### Basket composition methodology

KBC Asset Management used the following methodology to determine the composition of the sub-fund's basket.

#### Step 1 :

The starting point is the global equities universe from which a selection of potential investments is derived in accordance with the economic criteria for the composition of the basket and subject to restrictions regarding stock market capitalisation and liquid assets.

The economic criteria for the composition of the basket determine the size of the final selection.

#### Step 2 :

The selection of shares obtained in step 1 is reduced to a short list using a quantitative selection based on past financial data. The shares selected are those of companies that achieve a good score in terms of management quality, a healthy balance-sheet structure and a positive trend in profitability.

#### Step 3 :

The selection of shares obtained in step 2 is then verified by KBC Asset Management analysts. Shares that are permanently monitored by the analysts and those for which there is a negative recommendation, when the product is launched, are then withdrawn from the selection.

#### Step 4 :

The last reduction of the selection provides the final basket. This selection was made using the technical parameters of options (including the term, volatility, dividend yield and interest rate).

The final basket must satisfy the legal requirements concerning the quantity of shares and adequate distribution in the weighting. In addition, care is taken to ensure compliance with the geographical and/or sector spread. The analysts make a qualitative assessment of each share used taking account of specific knowledge of these shares and the sectors/regions from which they come, in accordance with the term of the sub-fund.

For the sub-fund Optimum Fund ČSOB Lookback farmacie a zdravotnictví 2, about 226 equities were selected during step 1.

The initial selection was reduced by a maximum 20% in step 2.

This was again reduced by 10% (indicative) in step 3. The final basket set up during step 4 is described above under *Relevant basket*. This basket makes it possible to offer the sub-fund Optimum Fund ČSOB Lookback farmacie a zdravotnictví 2 under the conditions set out in the investment policy referred to above. Here the selection process uses parameters that could affect the potential return on the investments.

#### *Selection criteria for the basket :*

A share/issuer may only form part of the basket if (i) it is listed on a stock exchange, (ii) the issuer is a company operating in the pharmaceutical or healthcare industry, (iii) the Board of Directors of the Bevek has approved its inclusion in the basket, (iv) the issuer is not included in the KBC Group Policy on Blacklisted Companies\* and (v) at the time the swap contracts are being concluded (see 'Permitted swap transactions'), the issuer of the share complies with the KBC Group Investment Policy\* (the 'Selection criteria').

\* The KBC Group Policy on Blacklisted Companies and the KBC Group Investment Policy can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > General exclusion policies for conventional funds and socially responsible investment funds, Paragraph 1 'KBC Group Policy on Blacklisted Companies' and 2 'KBC Group Investment Policy'.

### **Modifications to the basket due to mergers, acquisitions, demergers, nationalisation, bankruptcy or disqualification :**

#### **Mergers or acquisitions**

If, during the life of the sub-fund, one or more issuers of shares in the basket are involved in a merger or acquisition, the shares of the relevant issuers which still meet the selection criteria and comply with the KBC Group Investment Policy\* after these operations will be given a weighting in the basket equal to the sum of the weightings of the shares of all issuers involved in the operation. If, after the operation, none of the issuers involved in the operation meet the selection criteria or comply with the KBC Group Investment Policy\*, the procedures described under 'Nationalisation, bankruptcy or disqualification' will apply.

\* The KBC Group Investment Policy can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > General exclusion policies for conventional funds and responsible investment funds, Paragraph 2 'KBC Group Investment Policy'.

#### **Demergers**

If an issuer of a share in the basket proceeds to a demerger, then the share from the issuer concerned can be substituted either by one of the shares that came about as a result of the demerger and that meets the selection criteria and complies with the KBC Group Investment Policy\*, or by a basket of shares arising from the demerger which meet the selection criteria and comply with the KBC Group Investment Policy\*. This basket of shares will, when calculating the number of shares in the basket, be considered as one share. If, after the operation, none of the shares resulting from the demerger meet the selection criteria or comply with the KBC Group Investment Policy\*, the procedures described under 'Nationalisation, bankruptcy or disqualification' will apply.

\* The KBC Group Investment Policy can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > General exclusion policies for conventional funds and responsible investment funds, Paragraph 2 'KBC Group Investment Policy'.

#### **Nationalisation, bankruptcy or disqualification**

If an issuer of a share in the basket is nationalised, declared bankrupt or no longer meets the selection criteria ('disqualification'), this share will be sold at the last known price before removal. The amount thus realised will then be invested until Maturity at the rate of interest in force on money or bond markets at the moment of removal, and this for a term equal to the term remaining until Maturity of the sub-fund. The realised amount plus the interest will be taken into account at Maturity as the result achieved for that share in order to calculate the final increase in the value of the basket at Maturity.

#### **Volatility of the net asset value**

The volatility of the net asset value may be high due to the composition of the portfolio.

#### **Securities Financing Transactions (SFTs)**

The sub-fund may not lend any financial instruments.

#### **General strategy for hedging the exchange risk**

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

## Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'

### 2.1.4. Financial portfolio management

The intellectual management, with the exception of the creation of the sub-fund and its maintenance in terms of the technical, product-specific and legal aspects has been delegated by the management company to KBC Fund Management Limited, 4th Floor, Scotch House, 6/7 Burgh Quay, Dublin 2, D02 VK44, Ireland.

### 2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

### 2.1.6. Index and benchmark

Not applicable

### 2.1.7. Policy pursued during the financial year

#### Composition of the basket on report date

### **2.1.8. Summary risk indicator**

- 3 on a scale of 1 (lowest risk) to 7 (highest risk)
- a moderate level of inflation risk: there is no protection against an increase of the inflation.
  - a moderate level of concentration risk: there is a concentration of the investments in the shares of companies in the pharmaceutical and health care industries.
  - a high level of market risk: the level of the risk reflects the volatility of the stock market and the exchange rate risk in relation to the euro.
  - a high level of performance risk: the level of the risk reflects the volatility of the stock market and the exchange rate risk in relation to the euro.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

## 2.2. Balance sheet

| Balance sheet layout |                                                                   | 28/02/2026<br>(in Czech koruna) | 28/02/2025<br>(in Czech koruna) |

Risk warning: Past performance is not a guide to future performance.

\* Return on annual basis.

- The bar chart shows the performance for full financial years(period of 12 months prior to the half-yearly closing).
- The figures do not take account of any restructuring..
- Calculated in CZK and in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage.
- Calculation method for date D, where NAV stands for net asset value:  
Capitalisation units (CAP)  
Return on date D over a period of X years :  

$$[\text{NIW}(\text{D}) / \text{NIW}(\text{Y})] ^ { [ 1 / \text{X} ] } - 1$$
 where Y = D-X  
 Return on date D since the start date S of the unit:  

$$[\text{NIW}(\text{D}) / \text{NIW}(\text{S})] ^ { [ 1 / \text{F} ] } - 1$$
 where F = 1 if the unit has existed for less than one year on date D  
 where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D
- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation shares.

## 2.4.6. Costs

### Ongoing Charges:

Management fees and other administrative or operating costs: 0,860%  
Transaction costs: 0,000%

Percentage calculated at reporting date: 28 February 2026 (period of 12 months prior to the half-yearly closing).

A more detailed explanation with respect to the method of calculating ongoing charges and the relevant exclusions can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.5. Ongoing charges'

### Existence of Commission Sharing Agreements

Not applicable

### Fee sharing agreements en rebates

The management company has shared 70.00% of its fee with the distributor, and institutional and/or professional parties.

This percentage has been calculated relative to the fee for managing the investment portfolio of the sub-fund when it was launched.

### Fee for managing the investment portfolio

KBC Asset Management NV receives a fee for managing the sub-fund's investments. This fee consists of a varying amount of max. 0.2 CZK per unit per year (with a maximum of CZK per unit per year for risk management).

This fee, which is calculated every six months, is paid monthly on the last banking day of each month. It can change from one six-month period to the next, within the limits set out below, and is based on the number of units issued at the start of each six-month period.

In the calculation, account is taken of the difference between:

- the return generated by the investments in bonds and other debt instruments, deposits, and/or liquid assets in order to achieve the capital protection on the Maturity date (see *The financial mechanism used to achieve capital protection*), and
- the expenses borne by the sub-fund to achieve a potential return (see *Permitted 'swap' transactions*),
- after deducting the expected fixed and variable expenses of the sub-fund, as mentioned above.

Of this, KBC Fund Management Ltd. receives a fee of no more than 0.19 CZK per unit per year from KBC Asset Management NV for the intellectual management of the sub-fund. KBC Fund Management Ltd. is a wholly owned subsidiary of KBC Asset Management NV.

KBC Asset Management NV has informed the bevek that, if due to the failure of the financial mechanism, the amount that should be paid per unit (after deducting taxes and charges) on the Maturity date, as relevant, is lower than the initial subscription price, KBC Asset Management NV may decide (but is not obliged to) to use the management fee it receives during the current financial year from the sub-fund – and possibly also from other sub-funds of the bevek – to cover this shortfall. This is not a guarantee from KBC Asset Management NV, which may

decide at any time and at its own discretion whether or not to use the management fee for this purpose. KBC Asset Management NV or one of its subsidiaries has also been appointed manager of the SPVs in which the sub-fund may invest (see *Criteria the investments must meet*). KBC Asset Management NV or one of its subsidiaries, as the case may be, receives an annual fee from the relevant SPVs for their management. This management fee may not exceed 0.15% per year and is calculated on the assets managed at the end of the quarter.

The sum of (i) the fee for managing the investment portfolio that the sub-fund pays to the management company and (ii) the management fee that the SPVs in which the sub-fund invests pay to the asset manager, shall never exceed 0.20 CZK per unit per year, as described above.

## 2. Information on Optimum Fund ČSOB Odvážný

### 2.1. Management report

#### 2.1.1. Launch date and subscription price

##### **Classic Shares CSOB Private Banking Capitalisation**

Launch date: 31 July 2013

Initial subscription price: 1 000 CZK

Currency: CZK

##### **Classic Shares CSOB Premium Capitalisation**

Launch date: 2 August 2016

Initial subscription price: 1 000 CZK

Currency: CZK

##### **Classic Shares Capitalisation**

Launch date: 3 May 2021

Initial subscription price: 1 000 CZK

Currency: CZK

#### 2.1.2. Stock exchange listing

Not applicable.

#### 2.1.3. Goal and key principles of the investment policy

##### **Object of the sub-fund**

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. The investment policy aims to track the strategy recommended for an investor with a specific risk profile.

##### **Sub-fund's investment policy**

###### ***Permitted asset classes***

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

###### ***Restrictions of the investment policy***

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

## Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. **Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.**

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

## Strategy selected

The sub-fund invests directly or indirectly in various asset classes, such as shares and/or share-related investments ("the stock component"), bonds and/or bond-related investments ("the bond component"), money market instruments, cash and/or alternative investments (including real estate, and financial instruments that are linked to price movements on the commodity market).

The bond component will never exceed 60% of the portfolio and the stock component will never exceed 70% of the portfolio.

The asset allocation follows the investment strategy recommended by CSOB Asset Management for the dynamic investor on the Czech market (see [www.csobam.cz/portal/informace-o-csob-am](http://www.csobam.cz/portal/informace-o-csob-am) > Investiční strategie).

The stock component is invested in a worldwide selection of shares that may come from any region, sector or theme.

For details of the bond component, please see the 'Characteristics of the bonds and debt instruments' section below.

The currency risk of the assets of the sub-fund relative to the CZK can be fully or partially hedged and currency exposure can be taken in any currency and in any direction up to the level of the equity component in accordance with the investment strategy recommended by CSOB Asset Management.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

## Transparency of adverse sustainability impacts

The sub-fund took into account the principal adverse impacts of its investment decisions on sustainability factors ("PAI"), as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on Sustainability Disclosures in the Financial Services Sector ("SFDR") through the General exclusion Policy and implicitly through the Proxy Voting and Engagement Policy.

The principal adverse impacts on sustainability taken into account through the General exclusion policy were exposure to controversial weapons ('indicator 14'), exposure to companies active in the fossil fuel sector ('indicator 4') and Violations of the principles of the UN Global Compact or the Organization for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises ('indicator 10').

The principal adverse impacts on sustainability implicitly taken into account through KBC Asset Management Group's the Proxy Voting and Engagement Policy were greenhouse gas emissions ('indicator 1'), carbon footprint ('indicator 2'), greenhouse gas intensity of investee companies ('indicator 3'), exposure to fossil fuel companies

('indicator 4') and gender diversity on the board of directors ('indicator 13').

### **Benchmark information**

The fund is actively managed with reference to the following benchmark: 22.5% JP Morgan GBI Czech Republic 1-5Y CZK - Total Return Index, 4.5% JP Morgan EMU Investment Grade 1-5Y CZK Hedged - Total Return Index, 2.25% JP Morgan EMBI CZK Hedged - Total Return Index, 2.25% JP Morgan GBI EM Global Diversified CZK - Total Return Index, 13.5% iBoxx Eur Corporates 1-5 Y CZK Hedged - Total Return Index, 55% MSCI All Countries World CZK Hedged - Net Return Index.

However, is not the aim of the fund to replicate the benchmark. The composition of the benchmark is taken into account when compiling the portfolio.

The composition of the portfolio will to a large extent be similar to that of the benchmark.

The benchmark is also used to assess the performance of the sub-fund.

The benchmark is also used to determine the fund's risk limitation mechanism. This limits the extent to which the fund's return may deviate from the benchmark.

The longterm expected tracking error for this fund is 2.00%. The tracking error measures the volatility of the fund's return relative to that of the benchmark. The higher the tracking error, the more the fund's return fluctuates relative to the benchmark. Market conditions may cause the actual tracking error to differ from the expected tracking error.

### **Characteristics of the bonds and debt instruments**

The sub-fund invests in bonds and debt instruments issued by both companies and public authorities.

The sub-fund invests directly and/or indirectly at least 50% of its assets in bonds and debt instruments

- in securities rated investment grade (at least BBB-/Baa3 for long-term debt, A3/F3/P3 for short-term debt) by at least one of the following rating agencies:

Moody's Investors Service, Standard & Poor's or Fitch Ratings, and/or

- in government bonds issued in local currency or non-subordinated corporate bonds\* which do not have a credit rating from the rating agencies mentioned above but the issuer of which has investment grade rating by at least one of the rating agencies mentioned above, and/or

- in money market instruments whose issuer has an investment grade rating (minimum A3/F3/P3 for short-term debt) from at least one of the above rating agencies.

This means that the Sub-fund may invest up to 50% of its assets invested in bonds and debt instruments that do not have a credit rating from the above-mentioned rating agencies and/or which do not comply with the above-mentioned credit requirements.

All maturities are taken into consideration in the selection of bonds and debt instruments.

\*In the event of the bankruptcy of the relevant issuer, subordinated bonds are subordinated to the company's other debts: the company's other debts are paid first, then and only if there is still capital left, the holders of the subordinated bonds are fully or partially repaid; the holder of the subordinated bond does, however, have priority over the shareholders of the issuer in question.

## **Investments in assets other than securities or money market instruments**

**The sub-fund will primarily invest in units in Undertakings for Collective Investment.**

### **Securities Financing Transactions (SFTs)**

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.1. Securities Financing Transactions (SFTs)'.

### **General strategy for hedging the exchange risk**

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

### **Social, ethical and environmental aspects**

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'.

## **2.1.4. Financial portfolio management**

The intellectual management, with the exception of the creation of the sub-fund and its maintenance in terms of the technical, product-specific and legal aspects has been delegated by the management company to CSOB Asset Management a.s. investiční společnost, Radlicka 333/150, 150 57, Praha 5, Czech Republic.

## **2.1.5. Distributors**

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

## **2.1.6. Index and benchmark**

See 'Sub-fund's investment policy'.

## **2.1.7. Policy pursued during the financial year**

Currently we're neutral in our equity allocation after we reduced our bets due to the Iran war. The conflict risks higher oil prices for some time to come and the resulting spike in inflation joined with a roadblock to the economic growth may completely shift the narrative in the equity markets worldwide. The longer the strait of Hormuz is closed, the more pain is inflicted upon economies worldwide, from the emerging markets in Asia to the developed Western European countries.

From the regional point of view, we're still overweight Emerging markets and Europe against underweights in Pacific and North America. Within sectors we're most overweight in Materials, Financials and Technology. On the other hand, we're underweight Consumer Staples and Consumer Discretionary.

On the fixed-income side we're currently buyers of the Czech duration, where the yields seem attractive to us. We're slightly overweight in modified duration.

*There is limited exposure to Russian and/or Ukrainian positions. The main risk related to the Russian-Ukrainian conflict is market and performance risks, as we observe increased volatility in global financial markets. Obviously, countries, sectors and companies more closely linked to the conflict are more heavily impacted than others.*

*The SICAV held positions in International Investment Bank ("IIB"), which have been revalued to CZK 0.01 due to the entity becoming subject to financial sanctions.*

*As a consequence of these sanctions, IIB is unable to make payments under standard payment arrangements and therefore has been deprived of the possibility to fulfil obligations to bondholders, creditors and clients.*

## **2.1.8. Future policy**

We're wary of the current Iran conflict and the repercussions it may have on the global energy prices and, consequently on the economic growth worldwide. The longer this goes on, the more chances that central banks around the world will need to raise rates to battle higher prices. We're cautiously optimistic this will end sooner than later. Sector allocation is currently more positioned towards cyclical than towards defensives.

On the bond side, after taking some profit on long duration calls, we reduced our modified duration just before the conflict started. In the meanwhile, yields jumped up and we've increased our duration overweight again to take advantage of higher and more attractive yields. We also think that corporate bonds, especially from the high yield category, could be a good choice to increase risk/return of the fund.

### 2.1.9. Summary risk indicator (SRI)

Classic Shares CSOB Private Banking: 3 on a scale of 1 (lowest risk) to 7 (highest risk)

- a moderate level of inflation risk: the bond component does not provide any protection against an increase in inflation.
- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Czech Koruna, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of market risk: the level of the risk reflects the volatility of the equity component.
- a moderate level of performance risk: the level of the risk reflects the volatility of the equity component.

There is no capital protection.

Classic Shares CSOB Premium: 3 on a scale of 1 (lowest risk) to 7 (highest risk)

- a moderate level of inflation risk: the bond component does not provide any protection against an increase in inflation.
- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Czech Koruna, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of market risk: the level of the risk reflects the volatility of the equity component.
- a moderate level of performance risk: the level of the risk reflects the volatility of the equity component.

There is no capital protection.

Classic Shares: 3 on a scale of 1 (lowest risk) to 7 (highest risk)

- a moderate level of inflation risk: the bond component does not provide any protection against an increase in inflation.
- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Czech Koruna, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of market risk: the level of the risk reflects the volatility of the equity component.
- a moderate level of performance risk: the level of the risk reflects the volatility of the equity component.

There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

## 2.2. Balance sheet

| Balance sheet layout |                                                                   | 28/02/2026<br>(in Czech koruna) | 28/02/2025<br>(in Czech koruna) |

## 2.4.2. Changes in the composition of the assets of Optimum Fund ČSOB Odvážný (in Czech koruna)

|                                        | <b>1<sup>st</sup> half of year</b> |
|----------------------------------------|------------------------------------|
| <b>Purchases</b>                       | 4,323,015,765.88                   |
| <b>Sales</b>                           | 3,089,360,704.63                   |
| <b>Total 1</b>                         | 7,412,376,470.52                   |
| <b>Subscriptions</b>                   | 1,824,747,356.04                   |
| <b>Redemptions</b>                     | 445,267,539.44                     |
| <b>Total 2</b>                         | 2,270,014,895.48                   |
| <b>Monthly average of total assets</b> | 11,595,490,122.97                  |
| <b>Turnover rate</b>                   | 44.35%                             |

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period. A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions. A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio. Active asset management may result in high turnover rates (monthly percentage >50%).

The detailed list of transactions can be consulted free of charge at the company designated as financial service:  
KBC Bank NV, Havenlaan 2, B-1080 Brussels

### **2.4.3. Amount of commitments in respect of financial derivatives positions**

## 2.4.5. Performance figures

### Classic Shares CSOB Private Banking

BE6252470446

Optimum Fund ČSOB Odvážný Classic Shares CSOB Private Banking CAP

Annual performance compared to the benchmark from 01/03/2016 through 28/02/2026 (in CZK)

If the results are expressed in a currency other than the euro, the return may be higher or lower due to exchange rate fluctuations.

\* These performances were achieved under circumstances that no longer apply

| Cap Div | ISIN Code    | Curr<br>ency | 1 year           |               | 3 years          |               | 5 years          |               | 10 years         |               | Since Launch*    |                  |

Risk warning: Past performance is not a guide to future performance.

\* Return on annual basis.

### Classic Shares CSOB Private Banking

- The bar chart shows the performance for full financial years (period of 12 months prior to the half-yearly closing).
- The figures do not take account of any restructuring..
- Calculated in CZK and in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage.
- Calculation method for date D, where NAV stands for net asset value:  
Capitalisation units (CAP)  
 Return on date D over a period of X years :  

$$[\text{NIW}(D) / \text{NIW}(Y)]^{1/X} - 1$$
 where  $Y = D - X$   
 Return on date D since the start date S of the unit:  

$$[\text{NIW}(D) / \text{NIW}(S)]^{1/F} - 1$$
 where  $F = 1$  if the unit has existed for less than one year on date D  
 where  $F = (D - S) / 365.25$  if the unit has existed for longer than one year on date D
- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation shares.

- Calculated in CZK and in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage.
- Calculation method for date D, where NAV stands for net asset value:  
Capitalisation units (CAP)  
 Return on date D over a period of X years :  

$$[\text{NIW}(\text{D}) / \text{NIW}(\text{Y})]^{[1 / \text{X}] - 1}$$
 where  $\text{Y} = \text{D} - \text{X}$   
 Return on date D since the start date S of the unit:  

$$[\text{NIW}(\text{D}) / \text{NIW}(\text{S})]^{[1 / \text{F}] - 1}$$
 where  $\text{F} = 1$  if the unit has existed for less than one year on date D  
 where  $\text{F} = (\text{D} - \text{S}) / 365.25$  if the unit has existed for longer than one year on date D
- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation shares.

## 2.4.6. Costs

### Ongoing Charges:

#### Classic Shares CSOB Private Banking Capitalisation :

Management fees and other administrative or operating costs: 1,310%  
Transaction costs: 0,605%

#### Classic Shares CSOB Premium Capitalisation :

Management fees and other administrative or operating costs: 1,467%  
Transaction costs: 0,605%

#### Classic Shares Capitalisation :

Management fees and other administrative or operating costs: 1,566%  
Transaction costs: 0,610%

Percentage calculated at reporting date: 28 February 2026 (period of 12 months prior to the half-yearly closing).

A more detailed explanation with respect to the method of calculating ongoing charges and the relevant exclusions can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.5. Ongoing charges'

### Existence of Commission Sharing Agreements

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.7. Commission Sharing Agreements'.

No CSA accrual during this period.

### Existence of fee sharing agreements and rebates

The management company has shared 69,96% of its fee with the distributor, and institutional and/or professional parties.

If the management company invests the assets of the undertaking for collective investment in units of undertakings for collective investment that are not managed by an entity of KBC Groep NV, and receives a fee for doing so, it will pay this fee to the undertaking for collective investment.

Fee-sharing does not affect the amount of the management fee paid by a **sub-fund** to the management company. This management fee is subject to the limitations laid down in **the articles of association**. The limitations may only be amended after approval by the General Meeting.

## 2.4.7. Notes to the financial statements and other data

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

### Financial derivatives on financial indices

The following financial indices were used as the underlying for financial derivatives::

**The EURO STOXX 50® (Bloomberg code: SX5E Index)** is a weighted equity index computed by Stoxx Ltd. The dividend is not reinvested. The main purpose of this index is to provide a continuous indication of market trends on the European stock markets. The base value of the index is 1000, calculated on the basis of the underlying prices recorded on 31 December 1991.

The Euro Stoxx 50® consists solely of shares from countries participating in the Economic and Monetary Union, with the exception of Luxembourg. On 10 April 1998, the following countries were included in the index: Belgium, Cyprus, Germany, Estonia, Finland, France, Greece, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, the Netherlands, Austria, Portugal, Slovakia, Slovenia and Spain.

The index consists of the 50 largest European shares in terms of shares that are freely negotiable, and the shares are accordingly weighted on the basis of this criterion.

The Euro Stoxx 50® is published daily in L'Echo, De Tijd, The Financial Times and The Wall Street Journal Europe.

Stoxx Limited has all proprietary rights with respect to the index. In no way Stoxx Limited endorses, sponsors or is otherwise involved in the issue and offering the shares of Optimum Fund ČSOB Odvážný. Stoxx Limited disclaims any liability for the issue and offering of the shares of this undertaking for collective investment.

The **S&P 500** is an equity index computed by Standard & Poor's that is made up of 500 shares. The dividend is not reinvested. The S&P 500 serves primarily as a continuous indicator of market trends on the US stock markets. The value of the S&P 500 index is calculated on the basis of the market value of the shares of 500 companies at a given point in time, compared to the market value of the shares of 500 similar companies during the reference period from 1941 to 1943. The index is published daily in L'Echo, De Tijd, The Financial Times and The Wall Street Journal Europe.

Standard & Poor's has all proprietary rights with respect to the index. In no way Standard & Poor's endorses, sponsors or is otherwise involved in the issue and offering the shares of this undertaking for collective investment. Standard & Poor's disclaims any liability for the issue and offering of the shares of this undertaking for collective investment.

The value and, if available for distribution, the composition of the aforementioned financial indices may be obtained from the branches providing the financial service.

Initial subscription price: 1 000 CZK

Currency: CZK

#### 2.1.2. Stock exchange listing

Not applicable.

#### 2.1.3. Goal and key principles of the investment policy

##### Object of the sub-fund

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. The investment policy aims to track the strategy recommended for an investor with a specific risk profile.

##### Sub-fund's investment policy

###### *Permitted asset classes*

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

###### *Restrictions of the investment policy*

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

## Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. **Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.**

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

## Strategy selected

The sub-fund invests directly or indirectly in various asset classes, such as shares and/or share-related investments ("the stock component"), bonds and/or bond-related investments ("the bond component"), money market instruments, cash and/or alternative investments (including real estate, and financial instruments that are linked to price movements on the commodity market).

The bond component will never exceed 85% of the portfolio and the the stock component will never exceed 45% of the portfolio.

The asset allocation follows the investment strategy recommended by CSOB Asset Management for the defensive investor on the Czech market (see [www.csobam.cz/portal/informace-o-csob-am](http://www.csobam.cz/portal/informace-o-csob-am)> Investiční strategie).

The stock component is invested in a worldwide selection of shares that may come from any region, sector or theme.

For details of the bond component, please see the 'Characteristics of the bonds and debt instruments' section below.

The currency risk of the assets of the sub-fund relative to the CZK can be fully or partially hedged and currency exposure can be taken in any currency and in any direction up to the level of the equity component in accordance with the investment strategy recommended by CSOB Asset Management.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

## Transparency of adverse sustainability impacts

The sub-fund took into account the principal adverse impacts of its investment decisions on sustainability factors ("PAI"), as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on Sustainability Disclosures in the Financial Services Sector ("SFDR") through the General exclusion Policy and implicitly through the Proxy Voting and Engagement Policy.

The principal adverse impacts on sustainability taken into account through the General exclusion policy were exposure to controversial weapons ('indicator 14'), exposure to companies active in the fossil fuel sector ('indicator 4') and Violations of the principles of the UN Global Compact or the Organization for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises ('indicator 10').

The principal adverse impacts on sustainability implicitly taken into account through KBC Asset Management Group's the Proxy Voting and Engagement Policy were greenhouse gas emissions ('indicator 1'), carbon footprint ('indicator 2'), greenhouse gas intensity of investee companies ('indicator 3'), exposure to fossil fuel companies

('indicator 4') and gender diversity on the board of directors ('indicator 13').

### **Benchmark information**

The fund is actively managed with reference to the following benchmark: 32.5% JP Morgan GBI Czech Republic 1-5Y CZK - Total Return Index, 6.5% JP Morgan EMU Investment Grade 1-5Y CZK Hedged - Total Return Index, 3.25% JP Morgan EMBI CZK Hedged - Total Return Index, 3.25% JP Morgan GBI EM Global Diversified CZK - Total Return Index, 19.5% iBoxx Eur Corporates 1-5 Y CZK Hedged - Total Return Index, 35% MSCI All Countries World CZK Hedged - Net Return Index.

However, is not the aim of the fund to replicate the benchmark. The composition of the benchmark is taken into account when compiling the portfolio.

The composition of the portfolio will to a large extent be similar to that of the benchmark.

The benchmark is also used to assess the performance of the sub-fund.

The benchmark is also used to determine the fund's risk limitation mechanism. This limits the extent to which the fund's return may deviate from the benchmark.

The longterm expected tracking error for this fund is 1.50%. The tracking error measures the volatility of the fund's return relative to that of the benchmark. The higher the tracking error, the more the fund's return fluctuates relative to the benchmark. Market conditions may cause the actual tracking error to differ from the expected tracking error.

### **Characteristics of the bonds and debt instruments**

The sub-fund invests in bonds and debt instruments issued by both companies and public authorities.

The sub-fund invests directly and/or indirectly at least 50% of its assets in bonds and debt instruments

- in securities rated investment grade (at least BBB-/Baa3 for long-term debt, A3/F3/P3 for short-term debt) by at least one of the following rating agencies:

Moody's Investors Service, Standard & Poor's or Fitch Ratings, and/or

- in government bonds issued in local currency or non-subordinated corporate bonds\* which do not have a credit rating from the rating agencies mentioned above but the issuer of which has investment grade rating by at least one of the rating agencies mentioned above, and/or

- in money market instruments whose issuer has an investment grade rating (minimum A3/F3/P3 for short-term debt) from at least one of the above rating agencies.

This means that the Sub-fund may invest up to 50% of its assets invested in bonds and debt instruments that do not have a credit rating from the above-mentioned rating agencies and/or which do not comply with the above-mentioned credit requirements.

All maturities are taken into consideration in the selection of bonds and debt instruments.

\*In the event of the bankruptcy of the relevant issuer, subordinated bonds are subordinated to the company's other debts: the company's other debts are paid first, then and only if there is still capital left, the holders of the subordinated bonds are fully or partially repaid; the holder of the subordinated bond does, however, have priority over the shareholders of the issuer in question.

### **Investments in assets other than securities or money market instruments**

The sub-fund will invest primarily in units of undertakings for collective investment.

### **Securities Financing Transactions (SFTs)**

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.1. Securities Financing Transactions (SFTs)'.

### **General strategy for hedging the exchange risk**

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

### **Social, ethical and environmental aspects**

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'.

## **2.1.4. Financial portfolio management**

The intellectual management, with the exception of the creation of the sub-fund and its maintenance in terms of the technical, product-specific and legal aspects has been delegated by the management company to CSOB Asset Management a.s. investiční společnost, Radlicka 333/150 , 150 57 , Praha 5, Czech Republic.

## **2.1.5. Distributors**

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

## **2.1.6. Index and benchmark**

See 'Sub-fund's investment policy'.

## **2.1.7. Policy pursued during the financial year**

Currently we're neutral in our equity allocation after we reduced our bets due to the Iran war. The conflict risks higher oil prices for some time to come and the resulting spike in inflation joined with a roadblock to the economic growth may completely shift the narrative in the equity markets worldwide. The longer the strait of Hormuz is closed, the more pain is inflicted upon economies worldwide, from the emerging markets in Asia to the developed Western European countries.

From the regional point of view, we're still overweight Emerging markets and Europe against underweights in Pacific and North America. Within sectors we're most overweight in Materials, Financials and Technology. On the other hand, we're underweight Consumer Staples and Consumer Discretionary.

On the fixed-income side we're currently buyers of the Czech duration, where the yields seem attractive to us. We're slightly overweight in modified duration.

The position in the following funds represented more than 25% of the number of units outstanding of that sub-fund:

- 25.73% in KBC Interest Fund CZK Omega
- 53.33% in Optimum Fund CSOB Kratkodobych dluhopisu
- 48.34% in KBC Institutional Fund Euro Corporate Bonds ex Financials

In accordance with answer 4(a) of the European Securities and Markets Authority (ESMA) document 'Questions and Answers on the Application of the UCITS Directive', the management company shall assess a rebalancing of the investment portfolio in the best interests of investors, always with a normal prudent management of the investment portfolio in mind.

*There is limited exposure to Russian and/or Ukrainian positions. The main risk related to the Russian-Ukrainian conflict is market and performance risks, as we observe increased volatility in global financial markets. Obviously, countries, sectors and companies more closely linked to the conflict are more heavily impacted than others.*

*The SICAV held positions in International Investment Bank ("IIB"), which have been revalued to CZK 0.01 due to the entity becoming subject to financial sanctions.*

*As a consequence of these sanctions, IIB is unable to make payments under standard payment arrangements and therefore has been deprived of the possibility to fulfil obligations to bondholders, creditors and clients.*

## 2.1.8. Future policy

We're wary of the current Iran conflict and the repercussions it may have on the global energy prices and, consequently on the economic growth worldwide. The longer this goes on, the more chances that central banks around the world will need to raise rates to battle higher prices. We're cautiously optimistic this will end sooner than later. Sector allocation is currently more positioned towards cyclical than towards defensives.

On the bond side, after taking some profit on long duration calls, we reduced our modified duration just before the conflict started. In the meanwhile, yields jumped up and we've increased our duration overweight again to take advantage of higher and more attractive yields. We also think that corporate bonds, especially from the high yield category, could be a good choice to increase risk/return of the fund.

## 2.1.9. Summary risk indicator (SRI)

Classic Shares CSOB Private Banking: 3 on a scale of 1 (lowest risk) to 7 (highest risk)

- a moderate level of inflation risk: the bond component does not provide any protection against an increase in inflation.
- a moderate level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Czech Koruna, there is a real chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of market risk: the level of the risk reflects the volatility of the equity component.
- a moderate level of performance risk: the level of the risk reflects the volatility of the equity component.

There is no capital protection.

Classic Shares CSOB Premium: 3 on a scale of 1 (lowest risk) to 7 (highest risk)

- a moderate level of inflation risk: the bond component does not provide any protection against an increase in inflation.
- a moderate level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Czech Koruna, there is a real chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of market risk: the level of the risk reflects the volatility of the equity component.
- a moderate level of performance risk: the level of the risk reflects the volatility of the equity component.

There is no capital protection.

Classic Shares: 3 on a scale of 1 (lowest risk) to 7 (highest risk)

- a moderate level of inflation risk: the bond component does not provide any protection against an increase in inflation.
- a moderate level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Czech Koruna, there is a real chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of market risk: the level of the risk reflects the volatility of the equity component.
- a moderate level of performance risk: the level of the risk reflects the volatility of the equity component.

There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

## 2.2. Balance sheet

## 2.4.2. Changes in the composition of the assets of Optimum Fund ČSOB Opatrný (in Czech koruna)

|                                        | <b>1<sup>st</sup> half of year</b> |
|----------------------------------------|------------------------------------|
| <b>Purchases</b>                       | 10,844,786,068.28                  |
| <b>Sales</b>                           | 6,843,367,528.26                   |
| <b>Total 1</b>                         | 17,688,153,596.54                  |
| <b>Subscriptions</b>                   | 5,619,107,692.87                   |
| <b>Redemptions</b>                     | 1,094,010,867.17                   |
| <b>Total 2</b>                         | 6,713,118,560.04                   |
| <b>Monthly average of total assets</b> | 29,144,205,288.95                  |
| <b>Turnover rate</b>                   | 37.66%                             |

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period. A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions. A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio. Active asset management may result in high turnover rates (monthly percentage >50%).

The detailed list of transactions can be consulted free of charge at the company designated as financial service:  
KBC Bank NV, Havenlaan 2, B-1080 Brussels

### **2.4.3. Amount of commitments in respect of financial derivatives positions**

### Classic Shares CSOB Private Banking

- The bar chart shows the performance for full financial years(period of 12 months prior to the half-yearly closing).
- The figures do not take account of any restructuring..
- Calculated in CZK and in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage. In the case of units that pay dividends, the dividend is incorporated geometrically in the return.
- Calculation method for date D, where NAV stands for net asset value:

#### Capitalisation units (CAP)

Return on date D over a period of X years :

$$[\text{NIW}(\text{D}) / \text{NIW}(\text{Y})]^{[1 / \text{X}] - 1}$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[\text{NIW}(\text{D}) / \text{NIW}(\text{S})]^{[1 / \text{F}] - 1}$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

#### Distribution units (DIV)

Return on date D over a period of X years :

$$[ \text{C} * \text{NIW}(\text{D}) / \text{NIW}(\text{Y}) ]^{[1 / \text{X}] - 1}$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[ \text{C} * \text{NIW}(\text{D}) / \text{NIW}(\text{S}) ]^{[1 / \text{F}] - 1}$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

where C is a factor that is determined for all N dividends between the calculation date D and the reference date.

For dividend i on date Di with value Wi:

$$\text{Ci} = [\text{Wi} / \text{NIW}(\text{Di})] + 1$$

i = 1 ... N

from which C = C0 \* .... \* CN.

- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation and distribution shares

Classic Shares CSOB Premium

BE6285923320

Optimum Fund ČSOB Opatrný Classic Shares CSOB Premium CAP

Annual performance compared to the benchmark from 01/03/2017 through 28/02/2026 (in CZK)

If the results are expressed in a currency other than the euro, the return may be higher or lower due to exchange rate fluctuations.

## 2.4.6. Costs

### Ongoing Charges:

#### *Classic Shares CSOB Private Banking Capitalisation :*

Management fees and other administrative or operating costs: 1,098%  
Transaction costs: 0,514%

#### *Classic Shares CSOB Private Banking Distribution :*

Management fees and other administrative or operating costs: 1,095%  
Transaction costs: 0,511%

#### *Classic Shares CSOB Premium Capitalisation :*

Management fees and other administrative or operating costs: 1,262%  
Transaction costs: 0,514%

#### *Classic Shares Capitalisation :*

Management fees and other administrative or operating costs: 1,358%  
Transaction costs: 0,514%

Percentage calculated at reporting date: 28 February 2026 (period of 12 months prior to the half-yearly closing).

A more detailed explanation with respect to the method of calculating ongoing charges and the relevant exclusions can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.5. Ongoing charges'

### Existence of Commission Sharing Agreements

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.7. Commission Sharing Agreements'.

No CSA accrual during this period.

### Existence of fee sharing agreements and rebates

The management company has shared 69,93% of its fee with the distributor, and institutional and/or professional parties.

If the management company invests the assets of the undertaking for collective investment in units of undertakings for collective investment that are not managed by an entity of KBC Groep NV, and receives a fee for doing so, it will pay this fee to the undertaking for collective investment.

Fee-sharing does not affect the amount of the management fee paid by a **sub-fund** to the management company. This management fee is subject to the limitations laid down in **the articles of association**. The limitations may only be amended after approval by the General Meeting.

Tax treatment'                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                                                                                                                                                                                                                                                                                                        |
| Other charges (estimation) such as the regulator's fees, the cost of publication and any marketing costs | 0.10%                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | of the net assets of the sub-fund per year.                                                                                                                                                                                                                                                            |

### Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

### Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

### Financial derivatives on financial indices

The following financial indices were used as the underlying for financial derivatives::

**The EURO STOXX 50® (Bloomberg code: SX5E Index)** is a weighted equity index computed by Stoxx Ltd. The dividend is not reinvested. The main purpose of this index is to provide a continuous indication of market trends on the European stock markets. The base value of the index is 1000, calculated on the basis of the underlying prices recorded on 31 December 1991.

The Euro Stoxx 50® consists solely of shares from countries participating in the Economic and Monetary Union, with the exception of Luxembourg. On 10 April 1998, the following countries were included in the index: Belgium, Cyprus, Germany, Estonia, Finland, France, Greece, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, the Netherlands, Austria, Portugal, Slovakia, Slovenia and Spain.

The index consists of the 50 largest European shares in terms of shares that are freely negotiable, and the shares are accordingly weighted on the basis of this criterion.

The Euro Stoxx 50® is published daily in L'Echo, De Tijd, The Financial Times and The Wall Street Journal Europe.

Stoxx Limited has all proprietary rights with respect to the index. In no way Stoxx Limited endorses, sponsors or is otherwise involved in the issue and offering the shares of Optimum Fund ČSOB Opatrný. Stoxx Limited disclaims any liability for the issue and offering of the shares of this undertaking for collective investment.

The **S&P 500** is an equity index computed by Standard & Poor's that is made up of 500 shares. The dividend is not reinvested. The S&P 500 serves primarily as a continuous indicator of market trends on the US stock markets. The value of the S&P 500 index is calculated on the basis of the market value of the shares of 500 companies at a given point in time, compared to the market value of the shares of 500 similar companies during the reference period from 1941 to 1943. The index is published daily in L'Echo, De Tijd, The Financial Times and The Wall Street Journal Europe.

Standard & Poor's has all proprietary rights with respect to the index. In no way Standard & Poor's endorses, sponsors or is otherwise involved in the issue and offering the shares of this undertaking for collective investment. Standard & Poor's disclaims any liability for the issue and offering of the shares of this undertaking for collective investment.

The value and, if available for distribution, the composition of the aforementioned financial indices may be obtained from the branches providing the financial service.

| Currency:                   | CZK              |

#### 2.1.2. Stock exchange listing

Not applicable.

#### 2.1.3. Goal and key principles of the investment policy

##### Object of the sub-fund

The object of the sub-fund is twofold (before deducting charges and taxes):

- (1) To repay per share the initial subscription price of 10 CZK at Maturity.(i.e. the capital protection). This capital protection is provided through a financial mechanism that will be explained in more detail under the heading *Capital protection*. However, the capital protection does not apply to shareholders who sell their shares before Maturity.
- (2) To provide a potential return through an investment in swaps. The various types of swaps in which the sub-fund may invest are explained in more detail under the *Potential return*.

##### Capital Protection

###### The financial mechanism used to achieve capital protection

The financial mechanism used to achieve capital protection at Maturity consists of an investment of the total amount of the subscriptions in bonds and other debt instruments, deposits and/or liquid assets (including cash deposited on a time-deposit account or current account). These investments can have different maturities and coupon payment dates. Using the swaps described under the heading *Permitted swap transactions* (2), these investments are matched with the due dates of the obligations of the sub-fund.

###### Criteria the investments must meet

The investments must meet one of the following criteria:

- (1) An investment in deposits and/or debt instruments, placed with or issued by financial institutions under the prudential supervision of and established in a Member State of the European Economic Area.
- (2) An investment in debt instruments issued or guaranteed by a Member State of the European Economic Area.
- (3) An investment under an investment strategy with an analogous structure and identical counterparty risk as a direct investment in deposits and/or debt instruments as stated under (1) and (2) above.

The investments under (3) may consist of:

- (A) An investment in notes listed on a stock exchange that are issued by 'Special Purpose Vehicles' (SPVs).

These SPVs are managed by KBC Asset Management NV or a subsidiary.

The underlying assets of the bonds issued by the SPVs consist of a diversified portfolio of deposits issued by financial institutions, bonds, other debt instruments and financial derivatives. When selecting these underlying assets, account is taken of criteria relating to allocation and creditworthiness (see *Permitted asset classes* and *Characteristics of the bonds and other debt instruments*) in order to limit the counterparty risk.

Further details of the criteria these underlying deposits, bonds, other debt instruments and financial derivatives must meet are provided in the base prospectuses for the SPVs, which can be viewed at or downloaded from [www.kbc.be/prospectus/spv](http://www.kbc.be/prospectus/spv).

Investors are provided with information on the investments made by both the sub-fund and the SPVs in the annual and half-yearly reports on the open-ended investment company under Belgian law (bevek) to which the sub-fund belongs. These reports can also be viewed at or downloaded from [www.kbc.be](http://www.kbc.be).

- (B) An investment in:
- deposits with financial institutions under prudential supervision in the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia and/or
  - debt instruments issued by financial institutions under prudential supervision in the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia and/or
  - debt instruments issued or guaranteed by the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia.

Prudential supervision of financial institutions in the United Kingdom, Switzerland, the United States of America, Japan, Canada and Australia can be equated to prudential supervision of financial institutions in the member states of the European Economic Area.

The investments in debt instruments issued by financial institutions under prudential supervision in the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia or issued or guaranteed by the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia have a minimum credit rating as set out under the heading *Characteristics of the bonds and other debt instruments*.

- (C) The investments may also consist of a combination of the investments specified under (A) and (B).

### **No formal guarantee**

No formal guarantee of repayment of the initial subscription price is provided to the sub-fund or to its shareholders. In other words, the capital protection is not binding for the sub-fund as regards the result generated, although achieving this objective through the operation of the financial mechanism is still the top priority.

If the financial mechanism fails and, as a result, the amount per share payable (before deducting charges and taxes) at Maturity is lower than the initial subscription price, KBC Asset Management NV may decide (but is not obliged) to use the management fee it has received during the current financial year from the sub-fund – and possibly also from other sub-funds of the bevek – to cover the shortfall. This is not a guarantee from KBC Asset Management NV, which may decide at any time and at its own discretion whether or not to use the management fee for this purpose.

The capital protection does not apply to shareholders who sell their shares before Maturity.

### **Potential return**

To achieve a potential return, the sub-fund concludes swaps with one or more prime counterparties. Consequently, the sub-fund transfers a portion of the future income from the investments that were made to achieve capital protection to this counterparty (these counterparties) during the life of the sub-fund. In exchange, the counterparty (counterparties) undertake to provide a potential return as specified under the heading *Selected strategy*.

### **Sub-fund's investment policy**

#### **Permitted asset classes**

Pursuant to the provisions of the Royal Decree of 12 November 2012 on undertakings for collective investment complying with the conditions of Directive 2009/65/EC, the sub-fund may invest in transferable securities (including bonds and other debt instruments), money market instruments, units (shares) in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as and to the extent permitted by the applicable legislation.

The investment limits and restrictions set out in the Royal Decree of 12 November 2012 on undertakings for collective investment complying with the conditions of Directive 2009/65/EC will be respected at all times.

### **Characteristics of the bonds and other debt instruments**

During the sub-fund's life, the average credit rating of the bonds and other debt instruments shall be at least 'A-' from Standard & Poor's or an equivalent rating from Moody's or Fitch, or, if there is no credit rating available, an average credit risk profile that the manager considers to be at least equivalent.

At the start of the investment, the credit rating of the long-term bonds and other debt instruments shall be at least 'A-' from Standard & Poor's or an equivalent rating from Moody's or Fitch, or, if there is no credit rating available, a credit risk profile that the manager considers to be at least equivalent.

At the start of the investment, the credit rating of the short-term bonds and other debt instruments shall be at least 'A-1' from Standard & Poor's or an equivalent rating from Moody's or Fitch, or, if there is no credit rating available, a credit risk profile that the manager considers to be at least equivalent.

When selecting the bonds and other debt instruments, all maturities are taken into consideration.

### Permitted swap transactions

**The swaps described below have been concluded with a prime counterparty or prime counterparties within the limits laid down by law.**

(1) To achieve a potential return, the sub-fund concludes swaps. Under such swap contracts, the sub-fund transfers a portion of the future income from the investments described under the heading 'Permitted asset classes' to the counterparty or counterparties during the life of the sub-fund. In exchange, the counterparty or counterparties undertake to provide a potential return as specified under the heading *Selected strategy*.

**The swaps under (1) are essential to achieve the sub-fund's investment objectives, since this technique facilitates achievement of the goal of generating a potential return.**

**The sub-fund's risk profile is not affected by the use of these swaps.**

(2) If necessary, the sub-fund also concludes swaps to match the due dates of the commitments of the sub-fund with those of the cash flows stemming from the deposits, bonds and other debt instruments described under the heading *Criteria the investments must meet*.

**These swaps are essential to achieve the sub-fund's investment objectives, since there are not enough bonds and other debt instruments available on the market whose coupon payments and maturity dates always perfectly match the due dates of the sub-fund's obligations.**

**The sub-fund's risk profile is not affected by the use of these swaps.**

(3) In addition, the sub-fund may conclude swaps to protect itself against the credit risk in respect of issuers of bonds and other debt instruments. Through this type of swap, one or more counterparties takes over the risk of an issuer of a bond or other debt instrument in the sub-fund's portfolio defaulting, in exchange for a fee payable by the sub-fund.

**The swaps under (3) serve to hedge the credit risk.**

**The sub-fund's risk profile is not affected by the use of these swaps.**

### Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

### Strategie selected

#### Investment objectives and strategy:

The sub-fund has two investment objectives: firstly, it seeks to repay at Maturity 100% of the initial subscription price and secondly a possible capital gain that is contingent on the evolution of a basket of 30 shares of companies that cater for products and services that consumers need in everyday life, such as, for example, utilities for water, internet and electricity; computer equipment, software and communication devices for everyday use; food and beverages; household goods; products for hygiene and daily care; household appliances; DIY items; textiles and clothing; e-commerce; and everyday banking.

At Maturity, a capital gain will be distributed that will equal the best of two alternatives:

- on the one hand 10.00%, settled at 100% of the initial subscription price;
- on the other hand 80% of the increase in the basket of 30 shares, settled at 100% of the initial subscription price, where the maximum capital gain will be 50%. The evolution of the basket is calculated as follows: [end value of the basket minus the starting value of the basket], divided by the starting value of the basket. Decreases in the basket are not taken into account.

Consequently, the capital gain at the Maturity Date will be at least 10.00% (yield to maturity: 1.70% before fees and taxes) and maximum 50% (yield to maturity: 7.45% before costs and taxes).

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

### Transparency of adverse sustainability impacts

The sub-fund took into account the principal adverse impacts of its investment decisions on sustainability factors ("PAI") as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on disclosure on sustainability in the financial services sector ("SFDR") through KBC Group's Investment Policy and KBC Group Policy on Blacklisted Companies.

Based on the KBC Group Policy on Blacklisted Companies, all companies on the 'KBC Group Blacklist' (including companies involved in controversial weapons such as those prohibited by Belgian law and white phosphorus weapons) are excluded as well as the worst offenders of the UN Global Compact.

Consequently, the sub-fund took into account exposure to controversial weapons ('indicator 14') by excluding companies dealing with controversial weapon systems, and violations of the principles of the UN Global Compact or the Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises ('indicator 10') by excluding the worst offenders of the UN Global Compact.

### **Maturity**

Thursday 28 February 2030 (payment with a value date of D+1 banking day)

### **Currency**

CZK, for all shares in the basket, changes in the value of the currency in which they are expressed relative to CZK are irrelevant. The investor pays the subscription amount in CZK and will be paid in CZK at Maturity (or earlier). The investor is not protected against any decline in the value of the currency in which the sub-fund is denominated relative to the euro.

### **Starting Value**

Value of the basket based on the weighted average of the Value of the shares included in the basket during the first 10 Valuation Days, starting from Tuesday 9 July 2024 inclusive.

### **End Value**

Value of the basket based on the weighted average of the Value of the shares included in the basket on the last Valuation Day of the month for the last 18 months before Maturity, more specifically from August 2028 through January 2030 (inclusive).

### **Value**

For all the shares, except for those listed on the Milan stock exchange, the closing price, namely the price of a share in the basket as calculated and notified at closing of the stock exchange by the authority of the stock exchange on which the share is listed (or its legal successor). The reference price is used for shares listed on the Milan stock exchange.

### **Valuation day**

A Valuation Day is set separately for each share in the basket.

A Valuation Day is a day that is a planned trading day both

- i) for the stock exchange on which the share is listed and
- ii) for the stock exchange whose activities have a substantial influence on the trading of options and futures on the share concerned

hereinafter referred to as 'the stock exchanges concerned'.

If on the Valuation Day,

- a) one of the stock exchanges concerned is unexpectedly closed or
- b) there is an event that disrupts the market for a stock exchange concerned or
- c) one of the stock exchanges concerned closes early,

the original Valuation Day is replaced by the following trading day when no event as referred to in a), b) or c) above occurs. An extraordinary closure that has been announced in advance is not considered as early closure.

If a valuation is made on consecutive Valuation Days, the trading day that replaces the original Valuation Day (i) may not coincide with another original Valuation Day and (ii) may not be a trading day that already replaces another original Valuation Day.

However, if an event as referred to under a), b) or c) above occurs on each of the eight trading days following the original Valuation Day,

- (i) the eighth trading day shall be considered as the original Valuation Day and
- (ii) the Bevek shall assess, in good faith and in consultation with the prime counterparty or counterparties with which it has concluded a swap agreement, the price of the share as it would have been traded on that eighth trading day and
- (iii) the Bevek will notify shareholders of any changes regarding setting the Starting Value and/or End Value and conditions of payment.

### Relevant basket

In the table below, the columns from left to right reflect the number of the share, the name of the share, the Bloomberg code, the exchange on which it trades (City-MIC Code) and its initial weighting in the basket.

| (i) | Name                       | Bloomberg Code  | Exchange          | Initial Weighting Coefficients |

### Basket composition methodology

KBC Asset Management used the following methodology to determine the composition of the sub-fund's basket.

#### Step 1 :

The starting point is the global equities universe from which a selection of potential investments is derived in accordance with the economic criteria for the composition of the basket and subject to restrictions regarding stock market capitalisation and liquid assets.

The economic criteria for the composition of the basket determine the size of the final selection.

#### Step 2 :

The selection of shares obtained in step 1 is reduced to a short list using a quantitative selection based on past financial data. The shares selected are those of companies that achieve a good score in terms of management quality, a healthy balance-sheet structure and a positive trend in profitability.

#### Step 3 :

The selection of shares obtained in step 2 is then verified by KBC Asset Management analysts. Shares that are permanently monitored by the analysts and those for which there is a negative recommendation, when the product is launched, are then withdrawn from the selection.

#### Step 4 :

The last reduction of the selection provides the final basket. This selection was made using the technical parameters of options (including the term, volatility, dividend yield and interest rate).

The final basket must satisfy the legal requirements concerning the quantity of shares and adequate distribution in the weighting. In addition, care is taken to ensure compliance with the geographical and/or sector spread. The analysts make a qualitative assessment of each share used taking account of specific knowledge of these shares and the sectors/regions from which they come, in accordance with the term of the sub-fund.

For the sub-fund Optimum Fund ČSOB Potraviny a zboží základní potřeby 2, about 251 equities were selected during step 1.

The initial selection was reduced by a maximum 20% in step 2.

This was again reduced by 10% (indicative) in step 3. The final basket set up during step 4 is described above under *Relevant basket*. This basket makes it possible to offer the sub-fund Optimum Fund ČSOB Potraviny a zboží základní potřeby 2 under the conditions set out in the investment policy referred to above. Here the selection process uses parameters that could affect the potential return on the investments.

#### *Selection criteria for the basket :*

A share/issuer may only form part of the basket if (i) it is listed on a stock exchange, (ii) the issuer is a company that caters for products and services that consumers need in everyday life, such as, for example, utilities for water, internet and electricity; computer equipment, software and communication devices for everyday use; food and beverages; household goods; products for hygiene and daily care; household appliances; DIY items; textiles and clothing; e-commerce; and everyday banking, (iii) the Board of Directors of the Beve has approved its inclusion in the basket, (iv) the issuer is not included in the KBC Group Policy on Blacklisted Companies\* and (v) at the time the swap contracts are being concluded (see 'Permitted swap transactions'), the issuer of the share complies with the KBC Group Investment Policy\* (the 'Selection criteria').

\* The KBC Group Policy on Blacklisted Companies and the KBC Group Investment Policy can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > General exclusion policies for conventional funds and socially responsible investment funds, Paragraph 1 'KBC Group Policy on Blacklisted Companies' and 2 'KBC Group Investment Policy'.

### **Modifications to the basket due to mergers, acquisitions, demergers, nationalisation, bankruptcy or disqualification :**

#### **Mergers or acquisitions**

If, during the life of the sub-fund, one or more issuers of shares in the basket are involved in a merger or acquisition, the shares of the relevant issuers which still meet the selection criteria and comply with the KBC Group Investment Policy\* after these operations will be given a weighting in the basket equal to the sum of the weightings of the shares of all issuers involved in the operation. If, after the operation, none of the issuers involved in the operation meet the selection criteria or comply with the KBC Group Investment Policy\*, the procedures described under 'Nationalisation, bankruptcy or disqualification' will apply.

\* The KBC Group Investment Policy can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > General exclusion policies for conventional funds and responsible investment funds, Paragraph 2 'KBC Group Investment Policy'.

#### **Demergers**

If an issuer of a share in the basket proceeds to a demerger, then the share from the issuer concerned can be substituted either by one of the shares that came about as a result of the demerger and that meets the selection criteria and complies with the KBC Group Investment Policy\*, or by a basket of shares arising from the demerger which meet the selection criteria and comply with the KBC Group Investment Policy\*. This basket of shares will, when calculating the number of shares in the basket, be considered as one share. If, after the operation, none of the shares resulting from the demerger meet the selection criteria or comply with the KBC Group Investment Policy\*, the procedures described under 'Nationalisation, bankruptcy or disqualification' will apply.

\* The KBC Group Investment Policy can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > General exclusion policies for conventional funds and responsible investment funds, Paragraph 2 'KBC Group Investment Policy'.

#### **Nationalisation, bankruptcy or disqualification**

If an issuer of a share in the basket is nationalised, declared bankrupt or no longer meets the selection criteria ('disqualification'), this share will be sold at the last known price before removal. The amount thus realised will then be invested until Maturity at the rate of interest in force on money or bond markets at the moment of removal, and this for a term equal to the term remaining until Maturity of the sub-fund. The realised amount plus the interest will be taken into account at Maturity as the result achieved for that share in order to calculate the final increase in the value of the basket at Maturity.

#### **Volatility of the net asset value**

The volatility of the net asset value may be high due to the composition of the portfolio.

#### **Securities Financing Transactions (SFTs)**

The sub-fund may not lend any financial instruments.

### General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

### Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'

## 2.1.4. Financial portfolio management

The intellectual management, with the exception of the creation of the sub-fund and its maintenance in terms of the technical, product-specific and legal aspects has been delegated by the management company to KBC Fund Management Limited, 4th Floor, Scotch House, 6/7 Burgh Quay, Dublin 2, D02 VK44, Ireland.

## 2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

## 2.1.6. Index and benchmark

Not applicable

## 2.1.7. Policy pursued during the financial year

## 2.1.8. Summary risk indicator

2 on a scale of 1 (lowest risk) to 7 (highest risk)

- a moderate level of inflation risk: there is no protection against an increase of the inflation.
- a high level of market risk: the level of the risk reflects the volatility of the stock market and the exchange rate risk in relation to the euro.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market and the exchange rate risk in relation to the euro.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

## 2.2. Balance sheet

| Balance sheet layout |                                                                   | 28/02/2026<br>(in Czech koruna) | 28/02/2025<br>(in Czech koruna) |

## 2.4.5. Performance figures

BE6350225239  
Optimum Fund ČSOB Potraviny a zboží základní potřeby 2 CAP  
Annual performance from 01/03/2024 through 28/02/2026 (in CZK)

If the results are expressed in a currency other than the euro, the return may be higher or lower due to exchange rate fluctuations.

| Cap Div | ISIN Code    | Curr<br>ency | 1 year        |            | 3 years       |            | 5 years       |            | 10 years      |            | Since Launch* |               |
|---------|--------------|--------------|---------------|------------|---------------|------------|---------------|------------|---------------|------------|---------------|---------------|
|         |              |              | Share classes | Bench mark | Share classes | Bench mark | Share classes | Bench mark | Share classes | Bench mark | Starting date | Share classes |
| CAP     | BE6350225239 | CZK          | 8.20%         |            |               |            |               |            |               |            | 01/07/2024    | 7.20%         |

Risk warning: Past performance is not a guide to future performance.

\* Return on annual basis.

- The bar chart shows the performance for full financial years(period of 12 months prior to the half-yearly closing).
- The figures do not take account of any restructuring..
- Calculated in CZK and in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage.
- Calculation method for date D, where NAV stands for net asset value:  
Capitalisation units (CAP)  
Return on date D over a period of X years :  

$$[\text{NIW}(\text{D}) / \text{NIW}(\text{Y})] ^ { [ 1 / \text{X} ] } - 1$$
 where Y = D-X  
 Return on date D since the start date S of the unit:  

$$[\text{NIW}(\text{D}) / \text{NIW}(\text{S})] ^ { [ 1 / \text{F} ] } - 1$$
 where F = 1 if the unit has existed for less than one year on date D  
 where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D
- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation shares.

## 2.4.6. Costs

### Ongoing Charges:

Management fees and other administrative or operating costs: 1,247%  
Transaction costs: 0,000%

Percentage calculated at reporting date: 28 February 2026 (period of 12 months prior to the half-yearly closing).

A more detailed explanation with respect to the method of calculating ongoing charges and the relevant exclusions can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.5. Ongoing charges'

### Existence of Commission Sharing Agreements

Not applicable

### Fee sharing agreements en rebates

The management company has shared 70.00% of its fee with the distributor, and institutional and/or professional parties.

This percentage has been calculated relative to the fee for managing the investment portfolio of the sub-fund when it was launched.

## 2.4.7. Notes to the financial statements and other data

### Fee for managing the investment portfolio

KBC Asset Management NV receives a fee for managing the sub-fund's investments. This fee consists of a varying amount of max. 0.2 CZK per unit per year (with a maximum of CZK per unit per year for risk management).

This fee, which is calculated every six months, is paid monthly on the last banking day of each month. It can change from one six-month period to the next, within the limits set out below, and is based on the number of units issued at the start of each six-month period.

In the calculation, account is taken of the difference between:

- the return generated by the investments in bonds and other debt instruments, deposits, and/or liquid assets in order to achieve the capital protection on the Maturity date (see *The financial mechanism used to achieve capital protection*), and
- the expenses borne by the sub-fund to achieve a potential return (see *Permitted 'swap' transactions*),
- after deducting the expected fixed and variable expenses of the sub-fund, as mentioned above.

Of this, KBC Fund Management Ltd. receives a fee of no more than 0.19 CZK per unit per year from KBC Asset Management NV for the intellectual management of the sub-fund. KBC Fund Management Ltd. is a wholly owned subsidiary of KBC Asset Management NV.

KBC Asset Management NV has informed the bevek that, if due to the failure of the financial mechanism, the amount that should be paid per unit (after deducting taxes and charges) on the Maturity date, as relevant, is lower than the initial subscription price, KBC Asset Management NV may decide (but is not obliged to) to use the management fee it receives during the current financial year from the sub-fund – and possibly also from other sub-funds of the bevek – to cover this shortfall. This is not a guarantee from KBC Asset Management NV, which may

decide at any time and at its own discretion whether or not to use the management fee for this purpose. KBC Asset Management NV or one of its subsidiaries has also been appointed manager of the SPVs in which the sub-fund may invest (see *Criteria the investments must meet*). KBC Asset Management NV or one of its subsidiaries, as the case may be, receives an annual fee from the relevant SPVs for their management. This management fee may not exceed 0.15% per year and is calculated on the assets managed at the end of the quarter.

The sum of (i) the fee for managing the investment portfolio that the sub-fund pays to the management company and (ii) the management fee that the SPVs in which the sub-fund invests pay to the asset manager, shall never exceed 0.20 CZK per unit per year, as described above.

#### 2.1.2. Stock exchange listing

Not applicable.

#### 2.1.3. Goal and key principles of the investment policy

##### Object of the sub-fund

The object of the sub-fund is twofold (before deducting charges and taxes):

- (1) To repay per share the initial subscription price of 10 CZK at Maturity.(i.e. the capital protection). This capital protection is provided through a financial mechanism that will be explained in more detail under the heading *Capital protection*. However, the capital protection does not apply to shareholders who sell their shares before Maturity.
- (2) To provide a potential return through an investment in swaps. The various types of swaps in which the sub-fund may invest are explained in more detail under the *Potential return*.

##### Capital Protection

###### The financial mechanism used to achieve capital protection

The financial mechanism used to achieve capital protection at Maturity consists of an investment of the total amount of the subscriptions in bonds and other debt instruments, deposits and/or liquid assets (including cash deposited on a time-deposit account or current account). These investments can have different maturities and coupon payment dates. Using the swaps described under the heading *Permitted swap transactions* (2), these investments are matched with the due dates of the obligations of the sub-fund.

##### Criteria the investments must meet

The investments must meet one of the following criteria:

- (1) An investment in deposits and/or debt instruments, placed with or issued by financial institutions under the prudential supervision of and established in a Member State of the European Economic Area.
- (2) An investment in debt instruments issued or guaranteed by a Member State of the European Economic Area.
- (3) An investment under an investment strategy with an analogous structure and identical counterparty risk as a direct investment in deposits and/or debt instruments as stated under (1) and (2) above.

The investments under (3) may consist of:

- (A) An investment in notes listed on a stock exchange that are issued by 'Special Purpose Vehicles' (SPVs).

These SPVs are managed by KBC Asset Management NV or a subsidiary.

The underlying assets of the bonds issued by the SPVs consist of a diversified portfolio of deposits issued by financial institutions, bonds, other debt instruments and financial derivatives. When selecting these underlying assets, account is taken of criteria relating to allocation and creditworthiness (see *Permitted asset classes* and *Characteristics of the bonds and other debt instruments*) in order to limit the counterparty risk.

Further details of the criteria these underlying deposits, bonds, other debt instruments and financial derivatives must meet are provided in the base prospectuses for the SPVs, which can be viewed at or downloaded from [www.kbc.be/prospectus/spv](http://www.kbc.be/prospectus/spv).

Investors are provided with information on the investments made by both the sub-fund and the SPVs in the annual and half-yearly reports on the open-ended investment company under Belgian law (bevek) to which the sub-fund belongs. These reports can also be viewed at or downloaded from [www.kbc.be](http://www.kbc.be).

- (B) An investment in:
- deposits with financial institutions under prudential supervision in the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia and/or
  - debt instruments issued by financial institutions under prudential supervision in the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia and/or
  - debt instruments issued or guaranteed by the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia.

Prudential supervision of financial institutions in the United Kingdom, Switzerland, the United States of America, Japan, Canada and Australia can be equated to prudential supervision of financial institutions in the member states of the European Economic Area.

The investments in debt instruments issued by financial institutions under prudential supervision in the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia or issued or guaranteed by the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia have a minimum credit rating as set out under the heading *Characteristics of the bonds and other debt instruments*.

- (C) The investments may also consist of a combination of the investments specified under (A) and (B).

### **No formal guarantee**

No formal guarantee of repayment of the initial subscription price is provided to the sub-fund or to its shareholders. In other words, the capital protection is not binding for the sub-fund as regards the result generated, although achieving this objective through the operation of the financial mechanism is still the top priority.

If the financial mechanism fails and, as a result, the amount per share payable (before deducting charges and taxes) at Maturity is lower than the initial subscription price, KBC Asset Management NV may decide (but is not obliged) to use the management fee it has received during the current financial year from the sub-fund – and possibly also from other sub-funds of the bevek – to cover the shortfall. This is not a guarantee from KBC Asset Management NV, which may decide at any time and at its own discretion whether or not to use the management fee for this purpose.

The capital protection does not apply to shareholders who sell their shares before Maturity.

### **Potential return**

To achieve a potential return, the sub-fund concludes swaps with one or more prime counterparties. Consequently, the sub-fund transfers a portion of the future income from the investments that were made to achieve capital protection to this counterparty (these counterparties) during the life of the sub-fund. In exchange, the counterparty (counterparties) undertake to provide a potential return as specified under the heading *Selected strategy*.

### **Sub-fund's investment policy**

#### **Permitted asset classes**

Pursuant to the provisions of the Royal Decree of 12 November 2012 on undertakings for collective investment complying with the conditions of Directive 2009/65/EC, the sub-fund may invest in transferable securities (including bonds and other debt instruments), money market instruments, units (shares) in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as and to the extent permitted by the applicable legislation.

The investment limits and restrictions set out in the Royal Decree of 12 November 2012 on undertakings for collective investment complying with the conditions of Directive 2009/65/EC will be respected at all times.

### **Characteristics of the bonds and other debt instruments**

During the sub-fund's life, the average credit rating of the bonds and other debt instruments shall be at least 'A-' from Standard & Poor's or an equivalent rating from Moody's or Fitch, or, if there is no credit rating available, an average credit risk profile that the manager considers to be at least equivalent.

At the start of the investment, the credit rating of the long-term bonds and other debt instruments shall be at least 'A-' from Standard & Poor's or an equivalent rating from Moody's or Fitch, or, if there is no credit rating available, a credit risk profile that the manager considers to be at least equivalent.

At the start of the investment, the credit rating of the short-term bonds and other debt instruments shall be at least 'A-1' from Standard & Poor's or an equivalent rating from Moody's or Fitch, or, if there is no credit rating available, a credit risk profile that the manager considers to be at least equivalent.

When selecting the bonds and other debt instruments, all maturities are taken into consideration.

### Permitted swap transactions

**The swaps described below have been concluded with a prime counterparty or prime counterparties within the limits laid down by law.**

(1) To achieve a potential return, the sub-fund concludes swaps. Under such swap contracts, the sub-fund transfers a portion of the future income from the investments described under the heading 'Permitted asset classes' to the counterparty or counterparties during the life of the sub-fund. In exchange, the counterparty or counterparties undertake to provide a potential return as specified under the heading *Selected strategy*.

**The swaps under (1) are essential to achieve the sub-fund's investment objectives, since this technique facilitates achievement of the goal of generating a potential return.**

**The sub-fund's risk profile is not affected by the use of these swaps.**

(2) If necessary, the sub-fund also concludes swaps to match the due dates of the commitments of the sub-fund with those of the cash flows stemming from the deposits, bonds and other debt instruments described under the heading *Criteria the investments must meet*.

**These swaps are essential to achieve the sub-fund's investment objectives, since there are not enough bonds and other debt instruments available on the market whose coupon payments and maturity dates always perfectly match the due dates of the sub-fund's obligations.**

**The sub-fund's risk profile is not affected by the use of these swaps.**

(3) In addition, the sub-fund may conclude swaps to protect itself against the credit risk in respect of issuers of bonds and other debt instruments. Through this type of swap, one or more counterparties takes over the risk of an issuer of a bond or other debt instrument in the sub-fund's portfolio defaulting, in exchange for a fee payable by the sub-fund.

**The swaps under (3) serve to hedge the credit risk.**

**The sub-fund's risk profile is not affected by the use of these swaps.**

### Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

### Strategie selected

#### Investment objectives and strategy:

The sub-fund has two investment objectives: firstly, it seeks to repay at Maturity 100% of the initial subscription price and secondly a possible capital gain that is contingent on the evolution of a basket of 30 shares of companies that cater for products and services that consumers need in everyday life, such as, for example, utilities for water, internet and electricity; computer equipment, software and communication devices for everyday use; food and beverages; household goods; products for hygiene and daily care; household appliances; DIY items; textiles and clothing; e-commerce; and everyday banking.

At Maturity, a capital gain will be distributed that will equal the best of two alternatives:

- on the one hand 3.00%, settled at 100% of the initial subscription price;
- on the other hand 90% of the increase in the basket of 30 shares, settled at 100% of the initial subscription price, where the maximum capital gain will be 50%. The evolution of the basket is calculated as follows: [end value of the basket minus the starting value of the basket], divided by the starting value of the basket. Decreases in the basket are not taken into account.

Consequently, the capital gain at the Maturity Date will be at least 3.00% (yield to maturity: 0.53% before fees and taxes) and maximum 50% (yield to maturity: 7.57% before costs and taxes).

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

### Transparency of adverse sustainability impacts

The sub-fund took into account the principal adverse impacts of its investment decisions on sustainability factors ("PAI") as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on disclosure on sustainability in the financial services sector ("SFDR") through KBC Group's Investment Policy and KBC Group Policy on Blacklisted Companies.

Based on the KBC Group Policy on Blacklisted Companies, all companies on the 'KBC Group Blacklist' (including companies involved in controversial weapons such as those prohibited by Belgian law and white phosphorus weapons) are excluded as well as the worst offenders of the UN Global Compact.

Consequently, the sub-fund took into account exposure to controversial weapons ('indicator 14') by excluding companies dealing with controversial weapon systems, and violations of the principles of the UN Global Compact or the Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises ('indicator 10') by excluding the worst offenders of the UN Global Compact.

### **Maturity**

Wednesday 29 May 2030 (payment with a value date of D+1 banking day)

### **Currency**

CZK, for all shares in the basket, changes in the value of the currency in which they are expressed relative to CZK are irrelevant. The investor pays the subscription amount in CZK and will be paid in CZK at Maturity (or earlier). The investor is not protected against any decline in the value of the currency in which the sub-fund is denominated relative to the euro.

### **Starting Value**

Value of the basket based on the weighted average of the Value of the shares included in the basket during the first 10 Valuation Days, starting from Tuesday 12 November 2024 inclusive.

### **End Value**

Value of the basket based on the weighted average of the Value of the shares included in the basket on the last Valuation Day of the month for the last 18 months before Maturity, more specifically from November 2028 through April 2030 (inclusive).

### **Value**

For all the shares, except for those listed on the Milan stock exchange, the closing price, namely the price of a share in the basket as calculated and notified at closing of the stock exchange by the authority of the stock exchange on which the share is listed (or its legal successor). The reference price is used for shares listed on the Milan stock exchange.

### **Valuation day**

A Valuation Day is set separately for each share in the basket.

A Valuation Day is a day that is a planned trading day both

- i) for the stock exchange on which the share is listed and
- ii) for the stock exchange whose activities have a substantial influence on the trading of options and futures on the share concerned

hereinafter referred to as 'the stock exchanges concerned'.

If on the Valuation Day,

- a) one of the stock exchanges concerned is unexpectedly closed or
- b) there is an event that disrupts the market for a stock exchange concerned or
- c) one of the stock exchanges concerned closes early,

the original Valuation Day is replaced by the following trading day when no event as referred to in a), b) or c) above occurs. An extraordinary closure that has been announced in advance is not considered as early closure.

If a valuation is made on consecutive Valuation Days, the trading day that replaces the original Valuation Day (i) may not coincide with another original Valuation Day and (ii) may not be a trading day that already replaces another original Valuation Day.

However, if an event as referred to under a), b) or c) above occurs on each of the eight trading days following the original Valuation Day,

- (i) the eighth trading day shall be considered as the original Valuation Day and
- (ii) the Bevek shall assess, in good faith and in consultation with the prime counterparty or counterparties with which it has concluded a swap agreement, the price of the share as it would have been traded on that eighth trading day and
- (iii) the Bevek will notify shareholders of any changes regarding setting the Starting Value and/or End Value and conditions of payment.

### Relevant basket

In the table below, the columns from left to right reflect the number of the share, the name of the share, the Bloomberg code, the exchange on which it trades (City-MIC Code) and its initial weighting in the basket.

| (i) | Name                       | Bloomberg Code  | Exchange          | Initial Weighting Coefficients |
|-----|----------------------------|-----------------|-------------------|--------------------------------|
| 1   | AT&T INC                   | T UN Equity     | NEW YORK - XNYS   | 2.0000%                        |

### Basket composition methodology

KBC Asset Management used the following methodology to determine the composition of the sub-fund's basket.

#### Step 1 :

The starting point is the global equities universe from which a selection of potential investments is derived in accordance with the economic criteria for the composition of the basket and subject to restrictions regarding stock market capitalisation and liquid assets.

The economic criteria for the composition of the basket determine the size of the final selection.

#### Step 2 :

The selection of shares obtained in step 1 is reduced to a short list using a quantitative selection based on past financial data. The shares selected are those of companies that achieve a good score in terms of management quality, a healthy balance-sheet structure and a positive trend in profitability.

#### Step 3 :

The selection of shares obtained in step 2 is then verified by KBC Asset Management analysts. Shares that are permanently monitored by the analysts and those for which there is a negative recommendation, when the product is launched, are then withdrawn from the selection.

#### Step 4 :

The last reduction of the selection provides the final basket. This selection was made using the technical parameters of options (including the term, volatility, dividend yield and interest rate).

The final basket must satisfy the legal requirements concerning the quantity of shares and adequate distribution in the weighting. In addition, care is taken to ensure compliance with the geographical and/or sector spread. The analysts make a qualitative assessment of each share used taking account of specific knowledge of these shares and the sectors/regions from which they come, in accordance with the term of the sub-fund.

For the sub-fund Optimum Fund ČSOB Potraviny a zboží základní potřeby 3, about 251 equities were selected during step 1.

The initial selection was reduced by a maximum 20% in step 2.

This was again reduced by 10% (indicative) in step 3. The final basket set up during step 4 is described above under *Relevant basket*. This basket makes it possible to offer the sub-fund Optimum Fund ČSOB Potraviny a zboží základní potřeby 3 under the conditions set out in the investment policy referred to above. Here the selection process uses parameters that could affect the potential return on the investments.

#### *Selection criteria for the basket :*

A share/issuer may only form part of the basket if (i) it is listed on a stock exchange, (ii) the issuer is a company that caters for products and services that consumers need in everyday life, such as, for example, utilities for water, internet and electricity; computer equipment, software and communication devices for everyday use; food and beverages; household goods; products for hygiene and daily care; household appliances; DIY items; textiles and clothing; e-commerce; and everyday banking, (iii) the Board of Directors of the Beve has approved its inclusion in the basket, (iv) the issuer is not included in the KBC Group Policy on Blacklisted Companies\* and (v) at the time the swap contracts are being concluded (see 'Permitted swap transactions'), the issuer of the share complies with the KBC Group Investment Policy\* (the 'Selection criteria').

\* The KBC Group Policy on Blacklisted Companies and the KBC Group Investment Policy can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > General exclusion policies for conventional funds and socially responsible investment funds, Paragraph 1 'KBC Group Policy on Blacklisted Companies' and 2 'KBC Group Investment Policy'.

### **Modifications to the basket due to mergers, acquisitions, demergers, nationalisation, bankruptcy or disqualification :**

#### **Mergers or acquisitions**

If, during the life of the sub-fund, one or more issuers of shares in the basket are involved in a merger or acquisition, the shares of the relevant issuers which still meet the selection criteria and comply with the KBC Group Investment Policy\* after these operations will be given a weighting in the basket equal to the sum of the weightings of the shares of all issuers involved in the operation. If, after the operation, none of the issuers involved in the operation meet the selection criteria or comply with the KBC Group Investment Policy\*, the procedures described under 'Nationalisation, bankruptcy or disqualification' will apply.

\* The KBC Group Investment Policy can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > General exclusion policies for conventional funds and responsible investment funds, Paragraph 2 'KBC Group Investment Policy'.

#### **Demergers**

If an issuer of a share in the basket proceeds to a demerger, then the share from the issuer concerned can be substituted either by one of the shares that came about as a result of the demerger and that meets the selection criteria and complies with the KBC Group Investment Policy\*, or by a basket of shares arising from the demerger which meet the selection criteria and comply with the KBC Group Investment Policy\*. This basket of shares will, when calculating the number of shares in the basket, be considered as one share. If, after the operation, none of the shares resulting from the demerger meet the selection criteria or comply with the KBC Group Investment Policy\*, the procedures described under 'Nationalisation, bankruptcy or disqualification' will apply.

\* The KBC Group Investment Policy can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > General exclusion policies for conventional funds and responsible investment funds, Paragraph 2 'KBC Group Investment Policy'.

#### **Nationalisation, bankruptcy or disqualification**

If an issuer of a share in the basket is nationalised, declared bankrupt or no longer meets the selection criteria ('disqualification'), this share will be sold at the last known price before removal. The amount thus realised will then be invested until Maturity at the rate of interest in force on money or bond markets at the moment of removal, and this for a term equal to the term remaining until Maturity of the sub-fund. The realised amount plus the interest will be taken into account at Maturity as the result achieved for that share in order to calculate the final increase in the value of the basket at Maturity.

#### **Volatility of the net asset value**

The volatility of the net asset value may be high due to the composition of the portfolio.

#### **Securities Financing Transactions (SFTs)**

The sub-fund may not lend any financial instruments.

### General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

### Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'

## 2.1.4. Financial portfolio management

The intellectual management, with the exception of the creation of the sub-fund and its maintenance in terms of the technical, product-specific and legal aspects has been delegated by the management company to KBC Fund Management Limited, 4th Floor, Scotch House, 6/7 Burgh Quay, Dublin 2, D02 VK44, Ireland.

## 2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

## 2.1.6. Index and benchmark

Not applicable

## 2.1.7. Policy pursued during the financial year

### Composition of the basket on report date

## 2.1.8. Summary risk indicator

2 on a scale of 1 (lowest risk) to 7 (highest risk)

- a moderate level of inflation risk: there is no protection against an increase of the inflation.
- a high level of market risk: the level of the risk reflects the volatility of the stock market and the exchange rate risk in relation to the euro.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market and the exchange rate risk in relation to the euro.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

## 2.2. Balance sheet

| Balance sheet layout              |                                                                   | 28/02/2026<br>(in Czech koruna) | 28/02/2025<br>(in Czech koruna) |

## 2.4.5. Performance figures

BE6353302936  
Optimum Fund ČSOB Potraviny a zboží základní potřeby 3 CAP  
Annual performance from 01/03/2024 through 28/02/2026 (in CZK)

If the results are expressed in a currency other than the euro, the return may be higher or lower due to exchange rate fluctuations.

| Cap Div | ISIN Code    | Curr<br>ency | 1 year           |               | 3 years          |               | 5 years          |               | 10 years         |               | Since Launch*    |                  |

Risk warning: Past performance is not a guide to future performance.

\* Return on annual basis.

- The bar chart shows the performance for full financial years(period of 12 months prior to the half-yearly closing).
- The figures do not take account of any restructuring..
- Calculated in CZK and in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage.
- Calculation method for date D, where NAV stands for net asset value:  
Capitalisation units (CAP)  
Return on date D over a period of X years :  

$$[NIW(D) / NIW(Y)] ^ {1 / X} - 1$$
 where Y = D-X  
 Return on date D since the start date S of the unit:  

$$[NIW(D) / NIW(S)] ^ {1 / F} - 1$$
 where F = 1 if the unit has existed for less than one year on date D  
 where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D
- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation shares.

## 2.4.6. Costs

### Ongoing Charges:

Management fees and other administrative or operating costs: 1,100%  
Transaction costs: 0,000%

Percentage calculated at reporting date: 28 February 2026 (period of 12 months prior to the half-yearly closing).

A more detailed explanation with respect to the method of calculating ongoing charges and the relevant exclusions can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.5. Ongoing charges'

### Existence of Commission Sharing Agreements

Not applicable

### Fee sharing agreements en rebates

The management company has shared 70.00% of its fee with the distributor, and institutional and/or professional parties.

This percentage has been calculated relative to the fee for managing the investment portfolio of the sub-fund when it was launched.

## 2.4.7. Notes to the financial statements and other data

### Fee for managing the investment portfolio

KBC Asset Management NV receives a fee for managing the sub-fund's investments. This fee consists of a varying amount of max. 0.2 CZK per unit per year (with a maximum of CZK per unit per year for risk management).

This fee, which is calculated every six months, is paid monthly on the last banking day of each month. It can change from one six-month period to the next, within the limits set out below, and is based on the number of units issued at the start of each six-month period.

In the calculation, account is taken of the difference between:

- the return generated by the investments in bonds and other debt instruments, deposits, and/or liquid assets in order to achieve the capital protection on the Maturity date (see *The financial mechanism used to achieve capital protection*), and
- the expenses borne by the sub-fund to achieve a potential return (see *Permitted 'swap' transactions*),
- after deducting the expected fixed and variable expenses of the sub-fund, as mentioned above.

Of this, KBC Fund Management Ltd. receives a fee of no more than 0.19 CZK per unit per year from KBC Asset Management NV for the intellectual management of the sub-fund. KBC Fund Management Ltd. is a wholly owned subsidiary of KBC Asset Management NV.

KBC Asset Management NV has informed the bevek that, if due to the failure of the financial mechanism, the amount that should be paid per unit (after deducting taxes and charges) on the Maturity date, as relevant, is lower than the initial subscription price, KBC Asset Management NV may decide (but is not obliged to) to use the management fee it receives during the current financial year from the sub-fund – and possibly also from other sub-funds of the bevek – to cover this shortfall. This is not a guarantee from KBC Asset Management NV, which may

decide at any time and at its own discretion whether or not to use the management fee for this purpose. KBC Asset Management NV or one of its subsidiaries has also been appointed manager of the SPVs in which the sub-fund may invest (see *Criteria the investments must meet*). KBC Asset Management NV or one of its subsidiaries, as the case may be, receives an annual fee from the relevant SPVs for their management. This management fee may not exceed 0.15% per year and is calculated on the assets managed at the end of the quarter.

The sum of (i) the fee for managing the investment portfolio that the sub-fund pays to the management company and (ii) the management fee that the SPVs in which the sub-fund invests pay to the asset manager, shall never exceed 0.20 CZK per unit per year, as described above.

Launch date: 2 August 2016

Initial subscription price: 1 000 CZK

Currency: CZK

##### **Classic Shares Capitalisation**

Launch date: 3 May 2021

Initial subscription price: 1 000 CZK

Currency: CZK

#### 2.1.2. Stock exchange listing

Not applicable.

#### 2.1.3. Goal and key principles of the investment policy

##### Object of the sub-fund

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. The investment policy aims to track the strategy recommended for an investor with a specific risk profile.

##### Sub-fund's investment policy

###### *Permitted asset classes*

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

###### *Restrictions of the investment policy*

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

## Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. **Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.**

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

## Strategy selected

The sub-fund invests directly or indirectly in various asset classes, such as shares and/or share-related investments ("the stock component"), bonds and/or bond-related investments ("the bond component"), money market instruments, cash and/or alternative investments (including real estate, and financial instruments that are linked to price movements on the commodity market).

The bond component will never exceed 40% of the portfolio and the stock component will never be less than 60% of the portfolio.

The asset allocation follows the investment strategy recommended by CSOB Asset Management for the very dynamic investor on the Czech market (see [www.csobam.cz/portal/informace-o-csob-am](http://www.csobam.cz/portal/informace-o-csob-am) > Investiční strategie)

The stock component is invested in a worldwide selection of shares that may come from any region, sector or theme.

For details of the bond component, please see the 'Characteristics of the bonds and debt instruments' section below.

The currency risk of the assets of the sub-fund relative to the CZK can be fully or partially hedged and currency exposure can be taken in any currency and in any direction up to the level of the equity component in accordance with the investment strategy recommended by CSOB Asset Management.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

## Transparency of adverse sustainability impacts

The sub-fund took into account the principal adverse impacts of its investment decisions on sustainability factors ("PAI"), as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on Sustainability Disclosures in the Financial Services Sector ("SFDR") through the General exclusion Policy and implicitly through the Proxy Voting and Engagement Policy.

The principal adverse impacts on sustainability taken into account through the General exclusion policy were exposure to controversial weapons ('indicator 14'), exposure to companies active in the fossil fuel sector ('indicator 4') and Violations of the principles of the UN Global Compact or the Organization for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises ('indicator 10').

The principal adverse impacts on sustainability implicitly taken into account through KBC Asset Management Group's the Proxy Voting and Engagement Policy were greenhouse gas emissions ('indicator 1'), carbon footprint ('indicator 2'), greenhouse gas intensity of investee companies ('indicator 3'), exposure to fossil fuel companies

('indicator 4') and gender diversity on the board of directors ('indicator 13').

### **Benchmark information**

The fund is actively managed with reference to the following benchmark: 80% MSCI All Countries World CZK Hedged - Net Return Index, 10% JP Morgan GBI Czech Republic 1-5Y CZK - Total Return Index, 6% iBoxx Eur Corporates 1-5 Y CZK Hedged - Total Return Index, 2% JP Morgan EMU Investment Grade 1-5Y CZK Hedged - Total Return Index, 1% JP Morgan EMBI CZK Hedged - Total Return Index, 1% JP Morgan GBI EM Global Diversified CZK - Total Return Index.

However, it is not the aim of the fund to replicate the benchmark. The composition of the benchmark is taken into account when compiling the portfolio.

The composition of the portfolio will to a large extent be similar to that of the benchmark.

The benchmark is also used to assess the performance of the sub-fund.

The benchmark is also used to determine the fund's risk limitation mechanism. This limits the extent to which the fund's return may deviate from the benchmark.

The longterm expected tracking error for this fund is 4.00%. The tracking error measures the volatility of the fund's return relative to that of the benchmark. The higher the tracking error, the more the fund's return fluctuates relative to the benchmark. Market conditions may cause the actual tracking error to differ from the expected tracking error.

### **Characteristics of the bonds and debt instruments**

The sub-fund invests in bonds and debt instruments issued by both companies and public authorities.

The sub-fund invests directly and/or indirectly at least 50% of its assets in bonds and debt instruments

- in securities rated investment grade (at least BBB-/Baa3 for long-term debt, A3/F3/P3 for short-term debt) by at least one of the following rating agencies:

Moody's Investors Service, Standard & Poor's or Fitch Ratings, and/or

- in government bonds issued in local currency or non-subordinated corporate bonds\* which do not have a credit rating from the rating agencies mentioned above but the issuer of which has investment grade rating by at least one of the rating agencies mentioned above, and/or

- in money market instruments whose issuer has an investment grade rating (minimum A3/F3/P3 for short-term debt) from at least one of the above rating agencies.

This means that the Sub-fund may invest up to 50% of its assets invested in bonds and debt instruments that do not have a credit rating from the above-mentioned rating agencies and/or which do not comply with the above-mentioned credit requirements.

All maturities are taken into consideration in the selection of bonds and debt instruments.

\*In the event of the bankruptcy of the relevant issuer, subordinated bonds are subordinated to the company's other debts: the company's other debts are paid first, then and only if there is still capital left, the holders of the subordinated bonds are fully or partially repaid; the holder of the subordinated bond does, however, have priority over the shareholders of the issuer in question.

## **Investments in assets other than securities or money market instruments**

**The sub-fund will primarily invest in units in Undertakings for Collective Investment.**

### **Securities Financing Transactions (SFTs)**

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.1. Securities Financing Transactions (SFTs)'.

### **General strategy for hedging the exchange risk**

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

### **Social, ethical and environmental aspects**

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'.

## **2.1.4. Financial portfolio management**

The intellectual management, with the exception of the creation of the sub-fund and its maintenance in terms of the technical, product-specific and legal aspects has been delegated by the management company to CSOB Asset Management a.s. investiční společnost, Radlicka 333/150, 150 57, Praha 5, Czech Republic.

## **2.1.5. Distributors**

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

## **2.1.6. Index and benchmark**

See 'Sub-fund's investment policy'.

## **2.1.7. Policy pursued during the financial year**

Currently we're neutral in our equity allocation after we reduced our bets due to the Iran war. The conflict risks higher oil prices for some time to come and the resulting spike in inflation joined with a roadblock to the economic growth may completely shift the narrative in the equity markets worldwide. The longer the strait of Hormuz is closed, the more pain is inflicted upon economies worldwide, from the emerging markets in Asia to the developed Western European countries.

From the regional point of view, we're still overweight Emerging markets and Europe against underweights in Pacific and North America. Within sectors we're most overweight in Materials, Financials and Technology. On the other hand, we're underweight Consumer Staples and Consumer Discretionary.

On the fixed-income side we're currently buyers of the Czech duration, where the yields seem attractive to us. We're slightly overweight in modified duration.

*There is limited exposure to Russian and/or Ukrainian positions. The main risk related to the Russian-Ukrainian conflict is market and performance risks, as we observe increased volatility in global financial markets. Obviously, countries, sectors and companies more closely linked to the conflict are more heavily impacted than others.*

*The SICAV held positions in International Investment Bank ("IIB"), which have been revalued to CZK 0.01 due to the entity becoming subject to financial sanctions.*

*As a consequence of these sanctions, IIB is unable to make payments under standard payment arrangements and therefore has been deprived of the possibility to fulfil obligations to bondholders, creditors and clients.*

## **2.1.8. Future policy**

We're wary of the current Iran conflict and the repercussions it may have on the global energy prices and, consequently on the economic growth worldwide. The longer this goes on, the more chances that central banks around the world will need to raise rates to battle higher prices. We're cautiously optimistic this will end sooner than later. Sector allocation is currently more positioned towards cyclical than towards defensives.

On the bond side, after taking some profit on long duration calls, we reduced our modified duration just before the conflict started. In the meanwhile, yields jumped up and we've increased our duration overweight again to take advantage of higher and more attractive yields. We also think that corporate bonds, especially from the high yield category, could be a good choice to increase risk/return of the fund.

## 2.1.9. Summary risk indicator (SRI)

Classic Shares CSOB Private Banking: 3 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Czech Koruna, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a high level of market risk: the level of the risk reflects the volatility of the equity component.
- a high level of performance risk: the level of the risk reflects the volatility of the equity component.

There is no capital protection.

Classic Shares CSOB Premium: 3 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Czech Koruna, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a high level of market risk: the level of the risk reflects the volatility of the equity component.
- a high level of performance risk: the level of the risk reflects the volatility of the equity component.

There is no capital protection.

Classic Shares: 3 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Czech Koruna, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a high level of market risk: the level of the risk reflects the volatility of the equity component.
- a high level of performance risk: the level of the risk reflects the volatility of the equity component.

There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

## 2.2. Balance sheet

| Balance sheet layout |                                                                   | 28/02/2026<br>(in Czech koruna) | 28/02/2025<br>(in Czech koruna) |

## 2.4.2. Changes in the composition of the assets of Optimum Fund ČSOB Velmi odvážný (in Czech koruna)

|                                        | <b>1<sup>st</sup> half of year</b> |
|----------------------------------------|------------------------------------|
| <b>Purchases</b>                       | 1,497,907,901.21                   |
| <b>Sales</b>                           | 754,213,350.73                     |
| <b>Total 1</b>                         | 2,252,121,251.94                   |
| <b>Subscriptions</b>                   | 756,359,079.70                     |
| <b>Redemptions</b>                     | 145,697,521.12                     |
| <b>Total 2</b>                         | 902,056,600.82                     |
| <b>Monthly average of total assets</b> | 4,396,949,779.70                   |
| <b>Turnover rate</b>                   | 30.70%                             |

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period. A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions. A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio. Active asset management may result in high turnover rates (monthly percentage >50%).

The detailed list of transactions can be consulted free of charge at the company designated as financial service:  
KBC Bank NV, Havenlaan 2, B-1080 Brussels

### **2.4.3. Amount of commitments in respect of financial derivatives positions**

Risk warning: Past performance is not a guide to future performance.

\* Return on annual basis.

### Classic Shares CSOB Private Banking

- The bar chart shows the performance for full financial years(period of 12 months prior to the half-yearly closing).
- The figures do not take account of any restructuring..
- Calculated in CZK and in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage.
- Calculation method for date D, where NAV stands for net asset value:  
Capitalisation units (CAP)  
 Return on date D over a period of X years :  

$$[\text{NIW}(D) / \text{NIW}(Y)]^{1/X} - 1$$
 where  $Y = D - X$   
 Return on date D since the start date S of the unit:  

$$[\text{NIW}(D) / \text{NIW}(S)]^{1/F} - 1$$
 where  $F = 1$  if the unit has existed for less than one year on date D  
 where  $F = (D - S) / 365.25$  if the unit has existed for longer than one year on date D
- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation shares.

### Classic Shares CSOB Premium

- The bar chart shows the performance for full financial years(period of 12 months prior to the half-yearly closing).
- The figures do not take account of any restructuring..
- Calculated in CZK and in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage.
- Calculation method for date D, where NAV stands for net asset value:  
Capitalisation units (CAP)  
 Return on date D over a period of X years :  

$$[\text{NIW}(\text{D}) / \text{NIW}(\text{Y})]^{[1 / \text{X}] - 1}$$
 where Y = D-X  
 Return on date D since the start date S of the unit:  

$$[\text{NIW}(\text{D}) / \text{NIW}(\text{S})]^{[1 / \text{F}] - 1}$$
 where F = 1 if the unit has existed for less than one year on date D  
 where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D
- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation shares.

## 2.4.6. Costs

### Ongoing Charges:

#### Classic Shares CSOB Private Banking Capitalisation :

Management fees and other administrative or operating costs: 1,528%  
Transaction costs: 0,729%

#### Classic Shares CSOB Premium Capitalisation :

Management fees and other administrative or operating costs: 1,691%  
Transaction costs: 0,728%

#### Classic Shares Capitalisation :

Management fees and other administrative or operating costs: 1,782%  
Transaction costs: 0,729%

Percentage calculated at reporting date: 28 February 2026 (period of 12 months prior to the half-yearly closing).

A more detailed explanation with respect to the method of calculating ongoing charges and the relevant exclusions can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.5. Ongoing charges'

### Existence of Commission Sharing Agreements

Not applicable

### Existence of fee sharing agreements and rebates

The management company has shared 69,99% of its fee with the distributor, and institutional and/or professional parties.

If the management company invests the assets of the undertaking for collective investment in units of undertakings for collective investment that are not managed by an entity of KBC Groep NV, and receives a fee for doing so, it will pay this fee to the undertaking for collective investment.

Fee-sharing does not affect the amount of the management fee paid by a **sub-fund** to the management company. This management fee is subject to the limitations laid down in **the articles of association**. The limitations may only be amended after approval by the General Meeting.

### Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

### Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

### Financial derivatives on financial indices

The following financial indices were used as the underlying for financial derivatives::

**The EURO STOXX 50® (Bloomberg code: SX5E Index)** is a weighted equity index computed by Stoxx Ltd. The dividend is not reinvested. The main purpose of this index is to provide a continuous indication of market trends on the European stock markets. The base value of the index is 1000, calculated on the basis of the underlying prices recorded on 31 December 1991.

The Euro Stoxx 50® consists solely of shares from countries participating in the Economic and Monetary Union, with the exception of Luxembourg. On 10 April 1998, the following countries were included in the index: Belgium, Cyprus, Germany, Estonia, Finland, France, Greece, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, the Netherlands, Austria, Portugal, Slovakia, Slovenia and Spain.

The index consists of the 50 largest European shares in terms of shares that are freely negotiable, and the shares are accordingly weighted on the basis of this criterion.

The Euro Stoxx 50® is published daily in L'Echo, De Tijd, The Financial Times and The Wall Street Journal Europe.

Stoxx Limited has all proprietary rights with respect to the index. In no way Stoxx Limited endorses, sponsors or is otherwise involved in the issue and offering the shares of Optimum Fund ČSOB Velmi odvážný. Stoxx Limited disclaims any liability for the issue and offering of the shares of this undertaking for collective investment.

The **S&P 500** is an equity index computed by Standard & Poor's that is made up of 500 shares. The dividend is not reinvested. The S&P 500 serves primarily as a continuous indicator of market trends on the US stock markets. The value of the S&P 500 index is calculated on the basis of the market value of the shares of 500 companies at a given point in time, compared to the market value of the shares of 500 similar companies during the reference period from 1941 to 1943. The index is published daily in L'Echo, De Tijd, The Financial Times and The Wall Street Journal Europe.

Standard & Poor's has all proprietary rights with respect to the index. In no way Standard & Poor's endorses, sponsors or is otherwise involved in the issue and offering the shares of this undertaking for collective investment. Standard & Poor's disclaims any liability for the issue and offering of the shares of this undertaking for collective investment.

The value and, if available for distribution, the composition of the aforementioned financial indices may be obtained from the branches providing the financial service.

Initial subscription price: 1 000 CZK

Currency: CZK

##### **Classic Shares Capitalisation**

Launch date: 3 May 2021

Initial subscription price: 1 000 CZK

Currency: CZK

#### 2.1.2. Stock exchange listing

Not applicable.

#### 2.1.3. Goal and key principles of the investment policy

##### Object of the sub-fund

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income.

##### Sub-fund's investment policy

###### *Permitted asset classes*

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

###### *Restrictions of the investment policy*

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

## Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. **Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.**

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

## Strategy selected

The sub-fund invests directly or indirectly in various asset classes, such as shares and/or share-related investments ("the stock component"), bonds and/or bond-related investments ("the bond component"), money market instruments, cash and/or alternative investments (including real estate, and financial instruments that are linked to price movements on the commodity market).

The bond component will never exceed 95% of the portfolio and the stock component will never exceed 20% of the portfolio.

The asset allocation follows the investment strategy recommended by CSOB Asset Management for the very defensive investor on the Czech market (see [www.csobam.cz/portal/informace-o-csob-am](http://www.csobam.cz/portal/informace-o-csob-am) >Investiční strategie).

The stock component is invested in a worldwide selection of shares that may come from any region, sector or theme.

For details of the bond component, please see the 'Characteristics of the bonds and debt instruments' section below.

The currency risk of the assets of the sub-fund relative to the CZK can be fully or partially hedged and currency exposure can be taken in any currency and in any direction up to the level of the equity component in accordance with the investment strategy recommended by CSOB Asset Management.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

## Transparency of adverse sustainability impacts

The sub-fund took into account the principal adverse impacts of its investment decisions on sustainability factors ("PAI"), as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on Sustainability Disclosures in the Financial Services Sector ("SFDR") through the General exclusion Policy and implicitly through the Proxy Voting and Engagement Policy.

The principal adverse impacts on sustainability taken into account through the General exclusion policy were exposure to controversial weapons ('indicator 14'), exposure to companies active in the fossil fuel sector ('indicator 4') and Violations of the principles of the UN Global Compact or the Organization for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises ('indicator 10').

The principal adverse impacts on sustainability implicitly taken into account through KBC Asset Management Group's the Proxy Voting and Engagement Policy were greenhouse gas emissions ('indicator 1'), carbon footprint ('indicator 2'), greenhouse gas intensity of investee companies ('indicator 3'), exposure to fossil fuel companies

('indicator 4') and gender diversity on the board of directors ('indicator 13').

### **Benchmark information**

The fund is actively managed with reference to the following benchmark: 45% JP Morgan GBI Czech Republic 1-5Y CZK - Total Return Index, 9% JP Morgan EMU Investment Grade 1-5Y CZK Hedged - Total Return Index, 4.5% JP Morgan EMBI CZK Hedged - Total Return Index, 4.5% JP Morgan GBI EM Global Diversified CZK - Total Return Index, 27% iBoxx Eur Corporates 1-5 Y CZK Hedged - Total Return Index, 10% MSCI All Countries World CZK Hedged - Net Return Index.

However, it is not the aim of the fund to replicate the benchmark. The composition of the benchmark is taken into account when compiling the portfolio.

The composition of the portfolio will to a large extent be similar to that of the benchmark.

The benchmark is also used to assess the performance of the sub-fund.

The benchmark is also used to determine the fund's risk limitation mechanism. This limits the extent to which the fund's return may deviate from the benchmark.

The longterm expected tracking error for this fund is 1.50%. The tracking error measures the volatility of the fund's return relative to that of the benchmark. The higher the tracking error, the more the fund's return fluctuates relative to the benchmark. Market conditions may cause the actual tracking error to differ from the expected tracking error.

### **Characteristics of the bonds and debt instruments**

The sub-fund invests in bonds and debt instruments issued by both companies and public authorities.

The sub-fund invests directly and/or indirectly at least 50% of its assets in bonds and debt instruments

- in securities rated investment grade (at least BBB-/Baa3 for long-term debt, A3/F3/P3 for short-term debt) by at least one of the following rating agencies:

Moody's Investors Service, Standard & Poor's or Fitch Ratings, and/or

- in government bonds issued in local currency or non-subordinated corporate bonds\* which do not have a credit rating from the rating agencies mentioned above but the issuer of which has investment grade rating by at least one of the rating agencies mentioned above, and/or

- in money market instruments whose issuer has an investment grade rating (minimum A3/F3/P3 for short-term debt) from at least one of the above rating agencies.

This means that the Sub-fund may invest up to 50% of its assets invested in bonds and debt instruments that do not have a credit rating from the above-mentioned rating agencies and/or which do not comply with the above-mentioned credit requirements.

All maturities are taken into consideration in the selection of bonds and debt instruments.

\*In the event of the bankruptcy of the relevant issuer, subordinated bonds are subordinated to the company's other debts: the company's other debts are paid first, then and only if there is still capital left, the holders of the subordinated bonds are fully or partially repaid; the holder of the subordinated bond does, however, have priority over the shareholders of the issuer in question.

## **Investments in assets other than securities or money market instruments**

**The sub-fund may invest primarily in units in Undertakings for Collective Investment.**

### **Securities Financing Transactions (SFTs)**

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.1. Securities Financing Transactions (SFTs)'.

### **General strategy for hedging the exchange risk**

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

### **Social, ethical and environmental aspects**

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'.

## **2.1.4. Financial portfolio management**

The intellectual management, with the exception of the creation of the sub-fund and its maintenance in terms of the technical, product-specific and legal aspects has been delegated by the management company to CSOB Asset Management a.s. investiční společnost, Radlicka 333/150, 150 57, Praha 5, Czech Republic.

## **2.1.5. Distributors**

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

## **2.1.6. Index and benchmark**

See 'Sub-fund's investment policy'.

## **2.1.7. Policy pursued during the financial year**

Currently we're neutral in our equity allocation after we reduced our bets due to the Iran war. The conflict risks higher oil prices for some time to come and the resulting spike in inflation joined with a roadblock to the economic growth may completely shift the narrative in the equity markets worldwide. The longer the strait of Hormuz is closed, the more pain is inflicted upon economies worldwide, from the emerging markets in Asia to the developed Western European countries.

From the regional point of view, we're still overweight Emerging markets and Europe against underweights in Pacific and North America. Within sectors we're most overweight in Materials, Financials and Technology. On the other hand, we're underweight Consumer Staples and Consumer Discretionary.

On the fixed-income side we're currently buyers of the Czech duration, where the yields seem attractive to us. We're slightly overweight in modified duration.

*There is limited exposure to Russian and/or Ukrainian positions. The main risk related to the Russian-Ukrainian conflict is market and performance risks, as we observe increased volatility in global financial markets. Obviously, countries, sectors and companies more closely linked to the conflict are more heavily impacted than others.*

*The SICAV held positions in International Investment Bank ("IIB"), which have been revalued to CZK 0.01 due to the entity becoming subject to financial sanctions.*

*As a consequence of these sanctions, IIB is unable to make payments under standard payment arrangements and therefore has been deprived of the possibility to fulfil obligations to bondholders, creditors and clients.*

## **2.1.8. Future policy**

We're wary of the current Iran conflict and the repercussions it may have on the global energy prices and, consequently on the economic growth worldwide. The longer this goes on, the more chances that central banks around the world will need to raise rates to battle higher prices. We're cautiously optimistic this will end sooner than later. Sector allocation is currently more positioned towards cyclical than towards defensives.

On the bond side, after taking some profit on long duration calls, we reduced our modified duration just before the conflict started. In the meanwhile, yields jumped up and we've increased our duration overweight again to take advantage of higher and more attractive yields. We also think that corporate bonds, especially from the high yield category, could be a good choice to increase risk/return of the fund.

### 2.1.9. Summary risk indicator (SRI)

Classic Shares CSOB Private Banking: 2 on a scale of 1 (lowest risk) to 7 (highest risk)

- a moderate level of inflation risk: the bond component does not provide any protection against an increase in inflation.

There is no capital protection.

Classic Shares CSOB Premium: 2 on a scale of 1 (lowest risk) to 7 (highest risk)

- a moderate level of inflation risk: the bond component does not provide any protection against an increase in inflation.

There is no capital protection.

Classic Shares: 2 on a scale of 1 (lowest risk) to 7 (highest risk)

- a moderate level of inflation risk: the bond component does not provide any protection against an increase in inflation.

There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

## 2.2. Balance sheet

## 2.4.2. Changes in the composition of the assets of Optimum Fund ČSOB Velmi opatrný (in Czech koruna)

|                                        | <b>1<sup>st</sup> half of year</b> |
|----------------------------------------|------------------------------------|
| <b>Purchases</b>                       | 3,434,670,440.68                   |
| <b>Sales</b>                           | 1,521,546,409.70                   |
| <b>Total 1</b>                         | 4,956,216,850.38                   |
| <b>Subscriptions</b>                   | 2,332,285,906.53                   |
| <b>Redemptions</b>                     | 524,678,720.42                     |
| <b>Total 2</b>                         | 2,856,964,626.95                   |
| <b>Monthly average of total assets</b> | 8,389,189,276.30                   |
| <b>Turnover rate</b>                   | 25.02%                             |

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period. A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions. A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio. Active asset management may result in high turnover rates (monthly percentage >50%).

The detailed list of transactions can be consulted free of charge at the company designated as financial service:  
KBC Bank NV, Havenlaan 2, B-1080 Brussels

### **2.4.3. Amount of commitments in respect of financial derivatives positions**

\* Return on annual basis.

### Classic Shares CSOB Private Banking

- The bar chart shows the performance for full financial years (period of 12 months prior to the half-yearly closing).
- The figures do not take account of any restructuring..
- Calculated in CZK and in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage. In the case of units that pay dividends, the dividend is incorporated geometrically in the return.
- Calculation method for date D, where NAV stands for net asset value:

#### Capitalisation units (CAP)

Return on date D over a period of X years :

$$[\text{NIW}(D) / \text{NIW}(Y)]^{1/X} - 1$$

where  $Y = D - X$

Return on date D since the start date S of the unit:

$$[\text{NIW}(D) / \text{NIW}(S)]^{1/F} - 1$$

where  $F = 1$  if the unit has existed for less than one year on date D

where  $F = (D - S) / 365.25$  if the unit has existed for longer than one year on date D

#### Distribution units (DIV)

Return on date D over a period of X years :

$$[C * \text{NIW}(D) / \text{NIW}(Y)]^{1/X} - 1$$

where  $Y = D - X$

Return on date D since the start date S of the unit:

$$[C * \text{NIW}(D) / \text{NIW}(S)]^{1/F} - 1$$

where  $F = 1$  if the unit has existed for less than one year on date D

where  $F = (D - S) / 365.25$  if the unit has existed for longer than one year on date D

where C is a factor that is determined for all N dividends between the calculation date D and the reference date.

For dividend i on date Di with value Wi:

$$C_i = [W_i / \text{NIW}(D_i)] + 1$$

$i = 1 \dots N$

from which  $C = C_0 * \dots * C_N$ .

- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation and distribution shares

### Ongoing Charges:

Management fees and other administrative or operating costs: 0,863%  
Transaction costs: 0,434%

Management fees and other administrative or operating costs: 0,942%  
Transaction costs: 0,428%

Management fees and other administrative or operating costs: 1,034%  
Transaction costs: 0.430%

A more detailed explanation with respect to the method of calculating ongoing charges and the relevant exclusions can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.5. Ongoing charges'

Not applicable

The management company has shared 69,87% of its fee with the distributor, and institutional and/or professional parties.

If the management company invests the assets of the undertaking for collective investment in units of undertakings for collective investment that are not managed by an entity of KBC Groep NV, and receives a fee for doing so, it will pay this fee to the undertaking for collective investment.

Fee-sharing does not affect the amount of the management fee paid by a **sub-fund** to the management company. This management fee is subject to the limitations laid down in **the articles of association**. The limitations may only be amended after approval by the General Meeting.

## Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

## Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

## Financial derivatives on financial indices

The following financial indices were used as the underlying for financial derivatives::

**The EURO STOXX 50® (Bloomberg code: SX5E Index)** is a weighted equity index computed by Stoxx Ltd. The dividend is not reinvested. The main purpose of this index is to provide a continuous indication of market trends on the European stock markets. The base value of the index is 1000, calculated on the basis of the underlying prices recorded on 31 December 1991.

The Euro Stoxx 50® consists solely of shares from countries participating in the Economic and Monetary Union, with the exception of Luxembourg. On 10 April 1998, the following countries were included in the index: Belgium, Cyprus, Germany, Estonia, Finland, France, Greece, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, the Netherlands, Austria, Portugal, Slovakia, Slovenia and Spain.

The index consists of the 50 largest European shares in terms of shares that are freely negotiable, and the shares are accordingly weighted on the basis of this criterion.

The Euro Stoxx 50® is published daily in L'Echo, De Tijd, The Financial Times and The Wall Street Journal Europe.

Stoxx Limited has all proprietary rights with respect to the index. In no way Stoxx Limited endorses, sponsors or is otherwise involved in the issue and offering the shares of Optimum Fund ČSOB Velmi opatrný . Stoxx Limited disclaims any liability for the issue and offering of the shares of this undertaking for collective investment.

The **S&P 500** is an equity index computed by Standard & Poor's that is made up of 500 shares. The dividend is not reinvested. The S&P 500 serves primarily as a continuous indicator of market trends on the US stock markets. The value of the S&P 500 index is calculated on the basis of the market value of the shares of 500 companies at a given point in time, compared to the market value of the shares of 500 similar companies during the reference period from 1941 to 1943. The index is published daily in L'Echo, De Tijd, The Financial Times and The Wall Street Journal Europe.

Standard & Poor's has all proprietary rights with respect to the index. In no way Standard & Poor's endorses, sponsors or is otherwise involved in the issue and offering the shares of this undertaking for collective investment. Standard & Poor's disclaims any liability for the issue and offering of the shares of this undertaking for collective investment.

The value and, if available for distribution, the composition of the aforementioned financial indices may be obtained from the branches providing the financial service.

#### 2.1.2. Stock exchange listing

Not applicable.

#### 2.1.3. Goal and key principles of the investment policy

##### Object of the sub-fund

The object of the sub-fund is twofold (before deducting charges and taxes):

- (1) To repay per share the initial subscription price of 10 CZK at Maturity.(i.e. the capital protection). This capital protection is provided through a financial mechanism that will be explained in more detail under the heading *Capital protection*. However, the capital protection does not apply to shareholders who sell their shares before Maturity.
- (2) To provide a potential return through an investment in swaps. The various types of swaps in which the sub-fund may invest are explained in more detail under the *Potential return*.

##### Capital Protection

###### The financial mechanism used to achieve capital protection

The financial mechanism used to achieve capital protection at Maturity consists of an investment of the total amount of the subscriptions in bonds and other debt instruments, deposits and/or liquid assets (including cash deposited on a time-deposit account or current account). These investments can have different maturities and coupon payment dates. Using the swaps described under the heading *Permitted swap transactions* (2), these investments are matched with the due dates of the obligations of the sub-fund.

##### Criteria the investments must meet

The investments must meet one of the following criteria:

- (1) An investment in deposits and/or debt instruments, placed with or issued by financial institutions under the prudential supervision of and established in a Member State of the European Economic Area.
- (2) An investment in debt instruments issued or guaranteed by a Member State of the European Economic Area.
- (3) An investment under an investment strategy with an analogous structure and identical counterparty risk as a direct investment in deposits and/or debt instruments as stated under (1) and (2) above.

The investments under (3) may consist of:

- (A) An investment in notes listed on a stock exchange that are issued by 'Special Purpose Vehicles' (SPVs).

These SPVs are managed by KBC Asset Management NV or a subsidiary.

The underlying assets of the bonds issued by the SPVs consist of a diversified portfolio of deposits issued by financial institutions, bonds, other debt instruments and financial derivatives. When selecting these underlying assets, account is taken of criteria relating to allocation and creditworthiness (see *Permitted asset classes* and *Characteristics of the bonds and other debt instruments*) in order to limit the counterparty risk.

Further details of the criteria these underlying deposits, bonds, other debt instruments and financial derivatives must meet are provided in the base prospectuses for the SPVs, which can be viewed at or downloaded from [www.kbc.be/prospectus/spv](http://www.kbc.be/prospectus/spv).

Investors are provided with information on the investments made by both the sub-fund and the SPVs in the annual and half-yearly reports on the open-ended investment company under Belgian law (bevek) to which the sub-fund belongs. These reports can also be viewed at or downloaded from [www.kbc.be](http://www.kbc.be).

- (B) An investment in:
- deposits with financial institutions under prudential supervision in the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia and/or
  - debt instruments issued by financial institutions under prudential supervision in the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia and/or
  - debt instruments issued or guaranteed by the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia.

Prudential supervision of financial institutions in the United Kingdom, Switzerland, the United States of America, Japan, Canada and Australia can be equated to prudential supervision of financial institutions in the member states of the European Economic Area.

The investments in debt instruments issued by financial institutions under prudential supervision in the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia or issued or guaranteed by the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia have a minimum credit rating as set out under the heading *Characteristics of the bonds and other debt instruments*.

- (C) The investments may also consist of a combination of the investments specified under (A) and (B).

### **No formal guarantee**

No formal guarantee of repayment of the initial subscription price is provided to the sub-fund or to its shareholders. In other words, the capital protection is not binding for the sub-fund as regards the result generated, although achieving this objective through the operation of the financial mechanism is still the top priority.

If the financial mechanism fails and, as a result, the amount per share payable (before deducting charges and taxes) at Maturity is lower than the initial subscription price, KBC Asset Management NV may decide (but is not obliged) to use the management fee it has received during the current financial year from the sub-fund – and possibly also from other sub-funds of the bevek – to cover the shortfall. This is not a guarantee from KBC Asset Management NV, which may decide at any time and at its own discretion whether or not to use the management fee for this purpose.

The capital protection does not apply to shareholders who sell their shares before Maturity.

### **Potential return**

To achieve a potential return, the sub-fund concludes swaps with one or more prime counterparties. Consequently, the sub-fund transfers a portion of the future income from the investments that were made to achieve capital protection to this counterparty (these counterparties) during the life of the sub-fund. In exchange, the counterparty (counterparties) undertake to provide a potential return as specified under the heading *Selected strategy*.

### **Sub-fund's investment policy**

#### **Permitted asset classes**

Pursuant to the provisions of the Royal Decree of 12 November 2012 on undertakings for collective investment complying with the conditions of Directive 2009/65/EC, the sub-fund may invest in transferable securities (including bonds and other debt instruments), money market instruments, units (shares) in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as and to the extent permitted by the applicable legislation.

The investment limits and restrictions set out in the Royal Decree of 12 November 2012 on undertakings for collective investment complying with the conditions of Directive 2009/65/EC will be respected at all times.

### **Characteristics of the bonds and other debt instruments**

During the sub-fund's life, the average credit rating of the bonds and other debt instruments shall be at least 'A-' from Standard & Poor's or an equivalent rating from Moody's or Fitch, or, if there is no credit rating available, an average credit risk profile that the manager considers to be at least equivalent.

At the start of the investment, the credit rating of the long-term bonds and other debt instruments shall be at least 'A-' from Standard & Poor's or an equivalent rating from Moody's or Fitch, or, if there is no credit rating available, a credit risk profile that the manager considers to be at least equivalent.

At the start of the investment, the credit rating of the short-term bonds and other debt instruments shall be at least 'A-1' from Standard & Poor's or an equivalent rating from Moody's or Fitch, or, if there is no credit rating available, a credit risk profile that the manager considers to be at least equivalent.

When selecting the bonds and other debt instruments, all maturities are taken into consideration.

### Permitted swap transactions

**The swaps described below have been concluded with a prime counterparty or prime counterparties within the limits laid down by law.**

(1) To achieve a potential return, the sub-fund concludes swaps. Under such swap contracts, the sub-fund transfers a portion of the future income from the investments described under the heading 'Permitted asset classes' to the counterparty or counterparties during the life of the sub-fund. In exchange, the counterparty or counterparties undertake to provide a potential return as specified under the heading *Selected strategy*.

**The swaps under (1) are essential to achieve the sub-fund's investment objectives, since this technique facilitates achievement of the goal of generating a potential return.**

**The sub-fund's risk profile is not affected by the use of these swaps.**

(2) If necessary, the sub-fund also concludes swaps to match the due dates of the commitments of the sub-fund with those of the cash flows stemming from the deposits, bonds and other debt instruments described under the heading *Criteria the investments must meet*.

**These swaps are essential to achieve the sub-fund's investment objectives, since there are not enough bonds and other debt instruments available on the market whose coupon payments and maturity dates always perfectly match the due dates of the sub-fund's obligations.**

**The sub-fund's risk profile is not affected by the use of these swaps.**

(3) In addition, the sub-fund may conclude swaps to protect itself against the credit risk in respect of issuers of bonds and other debt instruments. Through this type of swap, one or more counterparties takes over the risk of an issuer of a bond or other debt instrument in the sub-fund's portfolio defaulting, in exchange for a fee payable by the sub-fund.

**The swaps under (3) serve to hedge the credit risk.**

**The sub-fund's risk profile is not affected by the use of these swaps.**

### Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

### Strategie selected

#### Investment objectives and strategy:

The sub-fund has two investment objectives: firstly, it seeks to repay at Maturity 100% of the initial subscription price and secondly a possible capital gain that is contingent on the evolution of a basket of 30 shares of companies operating in the pharmaceutical and healthcare industries.

At maturity:

- If the evolution of the basket of 30 shares  $(= (\text{End Value} - \text{Starting Value}) / \text{Starting Value})$  is less than (or equal to) 12%, then a return of 12% is settled at 100% of the initial subscription price.
- If the evolution of the basket of 30 shares exceeds 12%, then 100% of the increase in the basket  $(= (\text{End Value} - \text{Starting Value}) / \text{Starting Value})$ , will be offset at 100% of the initial subscription price.

Thus, the return at Maturity will therefore be at least 12%. (actuarial yield: 2.03% before costs and taxes).

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

### Transparency of adverse sustainability impacts

The sub-fund took into account the principal adverse impacts of its investment decisions on sustainability factors ("PAI") as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on disclosure on sustainability in the financial services sector ("SFDR") through KBC Group's Investment Policy and KBC Group Policy on Blacklisted Companies.

Based on the KBC Group Policy on Blacklisted Companies, all companies on the 'KBC Group Blacklist' (including companies involved in controversial weapons such as those prohibited by Belgian law and white phosphorus weapons) are excluded as well as the worst offenders of the UN Global Compact.

Consequently, the sub-fund took into account exposure to controversial weapons ('indicator 14') by excluding companies dealing with controversial weapon systems, and violations of the principles of the UN Global Compact or the Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises ('indicator 10') by excluding the worst offenders of the UN Global Compact.

## **Maturity**

Wednesday 28 February 2029 (payment with a value date of D+1 banking day)

## **Currency**

CZK, for all shares in the basket, changes in the value of the currency in which they are expressed relative to CZK are irrelevant. The investor pays the subscription amount in CZK and will be paid in CZK at Maturity (or earlier). The investor is not protected against any decline in the value of the currency in which the sub-fund is denominated relative to the euro.

## **Starting Value**

Value of the basket based on the weighted average of the Value of the shares included in the basket during the first 10 Valuation Days, starting from Monday 10 July 2023 inclusive.

## **End Value**

Value of the basket based on the weighted average of the Value of the shares included in the basket on the last Valuation Day of the month for the last 18 months before Maturity, more specifically from August 2027 through January 2029 (inclusive).

## **Value**

For all the shares, except for those listed on the Milan stock exchange, the closing price, namely the price of a share in the basket as calculated and notified at closing of the stock exchange by the authority of the stock exchange on which the share is listed (or its legal successor). The reference price is used for shares listed on the Milan stock exchange.

## **Valuation day**

A Valuation Day is set separately for each share in the basket.

A Valuation Day is a day that is a planned trading day both

- i) for the stock exchange on which the share is listed and
- ii) for the stock exchange whose activities have a substantial influence on the trading of options and futures on the share concerned

hereinafter referred to as 'the stock exchanges concerned'.

If on the Valuation Day,

- a) one of the stock exchanges concerned is unexpectedly closed or
- b) there is an event that disrupts the market for a stock exchange concerned or
- c) one of the stock exchanges concerned closes early,

the original Valuation Day is replaced by the following trading day when no event as referred to in a), b) or c) above occurs. An extraordinary closure that has been announced in advance is not considered as early closure.

If a valuation is made on consecutive Valuation Days, the trading day that replaces the original Valuation Day (i) may not coincide with another original Valuation Day and (ii) may not be a trading day that already replaces another original Valuation Day.

However, if an event as referred to under a), b) or c) above occurs on each of the eight trading days following the original Valuation Day,

- (i) the eighth trading day shall be considered as the original Valuation Day and
- (ii) the Bevek shall assess, in good faith and in consultation with the prime counterparty or counterparties with which it has concluded a swap agreement, the price of the share as it would have been traded on that eighth trading day and
- (iii) the Bevek will notify shareholders of any changes regarding setting the Starting Value and/or End Value and conditions of payment.

### Relevant basket

In the table below, the columns from left to right reflect the number of the share, the name of the share, the Bloomberg code, the exchange on which it trades (City-MIC Code) and its initial weighting in the basket.

| (i) | Name                         | Bloomberg Code  | Exchange          | Initial Weighting Coefficients |

### Basket composition methodology

KBC Asset Management used the following methodology to determine the composition of the sub-fund's basket.

#### Step 1 :

The starting point is the global equities universe from which a selection of potential investments is derived in accordance with the economic criteria for the composition of the basket and subject to restrictions regarding stock market capitalisation and liquid assets.

The economic criteria for the composition of the basket determine the size of the final selection.

#### Step 2 :

The selection of shares obtained in step 1 is reduced to a short list using a quantitative selection based on past financial data. The shares selected are those of companies that achieve a good score in terms of management quality, a healthy balance-sheet structure and a positive trend in profitability.

#### Step 3 :

The selection of shares obtained in step 2 is then verified by KBC Asset Management analysts. Shares that are permanently monitored by the analysts and those for which there is a negative recommendation, when the product is launched, are then withdrawn from the selection.

#### Step 4 :

The last reduction of the selection provides the final basket. This selection was made using the technical parameters of options (including the term, volatility, dividend yield and interest rate).

The final basket must satisfy the legal requirements concerning the quantity of shares and adequate distribution in the weighting. In addition, care is taken to ensure compliance with the geographical and/or sector spread. The analysts make a qualitative assessment of each share used taking account of specific knowledge of these shares and the sectors/regions from which they come, in accordance with the term of the sub-fund.

For the sub-fund Optimum Fund ČSOB Zdravotnictví a farmacie 4, about 201 equities were selected during step 1.

The initial selection was reduced by a maximum 20% in step 2.

This was again reduced by 10% (indicative) in step 3. The final basket set up during step 4 is described above under *Relevant basket*. This basket makes it possible to offer the sub-fund Optimum Fund ČSOB Zdravotnictví a farmacie 4 under the conditions set out in the investment policy referred to above. Here the selection process uses parameters that could affect the potential return on the investments.

#### *Selection criteria for the basket :*

A share/issuer may only form part of the basket if (i) it is listed on a stock exchange, (ii) the issuer is a company operating in the pharmaceutical or healthcare industry, (iii) the Board of Directors of the Bevek has approved its inclusion in the basket, (iv) the issuer is not included in the KBC Group Policy on Blacklisted Companies\* and (v) at the time the swap contracts are being concluded (see 'Permitted swap transactions'), the issuer of the share complies with the KBC Group Investment Policy\* (the 'Selection criteria').

\* The KBC Group Policy on Blacklisted Companies and the KBC Group Investment Policy can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > General exclusion policies for conventional funds and socially responsible investment funds, Paragraph 1 'KBC Group Policy on Blacklisted Companies' and 2 'KBC Group Investment Policy'.

### **Modifications to the basket due to mergers, acquisitions, demergers, nationalisation, bankruptcy or disqualification :**

#### **Mergers or acquisitions**

If, during the life of the sub-fund, one or more issuers of shares in the basket are involved in a merger or acquisition, the shares of the relevant issuers which still meet the selection criteria and comply with the KBC Group Investment Policy\* after these operations will be given a weighting in the basket equal to the sum of the weightings of the shares of all issuers involved in the operation. If, after the operation, none of the issuers involved in the operation meet the selection criteria or comply with the KBC Group Investment Policy\*, the procedures described under 'Nationalisation, bankruptcy or disqualification' will apply.

\* The KBC Group Investment Policy can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > General exclusion policies for conventional funds and responsible investment funds, Paragraph 2 'KBC Group Investment Policy'.

#### **Demergers**

If an issuer of a share in the basket proceeds to a demerger, then the share from the issuer concerned can be substituted either by one of the shares that came about as a result of the demerger and that meets the selection criteria and complies with the KBC Group Investment Policy\*, or by a basket of shares arising from the demerger which meet the selection criteria and comply with the KBC Group Investment Policy\*. This basket of shares will, when calculating the number of shares in the basket, be considered as one share. If, after the operation, none of the shares resulting from the demerger meet the selection criteria or comply with the KBC Group Investment Policy\*, the procedures described under 'Nationalisation, bankruptcy or disqualification' will apply.

\* The KBC Group Investment Policy can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > General exclusion policies for conventional funds and responsible investment funds, Paragraph 2 'KBC Group Investment Policy'.

#### **Nationalisation, bankruptcy or disqualification**

If an issuer of a share in the basket is nationalised, declared bankrupt or no longer meets the selection criteria ('disqualification'), this share will be sold at the last known price before removal. The amount thus realised will then be invested until Maturity at the rate of interest in force on money or bond markets at the moment of removal, and this for a term equal to the term remaining until Maturity of the sub-fund. The realised amount plus the interest will be taken into account at Maturity as the result achieved for that share in order to calculate the final increase in the value of the basket at Maturity.

#### **Volatility of the net asset value**

The volatility of the net asset value may be high due to the composition of the portfolio.

#### **Securities Financing Transactions (SFTs)**

The sub-fund may not lend any financial instruments.

#### **General strategy for hedging the exchange risk**

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

## Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'

### 2.1.4. Financial portfolio management

The intellectual management, with the exception of the creation of the sub-fund and its maintenance in terms of the technical, product-specific and legal aspects has been delegated by the management company to KBC Fund Management Limited, 4th Floor, Scotch House, 6/7 Burgh Quay, Dublin 2, D02 VK44, Ireland.

### 2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

### 2.1.6. Index and benchmark

Not applicable

### 2.1.7. Policy pursued during the financial year

### 2.1.8. Summary risk indicator

- 3 on a scale of 1 (lowest risk) to 7 (highest risk)
- a moderate level of inflation risk: there is no protection against an increase of the inflation.
  - a moderate level of concentration risk: there is a concentration of the investments in the shares of companies in the pharmaceutical and health care industries.
  - a high level of market risk: the level of the risk reflects the volatility of the stock market and the exchange rate risk in relation to the euro.
  - a high level of performance risk: the level of the risk reflects the volatility of the stock market and the exchange rate risk in relation to the euro.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

## 2.2. Balance sheet

\*The financial year does not coincide with the calendar year.

## 2.4.5. Performance figures

BE6341263828  
Optimum Fund ČSOB Zdravotnictví a farmacie 4 CAP  
Annual performance from 01/03/2023 through 28/02/2026 (in CZK)

If the results are expressed in a currency other than the euro, the return may be higher or lower due to exchange rate fluctuations.

| Cap Div | ISIN Code    | Curr<br>ency | 1 year           |               | 3 years          |               | 5 years          |               | 10 years         |               | Since Launch*    |                  |

|         |              |              | Share<br>classes | Bench<br>mark | Share<br>classes | Bench<br>mark | Share<br>classes | Bench<br>mark | Share<br>classes | Bench<br>mark | Starting<br>date | Share<br>classes |
| CAP     | BE6341263828 | CZK          | 22.94%           |               |                  |               |                  |               |                  |               | 03/07/2023       | 14.53%           |

Risk warning: Past performance is not a guide to future performance.

\* Return on annual basis.

- The bar chart shows the performance for full financial years(period of 12 months prior to the half-yearly closing).
- The figures do not take account of any restructuring..
- Calculated in CZK and in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage.
- Calculation method for date D, where NAV stands for net asset value:  
Capitalisation units (CAP)  
Return on date D over a period of X years :  

$$[\text{NIW}(\text{D}) / \text{NIW}(\text{Y})] ^ {1 / \text{X}} - 1$$
 where Y = D-X  
 Return on date D since the start date S of the unit:  

$$[\text{NIW}(\text{D}) / \text{NIW}(\text{S})] ^ {1 / \text{F}} - 1$$
 where F = 1 if the unit has existed for less than one year on date D  
 where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D
- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation shares.

## 2.4.6. Costs

### Ongoing Charges:

Management fees and other administrative or operating costs: 0,951%  
Transaction costs: 0,000%

Percentage calculated at reporting date: 28 February 2026 (period of 12 months prior to the half-yearly closing).

A more detailed explanation with respect to the method of calculating ongoing charges and the relevant exclusions can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.5. Ongoing charges'

### Existence of Commission Sharing Agreements

Not applicable

### Fee sharing agreements en rebates

The management company has shared 70.00% of its fee with the distributor, and institutional and/or professional parties.

This percentage has been calculated relative to the fee for managing the investment portfolio of the sub-fund when it was launched.

## 2.4.7. Notes to the financial statements and other data

### Fee for managing the investment portfolio

KBC Asset Management NV receives a fee for managing the sub-fund's investments. This fee consists of a varying amount of max. 0.2 CZK per unit per year (with a maximum of CZK per unit per year for risk management).

This fee, which is calculated every six months, is paid monthly on the last banking day of each month. It can change from one six-month period to the next, within the limits set out below, and is based on the number of units issued at the start of each six-month period.

In the calculation, account is taken of the difference between:

- the return generated by the investments in bonds and other debt instruments, deposits, and/or liquid assets in order to achieve the capital protection on the Maturity date (see *The financial mechanism used to achieve capital protection*), and
- the expenses borne by the sub-fund to achieve a potential return (see *Permitted 'swap' transactions*),
- after deducting the expected fixed and variable expenses of the sub-fund, as mentioned above.

Of this, KBC Fund Management Ltd. receives a fee of no more than 0.19 CZK per unit per year from KBC Asset Management NV for the intellectual management of the sub-fund. KBC Fund Management Ltd. is a wholly owned subsidiary of KBC Asset Management NV.

KBC Asset Management NV has informed the bevek that, if due to the failure of the financial mechanism, the amount that should be paid per unit (after deducting taxes and charges) on the Maturity date, as relevant, is lower than the initial subscription price, KBC Asset Management NV may decide (but is not obliged to) to use the management fee it receives during the current financial year from the sub-fund – and possibly also from other sub-funds of the bevek – to cover this shortfall. This is not a guarantee from KBC Asset Management NV, which may

decide at any time and at its own discretion whether or not to use the management fee for this purpose. KBC Asset Management NV or one of its subsidiaries has also been appointed manager of the SPVs in which the sub-fund may invest (see *Criteria the investments must meet*). KBC Asset Management NV or one of its subsidiaries, as the case may be, receives an annual fee from the relevant SPVs for their management. This management fee may not exceed 0.15% per year and is calculated on the assets managed at the end of the quarter.

The sum of (i) the fee for managing the investment portfolio that the sub-fund pays to the management company and (ii) the management fee that the SPVs in which the sub-fund invests pay to the asset manager, shall never exceed 0.20 CZK per unit per year, as described above.

#### 2.1.2. Stock exchange listing

Not applicable.

#### 2.1.3. Goal and key principles of the investment policy

##### Object of the sub-fund

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income.

##### Sub-fund's investment policy

***Permitted asset classes***

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

***Restrictions of the investment policy***

The investment policy will be implemented within the limits set by law and regulations.  
The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

### **Permitted derivatives transactions**

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. **Consequently, there may be an impact on concentration risk.** Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

## Strategy selected

The sub-fund invests directly or indirectly in various asset classes, such as shares and/or share-related investments (the 'stock component'), bonds and/or bond-related investments (the 'bond component'), money market instruments, cash and cash equivalents, and/or alternative investments (including real estate and financial instruments that are linked to price movements on the commodity market).

The target allocation for the asset classes is 55% for the stock component and 45% for the bond component. Deviation from this target allocation is possible on the basis of various mathematical models. The portfolio allocation is generally a balanced mix between shares and bonds.

These models use market and economic data to generate expectations or forecasts regarding the performance of financial markets and asset classes. This data is carefully selected by experts at KBC Asset Management NV. Market data may include price trends, valuations (such as price-earnings ratio, dividend yield) or the volatility of benchmark indices in the different asset classes. Economic data may include gross domestic product, consumer confidence indicators or inflation in the G20 economies, or data from central banks.

KBC Asset Management NV first decides which asset classes, regions, sectors and themes are eligible for investment. The models then apply a variety of artificial intelligence techniques (including machine learning) to the generated expectations or forecasts to help determine on a daily basis the population or diversification of the equity component and bond component across the eligible regions, sectors and themes.

In addition to the market and economic data, use is also made of sentiment data to determine the content and the spread of the stock component. Sentiment data may include the sentiment expressed in news articles or on social media, the quantity of publications about a particular company, how often publications about a particular company are read and how often people search for the company.

The influence of artificial intelligence is more limited for populating the bond component than for the stock component or for determining the allocation between asset classes.

The term 'artificial intelligence' refers to systems designed by humans which, given a complex objective, operate in the physical or digital world by observing their environment, interpreting the collected structured or unstructured data, considering the knowledge derived from this data and deciding on the best action(s) (in accordance with predefined parameters) to achieve the given objective.

Machine learning is an artificial intelligence application in which computer systems use algorithms and statistical models to learn to carry out specific tasks without needing explicit instructions and to solve problems which cannot be precisely formulated, and for which a logical reasoning ability is required.

However, the fund manager may decide at any time not to follow the models or to follow them only partially. Human intervention is more likely in exceptional circumstances.

It is possible for the sub-fund to invest in asset classes that are not included in the target allocation.

The stock component is invested in a worldwide selection of shares that may come from any region, sector or theme.

For details of the bond component, please see the 'Characteristics of the bonds and debt instruments' section below.

## Information related to Responsible Investing

Within the above limits, the sub-fund pursues (directly or indirectly) responsible investment objectives based on a dualistic approach: a negative screening and a positive selection methodology.

KBC Asset Management NV has a team of specialist researchers responsible for this dualistic approach. They are assisted by an independent advisory board (the "**Responsible Investing Advisory Board**") comprised of up to twelve persons, who are not affiliated to KBC Asset Management NV, and whose sole responsibility is to supervise the dualistic approach and activities of the specialist researchers. The secretariat of the advisory board is handled by a representative of KBC Asset Management NV. Moreover, KBC Asset Management NV works with data suppliers with expertise in Responsible Investing that provide data to the specialized researchers, who process and complete the data with publicly available information (including annual reports, press publications, etc.).

The sub-fund promotes a combination of environmental and/or social characteristics and, even though it does not have sustainable investments as an objective, it shall invest a minimum proportion of its assets in economic activities that contribute to the achievement of environmental or social objectives (i.e. 'sustainable investments').

The issuers in which it invests must follow good governance practices.

The sub-fund is compliant with the transparency obligations of article 8(1) of Regulation (EU) 2019/2088 of the European Parliament and of the council of 27 November 2019 on sustainability-related disclosures in the financial services sector ('SFDR'). More information on how the sub-fund promotes environmental and/or social characteristics can be found in the 'Annex for Optimum Fund Enhanced Intelligence Global Allocation Responsible Investing' of this Annual Report. This annex refers specifically to the periodic reports for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852.

In addition, the exclusions set out in Article 12(1)(a) to (g) of Delegated Regulation (EU) 2020/1818 ("Exclusions for

Paris Agreement-aligned EU benchmarks") are respected by this sub-fund. The sub-fund complies with the European Securities and Markets Authority (ESMA) guidelines on fund names using ESG or sustainability-related terms.

#### Negative screening

In practical terms the end result of this negative screening procedure is that the sub-fund excludes issuers in advance from the Responsible Investment universe which fall foul of the exclusion policy available on [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > Exclusion policy for Responsible Investing funds.

The application of these policies means that:

- issuers involved in certain activities are excluded from the sub-fund's investment universe. A distinction can be made between issuers that are excluded if they exceed a certain turnover threshold in relation to specific activities, such as conventional weapons, tobacco, gambling or adult entertainment, and those that are excluded outright because they are involved in specific activities, such as controversial weapons, agricultural commodities or the mining of thermal coal, among others.
- The sub-fund may nevertheless invest in companies involved in conventional weapons and/or nuclear weapons that exceed certain turnover thresholds, provided they are included on the whitelist as specified in the policy. The whitelist is a list drawn up by KBC Group and includes companies involved in conventional weapons and/or nuclear weapons, but which are nevertheless deemed acceptable as investments within funds that invest responsibly, taking into account factors such as the proportion of arms sales to non-NATO countries and a possible involvement in human rights controversies related to armed conflict.

This screening also ensures that issuers who seriously violate fundamental principles of environmental protection, social responsibility and good governance, among others, are excluded from the sub-fund's investment universe.

More information regarding the specific exclusions can also be found in the "Annex for Optimum Fund Enhanced Intelligence Global Allocation Responsible Investing" to the prospectus.

These negative screening principles are not exhaustive and may be adapted from time to time under the supervision of the Responsible Investing Advisory Board.

#### Positive selection methodology

Within the defined investment universe and other limits described above, the responsible investment objectives of the sub-fund are the following:

- (1) promote the integration of sustainability into the policy decisions of issuers (companies, governments, supranational debtors and/or agencies linked to governments), by preferring issuers with a better **ESG (risk)score**, where ESG stands for 'Environmental, Social and Governance', and
- (2) promote climate change mitigation, by preferring issuers with lower **Greenhouse Gas Intensity**, with the objective of meeting a predetermined Greenhouse Gas intensity target;
- (3) support sustainable development, through 'sustainable investments' in accordance with art. 2(17) SFDR. Sustainable investments will consist of **bonds financing green and/or social projects** (3.1) and investments in issuers contributing to the achievement of the **UN Sustainable Development Goals** (plus instruments awarded the 'sustainable development' label by KBC Asset Management NV on the advice of the Responsible Investing Advisory Board) (3.2). However, no binding minimum percentage has been set for this latter category, although it contributes to the achievement of the minimum percentage of 'sustainable investments' for this sub-fund.

More information on the investment policy for Responsible Investing funds is available at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > Investment policy for Responsible Investing funds.

#### **(1) ESG-(risk)score**

The contribution to the integration of sustainability into policy decisions of the issuers is measured based on an ESG (risk) score. For companies, an ESG risk score is assigned, for countries an ESG score. This score represents the aggregated performance assessment of a given issuer against a series of ESG criteria which are grounded to the extent possible against objective measures. The main factors underpinning the ESG criteria are:

- In the case of instruments issued by companies:
  - respect for the environment (e.g., reduction in greenhouse gas emissions);
  - attention to society (e.g., employee working conditions); and
  - corporate governance (e.g., independence and diversity of the board of directors).

At least 90% of the corporate investments in the portfolio, as measured by assets under management, must have an ESG risk score. The ESG risk score for companies is an ESG risk score supplied by a data provider, and based on internal research as well.

- In the case of instruments issued by national governments, supranational debtors and/or agencies linked to governments, the following five pillars are used
  - overall economic performance and stability (e.g., quality of institutions and government);
  - socio-economic development and health of the population (e.g., education and employment);
  - equality, freedom and the rights of all citizens;
  - environmental policy (e.g., climate change); and
  - security, peace and international relations.

These lists are not exhaustive and may be changed under the supervision of the Responsible Investing Advisory

Board.

KBC Asset Management NV assigns an ESG score to at least 90 % of the investments in countries within the portfolio, as measured by assets under management.

To achieve this objective, the ESG-risk score of the portfolio for companies is compared to following benchmarks: MSCI All Countries World - Net Return Index and iBoxx Euro Corporates - Total Return Index.

The ESG score for countries of the portfolio is compared to a reference portfolio of global government bonds (composed of the following benchmarks: 67% developed markets: J.P. Morgan GBI Global Unhedged EUR Index and 33% emerging markets: J.P. Morgan GBI-EM Global Diversified Composite Unhedged EUR Index).

To calculate the ESG-(risk)score at portfolio level, the weighted average of the ESG-(risk)scores of the positions in the sub-fund are taken into account. Technical items such as cash and derivatives are not taken into account and also companies or countries for which no data is available are left out. The weights used in the calculation depend on the size of the positions in the sub-fund, rescaled for these items.

More information on the ESG-(risk)score and the concrete goals of the sub-fund can be found in the 'Annex for Optimum Fund Enhanced Intelligence Global Allocation Responsible Investing' to the prospectus.

The targets can be revised upwards or downwards.

## **(2) Greenhouse Gas Intensity**

The objective to promote climate change mitigation, by favoring lower greenhouse gas intensity issuers, with the goal of meeting a predetermined greenhouse gas intensity target covers at least 90% of the portfolio. The objective does not apply to issuers for which data is not available.

The contribution of issuers to climate change mitigation is measured based on their greenhouse gas intensity. For companies, greenhouse gas intensity is defined as absolute greenhouse gas emissions (in tonnes CO2 equivalent), divided by revenues (in mln USD). For countries, it is defined as the greenhouse gas emissions (in tonnes CO2 equivalent), divided by the Gross Domestic Product (in mln USD).

The targets for instruments issued by companies are different from those for instruments issued by national governments, supranational debtors and/or government-linked agencies.

More information on Greenhouse Gas Intensity and the concrete goals of the sub-fund can be found in the 'Annex for Optimum Fund Enhanced Intelligence Global Allocation Responsible Investing' to the prospectus.

The targets may be revised upwards or downwards.

## **(3) Sustainable investments**

### **(3.1) Bonds financing green and/or social projects**

To encourage the transition to a more sustainable world, the sub-fund commits to invest a minimum proportion of the portfolio in bonds financing green and/or social projects. Bonds whose proceeds will be used exclusively to finance (a combination of) green and social projects that are aligned with the International Capital Market Association (ICMA) Green Bond Principles and Social Bond Principles on the Use of Proceeds are considered bonds financing green and/or social projects. Compliance with these principles is verified by an external party. In addition, bonds that comply with Regulation (EU) 2023/2631 of the European Parliament and of the council of 22 November 2023 on European Green Bonds an optional disclosures for bonds marketed as environmentally sustainable and for sustainability-linked bonds ('the European Green Bond Standard') will be considered bonds financing green and/or social projects. Instruments that meet these requirements are labelled 'sustainable investments', in line with article 2(17) SFDR.

More information on bonds financing green and/or social projects and the concrete goals of the sub-fund can be found in the 'Annex for Optimum Fund Enhanced Intelligence Global Allocation Responsible Investing' to the prospectus.

The targets may be revised upwards or downwards.

### **(3.2) UN Sustainable Development Goals**

To support sustainable development, the sub-fund can invest part of its portfolio in issuers that contribute to the UN Sustainable Development Goals. The UN Sustainable Development Goals include both social and environmental objectives.

Companies are considered to contribute to sustainable development when at least 20% of the revenues are linked to the UN Sustainable Development Goals. The activities of the companies are assessed on multiple sustainable themes that can be linked to the UN Sustainable Development Goals.

Governments are assessed on the five pillars as described in the ESG score, which contain indicators that can be linked to the 17 UN Sustainable Development Goals. If a government scores sufficiently well on one of these pillars and not significantly poor on the other pillars, the bonds of this government and its sub-governments and agencies are considered to be instruments that contribute to sustainable development. Bonds of supranational governments contribute to the UN's Sustainable development goals if one of the two criteria is met:

- at least half of its members contribute to the UN Sustainable Development Goals (weighted by voting power/full paid-in capital/percentage of population (in order of availability)).
- the mission statement of the supranational institution has a sustainable objective and less than half of its members fall in the worst half of the screening for controversial regimes.

Instruments of issuers that meet these requirements are designated as "sustainable investments," according to Article 2(17) SFDR. In addition, KBC Asset Management NV can award the "sustainable development" label to instruments of companies and governments, on the advice of the Responsible Investing Advisory Board. In that

case, these investments shall also qualify as "sustainable investments," according to Article 2(17) SFDR. However, the awarding of the 'sustainable development' label by KBC Asset Management NV to instruments of governments on the advice of the Responsible Investing Advisory Board is very exceptional.

More information about the methodology used to qualify investments as investments which contribute to the UN Sustainable Development Goals can be found in the 'Annex for Optimum Fund Enhanced Intelligence Global Allocation Responsible Investing' to the prospectus.

### **Potential Exceptions**

It cannot be ruled out, however, that very limited investments may be made temporarily in assets that do not meet the above criteria. The reasons for this include the following:

- Developments as a result of which an issuer can no longer be regarded as eligible after purchase;
- Corporate events, such as a merger of one company with another, where the merged company can no longer be considered an eligible issuer based on the above criteria;
- Incorrect data as a result of which assets are invested (unintentionally and erroneously) in assets purchased when it should not have been eligible for the sub-fund;
- A planned update of the screening criteria as a result of which assets should be excluded from the sub-fund, but which the management company chooses to refrain from selling immediately in the best interest of the customer;
- External circumstances such as market movements and updates of external data can lead to investment solutions failing to achieve the abovementioned targets.

In these cases, the fund manager will replace the assets concerned with more appropriate assets as soon as possible, always taking into account the sole interest of the investor.

In addition, for the purpose of efficient portfolio management, the fund manager may to a significant degree use derivatives relating to assets issued by issuers that would not be eligible for inclusion in the sub-fund, in so far as there is no serviceable and comparable alternative available on the market. In addition, the counterparties with which the derivative transactions are entered into may not necessarily be issuers having a responsible nature.

### **Taxonomy related information**

The sub-fund does not specifically seek to invest in environmentally sustainable economic activities within the meaning of the EU Taxonomy Framework. ("Taxonomy aligned investments"). Although the sub-fund does not aim to invest in Taxonomy aligned investments, it cannot be excluded that the sub-fund does contain Taxonomy aligned investments.

The percentage invested in Taxonomy aligned investments is a weighted quarterly average and includes investments in companies with at least 20% of revenue aligned with the EU Taxonomy framework (based on data from Trucost). The actual percentage invested in Taxonomy aligned investments can be found in the 'Annex for Optimum Fund Enhanced Intelligence Global Allocation Responsible Investing'.

### **Transparency of adverse sustainability impacts**

The sub-fund took into account the principal adverse impacts of its investment decisions on sustainability factors ("PAI"), as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on Sustainability Disclosures in the Financial Services Sector ("SFDR").

The principal adverse impacts on sustainability factors were explicitly taken into account through the general exclusion policy for conventional funds and Responsible Investing funds and the exclusion policy for Responsible Investing funds. In addition, the principal adverse impacts on sustainability factors were implicitly taken into account through the Proxy Voting and Engagement Policy.

More information on the principal adverse impact indicators taken into account can be found in the 'Annex for Optimum Fund Enhanced Intelligence Global Allocation Responsible Investing'.

### **Benchmark information**

The fund is actively managed with reference to the following benchmark: 55% MSCI All Countries World - Net Return Index, 22.5% JP Morgan EMU Government Bonds Investment Grade ALL Maturities - Total Return Index, 22.5% iBoxx Euro Corporates - Total Return Index.

However, it is not the aim of the fund to replicate the benchmark. The composition of the benchmark is taken into account when compiling the portfolio.

The composition of the portfolio will vary from that of the benchmark, as the composition of the benchmark is not fully consistent with the environmental and/or social characteristics promoted by the sub-fund. The use of the benchmark does not detract from the responsible character of the portfolio. The responsible character is guaranteed by the aforementioned Responsible Investing methodology.

The benchmark is also used to assess the performance of the sub-fund.

The benchmark is also used to determine the fund's risk limitation mechanism. This limits the extent to which the fund's return may deviate from the benchmark.

The longterm expected tracking error for this fund is 2.00%. The tracking error measures the volatility of the fund's return relative to that of the benchmark. The higher the tracking error, the more the fund's return fluctuates relative to the benchmark. Market conditions may cause the actual tracking error to differ from the expected tracking error.

### **Characteristics of the bonds and debt instruments**

The sub-fund invests in bonds and debt instruments issued by both companies and public authorities.

The sub-fund invests directly and/or indirectly at least 50% of its assets in bonds and debt instruments

- in securities rated investment grade (at least BBB-/Baa3 for long-term debt, A3/F3/P3 for short-term debt) by at least one of the following rating agencies: Moody's Investors Service, Standard & Poor's or Fitch Ratings, and/or
- in government bonds issued in local currency or non-subordinated corporate bonds\* which do not have a credit rating from the rating agencies mentioned above but the issuer of which has an investment grade rating by at least one of the rating agencies mentioned above, and/or
- in money market instruments whose issuer has an investment grade rating (minimum A3/F3/P3 for short-term debt) from at least one of the above rating agencies.

This means that the sub-fund may invest up to 50% of its assets invested in bonds and debt instruments that do not have a credit rating from the above-mentioned rating agencies and/or which do not comply with the above-mentioned credit requirements.

All maturities are taken into consideration in the selection of bonds and debt instruments.

\*In the event of the bankruptcy of the relevant issuer, subordinated bonds are subordinated to the company's other debts: the company's other debts are paid first, then and only if there is still capital left, the holders of the subordinated bonds are fully or partially repaid; the holder of the subordinated bond does, however, have priority over the shareholders of the issuer in question.

### **Investments in assets other than securities or money market instruments**

**The sub-fund can invest primarily in permitted assets other than securities or money market instruments.**

### **Securities Financing Transactions (SFTs)**

The sub-fund may not lend any financial instruments.

### **General strategy for hedging the exchange risk**

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

### **Social, ethical and environmental aspects**

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'.

## 2.1.4. Financial portfolio management

The intellectual management, with the exception of the creation of the sub-fund and its maintenance in terms of the technical, product-specific and legal aspects has been delegated by the management company to KBC Fund Management Limited, 4th Floor, Scotch House, 6/7 Burgh Quay, Dublin 2, D02 VK44, Ireland.

## 2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

## 2.1.6. Index and benchmark

See 'Sub-fund's investment policy'.

## 2.1.7. Policy pursued during the financial year

The objective of KBC Optimum Fund Advanced Intelligence is to achieve the highest possible return by investing directly or indirectly in different asset classes, such as equities and/or share-related investments (hereinafter "the equity component"), bonds and/or bond-related investments (hereinafter "the bond component"), money market instruments, liquidity and/or alternative investments (such as, among others, real estate, financial instruments linked to the price evolution of the commodities market, etc.).

The spread is 55% for the equity component and 45% for the bond component. Deviations from the asset allocation guidelines are possible on the basis of a mathematical model. This model also determines the content of the equity component and the bond component.

The model used market and economic data to optimise the composition of the fund. The model used different techniques from artificial intelligence to determine the weights of the different asset classes, the share section and the bond section as optimally as possible on a daily basis.

The administrator can always decide not to follow the model or to follow the model only partially. As a result, the manager always has the final decision with regard to the deviation from the guideline spread, the implementation of the equity component and the implementation of the bond component. It is therefore possible for the fund to invest in asset classes that are not included in the guideline spread. However, over the period the model was indeed followed throughout.

Important change: on 27/06/2025, the fund transformed to Responsible Investing (Art. 8): while the quantitative strategy continues, RI constraints are applied on top of it within the optimizer in order to provide an RI-compliant target portfolio at all times.

## 2.1.8. Future policy

The future investment policy will continue the goal of producing the highest possible return based on the same investment strategy.

## 2.1.9. Summary risk indicator (SRI)

3 on a scale of 1 (lowest risk) to 7 (highest risk)

- a moderate level of inflation risk: the bond component does not provide any protection against an increase in inflation.
- a moderate level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a real chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of credit risk: the bond component invests primarily - but not exclusively- in bonds with an investment grade rating. Consequently, the risk that an issuer can no longer meet its obligations is higher than in an investment that consists only of bonds with an investment grade rating. If investors are in doubt about the creditworthiness of the issuers of the bonds, the value of those bonds can fall.
- a moderate level of market risk: the level of the risk reflects the volatility of the equity component.
- a moderate level of performance risk: the level of the risk reflects the volatility of the equity component.

There is no capital protection.

A more detailed explanation can be found in this report's General information on the Beveik under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

## 2.2. Balance sheet

| Balance sheet layout              |                                                                   | 28/02/2026<br>(in Euro) | 28/02/2025<br>(in Euro) |

## 2.4.2. Changes in the composition of the assets of Optimum Fund Enhanced Intelligence Global Allocation Responsible Investing (in Euro)

|                                        | 1 <sup>st</sup> half of year |
|----------------------------------------|------------------------------|
| <b>Purchases</b>                       | 110,432,408.55               |
| <b>Sales</b>                           | 69,154,248.42                |
| <b>Total 1</b>                         | 179,586,656.97               |
| <b>Subscriptions</b>                   | 56,318,878.97                |
| <b>Redemptions</b>                     | 11,887,354.97                |
| <b>Total 2</b>                         | 68,206,233.94                |
| <b>Monthly average of total assets</b> | 223,706,779.00               |
| <b>Turnover rate</b>                   | 49.79%                       |

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period. A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions. A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio. Active asset management may result in high turnover rates (monthly percentage >50%).

The detailed list of transactions can be consulted free of charge at the company designated as financial service: KBC Bank NV, Havenlaan 2, B-1080 Brussels

### 2.4.3. Amount of commitments in respect of financial derivatives positions

Nil

### 2.4.4. Changes in the number of subscriptions and redemptions and the net asset value

| Period     | Change in number of shares in circulation |              |                |              |                |              |            |
|------------|-------------------------------------------|--------------|----------------|--------------|----------------|--------------|------------|
| Year       | Subscriptions                             |              | Redemptions    |              | End of period  |              |            |
|            | Capitalization                            | Distribution | Capitalization | Distribution | Capitalization | Distribution | Total      |
| 2024 - 08* | 11,467.27                                 | 2,318.76     | 7,288.73       | 6,771.98     | 89,741.46      | 45,568.17    | 135,309.63 |
| 2025 - 08* | 33,172.87                                 | 4,220.96     | 7,763.71       | 4,029.98     | 115,150.62     | 45,759.15    | 160,909.77 |

Risk warning: Past performance is not a guide to future performance.

\* Return on annual basis.

- The bar chart shows the performance for full financial years(period of 12 months prior to the half-yearly closing).
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage. In the case of units that pay dividends, the dividend is incorporated geometrically in the return.
- Calculation method for date D, where NAV stands for net asset value:

#### Capitalisation units (CAP)

Return on date D over a period of X years :

$$[NIW(D) / NIW(Y)]^{[1 / X] - 1}$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[NIW(D) / NIW(S)]^{[1 / F] - 1}$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

#### Distribution units (DIV)

Return on date D over a period of X years :

$$[C * NIW(D) / NIW(Y)]^{[1 / X] - 1}$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[C * NIW(D) / NIW(S)]^{[1 / F] - 1}$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

where C is a factor that is determined for all N dividends between the calculation date D and the reference date.

For dividend i on date Di with value Wi:

$$Ci = [Wi / NIW(Di)] + 1$$

i = 1 ... N

from which C = C0 \* .... \* CN.

- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation and distribution shares

## 2.4.6. Costs

### Ongoing Charges:

#### Capitalisation :

Management fees and other administrative or operating costs: 1,599%  
Transaction costs: 0,223%

#### Distribution :

Management fees and other administrative or operating costs: 1,596%  
Transaction costs: 0,222%

Percentage calculated at reporting date: 28 February 2026 (period of 12 months prior to the half-yearly closing).

A more detailed explanation with respect to the method of calculating ongoing charges and the relevant exclusions can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.5. Ongoing charges'

### Existence of Commission Sharing Agreements

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.7. Commission Sharing Agreements'.

No CSA accrual during this period.

### Existence of fee sharing agreements and rebates

The management company has shared 59,80% of its fee with the distributor, and institutional and/or professional parties.

If the management company invests the assets of the undertaking for collective investment in units of undertakings for collective investment that are not managed by an entity of KBC Groep NV, and receives a fee for doing so, it will pay this fee to the undertaking for collective investment.

Fee-sharing does not affect the amount of the management fee paid by a **sub-fund** to the management company. This management fee is subject to the limitations laid down in **the articles of association**. The limitations may only be amended after approval by the General Meeting.

## 2.4.7. Notes to the financial statements and other data

Tax treatment'                                                                                    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| Other charges (estimation) such as the regulator's fees, the cost of publication and any marketing costs | 0.10%                                                                                                                                                                  | of the net assets of the sub-fund per year.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |

### Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

### Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

#### 2.1.1. Launch date and subscription price

|                             |                  |
|-----------------------------|------------------|
| Launch date:                | 21 October 2024  |
| Initial subscription price: | 10000 HUF        |
| Maturity date:              | 30 November 2029 |
| Currency:                   | HUF              |

#### 2.1.2. Stock exchange listing

Not applicable.

#### 2.1.3. Goal and key principles of the investment policy

##### Object of the sub-fund

The object of the sub-fund is twofold (before deducting charges and taxes):

- (1) To repay per share the initial subscription price of 10000 HUF at Maturity.(i.e. the capital protection). This capital protection is provided through a financial mechanism that will be explained in more detail under the heading *Capital protection*. However, the capital protection does not apply to shareholders who sell their shares before Maturity.
- (2) To provide a potential return through an investment in swaps. The various types of swaps in which the sub-fund may invest are explained in more detail under the *Potential return*.

##### Capital Protection

###### The financial mechanism used to achieve capital protection

The financial mechanism used to achieve capital protection at Maturity consists of an investment of the total amount of the subscriptions in bonds and other debt instruments, deposits and/or liquid assets (including cash deposited on a time-deposit account or current account). These investments can have different maturities and coupon payment dates. Using the swaps described under the heading *Permitted swap transactions* (2), these investments are matched with the due dates of the obligations of the sub-fund.

###### Criteria the investments must meet

The investments must meet one of the following criteria:

- (1) An investment in deposits and/or debt instruments, placed with or issued by financial institutions under the prudential supervision of and established in a Member State of the European Economic Area.
- (2) An investment in debt instruments issued or guaranteed by a Member State of the European Economic Area.
- (3) An investment under an investment strategy with an analogous structure and identical counterparty risk as a direct investment in deposits and/or debt instruments as stated under (1) and (2) above.

The investments under (3) may consist of:

- (A) An investment in notes listed on a stock exchange that are issued by 'Special Purpose Vehicles' (SPVs).

These SPVs are managed by KBC Asset Management NV or a subsidiary.

The underlying assets of the bonds issued by the SPVs consist of a diversified portfolio of deposits issued by financial institutions, bonds, other debt instruments and financial derivatives. When selecting these underlying assets, account is taken of criteria relating to allocation and creditworthiness (see *Permitted asset classes* and *Characteristics of the bonds and other debt instruments*) in order to limit the counterparty risk.

Further details of the criteria these underlying deposits, bonds, other debt instruments and financial derivatives must meet are provided in the base prospectuses for the SPVs, which can be viewed at or downloaded from [www.kbc.be/prospectus/spv](http://www.kbc.be/prospectus/spv).

Investors are provided with information on the investments made by both the sub-fund and the SPVs in the annual and half-yearly reports on the open-ended investment company under Belgian law (bevek) to which the sub-fund belongs. These reports can also be viewed at or downloaded from [www.kbc.be](http://www.kbc.be).

- (B) An investment in:
- deposits with financial institutions under prudential supervision in the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia and/or
  - debt instruments issued by financial institutions under prudential supervision in the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia and/or
  - debt instruments issued or guaranteed by the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia.

Prudential supervision of financial institutions in the United Kingdom, Switzerland, the United States of America, Japan, Canada and Australia can be equated to prudential supervision of financial institutions in the member states of the European Economic Area.

The investments in debt instruments issued by financial institutions under prudential supervision in the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia or issued or guaranteed by the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia have a minimum credit rating as set out under the heading *Characteristics of the bonds and other debt instruments*.

- (C) The investments may also consist of a combination of the investments specified under (A) and (B).

### **No formal guarantee**

No formal guarantee of repayment of the initial subscription price is provided to the sub-fund or to its shareholders. In other words, the capital protection is not binding for the sub-fund as regards the result generated, although achieving this objective through the operation of the financial mechanism is still the top priority.

If the financial mechanism fails and, as a result, the amount per share payable (before deducting charges and taxes) at Maturity is lower than the initial subscription price, KBC Asset Management NV may decide (but is not obliged) to use the management fee it has received during the current financial year from the sub-fund – and possibly also from other sub-funds of the bevek – to cover the shortfall. This is not a guarantee from KBC Asset Management NV, which may decide at any time and at its own discretion whether or not to use the management fee for this purpose.

The capital protection does not apply to shareholders who sell their shares before Maturity.

### **Potential return**

To achieve a potential return, the sub-fund concludes swaps with one or more prime counterparties. Consequently, the sub-fund transfers a portion of the future income from the investments that were made to achieve capital protection to this counterparty (these counterparties) during the life of the sub-fund. In exchange, the counterparty (counterparties) undertake to provide a potential return as specified under the heading *Selected strategy*.

### **Sub-fund's investment policy**

#### **Permitted asset classes**

Pursuant to the provisions of the Royal Decree of 12 November 2012 on undertakings for collective investment complying with the conditions of Directive 2009/65/EC, the sub-fund may invest in transferable securities (including bonds and other debt instruments), money market instruments, units (shares) in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as and to the extent permitted by the applicable legislation.

The investment limits and restrictions set out in the Royal Decree of 12 November 2012 on undertakings for collective investment complying with the conditions of Directive 2009/65/EC will be respected at all times.

### **Characteristics of the bonds and other debt instruments**

During the sub-fund's life, the average credit rating of the bonds and other debt instruments shall be at least 'A-' from Standard & Poor's or an equivalent rating from Moody's or Fitch, or, if there is no credit rating available, an average credit risk profile that the manager considers to be at least equivalent.

At the start of the investment, the credit rating of the long-term bonds and other debt instruments shall be at least 'A-' from Standard & Poor's or an equivalent rating from Moody's or Fitch, or, if there is no credit rating available, a credit risk profile that the manager considers to be at least equivalent.

At the start of the investment, the credit rating of the short-term bonds and other debt instruments shall be at least 'A-1' from Standard & Poor's or an equivalent rating from Moody's or Fitch, or, if there is no credit rating available, a credit risk profile that the manager considers to be at least equivalent.

When selecting the bonds and other debt instruments, all maturities are taken into consideration.

### Permitted swap transactions

**The swaps described below have been concluded with a prime counterparty or prime counterparties within the limits laid down by law.**

(1) To achieve a potential return, the sub-fund concludes swaps. Under such swap contracts, the sub-fund transfers a portion of the future income from the investments described under the heading 'Permitted asset classes' to the counterparty or counterparties during the life of the sub-fund. In exchange, the counterparty or counterparties undertake to provide a potential return as specified under the heading *Selected strategy*.

**The swaps under (1) are essential to achieve the sub-fund's investment objectives, since this technique facilitates achievement of the goal of generating a potential return.**

**The sub-fund's risk profile is not affected by the use of these swaps.**

(2) If necessary, the sub-fund also concludes swaps to match the due dates of the commitments of the sub-fund with those of the cash flows stemming from the deposits, bonds and other debt instruments described under the heading *Criteria the investments must meet*.

**These swaps are essential to achieve the sub-fund's investment objectives, since there are not enough bonds and other debt instruments available on the market whose coupon payments and maturity dates always perfectly match the due dates of the sub-fund's obligations.**

**The sub-fund's risk profile is not affected by the use of these swaps.**

(3) In addition, the sub-fund may conclude swaps to protect itself against the credit risk in respect of issuers of bonds and other debt instruments. Through this type of swap, one or more counterparties takes over the risk of an issuer of a bond or other debt instrument in the sub-fund's portfolio defaulting, in exchange for a fee payable by the sub-fund.

**The swaps under (3) serve to hedge the credit risk.**

**The sub-fund's risk profile is not affected by the use of these swaps.**

### Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

### Strategie selected

#### Investment objectives and strategy:

The sub-fund has two investment objectives: firstly, it seeks to pay back at Maturity at least 100% of the initial subscription price, and secondly, to generate a potential capital gain that is contingent on the evolution of a basket of 30 shares of companies operating in the pharmaceutical and healthcare industries.

If the End Value of the basket of 30 shares of companies operating in the pharmaceutical and healthcare industries has risen relative to its Minimum Starting Value, 100% of the increase  $(= (\text{Value at Maturity} - \text{Minimum Starting Value}) / \text{Initial Value})$  will be taken into account at Maturity with regard to 100% of the initial subscription price. The capital gain is capped at 100% (yield to maturity of 14.60% before taxes and charges). Negative performances of the basket are not taken into account.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

### Transparency of adverse sustainability impacts

The sub-fund took into account the principal adverse impacts of its investment decisions on sustainability factors ("PAI") as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on disclosure on sustainability in the financial services sector ("SFDR") through KBC Group's Investment Policy and KBC Group Policy on Blacklisted Companies.

Based on the KBC Group Policy on Blacklisted Companies, all companies on the 'KBC Group Blacklist' (including companies involved in controversial weapons such as those prohibited by Belgian law and white phosphorus weapons) are excluded as well as the worst offenders of the UN Global Compact.

Consequently, the sub-fund took into account exposure to controversial weapons ('indicator 14') by excluding companies dealing with controversial weapon systems, and violations of the principles of the UN Global Compact or the Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises ('indicator 10') by excluding the worst offenders of the UN Global Compact.

### Maturity

Friday 30 November 2029 (payment with a value date of D+1 banking day)

## Currency

HUF, for all shares in the basket, changes in the value of the currency in which they are expressed relative to HUF are irrelevant. The investor pays the subscription amount in HUF and will be paid in HUF at Maturity (or earlier). The investor is not protected against any decline in the value of the currency in which the sub-fund is denominated relative to the euro.

## Starting Value

Value of the basket based on the weighted average of the Value of the shares included in the basket during the first 10 Valuation Days, starting from Thursday 31 October 2024 inclusive.

## Minimum Starting Value

The lowest value of the Starting Value and the lowest Value of the basket on the Initial Observation Days and is always lower than or equal to the Starting Value.

## Initial Observation Dates

The first Valuation Day of each month from and including December 2024 up to and including November 2025 (inclusive).

## End Value

Value of the basket based on the weighted average of the Value of the shares included in the basket on the last Valuation Day of the month for the last 12 months before Maturity, more specifically from November 2028 through October 2029 (inclusive).

## Value

For all the shares, except for those listed on the Milan stock exchange, the closing price, namely the price of a share in the basket as calculated and notified at closing of the stock exchange by the authority of the stock exchange on which the share is listed (or its legal successor). The reference price is used for shares listed on the Milan stock exchange.

## Valuation day

A Valuation Day is set separately for each share in the basket.

A Valuation Day is a day that is a planned trading day both

- i) for the stock exchange on which the share is listed and
- ii) for the stock exchange whose activities have a substantial influence on the trading of options and futures on the share concerned

hereinafter referred to as 'the stock exchanges concerned'.

If on the Valuation Day,

- a) one of the stock exchanges concerned is unexpectedly closed or
- b) there is an event that disrupts the market for a stock exchange concerned or
- c) one of the stock exchanges concerned closes early,

the original Valuation Day is replaced by the following trading day when no event as referred to in a), b) or c) above occurs. An extraordinary closure that has been announced in advance is not considered as early closure.

If a valuation is made on consecutive Valuation Days, the trading day that replaces the original Valuation Day (i) may not coincide with another original Valuation Day and (ii) may not be a trading day that already replaces another original Valuation Day.

However, if an event as referred to under a), b) or c) above occurs on each of the eight trading days following the original Valuation Day,

- (i) the eighth trading day shall be considered as the original Valuation Day and
- (ii) the Bevek shall assess, in good faith and in consultation with the prime counterparty or counterparties with which it has concluded a swap agreement, the price of the share as it would have been traded on that eighth trading day and
- (iii) the Bevek will notify shareholders of any changes regarding setting the Starting Value and/or End Value and conditions of payment.

### Relevant basket

In the table below, the columns from left to right reflect the number of the share, the name of the share, the Bloomberg code, the exchange on which it trades (City-MIC Code) and its initial weighting in the basket.

| (i) | Name                         | Bloomberg Code  | Exchange          | Initial Weighting Coefficients |
|-----|------------------------------|-----------------|-------------------|--------------------------------|
| 1   | ABBVIE INC                   | ABBV UN Equity  | NEW YORK - XNYS   | 2.0000%                        |
| 2   | AEGON NV                     | AGN NA Equity   | AMSTERDAM - XAMS  | 5.0000%                        |
| 3   | AMGEN (UW)                   | AMGN UW Equity  | NEW YORK - XNGS   | 2.0000%                        |

### Basket composition methodology

KBC Asset Management used the following methodology to determine the composition of the sub-fund's basket.

#### Step 1 :

The starting point is the global equities universe from which a selection of potential investments is derived in accordance with the economic criteria for the composition of the basket and subject to restrictions regarding stock market capitalisation and liquid assets.

The economic criteria for the composition of the basket determine the size of the final selection.

#### Step 2 :

The selection of shares obtained in step 1 is reduced to a short list using a quantitative selection based on past financial data. The shares selected are those of companies that achieve a good score in terms of management quality, a healthy balance-sheet structure and a positive trend in profitability.

#### Step 3 :

The selection of shares obtained in step 2 is then verified by KBC Asset Management analysts. Shares that are permanently monitored by the analysts and those for which there is a negative recommendation, when the product is launched, are then withdrawn from the selection.

#### Step 4 :

The last reduction of the selection provides the final basket. This selection was made using the technical parameters of options (including the term, volatility, dividend yield and interest rate).

The final basket must satisfy the legal requirements concerning the quantity of shares and adequate distribution in the weighting. In addition, care is taken to ensure compliance with the geographical and/or sector spread. The analysts make a qualitative assessment of each share used taking account of specific knowledge of these shares and the sectors/regions from which they come, in accordance with the term of the sub-fund.

For the sub-fund Optimum Fund K&H egészség, about 217 equities were selected during step 1.

The initial selection was reduced by a maximum 20% in step 2.

This was again reduced by 10% (indicative) in step 3. The final basket set up during step 4 is described above under *Relevant basket*. This basket makes it possible to offer the sub-fund Optimum Fund K&H egészség under the conditions set out in the investment policy referred to above. Here the selection process uses parameters that could affect the potential return on the investments.

#### *Selection criteria for the basket :*

A share/issuer may only form part of the basket if (i) it is listed on a stock exchange, (ii) the issuer is a company operating in the pharmaceutical or healthcare industry, (iii) the Board of Directors of the Bevek has approved its inclusion in the basket, (iv) the issuer is not included in the KBC Group Policy on Blacklisted Companies\* and (v) at the time the swap contracts are being concluded (see 'Permitted swap transactions'), the issuer of the share complies with the KBC Group Investment Policy\* (the 'Selection criteria').

\* The KBC Group Policy on Blacklisted Companies and the KBC Group Investment Policy can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > General exclusion policies for conventional funds and socially responsible investment funds, Paragraph 1 'KBC Group Policy on Blacklisted Companies' and 2 'KBC Group Investment Policy'.

### **Modifications to the basket due to mergers, acquisitions, demergers, nationalisation, bankruptcy or disqualification :**

#### **Mergers or acquisitions**

If, during the life of the sub-fund, one or more issuers of shares in the basket are involved in a merger or acquisition, the shares of the relevant issuers which still meet the selection criteria and comply with the KBC Group Investment Policy\* after these operations will be given a weighting in the basket equal to the sum of the weightings of the shares of all issuers involved in the operation. If, after the operation, none of the issuers involved in the operation meet the selection criteria or comply with the KBC Group Investment Policy\*, the procedures described under 'Nationalisation, bankruptcy or disqualification' will apply.

\* The KBC Group Investment Policy can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > General exclusion policies for conventional funds and responsible investment funds, Paragraph 2 'KBC Group Investment Policy'.

#### **Demergers**

If an issuer of a share in the basket proceeds to a demerger, then the share from the issuer concerned can be substituted either by one of the shares that came about as a result of the demerger and that meets the selection criteria and complies with the KBC Group Investment Policy\*, or by a basket of shares arising from the demerger which meet the selection criteria and comply with the KBC Group Investment Policy\*. This basket of shares will, when calculating the number of shares in the basket, be considered as one share. If, after the operation, none of the shares resulting from the demerger meet the selection criteria or comply with the KBC Group Investment Policy\*, the procedures described under 'Nationalisation, bankruptcy or disqualification' will apply.

\* The KBC Group Investment Policy can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > General exclusion policies for conventional funds and responsible investment funds, Paragraph 2 'KBC Group Investment Policy'.

#### **Nationalisation, bankruptcy or disqualification**

If an issuer of a share in the basket is nationalised, declared bankrupt or no longer meets the selection criteria ('disqualification'), this share will be sold at the last known price before removal. The amount thus realised will then be invested until Maturity at the rate of interest in force on money or bond markets at the moment of removal, and this for a term equal to the term remaining until Maturity of the sub-fund. The realised amount plus the interest will be taken into account at Maturity as the result achieved for that share in order to calculate the final increase in the value of the basket at Maturity.

#### **Volatility of the net asset value**

The volatility of the net asset value may be high due to the composition of the portfolio.

#### **Securities Financing Transactions (SFTs)**

The sub-fund may not lend any financial instruments.

#### **General strategy for hedging the exchange risk**

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

## Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'

### 2.1.4. Financial portfolio management

The intellectual management, with the exception of the creation of the sub-fund and its maintenance in terms of the technical, product-specific and legal aspects has been delegated by the management company to KBC Fund Management Limited, 4th Floor, Scotch House, 6/7 Burgh Quay, Dublin 2, D02 VK44, Ireland.

### 2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

### 2.1.6. Index and benchmark

Not applicable

### 2.1.7. Policy pursued during the financial year

#### Composition of the basket on report date

| Name                         | Value         |

### **2.1.8. Summary risk indicator**

- 3 on a scale of 1 (lowest risk) to 7 (highest risk)
- a moderate level of inflation risk: there is no protection against an increase of the inflation.
  - a moderate level of concentration risk: there is a concentration of the investments in the shares of companies in the pharmaceutical and health care industries.
  - a high level of market risk: the level of the risk reflects the volatility of the stock market and the exchange rate risk in relation to the euro.
  - a high level of performance risk: the level of the risk reflects the volatility of the stock market and the exchange rate risk in relation to the euro.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

## 2.2. Balance sheet

| Balance sheet layout |                                                                   | 28/02/2026<br>(in Hungarian forint) | 28/02/2025<br>(in Hungarian forint) |

## 2.4.5. Performance figures

BE6353303942  
Optimum Fund K&H egészség CAP  
Annual performance from 01/03/2024 through 28/02/2026 (in HUF)

If the results are expressed in a currency other than the euro, the return may be higher or lower due to exchange rate fluctuations.

| Cap Div | ISIN Code    | Curr<br>ency | 1 year        |            | 3 years       |            | 5 years       |            | 10 years      |            | Since Launch* |               |
|---------|--------------|--------------|---------------|------------|---------------|------------|---------------|------------|---------------|------------|---------------|---------------|
|         |              |              | Share classes | Bench mark | Share classes | Bench mark | Share classes | Bench mark | Share classes | Bench mark | Starting date | Share classes |
| CAP     | BE6353303942 | HUF          | 20.89%        |            |               |            |               |            |               |            | 21/10/2024    | 13.17%        |

Risk warning: Past performance is not a guide to future performance.

\* Return on annual basis.

- The bar chart shows the performance for full financial years(period of 12 months prior to the half-yearly closing).
- The figures do not take account of any restructuring..
- Calculated in HUF and in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage.
- Calculation method for date D, where NAV stands for net asset value:  
Capitalisation units (CAP)  
Return on date D over a period of X years :  

$$[NIW(D) / NIW(Y)] ^ [1 / X] - 1$$
 where Y = D-X  
 Return on date D since the start date S of the unit:  

$$[NIW(D) / NIW(S)] ^ [1 / F] - 1$$
 where F = 1 if the unit has existed for less than one year on date D  
 where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D
- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation shares.

## 2.4.6. Costs

### Ongoing Charges:

Management fees and other administrative or operating costs: 1,882%  
Transaction costs: 0,000%

Percentage calculated at reporting date: 28 February 2026 (period of 12 months prior to the half-yearly closing).

A more detailed explanation with respect to the method of calculating ongoing charges and the relevant exclusions can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.5. Ongoing charges'

### Existence of Commission Sharing Agreements

Not applicable

### Fee sharing agreements en rebates

The management company has shared 70.00% of its fee with the distributor, and institutional and/or professional parties.

This percentage has been calculated relative to the fee for managing the investment portfolio of the sub-fund when it was launched.

## 2.4.7. Notes to the financial statements and other data

|                                                                                                          |                                                                                                                                                                                                     |                                                                                                                                                                                                                                                                                                        |

### Fee for managing the investment portfolio

KBC Asset Management NV receives a fee for managing the sub-fund's investments. This fee consists of a varying amount of max. 200 HUF per unit per year (with a maximum of HUF per unit per year for risk management).

This fee, which is calculated every six months, is paid monthly on the last banking day of each month. It can change from one six-month period to the next, within the limits set out below, and is based on the number of units issued at the start of each six-month period.

In the calculation, account is taken of the difference between:

- the return generated by the investments in bonds and other debt instruments, deposits, and/or liquid assets in order to achieve the capital protection on the Maturity date (see *The financial mechanism used to achieve capital protection*), and
- the expenses borne by the sub-fund to achieve a potential return (see *Permitted 'swap' transactions*),
- after deducting the expected fixed and variable expenses of the sub-fund, as mentioned above.

Of this, KBC Fund Management Ltd. receives a fee of no more than 189.50 HUF per unit per year from KBC Asset Management NV for the intellectual management of the sub-fund. KBC Fund Management Ltd. is a wholly owned subsidiary of KBC Asset Management NV.

KBC Asset Management NV has informed the bevek that, if due to the failure of the financial mechanism, the amount that should be paid per unit (after deducting taxes and charges) on the Maturity date, as relevant, is lower than the initial subscription price, KBC Asset Management NV may decide (but is not obliged to) to use the management fee it receives during the current financial year from the sub-fund – and possibly also from other sub-funds of the bevek – to cover this shortfall. This is not a guarantee from KBC Asset Management NV, which may

decide at any time and at its own discretion whether or not to use the management fee for this purpose. KBC Asset Management NV or one of its subsidiaries has also been appointed manager of the SPVs in which the sub-fund may invest (see *Criteria the investments must meet*). KBC Asset Management NV or one of its subsidiaries, as the case may be, receives an annual fee from the relevant SPVs for their management. This management fee may not exceed 0.15% per year and is calculated on the assets managed at the end of the quarter.

The sum of (i) the fee for managing the investment portfolio that the sub-fund pays to the management company and (ii) the management fee that the SPVs in which the sub-fund invests pay to the asset manager, shall never exceed 200.00 HUF per unit per year, as described above.

#### 2.1.2. Stock exchange listing

Not applicable.

#### 2.1.3. Goal and key principles of the investment policy

##### Object of the sub-fund

The object of the sub-fund is twofold (before deducting charges and taxes):

- (1) To repay per share the initial subscription price of 10000 HUF at Maturity.(i.e. the capital protection). This capital protection is provided through a financial mechanism that will be explained in more detail under the heading *Capital protection*. However, the capital protection does not apply to shareholders who sell their shares before Maturity.
- (2) To provide a potential return through an investment in swaps. The various types of swaps in which the sub-fund may invest are explained in more detail under the *Potential return*.

##### Capital Protection

###### The financial mechanism used to achieve capital protection

The financial mechanism used to achieve capital protection at Maturity consists of an investment of the total amount of the subscriptions in bonds and other debt instruments, deposits and/or liquid assets (including cash deposited on a time-deposit account or current account). These investments can have different maturities and coupon payment dates. Using the swaps described under the heading *Permitted swap transactions* (2), these investments are matched with the due dates of the obligations of the sub-fund.

###### Criteria the investments must meet

The investments must meet one of the following criteria:

- (1) An investment in deposits and/or debt instruments, placed with or issued by financial institutions under the prudential supervision of and established in a Member State of the European Economic Area.
- (2) An investment in debt instruments issued or guaranteed by a Member State of the European Economic Area.
- (3) An investment under an investment strategy with an analogous structure and identical counterparty risk as a direct investment in deposits and/or debt instruments as stated under (1) and (2) above.

The investments under (3) may consist of:

- (A) An investment in notes listed on a stock exchange that are issued by 'Special Purpose Vehicles' (SPVs).

These SPVs are managed by KBC Asset Management NV or a subsidiary.

The underlying assets of the bonds issued by the SPVs consist of a diversified portfolio of deposits issued by financial institutions, bonds, other debt instruments and financial derivatives. When selecting these underlying assets, account is taken of criteria relating to allocation and creditworthiness (see *Permitted asset classes* and *Characteristics of the bonds and other debt instruments*) in order to limit the counterparty risk.

Further details of the criteria these underlying deposits, bonds, other debt instruments and financial derivatives must meet are provided in the base prospectuses for the SPVs, which can be viewed at or downloaded from [www.kbc.be/prospectus/spv](http://www.kbc.be/prospectus/spv).

Investors are provided with information on the investments made by both the sub-fund and the SPVs in the annual and half-yearly reports on the open-ended investment company under Belgian law (bevek) to which the sub-fund belongs. These reports can also be viewed at or downloaded from [www.kbc.be](http://www.kbc.be).

- (B) An investment in:
- deposits with financial institutions under prudential supervision in the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia and/or
  - debt instruments issued by financial institutions under prudential supervision in the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia and/or
  - debt instruments issued or guaranteed by the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia.

Prudential supervision of financial institutions in the United Kingdom, Switzerland, the United States of America, Japan, Canada and Australia can be equated to prudential supervision of financial institutions in the member states of the European Economic Area.

The investments in debt instruments issued by financial institutions under prudential supervision in the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia or issued or guaranteed by the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia have a minimum credit rating as set out under the heading *Characteristics of the bonds and other debt instruments*.

- (C) The investments may also consist of a combination of the investments specified under (A) and (B).

### **No formal guarantee**

No formal guarantee of repayment of the initial subscription price is provided to the sub-fund or to its shareholders. In other words, the capital protection is not binding for the sub-fund as regards the result generated, although achieving this objective through the operation of the financial mechanism is still the top priority.

If the financial mechanism fails and, as a result, the amount per share payable (before deducting charges and taxes) at Maturity is lower than the initial subscription price, KBC Asset Management NV may decide (but is not obliged) to use the management fee it has received during the current financial year from the sub-fund – and possibly also from other sub-funds of the bevek – to cover the shortfall. This is not a guarantee from KBC Asset Management NV, which may decide at any time and at its own discretion whether or not to use the management fee for this purpose.

The capital protection does not apply to shareholders who sell their shares before Maturity.

### **Potential return**

To achieve a potential return, the sub-fund concludes swaps with one or more prime counterparties. Consequently, the sub-fund transfers a portion of the future income from the investments that were made to achieve capital protection to this counterparty (these counterparties) during the life of the sub-fund. In exchange, the counterparty (counterparties) undertake to provide a potential return as specified under the heading *Selected strategy*.

### **Sub-fund's investment policy**

#### **Permitted asset classes**

Pursuant to the provisions of the Royal Decree of 12 November 2012 on undertakings for collective investment complying with the conditions of Directive 2009/65/EC, the sub-fund may invest in transferable securities (including bonds and other debt instruments), money market instruments, units (shares) in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as and to the extent permitted by the applicable legislation.

The investment limits and restrictions set out in the Royal Decree of 12 November 2012 on undertakings for collective investment complying with the conditions of Directive 2009/65/EC will be respected at all times.

#### **Characteristics of the bonds and other debt instruments**

During the sub-fund's life, the average credit rating of the bonds and other debt instruments shall be at least 'A-' from Standard & Poor's or an equivalent rating from Moody's or Fitch, or, if there is no credit rating available, an average credit risk profile that the manager considers to be at least equivalent.

At the start of the investment, the credit rating of the long-term bonds and other debt instruments shall be at least 'A-' from Standard & Poor's or an equivalent rating from Moody's or Fitch, or, if there is no credit rating available, a credit risk profile that the manager considers to be at least equivalent.

At the start of the investment, the credit rating of the short-term bonds and other debt instruments shall be at least 'A-1' from Standard & Poor's or an equivalent rating from Moody's or Fitch, or, if there is no credit rating available, a credit risk profile that the manager considers to be at least equivalent.

When selecting the bonds and other debt instruments, all maturities are taken into consideration.

### Permitted swap transactions

**The swaps described below have been concluded with a prime counterparty or prime counterparties within the limits laid down by law.**

(1) To achieve a potential return, the sub-fund concludes swaps. Under such swap contracts, the sub-fund transfers a portion of the future income from the investments described under the heading 'Permitted asset classes' to the counterparty or counterparties during the life of the sub-fund. In exchange, the counterparty or counterparties undertake to provide a potential return as specified under the heading *Selected strategy*.

**The swaps under (1) are essential to achieve the sub-fund's investment objectives, since this technique facilitates achievement of the goal of generating a potential return.**

**The sub-fund's risk profile is not affected by the use of these swaps.**

(2) If necessary, the sub-fund also concludes swaps to match the due dates of the commitments of the sub-fund with those of the cash flows stemming from the deposits, bonds and other debt instruments described under the heading *Criteria the investments must meet*.

**These swaps are essential to achieve the sub-fund's investment objectives, since there are not enough bonds and other debt instruments available on the market whose coupon payments and maturity dates always perfectly match the due dates of the sub-fund's obligations.**

**The sub-fund's risk profile is not affected by the use of these swaps.**

(3) In addition, the sub-fund may conclude swaps to protect itself against the credit risk in respect of issuers of bonds and other debt instruments. Through this type of swap, one or more counterparties takes over the risk of an issuer of a bond or other debt instrument in the sub-fund's portfolio defaulting, in exchange for a fee payable by the sub-fund.

**The swaps under (3) serve to hedge the credit risk.**

**The sub-fund's risk profile is not affected by the use of these swaps.**

### Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

### Strategie selected

#### Investment objectives and strategy:

The sub-fund pursues two investment objectives: the repayment of 100% of the initial subscription price at Maturity as well as a potential capital gain based on the performance of a basket of 30 shares of companies that are active in the healthcare and pharmaceutical sector.

If the Maximum End Value of the basket of 30 shares has risen relative to its Minimum Starting Value, 100% of the increase  $(= (\text{maximum Value at Maturity} - \text{Minimum Starting Value}) / \text{Initial Value})$  will be taken into account at Maturity with regard to 100% of the initial subscription price. The capital gain is capped at 100% (yield to maturity of 15.34% before taxes and charges). Negative performances of the basket are not taken into account.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

### Transparency of adverse sustainability impacts

The sub-fund took into account the principal adverse impacts of its investment decisions on sustainability factors ("PAI") as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on disclosure on sustainability in the financial services sector ("SFDR") through KBC Group's Investment Policy and KBC Group Policy on Blacklisted Companies.

Based on the KBC Group Policy on Blacklisted Companies, all companies on the 'KBC Group Blacklist' (including companies involved in controversial weapons such as those prohibited by Belgian law and white phosphorus weapons) are excluded as well as the worst offenders of the UN Global Compact.

Consequently, the sub-fund took into account exposure to controversial weapons ('indicator 14') by excluding companies dealing with controversial weapon systems, and violations of the principles of the UN Global Compact or the Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises ('indicator 10') by excluding the worst offenders of the UN Global Compact.

### Maturity

Friday 26 April 2030 (payment with a value date of D+1 banking day)

## Currency

HUF, for all shares in the basket, changes in the value of the currency in which they are expressed relative to HUF are irrelevant. The investor pays the subscription amount in HUF and will be paid in HUF at Maturity (or earlier). The investor is not protected against any decline in the value of the currency in which the sub-fund is denominated relative to the euro.

## Starting Value

Value of the basket based on the weighted average of the Value of the shares included in the basket during the first 10 Valuation Days, starting from Thursday 19 June 2025 inclusive.

## Minimum Starting Value

The lowest value of the Starting Value and the lowest Value of the basket on the Initial Observation Days and is always lower than or equal to the Starting Value.

## Maximum End Value

The highest value of the End Value and the Values of the basket on the Final Observation Dates.

## Initial Observation Dates

The first Valuation Day of each month from and including August 2025 up to and including April 2026 (inclusive).

## Final Observation Dates

The last Valuation Day of each month from and including June 2029 up to and including February 2030 (inclusive).

## End Value

Value of the basket based on the weighted average of the Value of the shares included in the basket on the last Valuation Day of March 2030.

## Value

For all the shares, except for those listed on the Milan stock exchange, the closing price, namely the price of a share in the basket as calculated and notified at closing of the stock exchange by the authority of the stock exchange on which the share is listed (or its legal successor). The reference price is used for shares listed on the Milan stock exchange.

## Valuation day

A Valuation Day is set separately for each share in the basket.

A Valuation Day is a day that is a planned trading day both

- i) for the stock exchange on which the share is listed and
- ii) for the stock exchange whose activities have a substantial influence on the trading of options and futures on the share concerned

hereinafter referred to as 'the stock exchanges concerned'.

If on the Valuation Day,

- a) one of the stock exchanges concerned is unexpectedly closed or
- b) there is an event that disrupts the market for a stock exchange concerned or
- c) one of the stock exchanges concerned closes early,

the original Valuation Day is replaced by the following trading day when no event as referred to in a), b) or c) above occurs. An extraordinary closure that has been announced in advance is not considered as early closure.

If a valuation is made on consecutive Valuation Days, the trading day that replaces the original Valuation Day (i) may not coincide with another original Valuation Day and (ii) may not be a trading day that already replaces another original Valuation Day.

However, if an event as referred to under a), b) or c) above occurs on each of the eight trading days following the original Valuation Day,

- (i) the eighth trading day shall be considered as the original Valuation Day and
- (ii) the Bevek shall assess, in good faith and in consultation with the prime counterparty or counterparties with which it has concluded a swap agreement, the price of the share as it would have been traded on that eighth trading day and
- (iii) the Bevek will notify shareholders of any changes regarding setting the Starting Value and/or End Value and conditions of payment.

### Relevant basket

In the table below, the columns from left to right reflect the number of the share, the name of the share, the Bloomberg code, the exchange on which it trades (City-MIC Code) and its initial weighting in the basket.

| (i) | Name                         | Bloomberg Code  | Exchange          | Initial Weighting Coefficients |
|-----|------------------------------|-----------------|-------------------|--------------------------------|
| 1   | ABBVIE INC                   | ABBV UN Equity  | NEW YORK - XNYS   | 2.0000%                        |
| 2   | AEGON NV                     | AGN NA Equity   | AMSTERDAM - XAMS  | 5.0000%                        |

### Basket composition methodology

KBC Asset Management used the following methodology to determine the composition of the sub-fund's basket.

#### Step 1 :

The starting point is the global equities universe from which a selection of potential investments is derived in accordance with the economic criteria for the composition of the basket and subject to restrictions regarding stock market capitalisation and liquid assets.

The economic criteria for the composition of the basket determine the size of the final selection.

#### Step 2 :

The selection of shares obtained in step 1 is reduced to a short list using a quantitative selection based on past financial data. The shares selected are those of companies that achieve a good score in terms of management quality, a healthy balance-sheet structure and a positive trend in profitability.

#### Step 3 :

The selection of shares obtained in step 2 is then verified by KBC Asset Management analysts. Shares that are permanently monitored by the analysts and those for which there is a negative recommendation, when the product is launched, are then withdrawn from the selection.

#### Step 4 :

The last reduction of the selection provides the final basket. This selection was made using the technical parameters of options (including the term, volatility, dividend yield and interest rate).

The final basket must satisfy the legal requirements concerning the quantity of shares and adequate distribution in the weighting. In addition, care is taken to ensure compliance with the geographical and/or sector spread. The analysts make a qualitative assessment of each share used taking account of specific knowledge of these shares and the sectors/regions from which they come, in accordance with the term of the sub-fund.

For the sub-fund Optimum Fund K&H egészség 2, about 226 equities were selected during step 1.

The initial selection was reduced by a maximum 20% in step 2.

This was again reduced by 10% (indicative) in step 3. The final basket set up during step 4 is described above under *Relevant basket*. This basket makes it possible to offer the sub-fund Optimum Fund K&H egészség 2 under the conditions set out in the investment policy referred to above. Here the selection process uses parameters that could affect the potential return on the investments.

#### *Selection criteria for the basket :*

A share/issuer may only form part of the basket if (i) it is listed on a stock exchange, (ii) the issuer is a company active in the healthcare and pharmaceutical sector, (iii) the Board of Directors of the Bevek has approved its inclusion in the basket, (iv) the issuer is not included in the KBC Group Policy on Blacklisted Companies\* and (v) at the time the swap contracts are being concluded (see 'Permitted swap transactions'), the issuer of the share complies with the KBC Group Investment Policy\* (the 'Selection criteria').

\* The KBC Group Policy on Blacklisted Companies and the KBC Group Investment Policy can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > General exclusion policies for conventional funds and socially responsible investment funds, Paragraph 1 'KBC Group Policy on Blacklisted Companies' and 2 'KBC Group Investment Policy'.

### **Modifications to the basket due to mergers, acquisitions, demergers, nationalisation, bankruptcy or disqualification :**

#### **Mergers or acquisitions**

If, during the life of the sub-fund, one or more issuers of shares in the basket are involved in a merger or acquisition, the shares of the relevant issuers which still meet the selection criteria and comply with the KBC Group Investment Policy\* after these operations will be given a weighting in the basket equal to the sum of the weightings of the shares of all issuers involved in the operation. If, after the operation, none of the issuers involved in the operation meet the selection criteria or comply with the KBC Group Investment Policy\*, the procedures described under 'Nationalisation, bankruptcy or disqualification' will apply.

\* The KBC Group Investment Policy can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > General exclusion policies for conventional funds and responsible investment funds, Paragraph 2 'KBC Group Investment Policy'.

#### **Demergers**

If an issuer of a share in the basket proceeds to a demerger, then the share from the issuer concerned can be substituted either by one of the shares that came about as a result of the demerger and that meets the selection criteria and complies with the KBC Group Investment Policy\*, or by a basket of shares arising from the demerger which meet the selection criteria and comply with the KBC Group Investment Policy\*. This basket of shares will, when calculating the number of shares in the basket, be considered as one share. If, after the operation, none of the shares resulting from the demerger meet the selection criteria or comply with the KBC Group Investment Policy\*, the procedures described under 'Nationalisation, bankruptcy or disqualification' will apply.

\* The KBC Group Investment Policy can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > General exclusion policies for conventional funds and responsible investment funds, Paragraph 2 'KBC Group Investment Policy'.

#### **Nationalisation, bankruptcy or disqualification**

If an issuer of a share in the basket is nationalised, declared bankrupt or no longer meets the selection criteria ('disqualification'), this share will be sold at the last known price before removal. The amount thus realised will then be invested until Maturity at the rate of interest in force on money or bond markets at the moment of removal, and this for a term equal to the term remaining until Maturity of the sub-fund. The realised amount plus the interest will be taken into account at Maturity as the result achieved for that share in order to calculate the final increase in the value of the basket at Maturity.

#### **Volatility of the net asset value**

The volatility of the net asset value may be high due to the composition of the portfolio.

#### **Securities Financing Transactions (SFTs)**

The sub-fund may not lend any financial instruments.

#### **General strategy for hedging the exchange risk**

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

## Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'

### 2.1.4. Financial portfolio management

The intellectual management, with the exception of the creation of the sub-fund and its maintenance in terms of the technical, product-specific and legal aspects has been delegated by the management company to KBC Fund Management Limited, 4th Floor, Scotch House, 6/7 Burgh Quay, Dublin 2, D02 VK44, Ireland.

### 2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

### 2.1.6. Index and benchmark

Not applicable

### 2.1.7. Policy pursued during the financial year

### **2.1.8. Summary risk indicator**

- 3 on a scale of 1 (lowest risk) to 7 (highest risk)
- a moderate level of inflation risk: there is no protection against an increase of the inflation.
  - a moderate level of concentration risk: there is a concentration of the investments in the shares of companies in the pharmaceutical and health care industries.
  - a high level of market risk: the level of the risk reflects the volatility of the stock market and the exchange rate risk in relation to the euro.
  - a high level of performance risk: the level of the risk reflects the volatility of the stock market and the exchange rate risk in relation to the euro.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

## 2.2. Balance sheet

## 2.4.5. Performance figures

BE6360430431

Optimum Fund K&H egészség 2 CAP

Annual performance from through 28/02/2026 (in HUF)

The cumulative returns are shown where they relate to a period of at least one year.

If the results are expressed in a currency other than the euro, the return may be higher or lower due to exchange rate fluctuations.

## 2.4.6. Costs

### Ongoing Charges:

Not applicable

### Existence of Commission Sharing Agreements

Not applicable

### Fee sharing agreements en rebates

The management company has shared 70.00% of its fee with the distributor, and institutional and/or professional parties.

This percentage has been calculated relative to the fee for managing the investment portfolio of the sub-fund when it was launched.

## 2.4.7. Notes to the financial statements and other data

|                                                                                                          |                                                                                                                                                                                                     |                                                                                                                                                                                                                                                                                                        |

### Fee for managing the investment portfolio

KBC Asset Management NV receives a fee for managing the sub-fund's investments. This fee consists of a varying amount of max. 200 HUF per unit per year (with a maximum of HUF per unit per year for risk management).

This fee, which is calculated every six months, is paid monthly on the last banking day of each month. It can change from one six-month period to the next, within the limits set out below, and is based on the number of units issued at the start of each six-month period.

In the calculation, account is taken of the difference between:

- the return generated by the investments in bonds and other debt instruments, deposits, and/or liquid assets in order to achieve the capital protection on the Maturity date (see *The financial mechanism used to achieve capital protection*), and
- the expenses borne by the sub-fund to achieve a potential return (see *Permitted 'swap' transactions*),
- after deducting the expected fixed and variable expenses of the sub-fund, as mentioned above.

Of this, KBC Fund Management Ltd. receives a fee of no more than 189.50 HUF per unit per year from KBC Asset Management NV for the intellectual management of the sub-fund. KBC Fund Management Ltd. is a wholly owned subsidiary of KBC Asset Management NV.

KBC Asset Management NV has informed the bevek that, if due to the failure of the financial mechanism, the amount that should be paid per unit (after deducting taxes and charges) on the Maturity date, as relevant, is lower than the initial subscription price, KBC Asset Management NV may decide (but is not obliged to) to use the management fee it receives during the current financial year from the sub-fund – and possibly also from other sub-funds of the bevek – to cover this shortfall. This is not a guarantee from KBC Asset Management NV, which may decide at any time and at its own discretion whether or not to use the management fee for this purpose.

KBC Asset Management NV or one of its subsidiaries has also been appointed manager of the SPVs in which the sub-fund may invest (see *Criteria the investments must meet*). KBC Asset Management NV or one of its subsidiaries, as the case may be, receives an annual fee from the relevant SPVs for their management. This management fee may not exceed 0.15% per year and is calculated on the assets managed at the end of the quarter.

The sum of (i) the fee for managing the investment portfolio that the sub-fund pays to the management company and (ii) the management fee that the SPVs in which the sub-fund invests pay to the asset manager, shall never exceed 200.00 HUF per unit per year, as described above.

|-----------------------------|------------------|
| Launch date:                | 12 December 2023 |
| Initial subscription price: | 10000 HUF        |
| Maturity date:              | 30 November 2028 |
| Currency:                   | HUF              |

#### 2.1.2. Stock exchange listing

Not applicable.

#### 2.1.3. Goal and key principles of the investment policy

##### Object of the sub-fund

The object of the sub-fund is twofold (before deducting charges and taxes):

- (1) To repay per share the initial subscription price of 10000 HUF at Maturity.(i.e. the capital protection). This capital protection is provided through a financial mechanism that will be explained in more detail under the heading *Capital protection*. However, the capital protection does not apply to shareholders who sell their shares before Maturity.
- (2) To provide a potential return through an investment in swaps. The various types of swaps in which the sub-fund may invest are explained in more detail under the *Potential return*.

##### Capital Protection

###### The financial mechanism used to achieve capital protection

The financial mechanism used to achieve capital protection at Maturity consists of an investment of the total amount of the subscriptions in bonds and other debt instruments, deposits and/or liquid assets (including cash deposited on a time-deposit account or current account). These investments can have different maturities and coupon payment dates. Using the swaps described under the heading *Permitted swap transactions* (2), these investments are matched with the due dates of the obligations of the sub-fund.

###### Criteria the investments must meet

The investments must meet one of the following criteria:

- (1) An investment in deposits and/or debt instruments, placed with or issued by financial institutions under the prudential supervision of and established in a Member State of the European Economic Area.
- (2) An investment in debt instruments issued or guaranteed by a Member State of the European Economic Area.
- (3) An investment under an investment strategy with an analogous structure and identical counterparty risk as a direct investment in deposits and/or debt instruments as stated under (1) and (2) above.

The investments under (3) may consist of:

- (A) An investment in notes listed on a stock exchange that are issued by 'Special Purpose Vehicles' (SPVs).

These SPVs are managed by KBC Asset Management NV or a subsidiary.

The underlying assets of the bonds issued by the SPVs consist of a diversified portfolio of deposits issued by financial institutions, bonds, other debt instruments and financial derivatives. When selecting these underlying assets, account is taken of criteria relating to allocation and creditworthiness (see *Permitted asset classes* and *Characteristics of the bonds and other debt instruments*) in order to limit the counterparty risk.

Further details of the criteria these underlying deposits, bonds, other debt instruments and financial derivatives must meet are provided in the base prospectuses for the SPVs, which can be viewed at or downloaded from [www.kbc.be/prospectus/spv](http://www.kbc.be/prospectus/spv).

Investors are provided with information on the investments made by both the sub-fund and the SPVs in the annual and half-yearly reports on the open-ended investment company under Belgian law (bevek) to which the sub-fund belongs. These reports can also be viewed at or downloaded from [www.kbc.be](http://www.kbc.be).

- (B) An investment in:
- deposits with financial institutions under prudential supervision in the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia and/or
  - debt instruments issued by financial institutions under prudential supervision in the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia and/or
  - debt instruments issued or guaranteed by the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia.

Prudential supervision of financial institutions in the United Kingdom, Switzerland, the United States of America, Japan, Canada and Australia can be equated to prudential supervision of financial institutions in the member states of the European Economic Area.

The investments in debt instruments issued by financial institutions under prudential supervision in the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia or issued or guaranteed by the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia have a minimum credit rating as set out under the heading *Characteristics of the bonds and other debt instruments*.

- (C) The investments may also consist of a combination of the investments specified under (A) and (B).

### **No formal guarantee**

No formal guarantee of repayment of the initial subscription price is provided to the sub-fund or to its shareholders. In other words, the capital protection is not binding for the sub-fund as regards the result generated, although achieving this objective through the operation of the financial mechanism is still the top priority.

If the financial mechanism fails and, as a result, the amount per share payable (before deducting charges and taxes) at Maturity is lower than the initial subscription price, KBC Asset Management NV may decide (but is not obliged) to use the management fee it has received during the current financial year from the sub-fund – and possibly also from other sub-funds of the bevek – to cover the shortfall. This is not a guarantee from KBC Asset Management NV, which may decide at any time and at its own discretion whether or not to use the management fee for this purpose.

The capital protection does not apply to shareholders who sell their shares before Maturity.

### **Potential return**

To achieve a potential return, the sub-fund concludes swaps with one or more prime counterparties. Consequently, the sub-fund transfers a portion of the future income from the investments that were made to achieve capital protection to this counterparty (these counterparties) during the life of the sub-fund. In exchange, the counterparty (counterparties) undertake to provide a potential return as specified under the heading *Selected strategy*.

### **Sub-fund's investment policy**

#### **Permitted asset classes**

Pursuant to the provisions of the Royal Decree of 12 November 2012 on undertakings for collective investment complying with the conditions of Directive 2009/65/EC, the sub-fund may invest in transferable securities (including bonds and other debt instruments), money market instruments, units (shares) in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as and to the extent permitted by the applicable legislation.

The investment limits and restrictions set out in the Royal Decree of 12 November 2012 on undertakings for collective investment complying with the conditions of Directive 2009/65/EC will be respected at all times.

### **Characteristics of the bonds and other debt instruments**

During the sub-fund's life, the average credit rating of the bonds and other debt instruments shall be at least 'A-' from Standard & Poor's or an equivalent rating from Moody's or Fitch, or, if there is no credit rating available, an average credit risk profile that the manager considers to be at least equivalent.

At the start of the investment, the credit rating of the long-term bonds and other debt instruments shall be at least 'A-' from Standard & Poor's or an equivalent rating from Moody's or Fitch, or, if there is no credit rating available, a credit risk profile that the manager considers to be at least equivalent.

At the start of the investment, the credit rating of the short-term bonds and other debt instruments shall be at least 'A-1' from Standard & Poor's or an equivalent rating from Moody's or Fitch, or, if there is no credit rating available, a credit risk profile that the manager considers to be at least equivalent.

When selecting the bonds and other debt instruments, all maturities are taken into consideration.

### Permitted swap transactions

**The swaps described below have been concluded with a prime counterparty or prime counterparties within the limits laid down by law.**

(1) To achieve a potential return, the sub-fund concludes swaps. Under such swap contracts, the sub-fund transfers a portion of the future income from the investments described under the heading 'Permitted asset classes' to the counterparty or counterparties during the life of the sub-fund. In exchange, the counterparty or counterparties undertake to provide a potential return as specified under the heading *Selected strategy*.

**The swaps under (1) are essential to achieve the sub-fund's investment objectives, since this technique facilitates achievement of the goal of generating a potential return.**

**The sub-fund's risk profile is not affected by the use of these swaps.**

(2) If necessary, the sub-fund also concludes swaps to match the due dates of the commitments of the sub-fund with those of the cash flows stemming from the deposits, bonds and other debt instruments described under the heading *Criteria the investments must meet*.

**These swaps are essential to achieve the sub-fund's investment objectives, since there are not enough bonds and other debt instruments available on the market whose coupon payments and maturity dates always perfectly match the due dates of the sub-fund's obligations.**

**The sub-fund's risk profile is not affected by the use of these swaps.**

(3) In addition, the sub-fund may conclude swaps to protect itself against the credit risk in respect of issuers of bonds and other debt instruments. Through this type of swap, one or more counterparties takes over the risk of an issuer of a bond or other debt instrument in the sub-fund's portfolio defaulting, in exchange for a fee payable by the sub-fund.

**The swaps under (3) serve to hedge the credit risk.**

**The sub-fund's risk profile is not affected by the use of these swaps.**

### Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

### Strategie selected

#### Investment objectives and strategy:

The sub-fund has two investment objectives: firstly, it seeks to repay at Maturity 100% of the initial subscription price and secondly a possible capital gain that is contingent on the evolution of a basket of 30 shares of companies operating in the pharmaceutical and healthcare industries.

At Maturity, a capital gain will be distributed that will equal the best of two alternatives:

- on the one hand 18.00%, settled at 100% of the initial subscription price;
- on the other hand 100% of the increase in the basket of 30 shares, settled at 100% of the initial subscription price, where the maximum capital gain will be 120%. The evolution of the basket is calculated as follows: [end value of the basket minus the starting value of the basket], divided by the starting value of the basket. Decreases in the basket are not taken into account.

Consequently, the capital gain at the Maturity Date will be at least 18.00% (yield to maturity: 3.40% before fees and taxes) and maximum 120% (yield to maturity: 17.28% before costs and taxes).

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

### Transparency of adverse sustainability impacts

The sub-fund took into account the principal adverse impacts of its investment decisions on sustainability factors ("PAI") as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on disclosure on sustainability in the financial services sector ("SFDR") through KBC Group's Investment Policy and KBC Group Policy on Blacklisted Companies.

Based on the KBC Group Policy on Blacklisted Companies, all companies on the 'KBC Group Blacklist' (including companies involved in controversial weapons such as those prohibited by Belgian law and white phosphorus weapons) are excluded as well as the worst offenders of the UN Global Compact.

Consequently, the sub-fund took into account exposure to controversial weapons ('indicator 14') by excluding companies dealing with controversial weapon systems, and violations of the principles of the UN Global Compact or the Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises ('indicator 10') by excluding the worst offenders of the UN Global Compact.

## **Maturity**

Thursday 30 November 2028 (payment with a value date of D+1 banking day)

## **Currency**

HUF, for all shares in the basket, changes in the value of the currency in which they are expressed relative to HUF are irrelevant. The investor pays the subscription amount in HUF and will be paid in HUF at Maturity (or earlier). The investor is not protected against any decline in the value of the currency in which the sub-fund is denominated relative to the euro.

## **Starting Value**

Value of the basket based on the weighted average of the Value of the shares included in the basket during the first 10 Valuation Days, starting from Thursday 21 December 2023 inclusive.

## **End Value**

Value of the basket based on the weighted average of the Value of the shares included in the basket on the last Valuation Day of the month for the last 12 months before Maturity, more specifically from November 2027 through October 2028 (inclusive).

## **Value**

For all the shares, except for those listed on the Milan stock exchange, the closing price, namely the price of a share in the basket as calculated and notified at closing of the stock exchange by the authority of the stock exchange on which the share is listed (or its legal successor). The reference price is used for shares listed on the Milan stock exchange.

## **Valuation day**

A Valuation Day is set separately for each share in the basket.

A Valuation Day is a day that is a planned trading day both

- i) for the stock exchange on which the share is listed and
- ii) for the stock exchange whose activities have a substantial influence on the trading of options and futures on the share concerned

hereinafter referred to as 'the stock exchanges concerned'.

If on the Valuation Day,

- a) one of the stock exchanges concerned is unexpectedly closed or
- b) there is an event that disrupts the market for a stock exchange concerned or
- c) one of the stock exchanges concerned closes early,

the original Valuation Day is replaced by the following trading day when no event as referred to in a), b) or c) above occurs. An extraordinary closure that has been announced in advance is not considered as early closure.

If a valuation is made on consecutive Valuation Days, the trading day that replaces the original Valuation Day (i) may not coincide with another original Valuation Day and (ii) may not be a trading day that already replaces another original Valuation Day.

However, if an event as referred to under a), b) or c) above occurs on each of the eight trading days following the original Valuation Day,

- (i) the eighth trading day shall be considered as the original Valuation Day and
- (ii) the Bevek shall assess, in good faith and in consultation with the prime counterparty or counterparties with which it has concluded a swap agreement, the price of the share as it would have been traded on that eighth trading day and
- (iii) the Bevek will notify shareholders of any changes regarding setting the Starting Value and/or End Value and conditions of payment.

### Relevant basket

In the table below, the columns from left to right reflect the number of the share, the name of the share, the Bloomberg code, the exchange on which it trades (City-MIC Code) and its initial weighting in the basket.

### Basket composition methodology

KBC Asset Management used the following methodology to determine the composition of the sub-fund's basket.

#### Step 1 :

The starting point is the global equities universe from which a selection of potential investments is derived in accordance with the economic criteria for the composition of the basket and subject to restrictions regarding stock market capitalisation and liquid assets.

The economic criteria for the composition of the basket determine the size of the final selection.

#### Step 2 :

The selection of shares obtained in step 1 is reduced to a short list using a quantitative selection based on past financial data. The shares selected are those of companies that achieve a good score in terms of management quality, a healthy balance-sheet structure and a positive trend in profitability.

#### Step 3 :

The selection of shares obtained in step 2 is then verified by KBC Asset Management analysts. Shares that are permanently monitored by the analysts and those for which there is a negative recommendation, when the product is launched, are then withdrawn from the selection.

#### Step 4 :

The last reduction of the selection provides the final basket. This selection was made using the technical parameters of options (including the term, volatility, dividend yield and interest rate).

The final basket must satisfy the legal requirements concerning the quantity of shares and adequate distribution in the weighting. In addition, care is taken to ensure compliance with the geographical and/or sector spread. The analysts make a qualitative assessment of each share used taking account of specific knowledge of these shares and the sectors/regions from which they come, in accordance with the term of the sub-fund.

For the sub-fund Optimum Fund K&H fix egészség 1, about 201 equities were selected during step 1.

The initial selection was reduced by a maximum 20% in step 2.

This was again reduced by 10% (indicative) in step 3. The final basket set up during step 4 is described above under *Relevant basket*. This basket makes it possible to offer the sub-fund Optimum Fund K&H fix egészség 1 under the conditions set out in the investment policy referred to above. Here the selection process uses parameters that could affect the potential return on the investments.

#### *Selection criteria for the basket :*

A share/issuer may only form part of the basket if (i) it is listed on a stock exchange, (ii) the issuer is a company operating in the pharmaceutical or healthcare industry, (iii) the Board of Directors of the Bevek has approved its inclusion in the basket, (iv) the issuer is not included in the KBC Group Policy on Blacklisted Companies\* and (v) at the time the swap contracts are being concluded (see 'Permitted swap transactions'), the issuer of the share complies with the KBC Group Investment Policy\* (the 'Selection criteria').

\* The KBC Group Policy on Blacklisted Companies and the KBC Group Investment Policy can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > General exclusion policies for conventional funds and socially responsible investment funds, Paragraph 1 'KBC Group Policy on Blacklisted Companies' and 2 'KBC Group Investment Policy'.

### **Modifications to the basket due to mergers, acquisitions, demergers, nationalisation, bankruptcy or disqualification :**

#### **Mergers or acquisitions**

If, during the life of the sub-fund, one or more issuers of shares in the basket are involved in a merger or acquisition, the shares of the relevant issuers which still meet the selection criteria and comply with the KBC Group Investment Policy\* after these operations will be given a weighting in the basket equal to the sum of the weightings of the shares of all issuers involved in the operation. If, after the operation, none of the issuers involved in the operation meet the selection criteria or comply with the KBC Group Investment Policy\*, the procedures described under 'Nationalisation, bankruptcy or disqualification' will apply.

\* The KBC Group Investment Policy can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > General exclusion policies for conventional funds and responsible investment funds, Paragraph 2 'KBC Group Investment Policy'.

#### **Demergers**

If an issuer of a share in the basket proceeds to a demerger, then the share from the issuer concerned can be substituted either by one of the shares that came about as a result of the demerger and that meets the selection criteria and complies with the KBC Group Investment Policy\*, or by a basket of shares arising from the demerger which meet the selection criteria and comply with the KBC Group Investment Policy\*. This basket of shares will, when calculating the number of shares in the basket, be considered as one share. If, after the operation, none of the shares resulting from the demerger meet the selection criteria or comply with the KBC Group Investment Policy\*, the procedures described under 'Nationalisation, bankruptcy or disqualification' will apply.

\* The KBC Group Investment Policy can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > General exclusion policies for conventional funds and responsible investment funds, Paragraph 2 'KBC Group Investment Policy'.

#### **Nationalisation, bankruptcy or disqualification**

If an issuer of a share in the basket is nationalised, declared bankrupt or no longer meets the selection criteria ('disqualification'), this share will be sold at the last known price before removal. The amount thus realised will then be invested until Maturity at the rate of interest in force on money or bond markets at the moment of removal, and this for a term equal to the term remaining until Maturity of the sub-fund. The realised amount plus the interest will be taken into account at Maturity as the result achieved for that share in order to calculate the final increase in the value of the basket at Maturity.

#### **Volatility of the net asset value**

The volatility of the net asset value may be high due to the composition of the portfolio.

#### **Securities Financing Transactions (SFTs)**

The sub-fund may not lend any financial instruments.

#### **General strategy for hedging the exchange risk**

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

## Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'

### 2.1.4. Financial portfolio management

The intellectual management, with the exception of the creation of the sub-fund and its maintenance in terms of the technical, product-specific and legal aspects has been delegated by the management company to KBC Fund Management Limited, 4th Floor, Scotch House, 6/7 Burgh Quay, Dublin 2, D02 VK44, Ireland.

### 2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

### 2.1.6. Index and benchmark

Not applicable

### 2.1.7. Policy pursued during the financial year

#### Composition of the basket on report date

| Name                         | Value         |

### **2.1.8. Summary risk indicator**

- 3 on a scale of 1 (lowest risk) to 7 (highest risk)
- a moderate level of inflation risk: there is no protection against an increase of the inflation.
  - a moderate level of concentration risk: there is a concentration of the investments in the shares of companies in the pharmaceutical and health care industries.
  - a high level of market risk: the level of the risk reflects the volatility of the stock market and the exchange rate risk in relation to the euro.
  - a high level of performance risk: the level of the risk reflects the volatility of the stock market and the exchange rate risk in relation to the euro.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

## 2.2. Balance sheet

Risk warning: Past performance is not a guide to future performance.

\* Return on annual basis.

- The bar chart shows the performance for full financial years(period of 12 months prior to the half-yearly closing).
- The figures do not take account of any restructuring..
- Calculated in HUF and in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage.
- Calculation method for date D, where NAV stands for net asset value:  
Capitalisation units (CAP)  
Return on date D over a period of X years :  

$$[NIW(D) / NIW(Y)] ^ {1 / X} - 1$$
where Y = D-X  
Return on date D since the start date S of the unit:  

$$[NIW(D) / NIW(S)] ^ {1 / F} - 1$$
where F = 1 if the unit has existed for less than one year on date D  
where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D
- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation shares.

## 2.4.6. Costs

### Ongoing Charges:

Management fees and other administrative or operating costs: 1,771%  
Transaction costs: 0,000%

Percentage calculated at reporting date: 28 February 2026 (period of 12 months prior to the half-yearly closing).

A more detailed explanation with respect to the method of calculating ongoing charges and the relevant exclusions can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.5. Ongoing charges'

### Existence of Commission Sharing Agreements

Not applicable

### Fee sharing agreements en rebates

The management company has shared 70.00% of its fee with the distributor, and institutional and/or professional parties.

This percentage has been calculated relative to the fee for managing the investment portfolio of the sub-fund when it was launched.

## 2.4.7. Notes to the financial statements and other data

### Fee for managing the investment portfolio

KBC Asset Management NV receives a fee for managing the sub-fund's investments. This fee consists of a varying amount of max. 200 HUF per unit per year (with a maximum of HUF per unit per year for risk management).

This fee, which is calculated every six months, is paid monthly on the last banking day of each month. It can change from one six-month period to the next, within the limits set out below, and is based on the number of units issued at the start of each six-month period.

In the calculation, account is taken of the difference between:

- the return generated by the investments in bonds and other debt instruments, deposits, and/or liquid assets in order to achieve the capital protection on the Maturity date (see *The financial mechanism used to achieve capital protection*), and
- the expenses borne by the sub-fund to achieve a potential return (see *Permitted 'swap' transactions*),
- after deducting the expected fixed and variable expenses of the sub-fund, as mentioned above.

Of this, KBC Fund Management Ltd. receives a fee of no more than 189.50 HUF per unit per year from KBC Asset Management NV for the intellectual management of the sub-fund. KBC Fund Management Ltd. is a wholly owned subsidiary of KBC Asset Management NV.

KBC Asset Management NV has informed the bevek that, if due to the failure of the financial mechanism, the amount that should be paid per unit (after deducting taxes and charges) on the Maturity date, as relevant, is lower than the initial subscription price, KBC Asset Management NV may decide (but is not obliged to) to use the management fee it receives during the current financial year from the sub-fund – and possibly also from other sub-funds of the bevek – to cover this shortfall. This is not a guarantee from KBC Asset Management NV, which may

decide at any time and at its own discretion whether or not to use the management fee for this purpose. KBC Asset Management NV or one of its subsidiaries has also been appointed manager of the SPVs in which the sub-fund may invest (see *Criteria the investments must meet*). KBC Asset Management NV or one of its subsidiaries, as the case may be, receives an annual fee from the relevant SPVs for their management. This management fee may not exceed 0.15% per year and is calculated on the assets managed at the end of the quarter.

The sum of (i) the fee for managing the investment portfolio that the sub-fund pays to the management company and (ii) the management fee that the SPVs in which the sub-fund invests pay to the asset manager, shall never exceed 200.00 HUF per unit per year, as described above.

#### 2.1.2. Stock exchange listing

Not applicable.

#### 2.1.3. Goal and key principles of the investment policy

##### Object of the sub-fund

The object of the sub-fund is twofold (before deducting charges and taxes):

- (1) To repay per share the initial subscription price of 10000 HUF at Maturity.(i.e. the capital protection). This capital protection is provided through a financial mechanism that will be explained in more detail under the heading *Capital protection*. However, the capital protection does not apply to shareholders who sell their shares before Maturity.
- (2) To provide a potential return through an investment in swaps. The various types of swaps in which the sub-fund may invest are explained in more detail under the *Potential return*.

##### Capital Protection

###### The financial mechanism used to achieve capital protection

The financial mechanism used to achieve capital protection at Maturity consists of an investment of the total amount of the subscriptions in bonds and other debt instruments, deposits and/or liquid assets (including cash deposited on a time-deposit account or current account). These investments can have different maturities and coupon payment dates. Using the swaps described under the heading *Permitted swap transactions* (2), these investments are matched with the due dates of the obligations of the sub-fund.

###### Criteria the investments must meet

The investments must meet one of the following criteria:

- (1) An investment in deposits and/or debt instruments, placed with or issued by financial institutions under the prudential supervision of and established in a Member State of the European Economic Area.
- (2) An investment in debt instruments issued or guaranteed by a Member State of the European Economic Area.
- (3) An investment under an investment strategy with an analogous structure and identical counterparty risk as a direct investment in deposits and/or debt instruments as stated under (1) and (2) above.

The investments under (3) may consist of:

- (A) An investment in notes listed on a stock exchange that are issued by 'Special Purpose Vehicles' (SPVs).

These SPVs are managed by KBC Asset Management NV or a subsidiary.

The underlying assets of the bonds issued by the SPVs consist of a diversified portfolio of deposits issued by financial institutions, bonds, other debt instruments and financial derivatives. When selecting these underlying assets, account is taken of criteria relating to allocation and creditworthiness (see *Permitted asset classes* and *Characteristics of the bonds and other debt instruments*) in order to limit the counterparty risk.

Further details of the criteria these underlying deposits, bonds, other debt instruments and financial derivatives must meet are provided in the base prospectuses for the SPVs, which can be viewed at or downloaded from [www.kbc.be/prospectus/spv](http://www.kbc.be/prospectus/spv).

Investors are provided with information on the investments made by both the sub-fund and the SPVs in the annual and half-yearly reports on the open-ended investment company under Belgian law (bevek) to which the sub-fund belongs. These reports can also be viewed at or downloaded from [www.kbc.be](http://www.kbc.be).

- (B) An investment in:
- deposits with financial institutions under prudential supervision in the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia and/or
  - debt instruments issued by financial institutions under prudential supervision in the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia and/or
  - debt instruments issued or guaranteed by the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia.

Prudential supervision of financial institutions in the United Kingdom, Switzerland, the United States of America, Japan, Canada and Australia can be equated to prudential supervision of financial institutions in the member states of the European Economic Area.

The investments in debt instruments issued by financial institutions under prudential supervision in the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia or issued or guaranteed by the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia have a minimum credit rating as set out under the heading *Characteristics of the bonds and other debt instruments*.

- (C) The investments may also consist of a combination of the investments specified under (A) and (B).

### **No formal guarantee**

No formal guarantee of repayment of the initial subscription price is provided to the sub-fund or to its shareholders. In other words, the capital protection is not binding for the sub-fund as regards the result generated, although achieving this objective through the operation of the financial mechanism is still the top priority.

If the financial mechanism fails and, as a result, the amount per share payable (before deducting charges and taxes) at Maturity is lower than the initial subscription price, KBC Asset Management NV may decide (but is not obliged) to use the management fee it has received during the current financial year from the sub-fund – and possibly also from other sub-funds of the bevek – to cover the shortfall. This is not a guarantee from KBC Asset Management NV, which may decide at any time and at its own discretion whether or not to use the management fee for this purpose.

The capital protection does not apply to shareholders who sell their shares before Maturity.

### **Potential return**

To achieve a potential return, the sub-fund concludes swaps with one or more prime counterparties. Consequently, the sub-fund transfers a portion of the future income from the investments that were made to achieve capital protection to this counterparty (these counterparties) during the life of the sub-fund. In exchange, the counterparty (counterparties) undertake to provide a potential return as specified under the heading *Selected strategy*.

### **Sub-fund's investment policy**

#### **Permitted asset classes**

Pursuant to the provisions of the Royal Decree of 12 November 2012 on undertakings for collective investment complying with the conditions of Directive 2009/65/EC, the sub-fund may invest in transferable securities (including bonds and other debt instruments), money market instruments, units (shares) in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as and to the extent permitted by the applicable legislation.

The investment limits and restrictions set out in the Royal Decree of 12 November 2012 on undertakings for collective investment complying with the conditions of Directive 2009/65/EC will be respected at all times.

### **Characteristics of the bonds and other debt instruments**

During the sub-fund's life, the average credit rating of the bonds and other debt instruments shall be at least 'A-' from Standard & Poor's or an equivalent rating from Moody's or Fitch, or, if there is no credit rating available, an average credit risk profile that the manager considers to be at least equivalent.

At the start of the investment, the credit rating of the long-term bonds and other debt instruments shall be at least 'A-' from Standard & Poor's or an equivalent rating from Moody's or Fitch, or, if there is no credit rating available, a credit risk profile that the manager considers to be at least equivalent.

At the start of the investment, the credit rating of the short-term bonds and other debt instruments shall be at least 'A-1' from Standard & Poor's or an equivalent rating from Moody's or Fitch, or, if there is no credit rating available, a credit risk profile that the manager considers to be at least equivalent.

When selecting the bonds and other debt instruments, all maturities are taken into consideration.

### Permitted swap transactions

**The swaps described below have been concluded with a prime counterparty or prime counterparties within the limits laid down by law.**

(1) To achieve a potential return, the sub-fund concludes swaps. Under such swap contracts, the sub-fund transfers a portion of the future income from the investments described under the heading 'Permitted asset classes' to the counterparty or counterparties during the life of the sub-fund. In exchange, the counterparty or counterparties undertake to provide a potential return as specified under the heading *Selected strategy*.

**The swaps under (1) are essential to achieve the sub-fund's investment objectives, since this technique facilitates achievement of the goal of generating a potential return.**

**The sub-fund's risk profile is not affected by the use of these swaps.**

(2) If necessary, the sub-fund also concludes swaps to match the due dates of the commitments of the sub-fund with those of the cash flows stemming from the deposits, bonds and other debt instruments described under the heading *Criteria the investments must meet*.

**These swaps are essential to achieve the sub-fund's investment objectives, since there are not enough bonds and other debt instruments available on the market whose coupon payments and maturity dates always perfectly match the due dates of the sub-fund's obligations.**

**The sub-fund's risk profile is not affected by the use of these swaps.**

(3) In addition, the sub-fund may conclude swaps to protect itself against the credit risk in respect of issuers of bonds and other debt instruments. Through this type of swap, one or more counterparties takes over the risk of an issuer of a bond or other debt instrument in the sub-fund's portfolio defaulting, in exchange for a fee payable by the sub-fund.

**The swaps under (3) serve to hedge the credit risk.**

**The sub-fund's risk profile is not affected by the use of these swaps.**

### Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

### Strategie selected

#### Investment objectives and strategy:

The sub-fund has two investment objectives: firstly, it seeks to repay at Maturity 100% of the initial subscription price and secondly a possible capital gain that is contingent on the evolution of a basket of 30 shares of companies operating in the pharmaceutical and healthcare industries.

At Maturity, a capital gain will be distributed that will equal the best of two alternatives:

- on the one hand 10.00%, settled at 100% of the initial subscription price;
- on the other hand 100% of the increase in the basket of 30 shares, settled at 100% of the initial subscription price, where the maximum capital gain will be 100%. The evolution of the basket is calculated as follows: [end value of the basket minus the starting value of the basket], divided by the starting value of the basket. Decreases in the basket are not taken into account.

Consequently, the capital gain at the Maturity Date will be at least 10.00% (yield to maturity: 1.67% before fees and taxes) and maximum 100% (yield to maturity: 12.83% before costs and taxes).

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

### Transparency of adverse sustainability impacts

The sub-fund took into account the principal adverse impacts of its investment decisions on sustainability factors ("PAI") as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on disclosure on sustainability in the financial services sector ("SFDR") through KBC Group's Investment Policy and KBC Group Policy on Blacklisted Companies.

Based on the KBC Group Policy on Blacklisted Companies, all companies on the 'KBC Group Blacklist' (including companies involved in controversial weapons such as those prohibited by Belgian law and white phosphorus weapons) are excluded as well as the worst offenders of the UN Global Compact.

Consequently, the sub-fund took into account exposure to controversial weapons ('indicator 14') by excluding companies dealing with controversial weapon systems, and violations of the principles of the UN Global Compact or the Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises ('indicator 10') by excluding the worst offenders of the UN Global Compact.

## **Maturity**

Friday 30 November 2029 (payment with a value date of D+1 banking day)

## **Currency**

HUF, for all shares in the basket, changes in the value of the currency in which they are expressed relative to HUF are irrelevant. The investor pays the subscription amount in HUF and will be paid in HUF at Maturity (or earlier). The investor is not protected against any decline in the value of the currency in which the sub-fund is denominated relative to the euro.

## **Starting Value**

Value of the basket based on the weighted average of the Value of the shares included in the basket during the first 10 Valuation Days, starting from Tuesday 5 March 2024 inclusive.

## **End Value**

Value of the basket based on the weighted average of the Value of the shares included in the basket on the last Valuation Day of the month for the last 12 months before Maturity, more specifically from November 2028 through October 2029 (inclusive).

## **Value**

For all the shares, except for those listed on the Milan stock exchange, the closing price, namely the price of a share in the basket as calculated and notified at closing of the stock exchange by the authority of the stock exchange on which the share is listed (or its legal successor). The reference price is used for shares listed on the Milan stock exchange.

## **Valuation day**

A Valuation Day is set separately for each share in the basket.

A Valuation Day is a day that is a planned trading day both

- i) for the stock exchange on which the share is listed and
- ii) for the stock exchange whose activities have a substantial influence on the trading of options and futures on the share concerned

hereinafter referred to as 'the stock exchanges concerned'.

If on the Valuation Day,

- a) one of the stock exchanges concerned is unexpectedly closed or
- b) there is an event that disrupts the market for a stock exchange concerned or
- c) one of the stock exchanges concerned closes early,

the original Valuation Day is replaced by the following trading day when no event as referred to in a), b) or c) above occurs. An extraordinary closure that has been announced in advance is not considered as early closure.

If a valuation is made on consecutive Valuation Days, the trading day that replaces the original Valuation Day (i) may not coincide with another original Valuation Day and (ii) may not be a trading day that already replaces another original Valuation Day.

However, if an event as referred to under a), b) or c) above occurs on each of the eight trading days following the original Valuation Day,

- (i) the eighth trading day shall be considered as the original Valuation Day and
- (ii) the Bevek shall assess, in good faith and in consultation with the prime counterparty or counterparties with which it has concluded a swap agreement, the price of the share as it would have been traded on that eighth trading day and
- (iii) the Bevek will notify shareholders of any changes regarding setting the Starting Value and/or End Value and conditions of payment.

### Relevant basket

In the table below, the columns from left to right reflect the number of the share, the name of the share, the Bloomberg code, the exchange on which it trades (City-MIC Code) and its initial weighting in the basket.

### Basket composition methodology

KBC Asset Management used the following methodology to determine the composition of the sub-fund's basket.

#### Step 1 :

The starting point is the global equities universe from which a selection of potential investments is derived in accordance with the economic criteria for the composition of the basket and subject to restrictions regarding stock market capitalisation and liquid assets.

The economic criteria for the composition of the basket determine the size of the final selection.

#### Step 2 :

The selection of shares obtained in step 1 is reduced to a short list using a quantitative selection based on past financial data. The shares selected are those of companies that achieve a good score in terms of management quality, a healthy balance-sheet structure and a positive trend in profitability.

#### Step 3 :

The selection of shares obtained in step 2 is then verified by KBC Asset Management analysts. Shares that are permanently monitored by the analysts and those for which there is a negative recommendation, when the product is launched, are then withdrawn from the selection.

#### Step 4 :

The last reduction of the selection provides the final basket. This selection was made using the technical parameters of options (including the term, volatility, dividend yield and interest rate).

The final basket must satisfy the legal requirements concerning the quantity of shares and adequate distribution in the weighting. In addition, care is taken to ensure compliance with the geographical and/or sector spread. The analysts make a qualitative assessment of each share used taking account of specific knowledge of these shares and the sectors/regions from which they come, in accordance with the term of the sub-fund.

For the sub-fund Optimum Fund K&H fix egészség 2, about 201 equities were selected during step 1.

The initial selection was reduced by a maximum 20% in step 2.

This was again reduced by 10% (indicative) in step 3. The final basket set up during step 4 is described above under *Relevant basket*. This basket makes it possible to offer the sub-fund Optimum Fund K&H fix egészség 2 under the conditions set out in the investment policy referred to above. Here the selection process uses parameters that could affect the potential return on the investments.

#### *Selection criteria for the basket :*

A share/issuer may only form part of the basket if (i) it is listed on a stock exchange, (ii) the issuer is a company operating in the pharmaceutical or healthcare industry, (iii) the Board of Directors of the Bevek has approved its inclusion in the basket, (iv) the issuer is not included in the KBC Group Policy on Blacklisted Companies\* and (v) at the time the swap contracts are being concluded (see 'Permitted swap transactions'), the issuer of the share complies with the KBC Group Investment Policy\* (the 'Selection criteria').

\* The KBC Group Policy on Blacklisted Companies and the KBC Group Investment Policy can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > General exclusion policies for conventional funds and socially responsible investment funds, Paragraph 1 'KBC Group Policy on Blacklisted Companies' and 2 'KBC Group Investment Policy'.

### **Modifications to the basket due to mergers, acquisitions, demergers, nationalisation, bankruptcy or disqualification :**

#### **Mergers or acquisitions**

If, during the life of the sub-fund, one or more issuers of shares in the basket are involved in a merger or acquisition, the shares of the relevant issuers which still meet the selection criteria and comply with the KBC Group Investment Policy\* after these operations will be given a weighting in the basket equal to the sum of the weightings of the shares of all issuers involved in the operation. If, after the operation, none of the issuers involved in the operation meet the selection criteria or comply with the KBC Group Investment Policy\*, the procedures described under 'Nationalisation, bankruptcy or disqualification' will apply.

\* The KBC Group Investment Policy can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > General exclusion policies for conventional funds and responsible investment funds, Paragraph 2 'KBC Group Investment Policy'.

#### **Demergers**

If an issuer of a share in the basket proceeds to a demerger, then the share from the issuer concerned can be substituted either by one of the shares that came about as a result of the demerger and that meets the selection criteria and complies with the KBC Group Investment Policy\*, or by a basket of shares arising from the demerger which meet the selection criteria and comply with the KBC Group Investment Policy\*. This basket of shares will, when calculating the number of shares in the basket, be considered as one share. If, after the operation, none of the shares resulting from the demerger meet the selection criteria or comply with the KBC Group Investment Policy\*, the procedures described under 'Nationalisation, bankruptcy or disqualification' will apply.

\* The KBC Group Investment Policy can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > General exclusion policies for conventional funds and responsible investment funds, Paragraph 2 'KBC Group Investment Policy'.

#### **Nationalisation, bankruptcy or disqualification**

If an issuer of a share in the basket is nationalised, declared bankrupt or no longer meets the selection criteria ('disqualification'), this share will be sold at the last known price before removal. The amount thus realised will then be invested until Maturity at the rate of interest in force on money or bond markets at the moment of removal, and this for a term equal to the term remaining until Maturity of the sub-fund. The realised amount plus the interest will be taken into account at Maturity as the result achieved for that share in order to calculate the final increase in the value of the basket at Maturity.

#### **Volatility of the net asset value**

The volatility of the net asset value may be high due to the composition of the portfolio.

#### **Securities Financing Transactions (SFTs)**

The sub-fund may not lend any financial instruments.

#### **General strategy for hedging the exchange risk**

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

## Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'

### 2.1.4. Financial portfolio management

The intellectual management, with the exception of the creation of the sub-fund and its maintenance in terms of the technical, product-specific and legal aspects has been delegated by the management company to KBC Fund Management Limited, 4th Floor, Scotch House, 6/7 Burgh Quay, Dublin 2, D02 VK44, Ireland.

### 2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

### 2.1.6. Index and benchmark

Not applicable

### 2.1.7. Policy pursued during the financial year

#### Composition of the basket on report date

| Name                         | Value         |

### **2.1.8. Summary risk indicator**

- 3 on a scale of 1 (lowest risk) to 7 (highest risk)
- a moderate level of inflation risk: there is no protection against an increase of the inflation.
  - a moderate level of concentration risk: there is a concentration of the investments in the shares of companies in the pharmaceutical and health care industries.
  - a high level of market risk: the level of the risk reflects the volatility of the stock market and the exchange rate risk in relation to the euro.
  - a high level of performance risk: the level of the risk reflects the volatility of the stock market and the exchange rate risk in relation to the euro.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

## 2.2. Balance sheet

## 2.4.5. Performance figures

BE6347801241  
Optimum Fund K&H fix egészség 2 CAP  
Annual performance from 01/03/2024 through 28/02/2026 (in HUF)

If the results are expressed in a currency other than the euro, the return may be higher or lower due to exchange rate fluctuations.

| Cap Div | ISIN Code    | Curr<br>ency | 1 year        |            | 3 years       |            | 5 years       |            | 10 years      |            | Since Launch* |               |
|---------|--------------|--------------|---------------|------------|---------------|------------|---------------|------------|---------------|------------|---------------|---------------|
|         |              |              | Share classes | Bench mark | Share classes | Bench mark | Share classes | Bench mark | Share classes | Bench mark | Starting date | Share classes |
| CAP     | BE6347801241 | HUF          | 22.09%        |            |               |            |               |            |               |            | 23/02/2024    | 11.40%        |

Risk warning: Past performance is not a guide to future performance.

\* Return on annual basis.

- The bar chart shows the performance for full financial years(period of 12 months prior to the half-yearly closing).
- The figures do not take account of any restructuring..
- Calculated in HUF and in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage.
- Calculation method for date D, where NAV stands for net asset value:  
Capitalisation units (CAP)  
Return on date D over a period of X years :  

$$[NIW(D) / NIW(Y)] ^ [1 / X] - 1$$
 where Y = D-X  
 Return on date D since the start date S of the unit:  

$$[NIW(D) / NIW(S)] ^ [1 / F] - 1$$
 where F = 1 if the unit has existed for less than one year on date D  
 where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D
- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation shares.

## 2.4.6. Costs

### Ongoing Charges:

Management fees and other administrative or operating costs: 1,909%  
Transaction costs: 0,000%

Percentage calculated at reporting date: 28 February 2026 (period of 12 months prior to the half-yearly closing).

A more detailed explanation with respect to the method of calculating ongoing charges and the relevant exclusions can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.5. Ongoing charges'

### Existence of Commission Sharing Agreements

Not applicable

### Fee sharing agreements en rebates

The management company has shared 70.00% of its fee with the distributor, and institutional and/or professional parties.

This percentage has been calculated relative to the fee for managing the investment portfolio of the sub-fund when it was launched.

## 2.4.7. Notes to the financial statements and other data

|                                                                                                          |                                                                                                                                                                                                     |                                                                                                                                                                                                                                                                                                        |

### Fee for managing the investment portfolio

KBC Asset Management NV receives a fee for managing the sub-fund's investments. This fee consists of a varying amount of max. 200 HUF per unit per year (with a maximum of HUF per unit per year for risk management).

This fee, which is calculated every six months, is paid monthly on the last banking day of each month. It can change from one six-month period to the next, within the limits set out below, and is based on the number of units issued at the start of each six-month period.

In the calculation, account is taken of the difference between:

- the return generated by the investments in bonds and other debt instruments, deposits, and/or liquid assets in order to achieve the capital protection on the Maturity date (see *The financial mechanism used to achieve capital protection*), and
- the expenses borne by the sub-fund to achieve a potential return (see *Permitted 'swap' transactions*),
- after deducting the expected fixed and variable expenses of the sub-fund, as mentioned above.

Of this, KBC Fund Management Ltd. receives a fee of no more than 189.50 HUF per unit per year from KBC Asset Management NV for the intellectual management of the sub-fund. KBC Fund Management Ltd. is a wholly owned subsidiary of KBC Asset Management NV.

KBC Asset Management NV has informed the bevek that, if due to the failure of the financial mechanism, the amount that should be paid per unit (after deducting taxes and charges) on the Maturity date, as relevant, is lower than the initial subscription price, KBC Asset Management NV may decide (but is not obliged to) to use the management fee it receives during the current financial year from the sub-fund – and possibly also from other sub-funds of the bevek – to cover this shortfall. This is not a guarantee from KBC Asset Management NV, which may

decide at any time and at its own discretion whether or not to use the management fee for this purpose. KBC Asset Management NV or one of its subsidiaries has also been appointed manager of the SPVs in which the sub-fund may invest (see *Criteria the investments must meet*). KBC Asset Management NV or one of its subsidiaries, as the case may be, receives an annual fee from the relevant SPVs for their management. This management fee may not exceed 0.15% per year and is calculated on the assets managed at the end of the quarter.

The sum of (i) the fee for managing the investment portfolio that the sub-fund pays to the management company and (ii) the management fee that the SPVs in which the sub-fund invests pay to the asset manager, shall never exceed 200.00 HUF per unit per year, as described above.

#### 2.1.2. Stock exchange listing

Not applicable.

#### 2.1.3. Goal and key principles of the investment policy

##### Object of the sub-fund

The object of the sub-fund is twofold (before deducting charges and taxes):

- (1) To repay per share the initial subscription price of 10 EUR at Maturity (i.e. the capital protection). This capital protection is provided through a financial mechanism that will be explained in more detail under the heading *Capital protection*. However, the capital protection does not apply to shareholders who sell their shares before Maturity.
- (2) To provide a potential return through an investment in swaps. The various types of swaps in which the sub-fund may invest are explained in more detail under the *Potential return*.

##### Capital Protection

###### The financial mechanism used to achieve capital protection

The financial mechanism used to achieve capital protection at Maturity consists of an investment of the total amount of the subscriptions in bonds and other debt instruments, deposits and/or liquid assets (including cash deposited on a time-deposit account or current account). These investments can have different maturities and coupon payment dates. Using the swaps described under the heading *Permitted swap transactions* (2), these investments are matched with the due dates of the obligations of the sub-fund.

###### Criteria the investments must meet

The investments must meet one of the following criteria:

- (1) An investment in deposits and/or debt instruments, placed with or issued by financial institutions under the prudential supervision of and established in a Member State of the European Economic Area.
- (2) An investment in debt instruments issued or guaranteed by a Member State of the European Economic Area.
- (3) An investment under an investment strategy with an analogous structure and identical counterparty risk as a direct investment in deposits and/or debt instruments as stated under (1) and (2) above.

The investments under (3) may consist of:

- (A) An investment in notes listed on a stock exchange that are issued by 'Special Purpose Vehicles' (SPVs).

These SPVs are managed by KBC Asset Management NV or a subsidiary.

The underlying assets of the bonds issued by the SPVs consist of a diversified portfolio of deposits issued by financial institutions, bonds, other debt instruments and financial derivatives. When selecting these underlying assets, account is taken of criteria relating to allocation and creditworthiness (see *Permitted asset classes* and *Characteristics of the bonds and other debt instruments*) in order to limit the counterparty risk.

Further details of the criteria these underlying deposits, bonds, other debt instruments and financial derivatives must meet are provided in the base prospectuses for the SPVs, which can be viewed at or downloaded from [www.kbc.be/prospectus/spv](http://www.kbc.be/prospectus/spv).

Investors are provided with information on the investments made by both the sub-fund and the SPVs in the annual and half-yearly reports on the open-ended investment company under Belgian law (bevek) to which the sub-fund belongs. These reports can also be viewed at or downloaded from [www.kbc.be](http://www.kbc.be).

- (B) An investment in:
- deposits with financial institutions under prudential supervision in the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia and/or
  - debt instruments issued by financial institutions under prudential supervision in the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia and/or
  - debt instruments issued or guaranteed by the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia.

Prudential supervision of financial institutions in the United Kingdom, Switzerland, the United States of America, Japan, Canada and Australia can be equated to prudential supervision of financial institutions in the member states of the European Economic Area.

The investments in debt instruments issued by financial institutions under prudential supervision in the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia or issued or guaranteed by the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia have a minimum credit rating as set out under the heading *Characteristics of the bonds and other debt instruments*.

- (C) The investments may also consist of a combination of the investments specified under (A) and (B).

### **No formal guarantee**

No formal guarantee of repayment of the initial subscription price is provided to the sub-fund or to its shareholders. In other words, the capital protection is not binding for the sub-fund as regards the result generated, although achieving this objective through the operation of the financial mechanism is still the top priority.

If the financial mechanism fails and, as a result, the amount per share payable (before deducting charges and taxes) at Maturity is lower than the initial subscription price, KBC Asset Management NV may decide (but is not obliged) to use the management fee it has received during the current financial year from the sub-fund – and possibly also from other sub-funds of the bevek – to cover the shortfall. This is not a guarantee from KBC Asset Management NV, which may decide at any time and at its own discretion whether or not to use the management fee for this purpose.

The capital protection does not apply to shareholders who sell their shares before Maturity.

### **Potential return**

To achieve a potential return, the sub-fund concludes swaps with one or more prime counterparties. Consequently, the sub-fund transfers a portion of the future income from the investments that were made to achieve capital protection to this counterparty (these counterparties) during the life of the sub-fund. In exchange, the counterparty (counterparties) undertake to provide a potential return as specified under the heading *Selected strategy*.

### **Sub-fund's investment policy**

#### **Permitted asset classes**

Pursuant to the provisions of the Royal Decree of 12 November 2012 on undertakings for collective investment complying with the conditions of Directive 2009/65/EC, the sub-fund may invest in transferable securities (including bonds and other debt instruments), money market instruments, units (shares) in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as and to the extent permitted by the applicable legislation.

The investment limits and restrictions set out in the Royal Decree of 12 November 2012 on undertakings for collective investment complying with the conditions of Directive 2009/65/EC will be respected at all times.

### **Characteristics of the bonds and other debt instruments**

During the sub-fund's life, the average credit rating of the bonds and other debt instruments shall be at least 'A-' from Standard & Poor's or an equivalent rating from Moody's or Fitch, or, if there is no credit rating available, an average credit risk profile that the manager considers to be at least equivalent.

At the start of the investment, the credit rating of the long-term bonds and other debt instruments shall be at least 'A-' from Standard & Poor's or an equivalent rating from Moody's or Fitch, or, if there is no credit rating available, a credit risk profile that the manager considers to be at least equivalent.

At the start of the investment, the credit rating of the short-term bonds and other debt instruments shall be at least 'A-1' from Standard & Poor's or an equivalent rating from Moody's or Fitch, or, if there is no credit rating available, a credit risk profile that the manager considers to be at least equivalent.

When selecting the bonds and other debt instruments, all maturities are taken into consideration.

### Permitted swap transactions

**The swaps described below have been concluded with a prime counterparty or prime counterparties within the limits laid down by law.**

(1) To achieve a potential return, the sub-fund concludes swaps. Under such swap contracts, the sub-fund transfers a portion of the future income from the investments described under the heading 'Permitted asset classes' to the counterparty or counterparties during the life of the sub-fund. In exchange, the counterparty or counterparties undertake to provide a potential return as specified under the heading *Selected strategy*.

**The swaps under (1) are essential to achieve the sub-fund's investment objectives, since this technique facilitates achievement of the goal of generating a potential return.**

**The sub-fund's risk profile is not affected by the use of these swaps.**

(2) If necessary, the sub-fund also concludes swaps to match the due dates of the commitments of the sub-fund with those of the cash flows stemming from the deposits, bonds and other debt instruments described under the heading *Criteria the investments must meet*.

**These swaps are essential to achieve the sub-fund's investment objectives, since there are not enough bonds and other debt instruments available on the market whose coupon payments and maturity dates always perfectly match the due dates of the sub-fund's obligations.**

**The sub-fund's risk profile is not affected by the use of these swaps.**

(3) In addition, the sub-fund may conclude swaps to protect itself against the credit risk in respect of issuers of bonds and other debt instruments. Through this type of swap, one or more counterparties takes over the risk of an issuer of a bond or other debt instrument in the sub-fund's portfolio defaulting, in exchange for a fee payable by the sub-fund.

**The swaps under (3) serve to hedge the credit risk.**

**The sub-fund's risk profile is not affected by the use of these swaps.**

### Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

### Strategie selected

#### Investment objectives and strategy:

The sub-fund has two investment objectives: firstly, it seeks to repay at Maturity 100% of the initial subscription price and secondly a possible capital gain that is contingent on the evolution of a basket of 30 shares of a worldwide selection of companies that are characterised by a high market capitalisation.

At Maturity, a capital gain will be distributed that will equal the best of two alternatives:

- on the one hand 7.00%, settled at 100% of the initial subscription price;
- on the other hand 100% of the increase in the basket of 30 shares, settled at 100% of the initial subscription price, where the maximum capital gain will be 40%. The evolution of the basket is calculated as follows: [end value of the basket minus the starting value of the basket], divided by the starting value of the basket. Decreases in the basket are not taken into account.

Consequently, the capital gain at the Maturity Date will be at least 7.00% (yield to maturity: 1.37% before fees and taxes) and maximum 40% (yield to maturity: 7.04% before costs and taxes).

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

### Transparency of adverse sustainability impacts

The sub-fund took into account the principal adverse impacts of its investment decisions on sustainability factors ("PAI") as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on disclosure on sustainability in the financial services sector ("SFDR") through KBC Group's Investment Policy and KBC Group Policy on Blacklisted Companies.

Based on the KBC Group Policy on Blacklisted Companies, all companies on the 'KBC Group Blacklist' (including companies involved in controversial weapons such as those prohibited by Belgian law and white phosphorus weapons) are excluded as well as the worst offenders of the UN Global Compact.

Consequently, the sub-fund took into account exposure to controversial weapons ('indicator 14') by excluding companies dealing with controversial weapon systems, and violations of the principles of the UN Global Compact or the Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises ('indicator 10') by excluding the worst offenders of the UN Global Compact.

## **Maturity**

Thursday 30 November 2028 (payment with a value date of D+1 banking day)

## **Currency**

EUR, for all shares in the basket, changes in the value of the currency in which they are expressed relative to EUR are irrelevant.

## **Starting Value**

Value of the basket based on the weighted average of the Value of the shares included in the basket during the first 10 Valuation Days, starting from Thursday 21 December 2023 inclusive.

## **End Value**

Value of the basket based on the weighted average of the Value of the shares included in the basket on the last Valuation Day of the month for the last 12 months before Maturity, more specifically from November 2027 through October 2028 (inclusive).

## **Value**

For all the shares, except for those listed on the Milan stock exchange, the closing price, namely the price of a share in the basket as calculated and notified at closing of the stock exchange by the authority of the stock exchange on which the share is listed (or its legal successor). The reference price is used for shares listed on the Milan stock exchange.

## **Valuation day**

A Valuation Day is set separately for each share in the basket.

A Valuation Day is a day that is a planned trading day both

- i) for the stock exchange on which the share is listed and
- ii) for the stock exchange whose activities have a substantial influence on the trading of options and futures on the share concerned

hereinafter referred to as 'the stock exchanges concerned'.

If on the Valuation Day,

- a) one of the stock exchanges concerned is unexpectedly closed or
- b) there is an event that disrupts the market for a stock exchange concerned or
- c) one of the stock exchanges concerned closes early,

the original Valuation Day is replaced by the following trading day when no event as referred to in a), b) or c) above occurs. An extraordinary closure that has been announced in advance is not considered as early closure.

If a valuation is made on consecutive Valuation Days, the trading day that replaces the original Valuation Day (i) may not coincide with another original Valuation Day and (ii) may not be a trading day that already replaces another original Valuation Day.

However, if an event as referred to under a), b) or c) above occurs on each of the eight trading days following the original Valuation Day,

- (i) the eighth trading day shall be considered as the original Valuation Day and
- (ii) the Bevek shall assess, in good faith and in consultation with the prime counterparty or counterparties with which it has concluded a swap agreement, the price of the share as it would have been traded on that eighth trading day and
- (iii) the Bevek will notify shareholders of any changes regarding setting the Starting Value and/or End Value and conditions of payment.

### Relevant basket

In the table below, the columns from left to right reflect the number of the share, the name of the share, the Bloomberg code, the exchange on which it trades (City-MIC Code) and its initial weighting in the basket.

| (i) | Name                             | Bloomberg Code  | Exchange         | Initial Weighting Coefficients |
|-----|----------------------------------|-----------------|------------------|--------------------------------|
| 1   | ALLIANZ SE                       | ALV GY Equity   | FRANKFURT - XETR | 2.0000%                        |

### Basket composition methodology

KBC Asset Management used the following methodology to determine the composition of the sub-fund's basket.

#### Step 1 :

The starting point is the global equities universe from which a selection of potential investments is derived in accordance with the economic criteria for the composition of the basket and subject to restrictions regarding stock market capitalisation and liquid assets.

The economic criteria for the composition of the basket determine the size of the final selection.

#### Step 2 :

The selection of shares obtained in step 1 is reduced to a short list using a quantitative selection based on past financial data. The shares selected are those of companies that achieve a good score in terms of management quality, a healthy balance-sheet structure and a positive trend in profitability.

#### Step 3 :

The selection of shares obtained in step 2 is then verified by KBC Asset Management analysts. Shares that are permanently monitored by the analysts and those for which there is a negative recommendation, when the product is launched, are then withdrawn from the selection.

#### Step 4 :

The last reduction of the selection provides the final basket. This selection was made using the technical parameters of options (including the term, volatility, dividend yield and interest rate).

The final basket must satisfy the legal requirements concerning the quantity of shares and adequate distribution in the weighting. In addition, care is taken to ensure compliance with the geographical and/or sector spread. The analysts make a qualitative assessment of each share used taking account of specific knowledge of these shares and the sectors/regions from which they come, in accordance with the term of the sub-fund.

For the sub-fund Optimum Fund K&H fix világcégek euró, about 1586 equities were selected during step 1.

The initial selection was reduced by a maximum 20% in step 2.

This was again reduced by 10% (indicative) in step 3. The final basket set up during step 4 is described above under *Relevant basket*. This basket makes it possible to offer the sub-fund Optimum Fund K&H fix világcégek euró under the conditions set out in the investment policy referred to above. Here the selection process uses parameters that could affect the potential return on the investments.

#### *Selection criteria for the basket :*

A share/issuer may only form part of the basket if (i) it is listed on a stock exchange, (ii) it has a high market capitalisation, (iii) the Board of Directors of the Beveik has approved its inclusion in the basket, (iv) the issuer is not included in the KBC Group Policy on Blacklisted Companies\* and (v) at the time the swap contracts are being concluded (see 'Permitted swap transactions'), the issuer of the share complies with the KBC Group Investment Policy\* (the 'Selection criteria').

\* The KBC Group Policy on Blacklisted Companies and the KBC Group Investment Policy can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > General exclusion policies for conventional funds and socially responsible investment funds, Paragraph 1 'KBC Group Policy on Blacklisted Companies' and 2 'KBC Group Investment Policy'.

### **Modifications to the basket due to mergers, acquisitions, demergers, nationalisation, bankruptcy or disqualification :**

#### **Mergers or acquisitions**

If, during the life of the sub-fund, one or more issuers of shares in the basket are involved in a merger or acquisition, the shares of the relevant issuers which still meet the selection criteria and comply with the KBC Group Investment Policy\* after these operations will be given a weighting in the basket equal to the sum of the weightings of the shares of all issuers involved in the operation. If, after the operation, none of the issuers involved in the operation meet the selection criteria or comply with the KBC Group Investment Policy\*, the procedures described under 'Nationalisation, bankruptcy or disqualification' will apply.

\* The KBC Group Investment Policy can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > General exclusion policies for conventional funds and responsible investment funds, Paragraph 2 'KBC Group Investment Policy'.

#### **Demergers**

If an issuer of a share in the basket proceeds to a demerger, then the share from the issuer concerned can be substituted either by one of the shares that came about as a result of the demerger and that meets the selection criteria and complies with the KBC Group Investment Policy\*, or by a basket of shares arising from the demerger which meet the selection criteria and comply with the KBC Group Investment Policy\*. This basket of shares will, when calculating the number of shares in the basket, be considered as one share. If, after the operation, none of the shares resulting from the demerger meet the selection criteria or comply with the KBC Group Investment Policy\*, the procedures described under 'Nationalisation, bankruptcy or disqualification' will apply.

\* The KBC Group Investment Policy can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > General exclusion policies for conventional funds and responsible investment funds, Paragraph 2 'KBC Group Investment Policy'.

#### **Nationalisation, bankruptcy or disqualification**

If an issuer of a share in the basket is nationalised, declared bankrupt or no longer meets the selection criteria ('disqualification'), this share will be sold at the last known price before removal. The amount thus realised will then be invested until Maturity at the rate of interest in force on money or bond markets at the moment of removal, and this for a term equal to the term remaining until Maturity of the sub-fund. The realised amount plus the interest will be taken into account at Maturity as the result achieved for that share in order to calculate the final increase in the value of the basket at Maturity.

### **Securities Financing Transactions (SFTs)**

**The sub-fund may not lend any financial instruments.**

#### **General strategy for hedging the exchange risk**

A more detailed explanation can be found in this report's General information on the Beveik under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

#### **Social, ethical and environmental aspects**

A more detailed explanation can be found in this report's General information on the Beveik under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'.

## 2.1.4. Financial portfolio management

The intellectual management, with the exception of the creation of the sub-fund and its maintenance in terms of the technical, product-specific and legal aspects has been delegated by the management company to KBC Fund Management Limited, 4th Floor, Scotch House, 6/7 Burgh Quay, Dublin 2, D02 VK44, Ireland.

## 2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

## 2.1.6. Index and benchmark

Not applicable

## 2.1.7. Policy pursued during the financial year

### *Composition of the basket on report date*

### **2.1.8. Summary risk indicator**

- 2 on a scale of 1 (lowest risk) to 7 (highest risk)
- a moderate level of inflation risk: there is no protection against an increase of the inflation.
  - a moderate level of market risk: the level of the risk reflects the volatility of the stock market.
  - a moderate level of performance risk: the level of the risk reflects the volatility of the stock market.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

## 2.2. Balance sheet

\*The financial year does not coincide with the calendar year.

## 2.4.5. Performance figures

| Cap Div | ISIN Code    | Curr ency | 1 year        |            | 3 years       |            | 5 years       |            | 10 years      |            | Since Launch* |               |
|---------|--------------|-----------|---------------|------------|---------------|------------|---------------|------------|---------------|------------|---------------|---------------|
|         |              |           | Share classes | Bench mark | Share classes | Bench mark | Share classes | Bench mark | Share classes | Bench mark | Starting date | Share classes |
| CAP     | BE6345959256 | EUR       | 9.88%         |            |               |            |               |            |               |            | 12/12/2023    | 12.31%        |

Risk warning: Past performance is not a guide to future performance.

\* Return on annual basis.

- The bar chart shows the performance for full financial years(period of 12 months prior to the half-yearly closing).
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage.
- Calculation method for date D, where NAV stands for net asset value:  
Capitalisation units (CAP)  
 Return on date D over a period of X years :  

$$[\text{NIW}(\text{D}) / \text{NIW}(\text{Y})] ^ {1 / \text{X}} - 1$$
 where Y = D-X  
 Return on date D since the start date S of the unit:  

$$[\text{NIW}(\text{D}) / \text{NIW}(\text{S})] ^ {1 / \text{F}} - 1$$
 where F = 1 if the unit has existed for less than one year on date D  
 where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D
- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation shares.

## 2.4.6. Costs

### Ongoing Charges:

Management fees and other administrative or operating costs: 1,342%  
Transaction costs: 0,000%

Percentage calculated at reporting date: 28 February 2026 (period of 12 months prior to the half-yearly closing).

A more detailed explanation with respect to the method of calculating ongoing charges and the relevant exclusions can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.5. Ongoing charges'

### Existence of Commission Sharing Agreements

Not applicable

### Fee sharing agreements en rebates

The management company has shared 70.00% of its fee with the distributor, and institutional and/or professional parties.

This percentage has been calculated relative to the fee for managing the investment portfolio of the sub-fund when it was launched.

## 2.4.7. Notes to the financial statements and other data

|                                                                                                          |                                                                                                                                                                                                     |                                                                                                                                                                                                                                                                                                        |

### Fee for managing the investment portfolio

KBC Asset Management NV receives a fee for managing the sub-fund's investments. This fee consists of a varying amount of max. 0.2 EUR per unit per year (with a maximum of EUR per unit per year for risk management).

This fee, which is calculated every six months, is paid monthly on the last banking day of each month. It can change from one six-month period to the next, within the limits set out below, and is based on the number of units issued at the start of each six-month period.

In the calculation, account is taken of the difference between:

- the return generated by the investments in bonds and other debt instruments, deposits, and/or liquid assets in order to achieve the capital protection on the Maturity date (see *The financial mechanism used to achieve capital protection*), and
- the expenses borne by the sub-fund to achieve a potential return (see *Permitted 'swap' transactions*),
- after deducting the expected fixed and variable expenses of the sub-fund, as mentioned above.

Of this, KBC Fund Management Ltd. receives a fee of no more than 0.19 EUR per unit per year from KBC Asset Management NV for the intellectual management of the sub-fund. KBC Fund Management Ltd. is a wholly owned subsidiary of KBC Asset Management NV.

KBC Asset Management NV has informed the bevek that, if due to the failure of the financial mechanism, the amount that should be paid per unit (after deducting taxes and charges) on the Maturity date, as relevant, is lower than the initial subscription price, KBC Asset Management NV may decide (but is not obliged to) to use the management fee it receives during the current financial year from the sub-fund – and possibly also from other sub-funds of the bevek – to cover this shortfall. This is not a guarantee from KBC Asset Management NV, which may

decide at any time and at its own discretion whether or not to use the management fee for this purpose. KBC Asset Management NV or one of its subsidiaries has also been appointed manager of the SPVs in which the sub-fund may invest (see *Criteria the investments must meet*). KBC Asset Management NV or one of its subsidiaries, as the case may be, receives an annual fee from the relevant SPVs for their management. This management fee may not exceed 0.15% per year and is calculated on the assets managed at the end of the quarter.

The sum of (i) the fee for managing the investment portfolio that the sub-fund pays to the management company and (ii) the management fee that the SPVs in which the sub-fund invests pay to the asset manager, shall never exceed 0.20 EUR per unit per year, as described above.

| Currency:                   | HUF              |

#### 2.1.2. Stock exchange listing

Not applicable.

#### 2.1.3. Goal and key principles of the investment policy

##### Object of the sub-fund

The object of the sub-fund is twofold (before deducting charges and taxes):

- (1) To repay per share the initial subscription price of 10000 HUF at Maturity.(i.e. the capital protection). This capital protection is provided through a financial mechanism that will be explained in more detail under the heading *Capital protection*. However, the capital protection does not apply to shareholders who sell their shares before Maturity.
- (2) To provide a potential return through an investment in swaps. The various types of swaps in which the sub-fund may invest are explained in more detail under the *Potential return*.

##### Capital Protection

###### The financial mechanism used to achieve capital protection

The financial mechanism used to achieve capital protection at Maturity consists of an investment of the total amount of the subscriptions in bonds and other debt instruments, deposits and/or liquid assets (including cash deposited on a time-deposit account or current account). These investments can have different maturities and coupon payment dates. Using the swaps described under the heading *Permitted swap transactions* (2), these investments are matched with the due dates of the obligations of the sub-fund.

###### Criteria the investments must meet

The investments must meet one of the following criteria:

- (1) An investment in deposits and/or debt instruments, placed with or issued by financial institutions under the prudential supervision of and established in a Member State of the European Economic Area.
- (2) An investment in debt instruments issued or guaranteed by a Member State of the European Economic Area.
- (3) An investment under an investment strategy with an analogous structure and identical counterparty risk as a direct investment in deposits and/or debt instruments as stated under (1) and (2) above.

The investments under (3) may consist of:

- (A) An investment in notes listed on a stock exchange that are issued by 'Special Purpose Vehicles' (SPVs).

These SPVs are managed by KBC Asset Management NV or a subsidiary.

The underlying assets of the bonds issued by the SPVs consist of a diversified portfolio of deposits issued by financial institutions, bonds, other debt instruments and financial derivatives. When selecting these underlying assets, account is taken of criteria relating to allocation and creditworthiness (see *Permitted asset classes* and *Characteristics of the bonds and other debt instruments*) in order to limit the counterparty risk.

Further details of the criteria these underlying deposits, bonds, other debt instruments and financial derivatives must meet are provided in the base prospectuses for the SPVs, which can be viewed at or downloaded from [www.kbc.be/prospectus/spv](http://www.kbc.be/prospectus/spv).

Investors are provided with information on the investments made by both the sub-fund and the SPVs in the annual and half-yearly reports on the open-ended investment company under Belgian law (bevek) to which the sub-fund belongs. These reports can also be viewed at or downloaded from [www.kbc.be](http://www.kbc.be).

- (B) An investment in:
- deposits with financial institutions under prudential supervision in the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia and/or
  - debt instruments issued by financial institutions under prudential supervision in the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia and/or
  - debt instruments issued or guaranteed by the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia.

Prudential supervision of financial institutions in the United Kingdom, Switzerland, the United States of America, Japan, Canada and Australia can be equated to prudential supervision of financial institutions in the member states of the European Economic Area.

The investments in debt instruments issued by financial institutions under prudential supervision in the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia or issued or guaranteed by the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia have a minimum credit rating as set out under the heading *Characteristics of the bonds and other debt instruments*.

- (C) The investments may also consist of a combination of the investments specified under (A) and (B).

### **No formal guarantee**

No formal guarantee of repayment of the initial subscription price is provided to the sub-fund or to its shareholders. In other words, the capital protection is not binding for the sub-fund as regards the result generated, although achieving this objective through the operation of the financial mechanism is still the top priority.

If the financial mechanism fails and, as a result, the amount per share payable (before deducting charges and taxes) at Maturity is lower than the initial subscription price, KBC Asset Management NV may decide (but is not obliged) to use the management fee it has received during the current financial year from the sub-fund – and possibly also from other sub-funds of the bevek – to cover the shortfall. This is not a guarantee from KBC Asset Management NV, which may decide at any time and at its own discretion whether or not to use the management fee for this purpose.

The capital protection does not apply to shareholders who sell their shares before Maturity.

### **Potential return**

To achieve a potential return, the sub-fund concludes swaps with one or more prime counterparties. Consequently, the sub-fund transfers a portion of the future income from the investments that were made to achieve capital protection to this counterparty (these counterparties) during the life of the sub-fund. In exchange, the counterparty (counterparties) undertake to provide a potential return as specified under the heading *Selected strategy*.

### **Sub-fund's investment policy**

#### **Permitted asset classes**

Pursuant to the provisions of the Royal Decree of 12 November 2012 on undertakings for collective investment complying with the conditions of Directive 2009/65/EC, the sub-fund may invest in transferable securities (including bonds and other debt instruments), money market instruments, units (shares) in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as and to the extent permitted by the applicable legislation.

The investment limits and restrictions set out in the Royal Decree of 12 November 2012 on undertakings for collective investment complying with the conditions of Directive 2009/65/EC will be respected at all times.

#### **Characteristics of the bonds and other debt instruments**

During the sub-fund's life, the average credit rating of the bonds and other debt instruments shall be at least 'A-' from Standard & Poor's or an equivalent rating from Moody's or Fitch, or, if there is no credit rating available, an average credit risk profile that the manager considers to be at least equivalent.

At the start of the investment, the credit rating of the long-term bonds and other debt instruments shall be at least 'A-' from Standard & Poor's or an equivalent rating from Moody's or Fitch, or, if there is no credit rating available, a credit risk profile that the manager considers to be at least equivalent.

At the start of the investment, the credit rating of the short-term bonds and other debt instruments shall be at least 'A-1' from Standard & Poor's or an equivalent rating from Moody's or Fitch, or, if there is no credit rating available, a credit risk profile that the manager considers to be at least equivalent.

When selecting the bonds and other debt instruments, all maturities are taken into consideration.

### Permitted swap transactions

**The swaps described below have been concluded with a prime counterparty or prime counterparties within the limits laid down by law.**

(1) To achieve a potential return, the sub-fund concludes swaps. Under such swap contracts, the sub-fund transfers a portion of the future income from the investments described under the heading 'Permitted asset classes' to the counterparty or counterparties during the life of the sub-fund. In exchange, the counterparty or counterparties undertake to provide a potential return as specified under the heading *Selected strategy*.

**The swaps under (1) are essential to achieve the sub-fund's investment objectives, since this technique facilitates achievement of the goal of generating a potential return.**

**The sub-fund's risk profile is not affected by the use of these swaps.**

(2) If necessary, the sub-fund also concludes swaps to match the due dates of the commitments of the sub-fund with those of the cash flows stemming from the deposits, bonds and other debt instruments described under the heading *Criteria the investments must meet*.

**These swaps are essential to achieve the sub-fund's investment objectives, since there are not enough bonds and other debt instruments available on the market whose coupon payments and maturity dates always perfectly match the due dates of the sub-fund's obligations.**

**The sub-fund's risk profile is not affected by the use of these swaps.**

(3) In addition, the sub-fund may conclude swaps to protect itself against the credit risk in respect of issuers of bonds and other debt instruments. Through this type of swap, one or more counterparties takes over the risk of an issuer of a bond or other debt instrument in the sub-fund's portfolio defaulting, in exchange for a fee payable by the sub-fund.

**The swaps under (3) serve to hedge the credit risk.**

**The sub-fund's risk profile is not affected by the use of these swaps.**

### Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

### Strategie selected

#### Investment objectives and strategy:

The sub-fund pursues two investment objectives: the repayment of 100% of the initial subscription price at Maturity as well as providing a capital gain consisting of a variable component and a fixed component:

- The variable component depends on the evolution of the STOXX® Europe 600 Health Care Price Return index and is calculated as follows: If the index has increased compared to its starting value, 100% of the increase in the index  $(= (\text{Final Value} - \text{Starting Value}) / \text{Starting Value})$ , is settled at 100% of the initial subscription price on the Maturity Date. The variable component amounts to a maximum of 100%. Negative evolutions of the index are not taken into account.
- The fixed component is independent of the evolution of the index and amounts to 29% of the initial subscription price.

At Maturity Date, the sum of the variable and fixed components is distributed as a capital gain on top of the initial subscription price. Consequently, the total capital gain amounts to a maximum of 129% (actuarial yield: 22.61% before costs and taxes).

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

### Transparency of adverse sustainability impacts

The sub-fund took into account the principal adverse impacts on sustainability factors of its investment decisions ("PAI") as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on disclosure on sustainability in the financial services sector ("SFDR") through KBC Group's Investment Policy and KBC Group Policy on Blacklisted Companies.

Based on KBC Group Policy on Blacklisted Companies, all companies on the 'KBC Group Blacklist' (including companies involved in controversial weapons such as those prohibited by Belgian law and white phosphorus weapons) are excluded as well as the worst offenders of the UN Global Compact.

For investments in bonds issued by SPVs, the sub-fund took into account, in particular, exposure to controversial weapons ('indicator 14') by excluding companies dealing with controversial weapon systems and violations of the principles of the UN Global Compact or the Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises ('indicator 10').

## Maturity

Friday 27 November 2026 (payment with a value date of D+1 banking day)

## Currency

HUF, for STOXX EUROPE 600 HEALTH CARE, changes in the value of the currency in which they are expressed relative to HUF are irrelevant. The investor pays the subscription amount in HUF and will be paid in HUF at Maturity (or earlier). The investor is not protected against any decline in the value of the currency in which the sub-fund is denominated relative to the euro.

## Starting Value

Value of the index based on the average of the Value of the index during the first 10 Valuation Days, starting from Tuesday 8 November 2022 inclusive.

## End Value

Value of the index based on the average of the Value of the index on the final Valuation Day of the month for the last 12 months before Maturity, more specifically from November 2025 through October 2026 (inclusive).

## Value

Closing value of the STOXX EUROPE 600 HEALTH CARE, to be valued at the time at which the official closing level of the index is published and announced by the relevant authority (index sponsor), i.e. STOXX Limited (or its legal successor).

## Valuation day

A Valuation Day is a scheduled trading day, both

- i) for each stock market relating to securities comprising 20% or more of the index and
- ii) for the stock markets whose activity has a significant influence on trading in options and futures relating to securities forming part of the index,

hereinafter referred to as the 'Markets in Question',

and on which the index sponsor calculates and publishes the Price of the index.

If, on the Valuation Day,

- a) one of the Markets in Question remains closed unexpectedly, or
- b) one of the Markets in Question suffers a market-disrupting event, or
- c) one of the Markets in Question closes early,

then the original Valuation Day is replaced by the next trading day when there is no situation as described under (a), (b) or (c). A closing time differing from the customary closing time that is announced in good time, is not considered as an earlier closing time.

When a valuation is done based on consecutive Valuation Days, the replacement trading day may not be (i) another original Valuation Day or (ii) a trading day that already replaces another original Valuation Day.

If, however, a situation such as described under (a), (b) or (c) occurs on each of the eight trading days following the original Valuation Day, then

- (i) the eighth trading day will be considered as the original Valuation Day and
- (ii) the bevek will, in consultation with the prime counterparty (counterparties) with which it has concluded a swap agreement, estimate in good faith the value of the index as that would have been calculated on this eighth trading day and
- (iii) the bevek will inform the shareholders of the changes with respect to determining the Initial Value and/or Value at Maturity and the terms and conditions regarding disbursement.

If changes occur regarding the index (for instance, if it is calculated by another sponsor, or if another method of calculation is used), or if the index sponsor does not succeed in calculating or publishing the index (even though all the information is available) the bevek will, together with the prime counterparty or counterparties with which the swap was concluded, decide how the value of the index will be determined going forward. Where substantial changes occur to the index or the index is no longer calculated, it may be replaced by another index provided that the new index is representative of the same geographical and/or economic sectors.

The STOXX® Europe 600 Health Care price return index is a weighted, in principle non-dividend-protected equity index, calculated by STOXX Limited. The STOXX® Europe 600 Health Care price return Index measures the performance of the European health care sector as defined by the Industry Classification Benchmark (ICB) and is a subset of the STOXX® Europe 600 Index, which comprises 600 of the largest stocks across 18 European countries. The Index rebalances quarterly with components weighted by free float market capitalisation and capped to maintain compliance with UCITS diversification standards. Free float market capitalisation is the market value of a company's readily available outstanding shares.

Further details regarding the Index (including its constituents) are available on the index provider's website at ([www.stoxx.com](http://www.stoxx.com)).

Stoxx Limited has all proprietary rights with respect to the Index. In no way Stoxx Limited endorses, sponsors or is otherwise involved in the issue and offering the shares of Optimum Fund K&H fix+ egészség. Stoxx Limited disclaims any liability for the issue and offering of the shares of this undertaking for collective investment.

## 2.1.8. Summary risk indicator

- 3 on a scale of 1 (lowest risk) to 7 (highest risk)
- a moderate level of inflation risk: there is no protection against an increase of the inflation.
  - a moderate level of concentration risk: there is a concentration of the investments in the shares of companies in the European health care industry.
  - a high level of market risk: the level of the risk reflects the volatility of the stock market and the exchange rate risk in relation to the euro.
  - a high level of performance risk: the level of the risk reflects the volatility of the stock market and the exchange rate risk in relation to the euro.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

## 2.2. Balance sheet

Risk warning: Past performance is not a guide to future performance.

\* Return on annual basis.

- The bar chart shows the performance for full financial years(period of 12 months prior to the half-yearly closing).
- The figures do not take account of any restructuring..
- Calculated in HUF and in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage.
- Calculation method for date D, where NAV stands for net asset value:  
Capitalisation units (CAP)  
Return on date D over a period of X years :  

$$[NIW(D) / NIW(Y)] ^ {1 / X} - 1$$
 where Y = D-X  
 Return on date D since the start date S of the unit:  

$$[NIW(D) / NIW(S)] ^ {1 / F} - 1$$
 where F = 1 if the unit has existed for less than one year on date D  
 where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D
- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation shares.

## 2.4.6. Costs

### Ongoing Charges:

Management fees and other administrative or operating costs: 1,523%  
Transaction costs: 0,000%

Percentage calculated at reporting date: 28 February 2026 (period of 12 months prior to the half-yearly closing).

A more detailed explanation with respect to the method of calculating ongoing charges and the relevant exclusions can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.5. Ongoing charges'

### Existence of Commission Sharing Agreements

Not applicable

### Fee sharing agreements en rebates

The management company has shared 70.00% of its fee with the distributor, and institutional and/or professional parties.

This percentage has been calculated relative to the fee for managing the investment portfolio of the sub-fund when it was launched.

## 2.4.7. Notes to the financial statements and other data

|                                                                                                          |                                                                                                                                                                                                     |                                                                                                                                                                                                                                                                                                        |

### Fee for managing the investment portfolio

KBC Asset Management NV receives a fee for managing the sub-fund's investments. This fee consists of a varying amount of max. 200 HUF per unit per year (with a maximum of HUF per unit per year for risk management).

This fee, which is calculated every six months, is paid monthly on the last banking day of each month. It can change from one six-month period to the next, within the limits set out below, and is based on the number of units issued at the start of each six-month period.

In the calculation, account is taken of the difference between:

- the return generated by the investments in bonds and other debt instruments, deposits, and/or liquid assets in order to achieve the capital protection on the Maturity date (see *The financial mechanism used to achieve capital protection*), and
- the expenses borne by the sub-fund to achieve a potential return (see *Permitted 'swap' transactions*),
- after deducting the expected fixed and variable expenses of the sub-fund, as mentioned above.

Of this, KBC Fund Management Ltd. receives a fee of no more than 189.50 HUF per unit per year from KBC Asset Management NV for the intellectual management of the sub-fund. KBC Fund Management Ltd. is a wholly owned subsidiary of KBC Asset Management NV.

KBC Asset Management NV has informed the bevek that, if due to the failure of the financial mechanism, the amount that should be paid per unit (after deducting taxes and charges) on the Maturity date, as relevant, is lower than the initial subscription price, KBC Asset Management NV may decide (but is not obliged to) to use the management fee it receives during the current financial year from the sub-fund – and possibly also from other sub-funds of the bevek – to cover this shortfall. This is not a guarantee from KBC Asset Management NV, which may

decide at any time and at its own discretion whether or not to use the management fee for this purpose. KBC Asset Management NV or one of its subsidiaries has also been appointed manager of the SPVs in which the sub-fund may invest (see *Criteria the investments must meet*). KBC Asset Management NV or one of its subsidiaries, as the case may be, receives an annual fee from the relevant SPVs for their management. This management fee may not exceed 0.15% per year and is calculated on the assets managed at the end of the quarter.

The sum of (i) the fee for managing the investment portfolio that the sub-fund pays to the management company and (ii) the management fee that the SPVs in which the sub-fund invests pay to the asset manager, shall never exceed 200.00 HUF per unit per year, as described above.

#### 2.1.2. Stock exchange listing

Not applicable.

#### 2.1.3. Goal and key principles of the investment policy

##### Object of the sub-fund

The object of the sub-fund is twofold (before deducting charges and taxes):

- (1) To repay per share the initial subscription price of 10000 HUF at Maturity.(i.e. the capital protection). This capital protection is provided through a financial mechanism that will be explained in more detail under the heading *Capital protection*. However, the capital protection does not apply to shareholders who sell their shares before Maturity.
- (2) To provide a potential return through an investment in swaps. The various types of swaps in which the sub-fund may invest are explained in more detail under the *Potential return*.

##### Capital Protection

###### The financial mechanism used to achieve capital protection

The financial mechanism used to achieve capital protection at Maturity consists of an investment of the total amount of the subscriptions in bonds and other debt instruments, deposits and/or liquid assets (including cash deposited on a time-deposit account or current account). These investments can have different maturities and coupon payment dates. Using the swaps described under the heading *Permitted swap transactions* (2), these investments are matched with the due dates of the obligations of the sub-fund.

###### Criteria the investments must meet

The investments must meet one of the following criteria:

- (1) An investment in deposits and/or debt instruments, placed with or issued by financial institutions under the prudential supervision of and established in a Member State of the European Economic Area.
- (2) An investment in debt instruments issued or guaranteed by a Member State of the European Economic Area.
- (3) An investment under an investment strategy with an analogous structure and identical counterparty risk as a direct investment in deposits and/or debt instruments as stated under (1) and (2) above.

The investments under (3) may consist of:

- (A) An investment in notes listed on a stock exchange that are issued by 'Special Purpose Vehicles' (SPVs).

These SPVs are managed by KBC Asset Management NV or a subsidiary.

The underlying assets of the bonds issued by the SPVs consist of a diversified portfolio of deposits issued by financial institutions, bonds, other debt instruments and financial derivatives. When selecting these underlying assets, account is taken of criteria relating to allocation and creditworthiness (see *Permitted asset classes* and *Characteristics of the bonds and other debt instruments*) in order to limit the counterparty risk.

Further details of the criteria these underlying deposits, bonds, other debt instruments and financial derivatives must meet are provided in the base prospectuses for the SPVs, which can be viewed at or downloaded from [www.kbc.be/prospectus/spv](http://www.kbc.be/prospectus/spv).

Investors are provided with information on the investments made by both the sub-fund and the SPVs in the annual and half-yearly reports on the open-ended investment company under Belgian law (bevek) to which the sub-fund belongs. These reports can also be viewed at or downloaded from [www.kbc.be](http://www.kbc.be).

- (B) An investment in:
- deposits with financial institutions under prudential supervision in the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia and/or
  - debt instruments issued by financial institutions under prudential supervision in the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia and/or
  - debt instruments issued or guaranteed by the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia.

Prudential supervision of financial institutions in the United Kingdom, Switzerland, the United States of America, Japan, Canada and Australia can be equated to prudential supervision of financial institutions in the member states of the European Economic Area.

The investments in debt instruments issued by financial institutions under prudential supervision in the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia or issued or guaranteed by the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia have a minimum credit rating as set out under the heading *Characteristics of the bonds and other debt instruments*.

- (C) The investments may also consist of a combination of the investments specified under (A) and (B).

### **No formal guarantee**

No formal guarantee of repayment of the initial subscription price is provided to the sub-fund or to its shareholders. In other words, the capital protection is not binding for the sub-fund as regards the result generated, although achieving this objective through the operation of the financial mechanism is still the top priority.

If the financial mechanism fails and, as a result, the amount per share payable (before deducting charges and taxes) at Maturity is lower than the initial subscription price, KBC Asset Management NV may decide (but is not obliged) to use the management fee it has received during the current financial year from the sub-fund – and possibly also from other sub-funds of the bevek – to cover the shortfall. This is not a guarantee from KBC Asset Management NV, which may decide at any time and at its own discretion whether or not to use the management fee for this purpose.

The capital protection does not apply to shareholders who sell their shares before Maturity.

### **Potential return**

To achieve a potential return, the sub-fund concludes swaps with one or more prime counterparties. Consequently, the sub-fund transfers a portion of the future income from the investments that were made to achieve capital protection to this counterparty (these counterparties) during the life of the sub-fund. In exchange, the counterparty (counterparties) undertake to provide a potential return as specified under the heading *Selected strategy*.

### **Sub-fund's investment policy**

#### **Permitted asset classes**

Pursuant to the provisions of the Royal Decree of 12 November 2012 on undertakings for collective investment complying with the conditions of Directive 2009/65/EC, the sub-fund may invest in transferable securities (including bonds and other debt instruments), money market instruments, units (shares) in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as and to the extent permitted by the applicable legislation.

The investment limits and restrictions set out in the Royal Decree of 12 November 2012 on undertakings for collective investment complying with the conditions of Directive 2009/65/EC will be respected at all times.

### **Characteristics of the bonds and other debt instruments**

During the sub-fund's life, the average credit rating of the bonds and other debt instruments shall be at least 'A-' from Standard & Poor's or an equivalent rating from Moody's or Fitch, or, if there is no credit rating available, an average credit risk profile that the manager considers to be at least equivalent.

At the start of the investment, the credit rating of the long-term bonds and other debt instruments shall be at least 'A-' from Standard & Poor's or an equivalent rating from Moody's or Fitch, or, if there is no credit rating available, a credit risk profile that the manager considers to be at least equivalent.

At the start of the investment, the credit rating of the short-term bonds and other debt instruments shall be at least 'A-1' from Standard & Poor's or an equivalent rating from Moody's or Fitch, or, if there is no credit rating available, a credit risk profile that the manager considers to be at least equivalent.

When selecting the bonds and other debt instruments, all maturities are taken into consideration.

### Permitted swap transactions

**The swaps described below have been concluded with a prime counterparty or prime counterparties within the limits laid down by law.**

(1) To achieve a potential return, the sub-fund concludes swaps. Under such swap contracts, the sub-fund transfers a portion of the future income from the investments described under the heading 'Permitted asset classes' to the counterparty or counterparties during the life of the sub-fund. In exchange, the counterparty or counterparties undertake to provide a potential return as specified under the heading *Selected strategy*.

**The swaps under (1) are essential to achieve the sub-fund's investment objectives, since this technique facilitates achievement of the goal of generating a potential return.**

**The sub-fund's risk profile is not affected by the use of these swaps.**

(2) If necessary, the sub-fund also concludes swaps to match the due dates of the commitments of the sub-fund with those of the cash flows stemming from the deposits, bonds and other debt instruments described under the heading *Criteria the investments must meet*.

**These swaps are essential to achieve the sub-fund's investment objectives, since there are not enough bonds and other debt instruments available on the market whose coupon payments and maturity dates always perfectly match the due dates of the sub-fund's obligations.**

**The sub-fund's risk profile is not affected by the use of these swaps.**

(3) In addition, the sub-fund may conclude swaps to protect itself against the credit risk in respect of issuers of bonds and other debt instruments. Through this type of swap, one or more counterparties takes over the risk of an issuer of a bond or other debt instrument in the sub-fund's portfolio defaulting, in exchange for a fee payable by the sub-fund.

**The swaps under (3) serve to hedge the credit risk.**

**The sub-fund's risk profile is not affected by the use of these swaps.**

### Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

### Strategie selected

#### Investment objectives and strategy:

The sub-fund pursues two investment objectives: the repayment of 100% of the initial subscription price at Maturity as well as providing a capital gain consisting of a variable component and a fixed component:

- The variable component depends on the evolution of a basket of 30 shares of companies operating in the pharmaceutical and healthcare industries and is calculated as follows: If the basket of 30 shares has increased compared to its starting value, 100% of the increase in the basket  $(= (\text{Final Value} - \text{Starting Value}) / \text{Starting Value})$ , is settled at 100% of the initial subscription price on the Maturity Date. The variable component amounts to a maximum of 100%. Negative evolutions of the basket are not taken into account.
- The fixed component is independent of the evolution of the basket of 30 shares and amounts to 17% of the initial subscription price.

At Maturity Date, the sum of the variable and fixed components is distributed as a capital gain on top of the initial subscription price. Consequently, the total capital gain amounts to a maximum of 117% (actuarial yield: 21.22% before costs and taxes).

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

### Transparency of adverse sustainability impacts

The sub-fund took into account the principal adverse impacts of its investment decisions on sustainability factors ("PAI") as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on disclosure on sustainability in the financial services sector ("SFDR") through KBC Group's Investment Policy and KBC Group Policy on Blacklisted Companies.

Based on the KBC Group Policy on Blacklisted Companies, all companies on the 'KBC Group Blacklist' (including companies involved in controversial weapons such as those prohibited by Belgian law and white phosphorus weapons) are excluded as well as the worst offenders of the UN Global Compact.

Consequently, the sub-fund took into account exposure to controversial weapons ('indicator 14') by excluding companies dealing with controversial weapon systems, and violations of the principles of the UN Global Compact or the Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises ('indicator 10') by excluding the worst offenders of the UN Global Compact.

### **Maturity**

Wednesday 30 June 2027 (payment with a value date of D+1 banking day)

### **Currency**

HUF, for all shares in the basket, changes in the value of the currency in which they are expressed relative to HUF are irrelevant. The investor pays the subscription amount in HUF and will be paid in HUF at Maturity (or earlier). The investor is not protected against any decline in the value of the currency in which the sub-fund is denominated relative to the euro.

### **Starting Value**

Value of the basket based on the weighted average of the Value of the shares included in the basket during the first 10 Valuation Days, starting from Thursday 22 June 2023 inclusive.

### **End Value**

Value of the basket based on the weighted average of the Value of the shares included in the basket on the last Valuation Day of the month for the last 12 months before Maturity, more specifically from June 2026 through May 2027 (inclusive).

### **Value**

For all the shares, except for those listed on the Milan stock exchange, the closing price, namely the price of a share in the basket as calculated and notified at closing of the stock exchange by the authority of the stock exchange on which the share is listed (or its legal successor). The reference price is used for shares listed on the Milan stock exchange.

### **Valuation day**

A Valuation Day is set separately for each share in the basket.

A Valuation Day is a day that is a planned trading day both

- i) for the stock exchange on which the share is listed and
- ii) for the stock exchange whose activities have a substantial influence on the trading of options and futures on the share concerned

hereinafter referred to as 'the stock exchanges concerned'.

If on the Valuation Day,

- a) one of the stock exchanges concerned is unexpectedly closed or
- b) there is an event that disrupts the market for a stock exchange concerned or
- c) one of the stock exchanges concerned closes early,

the original Valuation Day is replaced by the following trading day when no event as referred to in a), b) or c) above occurs. An extraordinary closure that has been announced in advance is not considered as early closure.

If a valuation is made on consecutive Valuation Days, the trading day that replaces the original Valuation Day (i) may not coincide with another original Valuation Day and (ii) may not be a trading day that already replaces another original Valuation Day.

However, if an event as referred to under a), b) or c) above occurs on each of the eight trading days following the original Valuation Day,

- (i) the eighth trading day shall be considered as the original Valuation Day and
- (ii) the Bevek shall assess, in good faith and in consultation with the prime counterparty or counterparties with which it has concluded a swap agreement, the price of the share as it would have been traded on that eighth trading day and
- (iii) the Bevek will notify shareholders of any changes regarding setting the Starting Value and/or End Value and conditions of payment.

### Relevant basket

In the table below, the columns from left to right reflect the number of the share, the name of the share, the Bloomberg code, the exchange on which it trades (City-MIC Code) and its initial weighting in the basket.

| (i) | Name                          | Bloomberg Code  | Exchange          | Initial Weighting Coefficients |
|-----|-------------------------------|-----------------|-------------------|--------------------------------|

### Basket composition methodology

KBC Asset Management used the following methodology to determine the composition of the sub-fund's basket.

#### Step 1 :

The starting point is the global equities universe from which a selection of potential investments is derived in accordance with the economic criteria for the composition of the basket and subject to restrictions regarding stock market capitalisation and liquid assets.

The economic criteria for the composition of the basket determine the size of the final selection.

#### Step 2 :

The selection of shares obtained in step 1 is reduced to a short list using a quantitative selection based on past financial data. The shares selected are those of companies that achieve a good score in terms of management quality, a healthy balance-sheet structure and a positive trend in profitability.

#### Step 3 :

The selection of shares obtained in step 2 is then verified by KBC Asset Management analysts. Shares that are permanently monitored by the analysts and those for which there is a negative recommendation, when the product is launched, are then withdrawn from the selection.

#### Step 4 :

The last reduction of the selection provides the final basket. This selection was made using the technical parameters of options (including the term, volatility, dividend yield and interest rate).

The final basket must satisfy the legal requirements concerning the quantity of shares and adequate distribution in the weighting. In addition, care is taken to ensure compliance with the geographical and/or sector spread. The analysts make a qualitative assessment of each share used taking account of specific knowledge of these shares and the sectors/regions from which they come, in accordance with the term of the sub-fund.

For the sub-fund Optimum Fund K&H fix+ egészség 2, about 201 equities were selected during step 1.

The initial selection was reduced by a maximum 20% in step 2.

This was again reduced by 10% (indicative) in step 3. The final basket set up during step 4 is described above under *Relevant basket*. This basket makes it possible to offer the sub-fund Optimum Fund K&H fix+ egészség 2 under the conditions set out in the investment policy referred to above. Here the selection process uses parameters that could affect the potential return on the investments.

#### *Selection criteria for the basket :*

A share/issuer may only form part of the basket if (i) it is listed on a stock exchange, (ii) the issuer is a company operating in the pharmaceutical or healthcare industry, (iii) the Board of Directors of the Bevek has approved its inclusion in the basket, (iv) the issuer is not included in the KBC Group Policy on Blacklisted Companies\* and (v) at the time the swap contracts are being concluded (see 'Permitted swap transactions'), the issuer of the share complies with the KBC Group Investment Policy\* (the 'Selection criteria').

\* The KBC Group Policy on Blacklisted Companies and the KBC Group Investment Policy can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > General exclusion policies for conventional funds and socially responsible investment funds, Paragraph 1 'KBC Group Policy on Blacklisted Companies' and 2 'KBC Group Investment Policy'.

### **Modifications to the basket due to mergers, acquisitions, demergers, nationalisation, bankruptcy or disqualification :**

#### **Mergers or acquisitions**

If, during the life of the sub-fund, one or more issuers of shares in the basket are involved in a merger or acquisition, the shares of the relevant issuers which still meet the selection criteria and comply with the KBC Group Investment Policy\* after these operations will be given a weighting in the basket equal to the sum of the weightings of the shares of all issuers involved in the operation. If, after the operation, none of the issuers involved in the operation meet the selection criteria or comply with the KBC Group Investment Policy\*, the procedures described under 'Nationalisation, bankruptcy or disqualification' will apply.

\* The KBC Group Investment Policy can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > General exclusion policies for conventional funds and responsible investment funds, Paragraph 2 'KBC Group Investment Policy'.

#### **Demergers**

If an issuer of a share in the basket proceeds to a demerger, then the share from the issuer concerned can be substituted either by one of the shares that came about as a result of the demerger and that meets the selection criteria and complies with the KBC Group Investment Policy\*, or by a basket of shares arising from the demerger which meet the selection criteria and comply with the KBC Group Investment Policy\*. This basket of shares will, when calculating the number of shares in the basket, be considered as one share. If, after the operation, none of the shares resulting from the demerger meet the selection criteria or comply with the KBC Group Investment Policy\*, the procedures described under 'Nationalisation, bankruptcy or disqualification' will apply.

\* The KBC Group Investment Policy can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > General exclusion policies for conventional funds and responsible investment funds, Paragraph 2 'KBC Group Investment Policy'.

#### **Nationalisation, bankruptcy or disqualification**

If an issuer of a share in the basket is nationalised, declared bankrupt or no longer meets the selection criteria ('disqualification'), this share will be sold at the last known price before removal. The amount thus realised will then be invested until Maturity at the rate of interest in force on money or bond markets at the moment of removal, and this for a term equal to the term remaining until Maturity of the sub-fund. The realised amount plus the interest will be taken into account at Maturity as the result achieved for that share in order to calculate the final increase in the value of the basket at Maturity.

#### **Volatility of the net asset value**

The volatility of the net asset value may be high due to the composition of the portfolio.

#### **Securities Financing Transactions (SFTs)**

The sub-fund may not lend any financial instruments.

#### **General strategy for hedging the exchange risk**

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

## Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'

### 2.1.4. Financial portfolio management

The intellectual management, with the exception of the creation of the sub-fund and its maintenance in terms of the technical, product-specific and legal aspects has been delegated by the management company to KBC Fund Management Limited, 4th Floor, Scotch House, 6/7 Burgh Quay, Dublin 2, D02 VK44, Ireland.

### 2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

### 2.1.6. Index and benchmark

Not applicable

### 2.1.7. Policy pursued during the financial year

### **2.1.8. Summary risk indicator**

- 3 on a scale of 1 (lowest risk) to 7 (highest risk)
- a moderate level of inflation risk: there is no protection against an increase of the inflation.
  - a moderate level of concentration risk: there is a concentration of the investments in the shares of companies in the pharmaceutical and health care industries.
  - a high level of market risk: the level of the risk reflects the volatility of the stock market and the exchange rate risk in relation to the euro.
  - a high level of performance risk: the level of the risk reflects the volatility of the stock market and the exchange rate risk in relation to the euro.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

## 2.2. Balance sheet

\*The financial year does not coincide with the calendar year.

## 2.4.5. Performance figures

BE6341875159  
Optimum Fund K&H fix+ egészség 2 CAP  
Annual performance from 01/03/2023 through 28/02/2026 (in HUF)

If the results are expressed in a currency other than the euro, the return may be higher or lower due to exchange rate fluctuations.

| Cap Div | ISIN Code    | Curr<br>ency | 1 year           |               | 3 years          |               | 5 years          |               | 10 years         |               | Since Launch*    |                  |
|---------|--------------|--------------|------------------|---------------|------------------|---------------|------------------|---------------|------------------|---------------|------------------|------------------|
|         |              |              | Share<br>classes | Bench<br>mark | Share<br>classes | Bench<br>mark | Share<br>classes | Bench<br>mark | Share<br>classes | Bench<br>mark | Starting<br>date | Share<br>classes |
| CAP     | BE6341875159 | HUF          | 26.48%           |               |                  |               |                  |               |                  |               | 13/06/2023       | 19.23%           |

Risk warning: Past performance is not a guide to future performance.

\* Return on annual basis.

- The bar chart shows the performance for full financial years(period of 12 months prior to the half-yearly closing).
- The figures do not take account of any restructuring..
- Calculated in HUF and in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage.
- Calculation method for date D, where NAV stands for net asset value:  
Capitalisation units (CAP)  
Return on date D over a period of X years :  

$$[NIW(D) / NIW(Y)] ^ {1 / X} - 1$$
 where Y = D-X  
 Return on date D since the start date S of the unit:  

$$[NIW(D) / NIW(S)] ^ {1 / F} - 1$$
 where F = 1 if the unit has existed for less than one year on date D  
 where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D
- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation shares.

## 2.4.6. Costs

### Ongoing Charges:

Management fees and other administrative or operating costs: 1,536%  
Transaction costs: 0,000%

Percentage calculated at reporting date: 28 February 2026 (period of 12 months prior to the half-yearly closing).

A more detailed explanation with respect to the method of calculating ongoing charges and the relevant exclusions can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.5. Ongoing charges'

### Existence of Commission Sharing Agreements

Not applicable

### Fee sharing agreements en rebates

The management company has shared 70.00% of its fee with the distributor, and institutional and/or professional parties.

This percentage has been calculated relative to the fee for managing the investment portfolio of the sub-fund when it was launched.

## 2.4.7. Notes to the financial statements and other data

|                                                                                                          |                                                                                                                                                                                                     |                                                                                                                                                                                                                                                                                                        |

### Fee for managing the investment portfolio

KBC Asset Management NV receives a fee for managing the sub-fund's investments. This fee consists of a varying amount of max. 200 HUF per unit per year (with a maximum of HUF per unit per year for risk management).

This fee, which is calculated every six months, is paid monthly on the last banking day of each month. It can change from one six-month period to the next, within the limits set out below, and is based on the number of units issued at the start of each six-month period.

In the calculation, account is taken of the difference between:

- the return generated by the investments in bonds and other debt instruments, deposits, and/or liquid assets in order to achieve the capital protection on the Maturity date (see *The financial mechanism used to achieve capital protection*), and
- the expenses borne by the sub-fund to achieve a potential return (see *Permitted 'swap' transactions*),
- after deducting the expected fixed and variable expenses of the sub-fund, as mentioned above.

Of this, KBC Fund Management Ltd. receives a fee of no more than 189.50 HUF per unit per year from KBC Asset Management NV for the intellectual management of the sub-fund. KBC Fund Management Ltd. is a wholly owned subsidiary of KBC Asset Management NV.

KBC Asset Management NV has informed the bevek that, if due to the failure of the financial mechanism, the amount that should be paid per unit (after deducting taxes and charges) on the Maturity date, as relevant, is lower than the initial subscription price, KBC Asset Management NV may decide (but is not obliged to) to use the management fee it receives during the current financial year from the sub-fund – and possibly also from other sub-funds of the bevek – to cover this shortfall. This is not a guarantee from KBC Asset Management NV, which may

decide at any time and at its own discretion whether or not to use the management fee for this purpose. KBC Asset Management NV or one of its subsidiaries has also been appointed manager of the SPVs in which the sub-fund may invest (see *Criteria the investments must meet*). KBC Asset Management NV or one of its subsidiaries, as the case may be, receives an annual fee from the relevant SPVs for their management. This management fee may not exceed 0.15% per year and is calculated on the assets managed at the end of the quarter.

The sum of (i) the fee for managing the investment portfolio that the sub-fund pays to the management company and (ii) the management fee that the SPVs in which the sub-fund invests pay to the asset manager, shall never exceed 200.00 HUF per unit per year, as described above.

#### 2.1.2. Stock exchange listing

Not applicable.

#### 2.1.3. Goal and key principles of the investment policy

##### Object of the sub-fund

The object of the sub-fund is twofold (before deducting charges and taxes):

- (1) To repay per share the initial subscription price of 10000 HUF at Maturity.(i.e. the capital protection). This capital protection is provided through a financial mechanism that will be explained in more detail under the heading *Capital protection*. However, the capital protection does not apply to shareholders who sell their shares before Maturity.
- (2) To provide a potential return through an investment in swaps. The various types of swaps in which the sub-fund may invest are explained in more detail under the *Potential return*.

##### Capital Protection

###### The financial mechanism used to achieve capital protection

The financial mechanism used to achieve capital protection at Maturity consists of an investment of the total amount of the subscriptions in bonds and other debt instruments, deposits and/or liquid assets (including cash deposited on a time-deposit account or current account). These investments can have different maturities and coupon payment dates. Using the swaps described under the heading *Permitted swap transactions* (2), these investments are matched with the due dates of the obligations of the sub-fund.

###### Criteria the investments must meet

The investments must meet one of the following criteria:

- (1) An investment in deposits and/or debt instruments, placed with or issued by financial institutions under the prudential supervision of and established in a Member State of the European Economic Area.
- (2) An investment in debt instruments issued or guaranteed by a Member State of the European Economic Area.
- (3) An investment under an investment strategy with an analogous structure and identical counterparty risk as a direct investment in deposits and/or debt instruments as stated under (1) and (2) above.

The investments under (3) may consist of:

- (A) An investment in notes listed on a stock exchange that are issued by 'Special Purpose Vehicles' (SPVs).

These SPVs are managed by KBC Asset Management NV or a subsidiary.

The underlying assets of the bonds issued by the SPVs consist of a diversified portfolio of deposits issued by financial institutions, bonds, other debt instruments and financial derivatives. When selecting these underlying assets, account is taken of criteria relating to allocation and creditworthiness (see *Permitted asset classes* and *Characteristics of the bonds and other debt instruments*) in order to limit the counterparty risk.

Further details of the criteria these underlying deposits, bonds, other debt instruments and financial derivatives must meet are provided in the base prospectuses for the SPVs, which can be viewed at or downloaded from [www.kbc.be/prospectus/spv](http://www.kbc.be/prospectus/spv).

Investors are provided with information on the investments made by both the sub-fund and the SPVs in the annual and half-yearly reports on the open-ended investment company under Belgian law (bevek) to which the sub-fund belongs. These reports can also be viewed at or downloaded from [www.kbc.be](http://www.kbc.be).

- (B) An investment in:
- deposits with financial institutions under prudential supervision in the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia and/or
  - debt instruments issued by financial institutions under prudential supervision in the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia and/or
  - debt instruments issued or guaranteed by the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia.

Prudential supervision of financial institutions in the United Kingdom, Switzerland, the United States of America, Japan, Canada and Australia can be equated to prudential supervision of financial institutions in the member states of the European Economic Area.

The investments in debt instruments issued by financial institutions under prudential supervision in the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia or issued or guaranteed by the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia have a minimum credit rating as set out under the heading *Characteristics of the bonds and other debt instruments*.

- (C) The investments may also consist of a combination of the investments specified under (A) and (B).

### **No formal guarantee**

No formal guarantee of repayment of the initial subscription price is provided to the sub-fund or to its shareholders. In other words, the capital protection is not binding for the sub-fund as regards the result generated, although achieving this objective through the operation of the financial mechanism is still the top priority.

If the financial mechanism fails and, as a result, the amount per share payable (before deducting charges and taxes) at Maturity is lower than the initial subscription price, KBC Asset Management NV may decide (but is not obliged) to use the management fee it has received during the current financial year from the sub-fund – and possibly also from other sub-funds of the bevek – to cover the shortfall. This is not a guarantee from KBC Asset Management NV, which may decide at any time and at its own discretion whether or not to use the management fee for this purpose.

The capital protection does not apply to shareholders who sell their shares before Maturity.

### **Potential return**

To achieve a potential return, the sub-fund concludes swaps with one or more prime counterparties. Consequently, the sub-fund transfers a portion of the future income from the investments that were made to achieve capital protection to this counterparty (these counterparties) during the life of the sub-fund. In exchange, the counterparty (counterparties) undertake to provide a potential return as specified under the heading *Selected strategy*.

### **Sub-fund's investment policy**

#### **Permitted asset classes**

Pursuant to the provisions of the Royal Decree of 12 November 2012 on undertakings for collective investment complying with the conditions of Directive 2009/65/EC, the sub-fund may invest in transferable securities (including bonds and other debt instruments), money market instruments, units (shares) in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as and to the extent permitted by the applicable legislation.

The investment limits and restrictions set out in the Royal Decree of 12 November 2012 on undertakings for collective investment complying with the conditions of Directive 2009/65/EC will be respected at all times.

### **Characteristics of the bonds and other debt instruments**

During the sub-fund's life, the average credit rating of the bonds and other debt instruments shall be at least 'A-' from Standard & Poor's or an equivalent rating from Moody's or Fitch, or, if there is no credit rating available, an average credit risk profile that the manager considers to be at least equivalent.

At the start of the investment, the credit rating of the long-term bonds and other debt instruments shall be at least 'A-' from Standard & Poor's or an equivalent rating from Moody's or Fitch, or, if there is no credit rating available, a credit risk profile that the manager considers to be at least equivalent.

At the start of the investment, the credit rating of the short-term bonds and other debt instruments shall be at least 'A-1' from Standard & Poor's or an equivalent rating from Moody's or Fitch, or, if there is no credit rating available, a credit risk profile that the manager considers to be at least equivalent.

When selecting the bonds and other debt instruments, all maturities are taken into consideration.

### Permitted swap transactions

**The swaps described below have been concluded with a prime counterparty or prime counterparties within the limits laid down by law.**

(1) To achieve a potential return, the sub-fund concludes swaps. Under such swap contracts, the sub-fund transfers a portion of the future income from the investments described under the heading 'Permitted asset classes' to the counterparty or counterparties during the life of the sub-fund. In exchange, the counterparty or counterparties undertake to provide a potential return as specified under the heading *Selected strategy*.

**The swaps under (1) are essential to achieve the sub-fund's investment objectives, since this technique facilitates achievement of the goal of generating a potential return.**

**The sub-fund's risk profile is not affected by the use of these swaps.**

(2) If necessary, the sub-fund also concludes swaps to match the due dates of the commitments of the sub-fund with those of the cash flows stemming from the deposits, bonds and other debt instruments described under the heading *Criteria the investments must meet*.

**These swaps are essential to achieve the sub-fund's investment objectives, since there are not enough bonds and other debt instruments available on the market whose coupon payments and maturity dates always perfectly match the due dates of the sub-fund's obligations.**

**The sub-fund's risk profile is not affected by the use of these swaps.**

(3) In addition, the sub-fund may conclude swaps to protect itself against the credit risk in respect of issuers of bonds and other debt instruments. Through this type of swap, one or more counterparties takes over the risk of an issuer of a bond or other debt instrument in the sub-fund's portfolio defaulting, in exchange for a fee payable by the sub-fund.

**The swaps under (3) serve to hedge the credit risk.**

**The sub-fund's risk profile is not affected by the use of these swaps.**

### Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

### Strategie selected

#### Investment objectives and strategy:

The sub-fund pursues two investment objectives: the repayment of 100% of the initial subscription price at Maturity as well as providing a capital gain consisting of a variable component and a fixed component:

- The variable component depends on the evolution of the STOXX® Europe 600 Food & Beverage Price-return index and is calculated as follows: If the index has increased compared to its starting value, 100% of the increase in the index  $(= (\text{Final Value} - \text{Starting Value}) / \text{Starting Value})$ , is settled at 100% of the initial subscription price on the Maturity Date. The variable component amounts to a maximum of 120%. Negative evolutions of the index are not taken into account.
- The fixed component is independent of the evolution of the index and amounts to 17% of the initial subscription price.

At Maturity Date, the sum of the variable and fixed components is distributed as a capital gain on top of the initial subscription price. Consequently, the total capital gain amounts to a maximum of 137% (actuarial yield: 23.54% before costs and taxes).

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

### Transparency of adverse sustainability impacts

The sub-fund took into account the principal adverse impacts on sustainability factors of its investment decisions ("PAI") as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on disclosure on sustainability in the financial services sector ("SFDR") through KBC Group's Investment Policy and KBC Group Policy on Blacklisted Companies.

Based on KBC Group Policy on Blacklisted Companies, all companies on the 'KBC Group Blacklist' (including companies involved in controversial weapons such as those prohibited by Belgian law and white phosphorus weapons) are excluded as well as the worst offenders of the UN Global Compact.

For investments in bonds issued by SPVs, the sub-fund took into account, in particular, exposure to controversial weapons ('indicator 14') by excluding companies dealing with controversial weapon systems and violations of the principles of the UN Global Compact or the Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises ('indicator 10').

## Maturity

Wednesday 31 March 2027 (payment with a value date of D+1 banking day)

## Currency

HUF, for STOXX EUROPE 600 FOOD & BEVERAGE INDEX, changes in the value of the currency in which they are expressed relative to HUF are irrelevant. The investor pays the subscription amount in HUF and will be paid in HUF at Maturity (or earlier). The investor is not protected against any decline in the value of the currency in which the sub-fund is denominated relative to the euro.

## Starting Value

Value of the index based on the average of the Value of the index during the first 10 Valuation Days, starting from Thursday 2 March 2023 inclusive.

## End Value

Value of the index based on the average of the Value of the index on the final Valuation Day of the month for the last 12 months before Maturity, more specifically from March 2026 through February 2027 (inclusive).

## Value

Closing value of the STOXX EUROPE 600 FOOD & BEVERAGE INDEX, to be valued at the time at which the official closing level of the index is published and announced by the relevant authority (index sponsor), i.e. STOXX Limited (or its legal successor).

## Valuation day

A Valuation Day is a scheduled trading day, both

- i) for each stock market relating to securities comprising 20% or more of the index and
- ii) for the stock markets whose activity has a significant influence on trading in options and futures relating to securities forming part of the index,

hereinafter referred to as the 'Markets in Question',

and on which the index sponsor calculates and publishes the Price of the index.

If, on the Valuation Day,

- a) one of the Markets in Question remains closed unexpectedly, or
- b) one of the Markets in Question suffers a market-disrupting event, or
- c) one of the Markets in Question closes early,

then the original Valuation Day is replaced by the next trading day when there is no situation as described under (a), (b) or (c). A closing time differing from the customary closing time that is announced in good time, is not considered as an earlier closing time.

When a valuation is done based on consecutive Valuation Days, the replacement trading day may not be (i) another original Valuation Day or (ii) a trading day that already replaces another original Valuation Day.

If, however, a situation such as described under (a), (b) or (c) occurs on each of the eight trading days following the original Valuation Day, then

- (i) the eighth trading day will be considered as the original Valuation Day and
- (ii) the bevek will, in consultation with the prime counterparty (counterparties) with which it has concluded a swap agreement, estimate in good faith the value of the index as that would have been calculated on this eighth trading day and
- (iii) the bevek will inform the shareholders of the changes with respect to determining the Initial Value and/or Value at Maturity and the terms and conditions regarding disbursement.

If changes occur regarding the index (for instance, if it is calculated by another sponsor, or if another method of calculation is used), or if the index sponsor does not succeed in calculating or publishing the index (even though all the information is available) the bevek will, together with the prime counterparty or counterparties with which the swap was concluded, decide how the value of the index will be determined going forward. Where substantial changes occur to the index or the index is no longer calculated, it may be replaced by another index provided that the new index is representative of the same geographical and/or economic sectors.

The STOXX® Europe 600 Food & Beverage Price-return index is a weighted, in principle non-dividend-protected equity index, calculated by STOXX Limited. The STOXX® Europe 600 Food & Beverage Price-return index measures the performance of the European food and beverage sector as defined by the Industry Classification Benchmark (ICB) and is a subset of the STOXX® Europe 600 Index, which comprises 600 of the largest stocks across 18 European countries. The Index rebalances quarterly with components weighted by free float market capitalisation and capped to maintain compliance with UCITS diversification standards. Free float market capitalisation is the market value of a company's readily available outstanding shares. Further details regarding the Index (including its constituents) are available on the index provider's website at ([www.stoxx.com](http://www.stoxx.com)).

The ISIN code of the index is EU0009658749. The Bloomberg code of the index is BBG000P5WMN1.

Stoxx Limited has all proprietary rights with respect to the Index. In no way Stoxx Limited endorses, sponsors or is otherwise involved in the issue and offering the shares of Optimum Fund K&H fix+ élelmiszeripari. Stoxx Limited disclaims any liability for the issue and offering of the shares of this undertaking for collective investment.

The STOXX® Europe 600 Food & Beverage Price-return index is published daily in L'Echo, De Tijd, The Financial Times and The Wall Street Journal Europe.

STOXX and its licensors (the "Licensors") have no relationship to the Licensee, other than the licensing of the STOXX® Europe 600 Food & Beverage Price-return index and the related trademarks for use in connection with Optimum Fund K&H fix+ élelmiszeripari.

**STOXX and its Licensors do not:**

- STOXX and its Licensors will have no liability for any errors, omissions or interruptions in the STOXX® Europe 600 Food & Beverage Price-return index or its data;
- Under no circumstances will STOXX or its Licensors be liable for any lost profits or indirect, punitive, special or consequential damages or losses, even if STOXX or its Licensors knows that they might occur.

The licensing agreement between the issuer and STOXX is solely for their benefit and not for the benefit of the owners of the Optimum Fund K&H fix+ élelmiszeripari or any other third parties.

### **Volatility of the net asset value**

The volatility of the net asset value may be high due to the composition of the portfolio.

### **Securities Financing Transactions (SFTs)**

The sub-fund may not lend any financial instruments.

### **General strategy for hedging the exchange risk**

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

### **Social, ethical and environmental aspects**

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'.

## **2.1.4. Financial portfolio management**

The intellectual management, with the exception of the creation of the sub-fund and its maintenance in terms of the technical, product-specific and legal aspects has been delegated by the management company to KBC Fund Management Limited, 4th Floor, Scotch House, 6/7 Burgh Quay, Dublin 2, D02 VK44, Ireland.

## **2.1.5. Distributors**

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

## 2.1.6. Index and benchmark

See 'Sub-fund's investment policy'.

## 2.1.7. Policy pursued during the financial year

| Evolution since 31/08/2025                       | <b>7,30%</b>                           |
| Index at start sub-fund                          | <b>767.06</b>                          |
| Minimum value in local currency on maturity date | <b>10,000.00</b>                       |
| Local currency                                   | <b>HUF</b>                             |

## 2.1.8. Summary risk indicator

- 1 on a scale of 1 (lowest risk) to 7 (highest risk)
- a moderate level of inflation risk: there is no protection against an increase of the inflation.
  - a moderate level of concentration risk: there is a concentration of the investments in the shares of companies in the food and beverage industry.
  - a high level of market risk: the level of the risk reflects the volatility of the stock market and the exchange rate risk in relation to the euro.
  - a high level of performance risk: the level of the risk reflects the volatility of the stock market and the exchange rate risk in relation to the euro.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

## 2.2. Balance sheet

| Balance sheet layout |                                                                   | 28/02/2026<br>(in Hungarian forint) | 28/02/2025<br>(in Hungarian forint) |

## 2.4.5. Performance figures

BE6339511766  
Optimum Fund K&H fix+ élelmiszeripari CAP  
Annual performance from 01/03/2023 through 28/02/2026 (in HUF)

If the results are expressed in a currency other than the euro, the return may be higher or lower due to exchange rate fluctuations.

| Cap Div | ISIN Code    | Curr<br>ency | 1 year        |            | 3 years       |            | 5 years       |            | 10 years      |            | Since Launch* |               |
|---------|--------------|--------------|---------------|------------|---------------|------------|---------------|------------|---------------|------------|---------------|---------------|
|         |              |              | Share classes | Bench mark | Share classes | Bench mark | Share classes | Bench mark | Share classes | Bench mark | Starting date | Share classes |
| CAP     | BE6339511766 | HUF          | 3.56%         |            |               |            |               |            |               |            | 21/02/2023    | 3.37%         |

Risk warning: Past performance is not a guide to future performance.

\* Return on annual basis.

- The bar chart shows the performance for full financial years(period of 12 months prior to the half-yearly closing).
- The figures do not take account of any restructuring..
- Calculated in HUF and in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage.
- Calculation method for date D, where NAV stands for net asset value:  
Capitalisation units (CAP)  
Return on date D over a period of X years :  

$$[NIW(D) / NIW(Y)] ^ {1 / X} - 1$$
where Y = D-X  
Return on date D since the start date S of the unit:  

$$[NIW(D) / NIW(S)] ^ {1 / F} - 1$$
where F = 1 if the unit has existed for less than one year on date D  
where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D
- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation shares.

## 2.4.6. Costs

### Ongoing Charges:

Management fees and other administrative or operating costs: 1,326%  
Transaction costs: 0,000%

Percentage calculated at reporting date: 28 February 2026 (period of 12 months prior to the half-yearly closing).

A more detailed explanation with respect to the method of calculating ongoing charges and the relevant exclusions can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.5. Ongoing charges'

### Existence of Commission Sharing Agreements

Not applicable

### Fee sharing agreements en rebates

The management company has shared 70.00% of its fee with the distributor, and institutional and/or professional parties.

This percentage has been calculated relative to the fee for managing the investment portfolio of the sub-fund when it was launched.

### Fee for managing the investment portfolio

KBC Asset Management NV receives a fee for managing the sub-fund's investments. This fee consists of a varying amount of max. 200 HUF per unit per year (with a maximum of HUF per unit per year for risk management).

This fee, which is calculated every six months, is paid monthly on the last banking day of each month. It can change from one six-month period to the next, within the limits set out below, and is based on the number of units issued at the start of each six-month period.

In the calculation, account is taken of the difference between:

- the return generated by the investments in bonds and other debt instruments, deposits, and/or liquid assets in order to achieve the capital protection on the Maturity date (see *The financial mechanism used to achieve capital protection*), and
- the expenses borne by the sub-fund to achieve a potential return (see *Permitted 'swap' transactions*),
- after deducting the expected fixed and variable expenses of the sub-fund, as mentioned above.

Of this, KBC Fund Management Ltd. receives a fee of no more than 189.50 HUF per unit per year from KBC Asset Management NV for the intellectual management of the sub-fund. KBC Fund Management Ltd. is a wholly owned subsidiary of KBC Asset Management NV.

KBC Asset Management NV has informed the bevek that, if due to the failure of the financial mechanism, the amount that should be paid per unit (after deducting taxes and charges) on the Maturity date, as relevant, is lower than the initial subscription price, KBC Asset Management NV may decide (but is not obliged to) to use the management fee it receives during the current financial year from the sub-fund – and possibly also from other sub-funds of the bevek – to cover this shortfall. This is not a guarantee from KBC Asset Management NV, which may

decide at any time and at its own discretion whether or not to use the management fee for this purpose. KBC Asset Management NV or one of its subsidiaries has also been appointed manager of the SPVs in which the sub-fund may invest (see *Criteria the investments must meet*). KBC Asset Management NV or one of its subsidiaries, as the case may be, receives an annual fee from the relevant SPVs for their management. This management fee may not exceed 0.15% per year and is calculated on the assets managed at the end of the quarter.

The sum of (i) the fee for managing the investment portfolio that the sub-fund pays to the management company and (ii) the management fee that the SPVs in which the sub-fund invests pay to the asset manager, shall never exceed 200.00 HUF per unit per year, as described above.

## 2. Information on Optimum Fund K&H napjaink

### 2.1. Management report

#### 2.1.1. Launch date and subscription price

|                             |               |
|-----------------------------|---------------|
| Launch date:                | 11 March 2025 |
| Initial subscription price: | 10000 HUF     |
| Maturity date:              | 27 April 2029 |
| Currency:                   | HUF           |

#### 2.1.2. Stock exchange listing

Not applicable.

#### 2.1.3. Goal and key principles of the investment policy

##### Object of the sub-fund

The object of the sub-fund is twofold (before deducting charges and taxes):

- (1) To repay per share the initial subscription price of 10000 HUF at Maturity.(i.e. the capital protection). This capital protection is provided through a financial mechanism that will be explained in more detail under the heading *Capital protection*. However, the capital protection does not apply to shareholders who sell their shares before Maturity.
- (2) To provide a potential return through an investment in swaps. The various types of swaps in which the sub-fund may invest are explained in more detail under the *Potential return*.

##### Capital Protection

###### The financial mechanism used to achieve capital protection

The financial mechanism used to achieve capital protection at Maturity consists of an investment of the total amount of the subscriptions in bonds and other debt instruments, deposits and/or liquid assets (including cash deposited on a time-deposit account or current account). These investments can have different maturities and coupon payment dates. Using the swaps described under the heading *Permitted swap transactions* (2), these investments are matched with the due dates of the obligations of the sub-fund.

###### Criteria the investments must meet

The investments must meet one of the following criteria:

- (1) An investment in deposits and/or debt instruments, placed with or issued by financial institutions under the prudential supervision of and established in a Member State of the European Economic Area.
- (2) An investment in debt instruments issued or guaranteed by a Member State of the European Economic Area.
- (3) An investment under an investment strategy with an analogous structure and identical counterparty risk as a direct investment in deposits and/or debt instruments as stated under (1) and (2) above.

The investments under (3) may consist of:

- (A) An investment in notes listed on a stock exchange that are issued by 'Special Purpose Vehicles' (SPVs).

These SPVs are managed by KBC Asset Management NV or a subsidiary.

The underlying assets of the bonds issued by the SPVs consist of a diversified portfolio of deposits issued by financial institutions, bonds, other debt instruments and financial derivatives. When selecting these underlying assets, account is taken of criteria relating to allocation and creditworthiness (see *Permitted asset classes* and *Characteristics of the bonds and other debt instruments*) in order to limit the counterparty risk.

Further details of the criteria these underlying deposits, bonds, other debt instruments and financial derivatives must meet are provided in the base prospectuses for the SPVs, which can be viewed at or downloaded from [www.kbc.be/prospectus/spv](http://www.kbc.be/prospectus/spv).

Investors are provided with information on the investments made by both the sub-fund and the SPVs in the annual and half-yearly reports on the open-ended investment company under Belgian law (bevek) to which the sub-fund belongs. These reports can also be viewed at or downloaded from [www.kbc.be](http://www.kbc.be).

- (B) An investment in:
- deposits with financial institutions under prudential supervision in the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia and/or
  - debt instruments issued by financial institutions under prudential supervision in the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia and/or
  - debt instruments issued or guaranteed by the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia.

Prudential supervision of financial institutions in the United Kingdom, Switzerland, the United States of America, Japan, Canada and Australia can be equated to prudential supervision of financial institutions in the member states of the European Economic Area.

The investments in debt instruments issued by financial institutions under prudential supervision in the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia or issued or guaranteed by the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia have a minimum credit rating as set out under the heading *Characteristics of the bonds and other debt instruments*.

- (C) The investments may also consist of a combination of the investments specified under (A) and (B).

### **No formal guarantee**

No formal guarantee of repayment of the initial subscription price is provided to the sub-fund or to its shareholders. In other words, the capital protection is not binding for the sub-fund as regards the result generated, although achieving this objective through the operation of the financial mechanism is still the top priority.

If the financial mechanism fails and, as a result, the amount per share payable (before deducting charges and taxes) at Maturity is lower than the initial subscription price, KBC Asset Management NV may decide (but is not obliged) to use the management fee it has received during the current financial year from the sub-fund – and possibly also from other sub-funds of the bevek – to cover the shortfall. This is not a guarantee from KBC Asset Management NV, which may decide at any time and at its own discretion whether or not to use the management fee for this purpose.

The capital protection does not apply to shareholders who sell their shares before Maturity.

### **Potential return**

To achieve a potential return, the sub-fund concludes swaps with one or more prime counterparties. Consequently, the sub-fund transfers a portion of the future income from the investments that were made to achieve capital protection to this counterparty (these counterparties) during the life of the sub-fund. In exchange, the counterparty (counterparties) undertake to provide a potential return as specified under the heading *Selected strategy*.

### **Sub-fund's investment policy**

#### **Permitted asset classes**

Pursuant to the provisions of the Royal Decree of 12 November 2012 on undertakings for collective investment complying with the conditions of Directive 2009/65/EC, the sub-fund may invest in transferable securities (including bonds and other debt instruments), money market instruments, units (shares) in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as and to the extent permitted by the applicable legislation.

The investment limits and restrictions set out in the Royal Decree of 12 November 2012 on undertakings for collective investment complying with the conditions of Directive 2009/65/EC will be respected at all times.

#### **Characteristics of the bonds and other debt instruments**

During the sub-fund's life, the average credit rating of the bonds and other debt instruments shall be at least 'A-' from Standard & Poor's or an equivalent rating from Moody's or Fitch, or, if there is no credit rating available, an average credit risk profile that the manager considers to be at least equivalent.

At the start of the investment, the credit rating of the long-term bonds and other debt instruments shall be at least 'A-' from Standard & Poor's or an equivalent rating from Moody's or Fitch, or, if there is no credit rating available, a credit risk profile that the manager considers to be at least equivalent.

At the start of the investment, the credit rating of the short-term bonds and other debt instruments shall be at least 'A-1' from Standard & Poor's or an equivalent rating from Moody's or Fitch, or, if there is no credit rating available, a credit risk profile that the manager considers to be at least equivalent.

When selecting the bonds and other debt instruments, all maturities are taken into consideration.

### Permitted swap transactions

**The swaps described below have been concluded with a prime counterparty or prime counterparties within the limits laid down by law.**

(1) To achieve a potential return, the sub-fund concludes swaps. Under such swap contracts, the sub-fund transfers a portion of the future income from the investments described under the heading 'Permitted asset classes' to the counterparty or counterparties during the life of the sub-fund. In exchange, the counterparty or counterparties undertake to provide a potential return as specified under the heading *Selected strategy*.

**The swaps under (1) are essential to achieve the sub-fund's investment objectives, since this technique facilitates achievement of the goal of generating a potential return.**

**The sub-fund's risk profile is not affected by the use of these swaps.**

(2) If necessary, the sub-fund also concludes swaps to match the due dates of the commitments of the sub-fund with those of the cash flows stemming from the deposits, bonds and other debt instruments described under the heading *Criteria the investments must meet*.

**These swaps are essential to achieve the sub-fund's investment objectives, since there are not enough bonds and other debt instruments available on the market whose coupon payments and maturity dates always perfectly match the due dates of the sub-fund's obligations.**

**The sub-fund's risk profile is not affected by the use of these swaps.**

(3) In addition, the sub-fund may conclude swaps to protect itself against the credit risk in respect of issuers of bonds and other debt instruments. Through this type of swap, one or more counterparties takes over the risk of an issuer of a bond or other debt instrument in the sub-fund's portfolio defaulting, in exchange for a fee payable by the sub-fund.

**The swaps under (3) serve to hedge the credit risk.**

**The sub-fund's risk profile is not affected by the use of these swaps.**

### Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

### Strategie selected

#### Investment objectives and strategy:

The sub-fund has two investment objectives: firstly, it seeks to pay back at Maturity at least 100% of the initial subscription price, and secondly, to generate a potential capital gain that is contingent on the evolution of a basket of 30 shares of companies that cater for products and services that consumers need in everyday life, such as, for example, utilities for water, internet and electricity; computer equipment, software and communication devices for everyday use; food and beverages; household goods; products for hygiene and daily care; household appliances; DIY items; textiles and clothing; e-commerce; and everyday banking.

If the End Value of the basket of 30 shares of companies that cater for products and services that consumers need in everyday life, such as, for example, utilities for water, internet and electricity; computer equipment, software and communication devices for everyday use; food and beverages; household goods; products for hygiene and daily care; household appliances; DIY items; textiles and clothing; e-commerce; and everyday banking has risen relative to its Minimum Starting Value, 100% of the increase  $(= (\text{Value at Maturity} - \text{Minimum Starting Value}) / \text{Initial Value})$  will be taken into account at Maturity with regard to 100% of the initial subscription price. The capital gain is capped at 100% (yield to maturity of 18.39% before taxes and charges). Negative performances of the basket are not taken into account.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

### Transparency of adverse sustainability impacts

The sub-fund took into account the principal adverse impacts of its investment decisions on sustainability factors ("PAI") as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on disclosure on sustainability in the financial services sector ("SFDR") through KBC Group's Investment Policy and KBC Group Policy on Blacklisted Companies.

Based on the KBC Group Policy on Blacklisted Companies, all companies on the 'KBC Group Blacklist' (including companies involved in controversial weapons such as those prohibited by Belgian law and white phosphorus weapons) are excluded as well as the worst offenders of the UN Global Compact.

Consequently, the sub-fund took into account exposure to controversial weapons ('**indicator 14**') by excluding companies dealing with controversial weapon systems, and violations of the principles of the UN Global Compact or the Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises ('**indicator 10**') by excluding the worst offenders of the UN Global Compact.

### **Maturity**

Friday 27 April 2029 (payment with a value date of D+1 banking day)

### **Currency**

HUF, for all shares in the basket, changes in the value of the currency in which they are expressed relative to HUF are irrelevant. The investor pays the subscription amount in HUF and will be paid in HUF at Maturity (or earlier). The investor is not protected against any decline in the value of the currency in which the sub-fund is denominated relative to the euro.

### **Starting Value**

Value of the basket based on the weighted average of the Value of the shares included in the basket during the first 10 Valuation Days, starting from Thursday 20 March 2025 inclusive.

### **Minimum Starting Value**

The lowest value of the Starting Value and the lowest Value of the basket on the Initial Observation Days and is always lower than or equal to the Starting Value.

### **Initial Observation Dates**

The first Valuation Day of each month from and including May 2025 up to and including July 2026 (inclusive).

### **End Value**

Value of the basket based on the weighted average of the Value of the shares included in the basket on the last Valuation Day of the month for the last 12 months before Maturity, more specifically from April 2028 through March 2029 (inclusive).

### **Value**

For all the shares, except for those listed on the Milan stock exchange, the closing price, namely the price of a share in the basket as calculated and notified at closing of the stock exchange by the authority of the stock exchange on which the share is listed (or its legal successor). The reference price is used for shares listed on the Milan stock exchange.

## Valuation day

A Valuation Day is set separately for each share in the basket.

A Valuation Day is a day that is a planned trading day both

- i) for the stock exchange on which the share is listed and
- ii) for the stock exchange whose activities have a substantial influence on the trading of options and futures on the share concerned

hereinafter referred to as 'the stock exchanges concerned'.

If on the Valuation Day,

- a) one of the stock exchanges concerned is unexpectedly closed or
- b) there is an event that disrupts the market for a stock exchange concerned or
- c) one of the stock exchanges concerned closes early,

the original Valuation Day is replaced by the following trading day when no event as referred to in a), b) or c) above occurs. An extraordinary closure that has been announced in advance is not considered as early closure.

If a valuation is made on consecutive Valuation Days, the trading day that replaces the original Valuation Day (i) may not coincide with another original Valuation Day and (ii) may not be a trading day that already replaces another original Valuation Day.

However, if an event as referred to under a), b) or c) above occurs on each of the eight trading days following the original Valuation Day,

- (i) the eighth trading day shall be considered as the original Valuation Day and
- (ii) the Bevek shall assess, in good faith and in consultation with the prime counterparty or counterparties with which it has concluded a swap agreement, the price of the share as it would have been traded on that eighth trading day and
- (iii) the Bevek will notify shareholders of any changes regarding setting the Starting Value and/or End Value and conditions of payment.

### Relevant basket

In the table below, the columns from left to right reflect the number of the share, the name of the share, the Bloomberg code, the exchange on which it trades (City-MIC Code) and its initial weighting in the basket.

| (i) | Name                       | Bloomberg Code  | Exchange          | Initial Weighting Coefficients |

### Basket composition methodology

KBC Asset Management used the following methodology to determine the composition of the sub-fund's basket.

#### Step 1 :

The starting point is the global equities universe from which a selection of potential investments is derived in accordance with the economic criteria for the composition of the basket and subject to restrictions regarding stock market capitalisation and liquid assets.

The economic criteria for the composition of the basket determine the size of the final selection.

#### Step 2 :

The selection of shares obtained in step 1 is reduced to a short list using a quantitative selection based on past financial data. The shares selected are those of companies that achieve a good score in terms of management quality, a healthy balance-sheet structure and a positive trend in profitability.

#### Step 3 :

The selection of shares obtained in step 2 is then verified by KBC Asset Management analysts. Shares that are permanently monitored by the analysts and those for which there is a negative recommendation, when the product is launched, are then withdrawn from the selection.

#### Step 4 :

The last reduction of the selection provides the final basket. This selection was made using the technical parameters of options (including the term, volatility, dividend yield and interest rate).

The final basket must satisfy the legal requirements concerning the quantity of shares and adequate distribution in the weighting. In addition, care is taken to ensure compliance with the geographical and/or sector spread. The analysts make a qualitative assessment of each share used taking account of specific knowledge of these shares and the sectors/regions from which they come, in accordance with the term of the sub-fund.

For the sub-fund Optimum Fund K&H napjaink, about 251 equities were selected during step 1.

The initial selection was reduced by a maximum 20% in step 2.

This was again reduced by 10% (indicative) in step 3. The final basket set up during step 4 is described above under *Relevant basket*. This basket makes it possible to offer the sub-fund Optimum Fund K&H napjaink under the conditions set out in the investment policy referred to above. Here the selection process uses parameters that could affect the potential return on the investments.

#### *Selection criteria for the basket :*

A share/issuer may only form part of the basket if (i) it is listed on a stock exchange, (ii) the issuer is a company that caters for products and services that consumers need in everyday life, such as, for example, utilities for water, internet and electricity; computer equipment, software and communication devices for everyday use; food and beverages; household goods; products for hygiene and daily care; household appliances; DIY items; textiles and clothing; e-commerce; and everyday banking, (iii) the Board of Directors of the Beveik has approved its inclusion in the basket, (iv) the issuer is not included in the KBC Group Policy on Blacklisted Companies\* and (v) at the time the swap contracts are being concluded (see 'Permitted swap transactions'), the issuer of the share complies with the KBC Group Investment Policy\* (the 'Selection criteria').

\* The KBC Group Policy on Blacklisted Companies and the KBC Group Investment Policy can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > General exclusion policies for conventional funds and socially responsible investment funds, Paragraph 1 'KBC Group Policy on Blacklisted Companies' and 2 'KBC Group Investment Policy'.

### **Modifications to the basket due to mergers, acquisitions, demergers, nationalisation, bankruptcy or disqualification :**

#### **Mergers or acquisitions**

If, during the life of the sub-fund, one or more issuers of shares in the basket are involved in a merger or acquisition, the shares of the relevant issuers which still meet the selection criteria and comply with the KBC Group Investment Policy\* after these operations will be given a weighting in the basket equal to the sum of the weightings of the shares of all issuers involved in the operation. If, after the operation, none of the issuers involved in the operation meet the selection criteria or comply with the KBC Group Investment Policy\*, the procedures described under 'Nationalisation, bankruptcy or disqualification' will apply.

\* The KBC Group Investment Policy can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > General exclusion policies for conventional funds and responsible investment funds, Paragraph 2 'KBC Group Investment Policy'.

#### **Demergers**

If an issuer of a share in the basket proceeds to a demerger, then the share from the issuer concerned can be substituted either by one of the shares that came about as a result of the demerger and that meets the selection criteria and complies with the KBC Group Investment Policy\*, or by a basket of shares arising from the demerger which meet the selection criteria and comply with the KBC Group Investment Policy\*. This basket of shares will, when calculating the number of shares in the basket, be considered as one share. If, after the operation, none of the shares resulting from the demerger meet the selection criteria or comply with the KBC Group Investment Policy\*, the procedures described under 'Nationalisation, bankruptcy or disqualification' will apply.

\* The KBC Group Investment Policy can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > General exclusion policies for conventional funds and responsible investment funds, Paragraph 2 'KBC Group Investment Policy'.

#### **Nationalisation, bankruptcy or disqualification**

If an issuer of a share in the basket is nationalised, declared bankrupt or no longer meets the selection criteria ('disqualification'), this share will be sold at the last known price before removal. The amount thus realised will then be invested until Maturity at the rate of interest in force on money or bond markets at the moment of removal, and this for a term equal to the term remaining until Maturity of the sub-fund. The realised amount plus the interest will be taken into account at Maturity as the result achieved for that share in order to calculate the final increase in the value of the basket at Maturity.

#### **Volatility of the net asset value**

The volatility of the net asset value may be high due to the composition of the portfolio.

#### **Securities Financing Transactions (SFTs)**

The sub-fund may not lend any financial instruments.

#### **General strategy for hedging the exchange risk**

A more detailed explanation can be found in this report's General information on the Beveik under 'Information for

shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk’.

### **Social, ethical and environmental aspects**

A more detailed explanation can be found in this report's General information on the Bevek under ‘Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects’

## **2.1.4. Financial portfolio management**

The intellectual management, with the exception of the creation of the sub-fund and its maintenance in terms of the technical, product-specific and legal aspects has been delegated by the management company to KBC Fund Management Limited, 4th Floor, Scotch House, 6/7 Burgh Quay, Dublin 2, D02 VK44, Ireland.

## **2.1.5. Distributors**

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

## **2.1.6. Index and benchmark**

Not applicable

## **2.1.7. Policy pursued during the financial year**

### **Composition of the basket on report date**

| <b>Name</b>                | <b>Value</b>  |

## **2.1.8. Summary risk indicator**

- 3 on a scale of 1 (lowest risk) to 7 (highest risk)
- a moderate level of inflation risk: there is no protection against an increase of the inflation.
  - a high level of market risk: the level of the risk reflects the volatility of the stock market and the exchange rate risk in relation to the euro.
  - a high level of performance risk: the level of the risk reflects the volatility of the stock market and the exchange rate risk in relation to the euro.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

## 2.2. Balance sheet

## 2.4.5. Performance figures

BE6357393139

Optimum Fund K&H napjaink CAP

Annual performance from through 28/02/2026 (in HUF)

The cumulative returns are shown where they relate to a period of at least one year.

If the results are expressed in a currency other than the euro, the return may be higher or lower due to exchange rate fluctuations.

## 2.4.6. Costs

### Ongoing Charges:

Not applicable

### Existence of Commission Sharing Agreements

Not applicable

### Fee sharing agreements en rebates

The management company has shared 70.00% of its fee with the distributor, and institutional and/or professional parties.

This percentage has been calculated relative to the fee for managing the investment portfolio of the sub-fund when it was launched.

## 2.4.7. Notes to the financial statements and other data

|                                                                                                          |                                                                                                                                                                                                     |                                                                                                                                                                                                                                                                                                        |

### Fee for managing the investment portfolio

KBC Asset Management NV receives a fee for managing the sub-fund's investments. This fee consists of a varying amount of max. 200 HUF per unit per year (with a maximum of HUF per unit per year for risk management).

This fee, which is calculated every six months, is paid monthly on the last banking day of each month. It can change from one six-month period to the next, within the limits set out below, and is based on the number of units issued at the start of each six-month period.

In the calculation, account is taken of the difference between:

- the return generated by the investments in bonds and other debt instruments, deposits, and/or liquid assets in order to achieve the capital protection on the Maturity date (see *The financial mechanism used to achieve capital protection*), and
- the expenses borne by the sub-fund to achieve a potential return (see *Permitted 'swap' transactions*),
- after deducting the expected fixed and variable expenses of the sub-fund, as mentioned above.

Of this, KBC Fund Management Ltd. receives a fee of no more than 189.50 HUF per unit per year from KBC Asset Management NV for the intellectual management of the sub-fund. KBC Fund Management Ltd. is a wholly owned subsidiary of KBC Asset Management NV.

KBC Asset Management NV has informed the bevek that, if due to the failure of the financial mechanism, the amount that should be paid per unit (after deducting taxes and charges) on the Maturity date, as relevant, is lower than the initial subscription price, KBC Asset Management NV may decide (but is not obliged to) to use the management fee it receives during the current financial year from the sub-fund – and possibly also from other sub-funds of the bevek – to cover this shortfall. This is not a guarantee from KBC Asset Management NV, which may decide at any time and at its own discretion whether or not to use the management fee for this purpose.

KBC Asset Management NV or one of its subsidiaries has also been appointed manager of the SPVs in which the sub-fund may invest (see *Criteria the investments must meet*). KBC Asset Management NV or one of its subsidiaries, as the case may be, receives an annual fee from the relevant SPVs for their management. This management fee may not exceed 0.15% per year and is calculated on the assets managed at the end of the quarter.

The sum of (i) the fee for managing the investment portfolio that the sub-fund pays to the management company and (ii) the management fee that the SPVs in which the sub-fund invests pay to the asset manager, shall never exceed 200.00 HUF per unit per year, as described above.

#### 2.1.2. Stock exchange listing

Not applicable.

#### 2.1.3. Goal and key principles of the investment policy

##### Object of the sub-fund

The object of the sub-fund is twofold (before deducting charges and taxes):

- (1) To repay per share the initial subscription price of 1000 EUR at Maturity (i.e. the capital protection). This capital protection is provided through a financial mechanism that will be explained in more detail under the heading *Capital protection*. However, the capital protection does not apply to shareholders who sell their shares before Maturity.
- (2) To provide a potential return through an investment in swaps. The various types of swaps in which the sub-fund may invest are explained in more detail under the *Potential return*.

##### Capital Protection

###### The financial mechanism used to achieve capital protection

The financial mechanism used to achieve capital protection at Maturity consists of an investment of the total amount of the subscriptions in bonds and other debt instruments, deposits and/or liquid assets (including cash deposited on a time-deposit account or current account). These investments can have different maturities and coupon payment dates. Using the swaps described under the heading *Permitted swap transactions* (2), these investments are matched with the due dates of the obligations of the sub-fund.

###### Criteria the investments must meet

The investments must meet one of the following criteria:

- (1) An investment in deposits and/or debt instruments, placed with or issued by financial institutions under the prudential supervision of and established in a Member State of the European Economic Area.
- (2) An investment in debt instruments issued or guaranteed by a Member State of the European Economic Area.
- (3) An investment under an investment strategy with an analogous structure and identical counterparty risk as a direct investment in deposits and/or debt instruments as stated under (1) and (2) above.

The investments under (3) may consist of:

- (A) An investment in notes listed on a stock exchange that are issued by 'Special Purpose Vehicles' (SPVs).

These SPVs are managed by KBC Asset Management NV or a subsidiary.

The underlying assets of the bonds issued by the SPVs consist of a diversified portfolio of deposits issued by financial institutions, bonds, other debt instruments and financial derivatives. When selecting these underlying assets, account is taken of criteria relating to allocation and creditworthiness (see *Permitted asset classes* and *Characteristics of the bonds and other debt instruments*) in order to limit the counterparty risk.

Further details of the criteria these underlying deposits, bonds, other debt instruments and financial derivatives must meet are provided in the base prospectuses for the SPVs, which can be viewed at or downloaded from [www.kbc.be/prospectus/spv](http://www.kbc.be/prospectus/spv).

Investors are provided with information on the investments made by both the sub-fund and the SPVs in the annual and half-yearly reports on the open-ended investment company under Belgian law (bevek) to which the sub-fund belongs. These reports can also be viewed at or downloaded from [www.kbc.be](http://www.kbc.be).

- (B) An investment in:
- deposits with financial institutions under prudential supervision in the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia and/or
  - debt instruments issued by financial institutions under prudential supervision in the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia and/or
  - debt instruments issued or guaranteed by the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia.

Prudential supervision of financial institutions in the United Kingdom, Switzerland, the United States of America, Japan, Canada and Australia can be equated to prudential supervision of financial institutions in the member states of the European Economic Area.

The investments in debt instruments issued by financial institutions under prudential supervision in the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia or issued or guaranteed by the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia have a minimum credit rating as set out under the heading *Characteristics of the bonds and other debt instruments*.

- (C) The investments may also consist of a combination of the investments specified under (A) and (B).

### **No formal guarantee**

No formal guarantee of repayment of the initial subscription price is provided to the sub-fund or to its shareholders. In other words, the capital protection is not binding for the sub-fund as regards the result generated, although achieving this objective through the operation of the financial mechanism is still the top priority.

If the financial mechanism fails and, as a result, the amount per share payable (before deducting charges and taxes) at Maturity is lower than the initial subscription price, KBC Asset Management NV may decide (but is not obliged) to use the management fee it has received during the current financial year from the sub-fund – and possibly also from other sub-funds of the bevek – to cover the shortfall. This is not a guarantee from KBC Asset Management NV, which may decide at any time and at its own discretion whether or not to use the management fee for this purpose.

The capital protection does not apply to shareholders who sell their shares before Maturity.

### **Potential return**

To achieve a potential return, the sub-fund concludes swaps with one or more prime counterparties. Consequently, the sub-fund transfers a portion of the future income from the investments that were made to achieve capital protection to this counterparty (these counterparties) during the life of the sub-fund. In exchange, the counterparty (counterparties) undertake to provide a potential return as specified under the heading *Selected strategy*.

### **Sub-fund's investment policy**

#### **Permitted asset classes**

Pursuant to the provisions of the Royal Decree of 12 November 2012 on undertakings for collective investment complying with the conditions of Directive 2009/65/EC, the sub-fund may invest in transferable securities (including bonds and other debt instruments), money market instruments, units (shares) in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as and to the extent permitted by the applicable legislation.

The investment limits and restrictions set out in the Royal Decree of 12 November 2012 on undertakings for collective investment complying with the conditions of Directive 2009/65/EC will be respected at all times.

#### **Characteristics of the bonds and other debt instruments**

During the sub-fund's life, the average credit rating of the bonds and other debt instruments shall be at least 'A-' from Standard & Poor's or an equivalent rating from Moody's or Fitch, or, if there is no credit rating available, an average credit risk profile that the manager considers to be at least equivalent.

At the start of the investment, the credit rating of the long-term bonds and other debt instruments shall be at least 'A-' from Standard & Poor's or an equivalent rating from Moody's or Fitch, or, if there is no credit rating available, a credit risk profile that the manager considers to be at least equivalent.

At the start of the investment, the credit rating of the short-term bonds and other debt instruments shall be at least 'A-1' from Standard & Poor's or an equivalent rating from Moody's or Fitch, or, if there is no credit rating available, a credit risk profile that the manager considers to be at least equivalent.

When selecting the bonds and other debt instruments, all maturities are taken into consideration.

### Permitted swap transactions

**The swaps described below have been concluded with a prime counterparty or prime counterparties within the limits laid down by law.**

(1) To achieve a potential return, the sub-fund concludes swaps. Under such swap contracts, the sub-fund transfers a portion of the future income from the investments described under the heading 'Permitted asset classes' to the counterparty or counterparties during the life of the sub-fund. In exchange, the counterparty or counterparties undertake to provide a potential return as specified under the heading *Selected strategy*.

**The swaps under (1) are essential to achieve the sub-fund's investment objectives, since this technique facilitates achievement of the goal of generating a potential return.**

**The sub-fund's risk profile is not affected by the use of these swaps.**

(2) If necessary, the sub-fund also concludes swaps to match the due dates of the commitments of the sub-fund with those of the cash flows stemming from the deposits, bonds and other debt instruments described under the heading *Criteria the investments must meet*.

**These swaps are essential to achieve the sub-fund's investment objectives, since there are not enough bonds and other debt instruments available on the market whose coupon payments and maturity dates always perfectly match the due dates of the sub-fund's obligations.**

**The sub-fund's risk profile is not affected by the use of these swaps.**

(3) In addition, the sub-fund may conclude swaps to protect itself against the credit risk in respect of issuers of bonds and other debt instruments. Through this type of swap, one or more counterparties takes over the risk of an issuer of a bond or other debt instrument in the sub-fund's portfolio defaulting, in exchange for a fee payable by the sub-fund.

**The swaps under (3) serve to hedge the credit risk.**

**The sub-fund's risk profile is not affected by the use of these swaps.**

### Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

### Strategie selected

#### Investment objectives and strategy:

The sub-fund pursues two investment objectives: the repayment of 100% of the initial subscription price at Maturity as well as providing a capital gain consisting of a variable component and a fixed component:

- The variable component depends on the evolution of a basket of 30 shares of a worldwide selection of companies that are characterised by a high market capitalisation and is calculated as follows: If the basket of 30 shares has increased compared to its starting value, 100% of the increase in the basket ( $\text{=(Final Value minus Starting Value) divided by Starting Value}$ ), is settled at 100% of the initial subscription price on the Maturity Date. The variable component amounts to a maximum of 40%. Negative evolutions of the basket are not taken into account.
- The fixed component is independent of the evolution of the basket of 30 shares and amounts to 5% of the initial subscription price.

At Maturity Date, the sum of the variable and fixed components is distributed as a capital gain on top of the initial subscription price. Consequently, the total capital gain amounts to a maximum of 45% (actuarial yield: 7.67% before costs and taxes).

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

### Transparency of adverse sustainability impacts

The sub-fund took into account the principal adverse impacts of its investment decisions on sustainability factors ("PAI") as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on disclosure on sustainability in the financial services sector ("SFDR") through KBC Group's Investment Policy and KBC Group Policy on Blacklisted Companies.

Based on the KBC Group Policy on Blacklisted Companies, all companies on the 'KBC Group Blacklist' (including companies involved in controversial weapons such as those prohibited by Belgian law and white phosphorus weapons) are excluded as well as the worst offenders of the UN Global Compact.

Consequently, the sub-fund took into account exposure to controversial weapons ('indicator 14') by excluding companies dealing with controversial weapon systems, and violations of the principles of the UN Global Compact or the Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises ('indicator 10') by excluding the worst offenders of the UN Global Compact.

### **Maturity**

Friday 28 April 2028 (payment with a value date of D+1 banking day)

### **Currency**

EUR, for all shares in the basket, changes in the value of the currency in which they are expressed relative to EUR are irrelevant.

### **Starting Value**

Value of the basket based on the weighted average of the Value of the shares included in the basket during the first 10 Valuation Days, starting from Friday 21 April 2023 inclusive.

### **End Value**

Value of the basket based on the weighted average of the Value of the shares included in the basket on the last Valuation Day of the month for the last 12 months before Maturity, more specifically from April 2027 through March 2028 (inclusive).

### **Value**

For all the shares, except for those listed on the Milan stock exchange, the closing price, namely the price of a share in the basket as calculated and notified at closing of the stock exchange by the authority of the stock exchange on which the share is listed (or its legal successor). The reference price is used for shares listed on the Milan stock exchange.

### **Valuation day**

A Valuation Day is set separately for each share in the basket.

A Valuation Day is a day that is a planned trading day both

- i) for the stock exchange on which the share is listed and
- ii) for the stock exchange whose activities have a substantial influence on the trading of options and futures on the share concerned

hereinafter referred to as 'the stock exchanges concerned'.

If on the Valuation Day,

- a) one of the stock exchanges concerned is unexpectedly closed or
- b) there is an event that disrupts the market for a stock exchange concerned or
- c) one of the stock exchanges concerned closes early,

the original Valuation Day is replaced by the following trading day when no event as referred to in a), b) or c) above occurs. An extraordinary closure that has been announced in advance is not considered as early closure.

If a valuation is made on consecutive Valuation Days, the trading day that replaces the original Valuation Day (i) may not coincide with another original Valuation Day and (ii) may not be a trading day that already replaces another original Valuation Day.

However, if an event as referred to under a), b) or c) above occurs on each of the eight trading days following the original Valuation Day,

- (i) the eighth trading day shall be considered as the original Valuation Day and
- (ii) the Bevek shall assess, in good faith and in consultation with the prime counterparty or counterparties with which it has concluded a swap agreement, the price of the share as it would have been traded on that eighth trading day and
- (iii) the Bevek will notify shareholders of any changes regarding setting the Starting Value and/or End Value and conditions of payment.

### Relevant basket

In the table below, the columns from left to right reflect the number of the share, the name of the share, the Bloomberg code, the exchange on which it trades (City-MIC Code) and its initial weighting in the basket.

| (i) | Name                             | Bloomberg Code  | Exchange         | Initial Weighting Coefficients |
|-----|----------------------------------|-----------------|------------------|--------------------------------|
| 1   | ALLIANZ SE                       | ALV GY Equity   | FRANKFURT - XETR | 2.0000%                        |
| 2   | ASSICURAZIONI GENERALI           | G IM Equity     | MILANO - MTAA    | 2.0000%                        |
| 3   | AXA SA                           | CS FP Equity    | PARIS - XPAR     | 2.0000%                        |

### Basket composition methodology

KBC Asset Management used the following methodology to determine the composition of the sub-fund's basket.

#### Step 1 :

The starting point is the global equities universe from which a selection of potential investments is derived in accordance with the economic criteria for the composition of the basket and subject to restrictions regarding stock market capitalisation and liquid assets.

The economic criteria for the composition of the basket determine the size of the final selection.

#### Step 2 :

The selection of shares obtained in step 1 is reduced to a short list using a quantitative selection based on past financial data. The shares selected are those of companies that achieve a good score in terms of management quality, a healthy balance-sheet structure and a positive trend in profitability.

#### Step 3 :

The selection of shares obtained in step 2 is then verified by KBC Asset Management analysts. Shares that are permanently monitored by the analysts and those for which there is a negative recommendation, when the product is launched, are then withdrawn from the selection.

#### Step 4 :

The last reduction of the selection provides the final basket. This selection was made using the technical parameters of options (including the term, volatility, dividend yield and interest rate).

The final basket must satisfy the legal requirements concerning the quantity of shares and adequate distribution in the weighting. In addition, care is taken to ensure compliance with the geographical and/or sector spread. The analysts make a qualitative assessment of each share used taking account of specific knowledge of these shares and the sectors/regions from which they come, in accordance with the term of the sub-fund.

For the sub-fund Optimum Fund World Fix 100-1, about 1586 equities were selected during step 1.

The initial selection was reduced by a maximum 20% in step 2.

This was again reduced by 10% (indicative) in step 3. The final basket set up during step 4 is described above under *Relevant basket*. This basket makes it possible to offer the sub-fund Optimum Fund World Fix 100-1 under the conditions set out in the investment policy referred to above. Here the selection process uses parameters that could affect the potential return on the investments.

#### *Selection criteria for the basket :*

A share/issuer may only form part of the basket if (i) it is listed on a stock exchange, (ii) it has a high market capitalisation, (iii) the Board of Directors of the Beveik has approved its inclusion in the basket, (iv) the issuer is not included in the KBC Group Policy on Blacklisted Companies\* and (v) at the time the swap contracts are being concluded (see 'Permitted swap transactions'), the issuer of the share complies with the KBC Group Investment Policy\* (the 'Selection criteria').

\* The KBC Group Policy on Blacklisted Companies and the KBC Group Investment Policy can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > General exclusion policies for conventional funds and socially responsible investment funds, Paragraph 1 'KBC Group Policy on Blacklisted Companies' and 2 'KBC Group Investment Policy'.

### **Modifications to the basket due to mergers, acquisitions, demergers, nationalisation, bankruptcy or disqualification :**

#### **Mergers or acquisitions**

If, during the life of the sub-fund, one or more issuers of shares in the basket are involved in a merger or acquisition, the shares of the relevant issuers which still meet the selection criteria and comply with the KBC Group Investment Policy\* after these operations will be given a weighting in the basket equal to the sum of the weightings of the shares of all issuers involved in the operation. If, after the operation, none of the issuers involved in the operation meet the selection criteria or comply with the KBC Group Investment Policy\*, the procedures described under 'Nationalisation, bankruptcy or disqualification' will apply.

\* The KBC Group Investment Policy can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > General exclusion policies for conventional funds and responsible investment funds, Paragraph 2 'KBC Group Investment Policy'.

#### **Demergers**

If an issuer of a share in the basket proceeds to a demerger, then the share from the issuer concerned can be substituted either by one of the shares that came about as a result of the demerger and that meets the selection criteria and complies with the KBC Group Investment Policy\*, or by a basket of shares arising from the demerger which meet the selection criteria and comply with the KBC Group Investment Policy\*. This basket of shares will, when calculating the number of shares in the basket, be considered as one share. If, after the operation, none of the shares resulting from the demerger meet the selection criteria or comply with the KBC Group Investment Policy\*, the procedures described under 'Nationalisation, bankruptcy or disqualification' will apply.

\* The KBC Group Investment Policy can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > General exclusion policies for conventional funds and responsible investment funds, Paragraph 2 'KBC Group Investment Policy'.

#### **Nationalisation, bankruptcy or disqualification**

If an issuer of a share in the basket is nationalised, declared bankrupt or no longer meets the selection criteria ('disqualification'), this share will be sold at the last known price before removal. The amount thus realised will then be invested until Maturity at the rate of interest in force on money or bond markets at the moment of removal, and this for a term equal to the term remaining until Maturity of the sub-fund. The realised amount plus the interest will be taken into account at Maturity as the result achieved for that share in order to calculate the final increase in the value of the basket at Maturity.

### **Securities Financing Transactions (SFTs)**

**The sub-fund may not lend any financial instruments.**

#### **General strategy for hedging the exchange risk**

A more detailed explanation can be found in this report's General information on the Beveik under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

#### **Social, ethical and environmental aspects**

A more detailed explanation can be found in this report's General information on the Beveik under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'.

## 2.1.4. Financial portfolio management

The intellectual management, with the exception of the creation of the sub-fund and its maintenance in terms of the technical, product-specific and legal aspects has been delegated by the management company to KBC Fund Management Limited, 4th Floor, Scotch House, 6/7 Burgh Quay, Dublin 2, D02 VK44, Ireland.

## 2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

## 2.1.6. Index and benchmark

Not applicable

## 2.1.7. Policy pursued during the financial year

### *Composition of the basket on report date*

| <b>Name</b>                      | <b>Value</b>  |

### **2.1.8. Summary risk indicator**

- 2 on a scale of 1 (lowest risk) to 7 (highest risk)
- a moderate level of inflation risk: there is no protection against an increase of the inflation.
  - a moderate level of market risk: the level of the risk reflects the volatility of the stock market.
  - a moderate level of performance risk: the level of the risk reflects the volatility of the stock market.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

## 2.2. Balance sheet

| Balance sheet layout |                                                                   | 28/02/2026<br>(in Euro) | 28/02/2025<br>(in Euro) |

|---------|--------------|--------------|------------------|---------------|------------------|---------------|------------------|---------------|------------------|---------------|------------------|------------------|
|         |              |              | Share<br>classes | Bench<br>mark | Share<br>classes | Bench<br>mark | Share<br>classes | Bench<br>mark | Share<br>classes | Bench<br>mark | Starting<br>date | Share<br>classes |
| CAP     | BE6340030137 | EUR          | 10.76%           |               |                  |               |                  |               |                  |               | 14/04/2023       | 10.96%           |

Risk warning: Past performance is not a guide to future performance.

\* Return on annual basis.

- The bar chart shows the performance for full financial years(period of 12 months prior to the half-yearly closing).
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage.
- Calculation method for date D, where NAV stands for net asset value:  
Capitalisation units (CAP)  
Return on date D over a period of X years :  

$$[\text{NIW}(\text{D}) / \text{NIW}(\text{Y})] ^ {1 / \text{X}} - 1$$
 where Y = D-X  
 Return on date D since the start date S of the unit:  

$$[\text{NIW}(\text{D}) / \text{NIW}(\text{S})] ^ {1 / \text{F}} - 1$$
 where F = 1 if the unit has existed for less than one year on date D  
 where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D
- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation shares.

## 2.4.6. Costs

### Ongoing Charges:

Management fees and other administrative or operating costs: 0,946%  
Transaction costs: 0,000%

Percentage calculated at reporting date: 28 February 2026 (period of 12 months prior to the half-yearly closing).

A more detailed explanation with respect to the method of calculating ongoing charges and the relevant exclusions can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.5. Ongoing charges'

### Existence of Commission Sharing Agreements

Not applicable

### Fee sharing agreements en rebates

The management company has shared 60.00% of its fee with the distributor, and institutional and/or professional parties.

This percentage has been calculated relative to the fee for managing the investment portfolio of the sub-fund when it was launched.

## 2.4.7. Notes to the financial statements and other data

### Fee for managing the investment portfolio

KBC Asset Management NV receives a fee for managing the sub-fund's investments. This fee consists of a varying amount of max. 20 EUR per unit per year (with a maximum of EUR per unit per year for risk management).

This fee, which is calculated every six months, is paid monthly on the last banking day of each month. It can change from one six-month period to the next, within the limits set out below, and is based on the number of units issued at the start of each six-month period.

In the calculation, account is taken of the difference between:

- the return generated by the investments in bonds and other debt instruments, deposits, and/or liquid assets in order to achieve the capital protection on the Maturity date (see *The financial mechanism used to achieve capital protection*), and
- the expenses borne by the sub-fund to achieve a potential return (see *Permitted 'swap' transactions*),
- after deducting the expected fixed and variable expenses of the sub-fund, as mentioned above.

Of this, KBC Fund Management Ltd. receives a fee of no more than 18.95 EUR per unit per year from KBC Asset Management NV for the intellectual management of the sub-fund. KBC Fund Management Ltd. is a wholly owned subsidiary of KBC Asset Management NV.

KBC Asset Management NV has informed the bevek that, if due to the failure of the financial mechanism, the amount that should be paid per unit (after deducting taxes and charges) on the Maturity date, as relevant, is lower than the initial subscription price, KBC Asset Management NV may decide (but is not obliged to) to use the management fee it receives during the current financial year from the sub-fund – and possibly also from other sub-funds of the bevek – to cover this shortfall. This is not a guarantee from KBC Asset Management NV, which may

decide at any time and at its own discretion whether or not to use the management fee for this purpose. KBC Asset Management NV or one of its subsidiaries has also been appointed manager of the SPVs in which the sub-fund may invest (see *Criteria the investments must meet*). KBC Asset Management NV or one of its subsidiaries, as the case may be, receives an annual fee from the relevant SPVs for their management. This management fee may not exceed 0.15% per year and is calculated on the assets managed at the end of the quarter.

The sum of (i) the fee for managing the investment portfolio that the sub-fund pays to the management company and (ii) the management fee that the SPVs in which the sub-fund invests pay to the asset manager, shall never exceed 20.00 EUR per unit per year, as described above.

#### 2.1.2. Stock exchange listing

Not applicable.

#### 2.1.3. Goal and key principles of the investment policy

##### Object of the sub-fund

The object of the sub-fund is twofold (before deducting charges and taxes):

- (1) To repay per share the initial subscription price of 1000 EUR at Maturity (i.e. the capital protection). This capital protection is provided through a financial mechanism that will be explained in more detail under the heading *Capital protection*. However, the capital protection does not apply to shareholders who sell their shares before Maturity.
- (2) To provide a potential return through an investment in swaps. The various types of swaps in which the sub-fund may invest are explained in more detail under the *Potential return*.

##### Capital Protection

###### The financial mechanism used to achieve capital protection

The financial mechanism used to achieve capital protection at Maturity consists of an investment of the total amount of the subscriptions in bonds and other debt instruments, deposits and/or liquid assets (including cash deposited on a time-deposit account or current account). These investments can have different maturities and coupon payment dates. Using the swaps described under the heading *Permitted swap transactions* (2), these investments are matched with the due dates of the obligations of the sub-fund.

###### Criteria the investments must meet

The investments must meet one of the following criteria:

- (1) An investment in deposits and/or debt instruments, placed with or issued by financial institutions under the prudential supervision of and established in a Member State of the European Economic Area.
- (2) An investment in debt instruments issued or guaranteed by a Member State of the European Economic Area.
- (3) An investment under an investment strategy with an analogous structure and identical counterparty risk as a direct investment in deposits and/or debt instruments as stated under (1) and (2) above.

The investments under (3) may consist of:

- (A) An investment in notes listed on a stock exchange that are issued by 'Special Purpose Vehicles' (SPVs).

These SPVs are managed by KBC Asset Management NV or a subsidiary.

The underlying assets of the bonds issued by the SPVs consist of a diversified portfolio of deposits issued by financial institutions, bonds, other debt instruments and financial derivatives. When selecting these underlying assets, account is taken of criteria relating to allocation and creditworthiness (see *Permitted asset classes* and *Characteristics of the bonds and other debt instruments*) in order to limit the counterparty risk.

Further details of the criteria these underlying deposits, bonds, other debt instruments and financial derivatives must meet are provided in the base prospectuses for the SPVs, which can be viewed at or downloaded from [www.kbc.be/prospectus/spv](http://www.kbc.be/prospectus/spv).

Investors are provided with information on the investments made by both the sub-fund and the SPVs in the annual and half-yearly reports on the open-ended investment company under Belgian law (bevek) to which the sub-fund belongs. These reports can also be viewed at or downloaded from [www.kbc.be](http://www.kbc.be).

- (B) An investment in:
- deposits with financial institutions under prudential supervision in the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia and/or
  - debt instruments issued by financial institutions under prudential supervision in the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia and/or
  - debt instruments issued or guaranteed by the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia.

Prudential supervision of financial institutions in the United Kingdom, Switzerland, the United States of America, Japan, Canada and Australia can be equated to prudential supervision of financial institutions in the member states of the European Economic Area.

The investments in debt instruments issued by financial institutions under prudential supervision in the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia or issued or guaranteed by the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia have a minimum credit rating as set out under the heading *Characteristics of the bonds and other debt instruments*.

- (C) The investments may also consist of a combination of the investments specified under (A) and (B).

### **No formal guarantee**

No formal guarantee of repayment of the initial subscription price is provided to the sub-fund or to its shareholders. In other words, the capital protection is not binding for the sub-fund as regards the result generated, although achieving this objective through the operation of the financial mechanism is still the top priority.

If the financial mechanism fails and, as a result, the amount per share payable (before deducting charges and taxes) at Maturity is lower than the initial subscription price, KBC Asset Management NV may decide (but is not obliged) to use the management fee it has received during the current financial year from the sub-fund – and possibly also from other sub-funds of the bevek – to cover the shortfall. This is not a guarantee from KBC Asset Management NV, which may decide at any time and at its own discretion whether or not to use the management fee for this purpose.

The capital protection does not apply to shareholders who sell their shares before Maturity.

### **Potential return**

To achieve a potential return, the sub-fund concludes swaps with one or more prime counterparties. Consequently, the sub-fund transfers a portion of the future income from the investments that were made to achieve capital protection to this counterparty (these counterparties) during the life of the sub-fund. In exchange, the counterparty (counterparties) undertake to provide a potential return as specified under the heading *Selected strategy*.

### **Sub-fund's investment policy**

#### **Permitted asset classes**

Pursuant to the provisions of the Royal Decree of 12 November 2012 on undertakings for collective investment complying with the conditions of Directive 2009/65/EC, the sub-fund may invest in transferable securities (including bonds and other debt instruments), money market instruments, units (shares) in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as and to the extent permitted by the applicable legislation.

The investment limits and restrictions set out in the Royal Decree of 12 November 2012 on undertakings for collective investment complying with the conditions of Directive 2009/65/EC will be respected at all times.

### **Characteristics of the bonds and other debt instruments**

During the sub-fund's life, the average credit rating of the bonds and other debt instruments shall be at least 'A-' from Standard & Poor's or an equivalent rating from Moody's or Fitch, or, if there is no credit rating available, an average credit risk profile that the manager considers to be at least equivalent.

At the start of the investment, the credit rating of the long-term bonds and other debt instruments shall be at least 'A-' from Standard & Poor's or an equivalent rating from Moody's or Fitch, or, if there is no credit rating available, a credit risk profile that the manager considers to be at least equivalent.

At the start of the investment, the credit rating of the short-term bonds and other debt instruments shall be at least 'A-1' from Standard & Poor's or an equivalent rating from Moody's or Fitch, or, if there is no credit rating available, a credit risk profile that the manager considers to be at least equivalent.

When selecting the bonds and other debt instruments, all maturities are taken into consideration.

### Permitted swap transactions

**The swaps described below have been concluded with a prime counterparty or prime counterparties within the limits laid down by law.**

(1) To achieve a potential return, the sub-fund concludes swaps. Under such swap contracts, the sub-fund transfers a portion of the future income from the investments described under the heading 'Permitted asset classes' to the counterparty or counterparties during the life of the sub-fund. In exchange, the counterparty or counterparties undertake to provide a potential return as specified under the heading *Selected strategy*.

**The swaps under (1) are essential to achieve the sub-fund's investment objectives, since this technique facilitates achievement of the goal of generating a potential return.**

**The sub-fund's risk profile is not affected by the use of these swaps.**

(2) If necessary, the sub-fund also concludes swaps to match the due dates of the commitments of the sub-fund with those of the cash flows stemming from the deposits, bonds and other debt instruments described under the heading *Criteria the investments must meet*.

**These swaps are essential to achieve the sub-fund's investment objectives, since there are not enough bonds and other debt instruments available on the market whose coupon payments and maturity dates always perfectly match the due dates of the sub-fund's obligations.**

**The sub-fund's risk profile is not affected by the use of these swaps.**

(3) In addition, the sub-fund may conclude swaps to protect itself against the credit risk in respect of issuers of bonds and other debt instruments. Through this type of swap, one or more counterparties takes over the risk of an issuer of a bond or other debt instrument in the sub-fund's portfolio defaulting, in exchange for a fee payable by the sub-fund.

**The swaps under (3) serve to hedge the credit risk.**

**The sub-fund's risk profile is not affected by the use of these swaps.**

### Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

### Strategie selected

#### Investment objectives and strategy:

The sub-fund has two investment objectives: firstly, it seeks to repay at Maturity 100% of the initial subscription price and secondly a possible capital gain that is contingent on the evolution of a basket of 30 shares of a worldwide selection of companies that are characterised by a high market capitalisation.

At Maturity, a capital gain will be distributed that will equal the best of two alternatives:

- on the one hand 9.00%, settled at 100% of the initial subscription price;
- on the other hand 100% of the increase in the basket of 30 shares, settled at 100% of the initial subscription price, where the maximum capital gain will be 40%. The evolution of the basket is calculated as follows: [end value of the basket minus the starting value of the basket], divided by the starting value of the basket. Decreases in the basket are not taken into account.

Consequently, the capital gain at the Maturity Date will be at least 9.00% (yield to maturity: 1.69% before fees and taxes) and maximum 40% (yield to maturity: 6.79% before costs and taxes).

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

### Transparency of adverse sustainability impacts

The sub-fund took into account the principal adverse impacts of its investment decisions on sustainability factors ("PAI") as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on disclosure on sustainability in the financial services sector ("SFDR") through KBC Group's Investment Policy and KBC Group Policy on Blacklisted Companies.

Based on the KBC Group Policy on Blacklisted Companies, all companies on the 'KBC Group Blacklist' (including companies involved in controversial weapons such as those prohibited by Belgian law and white phosphorus weapons) are excluded as well as the worst offenders of the UN Global Compact.

Consequently, the sub-fund took into account exposure to controversial weapons ('indicator 14') by excluding companies dealing with controversial weapon systems, and violations of the principles of the UN Global Compact or the Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises ('indicator 10') by excluding the worst offenders of the UN Global Compact.

## **Maturity**

Tuesday 31 October 2028 (payment with a value date of D+1 banking day)

## **Currency**

EUR, for all shares in the basket, changes in the value of the currency in which they are expressed relative to EUR are irrelevant.

## **Starting Value**

Value of the basket based on the weighted average of the Value of the shares included in the basket during the first 10 Valuation Days, starting from Monday 18 September 2023 inclusive.

## **End Value**

Value of the basket based on the weighted average of the Value of the shares included in the basket on the last Valuation Day of the month for the last 12 months before Maturity, more specifically from October 2027 through September 2028 (inclusive).

## **Value**

For all the shares, except for those listed on the Milan stock exchange, the closing price, namely the price of a share in the basket as calculated and notified at closing of the stock exchange by the authority of the stock exchange on which the share is listed (or its legal successor). The reference price is used for shares listed on the Milan stock exchange.

## **Valuation day**

A Valuation Day is set separately for each share in the basket.

A Valuation Day is a day that is a planned trading day both

- i) for the stock exchange on which the share is listed and
- ii) for the stock exchange whose activities have a substantial influence on the trading of options and futures on the share concerned

hereinafter referred to as 'the stock exchanges concerned'.

If on the Valuation Day,

- a) one of the stock exchanges concerned is unexpectedly closed or
- b) there is an event that disrupts the market for a stock exchange concerned or
- c) one of the stock exchanges concerned closes early,

the original Valuation Day is replaced by the following trading day when no event as referred to in a), b) or c) above occurs. An extraordinary closure that has been announced in advance is not considered as early closure.

If a valuation is made on consecutive Valuation Days, the trading day that replaces the original Valuation Day (i) may not coincide with another original Valuation Day and (ii) may not be a trading day that already replaces another original Valuation Day.

However, if an event as referred to under a), b) or c) above occurs on each of the eight trading days following the original Valuation Day,

- (i) the eighth trading day shall be considered as the original Valuation Day and
- (ii) the Bevek shall assess, in good faith and in consultation with the prime counterparty or counterparties with which it has concluded a swap agreement, the price of the share as it would have been traded on that eighth trading day and
- (iii) the Bevek will notify shareholders of any changes regarding setting the Starting Value and/or End Value and conditions of payment.

### Relevant basket

In the table below, the columns from left to right reflect the number of the share, the name of the share, the Bloomberg code, the exchange on which it trades (City-MIC Code) and its initial weighting in the basket.

| (i) | Name                             | Bloomberg Code  | Exchange         | Initial Weighting Coefficients |

### Basket composition methodology

KBC Asset Management used the following methodology to determine the composition of the sub-fund's basket.

#### Step 1 :

The starting point is the global equities universe from which a selection of potential investments is derived in accordance with the economic criteria for the composition of the basket and subject to restrictions regarding stock market capitalisation and liquid assets.

The economic criteria for the composition of the basket determine the size of the final selection.

#### Step 2 :

The selection of shares obtained in step 1 is reduced to a short list using a quantitative selection based on past financial data. The shares selected are those of companies that achieve a good score in terms of management quality, a healthy balance-sheet structure and a positive trend in profitability.

#### Step 3 :

The selection of shares obtained in step 2 is then verified by KBC Asset Management analysts. Shares that are permanently monitored by the analysts and those for which there is a negative recommendation, when the product is launched, are then withdrawn from the selection.

#### Step 4 :

The last reduction of the selection provides the final basket. This selection was made using the technical parameters of options (including the term, volatility, dividend yield and interest rate).

The final basket must satisfy the legal requirements concerning the quantity of shares and adequate distribution in the weighting. In addition, care is taken to ensure compliance with the geographical and/or sector spread. The analysts make a qualitative assessment of each share used taking account of specific knowledge of these shares and the sectors/regions from which they come, in accordance with the term of the sub-fund.

For the sub-fund Optimum Fund World Fix 100-2, about 1586 equities were selected during step 1.

The initial selection was reduced by a maximum 20% in step 2.

This was again reduced by 10% (indicative) in step 3. The final basket set up during step 4 is described above under *Relevant basket*. This basket makes it possible to offer the sub-fund Optimum Fund World Fix 100-2 under the conditions set out in the investment policy referred to above. Here the selection process uses parameters that could affect the potential return on the investments.

#### *Selection criteria for the basket :*

A share/issuer may only form part of the basket if (i) it is listed on a stock exchange, (ii) it has a high market capitalisation, (iii) the Board of Directors of the Beveik has approved its inclusion in the basket, (iv) the issuer is not included in the KBC Group Policy on Blacklisted Companies\* and (v) at the time the swap contracts are being concluded (see 'Permitted swap transactions'), the issuer of the share complies with the KBC Group Investment Policy\* (the 'Selection criteria').

\* The KBC Group Policy on Blacklisted Companies and the KBC Group Investment Policy can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > General exclusion policies for conventional funds and socially responsible investment funds, Paragraph 1 'KBC Group Policy on Blacklisted Companies' and 2 'KBC Group Investment Policy'.

### **Modifications to the basket due to mergers, acquisitions, demergers, nationalisation, bankruptcy or disqualification :**

#### **Mergers or acquisitions**

If, during the life of the sub-fund, one or more issuers of shares in the basket are involved in a merger or acquisition, the shares of the relevant issuers which still meet the selection criteria and comply with the KBC Group Investment Policy\* after these operations will be given a weighting in the basket equal to the sum of the weightings of the shares of all issuers involved in the operation. If, after the operation, none of the issuers involved in the operation meet the selection criteria or comply with the KBC Group Investment Policy\*, the procedures described under 'Nationalisation, bankruptcy or disqualification' will apply.

\* The KBC Group Investment Policy can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > General exclusion policies for conventional funds and responsible investment funds, Paragraph 2 'KBC Group Investment Policy'.

#### **Demergers**

If an issuer of a share in the basket proceeds to a demerger, then the share from the issuer concerned can be substituted either by one of the shares that came about as a result of the demerger and that meets the selection criteria and complies with the KBC Group Investment Policy\*, or by a basket of shares arising from the demerger which meet the selection criteria and comply with the KBC Group Investment Policy\*. This basket of shares will, when calculating the number of shares in the basket, be considered as one share. If, after the operation, none of the shares resulting from the demerger meet the selection criteria or comply with the KBC Group Investment Policy\*, the procedures described under 'Nationalisation, bankruptcy or disqualification' will apply.

\* The KBC Group Investment Policy can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > General exclusion policies for conventional funds and responsible investment funds, Paragraph 2 'KBC Group Investment Policy'.

#### **Nationalisation, bankruptcy or disqualification**

If an issuer of a share in the basket is nationalised, declared bankrupt or no longer meets the selection criteria ('disqualification'), this share will be sold at the last known price before removal. The amount thus realised will then be invested until Maturity at the rate of interest in force on money or bond markets at the moment of removal, and this for a term equal to the term remaining until Maturity of the sub-fund. The realised amount plus the interest will be taken into account at Maturity as the result achieved for that share in order to calculate the final increase in the value of the basket at Maturity.

### **Securities Financing Transactions (SFTs)**

**The sub-fund may not lend any financial instruments.**

#### **General strategy for hedging the exchange risk**

A more detailed explanation can be found in this report's General information on the Beveik under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

#### **Social, ethical and environmental aspects**

A more detailed explanation can be found in this report's General information on the Beveik under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'.

## 2.1.4. Financial portfolio management

The intellectual management, with the exception of the creation of the sub-fund and its maintenance in terms of the technical, product-specific and legal aspects has been delegated by the management company to KBC Fund Management Limited, 4th Floor, Scotch House, 6/7 Burgh Quay, Dublin 2, D02 VK44, Ireland.

## 2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

## 2.1.6. Index and benchmark

Not applicable

## 2.1.7. Policy pursued during the financial year

### **2.1.8. Summary risk indicator**

- 2 on a scale of 1 (lowest risk) to 7 (highest risk)
- a moderate level of inflation risk: there is no protection against an increase of the inflation.
  - a moderate level of market risk: the level of the risk reflects the volatility of the stock market.
  - a moderate level of performance risk: the level of the risk reflects the volatility of the stock market.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

## 2.2. Balance sheet

| Balance sheet layout    |                                                                   | 28/02/2026<br>(in Euro) | 28/02/2025<br>(in Euro) |

## 2.4.5. Performance figures

| Cap Div | ISIN Code    | Curr ency | 1 year        |            | 3 years       |            | 5 years       |            | 10 years      |            | Since Launch* |               |
|---------|--------------|-----------|---------------|------------|---------------|------------|---------------|------------|---------------|------------|---------------|---------------|
|         |              |           | Share classes | Bench mark | Share classes | Bench mark | Share classes | Bench mark | Share classes | Bench mark | Starting date | Share classes |
| CAP     | BE6343954572 | EUR       | 10.00%        |            |               |            |               |            |               |            | 11/09/2023    | 10.77%        |

Risk warning: Past performance is not a guide to future performance.

\* Return on annual basis.

- The bar chart shows the performance for full financial years(period of 12 months prior to the half-yearly closing).
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage.
- Calculation method for date D, where NAV stands for net asset value:  
Capitalisation units (CAP)  
 Return on date D over a period of X years :  

$$[\text{NIW}(\text{D}) / \text{NIW}(\text{Y})] ^ {1 / \text{X}} - 1$$
 where Y = D-X  
 Return on date D since the start date S of the unit:  

$$[\text{NIW}(\text{D}) / \text{NIW}(\text{S})] ^ {1 / \text{F}} - 1$$
 where F = 1 if the unit has existed for less than one year on date D  
 where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D
- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation shares.

## 2.4.6. Costs

### Ongoing Charges:

Management fees and other administrative or operating costs: 1,005%  
Transaction costs: 0,000%

Percentage calculated at reporting date: 28 February 2026 (period of 12 months prior to the half-yearly closing).

A more detailed explanation with respect to the method of calculating ongoing charges and the relevant exclusions can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.5. Ongoing charges'

### Existence of Commission Sharing Agreements

Not applicable

### Fee sharing agreements en rebates

The management company has shared 60.00% of its fee with the distributor, and institutional and/or professional parties.

This percentage has been calculated relative to the fee for managing the investment portfolio of the sub-fund when it was launched.

## 2.4.7. Notes to the financial statements and other data

|                                                                                                          |                                                                                                                                                                                                     |                                                                                                                                                                                                                                                                                                        |

### Fee for managing the investment portfolio

KBC Asset Management NV receives a fee for managing the sub-fund's investments. This fee consists of a varying amount of max. 20 EUR per unit per year (with a maximum of EUR per unit per year for risk management).

This fee, which is calculated every six months, is paid monthly on the last banking day of each month. It can change from one six-month period to the next, within the limits set out below, and is based on the number of units issued at the start of each six-month period.

In the calculation, account is taken of the difference between:

- the return generated by the investments in bonds and other debt instruments, deposits, and/or liquid assets in order to achieve the capital protection on the Maturity date (see *The financial mechanism used to achieve capital protection*), and
- the expenses borne by the sub-fund to achieve a potential return (see *Permitted 'swap' transactions*),
- after deducting the expected fixed and variable expenses of the sub-fund, as mentioned above.

Of this, KBC Fund Management Ltd. receives a fee of no more than 18.95 EUR per unit per year from KBC Asset Management NV for the intellectual management of the sub-fund. KBC Fund Management Ltd. is a wholly owned subsidiary of KBC Asset Management NV.

KBC Asset Management NV has informed the bevek that, if due to the failure of the financial mechanism, the amount that should be paid per unit (after deducting taxes and charges) on the Maturity date, as relevant, is lower than the initial subscription price, KBC Asset Management NV may decide (but is not obliged to) to use the management fee it receives during the current financial year from the sub-fund – and possibly also from other sub-funds of the bevek – to cover this shortfall. This is not a guarantee from KBC Asset Management NV, which may

decide at any time and at its own discretion whether or not to use the management fee for this purpose. KBC Asset Management NV or one of its subsidiaries has also been appointed manager of the SPVs in which the sub-fund may invest (see *Criteria the investments must meet*). KBC Asset Management NV or one of its subsidiaries, as the case may be, receives an annual fee from the relevant SPVs for their management. This management fee may not exceed 0.15% per year and is calculated on the assets managed at the end of the quarter.

The sum of (i) the fee for managing the investment portfolio that the sub-fund pays to the management company and (ii) the management fee that the SPVs in which the sub-fund invests pay to the asset manager, shall never exceed 20.00 EUR per unit per year, as described above.

#### 2.1.2. Stock exchange listing

Not applicable.

#### 2.1.3. Goal and key principles of the investment policy

##### Object of the sub-fund

The object of the sub-fund is twofold (before deducting charges and taxes):

- (1) To repay per share the initial subscription price of 1000 EUR at Maturity (i.e. the capital protection). This capital protection is provided through a financial mechanism that will be explained in more detail under the heading *Capital protection*. However, the capital protection does not apply to shareholders who sell their shares before Maturity.
- (2) To provide a potential return through an investment in swaps. The various types of swaps in which the sub-fund may invest are explained in more detail under the *Potential return*.

##### Capital Protection

###### The financial mechanism used to achieve capital protection

The financial mechanism used to achieve capital protection at Maturity consists of an investment of the total amount of the subscriptions in bonds and other debt instruments, deposits and/or liquid assets (including cash deposited on a time-deposit account or current account). These investments can have different maturities and coupon payment dates. Using the swaps described under the heading *Permitted swap transactions* (2), these investments are matched with the due dates of the obligations of the sub-fund.

###### Criteria the investments must meet

The investments must meet one of the following criteria:

- (1) An investment in deposits and/or debt instruments, placed with or issued by financial institutions under the prudential supervision of and established in a Member State of the European Economic Area.
- (2) An investment in debt instruments issued or guaranteed by a Member State of the European Economic Area.
- (3) An investment under an investment strategy with an analogous structure and identical counterparty risk as a direct investment in deposits and/or debt instruments as stated under (1) and (2) above.

The investments under (3) may consist of:

- (A) An investment in notes listed on a stock exchange that are issued by 'Special Purpose Vehicles' (SPVs).

These SPVs are managed by KBC Asset Management NV or a subsidiary.

The underlying assets of the bonds issued by the SPVs consist of a diversified portfolio of deposits issued by financial institutions, bonds, other debt instruments and financial derivatives. When selecting these underlying assets, account is taken of criteria relating to allocation and creditworthiness (see *Permitted asset classes* and *Characteristics of the bonds and other debt instruments*) in order to limit the counterparty risk.

Further details of the criteria these underlying deposits, bonds, other debt instruments and financial derivatives must meet are provided in the base prospectuses for the SPVs, which can be viewed at or downloaded from [www.kbc.be/prospectus/spv](http://www.kbc.be/prospectus/spv).

Investors are provided with information on the investments made by both the sub-fund and the SPVs in the annual and half-yearly reports on the open-ended investment company under Belgian law (bevek) to which the sub-fund belongs. These reports can also be viewed at or downloaded from [www.kbc.be](http://www.kbc.be).

- (B) An investment in:
- deposits with financial institutions under prudential supervision in the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia and/or
  - debt instruments issued by financial institutions under prudential supervision in the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia and/or
  - debt instruments issued or guaranteed by the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia.

Prudential supervision of financial institutions in the United Kingdom, Switzerland, the United States of America, Japan, Canada and Australia can be equated to prudential supervision of financial institutions in the member states of the European Economic Area.

The investments in debt instruments issued by financial institutions under prudential supervision in the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia or issued or guaranteed by the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia have a minimum credit rating as set out under the heading *Characteristics of the bonds and other debt instruments*.

- (C) The investments may also consist of a combination of the investments specified under (A) and (B).

### **No formal guarantee**

No formal guarantee of repayment of the initial subscription price is provided to the sub-fund or to its shareholders. In other words, the capital protection is not binding for the sub-fund as regards the result generated, although achieving this objective through the operation of the financial mechanism is still the top priority.

If the financial mechanism fails and, as a result, the amount per share payable (before deducting charges and taxes) at Maturity is lower than the initial subscription price, KBC Asset Management NV may decide (but is not obliged) to use the management fee it has received during the current financial year from the sub-fund – and possibly also from other sub-funds of the bevek – to cover the shortfall. This is not a guarantee from KBC Asset Management NV, which may decide at any time and at its own discretion whether or not to use the management fee for this purpose.

The capital protection does not apply to shareholders who sell their shares before Maturity.

### **Potential return**

To achieve a potential return, the sub-fund concludes swaps with one or more prime counterparties. Consequently, the sub-fund transfers a portion of the future income from the investments that were made to achieve capital protection to this counterparty (these counterparties) during the life of the sub-fund. In exchange, the counterparty (counterparties) undertake to provide a potential return as specified under the heading *Selected strategy*.

### **Sub-fund's investment policy**

#### **Permitted asset classes**

Pursuant to the provisions of the Royal Decree of 12 November 2012 on undertakings for collective investment complying with the conditions of Directive 2009/65/EC, the sub-fund may invest in transferable securities (including bonds and other debt instruments), money market instruments, units (shares) in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as and to the extent permitted by the applicable legislation.

The investment limits and restrictions set out in the Royal Decree of 12 November 2012 on undertakings for collective investment complying with the conditions of Directive 2009/65/EC will be respected at all times.

### **Characteristics of the bonds and other debt instruments**

During the sub-fund's life, the average credit rating of the bonds and other debt instruments shall be at least 'A-' from Standard & Poor's or an equivalent rating from Moody's or Fitch, or, if there is no credit rating available, an average credit risk profile that the manager considers to be at least equivalent.

At the start of the investment, the credit rating of the long-term bonds and other debt instruments shall be at least 'A-' from Standard & Poor's or an equivalent rating from Moody's or Fitch, or, if there is no credit rating available, a credit risk profile that the manager considers to be at least equivalent.

At the start of the investment, the credit rating of the short-term bonds and other debt instruments shall be at least 'A-1' from Standard & Poor's or an equivalent rating from Moody's or Fitch, or, if there is no credit rating available, a credit risk profile that the manager considers to be at least equivalent.

When selecting the bonds and other debt instruments, all maturities are taken into consideration.

### Permitted swap transactions

**The swaps described below have been concluded with a prime counterparty or prime counterparties within the limits laid down by law.**

(1) To achieve a potential return, the sub-fund concludes swaps. Under such swap contracts, the sub-fund transfers a portion of the future income from the investments described under the heading 'Permitted asset classes' to the counterparty or counterparties during the life of the sub-fund. In exchange, the counterparty or counterparties undertake to provide a potential return as specified under the heading *Selected strategy*.

**The swaps under (1) are essential to achieve the sub-fund's investment objectives, since this technique facilitates achievement of the goal of generating a potential return.**

**The sub-fund's risk profile is not affected by the use of these swaps.**

(2) If necessary, the sub-fund also concludes swaps to match the due dates of the commitments of the sub-fund with those of the cash flows stemming from the deposits, bonds and other debt instruments described under the heading *Criteria the investments must meet*.

**These swaps are essential to achieve the sub-fund's investment objectives, since there are not enough bonds and other debt instruments available on the market whose coupon payments and maturity dates always perfectly match the due dates of the sub-fund's obligations.**

**The sub-fund's risk profile is not affected by the use of these swaps.**

(3) In addition, the sub-fund may conclude swaps to protect itself against the credit risk in respect of issuers of bonds and other debt instruments. Through this type of swap, one or more counterparties takes over the risk of an issuer of a bond or other debt instrument in the sub-fund's portfolio defaulting, in exchange for a fee payable by the sub-fund.

**The swaps under (3) serve to hedge the credit risk.**

**The sub-fund's risk profile is not affected by the use of these swaps.**

### Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

### Strategie selected

#### Investment objectives and strategy:

The sub-fund has two investment objectives: firstly, it seeks to repay at Maturity 100% of the initial subscription price and secondly a possible capital gain that is contingent on the evolution of a basket of 30 quality shares of a worldwide selection of companies that are characterised by a high market capitalisation.

At Maturity, a capital gain will be distributed that will equal the best of two alternatives:

- on the one hand 8.00%, settled at 100% of the initial subscription price;
- on the other hand 100% of the increase in the basket of 30 shares, settled at 100% of the initial subscription price, where the maximum capital gain will be 60%. The evolution of the basket is calculated as follows: [end value of the basket minus the starting value of the basket], divided by the starting value of the basket. Decreases in the basket are not taken into account.

Consequently, the capital gain at the Maturity Date will be at least 8.00% (yield to maturity: 1.49% before fees and taxes) and maximum 60% (yield to maturity: 9.51% before costs and taxes).

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

### Transparency of adverse sustainability impacts

The sub-fund took into account the principal adverse impacts of its investment decisions on sustainability factors ("PAI") as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on disclosure on sustainability in the financial services sector ("SFDR") through KBC Group's Investment Policy and KBC Group Policy on Blacklisted Companies.

Based on the KBC Group Policy on Blacklisted Companies, all companies on the 'KBC Group Blacklist' (including companies involved in controversial weapons such as those prohibited by Belgian law and white phosphorus weapons) are excluded as well as the worst offenders of the UN Global Compact.

Consequently, the sub-fund took into account exposure to controversial weapons ('indicator 14') by excluding companies dealing with controversial weapon systems, and violations of the principles of the UN Global Compact or the Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises ('indicator 10') by excluding the worst offenders of the UN Global Compact.

## **Maturity**

Wednesday 28 February 2029 (payment with a value date of D+1 banking day)

## **Currency**

EUR, for all shares in the basket, changes in the value of the currency in which they are expressed relative to EUR are irrelevant.

## **Starting Value**

Value of the basket based on the weighted average of the Value of the shares included in the basket during the first 10 Valuation Days, starting from Thursday 28 December 2023 inclusive.

## **End Value**

Value of the basket based on the weighted average of the Value of the shares included in the basket on the last Valuation Day of the month for the last 12 months before Maturity, more specifically from February 2028 through January 2029 (inclusive).

## **Value**

For all the shares, except for those listed on the Milan stock exchange, the closing price, namely the price of a share in the basket as calculated and notified at closing of the stock exchange by the authority of the stock exchange on which the share is listed (or its legal successor). The reference price is used for shares listed on the Milan stock exchange.

## **Valuation day**

A Valuation Day is set separately for each share in the basket.

A Valuation Day is a day that is a planned trading day both

- i) for the stock exchange on which the share is listed and
- ii) for the stock exchange whose activities have a substantial influence on the trading of options and futures on the share concerned

hereinafter referred to as 'the stock exchanges concerned'.

If on the Valuation Day,

- a) one of the stock exchanges concerned is unexpectedly closed or
- b) there is an event that disrupts the market for a stock exchange concerned or
- c) one of the stock exchanges concerned closes early,

the original Valuation Day is replaced by the following trading day when no event as referred to in a), b) or c) above occurs. An extraordinary closure that has been announced in advance is not considered as early closure.

If a valuation is made on consecutive Valuation Days, the trading day that replaces the original Valuation Day (i) may not coincide with another original Valuation Day and (ii) may not be a trading day that already replaces another original Valuation Day.

However, if an event as referred to under a), b) or c) above occurs on each of the eight trading days following the original Valuation Day,

- (i) the eighth trading day shall be considered as the original Valuation Day and
- (ii) the Bevek shall assess, in good faith and in consultation with the prime counterparty or counterparties with which it has concluded a swap agreement, the price of the share as it would have been traded on that eighth trading day and
- (iii) the Bevek will notify shareholders of any changes regarding setting the Starting Value and/or End Value and conditions of payment.

### Relevant basket

In the table below, the columns from left to right reflect the number of the share, the name of the share, the Bloomberg code, the exchange on which it trades (City-MIC Code) and its initial weighting in the basket.

| (i) | Name                         | Bloomberg Code   | Exchange          | Initial Weighting Coefficients |

### Basket composition methodology

KBC Asset Management used the following methodology to determine the composition of the sub-fund's basket.

#### Step 1 :

The starting point is the global equities universe from which a selection of potential investments is derived in accordance with the economic criteria for the composition of the basket and subject to restrictions regarding stock market capitalisation and liquid assets.

The economic criteria for the composition of the basket determine the size of the final selection.

#### Step 2 :

The selection of shares obtained in step 1 is reduced to a short list using a quantitative selection based on past financial data. The shares selected are those of companies that achieve a good score in terms of management quality, a healthy balance-sheet structure and a positive trend in profitability.

#### Step 3 :

The selection of shares obtained in step 2 is then verified by KBC Asset Management analysts. Shares that are permanently monitored by the analysts and those for which there is a negative recommendation, when the product is launched, are then withdrawn from the selection.

#### Step 4 :

The last reduction of the selection provides the final basket. This selection was made using the technical parameters of options (including the term, volatility, dividend yield and interest rate).

The final basket must satisfy the legal requirements concerning the quantity of shares and adequate distribution in the weighting. In addition, care is taken to ensure compliance with the geographical and/or sector spread. The analysts make a qualitative assessment of each share used taking account of specific knowledge of these shares and the sectors/regions from which they come, in accordance with the term of the sub-fund.

For the sub-fund Optimum Fund World Fix 100-3, about 1586 equities were selected during step 1.

The initial selection was reduced by a maximum 20% in step 2.

This was again reduced by 10% (indicative) in step 3. The final basket set up during step 4 is described above under *Relevant basket*. This basket makes it possible to offer the sub-fund Optimum Fund World Fix 100-3 under the conditions set out in the investment policy referred to above. Here the selection process uses parameters that could affect the potential return on the investments.

#### *Selection criteria for the basket :*

A share/issuer may only form part of the basket if (i) it is listed on a stock exchange, (ii) it has a high market capitalisation, (iii) the Board of Directors of the Beveik has approved its inclusion in the basket, (iv) the issuer is not included in the KBC Group Policy on Blacklisted Companies\* and (v) at the time the swap contracts are being concluded (see 'Permitted swap transactions'), the issuer of the share complies with the KBC Group Investment Policy\* (the 'Selection criteria').

\* The KBC Group Policy on Blacklisted Companies and the KBC Group Investment Policy can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > General exclusion policies for conventional funds and socially responsible investment funds, Paragraph 1 'KBC Group Policy on Blacklisted Companies' and 2 'KBC Group Investment Policy'.

### **Modifications to the basket due to mergers, acquisitions, demergers, nationalisation, bankruptcy or disqualification :**

#### **Mergers or acquisitions**

If, during the life of the sub-fund, one or more issuers of shares in the basket are involved in a merger or acquisition, the shares of the relevant issuers which still meet the selection criteria and comply with the KBC Group Investment Policy\* after these operations will be given a weighting in the basket equal to the sum of the weightings of the shares of all issuers involved in the operation. If, after the operation, none of the issuers involved in the operation meet the selection criteria or comply with the KBC Group Investment Policy\*, the procedures described under 'Nationalisation, bankruptcy or disqualification' will apply.

\* The KBC Group Investment Policy can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > General exclusion policies for conventional funds and responsible investment funds, Paragraph 2 'KBC Group Investment Policy'.

#### **Demergers**

If an issuer of a share in the basket proceeds to a demerger, then the share from the issuer concerned can be substituted either by one of the shares that came about as a result of the demerger and that meets the selection criteria and complies with the KBC Group Investment Policy\*, or by a basket of shares arising from the demerger which meet the selection criteria and comply with the KBC Group Investment Policy\*. This basket of shares will, when calculating the number of shares in the basket, be considered as one share. If, after the operation, none of the shares resulting from the demerger meet the selection criteria or comply with the KBC Group Investment Policy\*, the procedures described under 'Nationalisation, bankruptcy or disqualification' will apply.

\* The KBC Group Investment Policy can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > General exclusion policies for conventional funds and responsible investment funds, Paragraph 2 'KBC Group Investment Policy'.

#### **Nationalisation, bankruptcy or disqualification**

If an issuer of a share in the basket is nationalised, declared bankrupt or no longer meets the selection criteria ('disqualification'), this share will be sold at the last known price before removal. The amount thus realised will then be invested until Maturity at the rate of interest in force on money or bond markets at the moment of removal, and this for a term equal to the term remaining until Maturity of the sub-fund. The realised amount plus the interest will be taken into account at Maturity as the result achieved for that share in order to calculate the final increase in the value of the basket at Maturity.

### **Securities Financing Transactions (SFTs)**

**The sub-fund may not lend any financial instruments.**

#### **General strategy for hedging the exchange risk**

A more detailed explanation can be found in this report's General information on the Beveik under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

#### **Social, ethical and environmental aspects**

A more detailed explanation can be found in this report's General information on the Beveik under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'.

## 2.1.4. Financial portfolio management

The intellectual management, with the exception of the creation of the sub-fund and its maintenance in terms of the technical, product-specific and legal aspects has been delegated by the management company to KBC Fund Management Limited, 4th Floor, Scotch House, 6/7 Burgh Quay, Dublin 2, D02 VK44, Ireland.

## 2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

## 2.1.6. Index and benchmark

Not applicable

## 2.1.7. Policy pursued during the financial year

### **2.1.8. Summary risk indicator**

- 3 on a scale of 1 (lowest risk) to 7 (highest risk)
- a moderate level of inflation risk: there is no protection against an increase of the inflation.
  - a moderate level of market risk: the level of the risk reflects the volatility of the stock market.
  - a moderate level of performance risk: the level of the risk reflects the volatility of the stock market.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

## 2.2. Balance sheet

| Balance sheet layout |                                                                   | 28/02/2026<br>(in Euro) | 28/02/2025<br>(in Euro) |

\*The financial year does not coincide with the calendar year.

## 2.4.5. Performance figures

| Cap Div | ISIN Code    | Curr ency | 1 year        |            | 3 years       |            | 5 years       |            | 10 years      |            | Since Launch* |               |
|---------|--------------|-----------|---------------|------------|---------------|------------|---------------|------------|---------------|------------|---------------|---------------|
|         |              |           | Share classes | Bench mark | Share classes | Bench mark | Share classes | Bench mark | Share classes | Bench mark | Starting date | Share classes |
| CAP     | BE6346439209 | EUR       | 14.73%        |            |               |            |               |            |               |            | 19/12/2023    | 12.01%        |

Risk warning: Past performance is not a guide to future performance.

\* Return on annual basis.

- The bar chart shows the performance for full financial years(period of 12 months prior to the half-yearly closing).
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage.
- Calculation method for date D, where NAV stands for net asset value:  
Capitalisation units (CAP)  
 Return on date D over a period of X years :  

$$[\text{NIW}(\text{D}) / \text{NIW}(\text{Y})] ^ {1 / \text{X}} - 1$$
 where Y = D-X  
 Return on date D since the start date S of the unit:  

$$[\text{NIW}(\text{D}) / \text{NIW}(\text{S})] ^ {1 / \text{F}} - 1$$
 where F = 1 if the unit has existed for less than one year on date D  
 where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D
- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation shares.

## 2.4.6. Costs

### Ongoing Charges:

Management fees and other administrative or operating costs: 0,853%  
Transaction costs: 0,000%

Percentage calculated at reporting date: 28 February 2026 (period of 12 months prior to the half-yearly closing).

A more detailed explanation with respect to the method of calculating ongoing charges and the relevant exclusions can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.5. Ongoing charges'

### Existence of Commission Sharing Agreements

Not applicable

### Fee sharing agreements en rebates

The management company has shared 60.00% of its fee with the distributor, and institutional and/or professional parties.

This percentage has been calculated relative to the fee for managing the investment portfolio of the sub-fund when it was launched.

## 2.4.7. Notes to the financial statements and other data

|                                                                                                          |                                                                                                                                                                                                     |                                                                                                                                                                                                                                                                                                        |

### Fee for managing the investment portfolio

KBC Asset Management NV receives a fee for managing the sub-fund's investments. This fee consists of a varying amount of max. 20 EUR per unit per year (with a maximum of EUR per unit per year for risk management).

This fee, which is calculated every six months, is paid monthly on the last banking day of each month. It can change from one six-month period to the next, within the limits set out below, and is based on the number of units issued at the start of each six-month period.

In the calculation, account is taken of the difference between:

- the return generated by the investments in bonds and other debt instruments, deposits, and/or liquid assets in order to achieve the capital protection on the Maturity date (see *The financial mechanism used to achieve capital protection*), and
- the expenses borne by the sub-fund to achieve a potential return (see *Permitted 'swap' transactions*),
- after deducting the expected fixed and variable expenses of the sub-fund, as mentioned above.

Of this, KBC Fund Management Ltd. receives a fee of no more than 18.95 EUR per unit per year from KBC Asset Management NV for the intellectual management of the sub-fund. KBC Fund Management Ltd. is a wholly owned subsidiary of KBC Asset Management NV.

KBC Asset Management NV has informed the bevek that, if due to the failure of the financial mechanism, the amount that should be paid per unit (after deducting taxes and charges) on the Maturity date, as relevant, is lower than the initial subscription price, KBC Asset Management NV may decide (but is not obliged to) to use the management fee it receives during the current financial year from the sub-fund – and possibly also from other sub-funds of the bevek – to cover this shortfall. This is not a guarantee from KBC Asset Management NV, which may

decide at any time and at its own discretion whether or not to use the management fee for this purpose. KBC Asset Management NV or one of its subsidiaries has also been appointed manager of the SPVs in which the sub-fund may invest (see *Criteria the investments must meet*). KBC Asset Management NV or one of its subsidiaries, as the case may be, receives an annual fee from the relevant SPVs for their management. This management fee may not exceed 0.15% per year and is calculated on the assets managed at the end of the quarter.

The sum of (i) the fee for managing the investment portfolio that the sub-fund pays to the management company and (ii) the management fee that the SPVs in which the sub-fund invests pay to the asset manager, shall never exceed 20.00 EUR per unit per year, as described above.

#### 2.1.2. Stock exchange listing

Not applicable.

#### 2.1.3. Goal and key principles of the investment policy

##### Object of the sub-fund

The object of the sub-fund is twofold (before deducting charges and taxes):

- (1) To repay per share the initial subscription price of 1000 EUR at Maturity (i.e. the capital protection). This capital protection is provided through a financial mechanism that will be explained in more detail under the heading *Capital protection*. However, the capital protection does not apply to shareholders who sell their shares before Maturity.
- (2) To provide a potential return through an investment in swaps. The various types of swaps in which the sub-fund may invest are explained in more detail under the *Potential return*.

##### Capital Protection

###### The financial mechanism used to achieve capital protection

The financial mechanism used to achieve capital protection at Maturity consists of an investment of the total amount of the subscriptions in bonds and other debt instruments, deposits and/or liquid assets (including cash deposited on a time-deposit account or current account). These investments can have different maturities and coupon payment dates. Using the swaps described under the heading *Permitted swap transactions* (2), these investments are matched with the due dates of the obligations of the sub-fund.

###### Criteria the investments must meet

The investments must meet one of the following criteria:

- (1) An investment in deposits and/or debt instruments, placed with or issued by financial institutions under the prudential supervision of and established in a Member State of the European Economic Area.
- (2) An investment in debt instruments issued or guaranteed by a Member State of the European Economic Area.
- (3) An investment under an investment strategy with an analogous structure and identical counterparty risk as a direct investment in deposits and/or debt instruments as stated under (1) and (2) above.

The investments under (3) may consist of:

- (A) An investment in notes listed on a stock exchange that are issued by 'Special Purpose Vehicles' (SPVs).

These SPVs are managed by KBC Asset Management NV or a subsidiary.

The underlying assets of the bonds issued by the SPVs consist of a diversified portfolio of deposits issued by financial institutions, bonds, other debt instruments and financial derivatives. When selecting these underlying assets, account is taken of criteria relating to allocation and creditworthiness (see *Permitted asset classes* and *Characteristics of the bonds and other debt instruments*) in order to limit the counterparty risk.

Further details of the criteria these underlying deposits, bonds, other debt instruments and financial derivatives must meet are provided in the base prospectuses for the SPVs, which can be viewed at or downloaded from [www.kbc.be/prospectus/spv](http://www.kbc.be/prospectus/spv).

Investors are provided with information on the investments made by both the sub-fund and the SPVs in the annual and half-yearly reports on the open-ended investment company under Belgian law (bevek) to which the sub-fund belongs. These reports can also be viewed at or downloaded from [www.kbc.be](http://www.kbc.be).

- (B) An investment in:
- deposits with financial institutions under prudential supervision in the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia and/or
  - debt instruments issued by financial institutions under prudential supervision in the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia and/or
  - debt instruments issued or guaranteed by the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia.

Prudential supervision of financial institutions in the United Kingdom, Switzerland, the United States of America, Japan, Canada and Australia can be equated to prudential supervision of financial institutions in the member states of the European Economic Area.

The investments in debt instruments issued by financial institutions under prudential supervision in the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia or issued or guaranteed by the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia have a minimum credit rating as set out under the heading *Characteristics of the bonds and other debt instruments*.

- (C) The investments may also consist of a combination of the investments specified under (A) and (B).

### **No formal guarantee**

No formal guarantee of repayment of the initial subscription price is provided to the sub-fund or to its shareholders. In other words, the capital protection is not binding for the sub-fund as regards the result generated, although achieving this objective through the operation of the financial mechanism is still the top priority.

If the financial mechanism fails and, as a result, the amount per share payable (before deducting charges and taxes) at Maturity is lower than the initial subscription price, KBC Asset Management NV may decide (but is not obliged) to use the management fee it has received during the current financial year from the sub-fund – and possibly also from other sub-funds of the bevek – to cover the shortfall. This is not a guarantee from KBC Asset Management NV, which may decide at any time and at its own discretion whether or not to use the management fee for this purpose.

The capital protection does not apply to shareholders who sell their shares before Maturity.

### **Potential return**

To achieve a potential return, the sub-fund concludes swaps with one or more prime counterparties. Consequently, the sub-fund transfers a portion of the future income from the investments that were made to achieve capital protection to this counterparty (these counterparties) during the life of the sub-fund. In exchange, the counterparty (counterparties) undertake to provide a potential return as specified under the heading *Selected strategy*.

### **Sub-fund's investment policy**

#### **Permitted asset classes**

Pursuant to the provisions of the Royal Decree of 12 November 2012 on undertakings for collective investment complying with the conditions of Directive 2009/65/EC, the sub-fund may invest in transferable securities (including bonds and other debt instruments), money market instruments, units (shares) in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as and to the extent permitted by the applicable legislation.

The investment limits and restrictions set out in the Royal Decree of 12 November 2012 on undertakings for collective investment complying with the conditions of Directive 2009/65/EC will be respected at all times.

### **Characteristics of the bonds and other debt instruments**

During the sub-fund's life, the average credit rating of the bonds and other debt instruments shall be at least 'A-' from Standard & Poor's or an equivalent rating from Moody's or Fitch, or, if there is no credit rating available, an average credit risk profile that the manager considers to be at least equivalent.

At the start of the investment, the credit rating of the long-term bonds and other debt instruments shall be at least 'A-' from Standard & Poor's or an equivalent rating from Moody's or Fitch, or, if there is no credit rating available, a credit risk profile that the manager considers to be at least equivalent.

At the start of the investment, the credit rating of the short-term bonds and other debt instruments shall be at least 'A-1' from Standard & Poor's or an equivalent rating from Moody's or Fitch, or, if there is no credit rating available, a credit risk profile that the manager considers to be at least equivalent.

When selecting the bonds and other debt instruments, all maturities are taken into consideration.

### Permitted swap transactions

**The swaps described below have been concluded with a prime counterparty or prime counterparties within the limits laid down by law.**

(1) To achieve a potential return, the sub-fund concludes swaps. Under such swap contracts, the sub-fund transfers a portion of the future income from the investments described under the heading 'Permitted asset classes' to the counterparty or counterparties during the life of the sub-fund. In exchange, the counterparty or counterparties undertake to provide a potential return as specified under the heading *Selected strategy*.

**The swaps under (1) are essential to achieve the sub-fund's investment objectives, since this technique facilitates achievement of the goal of generating a potential return.**

**The sub-fund's risk profile is not affected by the use of these swaps.**

(2) If necessary, the sub-fund also concludes swaps to match the due dates of the commitments of the sub-fund with those of the cash flows stemming from the deposits, bonds and other debt instruments described under the heading *Criteria the investments must meet*.

**These swaps are essential to achieve the sub-fund's investment objectives, since there are not enough bonds and other debt instruments available on the market whose coupon payments and maturity dates always perfectly match the due dates of the sub-fund's obligations.**

**The sub-fund's risk profile is not affected by the use of these swaps.**

(3) In addition, the sub-fund may conclude swaps to protect itself against the credit risk in respect of issuers of bonds and other debt instruments. Through this type of swap, one or more counterparties takes over the risk of an issuer of a bond or other debt instrument in the sub-fund's portfolio defaulting, in exchange for a fee payable by the sub-fund.

**The swaps under (3) serve to hedge the credit risk.**

**The sub-fund's risk profile is not affected by the use of these swaps.**

### Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

### Strategie selected

#### Investment objectives and strategy:

The sub-fund has two investment objectives: firstly, it seeks to repay at Maturity 100% of the initial subscription price and secondly a possible capital gain that is contingent on the evolution of a basket of 30 quality shares of a worldwide selection of companies that are characterised by a high market capitalisation.

At Maturity, a capital gain will be distributed that will equal the best of two alternatives:

- on the one hand 7.00%, settled at 100% of the initial subscription price;
- on the other hand 100% of the increase in the basket of 30 shares, settled at 100% of the initial subscription price, where the maximum capital gain will be 40%. The evolution of the basket is calculated as follows: [end value of the basket minus the starting value of the basket], divided by the starting value of the basket. Decreases in the basket are not taken into account.

Consequently, the capital gain at the Maturity Date will be at least 7.00% (yield to maturity: 1.10% before fees and taxes) and maximum 40% (yield to maturity: 5.60% before costs and taxes).

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

### Transparency of adverse sustainability impacts

The sub-fund took into account the principal adverse impacts of its investment decisions on sustainability factors ("PAI") as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on disclosure on sustainability in the financial services sector ("SFDR") through KBC Group's Investment Policy and KBC Group Policy on Blacklisted Companies.

Based on the KBC Group Policy on Blacklisted Companies, all companies on the 'KBC Group Blacklist' (including companies involved in controversial weapons such as those prohibited by Belgian law and white phosphorus weapons) are excluded as well as the worst offenders of the UN Global Compact.

Consequently, the sub-fund took into account exposure to controversial weapons ('indicator 14') by excluding companies dealing with controversial weapon systems, and violations of the principles of the UN Global Compact or the Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises ('indicator 10') by excluding the worst offenders of the UN Global Compact.

## **Maturity**

Friday 28 June 2030 (payment with a value date of D+1 banking day)

## **Currency**

EUR, for all shares in the basket, changes in the value of the currency in which they are expressed relative to EUR are irrelevant.

## **Starting Value**

Value of the basket based on the weighted average of the Value of the shares included in the basket during the first 10 Valuation Days, starting from Monday 29 April 2024 inclusive.

## **End Value**

Value of the basket based on the weighted average of the Value of the shares included in the basket on the last Valuation Day of the month for the last 12 months before Maturity, more specifically from June 2029 through May 2030 (inclusive).

## **Value**

For all the shares, except for those listed on the Milan stock exchange, the closing price, namely the price of a share in the basket as calculated and notified at closing of the stock exchange by the authority of the stock exchange on which the share is listed (or its legal successor). The reference price is used for shares listed on the Milan stock exchange.

## **Valuation day**

A Valuation Day is set separately for each share in the basket.

A Valuation Day is a day that is a planned trading day both

- i) for the stock exchange on which the share is listed and
- ii) for the stock exchange whose activities have a substantial influence on the trading of options and futures on the share concerned

hereinafter referred to as 'the stock exchanges concerned'.

If on the Valuation Day,

- a) one of the stock exchanges concerned is unexpectedly closed or
- b) there is an event that disrupts the market for a stock exchange concerned or
- c) one of the stock exchanges concerned closes early,

the original Valuation Day is replaced by the following trading day when no event as referred to in a), b) or c) above occurs. An extraordinary closure that has been announced in advance is not considered as early closure.

If a valuation is made on consecutive Valuation Days, the trading day that replaces the original Valuation Day (i) may not coincide with another original Valuation Day and (ii) may not be a trading day that already replaces another original Valuation Day.

However, if an event as referred to under a), b) or c) above occurs on each of the eight trading days following the original Valuation Day,

- (i) the eighth trading day shall be considered as the original Valuation Day and
- (ii) the Bevek shall assess, in good faith and in consultation with the prime counterparty or counterparties with which it has concluded a swap agreement, the price of the share as it would have been traded on that eighth trading day and
- (iii) the Bevek will notify shareholders of any changes regarding setting the Starting Value and/or End Value and conditions of payment.

### Relevant basket

In the table below, the columns from left to right reflect the number of the share, the name of the share, the Bloomberg code, the exchange on which it trades (City-MIC Code) and its initial weighting in the basket.

| (i) | Name                         | Bloomberg Code   | Exchange          | Initial Weighting Coefficients |
|-----|------------------------------|------------------|-------------------|--------------------------------|
| 1   | ALLIANZ SE                   | ALV GY Equity    | FRANKFURT - XETR  | 2.0000%                        |
| 2   | AVIVA PLC                    | AV/ LN Equity    | LONDON - XLON     | 2.0000%                        |

### Basket composition methodology

KBC Asset Management used the following methodology to determine the composition of the sub-fund's basket.

#### Step 1 :

The starting point is the global equities universe from which a selection of potential investments is derived in accordance with the economic criteria for the composition of the basket and subject to restrictions regarding stock market capitalisation and liquid assets.

The economic criteria for the composition of the basket determine the size of the final selection.

#### Step 2 :

The selection of shares obtained in step 1 is reduced to a short list using a quantitative selection based on past financial data. The shares selected are those of companies that achieve a good score in terms of management quality, a healthy balance-sheet structure and a positive trend in profitability.

#### Step 3 :

The selection of shares obtained in step 2 is then verified by KBC Asset Management analysts. Shares that are permanently monitored by the analysts and those for which there is a negative recommendation, when the product is launched, are then withdrawn from the selection.

#### Step 4 :

The last reduction of the selection provides the final basket. This selection was made using the technical parameters of options (including the term, volatility, dividend yield and interest rate).

The final basket must satisfy the legal requirements concerning the quantity of shares and adequate distribution in the weighting. In addition, care is taken to ensure compliance with the geographical and/or sector spread. The analysts make a qualitative assessment of each share used taking account of specific knowledge of these shares and the sectors/regions from which they come, in accordance with the term of the sub-fund.

For the sub-fund Optimum Fund World Fix 100-4, about 1741 equities were selected during step 1.

The initial selection was reduced by a maximum 20% in step 2.

This was again reduced by 10% (indicative) in step 3. The final basket set up during step 4 is described above under *Relevant basket*. This basket makes it possible to offer the sub-fund Optimum Fund World Fix 100-4 under the conditions set out in the investment policy referred to above. Here the selection process uses parameters that could affect the potential return on the investments.

#### *Selection criteria for the basket :*

A share/issuer may only form part of the basket if (i) it is listed on a stock exchange, (ii) it has a high market capitalisation, (iii) the Board of Directors of the Beveik has approved its inclusion in the basket, (iv) the issuer is not included in the KBC Group Policy on Blacklisted Companies\* and (v) at the time the swap contracts are being concluded (see 'Permitted swap transactions'), the issuer of the share complies with the KBC Group Investment Policy\* (the 'Selection criteria').

\* The KBC Group Policy on Blacklisted Companies and the KBC Group Investment Policy can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > General exclusion policies for conventional funds and socially responsible investment funds, Paragraph 1 'KBC Group Policy on Blacklisted Companies' and 2 'KBC Group Investment Policy'.

### **Modifications to the basket due to mergers, acquisitions, demergers, nationalisation, bankruptcy or disqualification :**

#### **Mergers or acquisitions**

If, during the life of the sub-fund, one or more issuers of shares in the basket are involved in a merger or acquisition, the shares of the relevant issuers which still meet the selection criteria and comply with the KBC Group Investment Policy\* after these operations will be given a weighting in the basket equal to the sum of the weightings of the shares of all issuers involved in the operation. If, after the operation, none of the issuers involved in the operation meet the selection criteria or comply with the KBC Group Investment Policy\*, the procedures described under 'Nationalisation, bankruptcy or disqualification' will apply.

\* The KBC Group Investment Policy can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > General exclusion policies for conventional funds and responsible investment funds, Paragraph 2 'KBC Group Investment Policy'.

#### **Demergers**

If an issuer of a share in the basket proceeds to a demerger, then the share from the issuer concerned can be substituted either by one of the shares that came about as a result of the demerger and that meets the selection criteria and complies with the KBC Group Investment Policy\*, or by a basket of shares arising from the demerger which meet the selection criteria and comply with the KBC Group Investment Policy\*. This basket of shares will, when calculating the number of shares in the basket, be considered as one share. If, after the operation, none of the shares resulting from the demerger meet the selection criteria or comply with the KBC Group Investment Policy\*, the procedures described under 'Nationalisation, bankruptcy or disqualification' will apply.

\* The KBC Group Investment Policy can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > General exclusion policies for conventional funds and responsible investment funds, Paragraph 2 'KBC Group Investment Policy'.

#### **Nationalisation, bankruptcy or disqualification**

If an issuer of a share in the basket is nationalised, declared bankrupt or no longer meets the selection criteria ('disqualification'), this share will be sold at the last known price before removal. The amount thus realised will then be invested until Maturity at the rate of interest in force on money or bond markets at the moment of removal, and this for a term equal to the term remaining until Maturity of the sub-fund. The realised amount plus the interest will be taken into account at Maturity as the result achieved for that share in order to calculate the final increase in the value of the basket at Maturity.

### **Securities Financing Transactions (SFTs)**

**The sub-fund may not lend any financial instruments.**

#### **General strategy for hedging the exchange risk**

A more detailed explanation can be found in this report's General information on the Beveik under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

#### **Social, ethical and environmental aspects**

A more detailed explanation can be found in this report's General information on the Beveik under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'.

## 2.1.4. Financial portfolio management

The intellectual management, with the exception of the creation of the sub-fund and its maintenance in terms of the technical, product-specific and legal aspects has been delegated by the management company to KBC Fund Management Limited, 4th Floor, Scotch House, 6/7 Burgh Quay, Dublin 2, D02 VK44, Ireland.

## 2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

## 2.1.6. Index and benchmark

Not applicable

## 2.1.7. Policy pursued during the financial year

### **2.1.8. Summary risk indicator**

- 2 on a scale of 1 (lowest risk) to 7 (highest risk)
- a moderate level of inflation risk: there is no protection against an increase of the inflation.
  - a moderate level of market risk: the level of the risk reflects the volatility of the stock market.
  - a moderate level of performance risk: the level of the risk reflects the volatility of the stock market.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

## 2.2. Balance sheet

| Balance sheet layout |                                                                   | 28/02/2026<br>(in Euro) | 28/02/2025<br>(in Euro) |

## 2.4.5. Performance figures

| Cap Div | ISIN Code    | Curr<br>ency | 1 year           |               | 3 years          |               | 5 years          |               | 10 years         |               | Since Launch*    |                  |
|---------|--------------|--------------|------------------|---------------|------------------|---------------|------------------|---------------|------------------|---------------|------------------|------------------|
|         |              |              | Share<br>classes | Bench<br>mark | Share<br>classes | Bench<br>mark | Share<br>classes | Bench<br>mark | Share<br>classes | Bench<br>mark | Starting<br>date | Share<br>classes |
| CAP     | BE6348365063 | EUR          | 8.70%            |               |                  |               |                  |               |                  |               | 22/04/2024       | 8.59%            |

Risk warning: Past performance is not a guide to future performance.

\* Return on annual basis.

- The bar chart shows the performance for full financial years(period of 12 months prior to the half-yearly closing).
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage.
- Calculation method for date D, where NAV stands for net asset value:  
Capitalisation units (CAP)  
 Return on date D over a period of X years :  

$$[\text{NIW}(\text{D}) / \text{NIW}(\text{Y})] ^ {1 / \text{X}} - 1$$
 where Y = D-X  
 Return on date D since the start date S of the unit:  

$$[\text{NIW}(\text{D}) / \text{NIW}(\text{S})] ^ {1 / \text{F}} - 1$$
 where F = 1 if the unit has existed for less than one year on date D  
 where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D
- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation shares.

## 2.4.6. Costs

### Ongoing Charges:

Management fees and other administrative or operating costs: 1,184%  
Transaction costs: 0,000%

Percentage calculated at reporting date: 28 February 2026 (period of 12 months prior to the half-yearly closing).

A more detailed explanation with respect to the method of calculating ongoing charges and the relevant exclusions can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.5. Ongoing charges'

### Existence of Commission Sharing Agreements

Not applicable

### Fee sharing agreements en rebates

The management company has shared 60.00% of its fee with the distributor, and institutional and/or professional parties.

This percentage has been calculated relative to the fee for managing the investment portfolio of the sub-fund when it was launched.

## 2.4.7. Notes to the financial statements and other data

### Fee for managing the investment portfolio

KBC Asset Management NV receives a fee for managing the sub-fund's investments. This fee consists of a varying amount of max. 20 EUR per unit per year (with a maximum of EUR per unit per year for risk management).

This fee, which is calculated every six months, is paid monthly on the last banking day of each month. It can change from one six-month period to the next, within the limits set out below, and is based on the number of units issued at the start of each six-month period.

In the calculation, account is taken of the difference between:

- the return generated by the investments in bonds and other debt instruments, deposits, and/or liquid assets in order to achieve the capital protection on the Maturity date (see *The financial mechanism used to achieve capital protection*), and
- the expenses borne by the sub-fund to achieve a potential return (see *Permitted 'swap' transactions*),
- after deducting the expected fixed and variable expenses of the sub-fund, as mentioned above.

Of this, KBC Fund Management Ltd. receives a fee of no more than 18.95 EUR per unit per year from KBC Asset Management NV for the intellectual management of the sub-fund. KBC Fund Management Ltd. is a wholly owned subsidiary of KBC Asset Management NV.

KBC Asset Management NV has informed the bevek that, if due to the failure of the financial mechanism, the amount that should be paid per unit (after deducting taxes and charges) on the Maturity date, as relevant, is lower than the initial subscription price, KBC Asset Management NV may decide (but is not obliged to) to use the management fee it receives during the current financial year from the sub-fund – and possibly also from other sub-funds of the bevek – to cover this shortfall. This is not a guarantee from KBC Asset Management NV, which may

decide at any time and at its own discretion whether or not to use the management fee for this purpose. KBC Asset Management NV or one of its subsidiaries has also been appointed manager of the SPVs in which the sub-fund may invest (see *Criteria the investments must meet*). KBC Asset Management NV or one of its subsidiaries, as the case may be, receives an annual fee from the relevant SPVs for their management. This management fee may not exceed 0.15% per year and is calculated on the assets managed at the end of the quarter.

The sum of (i) the fee for managing the investment portfolio that the sub-fund pays to the management company and (ii) the management fee that the SPVs in which the sub-fund invests pay to the asset manager, shall never exceed 20.00 EUR per unit per year, as described above.

| Currency:                   | EUR              |

#### 2.1.2. Stock exchange listing

Not applicable.

#### 2.1.3. Goal and key principles of the investment policy

##### Object of the sub-fund

The object of the sub-fund is twofold (before deducting charges and taxes):

- (1) To repay per share the initial subscription price of 1000 EUR at Maturity (i.e. the capital protection). This capital protection is provided through a financial mechanism that will be explained in more detail under the heading *Capital protection*. However, the capital protection does not apply to shareholders who sell their shares before Maturity.
- (2) To provide a potential return through an investment in swaps. The various types of swaps in which the sub-fund may invest are explained in more detail under the *Potential return*.

##### Capital Protection

###### The financial mechanism used to achieve capital protection

The financial mechanism used to achieve capital protection at Maturity consists of an investment of the total amount of the subscriptions in bonds and other debt instruments, deposits and/or liquid assets (including cash deposited on a time-deposit account or current account). These investments can have different maturities and coupon payment dates. Using the swaps described under the heading *Permitted swap transactions* (2), these investments are matched with the due dates of the obligations of the sub-fund.

###### Criteria the investments must meet

The investments must meet one of the following criteria:

- (1) An investment in deposits and/or debt instruments, placed with or issued by financial institutions under the prudential supervision of and established in a Member State of the European Economic Area.
- (2) An investment in debt instruments issued or guaranteed by a Member State of the European Economic Area.
- (3) An investment under an investment strategy with an analogous structure and identical counterparty risk as a direct investment in deposits and/or debt instruments as stated under (1) and (2) above.

The investments under (3) may consist of:

- (A) An investment in notes listed on a stock exchange that are issued by 'Special Purpose Vehicles' (SPVs).

These SPVs are managed by KBC Asset Management NV or a subsidiary.

The underlying assets of the bonds issued by the SPVs consist of a diversified portfolio of deposits issued by financial institutions, bonds, other debt instruments and financial derivatives. When selecting these underlying assets, account is taken of criteria relating to allocation and creditworthiness (see *Permitted asset classes* and *Characteristics of the bonds and other debt instruments*) in order to limit the counterparty risk.

Further details of the criteria these underlying deposits, bonds, other debt instruments and financial derivatives must meet are provided in the base prospectuses for the SPVs, which can be viewed at or downloaded from [www.kbc.be/prospectus/spv](http://www.kbc.be/prospectus/spv).

Investors are provided with information on the investments made by both the sub-fund and the SPVs in the annual and half-yearly reports on the open-ended investment company under Belgian law (bevek) to which the sub-fund belongs. These reports can also be viewed at or downloaded from [www.kbc.be](http://www.kbc.be).

- (B) An investment in:
- deposits with financial institutions under prudential supervision in the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia and/or
  - debt instruments issued by financial institutions under prudential supervision in the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia and/or
  - debt instruments issued or guaranteed by the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia.

Prudential supervision of financial institutions in the United Kingdom, Switzerland, the United States of America, Japan, Canada and Australia can be equated to prudential supervision of financial institutions in the member states of the European Economic Area.

The investments in debt instruments issued by financial institutions under prudential supervision in the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia or issued or guaranteed by the United Kingdom, Switzerland, the United States of America, Japan, Canada or Australia have a minimum credit rating as set out under the heading *Characteristics of the bonds and other debt instruments*.

- (C) The investments may also consist of a combination of the investments specified under (A) and (B).

### **No formal guarantee**

No formal guarantee of repayment of the initial subscription price is provided to the sub-fund or to its shareholders. In other words, the capital protection is not binding for the sub-fund as regards the result generated, although achieving this objective through the operation of the financial mechanism is still the top priority.

If the financial mechanism fails and, as a result, the amount per share payable (before deducting charges and taxes) at Maturity is lower than the initial subscription price, KBC Asset Management NV may decide (but is not obliged) to use the management fee it has received during the current financial year from the sub-fund – and possibly also from other sub-funds of the bevek – to cover the shortfall. This is not a guarantee from KBC Asset Management NV, which may decide at any time and at its own discretion whether or not to use the management fee for this purpose.

The capital protection does not apply to shareholders who sell their shares before Maturity.

### **Potential return**

To achieve a potential return, the sub-fund concludes swaps with one or more prime counterparties. Consequently, the sub-fund transfers a portion of the future income from the investments that were made to achieve capital protection to this counterparty (these counterparties) during the life of the sub-fund. In exchange, the counterparty (counterparties) undertake to provide a potential return as specified under the heading *Selected strategy*.

### **Sub-fund's investment policy**

#### **Permitted asset classes**

Pursuant to the provisions of the Royal Decree of 12 November 2012 on undertakings for collective investment complying with the conditions of Directive 2009/65/EC, the sub-fund may invest in transferable securities (including bonds and other debt instruments), money market instruments, units (shares) in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as and to the extent permitted by the applicable legislation.

The investment limits and restrictions set out in the Royal Decree of 12 November 2012 on undertakings for collective investment complying with the conditions of Directive 2009/65/EC will be respected at all times.

### **Characteristics of the bonds and other debt instruments**

During the sub-fund's life, the average credit rating of the bonds and other debt instruments shall be at least 'A-' from Standard & Poor's or an equivalent rating from Moody's or Fitch, or, if there is no credit rating available, an average credit risk profile that the manager considers to be at least equivalent.

At the start of the investment, the credit rating of the long-term bonds and other debt instruments shall be at least 'A-' from Standard & Poor's or an equivalent rating from Moody's or Fitch, or, if there is no credit rating available, a credit risk profile that the manager considers to be at least equivalent.

At the start of the investment, the credit rating of the short-term bonds and other debt instruments shall be at least 'A-1' from Standard & Poor's or an equivalent rating from Moody's or Fitch, or, if there is no credit rating available, a credit risk profile that the manager considers to be at least equivalent.

When selecting the bonds and other debt instruments, all maturities are taken into consideration.

### Permitted swap transactions

**The swaps described below have been concluded with a prime counterparty or prime counterparties within the limits laid down by law.**

(1) To achieve a potential return, the sub-fund concludes swaps. Under such swap contracts, the sub-fund transfers a portion of the future income from the investments described under the heading 'Permitted asset classes' to the counterparty or counterparties during the life of the sub-fund. In exchange, the counterparty or counterparties undertake to provide a potential return as specified under the heading *Selected strategy*.

**The swaps under (1) are essential to achieve the sub-fund's investment objectives, since this technique facilitates achievement of the goal of generating a potential return.**

**The sub-fund's risk profile is not affected by the use of these swaps.**

(2) If necessary, the sub-fund also concludes swaps to match the due dates of the commitments of the sub-fund with those of the cash flows stemming from the deposits, bonds and other debt instruments described under the heading *Criteria the investments must meet*.

**These swaps are essential to achieve the sub-fund's investment objectives, since there are not enough bonds and other debt instruments available on the market whose coupon payments and maturity dates always perfectly match the due dates of the sub-fund's obligations.**

**The sub-fund's risk profile is not affected by the use of these swaps.**

(3) In addition, the sub-fund may conclude swaps to protect itself against the credit risk in respect of issuers of bonds and other debt instruments. Through this type of swap, one or more counterparties takes over the risk of an issuer of a bond or other debt instrument in the sub-fund's portfolio defaulting, in exchange for a fee payable by the sub-fund.

**The swaps under (3) serve to hedge the credit risk.**

**The sub-fund's risk profile is not affected by the use of these swaps.**

### Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

### Strategie selected

#### Investment objectives and strategy:

The sub-fund has two investment objectives: firstly, it seeks to repay at Maturity 100% of the initial subscription price and secondly a possible capital gain that is contingent on the evolution of a basket of 30 shares of a worldwide selection of companies that are characterised by a high market capitalisation.

If the Value of the basket of 30 shares of a worldwide selection of companies that are characterised by a high market capitalisation has risen relative to its Starting Value, 100% of this increase in Value (= (End Value minus the Starting Value) divided by the Starting Value) will be taken into account at Maturity with regard to 100% of the initial subscription price. The capital gain will be capped at 50% (yield to maturity of 8.41% before taxes and charges).

Negative performances of the basket are not taken into account.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

### Transparency of adverse sustainability impacts

The sub-fund took into account the principal adverse impacts of its investment decisions on sustainability factors ("PAI") as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on disclosure on sustainability in the financial services sector ("SFDR") through KBC Group's Investment Policy and KBC Group Policy on Blacklisted Companies.

Based on the KBC Group Policy on Blacklisted Companies, all companies on the 'KBC Group Blacklist' (including companies involved in controversial weapons such as those prohibited by Belgian law and white phosphorus weapons) are excluded as well as the worst offenders of the UN Global Compact.

Consequently, the sub-fund took into account exposure to controversial weapons ('indicator 14') by excluding companies dealing with controversial weapon systems, and violations of the principles of the UN Global Compact or the Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises ('indicator 10') by excluding the worst offenders of the UN Global Compact.

## **Maturity**

Friday 28 February 2031 (payment with a value date of D+1 banking day)

## **Currency**

EUR, for all shares in the basket, changes in the value of the currency in which they are expressed relative to EUR are irrelevant.

## **Starting Value**

Value of the basket based on the weighted average of the Value of the shares included in the basket during the first 10 Valuation Days, starting from Monday 23 February 2026 inclusive.

## **End Value**

Value of the basket based on the weighted average of the Value of the shares included in the basket on the last Valuation Day of the month for the last 12 months before Maturity, more specifically from February 2030 through January 2031 (inclusive).

## **Value**

For all the shares, except for those listed on the Milan stock exchange, the closing price, namely the price of a share in the basket as calculated and notified at closing of the stock exchange by the authority of the stock exchange on which the share is listed (or its legal successor). The reference price is used for shares listed on the Milan stock exchange.

## **Valuation day**

A Valuation Day is set separately for each share in the basket.

A Valuation Day is a day that is a planned trading day both

- i) for the stock exchange on which the share is listed and
- ii) for the stock exchange whose activities have a substantial influence on the trading of options and futures on the share concerned

hereinafter referred to as 'the stock exchanges concerned'.

If on the Valuation Day,

- a) one of the stock exchanges concerned is unexpectedly closed or
- b) there is an event that disrupts the market for a stock exchange concerned or
- c) one of the stock exchanges concerned closes early,

the original Valuation Day is replaced by the following trading day when no event as referred to in a), b) or c) above occurs. An extraordinary closure that has been announced in advance is not considered as early closure.

If a valuation is made on consecutive Valuation Days, the trading day that replaces the original Valuation Day (i) may not coincide with another original Valuation Day and (ii) may not be a trading day that already replaces another original Valuation Day.

However, if an event as referred to under a), b) or c) above occurs on each of the eight trading days following the original Valuation Day,

- (i) the eighth trading day shall be considered as the original Valuation Day and
- (ii) the Bevek shall assess, in good faith and in consultation with the prime counterparty or counterparties with which it has concluded a swap agreement, the price of the share as it would have been traded on that eighth trading day and
- (iii) the Bevek will notify shareholders of any changes regarding setting the Starting Value and/or End Value and conditions of payment.

### Relevant basket

In the table below, the columns from left to right reflect the number of the share, the name of the share, the Bloomberg code, the exchange on which it trades (City-MIC Code) and its initial weighting in the basket.

| (i) | Name                              | Bloomberg Code   | Exchange          | Initial Weighting Coefficients |

### Basket composition methodology

KBC Asset Management used the following methodology to determine the composition of the sub-fund's basket.

#### Step 1 :

The starting point is the global equities universe from which a selection of potential investments is derived in accordance with the economic criteria for the composition of the basket and subject to restrictions regarding stock market capitalisation and liquid assets.

The economic criteria for the composition of the basket determine the size of the final selection.

#### Step 2 :

The selection of shares obtained in step 1 is reduced to a short list using a quantitative selection based on past financial data. The shares selected are those of companies that achieve a good score in terms of management quality, a healthy balance-sheet structure and a positive trend in profitability.

#### Step 3 :

The selection of shares obtained in step 2 is then verified by KBC Asset Management analysts. Shares that are permanently monitored by the analysts and those for which there is a negative recommendation, when the product is launched, are then withdrawn from the selection.

#### Step 4 :

The last reduction of the selection provides the final basket. This selection was made using the technical parameters of options (including the term, volatility, dividend yield and interest rate).

The final basket must satisfy the legal requirements concerning the quantity of shares and adequate distribution in the weighting. In addition, care is taken to ensure compliance with the geographical and/or sector spread. The analysts make a qualitative assessment of each share used taking account of specific knowledge of these shares and the sectors/regions from which they come, in accordance with the term of the sub-fund.

For the sub-fund Optimum Fund World Selection 100-1, about 1710 equities were selected during step 1.

The initial selection was reduced by a maximum 20% in step 2.

This was again reduced by 10% (indicative) in step 3. The final basket set up during step 4 is described above under *Relevant basket*. This basket makes it possible to offer the sub-fund Optimum Fund World Selection 100-1 under the conditions set out in the investment policy referred to above. Here the selection process uses parameters that could affect the potential return on the investments.

#### *Selection criteria for the basket :*

A share/issuer may only form part of the basket if (i) it is listed on a stock exchange, (ii) it has a high market capitalisation, (iii) the Board of Directors of the Beveik has approved its inclusion in the basket, (iv) the issuer is not included in the KBC Group Policy on Blacklisted Companies\* and (v) at the time the swap contracts are being concluded (see 'Permitted swap transactions'), the issuer of the share complies with the KBC Group Investment Policy\* (the 'Selection criteria').

\* The KBC Group Policy on Blacklisted Companies and the KBC Group Investment Policy can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > General exclusion policies for conventional funds and socially responsible investment funds, Paragraph 1 'KBC Group Policy on Blacklisted Companies' and 2 'KBC Group Investment Policy'.

### **Modifications to the basket due to mergers, acquisitions, demergers, nationalisation, bankruptcy or disqualification :**

#### **Mergers or acquisitions**

If, during the life of the sub-fund, one or more issuers of shares in the basket are involved in a merger or acquisition, the shares of the relevant issuers which still meet the selection criteria and comply with the KBC Group Investment Policy\* after these operations will be given a weighting in the basket equal to the sum of the weightings of the shares of all issuers involved in the operation. If, after the operation, none of the issuers involved in the operation meet the selection criteria or comply with the KBC Group Investment Policy\*, the procedures described under 'Nationalisation, bankruptcy or disqualification' will apply.

\* The KBC Group Investment Policy can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > General exclusion policies for conventional funds and responsible investment funds, Paragraph 2 'KBC Group Investment Policy'.

#### **Demergers**

If an issuer of a share in the basket proceeds to a demerger, then the share from the issuer concerned can be substituted either by one of the shares that came about as a result of the demerger and that meets the selection criteria and complies with the KBC Group Investment Policy\*, or by a basket of shares arising from the demerger which meet the selection criteria and comply with the KBC Group Investment Policy\*. This basket of shares will, when calculating the number of shares in the basket, be considered as one share. If, after the operation, none of the shares resulting from the demerger meet the selection criteria or comply with the KBC Group Investment Policy\*, the procedures described under 'Nationalisation, bankruptcy or disqualification' will apply.

\* The KBC Group Investment Policy can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > General exclusion policies for conventional funds and responsible investment funds, Paragraph 2 'KBC Group Investment Policy'.

#### **Nationalisation, bankruptcy or disqualification**

If an issuer of a share in the basket is nationalised, declared bankrupt or no longer meets the selection criteria ('disqualification'), this share will be sold at the last known price before removal. The amount thus realised will then be invested until Maturity at the rate of interest in force on money or bond markets at the moment of removal, and this for a term equal to the term remaining until Maturity of the sub-fund. The realised amount plus the interest will be taken into account at Maturity as the result achieved for that share in order to calculate the final increase in the value of the basket at Maturity.

### **Securities Financing Transactions (SFTs)**

**The sub-fund may not lend any financial instruments.**

#### **General strategy for hedging the exchange risk**

A more detailed explanation can be found in this report's General information on the Beveik under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

#### **Social, ethical and environmental aspects**

A more detailed explanation can be found in this report's General information on the Beveik under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'.

## 2.1.4. Financial portfolio management

The intellectual management of the share portfolio, with the exception of the creation of the sub-fund and its maintenance in terms of the technical, product-specific and legal aspects has been delegated by the management company to KBC Fund Management Limited, 4th Floor, Scotch House, 6/7 Burgh Quay, Dublin 2, D02 VK44, Ireland.

## 2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

## 2.1.6. Index and benchmark

## 2.1.8. Summary risk indicator

- 2 on a scale of 1 (lowest risk) to 7 (highest risk)
- a moderate level of inflation risk: there is no protection against an increase of the inflation.
- a moderate level of market risk: the level of the risk reflects the volatility of the stock market.
- a moderate level of performance risk: the level of the risk reflects the volatility of the stock market.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

## 2.2. Balance sheet

### Fee for managing the investment portfolio

KBC Asset Management NV receives a fee for managing the sub-fund's investments. This fee consists of a varying amount of max. 20 EUR per unit per year (with a maximum of EUR per unit per year for risk management).

This fee, which is calculated every six months, is paid monthly on the last banking day of each month. It can change from one six-month period to the next, within the limits set out below, and is based on the number of units issued at the start of each six-month period.

In the calculation, account is taken of the difference between:

- the return generated by the investments in bonds and other debt instruments, deposits, and/or liquid assets in order to achieve the capital protection on the Maturity date (see *The financial mechanism used to achieve capital protection*), and
- the expenses borne by the sub-fund to achieve a potential return (see *Permitted 'swap' transactions*),
- after deducting the expected fixed and variable expenses of the sub-fund, as mentioned above.

Of this, KBC Fund Management Ltd. receives a fee of no more than 18.95 EUR per unit per year from KBC Asset Management NV for the intellectual management of the sub-fund. KBC Fund Management Ltd. is a wholly owned subsidiary of KBC Asset Management NV.

KBC Asset Management NV has informed the bevek that, if due to the failure of the financial mechanism, the amount that should be paid per unit (after deducting taxes and charges) on the Maturity date, as relevant, is lower than the initial subscription price, KBC Asset Management NV may decide (but is not obliged to) to use the management fee it receives during the current financial year from the sub-fund – and possibly also from other sub-funds of the bevek – to cover this shortfall. This is not a guarantee from KBC Asset Management NV, which may decide at any time and at its own discretion whether or not to use the management fee for this purpose.

KBC Asset Management NV or one of its subsidiaries has also been appointed manager of the SPVs in which the sub-fund may invest (see *Criteria the investments must meet*). KBC Asset Management NV or one of its subsidiaries, as the case may be, receives an annual fee from the relevant SPVs for their management. This management fee may not exceed 0.15% per year and is calculated on the assets managed at the end of the quarter.

The sum of (i) the fee for managing the investment portfolio that the sub-fund pays to the management company and (ii) the management fee that the SPVs in which the sub-fund invests pay to the asset manager, shall never exceed 20.00 EUR per unit per year, as described above.
