relative to the euro.

## **Starting Value**

Value of the basket based on the weighted average of the Value of the shares included in the basket during the first 10 Valuation Days, starting from Monday 8 September 2025 inclusive.

## **End Value**

Value of the basket based on the weighted average of the Value of the shares included in the basket on the last Valuation Day of the month for the last 18 months before Maturity, more specifically from August 2029 through January 2031 (inclusive).

## **Value**

For all the shares, except for those listed on the Milan stock exchange, the closing price, namely the price of a share in the basket as calculated and notified at closing of the stock exchange by the authority of the stock exchange on which the share is listed (or its legal successor). The reference price is used for shares listed on the Milan stock exchange.

## **Valuation day**

A Valuation Day is set separately for each share in the basket.

A Valuation Day is a day that is a planned trading day both

- i) for the stock exchange on which the share is listed and
- ii) for the stock exchange whose activities have a substantial influence on the trading of options and futures on the share concerned

hereinafter referred to as 'the stock exchanges concerned'.

If on the Valuation Day,

- a) one of the stock exchanges concerned is unexpectedly closed or
- b) there is an event that disrupts the market for a stock exchange concerned or
- c) one of the stock exchanges concerned closes early,

the original Valuation Day is replaced by the following trading day when no event as referred to in a), b) or c) above occurs. An extraordinary closure that has been announced in advance is not considered as early closure.

If a valuation is made on consecutive Valuation Days, the trading day that replaces the original Valuation Day (i) may not coincide with another original Valuation Day and (ii) may not be a trading day that already replaces another original Valuation Day.

However, if an event as referred to under a), b) or c) above occurs on each of the eight trading days following the original Valuation Day,

- (i) the eighth trading day shall be considered as the original Valuation Day and
- (ii) the Bevek shall assess, in good faith and in consultation with the prime counterparty or counterparties with which it has concluded a swap agreement, the price of the share as it would have been traded on that eighth trading day and
- (iii) the Bevek will notify shareholders of any changes regarding setting the Starting Value and/or End Value and conditions of payment.

### Relevant basket

In the table below, the columns from left to right reflect the number of the share, the name of the share, the Bloomberg code, the exchange on which it trades (City-MIC Code) and its initial weighting in the basket.

| (i) | Name                              | Bloomberg Code   | Exchange          | Initial Weighting Coefficients |
|-----|-----------------------------------|------------------|-------------------|--------------------------------|
| 1   | ADMIRAL GROUP PLC                 | ADM LN Equity    | LONDON - XLON     | 2.0000%                        |
| 2   | AVIVA PLC                         | AV/ LN Equity    | LONDON - XLON     | 2.0000%                        |
| 3   | DAITO TRUST CONSTRUCT CO LTD      | 1878 JT Equity   | TOKYO - XTKS      | 7.0000%                        |
| 4   | DANSKE BANK A/S                   | DANSKE DC Equity | COPENHAGEN - XCSE | 3.0000%                        |
| 5   | DNB ASA                           | DNB NO Equity    | OSLO - XOSL       | 2.0000%                        |

### Basket composition methodology

KBC Asset Management used the following methodology to determine the composition of the sub-fund's basket.

#### Step 1 :

The starting point is the global equities universe from which a selection of potential investments is derived in accordance with the economic criteria for the composition of the basket and subject to restrictions regarding stock market capitalisation and liquid assets.

The economic criteria for the composition of the basket determine the size of the final selection.

#### Step 2 :

The selection of shares obtained in step 1 is reduced to a short list using a quantitative selection based on past financial data. The shares selected are those of companies that achieve a good score in terms of management quality, a healthy balance-sheet structure and a positive trend in profitability.

#### Step 3 :

The selection of shares obtained in step 2 is then verified by KBC Asset Management analysts. Shares that are permanently monitored by the analysts and those for which there is a negative recommendation, when the product is launched, are then withdrawn from the selection.

#### Step 4 :

The last reduction of the selection provides the final basket. This selection was made using the technical parameters of options (including the term, volatility, dividend yield and interest rate).

The final basket must satisfy the legal requirements concerning the quantity of shares and adequate distribution in the weighting. In addition, care is taken to ensure compliance with the geographical and/or sector spread. The analysts make a qualitative assessment of each share used taking account of specific knowledge of these shares and the sectors/regions from which they come, in accordance with the term of the sub-fund.

For the sub-fund Optimum Fund ČSOB Globálních firem 8, about 1695 equities were selected during step 1.

The initial selection was reduced by a maximum 20% in step 2.

This was again reduced by 10% (indicative) in step 3. The final basket set up during step 4 is described above under *Relevant basket*. This basket makes it possible to offer the sub-fund Optimum Fund ČSOB Globálních firem 8 under the conditions set out in the investment policy referred to above. Here the selection process uses parameters that could affect the potential return on the investments.

#### *Selection criteria for the basket :*

A share/issuer may only form part of the basket if (i) it is listed on a stock exchange, (ii) it has a high market capitalisation, (iii) the Board of Directors of the Bevek has approved its inclusion in the basket, (iv) the issuer is not included in the KBC Group Policy on Blacklisted Companies\* and (v) at the time the swap contracts are being concluded (see 'Permitted swap transactions'), the issuer of the share complies with the KBC Group Investment Policy\* (the 'Selection criteria').

\* The KBC Group Policy on Blacklisted Companies and the KBC Group Investment Policy can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > General exclusion policies for conventional funds and socially responsible investment funds, Paragraph 1 'KBC Group Policy on Blacklisted Companies' and 2 'KBC Group Investment Policy'.

### **Modifications to the basket due to mergers, acquisitions, demergers, nationalisation, bankruptcy or disqualification :**

#### **Mergers or acquisitions**

If, during the life of the sub-fund, one or more issuers of shares in the basket are involved in a merger or acquisition, the shares of the relevant issuers which still meet the selection criteria and comply with the KBC Group Investment Policy\* after these operations will be given a weighting in the basket equal to the sum of the weightings of the shares of all issuers involved in the operation. If, after the operation, none of the issuers involved in the operation meet the selection criteria or comply with the KBC Group Investment Policy\*, the procedures described under 'Nationalisation, bankruptcy or disqualification' will apply.

\* The KBC Group Investment Policy can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > General exclusion policies for conventional funds and responsible investment funds, Paragraph 2 'KBC Group Investment Policy'.

#### **Demergers**

If an issuer of a share in the basket proceeds to a demerger, then the share from the issuer concerned can be substituted either by one of the shares that came about as a result of the demerger and that meets the selection criteria and complies with the KBC Group Investment Policy\*, or by a basket of shares arising from the demerger which meet the selection criteria and comply with the KBC Group Investment Policy\*. This basket of shares will, when calculating the number of shares in the basket, be considered as one share. If, after the operation, none of the shares resulting from the demerger meet the selection criteria or comply with the KBC Group Investment Policy\*, the procedures described under 'Nationalisation, bankruptcy or disqualification' will apply.

\* The KBC Group Investment Policy can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > General exclusion policies for conventional funds and responsible investment funds, Paragraph 2 'KBC Group Investment Policy'.

#### **Nationalisation, bankruptcy or disqualification**

If an issuer of a share in the basket is nationalised, declared bankrupt or no longer meets the selection criteria ('disqualification'), this share will be sold at the last known price before removal. The amount thus realised will then be invested until Maturity at the rate of interest in force on money or bond markets at the moment of removal, and this for a term equal to the term remaining until Maturity of the sub-fund. The realised amount plus the interest will be taken into account at Maturity as the result achieved for that share in order to calculate the final increase in the value of the basket at Maturity.

#### **Volatility of the net asset value**

The volatility of the net asset value may be high due to the composition of the portfolio.

#### **Securities Financing Transactions (SFTs)**

The sub-fund may not lend any financial instruments.

#### **General strategy for hedging the exchange risk**

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

## Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'

### 2.1.4. Financial portfolio management

The intellectual management, with the exception of the creation of the sub-fund and its maintenance in terms of the technical, product-specific and legal aspects has been delegated by the management company to KBC Fund Management Limited, 4th Floor, Scotch House, 6/7 Burgh Quay, Dublin 2, D02 VK44, Ireland.

### 2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

### 2.1.6. Index and benchmark

Not applicable

### 2.1.7. Policy pursued during the financial year

### **2.1.8. Summary risk indicator**

- 2 on a scale of 1 (lowest risk) to 7 (highest risk)
- a moderate level of inflation risk: there is no protection against an increase of the inflation.
  - a high level of market risk: the level of the risk reflects the volatility of the stock market and the exchange rate risk in relation to the euro.
  - a high level of performance risk: the level of the risk reflects the volatility of the stock market and the exchange rate risk in relation to the euro.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

## 2.2. Balance sheet

## 2.4.5. Performance figures

BE6363816347

Optimum Fund ČSOB Globálních firem 8 CAP

Annual performance from through 28/02/2026 (in CZK)

The cumulative returns are shown where they relate to a period of at least one year.

If the results are expressed in a currency other than the euro, the return may be higher or lower due to exchange rate fluctuations.

## 2.4.6. Costs

### Ongoing Charges:

Not applicable

### Existence of Commission Sharing Agreements

Not applicable

### Fee sharing agreements en rebates

The management company has shared 70.00% of its fee with the distributor, and institutional and/or professional parties.

This percentage has been calculated relative to the fee for managing the investment portfolio of the sub-fund when it was launched.

## 2.4.7. Notes to the financial statements and other data

### Fee for managing the investment portfolio

KBC Asset Management NV receives a fee for managing the sub-fund's investments. This fee consists of a varying amount of max. 0.2 CZK per unit per year (with a maximum of CZK per unit per year for risk management).

This fee, which is calculated every six months, is paid monthly on the last banking day of each month. It can change from one six-month period to the next, within the limits set out below, and is based on the number of units issued at the start of each six-month period.

In the calculation, account is taken of the difference between:

- the return generated by the investments in bonds and other debt instruments, deposits, and/or liquid assets in order to achieve the capital protection on the Maturity date (see *The financial mechanism used to achieve capital protection*), and
- the expenses borne by the sub-fund to achieve a potential return (see *Permitted 'swap' transactions*),
- after deducting the expected fixed and variable expenses of the sub-fund, as mentioned above.

Of this, KBC Fund Management Ltd. receives a fee of no more than 0.19 CZK per unit per year from KBC Asset Management NV for the intellectual management of the sub-fund. KBC Fund Management Ltd. is a wholly owned subsidiary of KBC Asset Management NV.

KBC Asset Management NV has informed the bevek that, if due to the failure of the financial mechanism, the amount that should be paid per unit (after deducting taxes and charges) on the Maturity date, as relevant, is lower than the initial subscription price, KBC Asset Management NV may decide (but is not obliged to) to use the management fee it receives during the current financial year from the sub-fund – and possibly also from other sub-funds of the bevek – to cover this shortfall. This is not a guarantee from KBC Asset Management NV, which may decide at any time and at its own discretion whether or not to use the management fee for this purpose.

KBC Asset Management NV or one of its subsidiaries has also been appointed manager of the SPVs in which the sub-fund may invest (see *Criteria the investments must meet*). KBC Asset Management NV or one of its subsidiaries, as the case may be, receives an annual fee from the relevant SPVs for their management. This management fee may not exceed 0.15% per year and is calculated on the assets managed at the end of the quarter.

The sum of (i) the fee for managing the investment portfolio that the sub-fund pays to the management company and (ii) the management fee that the SPVs in which the sub-fund invests pay to the asset manager, shall never exceed 0.20 CZK per unit per year, as described above.

## 2. Information on Optimum Fund ČSOB Kratkodobych dluhopisu

### 2.1. Management report

#### 2.1.1. Launch date and subscription price

##### **Classic Shares Capitalisation**

Launch date: 29 May 2009

Initial subscription price: 100 CZK

Currency: CZK

##### **Institutional B Shares Capitalisation**

Launch date: 30 September 2015

Initial subscription price: 1 000 CZK

Currency: CZK

#### 2.1.2. Stock exchange listing

Not applicable.

#### 2.1.3. Goal and key principles of the investment policy

##### **Object of the sub-fund**

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in bonds and debt instruments.

##### **Sub-fund's investment policy**

###### ***Permitted asset classes***

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

###### ***Restrictions of the investment policy***

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

## Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. **Consequently, there may be an impact on concentration risk.** Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

## Strategy selected

The assets are invested in bonds and debt instruments denominated in Czech koruna and other currencies.

Investments are made in assets denominated in other currencies where there is a lack of suitable instruments in Czech koruna, i.e. when including investments denominated in Czech koruna could hinder proper execution of the sub-fund's investment strategy. Investments denominated in other currencies are hedged against foreign exchange risk. The assets are invested primarily in financial instruments with a duration of no more than two years.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

## Transparency of adverse sustainability impacts

The sub-fund took into account the principal adverse impacts of its investment decisions on sustainability factors ("PAI"), as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on Sustainability Disclosures in the Financial Services Sector ("SFDR") through the General exclusion Policy and implicitly through the Proxy Voting and Engagement Policy.

The principal adverse impacts on sustainability taken into account through the General exclusion policy were exposure to controversial weapons ('indicator 14'), exposure to companies active in the fossil fuel sector ('indicator 4') and Violations of the principles of the UN Global Compact or the Organization for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises ('indicator 10').

The principal adverse impacts on sustainability implicitly taken into account through KBC Asset Management Group's the Proxy Voting and Engagement Policy were greenhouse gas emissions ('indicator 1'), carbon footprint ('indicator 2'), greenhouse gas intensity of investee companies ('indicator 3'), exposure to fossil fuel companies ('indicator 4') and gender diversity on the board of directors ('indicator 13').

## Benchmark information

The fund is actively managed with reference to the following benchmark: 25% JP Morgan GBI Czech Republic 1-3Y CZK - Total Return Index, 75% JP Morgan Euro Cash 3M CZK Hedged - Total Return Index.

This benchmark is a return index and as such will be used as the reference for the return of the sub-fund's portfolio. In this case, active management refers to the fact that the manager strives to outperform the benchmark.

The benchmark is also used to determine the fund's risk limitation mechanism. This limits the extent to which the fund's return may deviate from the benchmark.

Required disclaimers for benchmark providers:

Information has been obtained from sources believed to be reliable but J.P. Morgan does not warrant its completeness or accuracy. The Index is used with permission. ### **Characteristics of the bonds and debt instruments**

The sub-fund invests in bonds and debt instruments issued by both companies and public authorities.

The sub-fund invests directly and/or indirectly at least 50% of its assets in bonds and debt instruments

- in bonds and debt instruments rated investment grade (at least BBB-/Baa3 for long-term debt, A3/F3/P3 for short-term debt) by at least one of the following rating agencies: Moody's Investors Service, Standard & Poor's or Fitch Ratings, and/or

- in bonds and debt instruments which do not have a credit rating by the rating agencies mentioned above but where the issuer or guarantor has an investment grade rating by at least one of the rating agencies mentioned above.

This means that the sub-fund may invest up to 50% of its assets invested in bonds and debt instruments that do not have a credit rating from the above-mentioned rating agencies and/or which do not comply with the above-mentioned credit requirements.

All maturities are taken into consideration in the selection of bonds and debt instruments.

### **Securities Financing Transactions (SFTs)**

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.1. Securities Financing Transactions (SFTs)'.

### **General strategy for hedging the exchange risk**

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

### **Social, ethical and environmental aspects**

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'.

## **2.1.4. Financial portfolio management**

The intellectual management, with the exception of the creation of the sub-fund and its maintenance in terms of the technical, product-specific and legal aspects has been delegated by the management company to CSOB Asset Management a.s. investiční společnost, Radlicka 333/150, 150 57, Praha 5, Czech Republic.

## **2.1.5. Distributors**

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

## **2.1.6. Index and benchmark**

See 'Sub-fund's investment policy'.

## **2.1.7. Policy pursued during the financial year**

In line with the defined strategy, the fund was and is invested in CZ bonds, CZK term deposits and EUR bonds hedged to CZK.

*There is limited exposure to Russian and/or Ukrainian positions. The main risk related to the Russian-Ukrainian conflict is market and performance risks, as we observe increased volatility in global financial markets. Obviously, countries, sectors and companies more closely linked to the conflict are more heavily impacted than others. The SICAV held positions in International Investment Bank ("IIB"), which have been revalued to CZK 0.01 due to the entity becoming subject to financial sanctions. As a consequence of these sanctions, IIB is unable to make payments under standard payment arrangements and therefore has been deprived of the possibility to fulfil obligations to bondholders, creditors and clients.*

## 2.1.8. Future policy

In line with the defined strategy, the fund was and is invested in CZ bonds, CZK term deposits and EUR bonds hedged to CZK.

## 2.1.9. Summary risk indicator (SRI)

Classic Shares: 2 on a scale of 1 (lowest risk) to 7 (highest risk)

- a moderate level of inflation risk: there is no protection against an increase of the inflation.
- a high level of concentration risk: there is a concentration of investments in bonds denominated in Czech koruna.
- a moderate level of market risk: the level of the risk reflects the interest rate sensitivity of the bonds in the portfolio and the exchange rate risk in relation to the euro.
- a moderate level of performance risk: the level of the risk reflects the interest rate sensitivity of the bonds in the portfolio and the exchange rate risk in relation to the euro.

There is no capital protection.

Institutional B Shares: 2 on a scale of 1 (lowest risk) to 7 (highest risk)

- a moderate level of inflation risk: there is no protection against an increase of the inflation.
- a high level of concentration risk: there is a concentration of investments in bonds denominated in Czech koruna.
- a moderate level of market risk: the level of the risk reflects the interest rate sensitivity of the bonds in the portfolio and the exchange rate risk in relation to the euro.
- a moderate level of performance risk: the level of the risk reflects the interest rate sensitivity of the bonds in the portfolio and the exchange rate risk in relation to the euro.

There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

### **2.4.2. Changes in the composition of the assets of Optimum Fund ČSOB Krátkodobých dluhopisu (in Czech koruna)**

|                                        | <b>1<sup>st</sup> half of year</b> |
|----------------------------------------|------------------------------------|
| <b>Purchases</b>                       | 2,734,441,860.55                   |
| <b>Sales</b>                           | 1,740,574,424.97                   |
| <b>Total 1</b>                         | 4,475,016,285.52                   |
| <b>Subscriptions</b>                   | 1,254,810,037.69                   |
| <b>Redemptions</b>                     | 38,388,442.48                      |
| <b>Total 2</b>                         | 1,293,198,480.17                   |
| <b>Monthly average of total assets</b> | 921,347,944.44                     |
| <b>Turnover rate</b>                   | 345.34%                            |

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period. A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions. A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio. Active asset management may result in high turnover rates (monthly percentage >50%).

The detailed list of transactions can be consulted free of charge at the company designated as financial service:  
KBC Bank NV, Havenlaan 2, B-1080 Brussels

### **2.4.3. Amount of commitments in respect of financial derivatives positions**

## 2.4.5. Performance figures

### Classic Shares

BE0948725651

Optimum Fund ČSOB Kratkodobyh dluhopisu Classic Shares CAP

Annual performance compared to the benchmark from 01/03/2016 through 28/02/2026 (in CZK)

If the results are expressed in a currency other than the euro, the return may be higher or lower due to exchange rate fluctuations.

| Cap Div | ISIN Code    | Curr<br>ency | 1 year           |               | 3 years          |               | 5 years          |               | 10 years         |               | Since Launch*    |                  |

\* Return on annual basis.

## Classic Shares

- The bar chart shows the performance for full financial years (period of 12 months prior to the half-yearly closing).
- The figures do not take account of any restructuring..
- Calculated in CZK and in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage. In the case of units that pay dividends, the dividend is incorporated geometrically in the return.
- Calculation method for date D, where NAV stands for net asset value:

### Capitalisation units (CAP)

Return on date D over a period of X years :

$$[\text{NIW}(D) / \text{NIW}(Y)]^{1/X} - 1$$

where  $Y = D - X$

Return on date D since the start date S of the unit:

$$[\text{NIW}(D) / \text{NIW}(S)]^{1/F} - 1$$

where  $F = 1$  if the unit has existed for less than one year on date D

where  $F = (D - S) / 365.25$  if the unit has existed for longer than one year on date D

### Distribution units (DIV)

Return on date D over a period of X years :

$$[C * \text{NIW}(D) / \text{NIW}(Y)]^{1/X} - 1$$

where  $Y = D - X$

Return on date D since the start date S of the unit:

$$[C * \text{NIW}(D) / \text{NIW}(S)]^{1/F} - 1$$

where  $F = 1$  if the unit has existed for less than one year on date D

where  $F = (D - S) / 365.25$  if the unit has existed for longer than one year on date D

where C is a factor that is determined for all N dividends between the calculation date D and the reference date.

For dividend i on date Di with value Wi:

$$C_i = [W_i / \text{NIW}(D_i)] + 1$$

$i = 1 \dots N$

from which  $C = C_0 * \dots * C_N$ .

- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation and distribution shares

## Institutional B Shares

BE6280425636

### Ongoing Charges:

Management fees and other administrative or operating costs: 0,666%  
Transaction costs: 0,131%

Management fees and other administrative or operating costs: 0,523%  
Transaction costs: 0,116%

A more detailed explanation with respect to the method of calculating ongoing charges and the relevant exclusions can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.5. Ongoing charges'

Not applicable

The management company has shared 69,87% of its fee with the distributor, and institutional and/or professional parties.

If the management company invests the assets of the undertaking for collective investment in units of undertakings for collective investment that are not managed by an entity of KBC Groep NV, and receives a fee for doing so, it will pay this fee to the undertaking for collective investment.

Fee-sharing does not affect the amount of the management fee paid by a **sub-fund** to the management company. This management fee is subject to the limitations laid down in **the articles of association**. The limitations may only be amended after approval by the General Meeting.

### **Anti-dilution levy**

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

### **Exercising voting rights**

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

#### 2.1.2. Stock exchange listing

Not applicable.

#### 2.1.3. Goal and key principles of the investment policy

##### Object of the sub-fund

The object of the sub-fund is twofold (before deducting charges and taxes):

- (1) To repay per share the initial subscription price of 10 CZK at Maturity.(i.e. the capital protection). This capital protection is provided through a financial mechanism that will be explained in more detail under the heading *Capital protection*. However, the capital protection does not apply to shareholders who sell their shares before Maturity.
- (2) To provide a potential return through an investment in swaps. The various types of swaps in which the sub-fund may invest are explained in more detail under the *Potential return*.

##### Capital Protection

###### The financial mechanism used to achieve capital protection

The financial mechanism used to achieve capital protection at Maturity consists of an investment of the total amount of the subscriptions in bonds and other debt instruments, deposits and/or liquid assets (including cash deposited on a time-deposit account or current account). These investments can have different maturities and coupon payment dates. Using the swaps described under the heading *Permitted swap transactions* (2), these investments are matched with the due dates of the obligations of the sub-fund.

###### Criteria the investments must meet

The investments must meet one of the following criteria:

- (1) An investment in deposits and/or debt instruments, placed with or issued by financial institutions under the prudential supervision of and established in a Member State of the European Economic Area.
- (2) An investment in debt instruments issued or guaranteed by a Member State of the European Economic Area.
- (3) An investment under an investment strategy with an analogous structure and identical counterparty risk as a direct investment in deposits and/or debt instruments as stated under (1) and (2) above.

The investments under (3) may consist of:

- (A) An investment in notes listed on a stock exchange that are issued by 'Special Purpose Vehicles' (SPVs).

These SPVs are managed by KBC Asset Management NV or a subsidiary.

The underlying assets of the bonds issued by the SPVs consist of a diversified portfolio of deposits issued by financial institutions, bonds, other debt instruments and financial derivatives. When selecting these underlying assets, account is taken of criteria relating to allocation and creditworthiness (see *Permitted asset classes* and *Characteristics of the bonds and other debt instruments*) in order to limit the counterparty risk.

Further details of the criteria these underlying deposits, bonds, other debt instruments and financial derivatives must meet are provided in the base prospectuses for the SPVs, which can be viewed at or downloaded from [www.kbc.be/prospectus/spv](http://www.kbc.be/prospectus/spv).

Investors are provided with information on the investments made by both the sub-fund and the SPVs in the annual and half-yearly reports on the open-ended investment company under Belgian law (bevek) to which the sub-fund belongs. These reports can also be viewed at or downloaded from [www.kbc.be](http://www.kbc.be).

- (B) An investment in:
- deposits with financial institutions under prudential supervision in the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia and/or
  - debt instruments issued by financial institutions under prudential supervision in the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia and/or
  - debt instruments issued or guaranteed by the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia.

Prudential supervision of financial institutions in the United Kingdom, Switzerland, the United States of America, Japan, Canada and Australia can be equated to prudential supervision of financial institutions in the member states of the European Economic Area.

The investments in debt instruments issued by financial institutions under prudential supervision in the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia or issued or guaranteed by the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia have a minimum credit rating as set out under the heading *Characteristics of the bonds and other debt instruments*.

- (C) The investments may also consist of a combination of the investments specified under (A) and (B).

### **No formal guarantee**

No formal guarantee of repayment of the initial subscription price is provided to the sub-fund or to its shareholders. In other words, the capital protection is not binding for the sub-fund as regards the result generated, although achieving this objective through the operation of the financial mechanism is still the top priority.

If the financial mechanism fails and, as a result, the amount per share payable (before deducting charges and taxes) at Maturity is lower than the initial subscription price, KBC Asset Management NV may decide (but is not obliged) to use the management fee it has received during the current financial year from the sub-fund – and possibly also from other sub-funds of the bevek – to cover the shortfall. This is not a guarantee from KBC Asset Management NV, which may decide at any time and at its own discretion whether or not to use the management fee for this purpose.

The capital protection does not apply to shareholders who sell their shares before Maturity.

### **Potential return**

To achieve a potential return, the sub-fund concludes swaps with one or more prime counterparties. Consequently, the sub-fund transfers a portion of the future income from the investments that were made to achieve capital protection to this counterparty (these counterparties) during the life of the sub-fund. In exchange, the counterparty (counterparties) undertake to provide a potential return as specified under the heading *Selected strategy*.

### **Sub-fund's investment policy**

#### **Permitted asset classes**

Pursuant to the provisions of the Royal Decree of 12 November 2012 on undertakings for collective investment complying with the conditions of Directive 2009/65/EC, the sub-fund may invest in transferable securities (including bonds and other debt instruments), money market instruments, units (shares) in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as and to the extent permitted by the applicable legislation.

The investment limits and restrictions set out in the Royal Decree of 12 November 2012 on undertakings for collective investment complying with the conditions of Directive 2009/65/EC will be respected at all times.

### **Characteristics of the bonds and other debt instruments**

During the sub-fund's life, the average credit rating of the bonds and other debt instruments shall be at least 'A-' from Standard & Poor's or an equivalent rating from Moody's or Fitch, or, if there is no credit rating available, an average credit risk profile that the manager considers to be at least equivalent.

At the start of the investment, the credit rating of the long-term bonds and other debt instruments shall be at least 'A-' from Standard & Poor's or an equivalent rating from Moody's or Fitch, or, if there is no credit rating available, a credit risk profile that the manager considers to be at least equivalent.

At the start of the investment, the credit rating of the short-term bonds and other debt instruments shall be at least 'A-1' from Standard & Poor's or an equivalent rating from Moody's or Fitch, or, if there is no credit rating available, a credit risk profile that the manager considers to be at least equivalent.

When selecting the bonds and other debt instruments, all maturities are taken into consideration.

### Permitted swap transactions

**The swaps described below have been concluded with a prime counterparty or prime counterparties within the limits laid down by law.**

(1) To achieve a potential return, the sub-fund concludes swaps. Under such swap contracts, the sub-fund transfers a portion of the future income from the investments described under the heading 'Permitted asset classes' to the counterparty or counterparties during the life of the sub-fund. In exchange, the counterparty or counterparties undertake to provide a potential return as specified under the heading *Selected strategy*.

**The swaps under (1) are essential to achieve the sub-fund's investment objectives, since this technique facilitates achievement of the goal of generating a potential return.**

**The sub-fund's risk profile is not affected by the use of these swaps.**

(2) If necessary, the sub-fund also concludes swaps to match the due dates of the commitments of the sub-fund with those of the cash flows stemming from the deposits, bonds and other debt instruments described under the heading *Criteria the investments must meet*.

**These swaps are essential to achieve the sub-fund's investment objectives, since there are not enough bonds and other debt instruments available on the market whose coupon payments and maturity dates always perfectly match the due dates of the sub-fund's obligations.**

**The sub-fund's risk profile is not affected by the use of these swaps.**

(3) In addition, the sub-fund may conclude swaps to protect itself against the credit risk in respect of issuers of bonds and other debt instruments. Through this type of swap, one or more counterparties takes over the risk of an issuer of a bond or other debt instrument in the sub-fund's portfolio defaulting, in exchange for a fee payable by the sub-fund.

**The swaps under (3) serve to hedge the credit risk.**

**The sub-fund's risk profile is not affected by the use of these swaps.**

### Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

### Strategie selected

#### Investment objectives and strategy:

The sub-fund has two investment objectives: firstly, it seeks to repay at Maturity 100% of the initial subscription price and secondly a possible capital gain that is contingent on the evolution of a basket of 30 shares of a worldwide selection of companies that are characterised by a high market capitalisation.

If the Value of the basket of 30 shares of a worldwide selection of companies that are characterised by a high market capitalisation has risen relative to its Starting Value, 100% of this increase in Value (= (End Value minus the Starting Value) divided by the Starting Value) will be taken into account at Maturity with regard to 100% of the initial subscription price. The capital gain will be capped at 32% (yield to maturity of 8.30% before taxes and charges).

Negative performances of the basket are not taken into account.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

### Transparency of adverse sustainability impacts

The sub-fund took into account the principal adverse impacts of its investment decisions on sustainability factors ("PAI") as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on disclosure on sustainability in the financial services sector ("SFDR") through KBC Group's Investment Policy and KBC Group Policy on Blacklisted Companies.

Based on the KBC Group Policy on Blacklisted Companies, all companies on the 'KBC Group Blacklist' (including companies involved in controversial weapons such as those prohibited by Belgian law and white phosphorus weapons) are excluded as well as the worst offenders of the UN Global Compact.

Consequently, the sub-fund took into account exposure to controversial weapons ('indicator 14') by excluding companies dealing with controversial weapon systems, and violations of the principles of the UN Global Compact or the Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises ('indicator 10') by excluding the worst offenders of the UN Global Compact.

## **Maturity**

Tuesday 31 August 2027 (payment with a value date of D+1 banking day)

## **Currency**

CZK, for all shares in the basket, changes in the value of the currency in which they are expressed relative to CZK are irrelevant. The investor pays the subscription amount in CZK and will be paid in CZK at Maturity (or earlier). The investor is not protected against any decline in the value of the currency in which the sub-fund is denominated relative to the euro.

## **Starting Value**

Value of the basket based on the weighted average of the Value of the shares included in the basket during the first 10 Valuation Days, starting from Friday 8 March 2024 inclusive.

## **End Value**

Value of the basket based on the weighted average of the Value of the shares included in the basket on the last Valuation Day of the month for the last 6 months before Maturity, more specifically from February 2027 through July 2027 (inclusive).

## **Value**

For all the shares, except for those listed on the Milan stock exchange, the closing price, namely the price of a share in the basket as calculated and notified at closing of the stock exchange by the authority of the stock exchange on which the share is listed (or its legal successor). The reference price is used for shares listed on the Milan stock exchange.

## **Valuation day**

A Valuation Day is set separately for each share in the basket.

A Valuation Day is a day that is a planned trading day both

- i) for the stock exchange on which the share is listed and
- ii) for the stock exchange whose activities have a substantial influence on the trading of options and futures on the share concerned

hereinafter referred to as 'the stock exchanges concerned'.

If on the Valuation Day,

- a) one of the stock exchanges concerned is unexpectedly closed or
- b) there is an event that disrupts the market for a stock exchange concerned or
- c) one of the stock exchanges concerned closes early,

the original Valuation Day is replaced by the following trading day when no event as referred to in a), b) or c) above occurs. An extraordinary closure that has been announced in advance is not considered as early closure.

If a valuation is made on consecutive Valuation Days, the trading day that replaces the original Valuation Day (i) may not coincide with another original Valuation Day and (ii) may not be a trading day that already replaces another original Valuation Day.

However, if an event as referred to under a), b) or c) above occurs on each of the eight trading days following the original Valuation Day,

- (i) the eighth trading day shall be considered as the original Valuation Day and
- (ii) the Bevek shall assess, in good faith and in consultation with the prime counterparty or counterparties with which it has concluded a swap agreement, the price of the share as it would have been traded on that eighth trading day and
- (iii) the Bevek will notify shareholders of any changes regarding setting the Starting Value and/or End Value and conditions of payment.

### Relevant basket

In the table below, the columns from left to right reflect the number of the share, the name of the share, the Bloomberg code, the exchange on which it trades (City-MIC Code) and its initial weighting in the basket.

| (i) | Name                             | Bloomberg Code  | Exchange         | Initial Weighting Coefficients |
|-----|----------------------------------|-----------------|------------------|--------------------------------|

### Basket composition methodology

KBC Asset Management used the following methodology to determine the composition of the sub-fund's basket.

#### Step 1 :

The starting point is the global equities universe from which a selection of potential investments is derived in accordance with the economic criteria for the composition of the basket and subject to restrictions regarding stock market capitalisation and liquid assets.

The economic criteria for the composition of the basket determine the size of the final selection.

#### Step 2 :

The selection of shares obtained in step 1 is reduced to a short list using a quantitative selection based on past financial data. The shares selected are those of companies that achieve a good score in terms of management quality, a healthy balance-sheet structure and a positive trend in profitability.

#### Step 3 :

The selection of shares obtained in step 2 is then verified by KBC Asset Management analysts. Shares that are permanently monitored by the analysts and those for which there is a negative recommendation, when the product is launched, are then withdrawn from the selection.

#### Step 4 :

The last reduction of the selection provides the final basket. This selection was made using the technical parameters of options (including the term, volatility, dividend yield and interest rate).

The final basket must satisfy the legal requirements concerning the quantity of shares and adequate distribution in the weighting. In addition, care is taken to ensure compliance with the geographical and/or sector spread. The analysts make a qualitative assessment of each share used taking account of specific knowledge of these shares and the sectors/regions from which they come, in accordance with the term of the sub-fund.

For the sub-fund Optimum Fund ČSOB Krátkodobý 1, about 1586 equities were selected during step 1.

The initial selection was reduced by a maximum 20% in step 2.

This was again reduced by 10% (indicative) in step 3. The final basket set up during step 4 is described above under *Relevant basket*. This basket makes it possible to offer the sub-fund Optimum Fund ČSOB Krátkodobý 1 under the conditions set out in the investment policy referred to above. Here the selection process uses parameters that could affect the potential return on the investments.

#### *Selection criteria for the basket :*

A share/issuer may only form part of the basket if (i) it is listed on a stock exchange, (ii) it has a high market capitalisation, (iii) the Board of Directors of the Bevek has approved its inclusion in the basket, (iv) the issuer is not included in the KBC Group Policy on Blacklisted Companies\* and (v) at the time the swap contracts are being concluded (see 'Permitted swap transactions'), the issuer of the share complies with the KBC Group Investment Policy\* (the 'Selection criteria').

\* The KBC Group Policy on Blacklisted Companies and the KBC Group Investment Policy can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > General exclusion policies for conventional funds and socially responsible investment funds, Paragraph 1 'KBC Group Policy on Blacklisted Companies' and 2 'KBC Group Investment Policy'.

### **Modifications to the basket due to mergers, acquisitions, demergers, nationalisation, bankruptcy or disqualification :**

#### **Mergers or acquisitions**

If, during the life of the sub-fund, one or more issuers of shares in the basket are involved in a merger or acquisition, the shares of the relevant issuers which still meet the selection criteria and comply with the KBC Group Investment Policy\* after these operations will be given a weighting in the basket equal to the sum of the weightings of the shares of all issuers involved in the operation. If, after the operation, none of the issuers involved in the operation meet the selection criteria or comply with the KBC Group Investment Policy\*, the procedures described under 'Nationalisation, bankruptcy or disqualification' will apply.

\* The KBC Group Investment Policy can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > General exclusion policies for conventional funds and responsible investment funds, Paragraph 2 'KBC Group Investment Policy'.

#### **Demergers**

If an issuer of a share in the basket proceeds to a demerger, then the share from the issuer concerned can be substituted either by one of the shares that came about as a result of the demerger and that meets the selection criteria and complies with the KBC Group Investment Policy\*, or by a basket of shares arising from the demerger which meet the selection criteria and comply with the KBC Group Investment Policy\*. This basket of shares will, when calculating the number of shares in the basket, be considered as one share. If, after the operation, none of the shares resulting from the demerger meet the selection criteria or comply with the KBC Group Investment Policy\*, the procedures described under 'Nationalisation, bankruptcy or disqualification' will apply.

\* The KBC Group Investment Policy can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > General exclusion policies for conventional funds and responsible investment funds, Paragraph 2 'KBC Group Investment Policy'.

#### **Nationalisation, bankruptcy or disqualification**

If an issuer of a share in the basket is nationalised, declared bankrupt or no longer meets the selection criteria ('disqualification'), this share will be sold at the last known price before removal. The amount thus realised will then be invested until Maturity at the rate of interest in force on money or bond markets at the moment of removal, and this for a term equal to the term remaining until Maturity of the sub-fund. The realised amount plus the interest will be taken into account at Maturity as the result achieved for that share in order to calculate the final increase in the value of the basket at Maturity.

#### **Volatility of the net asset value**

The volatility of the net asset value may be high due to the composition of the portfolio.

#### **Securities Financing Transactions (SFTs)**

The sub-fund may not lend any financial instruments.

#### **General strategy for hedging the exchange risk**

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

## Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'

### 2.1.4. Financial portfolio management

The intellectual management, with the exception of the creation of the sub-fund and its maintenance in terms of the technical, product-specific and legal aspects has been delegated by the management company to KBC Fund Management Limited, 4th Floor, Scotch House, 6/7 Burgh Quay, Dublin 2, D02 VK44, Ireland.

### 2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

### 2.1.6. Index and benchmark

Not applicable

### 2.1.7. Policy pursued during the financial year

#### Composition of the basket on report date

| Name                             | Value         |

### **2.1.8. Summary risk indicator**

- 3 on a scale of 1 (lowest risk) to 7 (highest risk)
- a moderate level of inflation risk: there is no protection against an increase of the inflation.
  - a high level of market risk: the level of the risk reflects the volatility of the stock market and the exchange rate risk in relation to the euro.
  - a high level of performance risk: the level of the risk reflects the volatility of the stock market and the exchange rate risk in relation to the euro.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

## 2.2. Balance sheet

## 2.4.5. Performance figures

BE6347180828  
Optimum Fund ČSOB Krátkodobý 1 CAP  
Annual performance from 01/03/2024 through 28/02/2026 (in CZK)

If the results are expressed in a currency other than the euro, the return may be higher or lower due to exchange rate fluctuations.

| Cap Div | ISIN Code    | Curr<br>ency | 1 year           |               | 3 years          |               | 5 years          |               | 10 years         |               | Since Launch*    |                  |
|---------|--------------|--------------|------------------|---------------|------------------|---------------|------------------|---------------|------------------|---------------|------------------|------------------|

| CAP     | BE6347180828 | CZK          | 12.58%           |               |                  |               |                  |               |                  |               | 01/03/2024       | 11.25%           |

Risk warning: Past performance is not a guide to future performance.

\* Return on annual basis.

- The bar chart shows the performance for full financial years(period of 12 months prior to the half-yearly closing).
- The figures do not take account of any restructuring..
- Calculated in CZK and in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage.
- Calculation method for date D, where NAV stands for net asset value:  
Capitalisation units (CAP)  
Return on date D over a period of X years :  

$$[NIW(D) / NIW(Y)] ^ [1 / X] - 1$$
 where Y = D-X  
 Return on date D since the start date S of the unit:  

$$[NIW(D) / NIW(S)] ^ [1 / F] - 1$$
 where F = 1 if the unit has existed for less than one year on date D  
 where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D
- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation shares.

## 2.4.6. Costs

### Ongoing Charges:

Management fees and other administrative or operating costs: 1,312%  
Transaction costs: 0,000%

Percentage calculated at reporting date: 28 February 2026 (period of 12 months prior to the half-yearly closing).

A more detailed explanation with respect to the method of calculating ongoing charges and the relevant exclusions can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.5. Ongoing charges'

### Existence of Commission Sharing Agreements

Not applicable

### Fee sharing agreements en rebates

The management company has shared 70.00% of its fee with the distributor, and institutional and/or professional parties.

This percentage has been calculated relative to the fee for managing the investment portfolio of the sub-fund when it was launched.

## 2.4.7. Notes to the financial statements and other data

### Fee for managing the investment portfolio

KBC Asset Management NV receives a fee for managing the sub-fund's investments. This fee consists of a varying amount of max. 0.2 CZK per unit per year (with a maximum of CZK per unit per year for risk management).

This fee, which is calculated every six months, is paid monthly on the last banking day of each month. It can change from one six-month period to the next, within the limits set out below, and is based on the number of units issued at the start of each six-month period.

In the calculation, account is taken of the difference between:

- the return generated by the investments in bonds and other debt instruments, deposits, and/or liquid assets in order to achieve the capital protection on the Maturity date (see *The financial mechanism used to achieve capital protection*), and
- the expenses borne by the sub-fund to achieve a potential return (see *Permitted 'swap' transactions*),
- after deducting the expected fixed and variable expenses of the sub-fund, as mentioned above.

Of this, KBC Fund Management Ltd. receives a fee of no more than 0.19 CZK per unit per year from KBC Asset Management NV for the intellectual management of the sub-fund. KBC Fund Management Ltd. is a wholly owned subsidiary of KBC Asset Management NV.

KBC Asset Management NV has informed the bevek that, if due to the failure of the financial mechanism, the amount that should be paid per unit (after deducting taxes and charges) on the Maturity date, as relevant, is lower than the initial subscription price, KBC Asset Management NV may decide (but is not obliged to) to use the management fee it receives during the current financial year from the sub-fund – and possibly also from other sub-funds of the bevek – to cover this shortfall. This is not a guarantee from KBC Asset Management NV, which may

decide at any time and at its own discretion whether or not to use the management fee for this purpose. KBC Asset Management NV or one of its subsidiaries has also been appointed manager of the SPVs in which the sub-fund may invest (see *Criteria the investments must meet*). KBC Asset Management NV or one of its subsidiaries, as the case may be, receives an annual fee from the relevant SPVs for their management. This management fee may not exceed 0.15% per year and is calculated on the assets managed at the end of the quarter.

The sum of (i) the fee for managing the investment portfolio that the sub-fund pays to the management company and (ii) the management fee that the SPVs in which the sub-fund invests pay to the asset manager, shall never exceed 0.20 CZK per unit per year, as described above.

#### 2.1.3. Goal and key principles of the investment policy

##### Object of the sub-fund

The object of the sub-fund is to generate the highest possible return for its shareholders. To this end, an investment strategy has been developed that consists of:

- (1) An investment in transferable securities (including bonds and other debt instruments), money market instruments, units (shares) in undertakings for collective investment, deposits and liquid assets (including cash deposited on a time-deposit account or current account) (see the heading *Permitted asset classes*).
- (2) An investment in swaps. To this end, the sub-fund transfers a portion of the future income from the investments described under the heading *Permitted asset classes* to the counterparty or counterparties during the life of the sub-fund. In exchange, the counterparty or counterparties undertake to provide a potential return. The various types of swaps in which the sub-fund may invest are explained in more detail under the heading *Permitted swap transactions*.

No formal guarantee is provided either to the sub-fund or to its shareholders. The sub-fund does not provide any guaranteed return or capital protection either during the life of the sub-fund or at Maturity.

##### Sub-fund's investment policy

##### *Permitted asset classes*

Pursuant to the provisions of the Royal Decree of 12 November 2012 on undertakings for collective investment complying with the conditions of Directive 2009/65/EC, the sub-fund may invest in transferable securities (including bonds and other debt instruments), money market instruments, units (shares) in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as and to the extent permitted by the applicable legislation. These investments can have different maturities and coupon payment dates. Using the swaps described under the heading *Permitted swap transactions* (2), these investments are matched with the obligations of the sub-fund.

The investment limits and restrictions set out in the Royal Decree of 12 November 2012 on undertakings for collective investment complying with the conditions of Directive 2009/65/EC will be respected at all times.

The sub-fund may invest in, among other things, listed bonds issued by 'Special Purpose Vehicles' (SPVs).

These SPVs are managed by KBC Asset Management NV or a subsidiary.

The underlying assets of the bonds issued by the SPVs consist of a diversified portfolio of deposits issued by financial institutions, bonds, other debt instruments and financial derivatives. When selecting these underlying assets, account is taken of criteria relating to allocation and creditworthiness (see *Permitted asset classes* and *Characteristics of the bonds and other debt instruments*) in order to limit the counterparty risk.

Further details of the criteria these underlying deposits, bonds, other debt instruments and financial derivatives must meet are provided in the base prospectuses for the SPVs, which can be viewed at or downloaded from [www.kbc.be/prospectus/spv](http://www.kbc.be/prospectus/spv).

Investors are provided with information on the investments made by both the sub-fund and the SPVs in the annual and half-yearly reports on the open-ended investment company under Belgian law (bevek) to which the sub-fund belongs. These reports can also be viewed at or downloaded from [www.kbc.be](http://www.kbc.be).

### **Characteristics of the bonds and other debt instruments**

During the sub-fund's life, the average credit rating of the bonds and other debt instruments shall be at least 'A-' from Standard & Poor's or an equivalent rating from Moody's or Fitch, or, if there is no credit rating available, an average credit risk profile that the manager considers to be at least equivalent.

At the start of the investment, the credit rating of the long-term bonds and other debt instruments shall be at least 'A-' from Standard & Poor's or an equivalent rating from Moody's or Fitch, or, if there is no credit rating available, a credit risk profile that the manager considers to be at least equivalent.

At the start of the investment, the credit rating of the short-term bonds and other debt instruments shall be at least 'A-1' from Standard & Poor's or an equivalent rating from Moody's or Fitch, or, if there is no credit rating available, a credit risk profile that the manager considers to be at least equivalent.

When selecting the bonds and other debt instruments, all maturities are taken into consideration.

### **Permitted swap transactions**

**The swaps described below have been concluded with a prime counterparty or prime counterparties within the limits laid down by law.**

(1) To achieve a potential return, the sub-fund concludes swaps. Under such swap contracts, the sub-fund transfers a portion of the future income from the investments described under the heading 'Permitted asset classes' to the counterparty or counterparties during the life of the sub-fund. In exchange, the counterparty or counterparties undertake to provide a potential return as specified under the heading *Selected strategy*.

The use of swaps in this sub-fund can lead to a loss of part or all of the capital initially invested.

**The swaps under (1) are essential to achieve the sub-fund's investment objectives, since this technique facilitates achievement of the goal of generating a potential return.**

**The sub-fund's risk profile is not affected by the use of these swaps.**

(2) If necessary, the sub-fund also concludes swaps to match the due dates of the commitments of the sub-fund with those of the cash flows stemming from the investments described under the heading *Permitted asset classes*.

**These swaps are essential to achieve the sub-fund's investment objectives, since there are not enough bonds and other debt instruments available on the market whose coupon payments and maturity dates always perfectly match the due dates of the sub-fund's obligations.**

**The sub-fund's risk profile is not affected by the use of these swaps.**

(3) In addition, the sub-fund may conclude swaps to protect itself against the credit risk in respect of issuers of bonds and other debt instruments. Through this type of swap, one or more counterparties takes over the risk of an issuer of a bond or other debt instrument in the sub-fund's portfolio defaulting, in exchange for a fee payable by the sub-fund.

**The swaps under (3) serve to hedge the credit risk.**

**The sub-fund's risk profile is not affected by the use of these swaps.**

### **Restrictions of the investment policy**

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

## Strategie selected

### Investment objectives and strategy:

The sub-fund aims to generate a potential capital gain that is based on the evolution of a basket of 30 shares of a worldwide selection of companies that are characterised by a high market capitalisation.

The capital gain will be calculated on the evolution of a basket of shares using the formula  $(\text{End Value} - \text{Minimum Starting Value}) / \text{Starting Value}$ .

At Maturity :

- If the basket's End Value is not below its Minimum Starting Value, the sub-fund will pay out 100% of the increase in value in addition to 100% of the initial subscription price.
- If the basket's End Value is below its Minimum Starting Value, 100% of the decline in value will be taken into account.

The sub-fund does not, therefore, provide any guaranteed return or capital protection, either during its life or at Maturity.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

### Transparency of adverse sustainability impacts

The sub-fund took into account the principal adverse impacts of its investment decisions on sustainability factors ("PAI") as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on disclosure on sustainability in the financial services sector ("SFDR") through KBC Group's Investment Policy and KBC Group Policy on Blacklisted Companies.

Based on the KBC Group Policy on Blacklisted Companies, all companies on the 'KBC Group Blacklist' (including companies involved in controversial weapons such as those prohibited by Belgian law and white phosphorus weapons) are excluded as well as the worst offenders of the UN Global Compact.

Consequently, the sub-fund took into account exposure to controversial weapons ('indicator 14') by excluding companies dealing with controversial weapon systems, and violations of the principles of the UN Global Compact or the Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises ('indicator 10') by excluding the worst offenders of the UN Global Compact. During the lifetime of the sub-fund, no new shares will be included in the underlying basket of shares resulting from a corporate action if the company in question is excluded on the basis of the 'KBC Group Blacklist'.

### Maturity

Monday 31 August 2026 (payment with a value date of D+1 banking day)

### Currency

CZK, for all shares in the basket, changes in the value of the currency in which they are expressed relative to CZK are irrelevant. The investor pays the subscription amount in CZK and will be paid in CZK at Maturity (or earlier). The investor is not protected against any decline in the value of the currency in which the sub-fund is denominated relative to the euro.

### Starting Value

Value of the basket based on the weighted average of the Value of the shares included in the basket during the first 10 Valuation Days, starting from Monday 9 November 2020 inclusive.

### Minimum Starting Value

The lowest value of the Starting Value and the lowest Value of the basket on the Initial Observation Days and is always lower than or equal to the Starting Value.

### Initial Observation Dates

The first Valuation Day of each month from and including December 2020 up to and including May 2021 (inclusive).

### End Value

Value of the basket based on the weighted average of the Value of the shares included in the basket on the last Valuation Day of the month for the last 18 months before Maturity, more specifically from February 2025 through July 2026 (inclusive).

### Value

For all the shares, except for those listed on the Milan stock exchange, the closing price, namely the price of a share in the basket as calculated and notified at closing of the stock exchange by the authority of the stock exchange on which the share is listed (or its legal successor). The reference price is used for shares listed on the Milan stock exchange.

## Valuation day

A Valuation Day is set separately for each share in the basket.

A Valuation Day is a day that is a planned trading day both

- i) for the stock exchange on which the share is listed and
- ii) for the stock exchange whose activities have a substantial influence on the trading of options and futures on the share concerned

hereinafter referred to as 'the stock exchanges concerned'.

If on the Valuation Day,

- a) one of the stock exchanges concerned is unexpectedly closed or
- b) there is an event that disrupts the market for a stock exchange concerned or
- c) one of the stock exchanges concerned closes early,

the original Valuation Day is replaced by the following trading day when no event as referred to in a), b) or c) above occurs. An extraordinary closure that has been announced in advance is not considered as early closure.

If a valuation is made on consecutive Valuation Days, the trading day that replaces the original Valuation Day (i) may not coincide with another original Valuation Day and (ii) may not be a trading day that already replaces another original Valuation Day.

However, if an event as referred to under a), b) or c) above occurs on each of the eight trading days following the original Valuation Day,

- (i) the eighth trading day shall be considered as the original Valuation Day and
- (ii) the Bevek shall assess, in good faith and in consultation with the prime counterparty or counterparties with which it has concluded a swap agreement, the price of the share as it would have been traded on that eighth trading day and
- (iii) the Bevek will notify shareholders of any changes regarding setting the Starting Value and/or End Value and conditions of payment.

### Relevant basket

In the table below, the columns from left to right reflect the number of the share, the name of the share, the Bloomberg code, the exchange on which it trades (City-MIC Code) and its initial weighting in the basket.

| (i) | Name                              | Bloomberg Code   | Exchange         | Initial Weighting Coefficients |
|-----|-----------------------------------|------------------|------------------|--------------------------------|
| 1   | ABBVIE INC                        | ABBV UN Equity   | NEW YORK - XNYS  | 2.0000%                        |
| 2   | ALLIANZ SE                        | ALV GY Equity    | FRANKFURT - XETR | 2.0000%                        |
| 3   | ASSICURAZIONI GENERALI            | G IM Equity      | MILANO - MTAA    | 8.0000%                        |
| 4   | BCE INC                           | BCE CT Equity    | TORONTO - XTSE   | 2.0000%                        |
| 5   | CAN IMPERIAL BK OF COMMERCE (CT)  | CM CT Equity     | TORONTO - XTSE   | 2.0000%                        |
| 6   | COMMONWEALTH BANK OF AUSTRAL (AT) | CBA AT Equity    | SYDNEY - XASX    | 7.0000%                        |
| 7   | DEUTSCHE TELEKOM AG-REG           | DTE GY Equity    | FRANKFURT - XETR | 2.0000%                        |
| 8   | DOMINION ENERGY INC               | D UN Equity      | NEW YORK - XNYS  | 2.0000%                        |
| 9   | DUKE ENERGY CORP                  | DUK UN Equity    | NEW YORK - XNYS  | 2.0000%                        |
| 10  | E.ON SE                           | EOAN GY Equity   | FRANKFURT - XETR | 2.0000%                        |
| 11  | ENDESA SA (SQ)                    | ELE SQ Equity    | MADRID - XMAD    | 2.0000%                        |
| 12  | ENERGIAS DE PORTUGAL SA           | EDP PL Equity    | LISBON - XLIS    | 2.0000%                        |
| 13  | FORTUM OYJ                        | FORTUM FH Equity | HELSINKI - XHEL  | 5.0000%                        |
| 14  | GLAXOSMITHKLINE PLC               | GSK LN Equity    | LONDON - XLON    | 7.0000%                        |
| 15  | JAPAN POST HOLDINGS CO LTD        | 6178 JT Equity   | TOKYO - XTKS     | 2.0000%                        |
| 16  | KONINKLIJKE KPN NV                | KPN NA Equity    | AMSTERDAM - XAMS | 2.0000%                        |
| 17  | MIZUHO FIN GROUP                  | 8411 JT Equity   | TOKYO - XTKS     | 8.0000%                        |
| 18  | MUENCHENER RUECKVER AG-REG        | MUV2 GY Equity   | FRANKFURT - XETR | 2.0000%                        |
| 19  | NATIONAL GRID PLC                 | NG/ LN Equity    | LONDON - XLON    | 3.0000%                        |
| 20  | ORANGE                            | ORA FP Equity    | PARIS - XPAR     | 2.0000%                        |
| 21  | RIO TINTO PLC                     | RIO LN Equity    | LONDON - XLON    | 2.0000%                        |

| 29  | VERIZON COMMUNICATIONS INC        | VZ UN Equity     | NEW YORK - XNYS  | 2.0000%                        |
| 30  | ZURICH INSURANCE GROUP AG         | ZURN SE Equity   | ZURICH - XVTX    | 2.0000%                        |

### Basket composition methodology

KBC Asset Management used the following methodology to determine the composition of the sub-fund's basket.

#### Step 1 :

The starting point is the global equities universe from which a selection of potential investments is derived in accordance with the economic criteria for the composition of the basket and subject to restrictions regarding stock market capitalisation and liquid assets.

The economic criteria for the composition of the basket determine the size of the final selection.

#### Step 2 :

The selection of shares obtained in step 1 is reduced to a short list using a quantitative selection based on past financial data. The shares selected are those of companies that achieve a good score in terms of management quality, a healthy balance-sheet structure and a positive trend in profitability.

#### Step 3 :

The selection of shares obtained in step 2 is then verified by KBC Asset Management analysts. Shares that are permanently monitored by the analysts and those for which there is a negative recommendation, when the product is launched, are then withdrawn from the selection.

Step 4 :

The last reduction of the selection provides the final basket. This selection was made using the technical parameters of options (including the term, volatility, dividend yield and interest rate).

The final basket must satisfy the legal requirements concerning the quantity of shares and adequate distribution in the weighting. In addition, care is taken to ensure compliance with the geographical and/or sector spread. The analysts make a qualitative assessment of each share used taking account of specific knowledge of these shares and the sectors/regions from which they come, in accordance with the term of the sub-fund.

For the sub-fund Optimum Fund ČSOB Lookback 1, about 1931 equities were selected during step 1.

The initial selection was reduced by a maximum 20% in step 2.

This was again reduced by 10% (indicative) in step 3. The final basket set up during step 4 is described above under *Relevant basket*. This basket makes it possible to offer the sub-fund Optimum Fund ČSOB Lookback 1 under the conditions set out in the investment policy referred to above. Here the selection process uses parameters that could affect the potential return on the investments.

*Selection criteria for the basket :*

A share/issuer may only form part of the basket if (i) it is listed on a stock exchange, (ii) it has a high market capitalisation, and (iii) the Board of Directors of the Bevek has approved its inclusion in the basket (the 'Selection criteria').

### **Modifications to the basket due to mergers, acquisitions, demergers, nationalisation, bankruptcy or disqualification :**

#### **Mergers or acquisitions**

If, during the life of the sub-fund, one or more issuers of shares in the basket are involved in a merger or acquisition, the shares of the relevant issuers which still meet the selection criteria after these operations will be given a weighting in the basket equal to the sum of the weightings of the shares of all issuers involved in the operation. If, after the operation, none of the issuers involved in the operation meet the selection criteria, the procedures described under 'Nationalisation, bankruptcy or disqualification' will apply.

#### **Demergers**

If an issuer of a share in the basket proceeds to a demerger, then the share from the issuer concerned can be substituted either by one of the shares that came about as a result of the demerger and that meets the selection criteria, or by a basket of shares arising from the demerger which meet the selection criteria. This basket of shares will, when calculating the number of shares in the basket, be considered as one share. If, after the operation, none of the shares resulting from the demerger meet the selection criteria, the procedures described under 'Nationalisation, bankruptcy or disqualification' will apply.

#### **Nationalisation, bankruptcy or disqualification**

If an issuer of a share in the basket is nationalised, declared bankrupt or no longer meets the selection criteria ('disqualification'), this share will be sold at the last known price before removal. The amount thus realised will then be invested until Maturity at the rate of interest in force on money or bond markets at the moment of removal, and this for a term equal to the term remaining until Maturity of the sub-fund. The realised amount plus the interest will be taken into account at Maturity as the result achieved for that share in order to calculate the final increase in the value of the basket at Maturity.

### **Securities Financing Transactions (SFTs)**

**The sub-fund may not lend any financial instruments.**

### **General strategy for hedging the exchange risk**

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

### **Social, ethical and environmental aspects**

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'

## **2.1.4. Financial portfolio management**

The intellectual management, with the exception of the creation of the sub-fund and its maintenance in terms of the technical, product-specific and legal aspects has been delegated by the management company to KBC Fund Management Limited, 4th Floor, Scotch House, 6/7 Burgh Quay, Dublin 2, D02 VK44, Ireland.

## **2.1.5. Distributors**

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

## **2.1.6. Index and benchmark**

Not applicable

## 2.1.7. Policy pursued during the financial year

### Composition of the basket on report date

| Name                              | Value         |

## 2.1.8. Summary risk indicator

- 2 on a scale of 1 (lowest risk) to 7 (highest risk)
  - a moderate level of inflation risk: there is no protection against an increase of the inflation.
  - a moderate level of market risk: the level of the risk reflects the volatility of the stock market and the exchange rate risk in relation to the euro.
  - a moderate level of performance risk: the level of the risk reflects the volatility of the stock market and the exchange rate risk in relation to the euro.
- There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

## 2.2. Balance sheet

\*The financial year does not coincide with the calendar year.

## 2.4.5. Performance figures

BE6323306702  
Optimum Fund ČSOB Lookback 1 CAP  
Annual performance from 01/03/2020 through 28/02/2026 (in CZK)

If the results are expressed in a currency other than the euro, the return may be higher or lower due to exchange rate fluctuations.

| Cap Div | ISIN Code    | Curr<br>ency | 1 year        |            | 3 years       |            | 5 years       |            | 10 years      |            | Since Launch* |               |
|---------|--------------|--------------|---------------|------------|---------------|------------|---------------|------------|---------------|------------|---------------|---------------|
|         |              |              | Share classes | Bench mark | Share classes | Bench mark | Share classes | Bench mark | Share classes | Bench mark | Starting date | Share classes |
| CAP     | BE6323306702 | CZK          | 19.56%        |            | 19.70%        |            | 13.25%        |            |               |            | 02/11/2020    | 10.43%        |

Risk warning: Past performance is not a guide to future performance.

\* Return on annual basis.

- The bar chart shows the performance for full financial years(period of 12 months prior to the half-yearly closing).
- The figures do not take account of any restructuring..
- Calculated in CZK and in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage.
- Calculation method for date D, where NAV stands for net asset value:  
Capitalisation units (CAP)  
Return on date D over a period of X years :  

$$[\text{NIW}(\text{D}) / \text{NIW}(\text{Y})]^{1/X} - 1$$
 where Y = D-X  
 Return on date D since the start date S of the unit:  

$$[\text{NIW}(\text{D}) / \text{NIW}(\text{S})]^{1/F} - 1$$
 where F = 1 if the unit has existed for less than one year on date D  
 where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D
- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation shares.

## 2.4.6. Costs

### Ongoing Charges:

Management fees and other administrative or operating costs: 1,095%  
Transaction costs: 0,000%

Percentage calculated at reporting date: 28 February 2026 (period of 12 months prior to the half-yearly closing).

A more detailed explanation with respect to the method of calculating ongoing charges and the relevant exclusions can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.5. Ongoing charges'

### Existence of Commission Sharing Agreements

Not applicable

### Fee sharing agreements en rebates

The management company has shared 70.00% of its fee with the distributor, and institutional and/or professional parties.

This percentage has been calculated relative to the fee for managing the investment portfolio of the sub-fund when it was launched.

## 2.4.7. Notes to the financial statements and other data

### Fee for managing the investment portfolio

KBC Asset Management NV receives a fee for managing the sub-fund's investments. This fee consists of a varying amount of max. 0.2 CZK per unit per year (with a maximum of CZK per unit per year for risk management).

This fee, which is calculated every six months, is paid monthly on the last banking day of each month. It can change from one six-month period to the next, within the limits set out below, and is based on the number of units issued at the start of each six-month period.

In the calculation, account is taken of the difference between:

- the return generated by the investments described under *Permitted asset classes* at Maturity and
- the expenses borne by the sub-fund to achieve a potential return (see *Permitted 'swap' transactions*),
- after deducting the expected fixed and variable expenses of the sub-fund, as mentioned above.

Of this, KBC Fund Management Ltd. receives a fee of no more than 0.19 CZK per unit per year from KBC Asset Management NV for the intellectual management of the sub-fund. KBC Fund Management Ltd. is a wholly owned subsidiary of KBC Asset Management NV.

KBC Asset Management NV or one of its subsidiaries has also been appointed manager of the SPVs in which the sub-fund may invest (see *Criteria the investments must meet*). KBC Asset Management NV or one of its subsidiaries, as the case may be, receives an annual fee from the relevant SPVs for their management. This management fee may not exceed 0.15% per year and is calculated on the assets managed at the end of the quarter.

The sum of (i) the fee for managing the investment portfolio that the sub-fund pays to the management company and (ii) the management fee that the SPVs in which the sub-fund invests pay to the asset manager, shall never

exceed 0.20 CZK per unit per year, as described above.

#### 2.1.2. Stock exchange listing

Not applicable.

#### 2.1.3. Goal and key principles of the investment policy

##### Object of the sub-fund

The object of the sub-fund is twofold (before deducting charges and taxes):

- (1) To repay per share the initial subscription price of 10 CZK at Maturity.(i.e. the capital protection). This capital protection is provided through a financial mechanism that will be explained in more detail under the heading *Capital protection*. However, the capital protection does not apply to shareholders who sell their shares before Maturity.
- (2) To provide a potential return through an investment in swaps. The various types of swaps in which the sub-fund may invest are explained in more detail under the *Potential return*.

##### Capital Protection

###### The financial mechanism used to achieve capital protection

The financial mechanism used to achieve capital protection at Maturity consists of an investment of the total amount of the subscriptions in bonds and other debt instruments, deposits and/or liquid assets (including cash deposited on a time-deposit account or current account). These investments can have different maturities and coupon payment dates. Using the swaps described under the heading *Permitted swap transactions* (2), these investments are matched with the due dates of the obligations of the sub-fund.

###### Criteria the investments must meet

The investments must meet one of the following criteria:

- (1) An investment in deposits and/or debt instruments, placed with or issued by financial institutions under the prudential supervision of and established in a Member State of the European Economic Area.
- (2) An investment in debt instruments issued or guaranteed by a Member State of the European Economic Area.
- (3) An investment under an investment strategy with an analogous structure and identical counterparty risk as a direct investment in deposits and/or debt instruments as stated under (1) and (2) above.

The investments under (3) may consist of:

- (A) An investment in notes listed on a stock exchange that are issued by 'Special Purpose Vehicles' (SPVs).

These SPVs are managed by KBC Asset Management NV or a subsidiary.

The underlying assets of the bonds issued by the SPVs consist of a diversified portfolio of deposits issued by financial institutions, bonds, other debt instruments and financial derivatives. When selecting these underlying assets, account is taken of criteria relating to allocation and creditworthiness (see *Permitted asset classes* and *Characteristics of the bonds and other debt instruments*) in order to limit the counterparty risk.

Further details of the criteria these underlying deposits, bonds, other debt instruments and financial derivatives must meet are provided in the base prospectuses for the SPVs, which can be viewed at or downloaded from [www.kbc.be/prospectus/spv](http://www.kbc.be/prospectus/spv).

Investors are provided with information on the investments made by both the sub-fund and the SPVs in the annual and half-yearly reports on the open-ended investment company under Belgian law (bevek) to which the sub-fund belongs. These reports can also be viewed at or downloaded from [www.kbc.be](http://www.kbc.be).

- (B) An investment in:
- deposits with financial institutions under prudential supervision in the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia and/or
  - debt instruments issued by financial institutions under prudential supervision in the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia and/or
  - debt instruments issued or guaranteed by the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia.

Prudential supervision of financial institutions in the United Kingdom, Switzerland, the United States of America, Japan, Canada and Australia can be equated to prudential supervision of financial institutions in the member states of the European Economic Area.

The investments in debt instruments issued by financial institutions under prudential supervision in the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia or issued or guaranteed by the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia have a minimum credit rating as set out under the heading *Characteristics of the bonds and other debt instruments*.

- (C) The investments may also consist of a combination of the investments specified under (A) and (B).

### **No formal guarantee**

No formal guarantee of repayment of the initial subscription price is provided to the sub-fund or to its shareholders. In other words, the capital protection is not binding for the sub-fund as regards the result generated, although achieving this objective through the operation of the financial mechanism is still the top priority.

If the financial mechanism fails and, as a result, the amount per share payable (before deducting charges and taxes) at Maturity is lower than the initial subscription price, KBC Asset Management NV may decide (but is not obliged) to use the management fee it has received during the current financial year from the sub-fund – and possibly also from other sub-funds of the bevek – to cover the shortfall. This is not a guarantee from KBC Asset Management NV, which may decide at any time and at its own discretion whether or not to use the management fee for this purpose.

The capital protection does not apply to shareholders who sell their shares before Maturity.

### **Potential return**

To achieve a potential return, the sub-fund concludes swaps with one or more prime counterparties. Consequently, the sub-fund transfers a portion of the future income from the investments that were made to achieve capital protection to this counterparty (these counterparties) during the life of the sub-fund. In exchange, the counterparty (counterparties) undertake to provide a potential return as specified under the heading *Selected strategy*.

### **Sub-fund's investment policy**

#### **Permitted asset classes**

Pursuant to the provisions of the Royal Decree of 12 November 2012 on undertakings for collective investment complying with the conditions of Directive 2009/65/EC, the sub-fund may invest in transferable securities (including bonds and other debt instruments), money market instruments, units (shares) in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as and to the extent permitted by the applicable legislation.

The investment limits and restrictions set out in the Royal Decree of 12 November 2012 on undertakings for collective investment complying with the conditions of Directive 2009/65/EC will be respected at all times.

### **Characteristics of the bonds and other debt instruments**

During the sub-fund's life, the average credit rating of the bonds and other debt instruments shall be at least 'A-' from Standard & Poor's or an equivalent rating from Moody's or Fitch, or, if there is no credit rating available, an average credit risk profile that the manager considers to be at least equivalent.

At the start of the investment, the credit rating of the long-term bonds and other debt instruments shall be at least 'A-' from Standard & Poor's or an equivalent rating from Moody's or Fitch, or, if there is no credit rating available, a credit risk profile that the manager considers to be at least equivalent.

At the start of the investment, the credit rating of the short-term bonds and other debt instruments shall be at least 'A-1' from Standard & Poor's or an equivalent rating from Moody's or Fitch, or, if there is no credit rating available, a credit risk profile that the manager considers to be at least equivalent.

When selecting the bonds and other debt instruments, all maturities are taken into consideration.

### Permitted swap transactions

**The swaps described below have been concluded with a prime counterparty or prime counterparties within the limits laid down by law.**

(1) To achieve a potential return, the sub-fund concludes swaps. Under such swap contracts, the sub-fund transfers a portion of the future income from the investments described under the heading 'Permitted asset classes' to the counterparty or counterparties during the life of the sub-fund. In exchange, the counterparty or counterparties undertake to provide a potential return as specified under the heading *Selected strategy*.

**The swaps under (1) are essential to achieve the sub-fund's investment objectives, since this technique facilitates achievement of the goal of generating a potential return.**

**The sub-fund's risk profile is not affected by the use of these swaps.**

(2) If necessary, the sub-fund also concludes swaps to match the due dates of the commitments of the sub-fund with those of the cash flows stemming from the deposits, bonds and other debt instruments described under the heading *Criteria the investments must meet*.

**These swaps are essential to achieve the sub-fund's investment objectives, since there are not enough bonds and other debt instruments available on the market whose coupon payments and maturity dates always perfectly match the due dates of the sub-fund's obligations.**

**The sub-fund's risk profile is not affected by the use of these swaps.**

(3) In addition, the sub-fund may conclude swaps to protect itself against the credit risk in respect of issuers of bonds and other debt instruments. Through this type of swap, one or more counterparties takes over the risk of an issuer of a bond or other debt instrument in the sub-fund's portfolio defaulting, in exchange for a fee payable by the sub-fund.

**The swaps under (3) serve to hedge the credit risk.**

**The sub-fund's risk profile is not affected by the use of these swaps.**

### Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

### Strategie selected

#### Investment objectives and strategy:

The sub-fund has two investment objectives: firstly, it seeks to pay back at Maturity at least 100% of the initial subscription price, and secondly, to generate a potential capital gain that is contingent on the evolution of a basket of 30 shares of a worldwide selection of companies that are characterised by a high market capitalisation.

If the End Value of the basket of 30 shares of a worldwide selection of companies that are characterised by a high market capitalisation has risen relative to its Minimum Starting Value, 100% of the increase  $(= (\text{Value at Maturity} - \text{Minimum Starting Value}) / \text{Initial Value})$  will be taken into account at Maturity with regard to 100% of the initial subscription price. The capital gain is capped at 100% (yield to maturity of 12.67% before taxes and charges). Negative performances of the basket are not taken into account.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

### Transparency of adverse sustainability impacts

The sub-fund took into account the principal adverse impacts of its investment decisions on sustainability factors ("PAI") as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on disclosure on sustainability in the financial services sector ("SFDR") through KBC Group's Investment Policy and KBC Group Policy on Blacklisted Companies.

Based on the KBC Group Policy on Blacklisted Companies, all companies on the 'KBC Group Blacklist' (including companies involved in controversial weapons such as those prohibited by Belgian law and white phosphorus weapons) are excluded as well as the worst offenders of the UN Global Compact.

Consequently, the sub-fund took into account exposure to controversial weapons ('indicator 14') by excluding companies dealing with controversial weapon systems, and violations of the principles of the UN Global Compact or the Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises ('indicator 10') by excluding the worst offenders of the UN Global Compact.

### Maturity

Tuesday 29 February 2028 (payment with a value date of D+1 banking day)

## Currency

CZK, for all shares in the basket, changes in the value of the currency in which they are expressed relative to CZK are irrelevant. The investor pays the subscription amount in CZK and will be paid in CZK at Maturity (or earlier). The investor is not protected against any decline in the value of the currency in which the sub-fund is denominated relative to the euro.

## Starting Value

Value of the basket based on the weighted average of the Value of the shares included in the basket during the first 10 Valuation Days, starting from Monday 9 May 2022 inclusive.

## Minimum Starting Value

The lowest value of the Starting Value and the lowest Value of the basket on the Initial Observation Days and is always lower than or equal to the Starting Value.

## Initial Observation Dates

The first Valuation Day of each month from and including June 2022 up to and including November 2022 (inclusive).

## End Value

Value of the basket based on the weighted average of the Value of the shares included in the basket on the last Valuation Day of the month for the last 18 months before Maturity, more specifically from August 2026 through January 2028 (inclusive).

## Value

For all the shares, except for those listed on the Milan stock exchange, the closing price, namely the price of a share in the basket as calculated and notified at closing of the stock exchange by the authority of the stock exchange on which the share is listed (or its legal successor). The reference price is used for shares listed on the Milan stock exchange.

## Valuation day

A Valuation Day is set separately for each share in the basket.

A Valuation Day is a day that is a planned trading day both

- i) for the stock exchange on which the share is listed and
- ii) for the stock exchange whose activities have a substantial influence on the trading of options and futures on the share concerned

hereinafter referred to as 'the stock exchanges concerned'.

If on the Valuation Day,

- a) one of the stock exchanges concerned is unexpectedly closed or
- b) there is an event that disrupts the market for a stock exchange concerned or
- c) one of the stock exchanges concerned closes early,

the original Valuation Day is replaced by the following trading day when no event as referred to in a), b) or c) above occurs. An extraordinary closure that has been announced in advance is not considered as early closure.

If a valuation is made on consecutive Valuation Days, the trading day that replaces the original Valuation Day (i) may not coincide with another original Valuation Day and (ii) may not be a trading day that already replaces another original Valuation Day.

However, if an event as referred to under a), b) or c) above occurs on each of the eight trading days following the original Valuation Day,

- (i) the eighth trading day shall be considered as the original Valuation Day and
- (ii) the Bevek shall assess, in good faith and in consultation with the prime counterparty or counterparties with which it has concluded a swap agreement, the price of the share as it would have been traded on that eighth trading day and
- (iii) the Bevek will notify shareholders of any changes regarding setting the Starting Value and/or End Value and conditions of payment.

### Relevant basket

In the table below, the columns from left to right reflect the number of the share, the name of the share, the Bloomberg code, the exchange on which it trades (City-MIC Code) and its initial weighting in the basket.

### Basket composition methodology

KBC Asset Management used the following methodology to determine the composition of the sub-fund's basket.

#### Step 1 :

The starting point is the global equities universe from which a selection of potential investments is derived in accordance with the economic criteria for the composition of the basket and subject to restrictions regarding stock market capitalisation and liquid assets.

The economic criteria for the composition of the basket determine the size of the final selection.

#### Step 2 :

The selection of shares obtained in step 1 is reduced to a short list using a quantitative selection based on past financial data. The shares selected are those of companies that achieve a good score in terms of management quality, a healthy balance-sheet structure and a positive trend in profitability.

#### Step 3 :

The selection of shares obtained in step 2 is then verified by KBC Asset Management analysts. Shares that are permanently monitored by the analysts and those for which there is a negative recommendation, when the product is launched, are then withdrawn from the selection.

#### Step 4 :

The last reduction of the selection provides the final basket. This selection was made using the technical parameters of options (including the term, volatility, dividend yield and interest rate).

The final basket must satisfy the legal requirements concerning the quantity of shares and adequate distribution in the weighting. In addition, care is taken to ensure compliance with the geographical and/or sector spread. The analysts make a qualitative assessment of each share used taking account of specific knowledge of these shares and the sectors/regions from which they come, in accordance with the term of the sub-fund.

For the sub-fund Optimum Fund ČSOB Lookback 2, about 1577 equities were selected during step 1.

The initial selection was reduced by a maximum 20% in step 2.

This was again reduced by 10% (indicative) in step 3. The final basket set up during step 4 is described above under *Relevant basket*. This basket makes it possible to offer the sub-fund Optimum Fund ČSOB Lookback 2 under the conditions set out in the investment policy referred to above. Here the selection process uses parameters that could affect the potential return on the investments.

#### *Selection criteria for the basket :*

A share/issuer may only form part of the basket if (i) it is listed on a stock exchange, (ii) it has a high market capitalisation, (iii) the Board of Directors of the Beveik has approved its inclusion in the basket, (iv) the issuer is not included in the KBC Group Policy on Blacklisted Companies\* and (v) at the time the swap contracts are being concluded (see 'Permitted swap transactions'), the issuer of the share complies with the KBC Group Investment Policy\* (the 'Selection criteria').

\* The KBC Group Policy on Blacklisted Companies and the KBC Group Investment Policy can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > General exclusion policies for conventional funds and socially responsible investment funds, Paragraph 1 'KBC Group Policy on Blacklisted Companies' and 2 'KBC Group Investment Policy'.

### **Modifications to the basket due to mergers, acquisitions, demergers, nationalisation, bankruptcy or disqualification :**

#### **Mergers or acquisitions**

If, during the life of the sub-fund, one or more issuers of shares in the basket are involved in a merger or acquisition, the shares of the relevant issuers which still meet the selection criteria and comply with the KBC Group Investment Policy\* after these operations will be given a weighting in the basket equal to the sum of the weightings of the shares of all issuers involved in the operation. If, after the operation, none of the issuers involved in the operation meet the selection criteria or comply with the KBC Group Investment Policy\*, the procedures described under 'Nationalisation, bankruptcy or disqualification' will apply.

\* The KBC Group Investment Policy can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > General exclusion policies for conventional funds and responsible investment funds, Paragraph 2 'KBC Group Investment Policy'.

#### **Demergers**

If an issuer of a share in the basket proceeds to a demerger, then the share from the issuer concerned can be substituted either by one of the shares that came about as a result of the demerger and that meets the selection criteria and complies with the KBC Group Investment Policy\*, or by a basket of shares arising from the demerger which meet the selection criteria and comply with the KBC Group Investment Policy\*. This basket of shares will, when calculating the number of shares in the basket, be considered as one share. If, after the operation, none of the shares resulting from the demerger meet the selection criteria or comply with the KBC Group Investment Policy\*, the procedures described under 'Nationalisation, bankruptcy or disqualification' will apply.

\* The KBC Group Investment Policy can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > General exclusion policies for conventional funds and responsible investment funds, Paragraph 2 'KBC Group Investment Policy'.

#### **Nationalisation, bankruptcy or disqualification**

If an issuer of a share in the basket is nationalised, declared bankrupt or no longer meets the selection criteria ('disqualification'), this share will be sold at the last known price before removal. The amount thus realised will then be invested until Maturity at the rate of interest in force on money or bond markets at the moment of removal, and this for a term equal to the term remaining until Maturity of the sub-fund. The realised amount plus the interest will be taken into account at Maturity as the result achieved for that share in order to calculate the final increase in the value of the basket at Maturity.

#### **Volatility of the net asset value**

The volatility of the net asset value may be high due to the composition of the portfolio.

#### **Securities Financing Transactions (SFTs)**

The sub-fund may not lend any financial instruments.

#### **General strategy for hedging the exchange risk**

A more detailed explanation can be found in this report's General information on the Beveik under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

## Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'

### 2.1.4. Financial portfolio management

The intellectual management, with the exception of the creation of the sub-fund and its maintenance in terms of the technical, product-specific and legal aspects has been delegated by the management company to KBC Fund Management Limited, 4th Floor, Scotch House, 6/7 Burgh Quay, Dublin 2, D02 VK44, Ireland.

### 2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

### 2.1.6. Index and benchmark

Not applicable

### 2.1.7. Policy pursued during the financial year

## 2.1.8. Summary risk indicator

3 on a scale of 1 (lowest risk) to 7 (highest risk)

- a moderate level of inflation risk: there is no protection against an increase of the inflation.
- a high level of market risk: the level of the risk reflects the volatility of the stock market and the exchange rate risk in relation to the euro.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market and the exchange rate risk in relation to the euro.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

## 2.2. Balance sheet

| CAP     | BE6332922838 | CZK          | 24.61%           |               | 16.11%           |               |                  |               |                  |               | 02/05/2022       | 11.88%           |

Risk warning: Past performance is not a guide to future performance.

\* Return on annual basis.

- The bar chart shows the performance for full financial years(period of 12 months prior to the half-yearly closing).
- The figures do not take account of any restructuring..
- Calculated in CZK and in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage.
- Calculation method for date D, where NAV stands for net asset value:  
Capitalisation units (CAP)  
Return on date D over a period of X years :  

$$[NIW(D) / NIW(Y)]^{1/X} - 1$$
 where Y = D-X  
 Return on date D since the start date S of the unit:  

$$[NIW(D) / NIW(S)]^{1/F} - 1$$
 where F = 1 if the unit has existed for less than one year on date D  
 where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D
- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation shares.

## 2.4.6. Costs

### Ongoing Charges:

Management fees and other administrative or operating costs: 1,320%  
Transaction costs: 0,000%

Percentage calculated at reporting date: 28 February 2026 (period of 12 months prior to the half-yearly closing).

A more detailed explanation with respect to the method of calculating ongoing charges and the relevant exclusions can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.5. Ongoing charges'

### Existence of Commission Sharing Agreements

Not applicable

### Fee sharing agreements en rebates

The management company has shared 70.00% of its fee with the distributor, and institutional and/or professional parties.

This percentage has been calculated relative to the fee for managing the investment portfolio of the sub-fund when it was launched.

## 2.4.7. Notes to the financial statements and other data

|                                                                                                          |                                                                                                                                                                                                     |                                                                                                                                                                                                                                                                                                        |

### Fee for managing the investment portfolio

KBC Asset Management NV receives a fee for managing the sub-fund's investments. This fee consists of a varying amount of max. 0.2 CZK per unit per year (with a maximum of CZK per unit per year for risk management).

This fee, which is calculated every six months, is paid monthly on the last banking day of each month. It can change from one six-month period to the next, within the limits set out below, and is based on the number of units issued at the start of each six-month period.

In the calculation, account is taken of the difference between:

- the return generated by the investments in bonds and other debt instruments, deposits, and/or liquid assets in order to achieve the capital protection on the Maturity date (see *The financial mechanism used to achieve capital protection*), and
- the expenses borne by the sub-fund to achieve a potential return (see *Permitted 'swap' transactions*),
- after deducting the expected fixed and variable expenses of the sub-fund, as mentioned above.

Of this, KBC Fund Management Ltd. receives a fee of no more than 0.19 CZK per unit per year from KBC Asset Management NV for the intellectual management of the sub-fund. KBC Fund Management Ltd. is a wholly owned subsidiary of KBC Asset Management NV.

KBC Asset Management NV has informed the bevek that, if due to the failure of the financial mechanism, the amount that should be paid per unit (after deducting taxes and charges) on the Maturity date, as relevant, is lower than the initial subscription price, KBC Asset Management NV may decide (but is not obliged to) to use the management fee it receives during the current financial year from the sub-fund – and possibly also from other sub-funds of the bevek – to cover this shortfall. This is not a guarantee from KBC Asset Management NV, which may

decide at any time and at its own discretion whether or not to use the management fee for this purpose. KBC Asset Management NV or one of its subsidiaries has also been appointed manager of the SPVs in which the sub-fund may invest (see *Criteria the investments must meet*). KBC Asset Management NV or one of its subsidiaries, as the case may be, receives an annual fee from the relevant SPVs for their management. This management fee may not exceed 0.15% per year and is calculated on the assets managed at the end of the quarter.

The sum of (i) the fee for managing the investment portfolio that the sub-fund pays to the management company and (ii) the management fee that the SPVs in which the sub-fund invests pay to the asset manager, shall never exceed 0.20 CZK per unit per year, as described above.

| Currency:                   | CZK              |

#### 2.1.2. Stock exchange listing

Not applicable.

#### 2.1.3. Goal and key principles of the investment policy

##### Object of the sub-fund

The object of the sub-fund is twofold (before deducting charges and taxes):

- (1) To repay per share the initial subscription price of 10 CZK at Maturity.(i.e. the capital protection). This capital protection is provided through a financial mechanism that will be explained in more detail under the heading *Capital protection*. However, the capital protection does not apply to shareholders who sell their shares before Maturity.
- (2) To provide a potential return through an investment in swaps. The various types of swaps in which the sub-fund may invest are explained in more detail under the *Potential return*.

##### Capital Protection

###### The financial mechanism used to achieve capital protection

The financial mechanism used to achieve capital protection at Maturity consists of an investment of the total amount of the subscriptions in bonds and other debt instruments, deposits and/or liquid assets (including cash deposited on a time-deposit account or current account). These investments can have different maturities and coupon payment dates. Using the swaps described under the heading *Permitted swap transactions* (2), these investments are matched with the due dates of the obligations of the sub-fund.

###### Criteria the investments must meet

The investments must meet one of the following criteria:

- (1) An investment in deposits and/or debt instruments, placed with or issued by financial institutions under the prudential supervision of and established in a Member State of the European Economic Area.
- (2) An investment in debt instruments issued or guaranteed by a Member State of the European Economic Area.
- (3) An investment under an investment strategy with an analogous structure and identical counterparty risk as a direct investment in deposits and/or debt instruments as stated under (1) and (2) above.

The investments under (3) may consist of:

- (A) An investment in notes listed on a stock exchange that are issued by 'Special Purpose Vehicles' (SPVs).

These SPVs are managed by KBC Asset Management NV or a subsidiary.

The underlying assets of the bonds issued by the SPVs consist of a diversified portfolio of deposits issued by financial institutions, bonds, other debt instruments and financial derivatives. When selecting these underlying assets, account is taken of criteria relating to allocation and creditworthiness (see *Permitted asset classes* and *Characteristics of the bonds and other debt instruments*) in order to limit the counterparty risk.

Further details of the criteria these underlying deposits, bonds, other debt instruments and financial derivatives must meet are provided in the base prospectuses for the SPVs, which can be viewed at or downloaded from [www.kbc.be/prospectus/spv](http://www.kbc.be/prospectus/spv).

Investors are provided with information on the investments made by both the sub-fund and the SPVs in the annual and half-yearly reports on the open-ended investment company under Belgian law (bevek) to which the sub-fund belongs. These reports can also be viewed at or downloaded from [www.kbc.be](http://www.kbc.be).

- (B) An investment in:
- deposits with financial institutions under prudential supervision in the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia and/or
  - debt instruments issued by financial institutions under prudential supervision in the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia and/or
  - debt instruments issued or guaranteed by the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia.

Prudential supervision of financial institutions in the United Kingdom, Switzerland, the United States of America, Japan, Canada and Australia can be equated to prudential supervision of financial institutions in the member states of the European Economic Area.

The investments in debt instruments issued by financial institutions under prudential supervision in the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia or issued or guaranteed by the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia have a minimum credit rating as set out under the heading *Characteristics of the bonds and other debt instruments*.

- (C) The investments may also consist of a combination of the investments specified under (A) and (B).

### **No formal guarantee**

No formal guarantee of repayment of the initial subscription price is provided to the sub-fund or to its shareholders. In other words, the capital protection is not binding for the sub-fund as regards the result generated, although achieving this objective through the operation of the financial mechanism is still the top priority.

If the financial mechanism fails and, as a result, the amount per share payable (before deducting charges and taxes) at Maturity is lower than the initial subscription price, KBC Asset Management NV may decide (but is not obliged) to use the management fee it has received during the current financial year from the sub-fund – and possibly also from other sub-funds of the bevek – to cover the shortfall. This is not a guarantee from KBC Asset Management NV, which may decide at any time and at its own discretion whether or not to use the management fee for this purpose.

The capital protection does not apply to shareholders who sell their shares before Maturity.

### **Potential return**

To achieve a potential return, the sub-fund concludes swaps with one or more prime counterparties. Consequently, the sub-fund transfers a portion of the future income from the investments that were made to achieve capital protection to this counterparty (these counterparties) during the life of the sub-fund. In exchange, the counterparty (counterparties) undertake to provide a potential return as specified under the heading *Selected strategy*.

### **Sub-fund's investment policy**

#### **Permitted asset classes**

Pursuant to the provisions of the Royal Decree of 12 November 2012 on undertakings for collective investment complying with the conditions of Directive 2009/65/EC, the sub-fund may invest in transferable securities (including bonds and other debt instruments), money market instruments, units (shares) in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as and to the extent permitted by the applicable legislation.

The investment limits and restrictions set out in the Royal Decree of 12 November 2012 on undertakings for collective investment complying with the conditions of Directive 2009/65/EC will be respected at all times.

### **Characteristics of the bonds and other debt instruments**

During the sub-fund's life, the average credit rating of the bonds and other debt instruments shall be at least 'A-' from Standard & Poor's or an equivalent rating from Moody's or Fitch, or, if there is no credit rating available, an average credit risk profile that the manager considers to be at least equivalent.

At the start of the investment, the credit rating of the long-term bonds and other debt instruments shall be at least 'A-' from Standard & Poor's or an equivalent rating from Moody's or Fitch, or, if there is no credit rating available, a credit risk profile that the manager considers to be at least equivalent.

At the start of the investment, the credit rating of the short-term bonds and other debt instruments shall be at least 'A-1' from Standard & Poor's or an equivalent rating from Moody's or Fitch, or, if there is no credit rating available, a credit risk profile that the manager considers to be at least equivalent.

When selecting the bonds and other debt instruments, all maturities are taken into consideration.

### Permitted swap transactions

**The swaps described below have been concluded with a prime counterparty or prime counterparties within the limits laid down by law.**

(1) To achieve a potential return, the sub-fund concludes swaps. Under such swap contracts, the sub-fund transfers a portion of the future income from the investments described under the heading 'Permitted asset classes' to the counterparty or counterparties during the life of the sub-fund. In exchange, the counterparty or counterparties undertake to provide a potential return as specified under the heading *Selected strategy*.

**The swaps under (1) are essential to achieve the sub-fund's investment objectives, since this technique facilitates achievement of the goal of generating a potential return.**

**The sub-fund's risk profile is not affected by the use of these swaps.**

(2) If necessary, the sub-fund also concludes swaps to match the due dates of the commitments of the sub-fund with those of the cash flows stemming from the deposits, bonds and other debt instruments described under the heading *Criteria the investments must meet*.

**These swaps are essential to achieve the sub-fund's investment objectives, since there are not enough bonds and other debt instruments available on the market whose coupon payments and maturity dates always perfectly match the due dates of the sub-fund's obligations.**

**The sub-fund's risk profile is not affected by the use of these swaps.**

(3) In addition, the sub-fund may conclude swaps to protect itself against the credit risk in respect of issuers of bonds and other debt instruments. Through this type of swap, one or more counterparties takes over the risk of an issuer of a bond or other debt instrument in the sub-fund's portfolio defaulting, in exchange for a fee payable by the sub-fund.

**The swaps under (3) serve to hedge the credit risk.**

**The sub-fund's risk profile is not affected by the use of these swaps.**

### Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

### Strategie selected

#### Investment objectives and strategy:

The sub-fund pursues two investment objectives: the repayment of 100% of the initial subscription price at Maturity as well as a potential capital gain based on the performance of a basket of 30 World Selection Stocks.

At maturity, an increase equal to the best of two alternatives will be paid out:

- 8.00%, settled at 100% of the initial subscription price;
- 100% of the performance in the basket of 30 shares, settled at 100% of the initial subscription price, capped at 120%. The performance of the basket is calculated as ((End Value minus Minimal Starting Value) divided by Starting Value). Negative evolutions in the basket will not be taken into account.

Consequently, the minimum return at maturity will be 8.00% (actuarial yield: 1.58% before fees and taxes) and maximum 120% (actuarial return: 17.46% before costs and taxes).

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

### Transparency of adverse sustainability impacts

The sub-fund took into account the principal adverse impacts of its investment decisions on sustainability factors ("PAI") as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on disclosure on sustainability in the financial services sector ("SFDR") through KBC Group's Investment Policy and KBC Group Policy on Blacklisted Companies.

Based on the KBC Group Policy on Blacklisted Companies, all companies on the 'KBC Group Blacklist' (including companies involved in controversial weapons such as those prohibited by Belgian law and white phosphorus weapons) are excluded as well as the worst offenders of the UN Global Compact.

Consequently, the sub-fund took into account exposure to controversial weapons ('indicator 14') by excluding companies dealing with controversial weapon systems, and violations of the principles of the UN Global Compact or the Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises ('indicator 10') by excluding the worst offenders of the UN Global Compact.

### Maturity

Monday 31 July 2028 (payment with a value date of D+1 banking day)

## Currency

CZK, for all shares in the basket, changes in the value of the currency in which they are expressed relative to CZK are irrelevant. The investor pays the subscription amount in CZK and will be paid in CZK at Maturity (or earlier). The investor is not protected against any decline in the value of the currency in which the sub-fund is denominated relative to the euro.

## Starting Value

Value of the basket based on the weighted average of the Value of the shares included in the basket during the first 10 Valuation Days, starting from Friday 8 September 2023 inclusive.

## Minimum Starting Value

The lowest value of the Starting Value and the lowest Value of the basket on the Initial Observation Days and is always lower than or equal to the Starting Value.

## Initial Observation Dates

The first Valuation Day of each month from and including October 2023 up to and including March 2024 (inclusive).

## End Value

Value of the basket based on the weighted average of the Value of the shares included in the basket on the last Valuation Day of the month for the last 12 months before Maturity, more specifically from July 2027 through June 2028 (inclusive).

## Value

For all the shares, except for those listed on the Milan stock exchange, the closing price, namely the price of a share in the basket as calculated and notified at closing of the stock exchange by the authority of the stock exchange on which the share is listed (or its legal successor). The reference price is used for shares listed on the Milan stock exchange.

## Valuation day

A Valuation Day is set separately for each share in the basket.

A Valuation Day is a day that is a planned trading day both

- i) for the stock exchange on which the share is listed and
- ii) for the stock exchange whose activities have a substantial influence on the trading of options and futures on the share concerned

hereinafter referred to as 'the stock exchanges concerned'.

If on the Valuation Day,

- a) one of the stock exchanges concerned is unexpectedly closed or
- b) there is an event that disrupts the market for a stock exchange concerned or
- c) one of the stock exchanges concerned closes early,

the original Valuation Day is replaced by the following trading day when no event as referred to in a), b) or c) above occurs. An extraordinary closure that has been announced in advance is not considered as early closure.

If a valuation is made on consecutive Valuation Days, the trading day that replaces the original Valuation Day (i) may not coincide with another original Valuation Day and (ii) may not be a trading day that already replaces another original Valuation Day.

However, if an event as referred to under a), b) or c) above occurs on each of the eight trading days following the original Valuation Day,

- (i) the eighth trading day shall be considered as the original Valuation Day and
- (ii) the Bevek shall assess, in good faith and in consultation with the prime counterparty or counterparties with which it has concluded a swap agreement, the price of the share as it would have been traded on that eighth trading day and
- (iii) the Bevek will notify shareholders of any changes regarding setting the Starting Value and/or End Value and conditions of payment.

### Relevant basket

In the table below, the columns from left to right reflect the number of the share, the name of the share, the Bloomberg code, the exchange on which it trades (City-MIC Code) and its initial weighting in the basket.

| (i) | Name                             | Bloomberg Code  | Exchange         | Initial Weighting Coefficients |

### Basket composition methodology

KBC Asset Management used the following methodology to determine the composition of the sub-fund's basket.

#### Step 1 :

The starting point is the global equities universe from which a selection of potential investments is derived in accordance with the economic criteria for the composition of the basket and subject to restrictions regarding stock market capitalisation and liquid assets.

The economic criteria for the composition of the basket determine the size of the final selection.

#### Step 2 :

The selection of shares obtained in step 1 is reduced to a short list using a quantitative selection based on past financial data. The shares selected are those of companies that achieve a good score in terms of management quality, a healthy balance-sheet structure and a positive trend in profitability.

#### Step 3 :

The selection of shares obtained in step 2 is then verified by KBC Asset Management analysts. Shares that are permanently monitored by the analysts and those for which there is a negative recommendation, when the product is launched, are then withdrawn from the selection.

#### Step 4 :

The last reduction of the selection provides the final basket. This selection was made using the technical parameters of options (including the term, volatility, dividend yield and interest rate).

The final basket must satisfy the legal requirements concerning the quantity of shares and adequate distribution in the weighting. In addition, care is taken to ensure compliance with the geographical and/or sector spread. The analysts make a qualitative assessment of each share used taking account of specific knowledge of these shares and the sectors/regions from which they come, in accordance with the term of the sub-fund.

For the sub-fund Optimum Fund ČSOB Lookback 3, about 1549 equities were selected during step 1.

The initial selection was reduced by a maximum 20% in step 2.

This was again reduced by 10% (indicative) in step 3. The final basket set up during step 4 is described above under *Relevant basket*. This basket makes it possible to offer the sub-fund Optimum Fund ČSOB Lookback 3 under the conditions set out in the investment policy referred to above. Here the selection process uses parameters that could affect the potential return on the investments.

#### *Selection criteria for the basket :*

A share/issuer may only form part of the basket if (i) it is listed on a stock exchange, (ii) it has a high market capitalisation, (iii) the Board of Directors of the Bevek has approved its inclusion in the basket, (iv) the issuer is not included in the KBC Group Policy on Blacklisted Companies\* and (v) at the time the swap contracts are being concluded (see 'Permitted swap transactions'), the issuer of the share complies with the KBC Group Investment Policy\* (the 'Selection criteria').

\* The KBC Group Policy on Blacklisted Companies and the KBC Group Investment Policy can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > General exclusion policies for conventional funds and socially responsible investment funds, Paragraph 1 'KBC Group Policy on Blacklisted Companies' and 2 'KBC Group Investment Policy'.

### **Modifications to the basket due to mergers, acquisitions, demergers, nationalisation, bankruptcy or disqualification :**

#### **Mergers or acquisitions**

If, during the life of the sub-fund, one or more issuers of shares in the basket are involved in a merger or acquisition, the shares of the relevant issuers which still meet the selection criteria and comply with the KBC Group Investment Policy\* after these operations will be given a weighting in the basket equal to the sum of the weightings of the shares of all issuers involved in the operation. If, after the operation, none of the issuers involved in the operation meet the selection criteria or comply with the KBC Group Investment Policy\*, the procedures described under 'Nationalisation, bankruptcy or disqualification' will apply.

\* The KBC Group Investment Policy can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > General exclusion policies for conventional funds and responsible investment funds, Paragraph 2 'KBC Group Investment Policy'.

#### **Demergers**

If an issuer of a share in the basket proceeds to a demerger, then the share from the issuer concerned can be substituted either by one of the shares that came about as a result of the demerger and that meets the selection criteria and complies with the KBC Group Investment Policy\*, or by a basket of shares arising from the demerger which meet the selection criteria and comply with the KBC Group Investment Policy\*. This basket of shares will, when calculating the number of shares in the basket, be considered as one share. If, after the operation, none of the shares resulting from the demerger meet the selection criteria or comply with the KBC Group Investment Policy\*, the procedures described under 'Nationalisation, bankruptcy or disqualification' will apply.

\* The KBC Group Investment Policy can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > General exclusion policies for conventional funds and responsible investment funds, Paragraph 2 'KBC Group Investment Policy'.

#### **Nationalisation, bankruptcy or disqualification**

If an issuer of a share in the basket is nationalised, declared bankrupt or no longer meets the selection criteria ('disqualification'), this share will be sold at the last known price before removal. The amount thus realised will then be invested until Maturity at the rate of interest in force on money or bond markets at the moment of removal, and this for a term equal to the term remaining until Maturity of the sub-fund. The realised amount plus the interest will be taken into account at Maturity as the result achieved for that share in order to calculate the final increase in the value of the basket at Maturity.

#### **Volatility of the net asset value**

The volatility of the net asset value may be high due to the composition of the portfolio.

#### **Securities Financing Transactions (SFTs)**

The sub-fund may not lend any financial instruments.

#### **General strategy for hedging the exchange risk**

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

## Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'

### 2.1.4. Financial portfolio management

The intellectual management, with the exception of the creation of the sub-fund and its maintenance in terms of the technical, product-specific and legal aspects has been delegated by the management company to KBC Fund Management Limited, 4th Floor, Scotch House, 6/7 Burgh Quay, Dublin 2, D02 VK44, Ireland.

### 2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

### 2.1.6. Index and benchmark

Not applicable

### 2.1.7. Policy pursued during the financial year

#### Composition of the basket on report date

### **2.1.8. Summary risk indicator**

- 3 on a scale of 1 (lowest risk) to 7 (highest risk)
- a moderate level of inflation risk: there is no protection against an increase of the inflation.
  - a high level of market risk: the level of the risk reflects the volatility of the stock market and the exchange rate risk in relation to the euro.
  - a high level of performance risk: the level of the risk reflects the volatility of the stock market and the exchange rate risk in relation to the euro.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

## 2.2. Balance sheet

| Balance sheet layout |                                                                   | 28/02/2026<br>(in Czech koruna) | 28/02/2025<br>(in Czech koruna) |

Risk warning: Past performance is not a guide to future performance.

\* Return on annual basis.

- The bar chart shows the performance for full financial years(period of 12 months prior to the half-yearly closing).
- The figures do not take account of any restructuring..
- Calculated in CZK and in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage.
- Calculation method for date D, where NAV stands for net asset value:  
Capitalisation units (CAP)  
Return on date D over a period of X years :  

$$[\text{NIW}(\text{D}) / \text{NIW}(\text{Y})] ^ {1 / \text{X}} - 1$$
 where Y = D-X  
 Return on date D since the start date S of the unit:  

$$[\text{NIW}(\text{D}) / \text{NIW}(\text{S})] ^ {1 / \text{F}} - 1$$
 where F = 1 if the unit has existed for less than one year on date D  
 where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D
- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation shares.

## 2.4.6. Costs

### Ongoing Charges:

Management fees and other administrative or operating costs: 0,845%  
Transaction costs: 0,000%

Percentage calculated at reporting date: 28 February 2026 (period of 12 months prior to the half-yearly closing).

A more detailed explanation with respect to the method of calculating ongoing charges and the relevant exclusions can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.5. Ongoing charges'

### Existence of Commission Sharing Agreements

Not applicable

### Fee sharing agreements en rebates

The management company has shared 70.00% of its fee with the distributor, and institutional and/or professional parties.

This percentage has been calculated relative to the fee for managing the investment portfolio of the sub-fund when it was launched.

## 2.4.7. Notes to the financial statements and other data

### Fee for managing the investment portfolio

KBC Asset Management NV receives a fee for managing the sub-fund's investments. This fee consists of a varying amount of max. 0.2 CZK per unit per year (with a maximum of CZK per unit per year for risk management).

This fee, which is calculated every six months, is paid monthly on the last banking day of each month. It can change from one six-month period to the next, within the limits set out below, and is based on the number of units issued at the start of each six-month period.

In the calculation, account is taken of the difference between:

- the return generated by the investments in bonds and other debt instruments, deposits, and/or liquid assets in order to achieve the capital protection on the Maturity date (see *The financial mechanism used to achieve capital protection*), and
- the expenses borne by the sub-fund to achieve a potential return (see *Permitted 'swap' transactions*),
- after deducting the expected fixed and variable expenses of the sub-fund, as mentioned above.

Of this, KBC Fund Management Ltd. receives a fee of no more than 0.19 CZK per unit per year from KBC Asset Management NV for the intellectual management of the sub-fund. KBC Fund Management Ltd. is a wholly owned subsidiary of KBC Asset Management NV.

KBC Asset Management NV has informed the bevek that, if due to the failure of the financial mechanism, the amount that should be paid per unit (after deducting taxes and charges) on the Maturity date, as relevant, is lower than the initial subscription price, KBC Asset Management NV may decide (but is not obliged to) to use the management fee it receives during the current financial year from the sub-fund – and possibly also from other sub-funds of the bevek – to cover this shortfall. This is not a guarantee from KBC Asset Management NV, which may

decide at any time and at its own discretion whether or not to use the management fee for this purpose. KBC Asset Management NV or one of its subsidiaries has also been appointed manager of the SPVs in which the sub-fund may invest (see *Criteria the investments must meet*). KBC Asset Management NV or one of its subsidiaries, as the case may be, receives an annual fee from the relevant SPVs for their management. This management fee may not exceed 0.15% per year and is calculated on the assets managed at the end of the quarter.

The sum of (i) the fee for managing the investment portfolio that the sub-fund pays to the management company and (ii) the management fee that the SPVs in which the sub-fund invests pay to the asset manager, shall never exceed 0.20 CZK per unit per year, as described above.

### 2.1. Management report

#### 2.1.1. Launch date and subscription price

|                             |                |
|-----------------------------|----------------|
| Launch date:                | 3 March 2025   |
| Initial subscription price: | 10 CZK         |
| Maturity date:              | 30 August 2030 |
| Currency:                   | CZK            |

#### 2.1.2. Stock exchange listing

Not applicable.

#### 2.1.3. Goal and key principles of the investment policy

##### Object of the sub-fund

The object of the sub-fund is twofold (before deducting charges and taxes):

- (1) To repay per share the initial subscription price of 10 CZK at Maturity.(i.e. the capital protection). This capital protection is provided through a financial mechanism that will be explained in more detail under the heading *Capital protection*. However, the capital protection does not apply to shareholders who sell their shares before Maturity.
- (2) To provide a potential return through an investment in swaps. The various types of swaps in which the sub-fund may invest are explained in more detail under the *Potential return*.

##### Capital Protection

###### The financial mechanism used to achieve capital protection

The financial mechanism used to achieve capital protection at Maturity consists of an investment of the total amount of the subscriptions in bonds and other debt instruments, deposits and/or liquid assets (including cash deposited on a time-deposit account or current account). These investments can have different maturities and coupon payment dates. Using the swaps described under the heading *Permitted swap transactions* (2), these investments are matched with the due dates of the obligations of the sub-fund.

###### Criteria the investments must meet

The investments must meet one of the following criteria:

- (1) An investment in deposits and/or debt instruments, placed with or issued by financial institutions under the prudential supervision of and established in a Member State of the European Economic Area.
- (2) An investment in debt instruments issued or guaranteed by a Member State of the European Economic Area.
- (3) An investment under an investment strategy with an analogous structure and identical counterparty risk as a direct investment in deposits and/or debt instruments as stated under (1) and (2) above.

The investments under (3) may consist of:

- (A) An investment in notes listed on a stock exchange that are issued by 'Special Purpose Vehicles' (SPVs).

These SPVs are managed by KBC Asset Management NV or a subsidiary.

The underlying assets of the bonds issued by the SPVs consist of a diversified portfolio of deposits issued by financial institutions, bonds, other debt instruments and financial derivatives. When selecting these underlying assets, account is taken of criteria relating to allocation and creditworthiness (see *Permitted asset classes* and *Characteristics of the bonds and other debt instruments*) in order to limit the counterparty risk.

Further details of the criteria these underlying deposits, bonds, other debt instruments and financial derivatives must meet are provided in the base prospectuses for the SPVs, which can be viewed at or downloaded from [www.kbc.be/prospectus/spv](http://www.kbc.be/prospectus/spv).

Investors are provided with information on the investments made by both the sub-fund and the SPVs in the annual and half-yearly reports on the open-ended investment company under Belgian law (bevek) to which the sub-fund belongs. These reports can also be viewed at or downloaded from [www.kbc.be](http://www.kbc.be).

- (B) An investment in:
- deposits with financial institutions under prudential supervision in the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia and/or
  - debt instruments issued by financial institutions under prudential supervision in the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia and/or
  - debt instruments issued or guaranteed by the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia.

Prudential supervision of financial institutions in the United Kingdom, Switzerland, the United States of America, Japan, Canada and Australia can be equated to prudential supervision of financial institutions in the member states of the European Economic Area.

The investments in debt instruments issued by financial institutions under prudential supervision in the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia or issued or guaranteed by the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia have a minimum credit rating as set out under the heading *Characteristics of the bonds and other debt instruments*.

- (C) The investments may also consist of a combination of the investments specified under (A) and (B).

### **No formal guarantee**

No formal guarantee of repayment of the initial subscription price is provided to the sub-fund or to its shareholders. In other words, the capital protection is not binding for the sub-fund as regards the result generated, although achieving this objective through the operation of the financial mechanism is still the top priority.

If the financial mechanism fails and, as a result, the amount per share payable (before deducting charges and taxes) at Maturity is lower than the initial subscription price, KBC Asset Management NV may decide (but is not obliged) to use the management fee it has received during the current financial year from the sub-fund – and possibly also from other sub-funds of the bevek – to cover the shortfall. This is not a guarantee from KBC Asset Management NV, which may decide at any time and at its own discretion whether or not to use the management fee for this purpose.

The capital protection does not apply to shareholders who sell their shares before Maturity.

### **Potential return**

To achieve a potential return, the sub-fund concludes swaps with one or more prime counterparties. Consequently, the sub-fund transfers a portion of the future income from the investments that were made to achieve capital protection to this counterparty (these counterparties) during the life of the sub-fund. In exchange, the counterparty (counterparties) undertake to provide a potential return as specified under the heading *Selected strategy*.

### **Sub-fund's investment policy**

#### **Permitted asset classes**

Pursuant to the provisions of the Royal Decree of 12 November 2012 on undertakings for collective investment complying with the conditions of Directive 2009/65/EC, the sub-fund may invest in transferable securities (including bonds and other debt instruments), money market instruments, units (shares) in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as and to the extent permitted by the applicable legislation.

The investment limits and restrictions set out in the Royal Decree of 12 November 2012 on undertakings for collective investment complying with the conditions of Directive 2009/65/EC will be respected at all times.

### **Characteristics of the bonds and other debt instruments**

During the sub-fund's life, the average credit rating of the bonds and other debt instruments shall be at least 'A-' from Standard & Poor's or an equivalent rating from Moody's or Fitch, or, if there is no credit rating available, an average credit risk profile that the manager considers to be at least equivalent.

At the start of the investment, the credit rating of the long-term bonds and other debt instruments shall be at least 'A-' from Standard & Poor's or an equivalent rating from Moody's or Fitch, or, if there is no credit rating available, a credit risk profile that the manager considers to be at least equivalent.

At the start of the investment, the credit rating of the short-term bonds and other debt instruments shall be at least 'A-1' from Standard & Poor's or an equivalent rating from Moody's or Fitch, or, if there is no credit rating available, a credit risk profile that the manager considers to be at least equivalent.

When selecting the bonds and other debt instruments, all maturities are taken into consideration.

### Permitted swap transactions

**The swaps described below have been concluded with a prime counterparty or prime counterparties within the limits laid down by law.**

(1) To achieve a potential return, the sub-fund concludes swaps. Under such swap contracts, the sub-fund transfers a portion of the future income from the investments described under the heading 'Permitted asset classes' to the counterparty or counterparties during the life of the sub-fund. In exchange, the counterparty or counterparties undertake to provide a potential return as specified under the heading *Selected strategy*.

**The swaps under (1) are essential to achieve the sub-fund's investment objectives, since this technique facilitates achievement of the goal of generating a potential return.**

**The sub-fund's risk profile is not affected by the use of these swaps.**

(2) If necessary, the sub-fund also concludes swaps to match the due dates of the commitments of the sub-fund with those of the cash flows stemming from the deposits, bonds and other debt instruments described under the heading *Criteria the investments must meet*.

**These swaps are essential to achieve the sub-fund's investment objectives, since there are not enough bonds and other debt instruments available on the market whose coupon payments and maturity dates always perfectly match the due dates of the sub-fund's obligations.**

**The sub-fund's risk profile is not affected by the use of these swaps.**

(3) In addition, the sub-fund may conclude swaps to protect itself against the credit risk in respect of issuers of bonds and other debt instruments. Through this type of swap, one or more counterparties takes over the risk of an issuer of a bond or other debt instrument in the sub-fund's portfolio defaulting, in exchange for a fee payable by the sub-fund.

**The swaps under (3) serve to hedge the credit risk.**

**The sub-fund's risk profile is not affected by the use of these swaps.**

### Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

### Strategie selected

#### Investment objectives and strategy:

The sub-fund has two investment objectives: firstly, it seeks to pay back at Maturity at least 100% of the initial subscription price, and secondly, to generate a potential capital gain that is contingent on the evolution of a basket of 30 shares of a worldwide selection of companies that are characterised by a high market capitalisation.

If the End Value of the basket of 30 shares of a worldwide selection of companies that are characterised by a high market capitalisation has risen relative to its Minimum Starting Value, 100% of the increase  $(= (\text{Value at Maturity} - \text{Minimum Starting Value}) / \text{Initial Value})$  will be taken into account at Maturity with regard to 100% of the initial subscription price. The capital gain is capped at 80% (yield to maturity of 11.33% before taxes and charges). Negative performances of the basket are not taken into account.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

### Transparency of adverse sustainability impacts

The sub-fund took into account the principal adverse impacts of its investment decisions on sustainability factors ("PAI") as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on disclosure on sustainability in the financial services sector ("SFDR") through KBC Group's Investment Policy and KBC Group Policy on Blacklisted Companies.

Based on the KBC Group Policy on Blacklisted Companies, all companies on the 'KBC Group Blacklist' (including companies involved in controversial weapons such as those prohibited by Belgian law and white phosphorus weapons) are excluded as well as the worst offenders of the UN Global Compact.

Consequently, the sub-fund took into account exposure to controversial weapons ('indicator 14') by excluding companies dealing with controversial weapon systems, and violations of the principles of the UN Global Compact or the Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises ('indicator 10') by excluding the worst offenders of the UN Global Compact.

### Maturity

Friday 30 August 2030 (payment with a value date of D+1 banking day)

## Currency

CZK, for all shares in the basket, changes in the value of the currency in which they are expressed relative to CZK are irrelevant. The investor pays the subscription amount in CZK and will be paid in CZK at Maturity (or earlier). The investor is not protected against any decline in the value of the currency in which the sub-fund is denominated relative to the euro.

## Starting Value

Value of the basket based on the weighted average of the Value of the shares included in the basket during the first 10 Valuation Days, starting from Monday 10 March 2025 inclusive.

## Minimum Starting Value

The lowest value of the Starting Value and the lowest Value of the basket on the Initial Observation Days and is always lower than or equal to the Starting Value.

## Initial Observation Dates

The first Valuation Day of each month from and including April 2025 up to and including March 2026 (inclusive).

## End Value

Value of the basket based on the weighted average of the Value of the shares included in the basket on the last Valuation Day of the month for the last 18 months before Maturity, more specifically from February 2029 through July 2030 (inclusive).

## Value

For all the shares, except for those listed on the Milan stock exchange, the closing price, namely the price of a share in the basket as calculated and notified at closing of the stock exchange by the authority of the stock exchange on which the share is listed (or its legal successor). The reference price is used for shares listed on the Milan stock exchange.

## Valuation day

A Valuation Day is set separately for each share in the basket.

A Valuation Day is a day that is a planned trading day both

- i) for the stock exchange on which the share is listed and
- ii) for the stock exchange whose activities have a substantial influence on the trading of options and futures on the share concerned

hereinafter referred to as 'the stock exchanges concerned'.

If on the Valuation Day,

- a) one of the stock exchanges concerned is unexpectedly closed or
- b) there is an event that disrupts the market for a stock exchange concerned or
- c) one of the stock exchanges concerned closes early,

the original Valuation Day is replaced by the following trading day when no event as referred to in a), b) or c) above occurs. An extraordinary closure that has been announced in advance is not considered as early closure.

If a valuation is made on consecutive Valuation Days, the trading day that replaces the original Valuation Day (i) may not coincide with another original Valuation Day and (ii) may not be a trading day that already replaces another original Valuation Day.

However, if an event as referred to under a), b) or c) above occurs on each of the eight trading days following the original Valuation Day,

- (i) the eighth trading day shall be considered as the original Valuation Day and
- (ii) the Bevek shall assess, in good faith and in consultation with the prime counterparty or counterparties with which it has concluded a swap agreement, the price of the share as it would have been traded on that eighth trading day and
- (iii) the Bevek will notify shareholders of any changes regarding setting the Starting Value and/or End Value and conditions of payment.

### Relevant basket

In the table below, the columns from left to right reflect the number of the share, the name of the share, the Bloomberg code, the exchange on which it trades (City-MIC Code) and its initial weighting in the basket.

| (i) | Name                              | Bloomberg Code   | Exchange          | Initial Weighting Coefficients |
|-----|-----------------------------------|------------------|-------------------|--------------------------------|

### Basket composition methodology

KBC Asset Management used the following methodology to determine the composition of the sub-fund's basket.

#### Step 1 :

The starting point is the global equities universe from which a selection of potential investments is derived in accordance with the economic criteria for the composition of the basket and subject to restrictions regarding stock market capitalisation and liquid assets.

The economic criteria for the composition of the basket determine the size of the final selection.

#### Step 2 :

The selection of shares obtained in step 1 is reduced to a short list using a quantitative selection based on past financial data. The shares selected are those of companies that achieve a good score in terms of management quality, a healthy balance-sheet structure and a positive trend in profitability.

#### Step 3 :

The selection of shares obtained in step 2 is then verified by KBC Asset Management analysts. Shares that are permanently monitored by the analysts and those for which there is a negative recommendation, when the product is launched, are then withdrawn from the selection.

#### Step 4 :

The last reduction of the selection provides the final basket. This selection was made using the technical parameters of options (including the term, volatility, dividend yield and interest rate).

The final basket must satisfy the legal requirements concerning the quantity of shares and adequate distribution in the weighting. In addition, care is taken to ensure compliance with the geographical and/or sector spread. The analysts make a qualitative assessment of each share used taking account of specific knowledge of these shares and the sectors/regions from which they come, in accordance with the term of the sub-fund.

For the sub-fund Optimum Fund ČSOB Lookback 4, about 1710 equities were selected during step 1.

The initial selection was reduced by a maximum 20% in step 2.

This was again reduced by 10% (indicative) in step 3. The final basket set up during step 4 is described above under *Relevant basket*. This basket makes it possible to offer the sub-fund Optimum Fund ČSOB Lookback 4 under the conditions set out in the investment policy referred to above. Here the selection process uses parameters that could affect the potential return on the investments.

#### *Selection criteria for the basket :*

A share/issuer may only form part of the basket if (i) it is listed on a stock exchange, (ii) it has a high market capitalisation, (iii) the Board of Directors of the Beveik has approved its inclusion in the basket, (iv) the issuer is not included in the KBC Group Policy on Blacklisted Companies\* and (v) at the time the swap contracts are being concluded (see 'Permitted swap transactions'), the issuer of the share complies with the KBC Group Investment Policy\* (the 'Selection criteria').

\* The KBC Group Policy on Blacklisted Companies and the KBC Group Investment Policy can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > General exclusion policies for conventional funds and socially responsible investment funds, Paragraph 1 'KBC Group Policy on Blacklisted Companies' and 2 'KBC Group Investment Policy'.

### **Modifications to the basket due to mergers, acquisitions, demergers, nationalisation, bankruptcy or disqualification :**

#### **Mergers or acquisitions**

If, during the life of the sub-fund, one or more issuers of shares in the basket are involved in a merger or acquisition, the shares of the relevant issuers which still meet the selection criteria and comply with the KBC Group Investment Policy\* after these operations will be given a weighting in the basket equal to the sum of the weightings of the shares of all issuers involved in the operation. If, after the operation, none of the issuers involved in the operation meet the selection criteria or comply with the KBC Group Investment Policy\*, the procedures described under 'Nationalisation, bankruptcy or disqualification' will apply.

\* The KBC Group Investment Policy can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > General exclusion policies for conventional funds and responsible investment funds, Paragraph 2 'KBC Group Investment Policy'.

#### **Demergers**

If an issuer of a share in the basket proceeds to a demerger, then the share from the issuer concerned can be substituted either by one of the shares that came about as a result of the demerger and that meets the selection criteria and complies with the KBC Group Investment Policy\*, or by a basket of shares arising from the demerger which meet the selection criteria and comply with the KBC Group Investment Policy\*. This basket of shares will, when calculating the number of shares in the basket, be considered as one share. If, after the operation, none of the shares resulting from the demerger meet the selection criteria or comply with the KBC Group Investment Policy\*, the procedures described under 'Nationalisation, bankruptcy or disqualification' will apply.

\* The KBC Group Investment Policy can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > General exclusion policies for conventional funds and responsible investment funds, Paragraph 2 'KBC Group Investment Policy'.

#### **Nationalisation, bankruptcy or disqualification**

If an issuer of a share in the basket is nationalised, declared bankrupt or no longer meets the selection criteria ('disqualification'), this share will be sold at the last known price before removal. The amount thus realised will then be invested until Maturity at the rate of interest in force on money or bond markets at the moment of removal, and this for a term equal to the term remaining until Maturity of the sub-fund. The realised amount plus the interest will be taken into account at Maturity as the result achieved for that share in order to calculate the final increase in the value of the basket at Maturity.

#### **Volatility of the net asset value**

The volatility of the net asset value may be high due to the composition of the portfolio.

#### **Securities Financing Transactions (SFTs)**

The sub-fund may not lend any financial instruments.

#### **General strategy for hedging the exchange risk**

A more detailed explanation can be found in this report's General information on the Beveik under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

## Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'

### 2.1.4. Financial portfolio management

The intellectual management, with the exception of the creation of the sub-fund and its maintenance in terms of the technical, product-specific and legal aspects has been delegated by the management company to KBC Fund Management Limited, 4th Floor, Scotch House, 6/7 Burgh Quay, Dublin 2, D02 VK44, Ireland.

### 2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

### 2.1.6. Index and benchmark

Not applicable

### 2.1.7. Policy pursued during the financial year

### **2.1.8. Summary risk indicator**

- 2 on a scale of 1 (lowest risk) to 7 (highest risk)
- a moderate level of inflation risk: there is no protection against an increase of the inflation.
  - a high level of market risk: the level of the risk reflects the volatility of the stock market and the exchange rate risk in relation to the euro.
  - a high level of performance risk: the level of the risk reflects the volatility of the stock market and the exchange rate risk in relation to the euro.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

## 2.2. Balance sheet

## 2.4.5. Performance figures

BE6357146578

Optimum Fund ČSOB Lookback 4 CAP

Annual performance from through 28/02/2026 (in CZK)

The cumulative returns are shown where they relate to a period of at least one year.

If the results are expressed in a currency other than the euro, the return may be higher or lower due to exchange rate fluctuations.

## 2.4.6. Costs

### Ongoing Charges:

Not applicable

### Existence of Commission Sharing Agreements

Not applicable

### Fee sharing agreements en rebates

The management company has shared 70.00% of its fee with the distributor, and institutional and/or professional parties.

This percentage has been calculated relative to the fee for managing the investment portfolio of the sub-fund when it was launched.

## 2.4.7. Notes to the financial statements and other data

|                                                                                                          |                                                                                                                                                                                                     |                                                                                                                                                                                                                                                                                                        |

### Fee for managing the investment portfolio

KBC Asset Management NV receives a fee for managing the sub-fund's investments. This fee consists of a varying amount of max. 0.2 CZK per unit per year (with a maximum of CZK per unit per year for risk management).

This fee, which is calculated every six months, is paid monthly on the last banking day of each month. It can change from one six-month period to the next, within the limits set out below, and is based on the number of units issued at the start of each six-month period.

In the calculation, account is taken of the difference between:

- the return generated by the investments in bonds and other debt instruments, deposits, and/or liquid assets in order to achieve the capital protection on the Maturity date (see *The financial mechanism used to achieve capital protection*), and
- the expenses borne by the sub-fund to achieve a potential return (see *Permitted 'swap' transactions*),
- after deducting the expected fixed and variable expenses of the sub-fund, as mentioned above.

Of this, KBC Fund Management Ltd. receives a fee of no more than 0.19 CZK per unit per year from KBC Asset Management NV for the intellectual management of the sub-fund. KBC Fund Management Ltd. is a wholly owned subsidiary of KBC Asset Management NV.

KBC Asset Management NV has informed the bevek that, if due to the failure of the financial mechanism, the amount that should be paid per unit (after deducting taxes and charges) on the Maturity date, as relevant, is lower than the initial subscription price, KBC Asset Management NV may decide (but is not obliged to) to use the management fee it receives during the current financial year from the sub-fund – and possibly also from other sub-funds of the bevek – to cover this shortfall. This is not a guarantee from KBC Asset Management NV, which may decide at any time and at its own discretion whether or not to use the management fee for this purpose.

KBC Asset Management NV or one of its subsidiaries has also been appointed manager of the SPVs in which the sub-fund may invest (see *Criteria the investments must meet*). KBC Asset Management NV or one of its subsidiaries, as the case may be, receives an annual fee from the relevant SPVs for their management. This management fee may not exceed 0.15% per year and is calculated on the assets managed at the end of the quarter.

The sum of (i) the fee for managing the investment portfolio that the sub-fund pays to the management company and (ii) the management fee that the SPVs in which the sub-fund invests pay to the asset manager, shall never exceed 0.20 CZK per unit per year, as described above.

| Currency:                   | CZK              |

#### 2.1.2. Stock exchange listing

Not applicable.

#### 2.1.3. Goal and key principles of the investment policy

##### Object of the sub-fund

The object of the sub-fund is twofold (before deducting charges and taxes):

- (1) To repay per share the initial subscription price of 10 CZK at Maturity.(i.e. the capital protection). This capital protection is provided through a financial mechanism that will be explained in more detail under the heading *Capital protection*. However, the capital protection does not apply to shareholders who sell their shares before Maturity.
- (2) To provide a potential return through an investment in swaps. The various types of swaps in which the sub-fund may invest are explained in more detail under the *Potential return*.

##### Capital Protection

###### The financial mechanism used to achieve capital protection

The financial mechanism used to achieve capital protection at Maturity consists of an investment of the total amount of the subscriptions in bonds and other debt instruments, deposits and/or liquid assets (including cash deposited on a time-deposit account or current account). These investments can have different maturities and coupon payment dates. Using the swaps described under the heading *Permitted swap transactions* (2), these investments are matched with the due dates of the obligations of the sub-fund.

###### Criteria the investments must meet

The investments must meet one of the following criteria:

- (1) An investment in deposits and/or debt instruments, placed with or issued by financial institutions under the prudential supervision of and established in a Member State of the European Economic Area.
- (2) An investment in debt instruments issued or guaranteed by a Member State of the European Economic Area.
- (3) An investment under an investment strategy with an analogous structure and identical counterparty risk as a direct investment in deposits and/or debt instruments as stated under (1) and (2) above.

The investments under (3) may consist of:

- (A) An investment in notes listed on a stock exchange that are issued by 'Special Purpose Vehicles' (SPVs).

These SPVs are managed by KBC Asset Management NV or a subsidiary.

The underlying assets of the bonds issued by the SPVs consist of a diversified portfolio of deposits issued by financial institutions, bonds, other debt instruments and financial derivatives. When selecting these underlying assets, account is taken of criteria relating to allocation and creditworthiness (see *Permitted asset classes* and *Characteristics of the bonds and other debt instruments*) in order to limit the counterparty risk.

Further details of the criteria these underlying deposits, bonds, other debt instruments and financial derivatives must meet are provided in the base prospectuses for the SPVs, which can be viewed at or downloaded from [www.kbc.be/prospectus/spv](http://www.kbc.be/prospectus/spv).

Investors are provided with information on the investments made by both the sub-fund and the SPVs in the annual and half-yearly reports on the open-ended investment company under Belgian law (bevek) to which the sub-fund belongs. These reports can also be viewed at or downloaded from [www.kbc.be](http://www.kbc.be).

- (B) An investment in:
- deposits with financial institutions under prudential supervision in the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia and/or
  - debt instruments issued by financial institutions under prudential supervision in the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia and/or
  - debt instruments issued or guaranteed by the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia.

Prudential supervision of financial institutions in the United Kingdom, Switzerland, the United States of America, Japan, Canada and Australia can be equated to prudential supervision of financial institutions in the member states of the European Economic Area.

The investments in debt instruments issued by financial institutions under prudential supervision in the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia or issued or guaranteed by the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia have a minimum credit rating as set out under the heading *Characteristics of the bonds and other debt instruments*.

- (C) The investments may also consist of a combination of the investments specified under (A) and (B).

### **No formal guarantee**

No formal guarantee of repayment of the initial subscription price is provided to the sub-fund or to its shareholders. In other words, the capital protection is not binding for the sub-fund as regards the result generated, although achieving this objective through the operation of the financial mechanism is still the top priority.

If the financial mechanism fails and, as a result, the amount per share payable (before deducting charges and taxes) at Maturity is lower than the initial subscription price, KBC Asset Management NV may decide (but is not obliged) to use the management fee it has received during the current financial year from the sub-fund – and possibly also from other sub-funds of the bevek – to cover the shortfall. This is not a guarantee from KBC Asset Management NV, which may decide at any time and at its own discretion whether or not to use the management fee for this purpose.

The capital protection does not apply to shareholders who sell their shares before Maturity.

### **Potential return**

To achieve a potential return, the sub-fund concludes swaps with one or more prime counterparties. Consequently, the sub-fund transfers a portion of the future income from the investments that were made to achieve capital protection to this counterparty (these counterparties) during the life of the sub-fund. In exchange, the counterparty (counterparties) undertake to provide a potential return as specified under the heading *Selected strategy*.

### **Sub-fund's investment policy**

#### **Permitted asset classes**

Pursuant to the provisions of the Royal Decree of 12 November 2012 on undertakings for collective investment complying with the conditions of Directive 2009/65/EC, the sub-fund may invest in transferable securities (including bonds and other debt instruments), money market instruments, units (shares) in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as and to the extent permitted by the applicable legislation.

The investment limits and restrictions set out in the Royal Decree of 12 November 2012 on undertakings for collective investment complying with the conditions of Directive 2009/65/EC will be respected at all times.

#### **Characteristics of the bonds and other debt instruments**

During the sub-fund's life, the average credit rating of the bonds and other debt instruments shall be at least 'A-' from Standard & Poor's or an equivalent rating from Moody's or Fitch, or, if there is no credit rating available, an average credit risk profile that the manager considers to be at least equivalent.

At the start of the investment, the credit rating of the long-term bonds and other debt instruments shall be at least 'A-' from Standard & Poor's or an equivalent rating from Moody's or Fitch, or, if there is no credit rating available, a credit risk profile that the manager considers to be at least equivalent.

At the start of the investment, the credit rating of the short-term bonds and other debt instruments shall be at least 'A-1' from Standard & Poor's or an equivalent rating from Moody's or Fitch, or, if there is no credit rating available, a credit risk profile that the manager considers to be at least equivalent.

When selecting the bonds and other debt instruments, all maturities are taken into consideration.

### Permitted swap transactions

**The swaps described below have been concluded with a prime counterparty or prime counterparties within the limits laid down by law.**

(1) To achieve a potential return, the sub-fund concludes swaps. Under such swap contracts, the sub-fund transfers a portion of the future income from the investments described under the heading 'Permitted asset classes' to the counterparty or counterparties during the life of the sub-fund. In exchange, the counterparty or counterparties undertake to provide a potential return as specified under the heading *Selected strategy*.

**The swaps under (1) are essential to achieve the sub-fund's investment objectives, since this technique facilitates achievement of the goal of generating a potential return.**

**The sub-fund's risk profile is not affected by the use of these swaps.**

(2) If necessary, the sub-fund also concludes swaps to match the due dates of the commitments of the sub-fund with those of the cash flows stemming from the deposits, bonds and other debt instruments described under the heading *Criteria the investments must meet*.

**These swaps are essential to achieve the sub-fund's investment objectives, since there are not enough bonds and other debt instruments available on the market whose coupon payments and maturity dates always perfectly match the due dates of the sub-fund's obligations.**

**The sub-fund's risk profile is not affected by the use of these swaps.**

(3) In addition, the sub-fund may conclude swaps to protect itself against the credit risk in respect of issuers of bonds and other debt instruments. Through this type of swap, one or more counterparties takes over the risk of an issuer of a bond or other debt instrument in the sub-fund's portfolio defaulting, in exchange for a fee payable by the sub-fund.

**The swaps under (3) serve to hedge the credit risk.**

**The sub-fund's risk profile is not affected by the use of these swaps.**

### Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

### Strategie selected

#### Investment objectives and strategy:

The sub-fund has two investment objectives: firstly, it seeks to pay back at Maturity at least 100% of the initial subscription price, and secondly, to generate a potential capital gain that is contingent on the evolution of a basket of 30 shares of American companies.

If the End Value of the basket of 30 shares of American companies has risen relative to its Minimum Starting Value, 80% of the increase  $(= (\text{Value at Maturity} - \text{Minimum Starting Value}) / \text{Initial Value})$  will be taken into account at Maturity with regard to 100% of the initial subscription price. The capital gain is capped at 50% (yield to maturity of 7.80% before taxes and charges). Negative performances of the basket are not taken into account.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

### Transparency of adverse sustainability impacts

The sub-fund took into account the principal adverse impacts of its investment decisions on sustainability factors ("PAI") as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on disclosure on sustainability in the financial services sector ("SFDR") through KBC Group's Investment Policy and KBC Group Policy on Blacklisted Companies.

Based on the KBC Group Policy on Blacklisted Companies, all companies on the 'KBC Group Blacklist' (including companies involved in controversial weapons such as those prohibited by Belgian law and white phosphorus weapons) are excluded as well as the worst offenders of the UN Global Compact.

Consequently, the sub-fund took into account exposure to controversial weapons ('indicator 14') by excluding companies dealing with controversial weapon systems, and violations of the principles of the UN Global Compact or the Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises ('indicator 10') by excluding the worst offenders of the UN Global Compact.

### Maturity

Friday 29 November 2030 (payment with a value date of D+1 banking day)

## Currency

CZK, for all shares in the basket, changes in the value of the currency in which they are expressed relative to CZK are irrelevant. The investor pays the subscription amount in CZK and will be paid in CZK at Maturity (or earlier). The investor is not protected against any decline in the value of the currency in which the sub-fund is denominated relative to the euro.

## Starting Value

Value of the basket based on the weighted average of the Value of the shares included in the basket during the first 10 Valuation Days, starting from Tuesday 8 July 2025 inclusive.

## Minimum Starting Value

The lowest value of the Starting Value and the lowest Value of the basket on the Initial Observation Days and is always lower than or equal to the Starting Value.

## Initial Observation Dates

The first Valuation Day of each month from and including August 2025 up to and including January 2026 (inclusive).

## End Value

Value of the basket based on the weighted average of the Value of the shares included in the basket on the last Valuation Day of the month for the last 18 months before Maturity, more specifically from May 2029 through October 2030 (inclusive).

## Value

For all the shares, except for those listed on the Milan stock exchange, the closing price, namely the price of a share in the basket as calculated and notified at closing of the stock exchange by the authority of the stock exchange on which the share is listed (or its legal successor). The reference price is used for shares listed on the Milan stock exchange.

## Valuation day

A Valuation Day is set separately for each share in the basket.

A Valuation Day is a day that is a planned trading day both

- i) for the stock exchange on which the share is listed and
- ii) for the stock exchange whose activities have a substantial influence on the trading of options and futures on the share concerned

hereinafter referred to as 'the stock exchanges concerned'.

If on the Valuation Day,

- a) one of the stock exchanges concerned is unexpectedly closed or
- b) there is an event that disrupts the market for a stock exchange concerned or
- c) one of the stock exchanges concerned closes early,

the original Valuation Day is replaced by the following trading day when no event as referred to in a), b) or c) above occurs. An extraordinary closure that has been announced in advance is not considered as early closure.

If a valuation is made on consecutive Valuation Days, the trading day that replaces the original Valuation Day (i) may not coincide with another original Valuation Day and (ii) may not be a trading day that already replaces another original Valuation Day.

However, if an event as referred to under a), b) or c) above occurs on each of the eight trading days following the original Valuation Day,

- (i) the eighth trading day shall be considered as the original Valuation Day and
- (ii) the Bevek shall assess, in good faith and in consultation with the prime counterparty or counterparties with which it has concluded a swap agreement, the price of the share as it would have been traded on that eighth trading day and
- (iii) the Bevek will notify shareholders of any changes regarding setting the Starting Value and/or End Value and conditions of payment.

### Relevant basket

In the table below, the columns from left to right reflect the number of the share, the name of the share, the Bloomberg code, the exchange on which it trades (City-MIC Code) and its initial weighting in the basket.

| (i) | Name                              | Bloomberg Code | Exchange        | Initial Weighting Coefficients |

### Basket composition methodology

KBC Asset Management used the following methodology to determine the composition of the sub-fund's basket.

#### Step 1 :

The starting point is the global equities universe from which a selection of potential investments is derived in accordance with the economic criteria for the composition of the basket and subject to restrictions regarding stock market capitalisation and liquid assets.

The economic criteria for the composition of the basket determine the size of the final selection.

#### Step 2 :

The selection of shares obtained in step 1 is reduced to a short list using a quantitative selection based on past financial data. The shares selected are those of companies that achieve a good score in terms of management quality, a healthy balance-sheet structure and a positive trend in profitability.

#### Step 3 :

The selection of shares obtained in step 2 is then verified by KBC Asset Management analysts. Shares that are permanently monitored by the analysts and those for which there is a negative recommendation, when the product is launched, are then withdrawn from the selection.

#### Step 4 :

The last reduction of the selection provides the final basket. This selection was made using the technical parameters of options (including the term, volatility, dividend yield and interest rate).

The final basket must satisfy the legal requirements concerning the quantity of shares and adequate distribution in the weighting. In addition, care is taken to ensure compliance with the geographical and/or sector spread. The analysts make a qualitative assessment of each share used taking account of specific knowledge of these shares and the sectors/regions from which they come, in accordance with the term of the sub-fund.

For the sub-fund Optimum Fund ČSOB Lookback Amerika 1, about 1710 equities were selected during step 1.

The initial selection was reduced by a maximum 20% in step 2.

This was again reduced by 10% (indicative) in step 3. The final basket set up during step 4 is described above under *Relevant basket*. This basket makes it possible to offer the sub-fund Optimum Fund ČSOB Lookback Amerika 1 under the conditions set out in the investment policy referred to above. Here the selection process uses parameters that could affect the potential return on the investments.

#### *Selection criteria for the basket :*

A share/issuer may only form part of the basket if (i) it is listed on a stock exchange, (ii) it is an American company with a high market capitalisation, (iii) the Board of Directors of the Beveik has approved its inclusion in the basket, (iv) the issuer is not included in the KBC Group Policy on Blacklisted Companies\* and (v) at the time the swap contracts are being concluded (see 'Permitted swap transactions'), the issuer of the share complies with the KBC Group Investment Policy\* (the 'Selection criteria').

\* The KBC Group Policy on Blacklisted Companies and the KBC Group Investment Policy can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > General exclusion policies for conventional funds and socially responsible investment funds, Paragraph 1 'KBC Group Policy on Blacklisted Companies' and 2 'KBC Group Investment Policy'.

### **Modifications to the basket due to mergers, acquisitions, demergers, nationalisation, bankruptcy or disqualification :**

#### **Mergers or acquisitions**

If, during the life of the sub-fund, one or more issuers of shares in the basket are involved in a merger or acquisition, the shares of the relevant issuers which still meet the selection criteria and comply with the KBC Group Investment Policy\* after these operations will be given a weighting in the basket equal to the sum of the weightings of the shares of all issuers involved in the operation. If, after the operation, none of the issuers involved in the operation meet the selection criteria or comply with the KBC Group Investment Policy\*, the procedures described under 'Nationalisation, bankruptcy or disqualification' will apply.

\* The KBC Group Investment Policy can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > General exclusion policies for conventional funds and responsible investment funds, Paragraph 2 'KBC Group Investment Policy'.

#### **Demergers**

If an issuer of a share in the basket proceeds to a demerger, then the share from the issuer concerned can be substituted either by one of the shares that came about as a result of the demerger and that meets the selection criteria and complies with the KBC Group Investment Policy\*, or by a basket of shares arising from the demerger which meet the selection criteria and comply with the KBC Group Investment Policy\*. This basket of shares will, when calculating the number of shares in the basket, be considered as one share. If, after the operation, none of the shares resulting from the demerger meet the selection criteria or comply with the KBC Group Investment Policy\*, the procedures described under 'Nationalisation, bankruptcy or disqualification' will apply.

\* The KBC Group Investment Policy can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > General exclusion policies for conventional funds and responsible investment funds, Paragraph 2 'KBC Group Investment Policy'.

#### **Nationalisation, bankruptcy or disqualification**

If an issuer of a share in the basket is nationalised, declared bankrupt or no longer meets the selection criteria ('disqualification'), this share will be sold at the last known price before removal. The amount thus realised will then be invested until Maturity at the rate of interest in force on money or bond markets at the moment of removal, and this for a term equal to the term remaining until Maturity of the sub-fund. The realised amount plus the interest will be taken into account at Maturity as the result achieved for that share in order to calculate the final increase in the value of the basket at Maturity.

#### **Volatility of the net asset value**

The volatility of the net asset value may be high due to the composition of the portfolio.

#### **Securities Financing Transactions (SFTs)**

The sub-fund may not lend any financial instruments.

#### **General strategy for hedging the exchange risk**

A more detailed explanation can be found in this report's General information on the Beveik under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

## Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'

### 2.1.4. Financial portfolio management

The intellectual management, with the exception of the creation of the sub-fund and its maintenance in terms of the technical, product-specific and legal aspects has been delegated by the management company to KBC Fund Management Limited, 4th Floor, Scotch House, 6/7 Burgh Quay, Dublin 2, D02 VK44, Ireland.

### 2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

### 2.1.6. Index and benchmark

Not applicable

### 2.1.7. Policy pursued during the financial year

### **2.1.8. Summary risk indicator**

- 2 on a scale of 1 (lowest risk) to 7 (highest risk)
- a moderate level of inflation risk: there is no protection against an increase of the inflation.
  - a moderate level of concentration risk: there is a concentration of the investments in the shares of US companies.
  - a high level of market risk: the level of the risk reflects the volatility of the stock market and the exchange rate risk in relation to the euro.
  - a high level of performance risk: the level of the risk reflects the volatility of the stock market.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

\*The financial year does not coincide with the calendar year.

## 2.4.5. Performance figures

BE6360432452

Optimum Fund ČSOB Lookback Amerika 1 CAP

Annual performance from through 28/02/2026 (in CZK)

The cumulative returns are shown where they relate to a period of at least one year.

If the results are expressed in a currency other than the euro, the return may be higher or lower due to exchange rate fluctuations.

## 2.4.6. Costs

### Ongoing Charges:

Not applicable

### Existence of Commission Sharing Agreements

Not applicable

### Fee sharing agreements en rebates

The management company has shared 70.00% of its fee with the distributor, and institutional and/or professional parties.

This percentage has been calculated relative to the fee for managing the investment portfolio of the sub-fund when it was launched.

## 2.4.7. Notes to the financial statements and other data

|                                                                                                          |                                                                                                                                                                                                     |                                                                                                                                                                                                                                                                                                        |

### Fee for managing the investment portfolio

KBC Asset Management NV receives a fee for managing the sub-fund's investments. This fee consists of a varying amount of max. 0.2 CZK per unit per year (with a maximum of CZK per unit per year for risk management).

This fee, which is calculated every six months, is paid monthly on the last banking day of each month. It can change from one six-month period to the next, within the limits set out below, and is based on the number of units issued at the start of each six-month period.

In the calculation, account is taken of the difference between:

- the return generated by the investments in bonds and other debt instruments, deposits, and/or liquid assets in order to achieve the capital protection on the Maturity date (see *The financial mechanism used to achieve capital protection*), and
- the expenses borne by the sub-fund to achieve a potential return (see *Permitted 'swap' transactions*),
- after deducting the expected fixed and variable expenses of the sub-fund, as mentioned above.

Of this, KBC Fund Management Ltd. receives a fee of no more than 0.19 CZK per unit per year from KBC Asset Management NV for the intellectual management of the sub-fund. KBC Fund Management Ltd. is a wholly owned subsidiary of KBC Asset Management NV.

KBC Asset Management NV has informed the bevek that, if due to the failure of the financial mechanism, the amount that should be paid per unit (after deducting taxes and charges) on the Maturity date, as relevant, is lower than the initial subscription price, KBC Asset Management NV may decide (but is not obliged to) to use the management fee it receives during the current financial year from the sub-fund – and possibly also from other sub-funds of the bevek – to cover this shortfall. This is not a guarantee from KBC Asset Management NV, which may decide at any time and at its own discretion whether or not to use the management fee for this purpose.

KBC Asset Management NV or one of its subsidiaries has also been appointed manager of the SPVs in which the sub-fund may invest (see *Criteria the investments must meet*). KBC Asset Management NV or one of its subsidiaries, as the case may be, receives an annual fee from the relevant SPVs for their management. This management fee may not exceed 0.15% per year and is calculated on the assets managed at the end of the quarter.

The sum of (i) the fee for managing the investment portfolio that the sub-fund pays to the management company and (ii) the management fee that the SPVs in which the sub-fund invests pay to the asset manager, shall never exceed 0.20 CZK per unit per year, as described above.

#### 2.1.2. Stock exchange listing

Not applicable.

#### 2.1.3. Goal and key principles of the investment policy

##### Object of the sub-fund

The object of the sub-fund is twofold (before deducting charges and taxes):

- (1) To repay per share the initial subscription price of 10 CZK at Maturity.(i.e. the capital protection). This capital protection is provided through a financial mechanism that will be explained in more detail under the heading *Capital protection*. However, the capital protection does not apply to shareholders who sell their shares before Maturity.
- (2) To provide a potential return through an investment in swaps. The various types of swaps in which the sub-fund may invest are explained in more detail under the *Potential return*.

##### Capital Protection

###### The financial mechanism used to achieve capital protection

The financial mechanism used to achieve capital protection at Maturity consists of an investment of the total amount of the subscriptions in bonds and other debt instruments, deposits and/or liquid assets (including cash deposited on a time-deposit account or current account). These investments can have different maturities and coupon payment dates. Using the swaps described under the heading *Permitted swap transactions* (2), these investments are matched with the due dates of the obligations of the sub-fund.

##### Criteria the investments must meet

The investments must meet one of the following criteria:

- (1) An investment in deposits and/or debt instruments, placed with or issued by financial institutions under the prudential supervision of and established in a Member State of the European Economic Area.
- (2) An investment in debt instruments issued or guaranteed by a Member State of the European Economic Area.
- (3) An investment under an investment strategy with an analogous structure and identical counterparty risk as a direct investment in deposits and/or debt instruments as stated under (1) and (2) above.

The investments under (3) may consist of:

- (A) An investment in notes listed on a stock exchange that are issued by 'Special Purpose Vehicles' (SPVs).

These SPVs are managed by KBC Asset Management NV or a subsidiary.

The underlying assets of the bonds issued by the SPVs consist of a diversified portfolio of deposits issued by financial institutions, bonds, other debt instruments and financial derivatives. When selecting these underlying assets, account is taken of criteria relating to allocation and creditworthiness (see *Permitted asset classes* and *Characteristics of the bonds and other debt instruments*) in order to limit the counterparty risk.

Further details of the criteria these underlying deposits, bonds, other debt instruments and financial derivatives must meet are provided in the base prospectuses for the SPVs, which can be viewed at or downloaded from [www.kbc.be/prospectus/spv](http://www.kbc.be/prospectus/spv).

Investors are provided with information on the investments made by both the sub-fund and the SPVs in the annual and half-yearly reports on the open-ended investment company under Belgian law (bevek) to which the sub-fund belongs. These reports can also be viewed at or downloaded from [www.kbc.be](http://www.kbc.be).

- (B) An investment in:
- deposits with financial institutions under prudential supervision in the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia and/or
  - debt instruments issued by financial institutions under prudential supervision in the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia and/or
  - debt instruments issued or guaranteed by the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia.

Prudential supervision of financial institutions in the United Kingdom, Switzerland, the United States of America, Japan, Canada and Australia can be equated to prudential supervision of financial institutions in the member states of the European Economic Area.

The investments in debt instruments issued by financial institutions under prudential supervision in the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia or issued or guaranteed by the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia have a minimum credit rating as set out under the heading *Characteristics of the bonds and other debt instruments*.

- (C) The investments may also consist of a combination of the investments specified under (A) and (B).

### **No formal guarantee**

No formal guarantee of repayment of the initial subscription price is provided to the sub-fund or to its shareholders. In other words, the capital protection is not binding for the sub-fund as regards the result generated, although achieving this objective through the operation of the financial mechanism is still the top priority.

If the financial mechanism fails and, as a result, the amount per share payable (before deducting charges and taxes) at Maturity is lower than the initial subscription price, KBC Asset Management NV may decide (but is not obliged) to use the management fee it has received during the current financial year from the sub-fund – and possibly also from other sub-funds of the bevek – to cover the shortfall. This is not a guarantee from KBC Asset Management NV, which may decide at any time and at its own discretion whether or not to use the management fee for this purpose.

The capital protection does not apply to shareholders who sell their shares before Maturity.

### **Potential return**

To achieve a potential return, the sub-fund concludes swaps with one or more prime counterparties. Consequently, the sub-fund transfers a portion of the future income from the investments that were made to achieve capital protection to this counterparty (these counterparties) during the life of the sub-fund. In exchange, the counterparty (counterparties) undertake to provide a potential return as specified under the heading *Selected strategy*.

### **Sub-fund's investment policy**

#### **Permitted asset classes**

Pursuant to the provisions of the Royal Decree of 12 November 2012 on undertakings for collective investment complying with the conditions of Directive 2009/65/EC, the sub-fund may invest in transferable securities (including bonds and other debt instruments), money market instruments, units (shares) in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as and to the extent permitted by the applicable legislation.

The investment limits and restrictions set out in the Royal Decree of 12 November 2012 on undertakings for collective investment complying with the conditions of Directive 2009/65/EC will be respected at all times.

### **Characteristics of the bonds and other debt instruments**

During the sub-fund's life, the average credit rating of the bonds and other debt instruments shall be at least 'A-' from Standard & Poor's or an equivalent rating from Moody's or Fitch, or, if there is no credit rating available, an average credit risk profile that the manager considers to be at least equivalent.

At the start of the investment, the credit rating of the long-term bonds and other debt instruments shall be at least 'A-' from Standard & Poor's or an equivalent rating from Moody's or Fitch, or, if there is no credit rating available, a credit risk profile that the manager considers to be at least equivalent.

At the start of the investment, the credit rating of the short-term bonds and other debt instruments shall be at least 'A-1' from Standard & Poor's or an equivalent rating from Moody's or Fitch, or, if there is no credit rating available, a credit risk profile that the manager considers to be at least equivalent.

When selecting the bonds and other debt instruments, all maturities are taken into consideration.

### Permitted swap transactions

**The swaps described below have been concluded with a prime counterparty or prime counterparties within the limits laid down by law.**

(1) To achieve a potential return, the sub-fund concludes swaps. Under such swap contracts, the sub-fund transfers a portion of the future income from the investments described under the heading 'Permitted asset classes' to the counterparty or counterparties during the life of the sub-fund. In exchange, the counterparty or counterparties undertake to provide a potential return as specified under the heading *Selected strategy*.

**The swaps under (1) are essential to achieve the sub-fund's investment objectives, since this technique facilitates achievement of the goal of generating a potential return.**

**The sub-fund's risk profile is not affected by the use of these swaps.**

(2) If necessary, the sub-fund also concludes swaps to match the due dates of the commitments of the sub-fund with those of the cash flows stemming from the deposits, bonds and other debt instruments described under the heading *Criteria the investments must meet*.

**These swaps are essential to achieve the sub-fund's investment objectives, since there are not enough bonds and other debt instruments available on the market whose coupon payments and maturity dates always perfectly match the due dates of the sub-fund's obligations.**

**The sub-fund's risk profile is not affected by the use of these swaps.**

(3) In addition, the sub-fund may conclude swaps to protect itself against the credit risk in respect of issuers of bonds and other debt instruments. Through this type of swap, one or more counterparties takes over the risk of an issuer of a bond or other debt instrument in the sub-fund's portfolio defaulting, in exchange for a fee payable by the sub-fund.

**The swaps under (3) serve to hedge the credit risk.**

**The sub-fund's risk profile is not affected by the use of these swaps.**

### Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

### Strategie selected

#### Investment objectives and strategy:

The sub-fund pursues two investment objectives: the repayment of 100% of the initial subscription price at Maturity as well as a potential capital gain based on the performance of a basket of 30 shares of companies operating in the pharmaceutical and healthcare industries.

At maturity, an increase equal to the best of two alternatives will be paid out:

- 9.00%, settled at 100% of the initial subscription price;
- 80% of the performance in the basket of 30 shares, settled at 100% of the initial subscription price, capped at 80%. The performance of the basket is calculated as ((End Value minus Minimal Starting Value) divided by Starting Value). Negative evolutions in the basket will not be taken into account.

Consequently, the minimum return at maturity will be 9.00% (actuarial yield: 1.59% before fees and taxes) and maximum 80% (actuarial return: 11.36% before costs and taxes).

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

### Transparency of adverse sustainability impacts

The sub-fund took into account the principal adverse impacts of its investment decisions on sustainability factors ("PAI") as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on disclosure on sustainability in the financial services sector ("SFDR") through KBC Group's Investment Policy and KBC Group Policy on Blacklisted Companies.

Based on the KBC Group Policy on Blacklisted Companies, all companies on the 'KBC Group Blacklist' (including companies involved in controversial weapons such as those prohibited by Belgian law and white phosphorus weapons) are excluded as well as the worst offenders of the UN Global Compact.

Consequently, the sub-fund took into account exposure to controversial weapons ('indicator 14') by excluding companies dealing with controversial weapon systems, and violations of the principles of the UN Global Compact or the Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises ('indicator 10') by excluding the worst offenders of the UN Global Compact.

## **Maturity**

Friday 29 June 2029 (payment with a value date of D+1 banking day)

## **Currency**

CZK, for all shares in the basket, changes in the value of the currency in which they are expressed relative to CZK are irrelevant. The investor pays the subscription amount in CZK and will be paid in CZK at Maturity (or earlier). The investor is not protected against any decline in the value of the currency in which the sub-fund is denominated relative to the euro.

## **Starting Value**

Value of the basket based on the weighted average of the Value of the shares included in the basket during the first 10 Valuation Days, starting from Monday 15 January 2024 inclusive.

## **Minimum Starting Value**

The lowest value of the Starting Value and the lowest Value of the basket on the Initial Observation Days and is always lower than or equal to the Starting Value.

## **Initial Observation Dates**

The first Valuation Day of each month from and including February 2024 up to and including October 2024 (inclusive).

## **End Value**

Value of the basket based on the weighted average of the Value of the shares included in the basket on the last Valuation Day of the month for the last 18 months before Maturity, more specifically from December 2027 through May 2029 (inclusive).

## **Value**

For all the shares, except for those listed on the Milan stock exchange, the closing price, namely the price of a share in the basket as calculated and notified at closing of the stock exchange by the authority of the stock exchange on which the share is listed (or its legal successor). The reference price is used for shares listed on the Milan stock exchange.

## **Valuation day**

A Valuation Day is set separately for each share in the basket.

A Valuation Day is a day that is a planned trading day both

- i) for the stock exchange on which the share is listed and
- ii) for the stock exchange whose activities have a substantial influence on the trading of options and futures on the share concerned

hereinafter referred to as 'the stock exchanges concerned'.

If on the Valuation Day,

- a) one of the stock exchanges concerned is unexpectedly closed or
- b) there is an event that disrupts the market for a stock exchange concerned or
- c) one of the stock exchanges concerned closes early,

the original Valuation Day is replaced by the following trading day when no event as referred to in a), b) or c) above occurs. An extraordinary closure that has been announced in advance is not considered as early closure.

If a valuation is made on consecutive Valuation Days, the trading day that replaces the original Valuation Day (i) may not coincide with another original Valuation Day and (ii) may not be a trading day that already replaces another original Valuation Day.

However, if an event as referred to under a), b) or c) above occurs on each of the eight trading days following the original Valuation Day,

- (i) the eighth trading day shall be considered as the original Valuation Day and
- (ii) the Bevek shall assess, in good faith and in consultation with the prime counterparty or counterparties with which it has concluded a swap agreement, the price of the share as it would have been traded on that eighth trading day and
- (iii) the Bevek will notify shareholders of any changes regarding setting the Starting Value and/or End Value and conditions of payment.

### Relevant basket

In the table below, the columns from left to right reflect the number of the share, the name of the share, the Bloomberg code, the exchange on which it trades (City-MIC Code) and its initial weighting in the basket.

| (i) | Name                         | Bloomberg Code  | Exchange          | Initial Weighting Coefficients |
|-----|------------------------------|-----------------|-------------------|--------------------------------|
| 1   | ABBVIE INC                   | ABBV UN Equity  | NEW YORK - XNYS   | 2.0000%                        |
| 2   | AEGON NV                     | AGN NA Equity   | AMSTERDAM - XAMS  | 5.0000%                        |
| 3   | AMGEN (UW)                   | AMGN UW Equity  | NEW YORK - XNGS   | 2.0000%                        |

### Basket composition methodology

KBC Asset Management used the following methodology to determine the composition of the sub-fund's basket.

#### Step 1 :

The starting point is the global equities universe from which a selection of potential investments is derived in accordance with the economic criteria for the composition of the basket and subject to restrictions regarding stock market capitalisation and liquid assets.

The economic criteria for the composition of the basket determine the size of the final selection.

#### Step 2 :

The selection of shares obtained in step 1 is reduced to a short list using a quantitative selection based on past financial data. The shares selected are those of companies that achieve a good score in terms of management quality, a healthy balance-sheet structure and a positive trend in profitability.

#### Step 3 :

The selection of shares obtained in step 2 is then verified by KBC Asset Management analysts. Shares that are permanently monitored by the analysts and those for which there is a negative recommendation, when the product is launched, are then withdrawn from the selection.

#### Step 4 :

The last reduction of the selection provides the final basket. This selection was made using the technical parameters of options (including the term, volatility, dividend yield and interest rate).

The final basket must satisfy the legal requirements concerning the quantity of shares and adequate distribution in the weighting. In addition, care is taken to ensure compliance with the geographical and/or sector spread. The analysts make a qualitative assessment of each share used taking account of specific knowledge of these shares and the sectors/regions from which they come, in accordance with the term of the sub-fund.

For the sub-fund Optimum Fund ČSOB Lookback farmacie a zdravotnictví 1, about 201 equities were selected during step 1.

The initial selection was reduced by a maximum 20% in step 2.

This was again reduced by 10% (indicative) in step 3. The final basket set up during step 4 is described above under *Relevant basket*. This basket makes it possible to offer the sub-fund Optimum Fund ČSOB Lookback farmacie a zdravotnictví 1 under the conditions set out in the investment policy referred to above. Here the selection process uses parameters that could affect the potential return on the investments.

#### *Selection criteria for the basket :*

A share/issuer may only form part of the basket if (i) it is listed on a stock exchange, (ii) the issuer is a company operating in the pharmaceutical or healthcare industry, (iii) the Board of Directors of the Bevek has approved its inclusion in the basket, (iv) the issuer is not included in the KBC Group Policy on Blacklisted Companies\* and (v) at the time the swap contracts are being concluded (see 'Permitted swap transactions'), the issuer of the share complies with the KBC Group Investment Policy\* (the 'Selection criteria').

\* The KBC Group Policy on Blacklisted Companies and the KBC Group Investment Policy can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > General exclusion policies for conventional funds and socially responsible investment funds, Paragraph 1 'KBC Group Policy on Blacklisted Companies' and 2 'KBC Group Investment Policy'.

### **Modifications to the basket due to mergers, acquisitions, demergers, nationalisation, bankruptcy or disqualification :**

#### **Mergers or acquisitions**

If, during the life of the sub-fund, one or more issuers of shares in the basket are involved in a merger or acquisition, the shares of the relevant issuers which still meet the selection criteria and comply with the KBC Group Investment Policy\* after these operations will be given a weighting in the basket equal to the sum of the weightings of the shares of all issuers involved in the operation. If, after the operation, none of the issuers involved in the operation meet the selection criteria or comply with the KBC Group Investment Policy\*, the procedures described under 'Nationalisation, bankruptcy or disqualification' will apply.

\* The KBC Group Investment Policy can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > General exclusion policies for conventional funds and responsible investment funds, Paragraph 2 'KBC Group Investment Policy'.

#### **Demergers**

If an issuer of a share in the basket proceeds to a demerger, then the share from the issuer concerned can be substituted either by one of the shares that came about as a result of the demerger and that meets the selection criteria and complies with the KBC Group Investment Policy\*, or by a basket of shares arising from the demerger which meet the selection criteria and comply with the KBC Group Investment Policy\*. This basket of shares will, when calculating the number of shares in the basket, be considered as one share. If, after the operation, none of the shares resulting from the demerger meet the selection criteria or comply with the KBC Group Investment Policy\*, the procedures described under 'Nationalisation, bankruptcy or disqualification' will apply.

\* The KBC Group Investment Policy can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > General exclusion policies for conventional funds and responsible investment funds, Paragraph 2 'KBC Group Investment Policy'.

#### **Nationalisation, bankruptcy or disqualification**

If an issuer of a share in the basket is nationalised, declared bankrupt or no longer meets the selection criteria ('disqualification'), this share will be sold at the last known price before removal. The amount thus realised will then be invested until Maturity at the rate of interest in force on money or bond markets at the moment of removal, and this for a term equal to the term remaining until Maturity of the sub-fund. The realised amount plus the interest will be taken into account at Maturity as the result achieved for that share in order to calculate the final increase in the value of the basket at Maturity.

#### **Volatility of the net asset value**

The volatility of the net asset value may be high due to the composition of the portfolio.

#### **Securities Financing Transactions (SFTs)**

The sub-fund may not lend any financial instruments.

#### **General strategy for hedging the exchange risk**

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

## Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'

### 2.1.4. Financial portfolio management

The intellectual management, with the exception of the creation of the sub-fund and its maintenance in terms of the technical, product-specific and legal aspects has been delegated by the management company to KBC Fund Management Limited, 4th Floor, Scotch House, 6/7 Burgh Quay, Dublin 2, D02 VK44, Ireland.

### 2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

### 2.1.6. Index and benchmark

Not applicable

### 2.1.7. Policy pursued during the financial year

#### Composition of the basket on report date

| Name                         | Value         |

### 2.1.8. Summary risk indicator

- 2 on a scale of 1 (lowest risk) to 7 (highest risk)
- a moderate level of inflation risk: there is no protection against an increase of the inflation.
  - a moderate level of concentration risk: there is a concentration of the investments in the shares of companies in the pharmaceutical and health care industries.
  - a high level of market risk: the level of the risk reflects the volatility of the stock market and the exchange rate risk in relation to the euro.
  - a high level of performance risk: the level of the risk reflects the volatility of the stock market and the exchange rate risk in relation to the euro.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

## 2.2. Balance sheet

| Balance sheet layout |                                                                   | 28/02/2026<br>(in Czech koruna) | 28/02/2025<br>(in Czech koruna) |

## 2.4.5. Performance figures

BE6346377557

Optimum Fund ČSOB Lookback farmacie a zdravotnictví 1 CAP

Annual performance from 01/03/2024 through 28/02/2026 (in CZK)

If the results are expressed in a currency other than the euro, the return may be higher or lower due to exchange rate fluctuations.

| Cap Div | ISIN Code    | Curr<br>ency | 1 year           |               | 3 years          |               | 5 years          |               | 10 years         |               | Since Launch*    |                  |
|---------|--------------|--------------|------------------|---------------|------------------|---------------|------------------|---------------|------------------|---------------|------------------|------------------|
|         |              |              | Share<br>classes | Bench<br>mark | Share<br>classes | Bench<br>mark | Share<br>classes | Bench<br>mark | Share<br>classes | Bench<br>mark | Starting<br>date | Share<br>classes |

Risk warning: Past performance is not a guide to future performance.

\* Return on annual basis.

- The bar chart shows the performance for full financial years(period of 12 months prior to the half-yearly closing).
- The figures do not take account of any restructuring..
- Calculated in CZK and in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage.
- Calculation method for date D, where NAV stands for net asset value:  
Capitalisation units (CAP)  
Return on date D over a period of X years :  

$$[\text{NIW}(\text{D}) / \text{NIW}(\text{Y})] ^ {1 / \text{X}} - 1$$
 where Y = D-X  
 Return on date D since the start date S of the unit:  

$$[\text{NIW}(\text{D}) / \text{NIW}(\text{S})] ^ {1 / \text{F}} - 1$$
 where F = 1 if the unit has existed for less than one year on date D  
 where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D
- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation shares.

## 2.4.6. Costs

### Ongoing Charges:

Management fees and other administrative or operating costs: 1,020%  
Transaction costs: 0,000%

Percentage calculated at reporting date: 28 February 2026 (period of 12 months prior to the half-yearly closing).

A more detailed explanation with respect to the method of calculating ongoing charges and the relevant exclusions can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.5. Ongoing charges'

### Existence of Commission Sharing Agreements

Not applicable

### Fee sharing agreements en rebates

The management company has shared 70.00% of its fee with the distributor, and institutional and/or professional parties.

This percentage has been calculated relative to the fee for managing the investment portfolio of the sub-fund when it was launched.

### Fee for managing the investment portfolio

KBC Asset Management NV receives a fee for managing the sub-fund's investments. This fee consists of a varying amount of max. 0.2 CZK per unit per year (with a maximum of CZK per unit per year for risk management).

This fee, which is calculated every six months, is paid monthly on the last banking day of each month. It can change from one six-month period to the next, within the limits set out below, and is based on the number of units issued at the start of each six-month period.

In the calculation, account is taken of the difference between:

- the return generated by the investments in bonds and other debt instruments, deposits, and/or liquid assets in order to achieve the capital protection on the Maturity date (see *The financial mechanism used to achieve capital protection*), and
- the expenses borne by the sub-fund to achieve a potential return (see *Permitted 'swap' transactions*),
- after deducting the expected fixed and variable expenses of the sub-fund, as mentioned above.

Of this, KBC Fund Management Ltd. receives a fee of no more than 0.19 CZK per unit per year from KBC Asset Management NV for the intellectual management of the sub-fund. KBC Fund Management Ltd. is a wholly owned subsidiary of KBC Asset Management NV.

KBC Asset Management NV has informed the bevek that, if due to the failure of the financial mechanism, the amount that should be paid per unit (after deducting taxes and charges) on the Maturity date, as relevant, is lower than the initial subscription price, KBC Asset Management NV may decide (but is not obliged to) to use the management fee it receives during the current financial year from the sub-fund – and possibly also from other sub-funds of the bevek – to cover this shortfall. This is not a guarantee from KBC Asset Management NV, which may

decide at any time and at its own discretion whether or not to use the management fee for this purpose. KBC Asset Management NV or one of its subsidiaries has also been appointed manager of the SPVs in which the sub-fund may invest (see *Criteria the investments must meet*). KBC Asset Management NV or one of its subsidiaries, as the case may be, receives an annual fee from the relevant SPVs for their management. This management fee may not exceed 0.15% per year and is calculated on the assets managed at the end of the quarter.

The sum of (i) the fee for managing the investment portfolio that the sub-fund pays to the management company and (ii) the management fee that the SPVs in which the sub-fund invests pay to the asset manager, shall never exceed 0.20 CZK per unit per year, as described above.

| Currency:                   | CZK              |

#### 2.1.2. Stock exchange listing

Not applicable.

#### 2.1.3. Goal and key principles of the investment policy

##### Object of the sub-fund

The object of the sub-fund is twofold (before deducting charges and taxes):

- (1) To repay per share the initial subscription price of 10 CZK at Maturity.(i.e. the capital protection). This capital protection is provided through a financial mechanism that will be explained in more detail under the heading *Capital protection*. However, the capital protection does not apply to shareholders who sell their shares before Maturity.
- (2) To provide a potential return through an investment in swaps. The various types of swaps in which the sub-fund may invest are explained in more detail under the *Potential return*.

##### Capital Protection

###### The financial mechanism used to achieve capital protection

The financial mechanism used to achieve capital protection at Maturity consists of an investment of the total amount of the subscriptions in bonds and other debt instruments, deposits and/or liquid assets (including cash deposited on a time-deposit account or current account). These investments can have different maturities and coupon payment dates. Using the swaps described under the heading *Permitted swap transactions* (2), these investments are matched with the due dates of the obligations of the sub-fund.

##### Criteria the investments must meet

The investments must meet one of the following criteria:

- (1) An investment in deposits and/or debt instruments, placed with or issued by financial institutions under the prudential supervision of and established in a Member State of the European Economic Area.
- (2) An investment in debt instruments issued or guaranteed by a Member State of the European Economic Area.
- (3) An investment under an investment strategy with an analogous structure and identical counterparty risk as a direct investment in deposits and/or debt instruments as stated under (1) and (2) above.

The investments under (3) may consist of:

- (A) An investment in notes listed on a stock exchange that are issued by 'Special Purpose Vehicles' (SPVs).

These SPVs are managed by KBC Asset Management NV or a subsidiary.

The underlying assets of the bonds issued by the SPVs consist of a diversified portfolio of deposits issued by financial institutions, bonds, other debt instruments and financial derivatives. When selecting these underlying assets, account is taken of criteria relating to allocation and creditworthiness (see *Permitted asset classes* and *Characteristics of the bonds and other debt instruments*) in order to limit the counterparty risk.

Further details of the criteria these underlying deposits, bonds, other debt instruments and financial derivatives must meet are provided in the base prospectuses for the SPVs, which can be viewed at or downloaded from [www.kbc.be/prospectus/spv](http://www.kbc.be/prospectus/spv).

Investors are provided with information on the investments made by both the sub-fund and the SPVs in the annual and half-yearly reports on the open-ended investment company under Belgian law (bevek) to which the sub-fund belongs. These reports can also be viewed at or downloaded from [www.kbc.be](http://www.kbc.be).

- (B) An investment in:
- deposits with financial institutions under prudential supervision in the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia and/or
  - debt instruments issued by financial institutions under prudential supervision in the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia and/or
  - debt instruments issued or guaranteed by the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia.

Prudential supervision of financial institutions in the United Kingdom, Switzerland, the United States of America, Japan, Canada and Australia can be equated to prudential supervision of financial institutions in the member states of the European Economic Area.

The investments in debt instruments issued by financial institutions under prudential supervision in the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia or issued or guaranteed by the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia have a minimum credit rating as set out under the heading *Characteristics of the bonds and other debt instruments*.

- (C) The investments may also consist of a combination of the investments specified under (A) and (B).

### **No formal guarantee**

No formal guarantee of repayment of the initial subscription price is provided to the sub-fund or to its shareholders. In other words, the capital protection is not binding for the sub-fund as regards the result generated, although achieving this objective through the operation of the financial mechanism is still the top priority.

If the financial mechanism fails and, as a result, the amount per share payable (before deducting charges and taxes) at Maturity is lower than the initial subscription price, KBC Asset Management NV may decide (but is not obliged) to use the management fee it has received during the current financial year from the sub-fund – and possibly also from other sub-funds of the bevek – to cover the shortfall. This is not a guarantee from KBC Asset Management NV, which may decide at any time and at its own discretion whether or not to use the management fee for this purpose.

The capital protection does not apply to shareholders who sell their shares before Maturity.

### **Potential return**

To achieve a potential return, the sub-fund concludes swaps with one or more prime counterparties. Consequently, the sub-fund transfers a portion of the future income from the investments that were made to achieve capital protection to this counterparty (these counterparties) during the life of the sub-fund. In exchange, the counterparty (counterparties) undertake to provide a potential return as specified under the heading *Selected strategy*.

### **Sub-fund's investment policy**

#### **Permitted asset classes**

Pursuant to the provisions of the Royal Decree of 12 November 2012 on undertakings for collective investment complying with the conditions of Directive 2009/65/EC, the sub-fund may invest in transferable securities (including bonds and other debt instruments), money market instruments, units (shares) in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as and to the extent permitted by the applicable legislation.

The investment limits and restrictions set out in the Royal Decree of 12 November 2012 on undertakings for collective investment complying with the conditions of Directive 2009/65/EC will be respected at all times.

### **Characteristics of the bonds and other debt instruments**

During the sub-fund's life, the average credit rating of the bonds and other debt instruments shall be at least 'A-' from Standard & Poor's or an equivalent rating from Moody's or Fitch, or, if there is no credit rating available, an average credit risk profile that the manager considers to be at least equivalent.

At the start of the investment, the credit rating of the long-term bonds and other debt instruments shall be at least 'A-' from Standard & Poor's or an equivalent rating from Moody's or Fitch, or, if there is no credit rating available, a credit risk profile that the manager considers to be at least equivalent.

At the start of the investment, the credit rating of the short-term bonds and other debt instruments shall be at least 'A-1' from Standard & Poor's or an equivalent rating from Moody's or Fitch, or, if there is no credit rating available, a credit risk profile that the manager considers to be at least equivalent.

When selecting the bonds and other debt instruments, all maturities are taken into consideration.

### Permitted swap transactions

**The swaps described below have been concluded with a prime counterparty or prime counterparties within the limits laid down by law.**

(1) To achieve a potential return, the sub-fund concludes swaps. Under such swap contracts, the sub-fund transfers a portion of the future income from the investments described under the heading 'Permitted asset classes' to the counterparty or counterparties during the life of the sub-fund. In exchange, the counterparty or counterparties undertake to provide a potential return as specified under the heading *Selected strategy*.

**The swaps under (1) are essential to achieve the sub-fund's investment objectives, since this technique facilitates achievement of the goal of generating a potential return.**

**The sub-fund's risk profile is not affected by the use of these swaps.**

(2) If necessary, the sub-fund also concludes swaps to match the due dates of the commitments of the sub-fund with those of the cash flows stemming from the deposits, bonds and other debt instruments described under the heading *Criteria the investments must meet*.

**These swaps are essential to achieve the sub-fund's investment objectives, since there are not enough bonds and other debt instruments available on the market whose coupon payments and maturity dates always perfectly match the due dates of the sub-fund's obligations.**

**The sub-fund's risk profile is not affected by the use of these swaps.**

(3) In addition, the sub-fund may conclude swaps to protect itself against the credit risk in respect of issuers of bonds and other debt instruments. Through this type of swap, one or more counterparties takes over the risk of an issuer of a bond or other debt instrument in the sub-fund's portfolio defaulting, in exchange for a fee payable by the sub-fund.

**The swaps under (3) serve to hedge the credit risk.**

**The sub-fund's risk profile is not affected by the use of these swaps.**

### Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

### Strategie selected

#### Investment objectives and strategy:

The sub-fund has two investment objectives: firstly, it seeks to pay back at Maturity at least 100% of the initial subscription price, and secondly, to generate a potential capital gain that is contingent on the evolution of a basket of 30 shares of companies operating in the pharmaceutical and healthcare industries.

If the End Value of the basket of 30 shares of companies operating in the pharmaceutical and healthcare industries has risen relative to its Minimum Starting Value, 100% of the increase  $(= (\text{Value at Maturity} - \text{Minimum Starting Value}) / \text{Initial Value})$  will be taken into account at Maturity with regard to 100% of the initial subscription price. The capital gain is capped at 100% (yield to maturity of 13.50% before taxes and charges). Negative performances of the basket are not taken into account.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

### Transparency of adverse sustainability impacts

The sub-fund took into account the principal adverse impacts of its investment decisions on sustainability factors ("PAI") as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on disclosure on sustainability in the financial services sector ("SFDR") through KBC Group's Investment Policy and KBC Group Policy on Blacklisted Companies.

Based on the KBC Group Policy on Blacklisted Companies, all companies on the 'KBC Group Blacklist' (including companies involved in controversial weapons such as those prohibited by Belgian law and white phosphorus weapons) are excluded as well as the worst offenders of the UN Global Compact.

Consequently, the sub-fund took into account exposure to controversial weapons ('indicator 14') by excluding companies dealing with controversial weapon systems, and violations of the principles of the UN Global Compact or the Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises ('indicator 10') by excluding the worst offenders of the UN Global Compact.

### Maturity

Thursday 28 February 2030 (payment with a value date of D+1 banking day)

## Currency

CZK, for all shares in the basket, changes in the value of the currency in which they are expressed relative to CZK are irrelevant. The investor pays the subscription amount in CZK and will be paid in CZK at Maturity (or earlier). The investor is not protected against any decline in the value of the currency in which the sub-fund is denominated relative to the euro.

## Starting Value

Value of the basket based on the weighted average of the Value of the shares included in the basket during the first 10 Valuation Days, starting from Monday 9 September 2024 inclusive.

## Minimum Starting Value

The lowest value of the Starting Value and the lowest Value of the basket on the Initial Observation Days and is always lower than or equal to the Starting Value.

## Initial Observation Dates

The first Valuation Day of each month from and including October 2024 up to and including September 2025 (inclusive).

## End Value

Value of the basket based on the weighted average of the Value of the shares included in the basket on the last Valuation Day of the month for the last 18 months before Maturity, more specifically from August 2028 through January 2030 (inclusive).

## Value

For all the shares, except for those listed on the Milan stock exchange, the closing price, namely the price of a share in the basket as calculated and notified at closing of the stock exchange by the authority of the stock exchange on which the share is listed (or its legal successor). The reference price is used for shares listed on the Milan stock exchange.

## Valuation day

A Valuation Day is set separately for each share in the basket.

A Valuation Day is a day that is a planned trading day both

- i) for the stock exchange on which the share is listed and
- ii) for the stock exchange whose activities have a substantial influence on the trading of options and futures on the share concerned

hereinafter referred to as 'the stock exchanges concerned'.

If on the Valuation Day,

- a) one of the stock exchanges concerned is unexpectedly closed or
- b) there is an event that disrupts the market for a stock exchange concerned or
- c) one of the stock exchanges concerned closes early,

the original Valuation Day is replaced by the following trading day when no event as referred to in a), b) or c) above occurs. An extraordinary closure that has been announced in advance is not considered as early closure.

If a valuation is made on consecutive Valuation Days, the trading day that replaces the original Valuation Day (i) may not coincide with another original Valuation Day and (ii) may not be a trading day that already replaces another original Valuation Day.

However, if an event as referred to under a), b) or c) above occurs on each of the eight trading days following the original Valuation Day,

- (i) the eighth trading day shall be considered as the original Valuation Day and
- (ii) the Bevek shall assess, in good faith and in consultation with the prime counterparty or counterparties with which it has concluded a swap agreement, the price of the share as it would have been traded on that eighth trading day and
- (iii) the Bevek will notify shareholders of any changes regarding setting the Starting Value and/or End Value and conditions of payment.

### Relevant basket

In the table below, the columns from left to right reflect the number of the share, the name of the share, the Bloomberg code, the exchange on which it trades (City-MIC Code) and its initial weighting in the basket.

| (i) | Name                         | Bloomberg Code  | Exchange          | Initial Weighting Coefficients |
