18/06/2026

In the event of discrepancies between the Dutch and the other language versions of the prospectus, the Dutch version will prevail.

# Information concerning the Bevek

## A. Introduction of the Bevek

---

### Name

KBC Equity Fund (abbreviated to 'Equity Fund')

### Legal form

Naamloze Vennootschap (limited liability company)

### Date of incorporation

21 March 1991

### Life

Unlimited

### Office

Havenlaan 2, B-1080 Brussels, Belgium

### Status

Public Bevek with various sub-funds that has opted for investments complying with the conditions of Directive 2009/65/EC and which, as far as its operations and investments are concerned, is governed by the Law of 3 August 2012 relative to undertakings for collective investment complying with the conditions of Directive 2009/65/EC and the undertakings for investment in receivables.

In the relationship between the investors, each sub-fund will be viewed as a separate entity. Investors have a right only to the assets of and return from the sub-fund in which they have invested. The liabilities of each individual sub-fund are covered only by the assets of that sub-fund.

The natural persons to whom the executive management of the management company has been entrusted may also be directors of various Beveks.

### Identity of the statutory auditor of the management company or name of the certified firm of auditors and identity of the certified auditor representing it

KPMG Bedrijfsrevisoren Belgium, Brussels National Airport 1K, 1930 Zaventem, represented by Kenneth Vermeire, company auditor and recognized auditor.

### Subscribed capital of the management company stating the paid-up element

The issued capital amounts to 35.754.192 euros.  
The capital is fully paid up.

## Remuneration policy

The remuneration policy of the management company's staff is based on the KBC Remuneration Policy, the general rules laid down regarding the remuneration policy for all staff of KBC group entities and specific guidelines laid down for staff who could have a material impact on the company's risk profile ('Key Identified Staff'). The KBC Remuneration Policy is updated annually.

### General rules

Each staff member's salary comprises two parts: a fixed component and a variable component. The fixed component is primarily determined by the staff member's position (such as the responsibility they bear and the complexity of their duties). The variable component is dependent on various factors such as the company's results, the results of the staff member's department and the staff member's individual targets. The remuneration policy is also affected by market practices, competitiveness, risk factors, the company's and its shareholders' long-term objectives and developments within the regulatory framework.

### 'Key Identified Staff'

Special rules apply to 'Key Identified Staff'. The variable salary component for this group of staff is allotted in a manner that promotes appropriate risk management and cannot give rise to the taking of extreme risks.

For the updated version of the following information (such as a description of the method for calculating the remuneration and the benefits, and the identity of the persons responsible for allocating the remuneration and the benefits, including the make-up of the remuneration committee, if such a remuneration committee has been established) please refer to the website [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) (Remuneration Policy). This information is also available free of charge at the counters of the institutions providing the financial services.

## Financial service providers

The financial services providers in Belgium are:

KBC Bank NV, Havenlaan 2, B-1080 Brussels

### *Principal activities of the institutions providing the financial services*

The Bevek has concluded a contract with the financial services providers for making payments to shareholders, redemption or repayment of shares and distributing information concerning the Bevek.

## Distributor

KBC Asset Management NV, Havenlaan 2, B-1080 Brussels

### *Principal activities of the distributor:*

The distributor is authorised to process the requests for subscription to and redemption of shares.

## Custodian

KBC Bank NV, Havenlaan 2, B-1080 Brussels

### *Custodian's activities*

The custodian:

- a) Ensures the safe-keeping of the assets of the Bevek and compliance with the standard obligations in this regard;
- b) Ensures that the sale, issue, purchase, redemption and withdrawal of shares in the Bevek occur in compliance with the applicable legal and regulatory provisions, the articles of association and the prospectus;
- c) Ensures that the net asset value of the shares in the Bevek is calculated in accordance with the applicable legal and regulatory provisions, the articles of association and the prospectus;
- d) Carries out the instructions of the management company or an investment company, provided that these do not contravene the applicable legal and regulatory provisions, the articles of association and/or the prospectus;
- e) Ensures that in transactions relating to the assets of the Bevek, the equivalent value is transferred to the Bevek within the usual terms;
- f) Ascertains that:
  - i. The assets in custody correspond with the assets stated in the accounts of the Bevek;
  - ii. The number of shares in circulation stated in the accounts corresponds with the number of shares in circulation as stated in the accounts of the Bevek;
  - iii. The investment restrictions specified in the applicable legal and regulatory provisions, the articles of association and the prospectus are respected;
  - iv. The rules regarding fees and costs specified in the applicable legal and regulatory provisions, the articles of association and the prospectus are respected;
  - v. The returns of the Bevek are appropriated in accordance with the applicable legal and regulatory provisions, the articles of association and the prospectus.

The custodian ensures that the cash flows of the Bevek are correctly monitored and in particular that all payments

by or on behalf of subscribers on subscription to shares in the Bevek, have been received and that all the cash of the Bevek has been booked to cash accounts that:

1. Have been opened in the name of the Bevek, in the name of the management company acting on its behalf, or in the name of the custodian acting on its behalf;
2. Have been opened at an entity as intended in Article 18(1a, b and c) of Directive 2006/73/EC; and
3. Are held in accordance with the principles set out in Article 16 of Directive 2006/73/EC.

If the cash accounts have been opened in the name of the custodian acting in name of the Bevek, no cash from the entity intended in Article 18(1a, b and c) of Directive 2006/73/EC and none of the custodian's own cash may be booked to these accounts.

The assets of the Bevek are placed in custody with a custodian as follows:

- a) For financial instruments that may be held in custody:
  - i. The custodian will hold in custody all financial instruments that may be registered in a financial instrument account in the books of the custodian, as well as all financial instruments that can be physically delivered to the custodian;
  - ii. the custodian will ensure that all financial instruments that can be registered in a financial instrument account in the custodian's books, are registered in the custodian's books in separate accounts in accordance with the principles set out in Article 16 of Directive 2006/73/EC; these separate accounts have been opened in the name of the Bevek or in the name of the management company acting on its account, so that it can be clearly ascertained at all times that they belong to the Bevek, in accordance with the applicable law.
- b) For other assets:
  - i. The custodian will verify that the Bevek or the management company acting on its behalf is the owner of the assets by checking based on information or documents provided by the Bevek or the management company and, where appropriate, of available external proofs, whether the Bevek or the management company acting on its behalf has ownership;
  - ii. The custodian will maintain a register of the assets from which it is clear that the Bevek or the management company acting on its behalf is the owner thereof and will keep that register up-to-date.

The custodian's duty to return the financial instruments only applies to financial instruments that may be held in custody.

### **Custody tasks delegated by the custodian**

The custodian of the Bevek has delegated a number of custody tasks as of the publication date of this prospectus. The tasks delegated to this sub-custodian are:

- Holding the required accounts in financial instruments and cash;
- Carrying out the custodian's instructions regarding the financial instruments and cash;
- Where required, the timely delivery of the relevant financial instruments to other parties involved with holding them;
- The collection of every type of return from the financial instruments;
- The appropriate communication to the custodian of all information that the sub-custodian receives directly or indirectly from the issuers via the chain of depositaries and performing the required formalities with regard to the financial instruments, with the exception of exercising voting rights, unless otherwise agreed in writing;
- Maintaining and communicating to the custodian all required details regarding the financial instruments;
- Processing corporate events on financial instruments, whether or not after the holder of these instruments has made a choice;
- Providing the services that have been agreed between the custodian and the sub-custodian and are legally permitted, with the exception of investment advice and asset management and/or any other form of advice relating to transactions in or the simple holding of financial instruments;
- Maintaining and communicating to the custodian all required details regarding the financial instruments.

### **List of sub-custodians and sub-sub-custodians**

The updated list of entities to which the custodian has delegated custody duties and, where applicable, the entities to which the delegated custody duties have been sub-delegated, can be consulted at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents).

The custodian is liable for the loss of financial instruments held in custody in the sense of Article 55 of the Law of 3 August 2012 relative to undertakings for collective investment complying with the conditions of Directive 2009/65/EC and the undertakings for investment in receivables.

Investors can approach the institutions providing the financial services for up-to-date information regarding the identity of the custodian and its principal duties, as well as the delegation of these duties, and the identity of the institutions to which these duties have been delegated or sub-delegated, and also regarding any conflicts of interest as specified below.

### **Conflicts of interest**

The custodian will take all reasonable measures to identify conflicts of interest that may arise in the execution of its activities between

- The custodian and management company of the Bevek, or the management companies of other beveks or funds of which the custodian holds assets;
- The custodian and the Bevek whose assets the custodian holds, or other beveks or funds of which the custodian holds assets;
- The custodian and the investors in this Bevek whose assets the custodian holds, or other beveks or funds of which the custodian holds assets;
- These parties themselves.

The custodian of the Bevek will implement and maintain effective organisational and administrative procedures in order to take all reasonable measures to detect, prevent, manage and control conflicts of interest so that they do not prejudice the interests of the aforementioned parties.

If these procedures are not sufficient to be able to assume with reasonable certainty that the interests of the aforementioned parties have not been harmed, the investors will be notified of the general nature or causes of conflicts of interest according to the procedure described on the following website: [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) (About Us > Code of conduct for conflicts of interest). Investors who wish to be informed personally of such conflicts of interest can contact the financial services providers. If necessary, the open-ended investment company's custodian will adjust its processes.

## Statutory auditor of the Bevek

Forvis Mazars Bedrijfsrevisoren BV, Manhattan Office Tower - Bolwerklaan 21 b8, 1210 Brussel, represented by Dirk Stragier, company auditor and recognized auditor and Nele Van Laethem, company auditor and recognized auditor

### *Principal activities of the statutory auditor*

The statutory auditor checks whether the financial statements of the Bevek are a true and fair presentation of the financial situation of the Bevek and whether the annual report is in line with the financial statements. To determine the right working methods, the statutory auditor takes account of the existing internal audit of the Bevek in terms of drafting the financial statements and ensuring that they are true and fair.

## Promoter

KBC.

### *Principal activities of the promoter:*

The promoter promotes the Bevek and its sub-funds in the market.

### **Person(s) bearing the costs (in the situations referred to in articles 115, §3, para. 3, 149, 152, para. 2, 156, §1, para. 1, 157, §1, para. 3, 165, 179, para. 3 and 180, para. 3 of the Royal Decree of 12 November 2012 on the undertakings for collective investment complying with the conditions of Regulation 2009/65/EC)**

KBC Asset Management NV and/or one or more companies that are members of the KBC Group and/or the person(s) referred to under "Financial service providers".

## C. Corporate information

---

### Capital

The capital of the Bevek is at all times equal to the net asset value. The capital may not be less than 1 200 000 euros.

### Balance sheet date

31 December.

### Rules for the valuation of the assets

See article 9 of the articles of association of the Bevek.

### Rules concerning the allocation of the net income

See article 17 of the articles of association of the Bevek.

### Annual general meeting of shareholders

The annual general meeting is held on the second-last banking day of the month of March at 9 am at the Office of the Bevek or at any other place in Belgium indicated in the convening notice.

### Voting rights of the shareholders

In accordance with the articles of association and the Code of Companies and associations, the shareholder has a vote at the General Meeting of shareholders in proportion to the size of their shares.

### Liquidation of the Bevek or a sub-fund

See article 19 of the articles of association of the Bevek and the applicable provisions of the Royal Decree of 12 November 2012 on the undertakings for collective investment complying with the conditions of Regulation 2009/65/EC.

## D. Techniques for efficient portfolio management

### Securities Financing Transactions (SFTs)

The following applies except in the case of the Emerging Markets Responsible Investing, EMU Small & Medium Caps Responsible Investing, Eurozone DBI-RDT, Fundamental Opportunities DBI-RDT, Global Value DBI-RDT Responsible Investing, Minimum Variance Responsible Investing, World DBI-RDT, World DBI-RDT Responsible Investing sub-fund:

#### General

**Each sub-fund may lend financial instruments within the limits set by law and regulations.**

Lending financial instruments is a transaction where one a sub-fund transfers financial instruments to a counterparty in exchange for financial collateral and subject to an undertaking on the part of that counterparty to supply the sub-fund with comparable financial instruments at some future date or on the sub-fund's request. The counterparty pays a fee for this to the sub-fund.

This takes place within the framework of a securities lending system managed by either a 'principal' or an 'agent'. If it is managed by a principal, a sub-fund has a relationship only with the principal of the securities lending system which acts as counterparty and to whom title to the loaned securities is transferred. If it is managed by an agent, a sub-fund has a relationship with the agent (as manager of the system) and with one or more counterparties to whom title to the loaned securities is transferred. The agent acts as intermediary between a sub-fund and the counterparty or counterparties.

The sub-funds use the lending of financial instruments to generate additional income. This might consist of a fee paid by the principal or, in the event that the fund performs the securities lending through an agent, by the counterparty, as well as income generated through reinvestments.

**The sub-funds are not permitted to agree forms of SFTs other than lending financial instruments.**

#### General information on the SFTs used

| Type of SFT                   | Types of asset that the SFT can involve          | Maximum percentage of the assets under management that can be involved in the SFT                           | Anticipated percentage of the assets under management that will be involved in the SFT                                              |
|-------------------------------|--------------------------------------------------|-------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------|
| Lending financial instruments | Only <b>shares</b> and <b>bonds</b> will be lent | When lending financial instruments a <b>maximum of 30% of the assets under management</b> will be involved. | <b>Depending on market conditions 0–30% of the assets under management</b> will be involved in the lending of financial instruments |

## Criteria for the selection of counterparties

Lending financial instruments only occurs with high-quality counterparties. The management company selects which counterparties qualify for the lending of financial instruments.

The selected counterparties must meet the following minimum requirements to this end:

| Legal status                                                                                                                                                                                                                                                                                                                                                                                                                         | Minimum rating                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | Country of origin                                                         |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------|
| The counterparty must belong to one of the following categories:<br><br>a) A credit institution; or<br>b) An investment firm; or<br>c) A settlement or clearing institution; or<br>d) A central bank of a member state of the European Economic Area, the European Central Bank, the European Investment Bank or a public international financial institution in which one or more European Economic Area member states participate. | Only counterparties rated as investment grade may be considered.<br><br>An investment-grade rating means: a rating equal to or higher than BBB- or Baa3 according to one or more of the following accredited rating agencies:<br><br>- Moody's (Moody's Investors Service);<br>- S&P (Standard & Poor's, a division of the McGraw-Hill Companies); en<br>- Fitch (Fitch Ratings).<br><br>If the counterparty does not have a rating, the rating of the counterparty's parent company may be taken into consideration. | All geographical regions may be considered when selecting counterparties. |

The relationship with the counterparty or counterparties is governed by standard international agreements.

## Description of acceptable financial collateral and its valuation

When a sub-fund lends financial instruments, it receives financial collateral in return. This financial collateral protects the sub-fund fund from default on the part of the counterparty to which the financial instruments have been lent.

Each sub-fund may accept the following forms of financial collateral:

- **Cash**; and/or
- **Bonds and other debt instruments**, issued or guaranteed by the central bank of a member state of the European Economic Area, the European Central Bank, the European Union or the European Investment Bank, a member state of the European Economic Area or the Organisation for Economic Cooperation and Development, or by a public international institution in which one or more member states of the European Economic Area participate, other than the counterparty or a person associated with it, and which are permitted to trade on a regulated market; and/or
- **Participation rights in a monetary undertaking for collective investment** that complies with Directive 2009/65/EC or which meets the conditions of Article 52(1:6) of the Royal Decree of 12 November 2012 on certain public institutions for collective investment which meet the conditions of Directive 2009/65/EC, and the net asset value of which is calculated and published daily.

The valuation of the financial collateral occurs daily in accordance with the most applicable and accurate method: mark-to-market. A daily variation margin applies based on the daily valuation. Consequently, daily margin calls are possible.

There are no limits regarding the term of the financial collateral.

## Reuse of financial collateral

If a sub-fund receives collateral in the form of cash, it can reinvest this cash in

- **deposits with credit institutions** which can be withdrawn immediately and which mature within a period not exceeding twelve months, provided that the office of the credit institution is situated within a member state of the EEA, or if the office is established in a third country, provided that it is subject to prudential supervisory rules which the FSMA considers as being equivalent to the rules under European Law.
- **short term money market funds** as defined in Regulation (EU) 2017/1131 of the European Parliament and of the Council of 14 June 2017 on money market funds.
- **government bonds** that are denominated in the same currency as the cash received and that meet the terms and conditions set out in the Royal Decree of 7 March 2006 on securities lending by certain undertakings for collective investment.

Reinvesting in this way can eliminate the credit risk to which a sub-fund is exposed concerning the collateral in respect of the financial institution where the cash account is held, but there is still a credit risk in respect of the issuer or issuers of the debt instrument(s). The management company may delegate implementation of the reinvestment policy to a third party, including the agent managing the securities lending system.

Reinvestment in deposits at the same credit institution may not exceed 10% of the sub-fund's total assets. Reinvestment in bonds issued by the same public authority may not exceed 20% of the sub-fund's total assets.

### ***Policy on the diversification of collateral and the correlation policy***

**A sub-fund is not permitted to accept financial collateral issued by the party offering them.**

A sub-fund's exposure to financial collateral issued by the same issuer may not exceed 20% of the sub-fund's net assets.

### ***Holding of the financial collateral***

The financial collateral will be held in the following manner:

- for cash: held in a cash account; and
- for financial collateral that is not cash: registration in a custody account.

The custodian of the financial collateral and/or the entity to which certain tasks relating to the custody of the financial collateral has been delegated is not necessarily the same entity as the custodian of the Bevek's assets, as stated under 'B. Service providers to the Bevek'.

### ***Influence of SFTs on a sub-fund's risk profile***

**This lending does not affect a sub-fund's risk profile since:**

- The choice of principal, agent and every counterparty is subject to strict selection criteria.
- The return of securities similar to the securities that have been lent can be requested at any time, which means that the lending of securities does not affect management of a sub-fund's assets.
- A margin management system is used to ensure that a sub-fund is at all times the beneficiary of financial security (collateral) in the form of cash or other specific types of securities with a low risk, such as government bonds, in case the principal or the counterparty (if a sub-fund uses an agent) does not return similar securities. The actual value of the collateral in the form of specific types of securities with a low risk must at all times exceed the actual value of the loaned securities by 5%. Furthermore, when calculating the value of the specific types of securities with a low risk provided as collateral, a margin of 3% is applied, which should prevent a negative change in price resulting in their actual value no longer exceeding the actual value of the securities. The value of the collateral in the form of cash must at all times exceed the actual value of the loaned securities.
- The criteria met by the collateral are such as to limit the credit risk. A rating of at least investment grade is required in the case of collateral in the form of bonds and other debt instruments. In the case of collateral in the form of participation rights in monetary undertakings for collective investment, the inherent diversification of these undertakings limits the credit risk. In the case of cash that is reinvested, a rating of at least investment grade is required when reinvesting in either deposits or government bonds. In the case of reinvestment in short-term money-market funds, the inherent diversification of these funds limits the credit risk.
- The criteria met by these types of collateral are such as to limit the liquidity risk. It must be possible to value the financial collateral on a daily basis by market price or to withdraw it on demand (on reinvestment of cash in deposits).
- In the case of reinvestment of cash, there are additional criteria to limit the market risk associated with the initial values in cash. When reinvesting bonds, only bonds with a remaining term to maturity of no more than one year may be considered. The shortness of this remaining term results in a low sensitivity to interest rate movements. In the case of reinvestment in short-term money-market funds, the low duration of these funds limits the market risk with respect to the initial value in cash.
- The custody of financial collateral consisting of securities occurs by placing the securities in custody accounts which, in the event of the custodian's bankruptcy, are held outside its insolvent estate. The custody of financial collateral consisting of cash occurs by holding it in cash accounts, whether or not segregated. The extent to which the custody of financial collateral consisting of cash occurs in non-segregated accounts has no influence, however, on the sub-fund's risk profile.
- Operational risks are limited by operational controls, in the shape of daily control of the market values of loaned securities and collateral and reconciliation of internal and external data.

### ***Distribution policy for returns on the utilised SFTs***

**By lending securities, a sub-fund can generate additional income, which might consist of a fee paid by the principal or the counterparty (if a sub-fund uses an agent) as well as income generated through reinvestments. After deducting the direct and indirect charges – set at a flat rate of 35% of the fee received and consisting of the charges for the clearing services provided by KBC Bank NV, the charges paid to the management company for setting up and monitoring the system for lending securities, the charges for margin management, the charges associated with cash and custody accounts and cash and securities transactions, the fee paid for any management of reinvestments and, if a sub-fund uses an agent, the fee paid to the agent. This income is paid to a sub-fund. It should be noted in this regard that KBC Bank NV is an entity affiliated with the management company.**

**More information is provided on the terms and conditions governing securities lending in the annual or half-yearly report for the Bevek.**

## General strategy for hedging the exchange rate risk

In order to protect its assets against exchange rate fluctuations and within the limitations laid down in the articles of association, a sub-fund may perform transactions relating to the sale and/or the purchase of forward currency contracts, as well as the sale of call options and the purchase of put options on currencies. The transactions in question may relate solely to contracts traded on a regulated market that operates regularly, that is recognised and that is open to the public or, that are traded with a recognised, prime financial institution specialising in such transactions and dealing in the over-the-counter (OTC) market in options. With the same objective, a sub-fund may also sell currencies forward or exchange them in private transactions with prime financial institutions specialising in such transactions.

## E. Social, ethical and environmental aspects

The investment policy takes into account certain social, ethical and environmental aspects against which issuers are being assessed. Investments may not be made in, amongst others:

- financial instruments issued by manufacturers of controversial weapon systems that are prohibited by international (and national) law or for which there is a broad consensus that they should be banned. These weapon systems include: cluster bombs and sub-munitions, chemical or biological weapons, anti-personnel mines (including Claymore mines), weapons containing depleted uranium;
- financial instruments issued by manufacturers of weapons containing white phosphorus;
- financial instruments issued by companies where there are serious indications that they are perpetrators of, accomplices or accessories to, or stand to benefit from the violation of globally recognised standards of Responsible Investing. The main criteria used cover human rights, employee rights, the environment and anticorruption.

In this way, not only is a purely financial reality represented, but also the social reality of the sector or region. This list of exclusion criteria is not exhaustive.

A complete overview of the exclusion criteria can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > *General exclusion policies for conventional and Responsible Investing funds*. These exclusion criteria can be modified at any time by the management company.

For some sub-funds, additional criteria relating to Responsible Investing may apply. These are further specified in 'Information concerning the sub-fund – 2. Investment information – Selected strategy' and on [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > *Exclusion policies for Responsible Investment funds*.

For sub-funds that are passively managed and therefore replicate the composition of a financial index, the following applies:

Investments may not be made in financial instruments issued by manufacturers of controversial weapon systems that are prohibited by national law. These weapon systems include: cluster bombs and sub-munitions, anti-personnel mines (including Claymore mines), weapons containing depleted uranium (More information can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > *General exclusion policies for conventional and Responsible Investing funds*).

## Integration of sustainability risk into the investment policy:

In the investment policy, the management company shall take into account the sustainability risk as defined in prospectus under title "F. Information on the risk profile of the UCITS" as follows:

- I. by defining an exclusion policy (the "Exclusion Criteria") applicable to all funds and Sicavs. (Further information can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > *General exclusion policies for conventional and Responsible Investing funds*); and
- II. additional criteria relating to Responsible Investing may apply for certain sub-funds. If applicable these additional criteria are specified under title '2. Investment information – Selected Strategy' and on [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > *Exclusion policies for responsible investment funds*.

In its investment policy, the management company constantly assesses the underlying investments at issuer level, but also (if relevant) at the level of the asset allocation and the regional or sectoral allocation. In these regular assessments, the sustainability risk is considered as one of the various elements that can influence the return. The Responsible Investing research team assigns an ESG risk score to the majority of companies included in the best-known benchmarks and to a selection of small and medium-sized companies, based on input from an ESG data

provider as well as internal research, where ESG stands for "Environmental, Social and Governance". The ESG risk scores are shared internally with portfolio managers and strategists so that they can use them as a factor in the investment decision-making process. Responsible Investing funds additionally have a target to improve the weighted average ESG risk score (of companies) of the fund versus its asset allocation. More information on our Responsible Investing methodology can be found in this policy document: [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents)  
> Investment policy for Responsible Investing funds.

## F. Information on the risk profile of the UCITS

**Investors should take note of the general information below, the individual risks of a sub-fund which are listed under the "Information regarding the sub-fund - 3. Risk profile", as well as the "What are the risks and what could I get in return?" section in the key information document.**

The value of a share can decrease or increase and the investor may not get back the amount invested.

### List of risks

**The information below is a general overview of the potential risks that the investor could incur. The assessment of the risks in each sub-fund can be accessed under the 'Information regarding the sub-fund - 3. Risk profile'. There, a list of risks for the relevant sub-fund may be consulted, with an indication of the risk assessment, and a brief justification for the risk assessment.**

#### Market risk

The risk that the entire market of an asset class will decline, thus affecting the prices and values of the assets in the portfolio. In an equity fund, for instance, this is the risk that the equity market in question will go down and, in a bond fund, the risk that the bond market in question will fall. The higher the volatility of the market in which the UCITS invests, the greater the risk. Such markets are subject to greater fluctuations in return.

#### Credit risk

The risk that an issuer or a counterparty will default and fail to meet its obligations towards a sub-fund. This risk exists to the extent that a sub-fund invests in debt instruments. Debtor quality also affects the credit risk (e.g., an investment in a debtor with a rating, such as 'investment grade', will pose a lower credit risk than an investment in a debtor with a low rating, such as 'speculative grade'). Changes in the quality of the debtor can have an impact on the credit risk.

#### Settlement risk

The risk that settlement via a payment system will not take place as expected because payment or delivery by a counterparty fails to take place or is not in accordance with the initial conditions. This risk exists to the extent that the UCITS invests in regions where the financial markets are not yet well developed. This risk is limited in regions where the financial markets are well developed.

#### Liquidity risk

The risk that a position cannot be liquidated in a timely manner at a reasonable price. This means that the UCITS can only liquidate its assets at a less favourable price or after a certain period. The risk exists if the UCITS invests in instruments for which there is no market or a market with only limited liquidity; for example, in the case of unlisted investments and direct real estate investments. OTC derivatives may also lack liquidity.

#### Exchange or currency risk

The risk that the value of an investment will be affected by changes in exchange rates. This risk exists only to the extent that the UCITS invests in assets that are denominated in a currency that develops differently from the reference currency of the sub-fund or the share class. For instance, a sub-fund or share class denominated in USD will not be exposed to any exchange risk when investing in bonds or equities denominated in USD, but it will be exposed to an exchange risk when investing in bonds or equities denominated in EUR.

The assessment of the exchange risk does not take account of the volatility of all currencies in which the assets in portfolio are denominated vis-à-vis the reference currency of the UCITS.

#### Custody risk

The risk of loss of assets held in custody as a result of insolvency, negligence or fraud on the part of the custodian or a sub-custodian.

### **Concentration risk**

The risk relating to a large concentration of investments in specific assets or in specific markets. This means that the performance of those assets or markets will have a substantial impact on the value of the UCITS portfolio. The greater the diversification of the UCITS portfolio, the smaller the concentration risk. This risk will, for example, also be higher in more specialised markets (e.g., a specific region, sector or theme) than in widely diversified markets (e.g., a worldwide allocation).

### **Performance risk**

The risk to return, including the fact that the risk may vary depending on the choices made by each undertaking for collective investment, as well as the existence or absence of, or restrictions upon, any third-party security. The risk depends in part on the market risk and on how active the management of the manager is.

### **Capital risk**

The risks to capital, including the potential risk of erosion due to the redemption of shares and the distribution of profit in excess of the investment return. This risk can be limited by loss-mitigation, capital-protection or capital-guarantee techniques.

### **Flexibility risk**

Inflexibility both within the product itself, including the risk of premature redemption, and constraints on switching to other providers. This risk can mean that the UCITS is unable to take the desired actions at certain times. It can be higher in the case of UCITS or investments subject to restrictive laws or regulations.

### **Inflation risk**

This risk is dependent on inflation. It applies, for example, to bonds with a long term to maturity and a fixed income.

### **Environmental factors**

Uncertainty concerning the changeability of environmental factors (such as the tax regime or amendments to laws or regulations) that could affect how the UCITS operates.

### **Sustainability risk**

Sustainability risk is the risk that the value of the investment will be adversely affected by environmental, social or governance events or conditions.

Environmental risk is the risk that the value of the investment will be adversely affected by environmental events or conditions, including those resulting from climate change and other environmental degradation.

Social risk is the risk that the value of the investment will be adversely affected by social events or conditions.

Governance risk is the risk that the value of the investment will be adversely affected by events or circumstances resulting from insufficient corporate governance.

The nature of these risks varies over time:

- I. In the short term, sustainability risk is usually dependent on a particular event. Such risks usually only affect the value of the investment when the event occurs. Examples of these events are an incident (resulting in a lawsuit to compensate for e.g. environmental damage), lawsuits and fines (e.g. for not respecting social legislation), scandals (e.g. when a company gets bad publicity because human rights are not respected within the production chain or because the products do not meet the promised ESG standards, where ESG stands for "Environmental, Social and Governance"). These types of sustainability risks are rated higher when an issuer is less stringent on ESG standards; and
- II. Long-term sustainability risk refers to risks that may develop over the long term, such as: business activities that may come under pressure due to climate change (e.g. parts of the automotive industry); changing product preferences of customers (e.g. preference for more sustainable products); difficulties in recruitment; rising costs (e.g. insurance companies facing claims as a result of changing weather conditions). As this risk develops over the long term, companies may seek to mitigate it, for example, by changing their product offerings, improving their supply chain, etc. However, the ability to adapt is not the same for all types of business activities, so some activities are more exposed to sustainability risk than others (e.g. the oil sector). This is why the sustainability risk also depends on the specific investment policy of a sub-fund.

Unless otherwise specified in the "Information concerning the sub-fund - 3. Risk profile – Environmental factors", the sustainability risk is 'low'.

## Summary risk indicator

In accordance with Commission Regulation (EU) No.1286/2014, the Commission Delegated Regulation 2017/653 (EC) of March 8, 2017 as amended by the Commission Delegated Regulation 2021/2268 (EC) of September 6, 2021, a summary risk indicator has been calculated per sub-fund, or where relevant per share class or type of shares. The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. It is given as a figure between 1 and 7. The higher the figure, the greater the potential return, but also the more difficult it is to predict this return. Losses are possible too. The lowest figure does not mean that the investment is entirely free of risk. However, it does indicate that, compared with the higher figures, this product will generally provide a lower, but more predictable return.

The summary risk indicator is assessed regularly and can therefore go up or down based on data from the past. Data from the past is not always a reliable indicator of future risk and return.

The most recent indicator can be found under the 'What are the risks and what could I get in return?' heading in the 'Key Information' document.

## G. Fees and charges regarding the Bevek

A detailed overview of the fees and charges of each sub-fund can be accessed in the "Information regarding the sub-fund - 5. Types of shares and fees and charges".

### Recurrent fees and charges

| Recurrent fees and charges paid by the Bevek                                   |                                                                                                                                                                                             |
|--------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Fees paid to directors, insofar as the General Meeting has approved said fees. | 250 EUR per meeting attended, linked to the director's actual attendance of/participation in the meetings of the Board of Directors. This fee is divided across all the sub-funds marketed. |

| Recurrent fees and charges paid by the sub-fund |                                                                                                                                                                                                                                                |
|-------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Fee paid to the statutory auditor of the Bevek  | Fee of the statutory auditor:<br>6 150.00 EUR/year (excluding VAT) and<br>980 EUR/year (excluding VAT) for non-structured sub-funds<br>These amounts can be indexed on an annual basis in accordance with the decision of the General Meeting. |

### Ongoing charges

The key information document sets out the ongoing charges, which consist of management fees and other administrative or operating costs on the one hand and transaction costs on the other hand, as calculated in accordance with the provisions of the Commission Delegated Regulation 2017/653 (EC) of March 8, 2017 as amended by the Commission Delegated Regulation 2021/2268 (EC) of September 6, 2021.

The ongoing charges are the charges taken from the UCITS over a financial year. They are shown per sub-fund, or where relevant per share class or type of shares, in a figure for management fees and other administrative or operating costs and a figure for transaction costs. The figure for management fees and other administrative or operating costs represents all annual expenses and other payments from a sub-fund's assets over the given period that is based on the previous year's figures. The transaction cost figure is an estimate of both annual explicit and implicit transaction costs and is based on the transactions of the previous 36 months. For sub-funds, share classes or types of shares that have been in existence for less than 36 months, the Commission Delegated Regulation 2017/653 (EC) of March 8, 2017 as amended by the Commission Delegated Regulation 2021/2268 (EC) of September 6, 2021 establishes a modified estimation method. These figures are expressed as a percentage of the average net assets per sub-fund or, where relevant, of the share class or type of shares.

The following are not included in the charges shown: entry and exit charges paid by the investor, incidental costs such as performance fees and payments made with a view to providing collateral in the context of derivative financial instruments.

### Portfolio turnover rate

An important indicator for estimating the transaction costs to be paid by a sub-fund is the portfolio turnover rate. This rate shows the frequency with which the composition of the assets changes during a year as a result of transactions not dependent on the subscription for or redemption of shares. Active asset management may result in high turnover rates. The portfolio turnover rate for the preceding year is given in the annual report.

## Existence of Commission Sharing Agreements

For the following sub-funds exist Commission Sharing Agreements: Asia Pacific, Asia Pacific Responsible Investing, Belgium, CSOB Akciovy fond dividendovych firem, Emerging Markets, Emerging Markets Responsible Investing, EMU Small & Medium Caps, EMU Small & Medium Caps Responsible Investing, Enhanced Intelligence Stock Selection, Europe, Eurozone, Eurozone DBI-RDT, Eurozone Responsible Investing, Family Enterprises, Flanders, Fundamental Opportunities, Fundamental Opportunities DBI-RDT, Global Value DBI-RDT Responsible Investing, Global Value Responsible Investing, Medical Technologies, Minimum Variance Responsible Investing, New Asia, North America, North American Continent, North American Continent Responsible Investing, North America Responsible Investing, Rest of Europe, Rest of Europe Responsible Investing, Strategic Satellites Responsible Investing, Trends Responsible Investing, USA & Canada, USA & Canada Responsible Investing, We Care Responsible Investing, We Digitize Responsible Investing, We Like Responsible Investing, We Live Responsible Investing, We Shape Responsible Investing, World, World DBI-RDT, World DBI-RDT Responsible Investing, World Responsible Investing

For the following sub-funds don't exist Commission Sharing Agreements: US Small Caps

The Management Company, or where applicable, the appointed manager has entered into a Commission Sharing Agreement with one or more brokers for transactions in shares on behalf of one or more sub-funds. This agreement specifically concerns the execution of orders and the delivery of research reports.

### What the Commission Sharing Agreement entails:

The Management Company, or where appropriate, the appointed manager can ask the broker to pay invoices on their behalf for a number of goods and services provided. The broker will then pay those invoices using the savings that have been built up to a certain percentage above the gross commission that it receives from the sub-funds for carrying out transactions.

### N.B.:

Only goods and services that assist the Management Company, or where applicable, the appointed manager in managing the sub-funds in the interest of this a sub-fund can be covered by a Commission Sharing Agreement.

### Goods and services eligible for a Commission Sharing Agreement:

- Research-related and advice-related services;
- Portfolio valuation and analysis;
- Market information and related services;
- Return analysis;
- Services related to market prices;
- Computer hardware linked to specialised computer software or research services;
- Dedicated telephone lines;
- Fees for seminars when the topic is relevant to investment services;
- Publications when the topic is relevant to investment services;
- All other goods and services that contribute directly or indirectly to achieving the investment objectives of the sub-funds.

The Management Company, or where appropriate, the appointed manager has laid down an internal policy as regards entering into Commission Sharing Agreements and avoiding possible conflicts of interest in this respect, and has put appropriate internal controls in place to ensure this policy is observed.

More information on Commission Sharing Agreements is available in the annual report.

## Existence of fee sharing agreements and rebates

The management company may share its fee with the distributor, and institutional and/or professional parties.

In principle, the percentage share amounts to between 35% and 70%. However, in a small number of cases, the distributor's fee is less than 35%. Investors may, on request, obtain more information on these cases.

If the management company invests the assets of the undertaking for collective investment in units of undertakings for collective investment that are not managed by an entity of KBC Groep NV, and receives a fee for doing so, it will pay this fee to the undertaking for collective investment.

Fee-sharing does not affect the amount of the management fee paid by a sub-fund to the management company. This management fee is subject to the limitations laid down in the articles of association. The limitations may only be amended after approval by the General Meeting.

The management company has concluded a distribution agreement with the distributor in order to facilitate the wider distribution of the sub-fund's shares by using multiple distribution channels.

It is in the interests of the holders of shares of a sub-fund and of the distributor for the largest possible number of shares to be sold and for the assets of a sub-fund to be maximised in this way. In this respect, there is therefore no question of any conflict of interest.

## H. Tax treatment

### Of the Bevek

#### *Annual tax on undertakings for collective investment*

The following tax is due payable by the Bevek :

|                                                      |                                                 |                                                                                                                                                                                                                         |
|------------------------------------------------------|-------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Annual tax on undertakings for collective investment | 0.0925% (0.01% for institutional share classes) | of the net amounts outstanding in Belgium on 31 December of the preceding year. The amounts already included in the tax base of the underlying undertakings for collective investment are not included in the tax base. |
|------------------------------------------------------|-------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

Furthermore tax withheld at the source on foreign income is recovered by the Bevek (in accordance with double taxation conventions).

### Of the investor

The following tax-related information is of a general character and is not intended to cover all aspects of an investment in a UCITS. In certain cases entirely different rules might even apply. Moreover, both tax law and the interpretation of it can change. Investors who wish to have more information about the tax implications – in both Belgium and abroad – of acquiring, holding and transferring shares should seek the advice of their usual financial and tax advisers.

#### *Withholding tax*

This tax is charged at 30%.

#### *For investors subject to personal income tax or tax on legal entities*

##### Tax on dividends (distribution shares)

For investors subject to personal income tax or to tax on legal entities and who have received this income through the normal management of their assets, the withholding tax is automatically the final tax on this income.

##### Tax on debt claim returns (Article 19bis of the 1992 Income Tax Code)

If the percentage of debt claims is more than 25% (for shares acquired as of 1 January 2018, this percentage is lowered to 10%), both the capitalisation and distribution shares of the UCITS will, on redemption or in the event of the full or partial distribution of the equity capital or in the event of transfer for a consideration, fall within the scope of Article 19bis of the 1992 Income Tax Code. On the basis of that article, tax will be levied on the debt claim returns included in the redemption, transfer or repayment price according to the period in which the investor held the shares.

Article 19bis of the 1992 Income Tax Code applies only to shareholders who are subject to Belgian personal income tax and to common mutual funds.

##### Capital gains tax on financial assets

The Belgian government has announced that the following capital gains tax will be introduced during 2026 with retroactive effect from 1 January 2026:

A capital gains tax of 10% on the price received by the shareholder minus the acquisition value will be payable on a transfer of shares of the Sicav against payment. For shares acquired before 1 January 2026, the acquisition value will be the last known net asset value of 2025.

From the taxable base, the taxable base as referred to in art. 19bis WIB 92 (tax on debt-claim return) is first deducted.

The intermediary established in Belgium who intervenes in this transaction in any way will withhold capital gains tax at the source for the benefit of residents of Belgium, unless the shareholder has opted out. When calculating the capital gain, the intermediary will not take into account any exemptions to which the shareholder is entitled or the offsetting of realised capital losses.

Shareholders subject to legal entities tax must declare realised capital gains themselves.

For investors subject to corporation tax

The withholding tax is not the final tax on this income. The income (dividends and capital gains) will be subject to Belgian corporation tax.

### Stock market tax

For non-institutional share classes\*:

|                  | Subscription | Redemption                                                                                                                                                               | Switching between sub-funds                                          |
|------------------|--------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------|
| Stock market tax | -            | CAP (capitalisation shares):<br>At maturity and on the Early Exercise Date (if applicable):<br>0%<br>Else: 1.32% (max. 4 000 euros)<br><br>DIS (distribution shares): 0% | CAP -> CAP/DIS : 1.32%<br>(max. 4 000 EUR)<br><br>DIS-> CAP/DIS : 0% |

\* No stock market tax is applicable to institutional share classes.

### Obligatory automatic exchange of information for tax purposes

Under Belgian law, the Bevek is obliged to collect certain information on its investors and to automatically disclose information to the Belgian tax authorities regarding investors with tax obligations in the US or with place of residence for tax purposes outside Belgium. The Belgian tax authorities may only use the information received from the Bevek to pass them on to foreign competent authorities for tax purposes. The disclosed information will, in addition to the details identifying investors, such as their names, addresses and places and dates of birth, include financial details of the investment in the Bevek over a certain reference period.

## I. Additional information

### Information sources

The prospectus, the key information document, the articles of association, the annual and half-yearly reports and, where relevant, full information on the other sub-funds may be obtained free of charge from the financial services providers before or after subscription to the shares.

The ongoing charges and the portfolio turnover rate for preceding periods can be obtained from the office of the Bevek at Havenlaan 2, B-1080 Brussels, Belgium.

The following documents and information are available at [www.kbc.be/kid](http://www.kbc.be/kid):

key information document, the prospectus, the most recently published annual and half-yearly reports.

The past performance of each sub-fund is provided in the annual report.

The Board of Directors of the Bevek is responsible for the content of the prospectus and the key information document. To the best of the Board of Directors of the Bevek's knowledge, the information contained in the prospectus and the key information document is true and correct and nothing has been omitted that would alter the import of either the prospectus or the key information document.

In accordance with article 10.3 of the articles of association, and subject to legal requirements, the Board of Directors is empowered to set the investment policy for each sub-fund. The Board of Directors may change the investment policy set out in the prospectus and in the key information document.

### Publication of the net asset value

The net asset value is available from the branches of the institutions providing the financial services. Following calculation, it is published on the website of Beama ([www.beama.be](http://www.beama.be)) and/or on the KBC Asset Management NV website ([www.kbc.be/nav](http://www.kbc.be/nav)) and/or on the websites of the institutions providing the financial services.

### Contact point where additional information may be obtained if needed

Product and Knowledge Management Department- APC

KBC Asset Management NV

Havenlaan 2

1080 Brussels

Belgium

Tel. KBC Live 078 152 153 (N) – 078 152 154 (F) - 078 353 137 (E) - 078 353 138 (D)

## J. Prohibition of offer or sale

**This UCITS and the sub-funds of the UCITS may not be publicly offered or sold in countries where they have not been registered with the local authorities.**

The UCITS and the sub-funds of the UCITS are not registered nor will they be registered based on the United States Securities Act of 1933, as amended from time to time. It is forbidden to offer, sell, transfer or deliver shares, directly or indirectly, in the United States of America or one of its territories or possessions or any area that is subject to its jurisdiction or to a US person, as defined in the aforementioned Securities Act. The UCITS and the sub-funds of the UCITS are not registered based on the United States Investment Company Act of 1940, as amended from time to time.

## K. Competent authority

Financial Services and Markets Authority (FSMA)

Congresstraat 12-14

1000 Brussels

The prospectus will be published after approval by the FSMA. This approval does not involve any assessment of the opportuneness or quality of the offer or of the circumstances of the individual making it.

The official text of the articles of association has been filed with the registry of the Corporate Court.

## L. Use of Benchmarks

### Benchmarks

The information on certain sub-funds of the Bevek included in this prospectus may refer to the use of benchmarks. In keeping with the individual sub-fund's investment policy, a benchmark is understood to be an index or a combination of different indices that serves as a reference point for measuring the performance and composition of the sub-fund's portfolio.

Unless expressly stated otherwise in the investment policy, the sub-fund referring to a benchmark is actively managed, does not passively track the composition of the benchmark index and may invest in securities not included in that index. More information on how the benchmark is used for managing sub-funds can be found in the information relating to the Bevek's sub-funds included in this prospectus.

Investors should be aware that the performance of the sub-fund may differ from the performance of the benchmark. This difference is measured by means of a tracking error, which indicates the extent of volatility between those performances. The long-term expected tracking error is given in the table below. Investors should be aware that market conditions may cause the actual tracking error to differ from the long-term expected tracking error.

### Inclusion in the European Securities and Markets Authority's register

Pursuant to Regulation (EU) 2016/1011 of the European Parliament and of the Council (the 'Benchmark Regulation'), the Bevek is required to disclose information on the inclusion of the benchmarks' administrator in the register of approved administrators and benchmarks as established by the European Markets and Securities Authority (the 'ESMA Register').

The Bevek will monitor the inclusion in the ESMA Register of entities acting as administrator(s) of benchmarks used by sub-funds of the Bevek, and this by no later than the date on which the obligation for inclusion in this register takes effect for these entities. The Bevek will then amend the prospectus accordingly.

At present, reference is made to the following benchmarks:

| Sub-fund                              | Expected tracking error | Benchmark                                        | Administrator | Included in ESMA-Register |
|---------------------------------------|-------------------------|--------------------------------------------------|---------------|---------------------------|
| Asia Pacific                          | Between 0% and 1,00%    | MSCI Pacific-Net Return index                    | MSCI          | Yes                       |

### Contingency plan

The Management Company of the Bevek has drafted a contingency plan on the actions to be taken in case a benchmark used by one or more of the UCI's sub-funds materially changes or ceases to be provided.

Examples of situations in which a benchmark materially changes are, but not limited to:

- The benchmark or its administrator is delisted from ESMA's register;
- The geographical, economical or sectorial scope of the benchmark significantly changes; and
- A new benchmark becomes available which is regarded as the market standard for investors in the particular market and/or would be regarded as of greater benefit to the fund's investors.

Examples of situations where a benchmark ceases to be provided are, but not limited to:

- The benchmark ceases to exist;
- The benchmark administrator withdraws the license to use the benchmark; and
- A new benchmark supersedes the existing benchmark.

In case a benchmark used by one or more sub-funds of the UCITS, materially changes or ceases to be provided, a suitable replacing benchmark will be sought after.

Consideration which will be taken into account in the course of selecting a replacement benchmark are, but not limited to:

- The geographical, economical or sectorial scope of the new benchmark is in line with the existing benchmark;;
- Preference will be given to benchmarks that are regarded as the market standard for investors in the particular market; and
- Preference will be given to administrators with an existing license with KBC AM, should this result in lower costs.

If no replacement benchmark can be found, an alternative solution can be used such as amending the sub-fund's investment policy or proposing the fund's liquidation.

The principles stated above and in the contingency plan are without prejudice to the provisions stipulated in the Information concerning the sub-funds.

## M. Liability

---

To the extent permitted by law, the legal provisions on extra-contractual liability (Book 6 “Extra-Contractual Liability” of the Civil Code) do not apply in the relationship between the investor and the Bevek and in the relationship between the investor and any auxiliary persons of the Bevek (including but not limited to the directors of the Bevek, the management company, the directors and employees of the management company).

This provision does not affect:

- (i) the liability of the Bevek or the management company pursuant to this prospectus or the Law of 3 August 2012 on undertakings for collective investment meeting the conditions of Directive 2009/65/EC and undertakings for investment in debt securities (or related legislation);
- (ii) the extra-contractual liability of the custodian, financial service or statutory auditor (other than the liability of their directors or employees) pursuant to Book 6 “Extra-Contractual Liability” of the Civil Code;
- (iii) the liability for wilful misconduct of the Bevek, the management company or any person for whom the Bevek or management company is required to act;
- (iv) the liability for a misconduct of the Bevek, the management company or any person for whom the Bevek or management company is required to act, affecting life or physical integrity.

## N. Liquidity management tools

---

The management company / Board of Directors of the Bevek may use certain instruments to manage liquidity risk including but not limited to:

- temporarily suspending the transactions in a sub-fund (subscriptions / redemptions / switches), whether or not combined with the temporary suspension of the calculation of the net asset value, in accordance with the articles of association. This suspension is published on [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents).
- temporarily and partially limiting the right of shareholders to redeem their shares, so that they may only redeem a certain portion of their shares (“*redemption gates*” – as described below);
- adjusting the net asset value of a sub fund by applying a factor that reflects liquidity costs (“*swing pricing*” – as described below);
- creating “side pockets” to separate assets whose economic or legal characteristics have changed significantly or become uncertain due to exceptional circumstances from the other assets of a sub-fund.

### Redemption gates

On any Dealing Day, the Management Company is not obliged to process redemption requests in full if the total net redemptions of a sub-fund are equal to or exceed 10% of the net asset value (the “Activation Threshold”). In such a case, the Management Company may, at its discretion, apply a pro rata reduction to all redemption requests received for that Dealing Day, ensuring that the total amount redeemed corresponds at least to the level of the Activation Threshold. Any unprocessed portion of a redemption request is automatically cancelled and is not carried forward to the next Dealing Day. Shareholders are informed each time this measure is applied. In addition, the suspension measure relating to redemption requests is published on [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents). For the purposes of this section, a request to convert shares from one sub-fund to another is treated as a redemption request.

Redemption gates may be applied to all sub-funds of the Bevek.

### Swing pricing

A sub-fund may suffer a reduction in value, known as “dilution”, when trading the underlying assets as a result of net inflows or net outflows in the relevant sub-fund. This occurs due to transaction costs and other expenses that may arise from buying or selling underlying assets and the spreads between the buying and selling prices. To mitigate this dilution effect and protect the interests of shareholders, the Management Company has implemented a partial swing-pricing mechanism, as further described below.

If, on a Dealing Day, the net transactions in a sub-fund exceed a certain activation threshold determined from time to time by the Management Company (the “Swing Threshold”), the net asset value may be adjusted by applying a factor (the “Swing Factor”) that reflects liquidity costs.

The Swing Factor includes estimated explicit transaction costs and, where appropriate in light of the sub-fund's investment strategy, implicit transaction costs, including any significant market impact of purchases or sales of assets required to meet subscriptions or redemptions. These implicit transaction costs are estimated on a best-efforts basis.

On each Dealing Day with net subscriptions above the Swing Threshold, the net asset value of the sub-fund may be adjusted upwards by the Swing Factor. Conversely, on each Dealing Day with net redemptions above the Swing Threshold, the net asset value may be adjusted downwards by the Swing Factor.

In normal market conditions, the Swing Factor will not exceed 2.5% of the original net asset value for a given Dealing Day. In exceptional market conditions, such as periods of high market volatility, the Management Company may decide to increase this maximum level up to 5% to protect shareholders' interests.

Swing pricing may be applied to all sub-funds for which this mechanism is provided in the detailed description of the relevant sub-fund under 'Calculation of the net asset value' and is not aimed at addressing the specific circumstances of each individual investor transaction.

# Information concerning the sub-fund Asia Pacific

## 1. Basic details

---

### Name

Asia Pacific

### Date of incorporation

21 March 1991

### Life

Unlimited

### Delegation of the management of the investment portfolio

There is no delegation of the management of the investment portfolio.

### Stock exchange listing

Not applicable.

## 2. Investment information

---

### Sub-fund's object

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

### Sub-fund's investment policy

#### *Permitted asset classes*

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

#### *Restrictions of the investment policy*

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

## Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. **Consequently, there may be an impact on concentration risk.** Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

## Selected strategy

The sub-fund's portfolio is managed passively. More information with respect to this can be found under the 'Benchmark-tracking' title. The assets are invested primarily in equities (or equity-related investments) figuring in the MSCI Pacific - Net Return Index.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

## Benchmark-tracking

**The object of the sub-fund is to track the composition of a benchmark within the meaning and limits of Article 63 of the Royal Decree of 12 November 2012 with respect to undertakings for collective investment complying with the conditions of Directive 2009/65/EC.**

Benchmark(s) in question: MSCI Pacific - Net Return Index, which covers around 85% of the free-float market capitalisation of the developed markets on the Pacific Rim that are included in the benchmark. Additional information on this benchmark and its composition is available at [www.msci.com](http://www.msci.com). The composition of the index can be found on the following website: <https://www.msci.com/constituents> > with search term "PACIFIC" in the "Select an Index Name" field. The Japanese yen (JPY) is used as the benchmark currency.

Benchmark tracking method: physical replication based on full replication: The manager aims to include each share that forms a part of the benchmark in the sub-fund's investment portfolio, whereby each share is given the same weighting as it has in the benchmark. However, the manager retains the freedom to deviate slightly from the benchmark. Reasons for this may include: regulatory restrictions, limited liquidity of shares included in the benchmark, the restrictions mentioned in the 'Information concerning the Beveik – E. Social, ethical and environmental aspects'. The sub-fund may also make limited use of synthetic replication by way of futures, primarily in order to cushion the effects of buying and selling, and to avoid the attendant transaction charges. The benchmark is rebalanced on a quarterly basis. The more frequent rebalancing takes place, the greater the potential impact on transaction costs within the sub-fund.

Given normal market conditions, the expected tracking error is between 0% and 1%. Possible causes of this tracking error could be the method used to track the benchmark, transaction charges, dividend reinvestment, the general costs charged to the sub-fund, any income from lending financial instruments.

If the composition of the benchmark is no longer sufficiently diversified or if the benchmark is no longer sufficiently representative of the market it relates to or if the value and composition of the benchmark is no longer published in a suitable manner, the management company will inform the Board of Directors without delay. The Board of Directors will consider what action to take in the interest of investors and may convene a general meeting of shareholders in order to amend the investment policy.

#### Required disclaimers for benchmark providers:

This fund is not sponsored, endorsed, sold or promoted by MSCI INC. ('MSCI'), any of its affiliates, any of its information providers or any other third party involved in, or related to, compiling, computing or creating any MSCI index (collectively, the 'MSCI parties'). The MSCI indexes are the exclusive property of MSCI. MSCI and the MSCI index names are service mark(s) of MSCI or its affiliates and have been licensed for use for certain purposes by KBC Asset Management. None of the MSCI parties makes any representation or warranty, express or implied, to the issuer or owners of this fund or any other person or entity regarding the advisability of investing in funds generally or in this fund particularly or the ability of any MSCI index to track corresponding stock market performance. MSCI or its affiliates are the licensors of certain trademarks, service marks and trade names and of the MSCI indexes which are determined, composed and calculated by MSCI without regard to this fund or the issuer or owners of this fund or any other person or entity. None of the MSCI parties has any obligation to take the needs of the issuer or owners of this fund or any other person or entity into consideration in determining, composing or calculating the MSCI indexes. None of the MSCI parties is responsible for or has participated in the determination of the timing of, prices at, or quantities of this fund to be issued or in the determination or calculation of the equation by or the consideration into which this fund is redeemable. Further, none of the MSCI parties has any obligation or liability to the issuer or owners of this fund or any other person or entity in connection with the administration, marketing or offering of this fund.

Although MSCI shall obtain information for inclusion in or for use in the calculation of the MSCI indexes from sources that MSCI considers reliable, none of the MSCI parties warrants or guarantees the originality, accuracy and/or the completeness of any MSCI index or any data included therein. None of the MSCI parties makes any warranty, express or implied, as to results to be obtained by the issuer of the fund, owners of the fund, or any other person or entity, from the use of any MSCI index or any data included therein. None of the MSCI parties shall have any liability for any errors, omissions or interruptions of or in connection with any MSCI index or any data included therein. Further, none of the MSCI parties makes any express or implied warranties of any kind, and the MSCI parties hereby expressly disclaim all warranties of merchantability and fitness for a particular purpose, with respect to each MSCI index and any data included therein. Without limiting any of the foregoing, in no event shall any of the MSCI parties have any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages.

No purchaser, seller or holder of this fund, or any other person or entity, should use or refer to any MSCI trade name, trademark or service mark to sponsor, endorse, market or promote this fund without first contacting MSCI to determine whether MSCI's permission is required. Under no circumstances may any person or entity claim any affiliation with MSCI without the prior written permission of MSCI.

#### **Transparency of adverse sustainability impacts**

The sub-fund considers the principal adverse impacts of its investment decisions on sustainability factors ('PAI') as described by the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector ('SFDR').

In particular, the sub-fund takes into account exposure to controversial weapons ('indicator 14') by excluding companies involved in controversial weapon systems.

In addition, the principal adverse impacts on sustainability factors are implicitly taken into account within the limited limits inherent to passive management through the Proxy Voting and Engagement Policy of KBC Asset Management NV (more information can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > Retrospective Proxy Voting - overview > Proxy Voting and Engagement Policy).

KBC Asset Management NV exercises the voting rights of the shares it manages in accordance with the Proxy Voting and Engagement Policy. Where appropriate, KBC Asset Management NV will engage in dialogue with the management of the companies concerned, if necessary before voting.

Information on the principal adverse impacts on sustainability factors can also be found in the annual report for this sub-fund.

#### **Volatility of the net asset value**

The volatility of the net asset value may be high due to the composition of the portfolio.

## 3. Risk

### Sub-fund's risk profile

Investors must take note of the specific risk factors set out below, the description of the risks given under the heading 'Information concerning the Bevek - F.Information on the risk profile of the UCITS', and the 'What are the risks and what could I get in return?' section of the key information document.

Summary table of risks assessed by the sub-fund:

| Risk type                 | Concise definition of the risk                                                                                                      |          | Explanation:                                                                                                                                                                                                      |
|---------------------------|-------------------------------------------------------------------------------------------------------------------------------------|----------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Market risk               | The risk that the entire market of an asset class will decline, thus affecting the prices and values of the assets in the portfolio | high     | the level of the risk reflects the volatility of the stock market.                                                                                                                                                |
| Credit risk               | The risk that an issuer or a counterparty will default                                                                              | low      |                                                                                                                                                                                                                   |
| Settlement risk           | The risk that settlement of a transaction via a payment system will not take place as expected                                      | low      |                                                                                                                                                                                                                   |
| Liquidity risk            | The risk that a position cannot be liquidated in a timely manner at a reasonable price                                              | low      |                                                                                                                                                                                                                   |
| Exchange or currency risk | The risk that the value of an investment will be affected by changes in exchange rates                                              | moderate | since there are investments in securities that are denominated in currencies other than the Japanese Yen, there is a real chance that the value of an investment will be affected by movements in exchange rates. |
| Custody risk              | The risk of loss of assets held in custody with a custodian or sub-custodian                                                        | low      |                                                                                                                                                                                                                   |
| Concentration risk        | The risk relating to a large concentration of investments in specific assets or in specific markets                                 | high     | there is a concentration of investments in the shares of companies from Japan and developed countries of the Asia Pacific Region                                                                                  |
| Performance risk          | Risks to return                                                                                                                     | high     | the level of the risk reflects the volatility of the stock market.                                                                                                                                                |
| Capital risk              | Risks to capital                                                                                                                    | moderate | There is no capital protection.                                                                                                                                                                                   |
| Flexibility risk          | Inflexibility both within the product and constraints on switching to other providers                                               | none     |                                                                                                                                                                                                                   |
| Inflation risk            | Risk of inflation                                                                                                                   | low      |                                                                                                                                                                                                                   |
| Environmental factors     | Uncertainty regarding the immutability of environmental factors, such as the tax regime                                             | low      |                                                                                                                                                                                                                   |

### Risk profile of the typical investor

Profile of the typical investor for which the sub-fund has been designed : Highly dynamic profile.

The risk profile mentioned per sub-fund has been determined from the point of view of an investor in the euro area and may differ from that of an investor in other currency zones. More information on the risk profiles can be obtained at [www.kbc.be/riskprofile](http://www.kbc.be/riskprofile).

## 4. Information concerning the trading of shares

### How to buy and sell shares and switch between sub-funds

If it turns out that shares are being held by persons other than those permitted to hold them, the Company may, in accordance with article 8.2 of the articles of association, and without charge (except any taxes due and any charges to cover the cost of realising the assets), redeem those shares.

| Cut-off time for receiving orders at the financial service providers in Belgium <sup>(1)</sup><br><br>Date of published net asset value | Date the net asset value is calculated | Actual values used                                                                                                                                                                                                                                     | Date of payment or repayment of the orders |
|-----------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------|
| <b>D</b><br>(every banking day <sup>(2)</sup> at 6 am CET)<br>also referred to as 'Dealing Day'                                         | <b>D+1 banking day</b>                 | <b>D</b> if maximum 20% of the actual values are already known on D<br>(every banking day <sup>(2)</sup> at 6 am CET)<br><br><b>D+1</b> if more than 20% of the actual values are already known on D<br>(every banking day <sup>(2)</sup> at 6 am CET) | <b>D+3 banking days</b>                    |

<sup>(1)</sup> The cut-off time for receiving orders stated above applies to orders investors place directly with the financial services providers in Belgium.

If an investor places an order with a financial institution other than the financial service providers in Belgium, he/she must find out from that institution what cut-off time (time + date) applies to the order he/she wishes to place so that the institution in question can take the necessary action to ensure that the order reaches the financial service providers in Belgium before 6 am CET on day D in order to qualify as an order of day D.

<sup>(2)</sup> with the exception of banking days on which one or more markets on which more than 20% of the sub-fund's assets are listed are closed or if transactions are suspended or restricted.

### Calculation of the net asset value

The net asset value is calculated daily, as described above, except on days on which no shares may be issued or redeemed. Swing pricing may be applied as described in the 'Information concerning the Bevek – N. Liquidity management tools' section.

### Publication of the net asset value

The 'Information concerning the Bevek – I. Additional information – Publication of the net asset value' section specifies where the result of the calculation of the net asset value can be viewed.

## 5. Types of shares and fees and charges

---

Shares may be in registered or book-entry form, as the shareholder chooses. No certificates representing the registered shares are issued. Instead, confirmation is supplied of entry in the register of shareholders.

### Dividend payment

After the close of the financial year, the General Meeting determines the portion of the result, which, within the limitations imposed by the Law of 3 August 2012 relative to undertakings for collective investment complying with the conditions of Directive 2009/65/EC and the undertakings for investment in receivables, is to be paid to the holders of distribution shares.

The holders of capitalisation shares are not entitled to receive a dividend. The portion of the annual net income accruing to them is capitalised in favour of these shares.

The shareholders will receive payment within six months of the close of the financial year via institutions designated for this purpose by the General Meeting.

The General Meeting may decide to proceed to interim payments in accordance with the provisions of the law.

The Board of Directors may, in accordance with the provisions laid down in the articles of association and within the limits of the law, decide to pay out interim dividends.

The information on the type and/or class of shares and the fees and charges associated with them is set out below by type and/or share class.

# Information concerning the sub-fund Asia Pacific Responsible Investing

## 1. Basic details

---

### Name

Asia Pacific Responsible Investing

### Date of incorporation

2 November 2018

### Life

Unlimited

### Delegation of the management of the investment portfolio

There is no delegation of the management of the investment portfolio.

### Stock exchange listing

Not applicable.

## 2. Investment information

---

### Sub-fund's object

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

### Sub-fund's investment policy

#### *Permitted asset classes*

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

#### *Restrictions of the investment policy*

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

## Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. **Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.**

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

## Selected strategy

The sub-fund aims to generate a return that matches the return of the benchmark, viz. the MSCI Pacific - Net Return Index, by investing in a selection of shares that are included in the benchmark and that comply with the responsible investing methodology criteria set out below. Active management is therefore limited to the responsible investing methodology. The benchmark comprises shares of companies from Japan and developed countries in the Asia-Pacific region.

## Information related to Responsible Investing

Within the above limits, the sub-fund pursues responsible investment objectives based on a dualistic approach: a negative screening and a positive selection methodology.

KBC Asset Management NV has a team of specialist researchers responsible for this dualistic approach. They are assisted by an independent advisory board (the “**Responsible Investing Advisory Board**”) comprised of up to twelve persons, who are not affiliated to KBC Asset Management NV, and whose sole responsibility is to supervise the dualistic approach and activities of the specialist researchers. The secretariat of the advisory board is handled by a representative of KBC Asset Management NV. Moreover, KBC Asset Management NV works with data suppliers with expertise in Responsible Investing that provide data to the specialized researchers, who process and complete the data with publicly available information (including annual reports, press publications, etc.).

The sub-fund promotes a combination of environmental and/or social characteristics and, even though it does not have sustainable investments as an objective, it shall invest a minimum proportion of its assets in economic activities that contribute to the achievement of environmental or social objectives (i.e. ‘sustainable investments’).

The companies in which it invests must follow good governance practices.

The sub-fund is compliant with the transparency obligations of article 8(1) of Regulation (EU) 2019/2088 of the European Parliament and of the council of 27 November 2019 on sustainability-related disclosures in the financial services sector (‘SFDR’). More information on how the sub-fund promotes environmental and/or social characteristics can be found in the ‘Annex for KBC Equity Fund Asia Pacific Responsible Investing’ to the prospectus. This annex specifically covers the pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852.

In addition, the exclusions set out in Article 12(1)(a) to (g) of Delegated Regulation (EU) 2020/1818 (“Exclusions for Paris Agreement-aligned EU benchmarks”) are respected by this sub-fund.

The sub-fund complies with the European Securities and Markets Authority (ESMA) guidelines on fund names using ESG or sustainability-related terms.

### Negative screening

In practical terms the end result of this negative screening procedure is that the sub-fund excludes companies in advance from the Responsible Investment universe which fall foul of the exclusion policy available on

The application of these policies means that:

- companies involved in certain activities are excluded from the sub-fund's investment universe. A distinction can be made between companies that are excluded if they exceed a certain turnover threshold in relation to specific activities, such as conventional weapons, tobacco, gambling or adult entertainment, and those that are excluded outright because they are involved in specific activities, such as controversial weapons, agricultural commodities or the mining of thermal coal, among others.
- The sub-fund may nevertheless invest in companies involved in conventional weapons and/or nuclear weapons that exceed certain turnover thresholds, provided they are included on the whitelist as specified in the policy. The whitelist is a list drawn up by KBC Group and includes companies involved in conventional weapons and/or nuclear weapons, but which are nevertheless deemed acceptable as investments within funds that invest responsibly, taking into account factors such as the proportion of arms sales to non-NATO countries and a possible involvement in human rights controversies related to armed conflict.

This screening also ensures that companies who seriously violate fundamental principles of environmental protection, social responsibility and good governance, among others, are excluded from the sub-fund's investment universe.

More information regarding the specific exclusions can also be found in the "Annex for KBC Equity Fund Asia Pacific Responsible Investing" to the prospectus.

These negative screening principles are not exhaustive and may be adapted from time to time under the supervision of the Responsible Investing Advisory Board.

#### Positive selection methodology

Within the defined investment universe and other limits described above, the responsible investment objectives of the sub-fund are the following:

- (1) promote the integration of sustainability into the policy decisions of companies by preferring companies with a better **ESG risk score**, where ESG stands for 'Environmental, Social and Governance', and
- (2) promote climate change mitigation, by preferring companies with lower **Greenhouse Gas Intensity**, with the objective of meeting a predetermined Greenhouse Gas intensity target;
- (3) support sustainable development, through 'sustainable investments' in accordance with art. 2(17) SFDR. Sustainable investments will consist of investments in companies contributing to the achievement of the **UN Sustainable Development Goals** (plus instruments awarded the 'sustainable development' label by KBC Asset Management NV on the advice of the Responsible Investing Advisory Board).

More information on the investment policy for Responsible Investing funds is available at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > Investment policy for Responsible Investing funds.

#### (1) ESG-risk score

The contribution to the integration of sustainability into policy decisions of the companies is measured based on an ESG-risk score. This score represents the aggregated performance assessment of a given company against a series of ESG criteria which are grounded to the extent possible against objective measures. The main factors underpinning the ESG criteria are:

- respect for the environment (e.g., reduction in greenhouse gas emissions);
- attention to society (e.g., employee working conditions); and
- corporate governance (e.g., independence and diversity of the board of directors).

At least 90% of the corporate investments in the portfolio, as measured by assets under management, must have an ESG risk score. The ESG risk score for companies is an ESG risk score supplied by a data provider, and based on internal research as well.

These lists are not exhaustive and may be changed under the supervision of the Responsible Investing Advisory Board.

To achieve this objective, the ESG-risk score of the portfolio for companies is compared to following benchmark: MSCI Pacific-Net Return index.

To calculate the ESG-risk score at portfolio level, the weighted average of the ESG (risk) scores of the positions in the sub-fund are taken into account. Technical items such as cash and derivatives are not taken into account and also companies or countries for which no data is available are left out. The weights used in the calculation depend on the size of the positions in the sub-fund, rescaled for these items.

More information on the ESG-risk score and the concrete goals of the sub-fund can be found in the 'Annex for KBC Equity Fund Asia Pacific Responsible Investing' to the prospectus.

The targets can be revised upwards or downwards.

#### (2) Greenhouse Gas Intensity

The objective to promote climate change mitigation, by favoring lower greenhouse gas intensity companies, with the goal of meeting a predetermined greenhouse gas intensity target covers at least 90% of the portfolio. The objective does not apply to companies for which data is not available.

The contribution of companies to climate change mitigation is measured based on their greenhouse gas intensity. Greenhouse gas intensity is defined as absolute greenhouse gas emissions (in tonnes CO<sub>2</sub> equivalent), divided by revenues (in mln USD).

The sub-fund's target in terms of greenhouse gas intensity is assessed on two targets whereby the most strict of the two will determine the target applied: 15% better than the benchmark MSCI Pacific-Net Return index and a reduction of 50% by 2030 compared to the benchmark MSCI Pacific-Net Return index in 2019.

More information on Greenhouse Gas Intensity and the concrete goals of the sub-fund can be found in the 'Annex for KBC Equity Fund Asia Pacific Responsible Investing' to the prospectus.

The targets may be revised upwards or downwards.

### **(3) UN Sustainable Development Goals**

To support sustainable development, the sub-fund commits to invest a minimum proportion of the portfolio in companies that contribute to the UN Sustainable Development Goals. The UN Sustainable Development Goals include both social and environmental objectives.

Companies are considered to contribute to sustainable development when at least 20% of the revenues are linked to the UN Sustainable Development Goals. The activities of the companies are assessed on multiple sustainable themes that can be linked to the UN Sustainable Development Goals.

Instruments of companies that meet these requirements are designated as "sustainable investments," according to Article 2(17) SFDR.

In addition, KBC Asset Management NV can award the "sustainable development" label to instruments, on the advice of the Responsible Investing Advisory Board. In that case, these investments shall also qualify as "sustainable investments," according to Article 2(17) SFDR.

More information about the methodology used to qualify investments as investments which contribute to the UN Sustainable Development Goals can be found in the 'Annex for KBC Equity Fund Asia Pacific Responsible Investing' to the prospectus.

### **Potential Exceptions**

It cannot be ruled out, however, that very limited investments may be made temporarily in assets that do not meet the above criteria. The reasons for this include the following:

- Developments as a result of which a company can no longer be regarded as eligible after purchase;
- Corporate events, such as a merger of one company with another, where the merged company can no longer be considered an eligible company based on the above criteria;
- Incorrect data as a result of which assets are invested (unintentionally and erroneously) in assets purchased when it should not have been eligible for the sub-fund;
- A planned update of the screening criteria as a result of which assets should be excluded from the sub-fund, but which the management company chooses to refrain from selling immediately in the best interest of the customer;
- External circumstances such as market movements and updates of external data can lead to investment solutions failing to achieve the abovementioned targets.

In these cases, the fund manager will replace the assets concerned with more appropriate assets as soon as possible, always taking into account the sole interest of the investor.

In addition, for the purpose of efficient portfolio management, the fund manager may to a significant degree use derivatives relating to assets that would not be eligible for inclusion in the sub-fund, in so far as there is no serviceable and comparable alternative available on the market. In addition, the counterparties with which the derivative transactions are entered into may not necessarily be issuers having a responsible nature.

### **Taxonomy related information**

At the date of this prospectus, the sub-fund does not commit to invest a minimum proportion of its assets in environmentally sustainable economic activities which contribute to any of the environmental objectives set out in Article 9 of the Regulation (EU) 2020/852 of the European Parliament and of the Council of 18 June 2020 on the establishment of a framework to facilitate sustainable investment ('EU Taxonomy Framework'). The minimum proportion of investments in environmentally sustainable economic activities within the meaning of the EU Taxonomy Framework is 0%. This will be monitored on a regular basis and as soon as sufficiently reliable, timely and verifiable data from issuers or invested companies is available, the prospectus may be updated.

Non-financial companies are considered to contribute to sustainable development if at least 20% of sales are aligned to the EU Taxonomy Framework based on Trucost data. For companies in the financial sector, a different methodology applies. For credit institutions, the alignment with the EU Taxonomy Framework is based on the Green Asset Ratio, while for other financial companies the alignment with the EU Taxonomy Framework is based on the alignment of their investment portfolios. Instruments of companies that meet these requirements are referred to as "sustainable investments," according to art. 2(17) SFDR. More information on the percentage in the portfolio that was considered "sustainable investments with an environmental objective aligned with the EU Taxonomy Framework" based on this criterion during the reporting period, can be found in the annual reports for this sub-fund.

More information on the EU Taxonomy Framework can be found in the 'Annex for KBC Equity Fund Asia Pacific Responsible Investing' to the prospectus.

### **Transparency of adverse sustainability impacts**

The sub-fund considers the principal adverse impacts of its investment decisions on sustainability factors by taking

into account the principal adverse impact indicators ('PAI'), as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability disclosure in the financial services sector ('SFDR').

The principal adverse impacts on sustainability factors are explicitly taken into account through the General exclusion policy for conventional and Responsible Investing funds and the exclusion policy for Responsible Investing funds. More information on the principal adverse impact indicators taken into account can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > General exclusion policy for conventional and Responsible Investing funds and [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > Exclusion policy for Responsible Investing funds.

In addition, the principal adverse impacts on sustainability factors are implicitly taken into account through the Proxy Voting and Engagement Policy of KBC Asset Management NV (more information can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > Retrospective Proxy Voting - overview > Proxy Voting and Engagement Policy).

More information on how the sub-fund aims to consider the principal adverse impacts on sustainability factors can also be found in the 'Annex for KBC Equity Fund Asia Pacific Responsible Investing' to the prospectus. A statement on how the sub-fund has considered the principal adverse impacts on sustainability factors during the reporting period can also be found in the annual reports for this sub-fund.

## **Benchmark information**

The sub-fund aims to generate a return that matches the return of the benchmark: MSCI PACIFIC - Net Return Index.

The sub-fund aims to minimise the tracking error relative to the benchmark referred to above. Under normal market conditions, the expected tracking error is between 0% and 5%. Possible causes of this tracking error could be the Responsible Investing methodology, the method used to track the benchmark, transaction charges, dividend reinvestment and the costs generally borne by the sub-fund.

The tracking error measures the volatility of the sub-fund's return relative to that of the benchmark. The higher the tracking error, the more the sub-fund's return fluctuates relative to the benchmark. Market conditions may cause the actual tracking error to differ from the expected tracking error.

The composition of the portfolio will vary from that of the benchmark, as the composition of the benchmark is not fully consistent with the environmental and/or social characteristics promoted by the sub-fund. The use of the benchmark does not detract from the responsible character of the portfolio. The responsible character is guaranteed by the aforementioned Responsible Investing methodology.

The benchmark is also used to assess the performance of the sub-fund.

## **Volatility of the net asset value**

**The volatility of the net asset value may be high due to the composition of the portfolio.**

## 3. Risk

### Sub-fund's risk profile

Investors must take note of the specific risk factors set out below, the description of the risks given under the heading 'Information concerning the Bevek - F.Information on the risk profile of the UCITS', and the 'What are the risks and what could I get in return?' section of the key information document.

Summary table of risks assessed by the sub-fund:

| Risk type                 | Concise definition of the risk                                                                                                      |                                                                   | Explanation:                                                                                                                                                                                                      |
|---------------------------|-------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Market risk               | The risk that the entire market of an asset class will decline, thus affecting the prices and values of the assets in the portfolio | high                                                              | the level of the risk reflects the volatility of the stock market.                                                                                                                                                |
| Credit risk               | The risk that an issuer or a counterparty will default                                                                              | low                                                               |                                                                                                                                                                                                                   |
| Settlement risk           | The risk that settlement of a transaction via a payment system will not take place as expected                                      | low                                                               |                                                                                                                                                                                                                   |
| Liquidity risk            | The risk that a position cannot be liquidated in a timely manner at a reasonable price                                              | low                                                               |                                                                                                                                                                                                                   |
| Exchange or currency risk | The risk that the value of an investment will be affected by changes in exchange rates                                              | For the share class Classic Shares : moderate                     | since there are investments in securities that are denominated in currencies other than the Japanese Yen, there is a real chance that the value of an investment will be affected by movements in exchange rates. |
|                           |                                                                                                                                     | For the share class Institutional B Shares : high                 | since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates. |
|                           |                                                                                                                                     | For the share class Institutional Discretionary Shares EUR : high | since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates. |
| Custody risk              | The risk of loss of assets held in custody with a custodian or sub-custodian                                                        | low                                                               |                                                                                                                                                                                                                   |
| Concentration risk        | The risk relating to a large concentration of investments in specific assets or in specific markets                                 | moderate                                                          | there is a concentration of investments in the shares of companies from Japan and the Asia Pacific Region.                                                                                                        |
| Performance risk          | Risks to return                                                                                                                     | high                                                              | the level of the risk reflects the volatility of the stock market.                                                                                                                                                |
| Capital risk              | Risks to capital                                                                                                                    | moderate                                                          | There is no capital protection.                                                                                                                                                                                   |
| Flexibility risk          | Inflexibility both within the product and constraints on switching to other providers                                               | low                                                               |                                                                                                                                                                                                                   |

|                       |                                                                                         |     |  |

## Risk profile of the typical investor

Profile of the typical investor for which the sub-fund has been designed : Highly dynamic profile.

The risk profile mentioned per sub-fund has been determined from the point of view of an investor in the euro area and may differ from that of an investor in other currency zones. More information on the risk profiles can be obtained at [www.kbc.be/riskprofile](http://www.kbc.be/riskprofile).

## 4. Information concerning the trading of shares

### How to buy and sell shares and switch between sub-funds

If it turns out that shares are being held by persons other than those permitted to hold them, the Company may, in accordance with article 8.2 of the articles of association, and without charge (except any taxes due and any charges to cover the cost of realising the assets), redeem those shares.

| Cut-off time for receiving orders at the financial service providers in Belgium <sup>(1)</sup><br><br>Date of published net asset value | Date the net asset value is calculated | Actual values used                                                                                                                                                                                                                                     | Date of payment or repayment of the orders |
|-----------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------|
| <b>D</b><br>(every banking day <sup>(2)</sup> at 6 am CET)<br>also referred to as 'Dealing Day'                                         | <b>D+1 banking day</b>                 | <b>D</b> if maximum 20% of the actual values are already known on D<br>(every banking day <sup>(2)</sup> at 6 am CET)<br><br><b>D+1</b> if more than 20% of the actual values are already known on D<br>(every banking day <sup>(2)</sup> at 6 am CET) | <b>D+3 banking days</b>                    |

<sup>(1)</sup> The cut-off time for receiving orders stated above applies to orders investors place directly with the financial services providers in Belgium.

If an investor places an order with a financial institution other than the financial service providers in Belgium, he/she must find out from that institution what cut-off time (time + date) applies to the order he/she wishes to place so that the institution in question can take the necessary action to ensure that the order reaches the financial service providers in Belgium before 6 am CET on day D in order to qualify as an order of day D.

<sup>(2)</sup> with the exception of banking days on which one or more markets on which more than 20% of the sub-fund's assets are listed are closed or if transactions are suspended or restricted.

### Calculation of the net asset value

The net asset value is calculated daily, as described above, except on days on which no shares may be issued or redeemed. Swing pricing may be applied as described in the 'Information concerning the Bevek – N. Liquidity management tools' section.

### Publication of the net asset value

The 'Information concerning the Bevek – I. Additional information – Publication of the net asset value' section specifies where the result of the calculation of the net asset value can be viewed.

If the profitability of the sub-fund is jeopardised due to a limited number of subscriptions during the initial subscription period (less than 5 000 000 euros), the Board of Directors of the Bevek may decide to refuse the orders placed during the initial subscription period and not to proceed with the commercialisation of the sub-fund.

## 5. Types of shares and fees and charges

---

Shares may be in registered or book-entry form, as the shareholder chooses. No certificates representing the registered shares are issued. Instead, confirmation is supplied of entry in the register of shareholders.

### Dividend payment

After the close of the financial year, the General Meeting determines the portion of the result, which, within the limitations imposed by the Law of 3 August 2012 relative to undertakings for collective investment complying with the conditions of Directive 2009/65/EC and the undertakings for investment in receivables, is to be paid to the holders of distribution shares.

The holders of capitalisation shares are not entitled to receive a dividend. The portion of the annual net income accruing to them is capitalised in favour of these shares.

The shareholders will receive payment within six months of the close of the financial year via institutions designated for this purpose by the General Meeting.

The General Meeting may decide to proceed to interim payments in accordance with the provisions of the law.

The Board of Directors may, in accordance with the provisions laid down in the articles of association and within the limits of the law, decide to pay out interim dividends.

The information on the type and/or class of shares and the fees and charges associated with them is set out below by type and/or share class.

# Asia Pacific Responsible Investing - Institutional Discretionary Shares EUR

**This share class is reserved**

- for trading to persons who acquire and hold the units on the basis of a discretionary management agreement with KBC Asset Management NV (except a discretionary management agreement 'Core Satellite'), or with another company associated with KBC Asset Management NV and who pay a discretionary management fee on the part of their portfolio invested in KBC UCIs<sup>1</sup>. In addition, these persons must have the status of 'eligible investors', acting on its own behalf, as within the meaning of Article 5 § 3/1 of the Law of 3 August 2012 relative to undertakings for collective investment complying with the conditions of Directive 2009/65/EC and the undertakings for investment in receivables<sup>2</sup>. The investor must comply with these conditions at the time of subscription and for as long as the investor remains a shareholder of the share class.
- for trading to institutional undertakings for collective investment managed by KBC Asset Management NV or by another company associated with this management company and who pay a fee on the part of the assets invested in KBC UCIs.

If it appears that the shares of this class are held by persons other than those authorized, these shares will be converted at no cost (except taxes) into shares of the share class "Classic Shares".

# Information concerning the sub-fund Belgium

## 1. Basic details

---

### Name

Belgium

### Date of incorporation

26 February 1999

### Life

Unlimited

### Delegation of the management of the investment portfolio

There is no delegation of the management of the investment portfolio.

### Stock exchange listing

Not applicable.

## 2. Investment information

---

### Sub-fund's object

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

### Sub-fund's investment policy

#### *Permitted asset classes*

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

#### *Restrictions of the investment policy*

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

### Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. **Consequently, there may be an impact on concentration risk.** Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

### Selected strategy

At least 75% of the assets are invested in shares of Belgian companies.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

### Transparency of adverse sustainability impacts

The sub-fund considers the principal adverse impacts of its investment decisions on sustainability factors ('PAI') as described by the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector ('SFDR')

The principal adverse impacts on sustainability factors are explicitly taken into account through the General exclusion policy. More information on the principal adverse impact indicators that are taken into account can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > General exclusion policy for conventional and Responsible Investing funds.

In addition, the principal adverse impacts on sustainability factors are implicitly taken into account through the Proxy Voting and Engagement Policy of KBC Asset Management NV (more information can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > Retrospective Proxy Voting - overview > Proxy Voting and Engagement Policy).

KBC Asset Management NV exercises the voting rights of the shares it manages in accordance with the Proxy Voting and Engagement Policy. Where appropriate, KBC Asset Management NV will engage in dialogue with the management of the companies concerned, if necessary before voting.

Information on the principal adverse impacts on sustainability factors can also be found in the annual report for this sub-fund.

### Benchmark information

The fund is actively managed without referring to any benchmark.

### Volatility of the net asset value

The volatility of the net asset value may be high due to the composition of the portfolio.

## 3. Risk

### Sub-fund's risk profile

Investors must take note of the specific risk factors set out below, the description of the risks given under the heading 'Information concerning the Bevek - F.Information on the risk profile of the UCITS', and the 'What are the risks and what could I get in return?' section of the key information document.

Summary table of risks assessed by the sub-fund:

| Risk type                 | Concise definition of the risk                                                                                                      |          | Explanation:                                                                |
|---------------------------|-------------------------------------------------------------------------------------------------------------------------------------|----------|-----------------------------------------------------------------------------|
| Market risk               | The risk that the entire market of an asset class will decline, thus affecting the prices and values of the assets in the portfolio | high     | the level of the risk reflects the volatility of the stock market.          |
| Credit risk               | The risk that an issuer or a counterparty will default                                                                              | low      |                                                                             |
| Settlement risk           | The risk that settlement of a transaction via a payment system will not take place as expected                                      | low      |                                                                             |
| Liquidity risk            | The risk that a position cannot be liquidated in a timely manner at a reasonable price                                              | low      |                                                                             |
| Exchange or currency risk | The risk that the value of an investment will be affected by changes in exchange rates                                              | none     |                                                                             |
| Custody risk              | The risk of loss of assets held in custody with a custodian or sub-custodian                                                        | low      |                                                                             |
| Concentration risk        | The risk relating to a large concentration of investments in specific assets or in specific markets                                 | high     | there is a concentration of the investments in shares of Belgian companies. |
| Performance risk          | Risks to return                                                                                                                     | high     | the level of the risk reflects the volatility of the stock market.          |
| Capital risk              | Risks to capital                                                                                                                    | moderate | There is no capital protection.                                             |
| Flexibility risk          | Inflexibility both within the product and constraints on switching to other providers                                               | none     |                                                                             |
| Inflation risk            | Risk of inflation                                                                                                                   | low      |                                                                             |
| Environmental factors     | Uncertainty regarding the immutability of environmental factors, such as the tax regime                                             | low      |                                                                             |

### Risk profile of the typical investor

Profile of the typical investor for which the sub-fund has been designed : Highly dynamic profile.

The risk profile mentioned per sub-fund has been determined from the point of view of an investor in the euro area and may differ from that of an investor in other currency zones. More information on the risk profiles can be obtained at [www.kbc.be/riskprofile](http://www.kbc.be/riskprofile).

## 4. Information concerning the trading of shares

### How to buy and sell shares and switch between sub-funds

If it turns out that shares are being held by persons other than those permitted to hold them, the Company may, in accordance with article 8.2 of the articles of association, and without charge (except any taxes due and any charges to cover the cost of realising the assets), redeem those shares.

| Cut-off time for receiving orders at the financial service providers in Belgium <sup>(1)</sup><br><br>Date of published net asset value | Date the net asset value is calculated | Actual values used                                                                                                                                                                                                                                     | Date of payment or repayment of the orders |
|-----------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------|
| <b>D</b><br>(every banking day <sup>(2)</sup> at 2 pm CET)<br>also referred to as 'Dealing Day'                                         | <b>D+1 banking day</b>                 | <b>D</b> if maximum 20% of the actual values are already known on D<br>(every banking day <sup>(2)</sup> at 2 pm CET)<br><br><b>D+1</b> if more than 20% of the actual values are already known on D<br>(every banking day <sup>(2)</sup> at 2 pm CET) | <b>D+3 banking days</b>                    |

<sup>(1)</sup> The cut-off time for receiving orders stated above applies to orders investors place directly with the financial services providers in Belgium.

If an investor places an order with a financial institution other than the financial service providers in Belgium, he/she must find out from that institution what cut-off time (time + date) applies to the order he/she wishes to place so that the institution in question can take the necessary action to ensure that the order reaches the financial service providers in Belgium before 2 pm CET on day D in order to qualify as an order of day D.

<sup>(2)</sup> with the exception of banking days on which one or more markets on which more than 20% of the sub-fund's assets are listed are closed or if transactions are suspended or restricted.

### Calculation of the net asset value

The net asset value is calculated daily, as described above, except on days on which no shares may be issued or redeemed. Swing pricing may be applied as described in the 'Information concerning the Bevek – N. Liquidity management tools' section.

### Publication of the net asset value

The 'Information concerning the Bevek – I. Additional information – Publication of the net asset value' section specifies where the result of the calculation of the net asset value can be viewed.

## 5. Types of shares and fees and charges

---

Shares may be in registered or book-entry form, as the shareholder chooses. No certificates representing the registered shares are issued. Instead, confirmation is supplied of entry in the register of shareholders.

### Dividend payment

After the close of the financial year, the General Meeting determines the portion of the result, which, within the limitations imposed by the Law of 3 August 2012 relative to undertakings for collective investment complying with the conditions of Directive 2009/65/EC and the undertakings for investment in receivables, is to be paid to the holders of distribution shares.

The holders of capitalisation shares are not entitled to receive a dividend. The portion of the annual net income accruing to them is capitalised in favour of these shares.

The shareholders will receive payment within six months of the close of the financial year via institutions designated for this purpose by the General Meeting.

The General Meeting may decide to proceed to interim payments in accordance with the provisions of the law.

The Board of Directors may, in accordance with the provisions laid down in the articles of association and within the limits of the law, decide to pay out interim dividends.

The information on the type and/or class of shares and the fees and charges associated with them is set out below by type and/or share class.

# Information concerning the sub-fund CSOB Akciovy fond dividendovych firem

## 1. Basic details

---

### Name

CSOB Akciovy fond dividendovych firem

### Date of incorporation

12 July 2012

### Life

Unlimited

### Delegation of the management of the investment portfolio

There is no delegation of the management of the investment portfolio.

### Stock exchange listing

Not applicable.

## 2. Investment information

---

### Sub-fund's object

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

### Sub-fund's investment policy

#### *Permitted asset classes*

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

#### *Restrictions of the investment policy*

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

## Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. **Consequently, there may be an impact on concentration risk.** Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

## Selected strategy

KBC Equity Fund CSOB Akciovy Fond Dividendovych Firem aims to generate a return by investing at least 75% of its assets in shares with a high dividend yield. All regions, sectors and themes may be taken into consideration. The rest of the assets will be invested in bonds, debt instruments, money market instruments and deposits.

The sub-fund aims to hedge 100% of exchange rate risk to Czech koruna through forward contracts.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

## Transparency of adverse sustainability impacts

The sub-fund considers the principal adverse impacts of its investment decisions on sustainability factors ('PAI') as described by the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector ('SFDR')

The principal adverse impacts on sustainability factors are explicitly taken into account through the General exclusion policy. More information on the principal adverse impact indicators that are taken into account can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > General exclusion policy for conventional and Responsible Investing funds.

In addition, the principal adverse impacts on sustainability factors are implicitly taken into account through the Proxy Voting and Engagement Policy of KBC Asset Management NV (more information can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > Retrospective Proxy Voting - overview > Proxy Voting and Engagement Policy).

KBC Asset Management NV exercises the voting rights of the shares it manages in accordance with the Proxy Voting and Engagement Policy. Where appropriate, KBC Asset Management NV will engage in dialogue with the management of the companies concerned, if necessary before voting.

Information on the principal adverse impacts on sustainability factors can also be found in the annual report for this sub-fund.

## Benchmark information

The fund is actively managed with reference to the following benchmark: MSCI World 100% Hedged to CZK - Net Return Index.

However, is not the aim of the fund to replicate the benchmark. The composition of the benchmark is taken into account when compiling the portfolio.

When compiling the portfolio, the manager may also decide to invest in instruments that are not included in the benchmark, or indeed not to invest in instruments that are included.

The composition of the portfolio will to a large extent be similar to that of the benchmark.

The benchmark is also used to assess the performance of the sub-fund.

The benchmark is also used to determine the fund's risk limitation mechanism. This limits the extent to which the fund's return may deviate from the benchmark.

The longterm expected tracking error for this fund is 4.00%. The tracking error measures the volatility of the fund's return relative to that of the benchmark. The higher the tracking error, the more the fund's return fluctuates relative to the benchmark. Market conditions may cause the actual tracking error to differ from the expected tracking error.

Source: MSCI. The MSCI data is comprised of a custom index calculated by MSCI for, and as requested by, KBC Asset Management NV. The MSCI data is for internal use only and may not be redistributed or used in connection with creating or offering any securities, financial products or indices. Neither MSCI nor any other third party involved in or related to compiling, computing or creating the MSCI data (the "MSCI Parties") makes any express or implied warranties or representations with respect to such data (or the results to be obtained by the use thereof), and the MSCI Parties hereby expressly disclaim all warranties of originality, accuracy, completeness, merchantability or fitness for a particular purpose with respect to such data. Without limiting any of the foregoing, in no event shall any of the MSCI Parties have any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages.

### **Volatility of the net asset value**

The volatility of the net asset value may be high due to the composition of the portfolio.

## 3. Risk

### Sub-fund's risk profile

Investors must take note of the specific risk factors set out below, the description of the risks given under the heading 'Information concerning the Bevek - F.Information on the risk profile of the UCITS', and the 'What are the risks and what could I get in return?' section of the key information document.

Summary table of risks assessed by the sub-fund:

| Risk type                 | Concise definition of the risk                                                                                                      |          | Explanation:                                                       |
|---------------------------|-------------------------------------------------------------------------------------------------------------------------------------|----------|--------------------------------------------------------------------|
| Market risk               | The risk that the entire market of an asset class will decline, thus affecting the prices and values of the assets in the portfolio | high     | the level of the risk reflects the volatility of the stock market. |
| Credit risk               | The risk that an issuer or a counterparty will default                                                                              | low      |                                                                    |
| Settlement risk           | The risk that settlement of a transaction via a payment system will not take place as expected                                      | low      |                                                                    |
| Liquidity risk            | The risk that a position cannot be liquidated in a timely manner at a reasonable price                                              | low      |                                                                    |
| Exchange or currency risk | The risk that the value of an investment will be affected by changes in exchange rates                                              | low      |                                                                    |
| Custody risk              | The risk of loss of assets held in custody with a custodian or sub-custodian                                                        | low      |                                                                    |
| Concentration risk        | The risk relating to a large concentration of investments in specific assets or in specific markets                                 | low      |                                                                    |
| Performance risk          | Risks to return                                                                                                                     | high     | the level of the risk reflects the volatility of the stock market. |

### Risk profile of the typical investor

Profile of the typical investor for which the sub-fund has been designed : Highly dynamic profile.

The risk profile mentioned per sub-fund has been determined from the point of view of an investor in the euro area and may differ from that of an investor in other currency zones. More information on the risk profiles can be obtained at [www.kbc.be/riskprofile](http://www.kbc.be/riskprofile).

## 4. Information concerning the trading of shares

### How to buy and sell shares and switch between sub-funds

If it turns out that shares are being held by persons other than those permitted to hold them, the Company may, in accordance with article 8.2 of the articles of association, and without charge (except any taxes due and any charges to cover the cost of realising the assets), redeem those shares.

| Cut-off time for receiving orders at the financial service providers in Belgium <sup>(1)</sup><br><br>Date of published net asset value | Date the net asset value is calculated | Actual values used                                                                                                                                                                                                                                           | Date of payment or repayment of the orders |
|-----------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------|
| <b>D</b><br>(every banking day <sup>(2)</sup><br>at 2 pm CET)<br>also referred to as 'Dealing Day'                                      | <b>D+1 banking day</b>                 | <b>D</b> if maximum 20% of the actual values are already known on D<br>(every banking day <sup>(2)</sup><br>at 2 pm CET)<br><br><b>D+1</b> if more than 20% of the actual values are already known on D<br>(every banking day <sup>(2)</sup><br>at 2 pm CET) | <b>D+3 banking days</b>                    |

<sup>(1)</sup> The cut-off time for receiving orders stated above applies to orders investors place directly with the financial services providers in Belgium.

If an investor places an order with a financial institution other than the financial service providers in Belgium, he/she must find out from that institution what cut-off time (time + date) applies to the order he/she wishes to place so that the institution in question can take the necessary action to ensure that the order reaches the financial service providers in Belgium before 2 pm CET on day D in order to qualify as an order of day D.

<sup>(2)</sup> with the exception of banking days on which one or more markets on which more than 20% of the sub-fund's assets are listed are closed or if transactions are suspended or restricted.

### Calculation of the net asset value

The net asset value is calculated daily, as described above, except on days on which no shares may be issued or redeemed. Swing pricing may be applied as described in the 'Information concerning the Bevek – N. Liquidity management tools' section.

### Publication of the net asset value

The 'Information concerning the Bevek – I. Additional information – Publication of the net asset value' section specifies where the result of the calculation of the net asset value can be viewed.

If the profitability of the sub-fund is jeopardised due to a limited number of subscriptions during the initial subscription period (less than 5 000 000 euros), the Board of Directors of the Bevek may decide to refuse the orders placed during the initial subscription period and not to proceed with the commercialisation of the sub-fund.

## 5. Types of shares and fees and charges

---

Shares may be in registered or book-entry form, as the shareholder chooses. No certificates representing the registered shares are issued. Instead, confirmation is supplied of entry in the register of shareholders.

### Dividend payment

After the close of the financial year, the General Meeting determines the portion of the result, which, within the limitations imposed by the Law of 3 August 2012 relative to undertakings for collective investment complying with the conditions of Directive 2009/65/EC and the undertakings for investment in receivables, is to be paid to the holders of distribution shares.

The holders of capitalisation shares are not entitled to receive a dividend. The portion of the annual net income accruing to them is capitalised in favour of these shares.

The shareholders will receive payment within six months of the close of the financial year via institutions designated for this purpose by the General Meeting.

The General Meeting may decide to proceed to interim payments in accordance with the provisions of the law.

The Board of Directors may, in accordance with the provisions laid down in the articles of association and within the limits of the law, decide to pay out interim dividends.

The information on the type and/or class of shares and the fees and charges associated with them is set out below by type and/or share class.

# Information concerning the sub-fund Emerging Markets

## 1. Basic details

---

### Name

Emerging Markets

### Date of incorporation

21 March 1991

### Life

Unlimited

### Delegation of the management of the investment portfolio

There is no delegation of the management of the investment portfolio.

### Stock exchange listing

Not applicable.

## 2. Investment information

---

### Sub-fund's object

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

### Sub-fund's investment policy

#### *Permitted asset classes*

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

#### *Restrictions of the investment policy*

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

## Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. **Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.**

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

## Selected strategy

At least 75% of the assets are invested in shares of companies in countries where conditions are such as to allow an accelerated economic growth in the short or medium term. More particularly, this involves countries in Asia, Latin America, Central Europe and Eastern Europe.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

## Transparency of adverse sustainability impacts

The sub-fund considers the principal adverse impacts of its investment decisions on sustainability factors ('PAI') as described by the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector ('SFDR')

The principal adverse impacts on sustainability factors are explicitly taken into account through the General exclusion policy. More information on the principal adverse impact indicators that are taken into account can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > General exclusion policy for conventional and Responsible Investing funds.

In addition, the principal adverse impacts on sustainability factors are implicitly taken into account through the Proxy Voting and Engagement Policy of KBC Asset Management NV (more information can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > Retrospective Proxy Voting - overview > Proxy Voting and Engagement Policy).

KBC Asset Management NV exercises the voting rights of the shares it manages in accordance with the Proxy Voting and Engagement Policy. Where appropriate, KBC Asset Management NV will engage in dialogue with the management of the companies concerned, if necessary before voting.

Information on the principal adverse impacts on sustainability factors can also be found in the annual report for this sub-fund.

## Benchmark information

The fund is actively managed with reference to the following benchmark: MSCI Emerging Markets-Net Return index. However, it is not the aim of the fund to replicate the benchmark. The composition of the benchmark is taken into account when compiling the portfolio.

When compiling the portfolio, the manager may also decide to invest in instruments that are not included in the benchmark, or indeed not to invest in instruments that are included.

The composition of the portfolio will to a large extent be similar to that of the benchmark.

The benchmark is also used to assess the performance of the sub-fund.

The benchmark is also used to determine the fund's risk limitation mechanism. This limits the extent to which the

fund's return may deviate from the benchmark.

The longterm expected tracking error for this fund is 4.00%. The tracking error measures the volatility of the fund's return relative to that of the benchmark. The higher the tracking error, the more the fund's return fluctuates relative to the benchmark. Market conditions may cause the actual tracking error to differ from the expected tracking error.

Required disclaimers for benchmark providers:

Source: MSCI. No MSCI Party nor any other party involved in or related to compiling, computing or creating the MSCI data, makes any express or implied warranties or representations with respect to such data (or the results to be obtained by the use thereof), and all such parties hereby expressly disclaim all warranties of originality, accuracy, completeness, merchantability or fitness for a particular purpose with respect to any of such data. Without limiting any of the foregoing, in no event shall MSCI, any of its affiliates, or any third party involved in compiling, computing, or creating the data have any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages. No further distribution or dissemination of the MSCI data is permitted without MSCI's express written consent.

**Volatility of the net asset value**

The volatility of the net asset value may be high due to the composition of the portfolio.

## 3. Risk

### Sub-fund's risk profile

Investors must take note of the specific risk factors set out below, the description of the risks given under the heading 'Information concerning the Bevek - F.Information on the risk profile of the UCITS', and the 'What are the risks and what could I get in return?' section of the key information document.

Summary table of risks assessed by the sub-fund:

| Risk type                 | Concise definition of the risk                                                                                                      |                                                    | Explanation:                                                                                                                                                                                                              |
|---------------------------|-------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Market risk               | The risk that the entire market of an asset class will decline, thus affecting the prices and values of the assets in the portfolio | high                                               | the level of the risk reflects the volatility of the stock market.                                                                                                                                                        |
| Credit risk               | The risk that an issuer or a counterparty will default                                                                              | low                                                |                                                                                                                                                                                                                           |
| Settlement risk           | The risk that settlement of a transaction via a payment system will not take place as expected                                      | low                                                |                                                                                                                                                                                                                           |
| Liquidity risk            | The risk that a position cannot be liquidated in a timely manner at a reasonable price                                              | moderate                                           | since there will be invested in the shares of companies from emerging economies, there is a risk that a position cannot be sold quickly at a reasonable price.                                                            |
| Exchange or currency risk | The risk that the value of an investment will be affected by changes in exchange rates                                              | For the share class Classic Shares : high          | since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.         |
|                           |                                                                                                                                     | For the share class Institutional B Shares : high  | since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.         |
|                           |                                                                                                                                     | For the share class Classic Shares CSOB CZK : high | since there are investments in securities that are denominated in currencies other than the Czech Koruna, there is a considerable chance that the value of an investment will be affected by movements in exchange rates. |
| Custody risk              | The risk of loss of assets held in custody with a custodian or sub-custodian                                                        | low                                                |                                                                                                                                                                                                                           |
| Concentration risk        | The risk relating to a large concentration of investments in specific assets or in specific markets                                 | moderate                                           | there is a concentration of the investments in shares of companies from Asian, Latin-American and Central and Eastern European countries.                                                                                 |
| Performance risk          | Risks to return                                                                                                                     | high                                               | the level of the risk reflects the volatility of the stock market.                                                                                                                                                        |

|                       |                                                                                         |          |                                 |

| Flexibility risk      | Inflexibility both within the product and constraints on switching to other providers   | none     |                                 |
| Inflation risk        | Risk of inflation                                                                       | low      |                                 |
| Environmental factors | Uncertainty regarding the immutability of environmental factors, such as the tax regime | low      |                                 |

## Risk profile of the typical investor

Profile of the typical investor for which the sub-fund has been designed : Highly dynamic profile.

The risk profile mentioned per sub-fund has been determined from the point of view of an investor in the euro area and may differ from that of an investor in other currency zones. More information on the risk profiles can be obtained at [www.kbc.be/riskprofile](http://www.kbc.be/riskprofile).

## 4. Information concerning the trading of shares

### How to buy and sell shares and switch between sub-funds

If it turns out that shares are being held by persons other than those permitted to hold them, the Company may, in accordance with article 8.2 of the articles of association, and without charge (except any taxes due and any charges to cover the cost of realising the assets), redeem those shares.

| Cut-off time for receiving orders at the financial service providers in Belgium <sup>(1)</sup><br><br>Date of published net asset value | Date the net asset value is calculated | Actual values used                                                                                                                                                                                                                                     | Date of payment or repayment of the orders |
|-----------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------|
| <b>D</b><br>(every banking day <sup>(2)</sup> at 6 am CET)<br>also referred to as 'Dealing Day'                                         | <b>D+1 banking day</b>                 | <b>D</b> if maximum 20% of the actual values are already known on D<br>(every banking day <sup>(2)</sup> at 6 am CET)<br><br><b>D+1</b> if more than 20% of the actual values are already known on D<br>(every banking day <sup>(2)</sup> at 6 am CET) | <b>D+3 banking days</b>                    |

<sup>(1)</sup> The cut-off time for receiving orders stated above applies to orders investors place directly with the financial services providers in Belgium.

If an investor places an order with a financial institution other than the financial service providers in Belgium, he/she must find out from that institution what cut-off time (time + date) applies to the order he/she wishes to place so that the institution in question can take the necessary action to ensure that the order reaches the financial service providers in Belgium before 6 am CET on day D in order to qualify as an order of day D.

<sup>(2)</sup> with the exception of banking days on which one or more markets on which more than 20% of the sub-fund's assets are listed are closed or if transactions are suspended or restricted.

### Calculation of the net asset value

The net asset value is calculated daily, as described above, except on days on which no shares may be issued or redeemed. Swing pricing may be applied as described in the 'Information concerning the Bevek – N. Liquidity management tools' section.

### Publication of the net asset value

The 'Information concerning the Bevek – I. Additional information – Publication of the net asset value' section specifies where the result of the calculation of the net asset value can be viewed.

## 5. Types of shares and fees and charges

---

Shares may be in registered or book-entry form, as the shareholder chooses. No certificates representing the registered shares are issued. Instead, confirmation is supplied of entry in the register of shareholders.

### Dividend payment

After the close of the financial year, the General Meeting determines the portion of the result, which, within the limitations imposed by the Law of 3 August 2012 relative to undertakings for collective investment complying with the conditions of Directive 2009/65/EC and the undertakings for investment in receivables, is to be paid to the holders of distribution shares.

The holders of capitalisation shares are not entitled to receive a dividend. The portion of the annual net income accruing to them is capitalised in favour of these shares.

The shareholders will receive payment within six months of the close of the financial year via institutions designated for this purpose by the General Meeting.

The General Meeting may decide to proceed to interim payments in accordance with the provisions of the law.

The Board of Directors may, in accordance with the provisions laid down in the articles of association and within the limits of the law, decide to pay out interim dividends.

The information on the type and/or class of shares and the fees and charges associated with them is set out below by type and/or share class.

# Information concerning the sub-fund Emerging Markets Responsible Investing

## 1. Basic details

---

### Name

Emerging Markets Responsible Investing

### Date of incorporation

29 November 2013

### Life

Unlimited

### Delegation of the management of the investment portfolio

There is no delegation of the management of the investment portfolio.

### Stock exchange listing

Not applicable.

## 2. Investment information

---

### Sub-fund's object

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

### Sub-fund's investment policy

#### *Permitted asset classes*

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

#### *Restrictions of the investment policy*

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

## Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. **Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.**

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

## Selected strategy

At least 90% of the assets will be invested, directly or indirectly, in shares of emerging market companies.

## Information related to Responsible Investing

Within the above limits, the sub-fund pursues responsible investment objectives based on a dualistic approach: a negative screening and a positive selection methodology.

KBC Asset Management NV has a team of specialist researchers responsible for this dualistic approach. They are assisted by an independent advisory board (the “**Responsible Investing Advisory Board**”) comprised of up to twelve persons, who are not affiliated to KBC Asset Management NV, and whose sole responsibility is to supervise the dualistic approach and activities of the specialist researchers. The secretariat of the advisory board is handled by a representative of KBC Asset Management NV. Moreover, KBC Asset Management NV works with data suppliers with expertise in Responsible Investing that provide data to the specialized researchers, who process and complete the data with publicly available information (including annual reports, press publications, etc.).

The sub-fund promotes a combination of environmental and/or social characteristics and, even though it does not have sustainable investments as an objective, it shall invest a minimum proportion of its assets in economic activities that contribute to the achievement of environmental or social objectives (i.e. ‘sustainable investments’).

The companies in which it invests must follow good governance practices.

The sub-fund is compliant with the transparency obligations of article 8(1) of Regulation (EU) 2019/2088 of the European Parliament and of the council of 27 November 2019 on sustainability-related disclosures in the financial services sector (‘SFDR’). More information on how the sub-fund promotes environmental and/or social characteristics can be found in the ‘Annex for KBC Equity Fund Emerging Markets Responsible Investing’ to the prospectus. This annex specifically covers the pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852.

In addition, the exclusions set out in Article 12(1)(a) to (g) of Delegated Regulation (EU) 2020/1818 (“Exclusions for Paris Agreement-aligned EU benchmarks”) are respected by this sub-fund.

The sub-fund complies with the European Securities and Markets Authority (ESMA) guidelines on fund names using ESG or sustainability-related terms.

### Negative screening

In practical terms the end result of this negative screening procedure is that the sub-fund excludes companies in advance from the Responsible Investment universe which fall foul of the exclusion policy available on [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > Exclusion policy for Responsible Investing funds.

The application of these policies means that:

- companies involved in certain activities are excluded from the sub-fund's investment universe. A distinction can be made between companies that are excluded if they exceed a certain turnover threshold in relation to specific activities, such as conventional weapons, tobacco, gambling or adult entertainment, and those that are excluded outright because they are involved in specific activities, such as controversial weapons, agricultural commodities or the mining of thermal coal, among others.
- The sub-fund may nevertheless invest in companies involved in conventional weapons and/or nuclear weapons that exceed certain turnover thresholds, provided they are included on the whitelist as specified in the policy. The whitelist is a list drawn up by KBC Group and includes companies involved in conventional weapons and/or nuclear weapons, but which are nevertheless deemed acceptable as investments within funds that invest responsibly, taking into account factors such as the proportion of arms sales to non-NATO countries and a possible involvement in human rights controversies related to armed conflict.

This screening also ensures that companies who seriously violate fundamental principles of environmental protection, social responsibility and good governance, among others, are excluded from the sub-fund's investment universe.

More information regarding the specific exclusions can also be found in the "Annex for KBC Equity Fund Emerging Markets Responsible Investing" to the prospectus.

These negative screening principles are not exhaustive and may be adapted from time to time under the supervision of the Responsible Investing Advisory Board.

#### Positive selection methodology

Within the defined investment universe and other limits described above, the responsible investment objectives of the sub-fund are the following:

- (1) promote the integration of sustainability into the policy decisions of companies by preferring companies with a better **ESG risk score**, where ESG stands for 'Environmental, Social and Governance', and
- (2) promote climate change mitigation, by preferring companies with lower **Greenhouse Gas Intensity**, with the objective of meeting a predetermined Greenhouse Gas intensity target;
- (3) support sustainable development, through 'sustainable investments' in accordance with art. 2(17) SFDR. Sustainable investments will consist of investments in companies contributing to the achievement of the **UN Sustainable Development Goals** (plus instruments awarded the 'sustainable development' label by KBC Asset Management NV on the advice of the Responsible Investing Advisory Board).

More information on the investment policy for Responsible Investing funds is available at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > Investment policy for Responsible Investing funds.

#### (1) ESG-risk score

The contribution to the integration of sustainability into policy decisions of the companies is measured based on an ESG-risk score. This score represents the aggregated performance assessment of a given company against a series of ESG criteria which are grounded to the extent possible against objective measures. The main factors underpinning the ESG criteria are:

- respect for the environment (e.g., reduction in greenhouse gas emissions);
- attention to society (e.g., employee working conditions); and
- corporate governance (e.g., independence and diversity of the board of directors).

At least 90% of the corporate investments in the portfolio, as measured by assets under management, must have an ESG risk score. The ESG risk score for companies is an ESG risk score supplied by a data provider, and based on internal research as well.

These lists are not exhaustive and may be changed under the supervision of the Responsible Investing Advisory Board.

To achieve this objective, the ESG-risk score of the portfolio for companies is compared to following benchmark: MSCI Emerging Markets-Net Return index.

To calculate the ESG-risk score at portfolio level, the weighted average of the ESG (risk) scores of the positions in the sub-fund are taken into account. Technical items such as cash and derivatives are not taken into account and also companies or countries for which no data is available are left out. The weights used in the calculation depend on the size of the positions in the sub-fund, rescaled for these items.

More information on the ESG-risk score and the concrete goals of the sub-fund can be found in the 'Annex for KBC Equity Fund Emerging Markets Responsible Investing' to the prospectus.

The targets can be revised upwards or downwards.

#### (2) Greenhouse Gas Intensity

The objective to promote climate change mitigation, by favoring lower greenhouse gas intensity companies, with the goal of meeting a predetermined greenhouse gas intensity target covers at least 90% of the portfolio. The objective does not apply to companies for which data is not available.

The contribution of companies to climate change mitigation is measured based on their greenhouse gas intensity. Greenhouse gas intensity is defined as absolute greenhouse gas emissions (in tonnes CO<sub>2</sub> equivalent), divided by revenues (in mln USD).

The sub-fund's target in terms of greenhouse gas intensity is assessed on two targets whereby the most strict of the two will determine the target applied: 15% better than the benchmark MSCI Emerging Markets-Net Return index and a reduction of 50% by 2030 compared to the benchmark MSCI Emerging Markets-Net Return index in 2019.

More information on Greenhouse Gas Intensity and the concrete goals of the sub-fund can be found in the 'Annex for KBC Equity Fund Emerging Markets Responsible Investing' to the prospectus.

The targets may be revised upwards or downwards.

### **(3) UN Sustainable Development Goals**

To support sustainable development, the sub-fund commits to invest a minimum proportion of the portfolio in companies that contribute to the UN Sustainable Development Goals. The UN Sustainable Development Goals include both social and environmental objectives.

Companies are considered to contribute to sustainable development when at least 20% of the revenues are linked to the UN Sustainable Development Goals. The activities of the companies are assessed on multiple sustainable themes that can be linked to the UN Sustainable Development Goals.

Instruments of companies that meet these requirements are designated as "sustainable investments," according to Article 2(17) SFDR.

In addition, KBC Asset Management NV can award the "sustainable development" label to instruments, on the advice of the Responsible Investing Advisory Board. In that case, these investments shall also qualify as "sustainable investments," according to Article 2(17) SFDR.

More information about the methodology used to qualify investments as investments which contribute to the UN Sustainable Development Goals can be found in the 'Annex for KBC Equity Fund Emerging Markets Responsible Investing' to the prospectus.

### **Potential Exceptions**

It cannot be ruled out, however, that very limited investments may be made temporarily in assets that do not meet the above criteria. The reasons for this include the following:

- Developments as a result of which a company can no longer be regarded as eligible after purchase;
- Corporate events, such as a merger of one company with another, where the merged company can no longer be considered an eligible company based on the above criteria;
- Incorrect data as a result of which assets are invested (unintentionally and erroneously) in assets purchased when it should not have been eligible for the sub-fund;
- A planned update of the screening criteria as a result of which assets should be excluded from the sub-fund, but which the management company chooses to refrain from selling immediately in the best interest of the customer;
- External circumstances such as market movements and updates of external data can lead to investment solutions failing to achieve the abovementioned targets.

In these cases, the fund manager will replace the assets concerned with more appropriate assets as soon as possible, always taking into account the sole interest of the investor.

In addition, for the purpose of efficient portfolio management, the fund manager may to a significant degree use derivatives relating to assets that would not be eligible for inclusion in the sub-fund, in so far as there is no serviceable and comparable alternative available on the market. In addition, the counterparties with which the derivative transactions are entered into may not necessarily be issuers having a responsible nature.

### **Taxonomy related information**

At the date of this prospectus, the sub-fund does not commit to invest a minimum proportion of its assets in environmentally sustainable economic activities which contribute to any of the environmental objectives set out in Article 9 of the Regulation (EU) 2020/852 of the European Parliament and of the Council of 18 June 2020 on the establishment of a framework to facilitate sustainable investment ('EU Taxonomy Framework'). The minimum proportion of investments in environmentally sustainable economic activities within the meaning of the EU Taxonomy Framework is 0%. This will be monitored on a regular basis and as soon as sufficiently reliable, timely and verifiable data from issuers or invested companies is available, the prospectus may be updated.

Non-financial companies are considered to contribute to sustainable development if at least 20% of sales are aligned to the EU Taxonomy Framework based on Trucost data. For companies in the financial sector, a different methodology applies. For credit institutions, the alignment with the EU Taxonomy Framework is based on the Green Asset Ratio, while for other financial companies the alignment with the EU Taxonomy Framework is based on the alignment of their investment portfolios. Instruments of companies that meet these requirements are referred to as "sustainable investments," according to art. 2(17) SFDR. More information on the percentage in the portfolio that was considered "sustainable investments with an environmental objective aligned with the EU Taxonomy Framework" based on this criterion during the reporting period, can be found in the annual reports for this sub-fund.

More information on the EU Taxonomy Framework can be found in the 'Annex for KBC Equity Fund Emerging Markets Responsible Investing' to the prospectus.

### **Transparency of adverse sustainability impacts**

The sub-fund considers the principal adverse impacts of its investment decisions on sustainability factors by taking

into account the principal adverse impact indicators ('PAI'), as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability disclosure in the financial services sector ('SFDR').

The principal adverse impacts on sustainability factors are explicitly taken into account through the General exclusion policy for conventional and Responsible Investing funds and the exclusion policy for Responsible Investing funds. More information on the principal adverse impact indicators taken into account can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > General exclusion policy for conventional and Responsible Investing funds and [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > Exclusion policy for Responsible Investing funds.

In addition, the principal adverse impacts on sustainability factors are implicitly taken into account through the Proxy Voting and Engagement Policy of KBC Asset Management NV (more information can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > Retrospective Proxy Voting - overview > Proxy Voting and Engagement Policy).

More information on how the sub-fund aims to consider the principal adverse impacts on sustainability factors can also be found in the 'Annex for KBC Equity Fund Emerging Markets Responsible Investing' to the prospectus. A statement on how the sub-fund has considered the principal adverse impacts on sustainability factors during the reporting period can also be found in the annual reports for this sub-fund.

## **Benchmark information**

The fund is actively managed with reference to the following benchmark: MSCI Emerging Markets-Net Return index. However, it is not the aim of the fund to replicate the benchmark. The composition of the benchmark is taken into account when compiling the portfolio.

In line with its investment policy, the sub-fund may not invest in all the instruments included in the benchmark.

When compiling the portfolio, the manager may also decide to invest in instruments that are not included in the benchmark, or indeed not to invest in instruments that are included.

The composition of the portfolio will vary from that of the benchmark, as the composition of the benchmark is not fully consistent with the environmental and/or social characteristics promoted by the sub-fund. The use of the benchmark does not detract from the responsible character of the portfolio. The responsible character is guaranteed by the aforementioned Responsible Investing methodology.

The benchmark is also used to determine the fund's risk limitation mechanism. This limits the extent to which the fund's return may deviate from the benchmark.

The longterm expected tracking error for this fund is 4.50%. The tracking error measures the volatility of the fund's return relative to that of the benchmark. The higher the tracking error, the more the fund's return fluctuates relative to the benchmark. Market conditions may cause the actual tracking error to differ from the expected tracking error.

### Required disclaimers for benchmark providers:

Source: MSCI. No MSCI Party nor any other party involved in or related to compiling, computing or creating the MSCI data, makes any express or implied warranties or representations with respect to such data (or the results to be obtained by the use thereof), and all such parties hereby expressly disclaim all warranties of originality, accuracy, completeness, merchantability or fitness for a particular purpose with respect to any of such data. Without limiting any of the foregoing, in no event shall MSCI, any of its affiliates, or any third party involved in compiling, computing, or creating the data have any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages. No further distribution or dissemination of the MSCI data is permitted without MSCI's express written consent.

## **Volatility of the net asset value**

The volatility of the net asset value may be high due to the composition of the portfolio.

## 3. Risk

### Sub-fund's risk profile

Investors must take note of the specific risk factors set out below, the description of the risks given under the heading 'Information concerning the Bevek - F.Information on the risk profile of the UCITS', and the 'What are the risks and what could I get in return?' section of the key information document.

Summary table of risks assessed by the sub-fund:

| Risk type                 | Concise definition of the risk                                                                                                      |          | Explanation:                                                                                                                                                                                                      |
|---------------------------|-------------------------------------------------------------------------------------------------------------------------------------|----------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Market risk               | The risk that the entire market of an asset class will decline, thus affecting the prices and values of the assets in the portfolio | high     | the level of the risk reflects the volatility of the stock market.                                                                                                                                                |
| Credit risk               | The risk that an issuer or a counterparty will default                                                                              | low      |                                                                                                                                                                                                                   |
| Settlement risk           | The risk that settlement of a transaction via a payment system will not take place as expected                                      | low      |                                                                                                                                                                                                                   |
| Liquidity risk            | The risk that a position cannot be liquidated in a timely manner at a reasonable price                                              | moderate | since there will be invested in the shares of companies from emerging economies, there is a risk that a position cannot be sold quickly at a reasonable price.                                                    |
| Exchange or currency risk | The risk that the value of an investment will be affected by changes in exchange rates                                              | high     | since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates. |
| Custody risk              | The risk of loss of assets held in custody with a custodian or sub-custodian                                                        | low      |                                                                                                                                                                                                                   |
| Concentration risk        | The risk relating to a large concentration of investments in specific assets or in specific markets                                 | moderate | there is a concentration of investments in the shares of emerging market companies.                                                                                                                               |
| Performance risk          | Risks to return                                                                                                                     | high     | the level of the risk reflects the volatility of the stock market.                                                                                                                                                |
| Capital risk              | Risks to capital                                                                                                                    | moderate | There is no capital protection.                                                                                                                                                                                   |
| Flexibility risk          | Inflexibility both within the product and constraints on switching to other providers                                               | none     |                                                                                                                                                                                                                   |
| Inflation risk            | Risk of inflation                                                                                                                   | low      |                                                                                                                                                                                                                   |
| Environmental factors     | Uncertainty regarding the immutability of environmental factors, such as the tax regime                                             | low      |                                                                                                                                                                                                                   |

### Risk profile of the typical investor

Profile of the typical investor for which the sub-fund has been designed : Highly dynamic profile.

The risk profile mentioned per sub-fund has been determined from the point of view of an investor in the euro area and may differ from that of an investor in other currency zones. More information on the risk profiles can be obtained at [www.kbc.be/riskprofile](http://www.kbc.be/riskprofile).

## 4. Information concerning the trading of shares

### How to buy and sell shares and switch between sub-funds

If it turns out that shares are being held by persons other than those permitted to hold them, the Company may, in accordance with article 8.2 of the articles of association, and without charge (except any taxes due and any charges to cover the cost of realising the assets), redeem those shares.

| Cut-off time for receiving orders at the financial service providers in Belgium <sup>(1)</sup><br><br>Date of published net asset value | Date the net asset value is calculated | Actual values used                                                                                                                                                                                                                                           | Date of payment or repayment of the orders |
|-----------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------|
| <b>D</b><br>(every banking day <sup>(2)</sup><br>at 6 am CET)<br>also referred to as 'Dealing Day'                                      | <b>D+1 banking day</b>                 | <b>D</b> if maximum 20% of the actual values are already known on D<br>(every banking day <sup>(2)</sup><br>at 6 am CET)<br><br><b>D+1</b> if more than 20% of the actual values are already known on D<br>(every banking day <sup>(2)</sup><br>at 6 am CET) | <b>D+3 banking days</b>                    |

<sup>(1)</sup> The cut-off time for receiving orders stated above applies to orders investors place directly with the financial services providers in Belgium.

If an investor places an order with a financial institution other than the financial service providers in Belgium, he/she must find out from that institution what cut-off time (time + date) applies to the order he/she wishes to place so that the institution in question can take the necessary action to ensure that the order reaches the financial service providers in Belgium before 6 am CET on day D in order to qualify as an order of day D.

<sup>(2)</sup> with the exception of banking days on which one or more markets on which more than 20% of the sub-fund's assets are listed are closed or if transactions are suspended or restricted.

### Calculation of the net asset value

The net asset value is calculated daily, as described above, except on days on which no shares may be issued or redeemed. Swing pricing may be applied as described in the 'Information concerning the Bevek – N. Liquidity management tools' section.

### Publication of the net asset value

The 'Information concerning the Bevek – I. Additional information – Publication of the net asset value' section specifies where the result of the calculation of the net asset value can be viewed.

If the profitability of the sub-fund is jeopardised due to a limited number of subscriptions during the initial subscription period (less than 5 000 000 euros), the Board of Directors of the Bevek may decide to refuse the orders placed during the initial subscription period and not to proceed with the commercialisation of the sub-fund.

## 5. Types of shares and fees and charges

---

Shares may be in registered or book-entry form, as the shareholder chooses. No certificates representing the registered shares are issued. Instead, confirmation is supplied of entry in the register of shareholders.

### Dividend payment

After the close of the financial year, the General Meeting determines the portion of the result, which, within the limitations imposed by the Law of 3 August 2012 relative to undertakings for collective investment complying with the conditions of Directive 2009/65/EC and the undertakings for investment in receivables, is to be paid to the holders of distribution shares.

The holders of capitalisation shares are not entitled to receive a dividend. The portion of the annual net income accruing to them is capitalised in favour of these shares.

The shareholders will receive payment within six months of the close of the financial year via institutions designated for this purpose by the General Meeting.

The General Meeting may decide to proceed to interim payments in accordance with the provisions of the law.

The Board of Directors may, in accordance with the provisions laid down in the articles of association and within the limits of the law, decide to pay out interim dividends.

The information on the type and/or class of shares and the fees and charges associated with them is set out below by type and/or share class.

# Emerging Markets Responsible Investing - Institutional Discretionary Shares

**This share class is reserved**

- for trading to persons who acquire and hold the units on the basis of a discretionary management agreement with KBC Asset Management NV (except a discretionary management agreement 'Core Satellite'), or with another company associated with KBC Asset Management NV and who pay a discretionary management fee on the part of their portfolio invested in KBC UCIs<sup>1</sup>. In addition, these persons must have the status of 'eligible investors', acting on its own behalf, as within the meaning of Article 5 § 3/1 of the Law of 3 August 2012 relative to undertakings for collective investment complying with the conditions of Directive 2009/65/EC and the undertakings for investment in receivables<sup>2</sup>. The investor must comply with these conditions at the time of subscription and for as long as the investor remains a shareholder of the share class.
- for trading to institutional undertakings for collective investment managed by KBC Asset Management NV or by another company associated with this management company and who pay a fee on the part of the assets invested in KBC UCIs.

If it appears that the shares of this class are held by persons other than those authorized, these shares will be converted at no cost (except taxes) into shares of the share class "Classic Shares".

# Emerging Markets Responsible Investing

## - Institutional Shares

This share class is reserved for institutional investors, as defined in Article 5 § 3 of the Law of 3 August 2012 relative to undertakings for collective investment complying with the conditions of Directive 2009/65/EC and the undertakings for investment in receivables, and requires a minimum subscription of 10000 EUR (both during as well as after the initial subscription period). The investor must have the status of institutional investor at the moment of subscription and for as long as the investor remains a shareholder of the share class. If it appears that the shares of this class of shares are held by persons other than authorized, these shares will be converted at no cost (except taxes) into shares of the share class 'Classic Shares'.

# Information concerning the sub-fund EMU Small & Medium Caps

## 1. Basic details

---

### Name

EMU Small & Medium Caps

### Date of incorporation

27 September 2013

### Life

Unlimited

### Delegation of the management of the investment portfolio

There is no delegation of the management of the investment portfolio.

### Stock exchange listing

Not applicable.

## 2. Investment information

---

### Sub-fund's object

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

### Sub-fund's investment policy

#### *Permitted asset classes*

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

#### *Restrictions of the investment policy*

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

## Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. **Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.**

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

## Selected strategy

The assets are invested primarily in shares of companies in the euro area which have a small to medium market capitalisation.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

## Transparency of adverse sustainability impacts

The sub-fund considers the principal adverse impacts of its investment decisions on sustainability factors ('PAI') as described by the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector ('SFDR')

The principal adverse impacts on sustainability factors are explicitly taken into account through the General exclusion policy. More information on the principal adverse impact indicators that are taken into account can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > General exclusion policy for conventional and Responsible Investing funds.

In addition, the principal adverse impacts on sustainability factors are implicitly taken into account through the Proxy Voting and Engagement Policy of KBC Asset Management NV (more information can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > Retrospective Proxy Voting - overview > Proxy Voting and Engagement Policy).

KBC Asset Management NV exercises the voting rights of the shares it manages in accordance with the Proxy Voting and Engagement Policy. Where appropriate, KBC Asset Management NV will engage in dialogue with the management of the companies concerned, if necessary before voting.

Information on the principal adverse impacts on sustainability factors can also be found in the annual report for this sub-fund.

## Benchmark information

The fund is actively managed with reference to the following benchmark: MSCI EMU SMALL CAP - Net Return Index.

However, it is not the aim of the fund to replicate the benchmark. The composition of the benchmark is taken into account when compiling the portfolio.

When compiling the portfolio, the manager may also decide to invest in instruments that are not included in the benchmark, or indeed not to invest in instruments that are included.

The composition of the portfolio will to a large extent be similar to that of the benchmark.

The benchmark is also used to assess the performance of the sub-fund.

The benchmark is also used to determine the fund's risk limitation mechanism. This limits the extent to which the

fund's return may deviate from the benchmark.

The longterm expected tracking error for this fund is 4.00%. The tracking error measures the volatility of the fund's return relative to that of the benchmark. The higher the tracking error, the more the fund's return fluctuates relative to the benchmark. Market conditions may cause the actual tracking error to differ from the expected tracking error.

Required disclaimers for benchmark providers:

Source: MSCI. No MSCI Party nor any other party involved in or related to compiling, computing or creating the MSCI data, makes any express or implied warranties or representations with respect to such data (or the results to be obtained by the use thereof), and all such parties hereby expressly disclaim all warranties of originality, accuracy, completeness, merchantability or fitness for a particular purpose with respect to any of such data. Without limiting any of the foregoing, in no event shall MSCI, any of its affiliates, or any third party involved in compiling, computing, or creating the data have any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages. No further distribution or dissemination of the MSCI data is permitted without MSCI's express written consent.

**Volatility of the net asset value**

The volatility of the net asset value may be high due to the composition of the portfolio.

## 3. Risk

### Sub-fund's risk profile

Investors must take note of the specific risk factors set out below, the description of the risks given under the heading 'Information concerning the Bevek - F.Information on the risk profile of the UCITS', and the 'What are the risks and what could I get in return?' section of the key information document.

Summary table of risks assessed by the sub-fund:

| Risk type                 | Concise definition of the risk                                                                                                      |          | Explanation:                                                                                                                          |
|---------------------------|-------------------------------------------------------------------------------------------------------------------------------------|----------|---------------------------------------------------------------------------------------------------------------------------------------|
| Market risk               | The risk that the entire market of an asset class will decline, thus affecting the prices and values of the assets in the portfolio | high     | the level of the risk reflects the volatility of the stock market.                                                                    |
| Credit risk               | The risk that an issuer or a counterparty will default                                                                              | low      |                                                                                                                                       |
| Settlement risk           | The risk that settlement of a transaction via a payment system will not take place as expected                                      | low      |                                                                                                                                       |
| Liquidity risk            | The risk that a position cannot be liquidated in a timely manner at a reasonable price                                              | moderate | there can be invested in instruments with a lower liquidity, namely: shares with a smaller market capitalisation.                     |
| Exchange or currency risk | The risk that the value of an investment will be affected by changes in exchange rates                                              | none     |                                                                                                                                       |
| Custody risk              | The risk of loss of assets held in custody with a custodian or sub-custodian                                                        | low      |                                                                                                                                       |
| Concentration risk        | The risk relating to a large concentration of investments in specific assets or in specific markets                                 | moderate | there is a concentration of the investments in the shares of companies in the euro area with a small or medium market capitalisation. |
| Performance risk          | Risks to return                                                                                                                     | high     | the level of the risk reflects the volatility of the stock market.                                                                    |
| Capital risk              | Risks to capital                                                                                                                    | moderate | There is no capital protection.                                                                                                       |
| Flexibility risk          | Inflexibility both within the product and constraints on switching to other providers                                               | none     |                                                                                                                                       |
| Inflation risk            | Risk of inflation                                                                                                                   | low      |                                                                                                                                       |
| Environmental factors     | Uncertainty regarding the immutability of environmental factors, such as the tax regime                                             | low      |                                                                                                                                       |

### Risk profile of the typical investor

Profile of the typical investor for which the sub-fund has been designed : Highly dynamic profile.

The risk profile mentioned per sub-fund has been determined from the point of view of an investor in the euro area and may differ from that of an investor in other currency zones. More information on the risk profiles can be obtained at [www.kbc.be/riskprofile](http://www.kbc.be/riskprofile).

## 4. Information concerning the trading of shares

### How to buy and sell shares and switch between sub-funds

If it turns out that shares are being held by persons other than those permitted to hold them, the Company may, in accordance with article 8.2 of the articles of association, and without charge (except any taxes due and any charges to cover the cost of realising the assets), redeem those shares.

| Cut-off time for receiving orders at the financial service providers in Belgium <sup>(1)</sup><br><br>Date of published net asset value | Date the net asset value is calculated | Actual values used                                                                                                                                                                                                                                     | Date of payment or repayment of the orders |
|-----------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------|
| <b>D</b><br>(every banking day <sup>(2)</sup> at 2 pm CET)<br>also referred to as 'Dealing Day'                                         | <b>D+1 banking day</b>                 | <b>D</b> if maximum 20% of the actual values are already known on D<br>(every banking day <sup>(2)</sup> at 2 pm CET)<br><br><b>D+1</b> if more than 20% of the actual values are already known on D<br>(every banking day <sup>(2)</sup> at 2 pm CET) | <b>D+3 banking days</b>                    |

<sup>(1)</sup> The cut-off time for receiving orders stated above applies to orders investors place directly with the financial services providers in Belgium.

If an investor places an order with a financial institution other than the financial service providers in Belgium, he/she must find out from that institution what cut-off time (time + date) applies to the order he/she wishes to place so that the institution in question can take the necessary action to ensure that the order reaches the financial service providers in Belgium before 2 pm CET on day D in order to qualify as an order of day D.

<sup>(2)</sup> with the exception of banking days on which one or more markets on which more than 20% of the sub-fund's assets are listed are closed or if transactions are suspended or restricted.

### Calculation of the net asset value

The net asset value is calculated daily, as described above, except on days on which no shares may be issued or redeemed. Swing pricing may be applied as described in the 'Information concerning the Bevek – N. Liquidity management tools' section.

### Publication of the net asset value

The 'Information concerning the Bevek – I. Additional information – Publication of the net asset value' section specifies where the result of the calculation of the net asset value can be viewed.

If the profitability of the sub-fund is jeopardised due to a limited number of subscriptions during the initial subscription period (less than 5 000 000 euros), the Board of Directors of the Bevek may decide to refuse the orders placed during the initial subscription period and not to proceed with the commercialisation of the sub-fund.

## 5. Types of shares and fees and charges

---

Shares may be in registered or book-entry form, as the shareholder chooses. No certificates representing the registered shares are issued. Instead, confirmation is supplied of entry in the register of shareholders.

### Dividend payment

After the close of the financial year, the General Meeting determines the portion of the result, which, within the limitations imposed by the Law of 3 August 2012 relative to undertakings for collective investment complying with the conditions of Directive 2009/65/EC and the undertakings for investment in receivables, is to be paid to the holders of distribution shares.

The holders of capitalisation shares are not entitled to receive a dividend. The portion of the annual net income accruing to them is capitalised in favour of these shares.

The shareholders will receive payment within six months of the close of the financial year via institutions designated for this purpose by the General Meeting.

The General Meeting may decide to proceed to interim payments in accordance with the provisions of the law.

The Board of Directors may, in accordance with the provisions laid down in the articles of association and within the limits of the law, decide to pay out interim dividends.

The information on the type and/or class of shares and the fees and charges associated with them is set out below by type and/or share class.

# Information concerning the sub-fund EMU Small & Medium Caps Responsible Investing

## 1. Basic details

---

### Name

EMU Small & Medium Caps Responsible Investing

### Date of incorporation

8 April 2019

### Life

Unlimited

### Delegation of the management of the investment portfolio

There is no delegation of the management of the investment portfolio.

### Stock exchange listing

Not applicable.

## 2. Investment information

---

### Sub-fund's object

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

### Sub-fund's investment policy

#### *Permitted asset classes*

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

#### *Restrictions of the investment policy*

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

## Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. **Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.**

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

## Selected strategy

The assets are invested primarily in shares of companies in the euro area which have a small to medium market capitalisation.

## Information related to Responsible Investing

Within the above limits, the sub-fund pursues responsible investment objectives based on a dualistic approach: a negative screening and a positive selection methodology.

KBC Asset Management NV has a team of specialist researchers responsible for this dualistic approach. They are assisted by an independent advisory board (the “**Responsible Investing Advisory Board**”) comprised of up to twelve persons, who are not affiliated to KBC Asset Management NV, and whose sole responsibility is to supervise the dualistic approach and activities of the specialist researchers. The secretariat of the advisory board is handled by a representative of KBC Asset Management NV. Moreover, KBC Asset Management NV works with data suppliers with expertise in Responsible Investing that provide data to the specialized researchers, who process and complete the data with publicly available information (including annual reports, press publications, etc.).

The sub-fund promotes a combination of environmental and/or social characteristics and, even though it does not have sustainable investments as an objective, it shall invest a minimum proportion of its assets in economic activities that contribute to the achievement of environmental or social objectives (i.e. ‘sustainable investments’).

The companies in which it invests must follow good governance practices.

The sub-fund is compliant with the transparency obligations of article 8(1) of Regulation (EU) 2019/2088 of the European Parliament and of the council of 27 November 2019 on sustainability-related disclosures in the financial services sector (‘SFDR’). More information on how the sub-fund promotes environmental and/or social characteristics can be found in the ‘Annex for KBC Equity Fund EMU Small & Medium Caps Responsible Investing’ to the prospectus. This annex specifically covers the pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852.

In addition, the exclusions set out in Article 12(1)(a) to (g) of Delegated Regulation (EU) 2020/1818 (“Exclusions for Paris Agreement-aligned EU benchmarks”) are respected by this sub-fund.

The sub-fund complies with the European Securities and Markets Authority (ESMA) guidelines on fund names using ESG or sustainability-related terms.

### Negative screening

In practical terms the end result of this negative screening procedure is that the sub-fund excludes companies in advance from the Responsible Investment universe which fall foul of the exclusion policy available on [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > Exclusion policy for Responsible Investing funds.

The application of these policies means that:

- companies involved in certain activities are excluded from the sub-fund's investment universe. A distinction can be made between companies that are excluded if they exceed a certain turnover threshold in relation to specific activities, such as conventional weapons, tobacco, gambling or adult entertainment, and those that are excluded outright because they are involved in specific activities, such as controversial weapons, agricultural commodities or the mining of thermal coal, among others.
- The sub-fund may nevertheless invest in companies involved in conventional weapons and/or nuclear weapons that exceed certain turnover thresholds, provided they are included on the whitelist as specified in the policy. The whitelist is a list drawn up by KBC Group and includes companies involved in conventional weapons and/or nuclear weapons, but which are nevertheless deemed acceptable as investments within funds that invest responsibly, taking into account factors such as the proportion of arms sales to non-NATO countries and a possible involvement in human rights controversies related to armed conflict.

This screening also ensures that companies who seriously violate fundamental principles of environmental protection, social responsibility and good governance, among others, are excluded from the sub-fund's investment universe.

More information regarding the specific exclusions can also be found in the "Annex for KBC Equity Fund EMU Small & Medium Caps Responsible Investing" to the prospectus.

These negative screening principles are not exhaustive and may be adapted from time to time under the supervision of the Responsible Investing Advisory Board.

#### Positive selection methodology

Within the defined investment universe and other limits described above, the responsible investment objectives of the sub-fund are the following:

- (1) promote the integration of sustainability into the policy decisions of companies by preferring companies with a better **ESG risk score**, where ESG stands for 'Environmental, Social and Governance', and
- (2) promote climate change mitigation, by preferring companies with lower **Greenhouse Gas Intensity**, with the objective of meeting a predetermined Greenhouse Gas intensity target;
- (3) support sustainable development, through 'sustainable investments' in accordance with art. 2(17) SFDR. Sustainable investments will consist of investments in companies contributing to the achievement of the **UN Sustainable Development Goals** (plus instruments awarded the 'sustainable development' label by KBC Asset Management NV on the advice of the Responsible Investing Advisory Board).

More information on the investment policy for Responsible Investing funds is available at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > Investment policy for Responsible Investing funds.

#### (1) ESG-risk score

The contribution to the integration of sustainability into policy decisions of the companies is measured based on an ESG-risk score. This score represents the aggregated performance assessment of a given company against a series of ESG criteria which are grounded to the extent possible against objective measures. The main factors underpinning the ESG criteria are:

- respect for the environment (e.g., reduction in greenhouse gas emissions);
- attention to society (e.g., employee working conditions); and
- corporate governance (e.g., independence and diversity of the board of directors).

At least 90% of the corporate investments in the portfolio, as measured by assets under management, must have an ESG risk score. The ESG risk score for companies is an ESG risk score supplied by a data provider, and based on internal research as well.

These lists are not exhaustive and may be changed under the supervision of the Responsible Investing Advisory Board.

To achieve this objective, the ESG-risk score of the portfolio for companies is compared to following benchmark: MSCI EMU SMALL CAP - Net Return Index.

To calculate the ESG-risk score at portfolio level, the weighted average of the ESG (risk) scores of the positions in the sub-fund are taken into account. Technical items such as cash and derivatives are not taken into account and also companies or countries for which no data is available are left out. The weights used in the calculation depend on the size of the positions in the sub-fund, rescaled for these items.

More information on the ESG-risk score and the concrete goals of the sub-fund can be found in the 'Annex for KBC Equity Fund EMU Small & Medium Caps Responsible Investing' to the prospectus.

The targets can be revised upwards or downwards.

#### (2) Greenhouse Gas Intensity

The objective to promote climate change mitigation, by favoring lower greenhouse gas intensity companies, with the goal of meeting a predetermined greenhouse gas intensity target covers at least 90% of the portfolio. The objective does not apply to companies for which data is not available.

The contribution of companies to climate change mitigation is measured based on their greenhouse gas intensity. Greenhouse gas intensity is defined as absolute greenhouse gas emissions (in tonnes CO<sub>2</sub> equivalent), divided by revenues (in mln USD).

The sub-fund's target in terms of greenhouse gas intensity is assessed on two targets whereby the most strict of the two will determine the target applied: 15% better than the benchmark MSCI EMU SMALL CAP - Net Return Index and a reduction of 50% by 2030 compared to the benchmark MSCI EMU SMALL CAP - Net Return Index in 2019.

More information on Greenhouse Gas Intensity and the concrete goals of the sub-fund can be found in the 'Annex for KBC Equity Fund EMU Small & Medium Caps Responsible Investing' to the prospectus.

The targets may be revised upwards or downwards.

### **(3) UN Sustainable Development Goals**

To support sustainable development, the sub-fund commits to invest a minimum proportion of the portfolio in companies that contribute to the UN Sustainable Development Goals. The UN Sustainable Development Goals include both social and environmental objectives.

Companies are considered to contribute to sustainable development when at least 20% of the revenues are linked to the UN Sustainable Development Goals. The activities of the companies are assessed on multiple sustainable themes that can be linked to the UN Sustainable Development Goals.

Instruments of companies that meet these requirements are designated as "sustainable investments," according to Article 2(17) SFDR.

In addition, KBC Asset Management NV can award the "sustainable development" label to instruments, on the advice of the Responsible Investing Advisory Board. In that case, these investments shall also qualify as "sustainable investments," according to Article 2(17) SFDR.

More information about the methodology used to qualify investments as investments which contribute to the UN Sustainable Development Goals can be found in the 'Annex for KBC Equity Fund EMU Small & Medium Caps Responsible Investing' to the prospectus.

### **Potential Exceptions**

It cannot be ruled out, however, that very limited investments may be made temporarily in assets that do not meet the above criteria. The reasons for this include the following:

- Developments as a result of which a company can no longer be regarded as eligible after purchase;
- Corporate events, such as a merger of one company with another, where the merged company can no longer be considered an eligible company based on the above criteria;
- Incorrect data as a result of which assets are invested (unintentionally and erroneously) in assets purchased when it should not have been eligible for the sub-fund;
- A planned update of the screening criteria as a result of which assets should be excluded from the sub-fund, but which the management company chooses to refrain from selling immediately in the best interest of the customer;
- External circumstances such as market movements and updates of external data can lead to investment solutions failing to achieve the abovementioned targets.

In these cases, the fund manager will replace the assets concerned with more appropriate assets as soon as possible, always taking into account the sole interest of the investor.

In addition, for the purpose of efficient portfolio management, the fund manager may to a significant degree use derivatives relating to assets that would not be eligible for inclusion in the sub-fund, in so far as there is no serviceable and comparable alternative available on the market. In addition, the counterparties with which the derivative transactions are entered into may not necessarily be issuers having a responsible nature.

### **Taxonomy related information**

At the date of this prospectus, the sub-fund does not commit to invest a minimum proportion of its assets in environmentally sustainable economic activities which contribute to any of the environmental objectives set out in Article 9 of the Regulation (EU) 2020/852 of the European Parliament and of the Council of 18 June 2020 on the establishment of a framework to facilitate sustainable investment ('EU Taxonomy Framework'). The minimum proportion of investments in environmentally sustainable economic activities within the meaning of the EU Taxonomy Framework is 0%. This will be monitored on a regular basis and as soon as sufficiently reliable, timely and verifiable data from issuers or invested companies is available, the prospectus may be updated.

Non-financial companies are considered to contribute to sustainable development if at least 20% of sales are aligned to the EU Taxonomy Framework based on Trucost data. For companies in the financial sector, a different methodology applies. For credit institutions, the alignment with the EU Taxonomy Framework is based on the Green Asset Ratio, while for other financial companies the alignment with the EU Taxonomy Framework is based on the alignment of their investment portfolios. Instruments of companies that meet these requirements are referred to as "sustainable investments," according to art. 2(17) SFDR. More information on the percentage in the portfolio that was considered "sustainable investments with an environmental objective aligned with the EU Taxonomy Framework " based on this criterion during the reporting period, can be found in the annual reports for this sub-fund.

More information on the EU Taxonomy Framework can be found in the 'Annex for KBC Equity Fund EMU Small & Medium Caps Responsible Investing' to the prospectus.

### **Transparency of adverse sustainability impacts**

The sub-fund considers the principal adverse impacts of its investment decisions on sustainability factors by taking into account the principal adverse impact indicators ('PAI'), as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability disclosure in the financial services sector ('SFDR').

The principal adverse impacts on sustainability factors are explicitly taken into account through the General exclusion policy for conventional and Responsible Investing funds and the exclusion policy for Responsible Investing funds. More information on the principal adverse impact indicators taken into account can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > General exclusion policy for conventional and Responsible Investing funds and [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > Exclusion policy for Responsible Investing funds.

In addition, the principal adverse impacts on sustainability factors are implicitly taken into account through the Proxy Voting and Engagement Policy of KBC Asset Management NV (more information can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > Retrospective Proxy Voting - overview > Proxy Voting and Engagement Policy).

More information on how the sub-fund aims to consider the principal adverse impacts on sustainability factors can also be found in the 'Annex for KBC Equity Fund EMU Small & Medium Caps Responsible Investing' to the prospectus. A statement on how the sub-fund has considered the principal adverse impacts on sustainability factors during the reporting period can also be found in the annual reports for this sub-fund.

### **Benchmark information**

The fund is actively managed with reference to the following benchmark: MSCI EMU SMALL CAP - Net Return Index.

However, it is not the aim of the fund to replicate the benchmark. The composition of the benchmark is taken into account when compiling the portfolio.

In line with its investment policy, the sub-fund may not invest in all the instruments included in the benchmark.

When compiling the portfolio, the manager may also decide to invest in instruments that are not included in the benchmark, or indeed not to invest in instruments that are included.

The composition of the portfolio will vary from that of the benchmark, as the composition of the benchmark is not fully consistent with the environmental and/or social characteristics promoted by the sub-fund. The use of the benchmark does not detract from the responsible character of the portfolio. The responsible character is guaranteed by the aforementioned Responsible Investing methodology.

The benchmark is also used to determine the fund's risk limitation mechanism. This limits the extent to which the fund's return may deviate from the benchmark.

The longterm expected tracking error for this fund is 4.50%. The tracking error measures the volatility of the fund's return relative to that of the benchmark. The higher the tracking error, the more the fund's return fluctuates relative to the benchmark. Market conditions may cause the actual tracking error to differ from the expected tracking error.

### **Volatility of the net asset value**

**The volatility of the net asset value may be high due to the composition of the portfolio.**

## 3. Risk

### Sub-fund's risk profile

Investors must take note of the specific risk factors set out below, the description of the risks given under the heading 'Information concerning the Bevek - F.Information on the risk profile of the UCITS', and the 'What are the risks and what could I get in return?' section of the key information document.

Summary table of risks assessed by the sub-fund:

| Risk type                 | Concise definition of the risk                                                                                                      |          | Explanation:                                                                                                                          |
|---------------------------|-------------------------------------------------------------------------------------------------------------------------------------|----------|---------------------------------------------------------------------------------------------------------------------------------------|
| Market risk               | The risk that the entire market of an asset class will decline, thus affecting the prices and values of the assets in the portfolio | high     | the level of the risk reflects the volatility of the stock market.                                                                    |
| Credit risk               | The risk that an issuer or a counterparty will default                                                                              | low      |                                                                                                                                       |
| Settlement risk           | The risk that settlement of a transaction via a payment system will not take place as expected                                      | low      |                                                                                                                                       |
| Liquidity risk            | The risk that a position cannot be liquidated in a timely manner at a reasonable price                                              | moderate | there can be invested in instruments with a lower liquidity, namely: shares with a smaller market capitalisation.                     |
| Exchange or currency risk | The risk that the value of an investment will be affected by changes in exchange rates                                              | none     |                                                                                                                                       |
| Custody risk              | The risk of loss of assets held in custody with a custodian or sub-custodian                                                        | low      |                                                                                                                                       |
| Concentration risk        | The risk relating to a large concentration of investments in specific assets or in specific markets                                 | moderate | there is a concentration of the investments in the shares of companies in the euro area with a small or medium market capitalisation. |
| Performance risk          | Risks to return                                                                                                                     | high     | the level of the risk reflects the volatility of the stock market.                                                                    |
| Capital risk              | Risks to capital                                                                                                                    | moderate | There is no capital protection.                                                                                                       |
| Flexibility risk          | Inflexibility both within the product and constraints on switching to other providers                                               | low      |                                                                                                                                       |
| Inflation risk            | Risk of inflation                                                                                                                   | low      |                                                                                                                                       |
| Environmental factors     | Uncertainty regarding the immutability of environmental factors, such as the tax regime                                             | low      |                                                                                                                                       |

### Risk profile of the typical investor

Profile of the typical investor for which the sub-fund has been designed : Highly dynamic profile.

The risk profile mentioned per sub-fund has been determined from the point of view of an investor in the euro area and may differ from that of an investor in other currency zones. More information on the risk profiles can be obtained at [www.kbc.be/riskprofile](http://www.kbc.be/riskprofile).

## 4. Information concerning the trading of shares

### How to buy and sell shares and switch between sub-funds

If it turns out that shares are being held by persons other than those permitted to hold them, the Company may, in accordance with article 8.2 of the articles of association, and without charge (except any taxes due and any charges to cover the cost of realising the assets), redeem those shares.

| Cut-off time for receiving orders at the financial service providers in Belgium <sup>(1)</sup><br><br>Date of published net asset value | Date the net asset value is calculated | Actual values used                                                                                                                                                                                                                                           | Date of payment or repayment of the orders |
|-----------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------|
| <b>D</b><br>(every banking day <sup>(2)</sup><br>at 2 pm CET)<br>also referred to as 'Dealing Day'                                      | <b>D+1 banking day</b>                 | <b>D</b> if maximum 20% of the actual values are already known on D<br>(every banking day <sup>(2)</sup><br>at 2 pm CET)<br><br><b>D+1</b> if more than 20% of the actual values are already known on D<br>(every banking day <sup>(2)</sup><br>at 2 pm CET) | <b>D+3 banking days</b>                    |

<sup>(1)</sup> The cut-off time for receiving orders stated above applies to orders investors place directly with the financial services providers in Belgium.

If an investor places an order with a financial institution other than the financial service providers in Belgium, he/she must find out from that institution what cut-off time (time + date) applies to the order he/she wishes to place so that the institution in question can take the necessary action to ensure that the order reaches the financial service providers in Belgium before 2 pm CET on day D in order to qualify as an order of day D.

<sup>(2)</sup> with the exception of banking days on which one or more markets on which more than 20% of the sub-fund's assets are listed are closed or if transactions are suspended or restricted.

### Calculation of the net asset value

The net asset value is calculated daily, as described above, except on days on which no shares may be issued or redeemed. Swing pricing may be applied as described in the 'Information concerning the Bevek – N. Liquidity management tools' section.

### Publication of the net asset value

The 'Information concerning the Bevek – I. Additional information – Publication of the net asset value' section specifies where the result of the calculation of the net asset value can be viewed.

If the profitability of the sub-fund is jeopardised due to a limited number of subscriptions during the initial subscription period (less than 5 000 000 euros), the Board of Directors of the Bevek may decide to refuse the orders placed during the initial subscription period and not to proceed with the commercialisation of the sub-fund.

## 5. Types of shares and fees and charges

---

Shares may be in registered or book-entry form, as the shareholder chooses. No certificates representing the registered shares are issued. Instead, confirmation is supplied of entry in the register of shareholders.

### Dividend payment

After the close of the financial year, the General Meeting determines the portion of the result, which, within the limitations imposed by the Law of 3 August 2012 relative to undertakings for collective investment complying with the conditions of Directive 2009/65/EC and the undertakings for investment in receivables, is to be paid to the holders of distribution shares.

The holders of capitalisation shares are not entitled to receive a dividend. The portion of the annual net income accruing to them is capitalised in favour of these shares.

The shareholders will receive payment within six months of the close of the financial year via institutions designated for this purpose by the General Meeting.

The General Meeting may decide to proceed to interim payments in accordance with the provisions of the law.

The Board of Directors may, in accordance with the provisions laid down in the articles of association and within the limits of the law, decide to pay out interim dividends.

The information on the type and/or class of shares and the fees and charges associated with them is set out below by type and/or share class.

# EMU Small & Medium Caps Responsible Investing - Institutional Discretionary Shares

This share class is reserved

- for trading to persons who acquire and hold the units on the basis of a discretionary management agreement with KBC Asset Management NV (except a discretionary management agreement 'Core Satellite'), or with another company associated with KBC Asset Management NV and who pay a discretionary management fee on the part of their portfolio invested in KBC UCIs<sup>1</sup>. In addition, these persons must have the status of 'eligible investors', acting on its own behalf, as within the meaning of Article 5 § 3/1 of the Law of 3 August 2012 relative to undertakings for collective investment complying with the conditions of Directive 2009/65/EC and the undertakings for investment in receivables<sup>2</sup>. The investor must comply with these conditions at the time of subscription and for as long as the investor remains a shareholder of the share class.
- for trading to institutional undertakings for collective investment managed by KBC Asset Management NV or by another company associated with this management company and who pay a fee on the part of the assets invested in KBC UCIs.

If it appears that the shares of this class are held by persons other than those authorized, these shares will be converted at no cost (except taxes) into shares of the share class "Classic Shares".

# EMU Small & Medium Caps Responsible Investing - Institutional Shares

This share class is reserved for institutional investors, as defined in Article 5 § 3 of the Law of 3 August 2012 relative to undertakings for collective investment complying with the conditions of Directive 2009/65/EC and the undertakings for investment in receivables, and requires a minimum subscription of 10000 EUR (both during as well as after the initial subscription period). The investor must have the status of institutional investor at the moment of subscription and for as long as the investor remains a shareholder of the share class. If it appears that the shares of this class of shares are held by persons other than authorized, these shares will be converted at no cost (except taxes) into shares of the share class 'Classic Shares'.

# Information concerning the sub-fund Enhanced Intelligence Stock Selection

## 1. Basic details

---

### Name

Enhanced Intelligence Stock Selection

### Date of incorporation

9 October 2002

### Life

Unlimited

### Delegation of the management of the investment portfolio

There is no delegation of the management of the investment portfolio.

### Stock exchange listing

Not applicable.

## 2. Investment information

---

### Sub-fund's object

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

### Sub-fund's investment policy

#### *Permitted asset classes*

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

#### *Restrictions of the investment policy*

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

## Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. **Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.**

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

## Selected strategy

The sub-fund invests directly or indirectly in shares and/or share-related investments that may come from any region, sector or theme.

The sub-fund's stock selection is based on quantitative criteria using publicly available information including, but not limited to, companies' accounting, stock market and technical data such as price trends and volatility..., In addition, sentiment data may also be used.

Sentiment data can include data that expresses market participants' views about a particular company through research papers and third-party data providers, among others.

These criteria are incorporated into a specific model designed by KBC Asset Management that applies advanced quantitative techniques, including "machine learning" tools, to analyze a long and broad history of stock-level data.

"Machine learning" is an application of artificial intelligence in which algorithms and statistical models are used by computer systems to learn to perform specific tasks without explicit instructions and solve problems that cannot be precisely specified, requiring logical reasoning ability.

The basic assumption of this model is that share prices are not always an accurate reflection of the fundamental value of the company in question, but that this fundamental value can be estimated provided one has sufficient information and can process this information efficiently.

It is also assumed that share prices will evolve towards fundamental value over time. However, the way in which this happens depends on the prevailing cycle in the market structure and its impact on the criteria included in the model.

The quantitative model created by KBC Asset Management estimates a relative rating per share on a regular basis, evaluating shares in the investment universe relative to each other.

Better-rated shares are assigned a relatively heavier weight in the sub-fund's portfolio relative to their weight in the sub-fund's benchmark, while lower-rated shares are assigned a relatively lighter weight relative to their weight in the benchmark.

Appropriate diversification is ensured in accordance with relevant legal and risk restrictions.

However, the fund manager may decide at any time not to follow the models or to follow them only partially.

Human intervention is expected to occur rather in exceptional circumstances.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

## Transparency of adverse sustainability impacts

The sub-fund considers the principal adverse impacts of its investment decisions on sustainability factors ('PAI') as described by the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector ('SFDR')

The principal adverse impacts on sustainability factors are explicitly taken into account through the General exclusion policy. More information on the principal adverse impact indicators that are taken into account can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > General exclusion policy for conventional and Responsible Investing funds.

In addition, the principal adverse impacts on sustainability factors are implicitly taken into account through the Proxy Voting and Engagement Policy of KBC Asset Management NV (more information can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > Retrospective Proxy Voting - overview > Proxy Voting and Engagement Policy).

KBC Asset Management NV exercises the voting rights of the shares it manages in accordance with the Proxy Voting and Engagement Policy. Where appropriate, KBC Asset Management NV will engage in dialogue with the management of the companies concerned, if necessary before voting.

Information on the principal adverse impacts on sustainability factors can also be found in the annual report for this sub-fund.

### **Benchmark information**

The fund is actively managed with reference to the following benchmark: MSCI All Countries World - Net Return Index.

However, it is not the aim of the fund to replicate the benchmark. The composition of the benchmark is taken into account when compiling the portfolio.

When compiling the portfolio, the manager may also decide to invest in instruments that are not included in the benchmark, or indeed not to invest in instruments that are included.

The composition of the portfolio will to a large extent be similar to that of the benchmark.

The benchmark is also used to assess the performance of the sub-fund.

The benchmark is also used to determine the fund's risk limitation mechanism. This limits the extent to which the fund's return may deviate from the benchmark.

The longterm expected tracking error for this fund is 3.00%. The tracking error measures the volatility of the fund's return relative to that of the benchmark. The higher the tracking error, the more the fund's return fluctuates relative to the benchmark. Market conditions may cause the actual tracking error to differ from the expected tracking error.

### **Volatility of the net asset value**

The volatility of the net asset value may be high due to the composition of the portfolio.

## 3. Risk

### Sub-fund's risk profile

Investors must take note of the specific risk factors set out below, the description of the risks given under the heading 'Information concerning the Bevek - F.Information on the risk profile of the UCITS', and the 'What are the risks and what could I get in return?' section of the key information document.

Summary table of risks assessed by the sub-fund:

| Risk type                 | Concise definition of the risk                                                                                                      |          | Explanation:                                                                                                                                                                                                      |
|---------------------------|-------------------------------------------------------------------------------------------------------------------------------------|----------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Market risk               | The risk that the entire market of an asset class will decline, thus affecting the prices and values of the assets in the portfolio | high     | the level of the risk reflects the volatility of the stock market.                                                                                                                                                |
| Credit risk               | The risk that an issuer or a counterparty will default                                                                              | low      |                                                                                                                                                                                                                   |
| Settlement risk           | The risk that settlement of a transaction via a payment system will not take place as expected                                      | low      |                                                                                                                                                                                                                   |
| Liquidity risk            | The risk that a position cannot be liquidated in a timely manner at a reasonable price                                              | low      |                                                                                                                                                                                                                   |
| Exchange or currency risk | The risk that the value of an investment will be affected by changes in exchange rates                                              | high     | since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates. |
| Custody risk              | The risk of loss of assets held in custody with a custodian or sub-custodian                                                        | low      |                                                                                                                                                                                                                   |
| Concentration risk        | The risk relating to a large concentration of investments in specific assets or in specific markets                                 | low      |                                                                                                                                                                                                                   |
| Performance risk          | Risks to return                                                                                                                     | high     | the level of the risk reflects the volatility of the stock market.                                                                                                                                                |
| Capital risk              | Risks to capital                                                                                                                    | moderate | There is no capital protection.                                                                                                                                                                                   |
| Flexibility risk          | Inflexibility both within the product and constraints on switching to other providers                                               | none     |                                                                                                                                                                                                                   |
| Inflation risk            | Risk of inflation                                                                                                                   | low      |                                                                                                                                                                                                                   |
| Environmental factors     | Uncertainty regarding the immutability of environmental factors, such as the tax regime                                             | low      |                                                                                                                                                                                                                   |

### Risk profile of the typical investor

Profile of the typical investor for which the sub-fund has been designed : Highly dynamic profile.

The risk profile mentioned per sub-fund has been determined from the point of view of an investor in the euro area and may differ from that of an investor in other currency zones. More information on the risk profiles can be obtained at [www.kbc.be/riskprofile](http://www.kbc.be/riskprofile).

## 4. Information concerning the trading of shares

### How to buy and sell shares and switch between sub-funds

If it turns out that shares are being held by persons other than those permitted to hold them, the Company may, in accordance with article 8.2 of the articles of association, and without charge (except any taxes due and any charges to cover the cost of realising the assets), redeem those shares.

| Cut-off time for receiving orders at the financial service providers in Belgium <sup>(1)</sup><br><br>Date of published net asset value | Date the net asset value is calculated | Actual values used                                                                                                                                                                                                                                     | Date of payment or repayment of the orders |
|-----------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------|
| <b>D</b><br>(every banking day <sup>(2)</sup> at 2 pm CET)<br>also referred to as 'Dealing Day'                                         | <b>D+1 banking day</b>                 | <b>D</b> if maximum 20% of the actual values are already known on D<br>(every banking day <sup>(2)</sup> at 2 pm CET)<br><br><b>D+1</b> if more than 20% of the actual values are already known on D<br>(every banking day <sup>(2)</sup> at 2 pm CET) | <b>D+3 banking days</b>                    |

<sup>(1)</sup> The cut-off time for receiving orders stated above applies to orders investors place directly with the financial services providers in Belgium.

If an investor places an order with a financial institution other than the financial service providers in Belgium, he/she must find out from that institution what cut-off time (time + date) applies to the order he/she wishes to place so that the institution in question can take the necessary action to ensure that the order reaches the financial service providers in Belgium before 2 pm CET on day D in order to qualify as an order of day D.

<sup>(2)</sup> with the exception of banking days on which one or more markets on which more than 20% of the sub-fund's assets are listed are closed or if transactions are suspended or restricted.

### Calculation of the net asset value

The net asset value is calculated daily, as described above, except on days on which no shares may be issued or redeemed. Swing pricing may be applied as described in the 'Information concerning the Bevek – N. Liquidity management tools' section.

### Publication of the net asset value

The 'Information concerning the Bevek – I. Additional information – Publication of the net asset value' section specifies where the result of the calculation of the net asset value can be viewed.

## 5. Types of shares and fees and charges

---

Shares may be in registered or book-entry form, as the shareholder chooses. No certificates representing the registered shares are issued. Instead, confirmation is supplied of entry in the register of shareholders.

### Dividend payment

After the close of the financial year, the General Meeting determines the portion of the result, which, within the limitations imposed by the Law of 3 August 2012 relative to undertakings for collective investment complying with the conditions of Directive 2009/65/EC and the undertakings for investment in receivables, is to be paid to the holders of distribution shares.

The holders of capitalisation shares are not entitled to receive a dividend. The portion of the annual net income accruing to them is capitalised in favour of these shares.

The shareholders will receive payment within six months of the close of the financial year via institutions designated for this purpose by the General Meeting.

The General Meeting may decide to proceed to interim payments in accordance with the provisions of the law.

The Board of Directors may, in accordance with the provisions laid down in the articles of association and within the limits of the law, decide to pay out interim dividends.

The information on the type and/or class of shares and the fees and charges associated with them is set out below by type and/or share class.

# Enhanced Intelligence Stock Selection - Institutional Discretionary Shares

**This share class is reserved**

- for trading to persons who acquire and hold the units on the basis of a discretionary management agreement with KBC Asset Management NV (except a discretionary management agreement 'Core Satellite'), or with another company associated with KBC Asset Management NV and who pay a discretionary management fee on the part of their portfolio invested in KBC UCIs<sup>1</sup>. In addition, these persons must have the status of 'eligible investors', acting on its own behalf, as within the meaning of Article 5 § 3/1 of the Law of 3 August 2012 relative to undertakings for collective investment complying with the conditions of Directive 2009/65/EC and the undertakings for investment in receivables<sup>2</sup>. The investor must comply with these conditions at the time of subscription and for as long as the investor remains a shareholder of the share class.
- for trading to institutional undertakings for collective investment managed by KBC Asset Management NV or by another company associated with this management company and who pay a fee on the part of the assets invested in KBC UCIs.

If it appears that the shares of this class are held by persons other than those authorized, these shares will be converted at no cost (except taxes) into shares of the share class "Classic Shares".

# Enhanced Intelligence Stock Selection - Institutional Discretionary Shares BE

There is a minimum subscription value of 5 000 EUR (both during as well as after the initial subscription period).

This share class is reserved

- for trading to persons who acquire and hold the units on the basis of a discretionary management agreement with KBC Asset Management NV (except a discretionary management agreement 'Core Satellite'), or with another company associated with KBC Asset Management NV and who pay a discretionary management fee on the part of their portfolio invested in KBC UCIs<sup>1</sup>. In addition, these persons must hold Belgian nationality (for legal entities, this shall be assessed based on the location of their registered office) and must have the status of 'eligible investors', acting on its own behalf, as within the meaning of Article 5 § 3/1 of the Law of 3 August 2012 relative to undertakings for collective investment complying with the conditions of Directive 2009/65/EC and the undertakings for investment in receivables<sup>2</sup>. The investor must comply with these conditions at the time of subscription and for as long as the investor remains a shareholder of the share class.
- for trading to Belgian institutional undertakings for collective investment managed by KBC Asset Management NV or by another company associated with this management company and who pay a fee on the part of the assets invested in KBC UCIs.

If it appears that the shares of this class are held by persons other than those authorized, these shares will be converted at no cost (except taxes) into shares of the share class "Classic Shares".

# Information concerning the sub-fund Europe

## 1. Basic details

---

### Name

Europe

### Date of incorporation

21 March 1991

### Life

Unlimited

### Delegation of the management of the investment portfolio

There is no delegation of the management of the investment portfolio.

### Stock exchange listing

Not applicable.

## 2. Investment information

---

### Sub-fund's object

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

### Sub-fund's investment policy

#### *Permitted asset classes*

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

#### *Restrictions of the investment policy*

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

## Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. **Consequently, there may be an impact on concentration risk.** Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

## Selected strategy

At least 75% of the assets are invested in shares of European companies.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

## Transparency of adverse sustainability impacts

The sub-fund considers the principal adverse impacts of its investment decisions on sustainability factors ('PAI') as described by the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector ('SFDR')

The principal adverse impacts on sustainability factors are explicitly taken into account through the General exclusion policy. More information on the principal adverse impact indicators that are taken into account can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > General exclusion policy for conventional and Responsible Investing funds.

In addition, the principal adverse impacts on sustainability factors are implicitly taken into account through the Proxy Voting and Engagement Policy of KBC Asset Management NV (more information can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > Retrospective Proxy Voting - overview > Proxy Voting and Engagement Policy).

KBC Asset Management NV exercises the voting rights of the shares it manages in accordance with the Proxy Voting and Engagement Policy. Where appropriate, KBC Asset Management NV will engage in dialogue with the management of the companies concerned, if necessary before voting.

Information on the principal adverse impacts on sustainability factors can also be found in the annual report for this sub-fund.

## Benchmark information

The fund is actively managed with reference to the following benchmark: MSCI Europe Net Return index.

However, it is not the aim of the fund to replicate the benchmark. The composition of the benchmark is taken into account when compiling the portfolio.

When compiling the portfolio, the manager may also decide to invest in instruments that are not included in the benchmark, or indeed not to invest in instruments that are included.

The composition of the portfolio will to a large extent be similar to that of the benchmark.

The benchmark is also used to assess the performance of the sub-fund.

The benchmark is also used to determine the fund's risk limitation mechanism. This limits the extent to which the fund's return may deviate from the benchmark.

The longterm expected tracking error for this fund is 3.00%. The tracking error measures the volatility of the fund's

return relative to that of the benchmark. The higher the tracking error, the more the fund's return fluctuates relative to the benchmark. Market conditions may cause the actual tracking error to differ from the expected tracking error.

Required disclaimers for benchmark providers:

Source: MSCI. No MSCI Party nor any other party involved in or related to compiling, computing or creating the MSCI data, makes any express or implied warranties or representations with respect to such data (or the results to be obtained by the use thereof), and all such parties hereby expressly disclaim all warranties of originality, accuracy, completeness, merchantability or fitness for a particular purpose with respect to any of such data. Without limiting any of the foregoing, in no event shall MSCI, any of its affiliates, or any third party involved in compiling, computing, or creating the data have any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages. No further distribution or dissemination of the MSCI data is permitted without MSCI's express written consent.

***Volatility of the net asset value***

The volatility of the net asset value may be high due to the composition of the portfolio.

## 3. Risk

### Sub-fund's risk profile

Investors must take note of the specific risk factors set out below, the description of the risks given under the heading 'Information concerning the Bevek - F.Information on the risk profile of the UCITS', and the 'What are the risks and what could I get in return?' section of the key information document.

Summary table of risks assessed by the sub-fund:

| Risk type                 | Concise definition of the risk                                                                                                      |                                                       | Explanation:                                                                                                                                                                                                              |
|---------------------------|-------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Market risk               | The risk that the entire market of an asset class will decline, thus affecting the prices and values of the assets in the portfolio | high                                                  | the level of the risk reflects the volatility of the stock market.                                                                                                                                                        |
| Credit risk               | The risk that an issuer or a counterparty will default                                                                              | low                                                   |                                                                                                                                                                                                                           |
| Settlement risk           | The risk that settlement of a transaction via a payment system will not take place as expected                                      | low                                                   |                                                                                                                                                                                                                           |
| Liquidity risk            | The risk that a position cannot be liquidated in a timely manner at a reasonable price                                              | low                                                   |                                                                                                                                                                                                                           |
| Exchange or currency risk | The risk that the value of an investment will be affected by changes in exchange rates                                              | For the share class Classic Shares : moderate         | since there are investments in securities that are denominated in currencies other than the Euro, there is a real chance that the value of an investment will be affected by movements in exchange rates.                 |
|                           |                                                                                                                                     | For the share class Institutional B Shares : moderate | since there are investments in securities that are denominated in currencies other than the Euro, there is a real chance that the value of an investment will be affected by movements in exchange rates.                 |
|                           |                                                                                                                                     | For the share class Classic Shares CSOB CZK : high    | since there are investments in securities that are denominated in currencies other than the Czech Koruna, there is a considerable chance that the value of an investment will be affected by movements in exchange rates. |
| Custody risk              | The risk of loss of assets held in custody with a custodian or sub-custodian                                                        | low                                                   |                                                                                                                                                                                                                           |
| Concentration risk        | The risk relating to a large concentration of investments in specific assets or in specific markets                                 | low                                                   |                                                                                                                                                                                                                           |
| Performance risk          | Risks to return                                                                                                                     | high                                                  | the level of the risk reflects the volatility of the stock market.                                                                                                                                                        |

## Risk profile of the typical investor

Profile of the typical investor for which the sub-fund has been designed : Highly dynamic profile.

The risk profile mentioned per sub-fund has been determined from the point of view of an investor in the euro area and may differ from that of an investor in other currency zones. More information on the risk profiles can be obtained at [www.kbc.be/riskprofile](http://www.kbc.be/riskprofile).

## 4. Information concerning the trading of shares

### How to buy and sell shares and switch between sub-funds

If it turns out that shares are being held by persons other than those permitted to hold them, the Company may, in accordance with article 8.2 of the articles of association, and without charge (except any taxes due and any charges to cover the cost of realising the assets), redeem those shares.

| Cut-off time for receiving orders at the financial service providers in Belgium <sup>(1)</sup><br><br>Date of published net asset value | Date the net asset value is calculated | Actual values used                                                                                                                                                                                                                                           | Date of payment or repayment of the orders |
|-----------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------|
| <b>D</b><br>(every banking day <sup>(2)</sup><br>at 2 pm CET)<br>also referred to as 'Dealing Day'                                      | <b>D+1 banking day</b>                 | <b>D</b> if maximum 20% of the actual values are already known on D<br>(every banking day <sup>(2)</sup><br>at 2 pm CET)<br><br><b>D+1</b> if more than 20% of the actual values are already known on D<br>(every banking day <sup>(2)</sup><br>at 2 pm CET) | <b>D+3 banking days</b>                    |

<sup>(1)</sup> The cut-off time for receiving orders stated above applies to orders investors place directly with the financial services providers in Belgium.

If an investor places an order with a financial institution other than the financial service providers in Belgium, he/she must find out from that institution what cut-off time (time + date) applies to the order he/she wishes to place so that the institution in question can take the necessary action to ensure that the order reaches the financial service providers in Belgium before 2 pm CET on day D in order to qualify as an order of day D.

<sup>(2)</sup> with the exception of banking days on which one or more markets on which more than 20% of the sub-fund's assets are listed are closed or if transactions are suspended or restricted.

### Calculation of the net asset value

The net asset value is calculated daily, as described above, except on days on which no shares may be issued or redeemed. Swing pricing may be applied as described in the 'Information concerning the Bevek – N. Liquidity management tools' section.

### Publication of the net asset value

The 'Information concerning the Bevek – I. Additional information – Publication of the net asset value' section specifies where the result of the calculation of the net asset value can be viewed.

## 5. Types of shares and fees and charges

---

Shares may be in registered or book-entry form, as the shareholder chooses. No certificates representing the registered shares are issued. Instead, confirmation is supplied of entry in the register of shareholders.

### Dividend payment

After the close of the financial year, the General Meeting determines the portion of the result, which, within the limitations imposed by the Law of 3 August 2012 relative to undertakings for collective investment complying with the conditions of Directive 2009/65/EC and the undertakings for investment in receivables, is to be paid to the holders of distribution shares.

The holders of capitalisation shares are not entitled to receive a dividend. The portion of the annual net income accruing to them is capitalised in favour of these shares.

The shareholders will receive payment within six months of the close of the financial year via institutions designated for this purpose by the General Meeting.

The General Meeting may decide to proceed to interim payments in accordance with the provisions of the law.

The Board of Directors may, in accordance with the provisions laid down in the articles of association and within the limits of the law, decide to pay out interim dividends.

The information on the type and/or class of shares and the fees and charges associated with them is set out below by type and/or share class.

# Information concerning the sub-fund Eurozone

## 1. Basic details

---

### Name

Eurozone

### Date of incorporation

22 December 2000

### Life

Unlimited

### Delegation of the management of the investment portfolio

There is no delegation of the management of the investment portfolio.

### Stock exchange listing

Not applicable.

## 2. Investment information

---

### Sub-fund's object

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

### Sub-fund's investment policy

#### *Permitted asset classes*

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

#### *Restrictions of the investment policy*

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

## Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. **Consequently, there may be an impact on concentration risk.** Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

## Selected strategy

At least 75% of the assets are invested in shares of euro-area companies.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

## Transparency of adverse sustainability impacts

The sub-fund considers the principal adverse impacts of its investment decisions on sustainability factors ('PAI') as described by the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector ('SFDR')

The principal adverse impacts on sustainability factors are explicitly taken into account through the General exclusion policy. More information on the principal adverse impact indicators that are taken into account can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > General exclusion policy for conventional and Responsible Investing funds.

In addition, the principal adverse impacts on sustainability factors are implicitly taken into account through the Proxy Voting and Engagement Policy of KBC Asset Management NV (more information can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > Retrospective Proxy Voting - overview > Proxy Voting and Engagement Policy).

KBC Asset Management NV exercises the voting rights of the shares it manages in accordance with the Proxy Voting and Engagement Policy. Where appropriate, KBC Asset Management NV will engage in dialogue with the management of the companies concerned, if necessary before voting.

Information on the principal adverse impacts on sustainability factors can also be found in the annual report for this sub-fund.

## Benchmark information

The fund is actively managed with reference to the following benchmark: MSCI EMU-Net Return index.

However, it is not the aim of the fund to replicate the benchmark. The composition of the benchmark is taken into account when compiling the portfolio.

When compiling the portfolio, the manager may also decide to invest in instruments that are not included in the benchmark, or indeed not to invest in instruments that are included.

The composition of the portfolio will to a large extent be similar to that of the benchmark.

The benchmark is also used to assess the performance of the sub-fund.

The benchmark is also used to determine the fund's risk limitation mechanism. This limits the extent to which the fund's return may deviate from the benchmark.

The longterm expected tracking error for this fund is 3.00%. The tracking error measures the volatility of the fund's

return relative to that of the benchmark. The higher the tracking error, the more the fund's return fluctuates relative to the benchmark. Market conditions may cause the actual tracking error to differ from the expected tracking error.

Required disclaimers for benchmark providers:

Source: MSCI. No MSCI Party nor any other party involved in or related to compiling, computing or creating the MSCI data, makes any express or implied warranties or representations with respect to such data (or the results to be obtained by the use thereof), and all such parties hereby expressly disclaim all warranties of originality, accuracy, completeness, merchantability or fitness for a particular purpose with respect to any of such data. Without limiting any of the foregoing, in no event shall MSCI, any of its affiliates, or any third party involved in compiling, computing, or creating the data have any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages. No further distribution or dissemination of the MSCI data is permitted without MSCI's express written consent.

***Volatility of the net asset value***

The volatility of the net asset value may be high due to the composition of the portfolio.

## 3. Risk

### Sub-fund's risk profile

Investors must take note of the specific risk factors set out below, the description of the risks given under the heading 'Information concerning the Bevek - F.Information on the risk profile of the UCITS', and the 'What are the risks and what could I get in return?' section of the key information document.

Summary table of risks assessed by the sub-fund:

| Risk type                 | Concise definition of the risk                                                                                                      |          | Explanation:                                                       |
|---------------------------|-------------------------------------------------------------------------------------------------------------------------------------|----------|--------------------------------------------------------------------|
| Market risk               | The risk that the entire market of an asset class will decline, thus affecting the prices and values of the assets in the portfolio | high     | the level of the risk reflects the volatility of the stock market. |
| Credit risk               | The risk that an issuer or a counterparty will default                                                                              | low      |                                                                    |
| Settlement risk           | The risk that settlement of a transaction via a payment system will not take place as expected                                      | low      |                                                                    |
| Liquidity risk            | The risk that a position cannot be liquidated in a timely manner at a reasonable price                                              | low      |                                                                    |
| Exchange or currency risk | The risk that the value of an investment will be affected by changes in exchange rates                                              | low      |                                                                    |
| Custody risk              | The risk of loss of assets held in custody with a custodian or sub-custodian                                                        | low      |                                                                    |
| Concentration risk        | The risk relating to a large concentration of investments in specific assets or in specific markets                                 | low      |                                                                    |
| Performance risk          | Risks to return                                                                                                                     | high     | the level of the risk reflects the volatility of the stock market. |
| Capital risk              | Risks to capital                                                                                                                    | moderate | There is no capital protection.                                    |

### Risk profile of the typical investor

Profile of the typical investor for which the sub-fund has been designed : Highly dynamic profile.

The risk profile mentioned per sub-fund has been determined from the point of view of an investor in the euro area and may differ from that of an investor in other currency zones. More information on the risk profiles can be obtained at [www.kbc.be/riskprofile](http://www.kbc.be/riskprofile).

## 4. Information concerning the trading of shares

### How to buy and sell shares and switch between sub-funds

If it turns out that shares are being held by persons other than those permitted to hold them, the Company may, in accordance with article 8.2 of the articles of association, and without charge (except any taxes due and any charges to cover the cost of realising the assets), redeem those shares.

| Cut-off time for receiving orders at the financial service providers in Belgium <sup>(1)</sup><br><br>Date of published net asset value | Date the net asset value is calculated | Actual values used                                                                                                                                                                                                                                     | Date of payment or repayment of the orders |
|-----------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------|
| <b>D</b><br>(every banking day <sup>(2)</sup> at 2 pm CET)<br>also referred to as 'Dealing Day'                                         | <b>D+1 banking day</b>                 | <b>D</b> if maximum 20% of the actual values are already known on D<br>(every banking day <sup>(2)</sup> at 2 pm CET)<br><br><b>D+1</b> if more than 20% of the actual values are already known on D<br>(every banking day <sup>(2)</sup> at 2 pm CET) | <b>D+3 banking days</b>                    |

<sup>(1)</sup> The cut-off time for receiving orders stated above applies to orders investors place directly with the financial services providers in Belgium.

If an investor places an order with a financial institution other than the financial service providers in Belgium, he/she must find out from that institution what cut-off time (time + date) applies to the order he/she wishes to place so that the institution in question can take the necessary action to ensure that the order reaches the financial service providers in Belgium before 2 pm CET on day D in order to qualify as an order of day D.

<sup>(2)</sup> with the exception of banking days on which one or more markets on which more than 20% of the sub-fund's assets are listed are closed or if transactions are suspended or restricted.

### Calculation of the net asset value

The net asset value is calculated daily, as described above, except on days on which no shares may be issued or redeemed. Swing pricing may be applied as described in the 'Information concerning the Bevek – N. Liquidity management tools' section.

### Publication of the net asset value

The 'Information concerning the Bevek – I. Additional information – Publication of the net asset value' section specifies where the result of the calculation of the net asset value can be viewed.

## 5. Types of shares and fees and charges

---

Shares may be in registered or book-entry form, as the shareholder chooses. No certificates representing the registered shares are issued. Instead, confirmation is supplied of entry in the register of shareholders.

### Dividend payment

After the close of the financial year, the General Meeting determines the portion of the result, which, within the limitations imposed by the Law of 3 August 2012 relative to undertakings for collective investment complying with the conditions of Directive 2009/65/EC and the undertakings for investment in receivables, is to be paid to the holders of distribution shares.

The holders of capitalisation shares are not entitled to receive a dividend. The portion of the annual net income accruing to them is capitalised in favour of these shares.

The shareholders will receive payment within six months of the close of the financial year via institutions designated for this purpose by the General Meeting.

The General Meeting may decide to proceed to interim payments in accordance with the provisions of the law.

The Board of Directors may, in accordance with the provisions laid down in the articles of association and within the limits of the law, decide to pay out interim dividends.

The information on the type and/or class of shares and the fees and charges associated with them is set out below by type and/or share class.

# Information concerning the sub-fund Eurozone DBI-RDT

## 1. Basic details

---

### Name

Eurozone DBI-RDT

### Date of incorporation

7 December 2017

### Life

Unlimited

### Delegation of the management of the investment portfolio

There is no delegation of the management of the investment portfolio.

### Stock exchange listing

Not applicable.

## 2. Investment information

---

### Sub-fund's object

The main object of this sub-fund is to generate the highest possible return for its shareholders by investing directly in transferable securities. This is reflected in its pursuit of capital gains and income. To that end, the assets are invested primarily in shares.

### Sub-fund's investment policy

#### *Permitted asset classes*

The sub-fund may invest in securities, deposits, liquid assets and all other instruments in so far as permitted by the applicable laws and regulations and consistent with the object referred to above.

#### *Restrictions of the investment policy*

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

#### *Selected strategy*

At least 95% of the assets are invested in the shares of companies from the euro area.

The fund invests a minimum of 50% in shares whose dividends and capital gains are eligible for the system of 'dividend received deduction' (DRD).

Under normal circumstances, however, the sub-fund will aim to invest between 70% and 100% in shares whose dividends and capital gains qualify for the DRD regime.

This means that it is possible that the equity portfolio will not be fully invested in equities whose capital gains and dividends qualify for the DRD regime.

As a result, income distributed by the sub-fund may not be 100% eligible for the dividend received deducted.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

#### *Transparency of adverse sustainability impacts*

The sub-fund considers the principal adverse impacts of its investment decisions on sustainability factors ('PAI') as described by the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector ('SFDR')

The principal adverse impacts on sustainability factors are explicitly taken into account through the General exclusion policy. More information on the principal adverse impact indicators that are taken into account can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > General exclusion policy for conventional and Responsible Investing funds.

In addition, the principal adverse impacts on sustainability factors are implicitly taken into account through the Proxy Voting and Engagement Policy of KBC Asset Management NV (more information can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > Retrospective Proxy Voting - overview > Proxy Voting and Engagement Policy).

KBC Asset Management NV exercises the voting rights of the shares it manages in accordance with the Proxy Voting and Engagement Policy. Where appropriate, KBC Asset Management NV will engage in dialogue with the management of the companies concerned, if necessary before voting.

Information on the principal adverse impacts on sustainability factors can also be found in the annual report for this sub-fund.

### **Benchmark information**

The fund is actively managed with reference to the following benchmark: MSCI EMU-Net Return index.

However, it is not the aim of the fund to replicate the benchmark. The composition of the benchmark is taken into account when compiling the portfolio.

In line with its investment policy, the sub-fund may not invest in all the instruments included in the benchmark.

When compiling the portfolio, the manager may also decide to invest in instruments that are not included in the benchmark, or indeed not to invest in instruments that are included.

The benchmark is also used to assess the performance of the sub-fund.

The benchmark is also used to determine the fund's risk limitation mechanism. This limits the extent to which the fund's return may deviate from the benchmark.

The longterm expected tracking error for this fund is 3.00%. The tracking error measures the volatility of the fund's return relative to that of the benchmark. The higher the tracking error, the more the fund's return fluctuates relative to the benchmark. Market conditions may cause the actual tracking error to differ from the expected tracking error.

#### Required disclaimers for benchmark providers:

Source: MSCI. No MSCI Party nor any other party involved in or related to compiling, computing or creating the MSCI data, makes any express or implied warranties or representations with respect to such data (or the results to be obtained by the use thereof), and all such parties hereby expressly disclaim all warranties of originality, accuracy, completeness, merchantability or fitness for a particular purpose with respect to any of such data. Without limiting any of the foregoing, in no event shall MSCI, any of its affiliates, or any third party involved in compiling, computing, or creating the data have any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages. No further distribution or dissemination of the MSCI data is permitted without MSCI's express written consent.

### **Volatility of the net asset value**

**The volatility of the net asset value may be high due to the composition of the portfolio.**

## 3. Risk

### Sub-fund's risk profile

Investors must take note of the specific risk factors set out below, the description of the risks given under the heading 'Information concerning the Bevek - F.Information on the risk profile of the UCITS', and the 'What are the risks and what could I get in return?' section of the key information document.

Summary table of risks assessed by the sub-fund:

| Risk type                 | Concise definition of the risk                                                                                                      |          | Explanation:                                                       |
|---------------------------|-------------------------------------------------------------------------------------------------------------------------------------|----------|--------------------------------------------------------------------|
| Market risk               | The risk that the entire market of an asset class will decline, thus affecting the prices and values of the assets in the portfolio | high     | the level of the risk reflects the volatility of the stock market. |
| Credit risk               | The risk that an issuer or a counterparty will default                                                                              | low      |                                                                    |
| Settlement risk           | The risk that settlement of a transaction via a payment system will not take place as expected                                      | low      |                                                                    |
| Liquidity risk            | The risk that a position cannot be liquidated in a timely manner at a reasonable price                                              | low      |                                                                    |
| Exchange or currency risk | The risk that the value of an investment will be affected by changes in exchange rates                                              | low      |                                                                    |
| Custody risk              | The risk of loss of assets held in custody with a custodian or sub-custodian                                                        | low      |                                                                    |
| Concentration risk        | The risk relating to a large concentration of investments in specific assets or in specific markets                                 | low      |                                                                    |
| Performance risk          | Risks to return                                                                                                                     | high     | the level of the risk reflects the volatility of the stock market. |
| Capital risk              | Risks to capital                                                                                                                    | moderate | There is no capital protection.                                    |
| Flexibility risk          | Inflexibility both within the product and constraints on switching to other providers                                               | low      |                                                                    |
| Inflation risk            | Risk of inflation                                                                                                                   | low      |                                                                    |
| Environmental factors     | Uncertainty regarding the immutability of environmental factors, such as the tax regime                                             | low      |                                                                    |

### Risk profile of the typical investor

Profile of the typical investor for which the sub-fund has been designed : Highly dynamic profile.

The risk profile mentioned per sub-fund has been determined from the point of view of an investor in the euro area and may differ from that of an investor in other currency zones. More information on the risk profiles can be obtained at [www.kbc.be/riskprofile](http://www.kbc.be/riskprofile).

## 4. Information concerning the trading of shares

### How to buy and sell shares and switch between sub-funds

If it turns out that shares are being held by persons other than those permitted to hold them, the Company may, in accordance with article 8.2 of the articles of association, and without charge (except any taxes due and any charges to cover the cost of realising the assets), redeem those shares.

| Cut-off time for receiving orders at the financial service providers in Belgium <sup>(1)</sup><br><br>Date of published net asset value | Date the net asset value is calculated | Actual values used                                                                                                                                                                                                                                     | Date of payment or repayment of the orders |
|-----------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------|
| <b>D</b><br>(every banking day <sup>(2)</sup> at 2 pm CET)<br>also referred to as 'Dealing Day'                                         | <b>D+1 banking day</b>                 | <b>D</b> if maximum 20% of the actual values are already known on D<br>(every banking day <sup>(2)</sup> at 2 pm CET)<br><br><b>D+1</b> if more than 20% of the actual values are already known on D<br>(every banking day <sup>(2)</sup> at 2 pm CET) | <b>D+3 banking days</b>                    |

<sup>(1)</sup> The cut-off time for receiving orders stated above applies to orders investors place directly with the financial services providers in Belgium.

If an investor places an order with a financial institution other than the financial service providers in Belgium, he/she must find out from that institution what cut-off time (time + date) applies to the order he/she wishes to place so that the institution in question can take the necessary action to ensure that the order reaches the financial service providers in Belgium before 2 pm CET on day D in order to qualify as an order of day D.

<sup>(2)</sup> with the exception of banking days on which one or more markets on which more than 20% of the sub-fund's assets are listed are closed or if transactions are suspended or restricted.

### Calculation of the net asset value

The net asset value is calculated daily, as described above, except on days on which no shares may be issued or redeemed. Swing pricing may be applied as described in the 'Information concerning the Bevek – N. Liquidity management tools' section.

### Publication of the net asset value

The 'Information concerning the Bevek – I. Additional information – Publication of the net asset value' section specifies where the result of the calculation of the net asset value can be viewed.

## 5. Types of shares and fees and charges

---

Only distribution shares are issued.

Shares may be in registered or book-entry form, as the shareholder chooses. No certificates representing the registered shares are issued. Instead, confirmation is supplied of entry in the register of shareholders.

### Dividend payment

After the close of the financial year, the General Meeting determines the portion of the result, which, within the limitations imposed by the Law of 3 August 2012 relative to undertakings for collective investment complying with the conditions of Directive 2009/65/EC and the undertakings for investment in receivables, is to be paid to its shareholders.

Shareholders will receive payment within six months of the close of the financial year via institutions designated for this purpose by the General Meeting.

The General Meeting may decide to switch to interim payments in accordance with the provisions of the law.

The Board of Directors may, in accordance with the provisions laid down in the articles of association and within the limits of the law, decide to pay out interim dividends.

### *Taxation of dividends paid to shareholders liable for Belgian corporation tax*

The sub-fund aims, within the scope of the applicable legislation to enable its shareholders to qualify for the dividend received deduction (DRD) system, as regulated by Articles 202–205 of the Income Tax Code 1992 (ITC 92), in respect of the dividends they receive from the sub-fund.

The sub-fund's articles of association provide to this end for an annual payout of at least 90% of the income it receives itself, this however after deduction of remuneration, commissions and charges.

The dividends paid by the sub-fund (including the 'redemption bonuses' paid to investors under Articles 18 and 186 ITC 92 in respect of purchase by the sub-fund of its own shares) qualify for the dividend received deduction in respect of the shareholder in so far as the underlying income of the sub-fund itself is derived from so-called 'good' income. 'Good' income refers either to dividends that meet the deduction criteria set out in Article 203(1.1–1.4) ITC 92 or to capital gains realised on shares qualifying for exemption under Article 192(1) ITC 92. In so far as the dividends received qualify for the DRD, they will be deducted from the taxable profit.

The DRD system applies to the following shareholders/investors: (1) domestic companies subject to corporation tax and (2) foreign companies with a permanent establishment in Belgium, which are subject to non-residents' corporation tax and in so far as the received dividends may be allocated to the Belgian permanent establishment.

The information on the type and/or class of shares and the fees and charges associated with them is set out below by type and/or share class.

# Eurozone DBI-RDT - Institutional Discretionary Shares

**This share class is reserved**

- for trading to persons who acquire and hold the units on the basis of a discretionary management agreement with KBC Asset Management NV (except a discretionary management agreement 'Core Satellite'), or with another company associated with KBC Asset Management NV and who pay a discretionary management fee on the part of their portfolio invested in KBC UCIs<sup>1</sup>. In addition, these persons must have the status of 'eligible investors', acting on its own behalf, as within the meaning of Article 5 § 3/1 of the Law of 3 August 2012 relative to undertakings for collective investment complying with the conditions of Directive 2009/65/EC and the undertakings for investment in receivables<sup>2</sup>. The investor must comply with these conditions at the time of subscription and for as long as the investor remains a shareholder of the share class.
- for trading to institutional undertakings for collective investment managed by KBC Asset Management NV or by another company associated with this management company and who pay a fee on the part of the assets invested in KBC UCIs.

If it appears that the shares of this class are held by persons other than those authorized, these shares will be converted at no cost (except taxes) into shares of the share class "Classic Shares".

<sup>1</sup> These are collective investment undertakings managed by KBC Asset Management NV or by another company associated with this management company.  
<sup>2</sup> These include both professional investors as referred to in Annex A of the Royal Decree of June 3, 2007 laying down detailed rules transposing the Directive on markets in financial instruments and legal persons who are not considered professional investors and who have asked to be registered in the register of eligible investors with the FSMA. Natural persons, as well as legal entities that are not part of eligible investors as defined above, do not have access to this share class.

**One-off fees and charges charged to the investor unless indicated otherwise, in the currency the sub-fund is denominated in or as a percentage of the net asset value per share**

# Information concerning the sub-fund Eurozone Responsible Investing

## 1. Basic details

---

### Name

Eurozone Responsible Investing

### Date of incorporation

2 November 2018

### Life

Unlimited

### Delegation of the management of the investment portfolio

There is no delegation of the management of the investment portfolio.

### Stock exchange listing

Not applicable.

## 2. Investment information

---

### Sub-fund's object

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

### Sub-fund's investment policy

#### *Permitted asset classes*

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

#### *Restrictions of the investment policy*

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

## Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. **Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.**

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

## Selected strategy

The assets are mainly invested in shares of companies in the euro area.

## Information related to Responsible Investing

Within the above limits, the sub-fund pursues responsible investment objectives based on a dualistic approach: a negative screening and a positive selection methodology.

KBC Asset Management NV has a team of specialist researchers responsible for this dualistic approach. They are assisted by an independent advisory board (the “**Responsible Investing Advisory Board**”) comprised of up to twelve persons, who are not affiliated to KBC Asset Management NV, and whose sole responsibility is to supervise the dualistic approach and activities of the specialist researchers. The secretariat of the advisory board is handled by a representative of KBC Asset Management NV. Moreover, KBC Asset Management NV works with data suppliers with expertise in Responsible Investing that provide data to the specialized researchers, who process and complete the data with publicly available information (including annual reports, press publications, etc.).

The sub-fund promotes a combination of environmental and/or social characteristics and, even though it does not have sustainable investments as an objective, it shall invest a minimum proportion of its assets in economic activities that contribute to the achievement of environmental or social objectives (i.e. ‘sustainable investments’).

The companies in which it invests must follow good governance practices.

The sub-fund is compliant with the transparency obligations of article 8(1) of Regulation (EU) 2019/2088 of the European Parliament and of the council of 27 November 2019 on sustainability-related disclosures in the financial services sector (‘SFDR’). More information on how the sub-fund promotes environmental and/or social characteristics can be found in the ‘Annex for KBC Equity Fund Eurozone Responsible Investing’ to the prospectus. This annex specifically covers the pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852.

In addition, the exclusions set out in Article 12(1)(a) to (g) of Delegated Regulation (EU) 2020/1818 (“Exclusions for Paris Agreement-aligned EU benchmarks”) are respected by this sub-fund.

The sub-fund complies with the European Securities and Markets Authority (ESMA) guidelines on fund names using ESG or sustainability-related terms.

### Negative screening

In practical terms the end result of this negative screening procedure is that the sub-fund excludes companies in advance from the Responsible Investment universe which fall foul of the exclusion policy available on [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > Exclusion policy for Responsible Investing funds.

The application of these policies means that:

- companies involved in certain activities are excluded from the sub-fund's investment universe. A distinction can be made between companies that are excluded if they exceed a certain turnover threshold in relation to specific

activities, such as conventional weapons, tobacco, gambling or adult entertainment, and those that are excluded outright because they are involved in specific activities, such as controversial weapons, agricultural commodities or the mining of thermal coal, among others.

- The sub-fund may nevertheless invest in companies involved in conventional weapons and/or nuclear weapons that exceed certain turnover thresholds, provided they are included on the whitelist as specified in the policy. The whitelist is a list drawn up by KBC Group and includes companies involved in conventional weapons and/or nuclear weapons, but which are nevertheless deemed acceptable as investments within funds that invest responsibly, taking into account factors such as the proportion of arms sales to non-NATO countries and a possible involvement in human rights controversies related to armed conflict.

This screening also ensures that companies who seriously violate fundamental principles of environmental protection, social responsibility and good governance, among others, are excluded from the sub-fund's investment universe.

More information regarding the specific exclusions can also be found in the "Annex for KBC Equity Fund Eurozone Responsible Investing" to the prospectus.

These negative screening principles are not exhaustive and may be adapted from time to time under the supervision of the Responsible Investing Advisory Board.

#### Positive selection methodology

Within the defined investment universe and other limits described above, the responsible investment objectives of the sub-fund are the following:

- (1) promote the integration of sustainability into the policy decisions of companies by preferring companies with a better **ESG risk score**, where ESG stands for 'Environmental, Social and Governance', and
- (2) promote climate change mitigation, by preferring companies with lower **Greenhouse Gas Intensity**, with the objective of meeting a predetermined Greenhouse Gas intensity target;
- (3) support sustainable development, through 'sustainable investments' in accordance with art. 2(17) SFDR. Sustainable investments will consist of investments in companies contributing to the achievement of the **UN Sustainable Development Goals** (plus instruments awarded the 'sustainable development' label by KBC Asset Management NV on the advice of the Responsible Investing Advisory Board).

More information on the investment policy for Responsible Investing funds is available at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > Investment policy for Responsible Investing funds.

#### (1) ESG-risk score

The contribution to the integration of sustainability into policy decisions of the companies is measured based on an ESG-risk score. This score represents the aggregated performance assessment of a given company against a series of ESG criteria which are grounded to the extent possible against objective measures. The main factors underpinning the ESG criteria are:

- respect for the environment (e.g., reduction in greenhouse gas emissions);
- attention to society (e.g., employee working conditions); and
- corporate governance (e.g., independence and diversity of the board of directors).

At least 90% of the corporate investments in the portfolio, as measured by assets under management, must have an ESG risk score. The ESG risk score for companies is an ESG risk score supplied by a data provider, and based on internal research as well.

These lists are not exhaustive and may be changed under the supervision of the Responsible Investing Advisory Board.

To achieve this objective, the ESG-risk score of the portfolio for companies is compared to following benchmark: MSCI EMU-Net Return index.

To calculate the ESG-risk score at portfolio level, the weighted average of the ESG (risk) scores of the positions in the sub-fund are taken into account. Technical items such as cash and derivatives are not taken into account and also companies or countries for which no data is available are left out. The weights used in the calculation depend on the size of the positions in the sub-fund, rescaled for these items.

More information on the ESG-risk score and the concrete goals of the sub-fund can be found in the 'Annex for KBC Equity Fund Eurozone Responsible Investing' to the prospectus.

The targets can be revised upwards or downwards.

#### (2) Greenhouse Gas Intensity

The objective to promote climate change mitigation, by favoring lower greenhouse gas intensity companies, with the goal of meeting a predetermined greenhouse gas intensity target covers at least 90% of the portfolio. The objective does not apply to companies for which data is not available.

The contribution of companies to climate change mitigation is measured based on their greenhouse gas intensity. Greenhouse gas intensity is defined as absolute greenhouse gas emissions (in tonnes CO2 equivalent), divided by revenues (in mln USD).

The sub-fund's target in terms of greenhouse gas intensity is assessed on two targets whereby the most strict of the two will determine the target applied: 15% better than the benchmark MSCI EMU-Net Return index and a reduction of 50% by 2030 compared to the benchmark MSCI EMU-Net Return index in 2019.

More information on Greenhouse Gas Intensity and the concrete goals of the sub-fund can be found in the 'Annex

for KBC Equity Fund Eurozone Responsible Investing' to the prospectus.  
The targets may be revised upwards or downwards.

### **(3) UN Sustainable Development Goals**

To support sustainable development, the sub-fund commits to invest a minimum proportion of the portfolio in companies that contribute to the UN Sustainable Development Goals. The UN Sustainable Development Goals include both social and environmental objectives.

Companies are considered to contribute to sustainable development when at least 20% of the revenues are linked to the UN Sustainable Development Goals. The activities of the companies are assessed on multiple sustainable themes that can be linked to the UN Sustainable Development Goals.

Instruments of companies that meet these requirements are designated as "sustainable investments," according to Article 2(17) SFDR.

In addition, KBC Asset Management NV can award the "sustainable development" label to instruments, on the advice of the Responsible Investing Advisory Board. In that case, these investments shall also qualify as "sustainable investments," according to Article 2(17) SFDR.

More information about the methodology used to qualify investments as investments which contribute to the UN Sustainable Development Goals can be found in the 'Annex for KBC Equity Fund Eurozone Responsible Investing' to the prospectus.

### **Potential Exceptions**

It cannot be ruled out, however, that very limited investments may be made temporarily in assets that do not meet the above criteria. The reasons for this include the following:

- Developments as a result of which a company can no longer be regarded as eligible after purchase;
- Corporate events, such as a merger of one company with another, where the merged company can no longer be considered an eligible company based on the above criteria;
- Incorrect data as a result of which assets are invested (unintentionally and erroneously) in assets purchased when it should not have been eligible for the sub-fund;
- A planned update of the screening criteria as a result of which assets should be excluded from the sub-fund, but which the management company chooses to refrain from selling immediately in the best interest of the customer;
- External circumstances such as market movements and updates of external data can lead to investment solutions failing to achieve the abovementioned targets.

In these cases, the fund manager will replace the assets concerned with more appropriate assets as soon as possible, always taking into account the sole interest of the investor.

In addition, for the purpose of efficient portfolio management, the fund manager may to a significant degree use derivatives relating to assets that would not be eligible for inclusion in the sub-fund, in so far as there is no serviceable and comparable alternative available on the market. In addition, the counterparties with which the derivative transactions are entered into may not necessarily be issuers having a responsible nature.

### **Taxonomy related information**

At the date of this prospectus, the sub-fund does not commit to invest a minimum proportion of its assets in environmentally sustainable economic activities which contribute to any of the environmental objectives set out in Article 9 of the Regulation (EU) 2020/852 of the European Parliament and of the Council of 18 June 2020 on the establishment of a framework to facilitate sustainable investment ('EU Taxonomy Framework'). The minimum proportion of investments in environmentally sustainable economic activities within the meaning of the EU Taxonomy Framework is 0%. This will be monitored on a regular basis and as soon as sufficiently reliable, timely and verifiable data from issuers or invested companies is available, the prospectus may be updated.

Non-financial companies are considered to contribute to sustainable development if at least 20% of sales are aligned to the EU Taxonomy Framework based on Trucost data. For companies in the financial sector, a different methodology applies. For credit institutions, the alignment with the EU Taxonomy Framework is based on the Green Asset Ratio, while for other financial companies the alignment with the EU Taxonomy Framework is based on the alignment of their investment portfolios. Instruments of companies that meet these requirements are referred to as "sustainable investments," according to art. 2(17) SFDR. More information on the percentage in the portfolio that was considered "sustainable investments with an environmental objective aligned with the EU Taxonomy Framework " based on this criterion during the reporting period, can be found in the annual reports for this sub-fund.

More information on the EU Taxonomy Framework can be found in the 'Annex for KBC Equity Fund Eurozone Responsible Investing' to the prospectus.

### **Transparency of adverse sustainability impacts**

The sub-fund considers the principal adverse impacts of its investment decisions on sustainability factors by taking into account the principal adverse impact indicators ('PAI'), as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability disclosure in the financial services sector ('SFDR').

The principal adverse impacts on sustainability factors are explicitly taken into account through the General exclusion policy for conventional and Responsible Investing funds and the exclusion policy for Responsible Investing funds. More information on the principal adverse impact indicators taken into account can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > General exclusion policy for conventional and Responsible Investing funds and [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > Exclusion policy for Responsible Investing funds.

In addition, the principal adverse impacts on sustainability factors are implicitly taken into account through the Proxy Voting and Engagement Policy of KBC Asset Management NV (more information can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > Retrospective Proxy Voting - overview > Proxy Voting and Engagement Policy).

More information on how the sub-fund aims to consider the principal adverse impacts on sustainability factors can also be found in the 'Annex for KBC Equity Fund Eurozone Responsible Investing' to the prospectus. A statement on how the sub-fund has considered the principal adverse impacts on sustainability factors during the reporting period can also be found in the annual reports for this sub-fund.

### **Benchmark information**

The fund is actively managed with reference to the following benchmark: MSCI EMU-Net Return index.

However, it is not the aim of the fund to replicate the benchmark. The composition of the benchmark is taken into account when compiling the portfolio.

In line with its investment policy, the sub-fund may not invest in all the instruments included in the benchmark.

When compiling the portfolio, the manager may also decide to invest in instruments that are not included in the benchmark, or indeed not to invest in instruments that are included.

The composition of the portfolio will vary from that of the benchmark, as the composition of the benchmark is not fully consistent with the environmental and/or social characteristics promoted by the sub-fund. The use of the benchmark does not detract from the responsible character of the portfolio. The responsible character is guaranteed by the aforementioned Responsible Investing methodology.

The benchmark is also used to determine the fund's risk limitation mechanism. This limits the extent to which the fund's return may deviate from the benchmark.

The longterm expected tracking error for this fund is 3.50%. The tracking error measures the volatility of the fund's return relative to that of the benchmark. The higher the tracking error, the more the fund's return fluctuates relative to the benchmark. Market conditions may cause the actual tracking error to differ from the expected tracking error.

#### Required disclaimers for benchmark providers:

Source: MSCI. No MSCI Party nor any other party involved in or related to compiling, computing or creating the MSCI data, makes any express or implied warranties or representations with respect to such data (or the results to be obtained by the use thereof), and all such parties hereby expressly disclaim all warranties of originality, accuracy, completeness, merchantability or fitness for a particular purpose with respect to any of such data. Without limiting any of the foregoing, in no event shall MSCI, any of its affiliates, or any third party involved in compiling, computing, or creating the data have any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages. No further distribution or dissemination of the MSCI data is permitted without MSCI's express written consent.

### **Volatility of the net asset value**

The volatility of the net asset value may be high due to the composition of the portfolio.

## 3. Risk

### Sub-fund's risk profile

Investors must take note of the specific risk factors set out below, the description of the risks given under the heading 'Information concerning the Bevek - F.Information on the risk profile of the UCITS', and the 'What are the risks and what could I get in return?' section of the key information document.

Summary table of risks assessed by the sub-fund:

| Risk type                 | Concise definition of the risk                                                                                                      |          | Explanation:                                                       |
|---------------------------|-------------------------------------------------------------------------------------------------------------------------------------|----------|--------------------------------------------------------------------|
| Market risk               | The risk that the entire market of an asset class will decline, thus affecting the prices and values of the assets in the portfolio | high     | the level of the risk reflects the volatility of the stock market. |
| Credit risk               | The risk that an issuer or a counterparty will default                                                                              | low      |                                                                    |
| Settlement risk           | The risk that settlement of a transaction via a payment system will not take place as expected                                      | low      |                                                                    |
| Liquidity risk            | The risk that a position cannot be liquidated in a timely manner at a reasonable price                                              | low      |                                                                    |
| Exchange or currency risk | The risk that the value of an investment will be affected by changes in exchange rates                                              | low      |                                                                    |
| Custody risk              | The risk of loss of assets held in custody with a custodian or sub-custodian                                                        | low      |                                                                    |
| Concentration risk        | The risk relating to a large concentration of investments in specific assets or in specific markets                                 | low      |                                                                    |
| Performance risk          | Risks to return                                                                                                                     | high     | the level of the risk reflects the volatility of the stock market. |
| Capital risk              | Risks to capital                                                                                                                    | moderate | There is no capital protection.                                    |
| Flexibility risk          | Inflexibility both within the product and constraints on switching to other providers                                               | low      |                                                                    |
| Inflation risk            | Risk of inflation                                                                                                                   | low      |                                                                    |
| Environmental factors     | Uncertainty regarding the immutability of environmental factors, such as the tax regime                                             | low      |                                                                    |

### Risk profile of the typical investor

Profile of the typical investor for which the sub-fund has been designed : Highly dynamic profile.

The risk profile mentioned per sub-fund has been determined from the point of view of an investor in the euro area and may differ from that of an investor in other currency zones. More information on the risk profiles can be obtained at [www.kbc.be/riskprofile](http://www.kbc.be/riskprofile).

## 4. Information concerning the trading of shares

### How to buy and sell shares and switch between sub-funds

If it turns out that shares are being held by persons other than those permitted to hold them, the Company may, in accordance with article 8.2 of the articles of association, and without charge (except any taxes due and any charges to cover the cost of realising the assets), redeem those shares.

| Cut-off time for receiving orders at the financial service providers in Belgium <sup>(1)</sup><br><br>Date of published net asset value | Date the net asset value is calculated | Actual values used                                                                                                                                                                                                                                           | Date of payment or repayment of the orders |
|-----------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------|
| <b>D</b><br>(every banking day <sup>(2)</sup><br>at 2 pm CET)<br>also referred to as 'Dealing Day'                                      | <b>D+1 banking day</b>                 | <b>D</b> if maximum 20% of the actual values are already known on D<br>(every banking day <sup>(2)</sup><br>at 2 pm CET)<br><br><b>D+1</b> if more than 20% of the actual values are already known on D<br>(every banking day <sup>(2)</sup><br>at 2 pm CET) | <b>D+3 banking days</b>                    |

<sup>(1)</sup> The cut-off time for receiving orders stated above applies to orders investors place directly with the financial services providers in Belgium.

If an investor places an order with a financial institution other than the financial service providers in Belgium, he/she must find out from that institution what cut-off time (time + date) applies to the order he/she wishes to place so that the institution in question can take the necessary action to ensure that the order reaches the financial service providers in Belgium before 2 pm CET on day D in order to qualify as an order of day D.

<sup>(2)</sup> with the exception of banking days on which one or more markets on which more than 20% of the sub-fund's assets are listed are closed or if transactions are suspended or restricted.

### Calculation of the net asset value

The net asset value is calculated daily, as described above, except on days on which no shares may be issued or redeemed. Swing pricing may be applied as described in the 'Information concerning the Bevek – N. Liquidity management tools' section.

### Publication of the net asset value

The 'Information concerning the Bevek – I. Additional information – Publication of the net asset value' section specifies where the result of the calculation of the net asset value can be viewed.

If the profitability of the sub-fund is jeopardised due to a limited number of subscriptions during the initial subscription period (less than 5 000 000 euros), the Board of Directors of the Bevek may decide to refuse the orders placed during the initial subscription period and not to proceed with the commercialisation of the sub-fund.

## 5. Types of shares and fees and charges

---

Shares may be in registered or book-entry form, as the shareholder chooses. No certificates representing the registered shares are issued. Instead, confirmation is supplied of entry in the register of shareholders.

### Dividend payment

After the close of the financial year, the General Meeting determines the portion of the result, which, within the limitations imposed by the Law of 3 August 2012 relative to undertakings for collective investment complying with the conditions of Directive 2009/65/EC and the undertakings for investment in receivables, is to be paid to the holders of distribution shares.

The holders of capitalisation shares are not entitled to receive a dividend. The portion of the annual net income accruing to them is capitalised in favour of these shares.

The shareholders will receive payment within six months of the close of the financial year via institutions designated for this purpose by the General Meeting.

The General Meeting may decide to proceed to interim payments in accordance with the provisions of the law.

The Board of Directors may, in accordance with the provisions laid down in the articles of association and within the limits of the law, decide to pay out interim dividends.

The information on the type and/or class of shares and the fees and charges associated with them is set out below by type and/or share class.

# Eurozone Responsible Investing - Institutional Discretionary Shares

**This share class is reserved**

- for trading to persons who acquire and hold the units on the basis of a discretionary management agreement with KBC Asset Management NV (except a discretionary management agreement 'Core Satellite'), or with another company associated with KBC Asset Management NV and who pay a discretionary management fee on the part of their portfolio invested in KBC UCIs<sup>1</sup>. In addition, these persons must have the status of 'eligible investors', acting on its own behalf, as within the meaning of Article 5 § 3/1 of the Law of 3 August 2012 relative to undertakings for collective investment complying with the conditions of Directive 2009/65/EC and the undertakings for investment in receivables<sup>2</sup>. The investor must comply with these conditions at the time of subscription and for as long as the investor remains a shareholder of the share class.
- for trading to institutional undertakings for collective investment managed by KBC Asset Management NV or by another company associated with this management company and who pay a fee on the part of the assets invested in KBC UCIs.

If it appears that the shares of this class are held by persons other than those authorized, these shares will be converted at no cost (except taxes) into shares of the share class "Classic Shares".

# Information concerning the sub-fund Family Enterprises

## 1. Basic details

---

### Name

Family Enterprises

### Date of incorporation

28 May 2014

### Life

Unlimited

### Delegation of the management of the investment portfolio

There is no delegation of the management of the investment portfolio.

### Stock exchange listing

Not applicable.

## 2. Investment information

---

### Sub-fund's object

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

### Sub-fund's investment policy

#### *Permitted asset classes*

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

#### *Restrictions of the investment policy*

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

## Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. **Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.**

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

## Selected strategy

The assets are invested primarily in shares of listed family enterprises in Europe and North America.

To be considered as a family enterprise, the following conditions must be met:

- one family owns, directly or indirectly (e.g. through a company or foundation), the highest number of shares (percentage of interest) in the company and;
- one or more members of this family sit on the company's board of directors, directly or indirectly (e.g. through a company or by formal mandate from a third party).

Companies with strong family roots focus on the long term. Family enterprise shareholders want to transfer their company to the next generation so it is in their own interest to ensure that their company does well. They pursue growth responsibly and generally take less risk. They are highly involved in the company, both financially and emotionally, and are, therefore, more willing to invest capital in the company in the long term. This enables them to draw up a long - term strategy and implement it in practice, too.

(\*) In the case of indirect shareholding, the percentage interest is calculated by multiplying the successive percentage interest.

For example:

Family X owns 60% of the shares of Company A, which in turn owns 50% of the shares of Company B. Consequently, Family X's percentage of interest in company B is 30%.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

## Transparency of adverse sustainability impacts

The sub-fund considers the principal adverse impacts of its investment decisions on sustainability factors ('PAI') as described by the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector ('SFDR')

The principal adverse impacts on sustainability factors are explicitly taken into account through the General exclusion policy. More information on the principal adverse impact indicators that are taken into account can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > General exclusion policy for conventional and Responsible Investing funds.

In addition, the principal adverse impacts on sustainability factors are implicitly taken into account through the Proxy Voting and Engagement Policy of KBC Asset Management NV (more information can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > Retrospective Proxy Voting - overview > Proxy Voting and Engagement Policy).

KBC Asset Management NV exercises the voting rights of the shares it manages in accordance with the Proxy Voting and Engagement Policy. Where appropriate, KBC Asset Management NV will engage in dialogue with the

management of the companies concerned, if necessary before voting.

Information on the principal adverse impacts on sustainability factors can also be found in the annual report for this sub-fund.

### ***Benchmark information***

The fund is actively managed without referring to any benchmark.

### ***Volatility of the net asset value***

The volatility of the net asset value may be high due to the composition of the portfolio.

## 3. Risk

### Sub-fund's risk profile

Investors must take note of the specific risk factors set out below, the description of the risks given under the heading 'Information concerning the Bevek - F.Information on the risk profile of the UCITS', and the 'What are the risks and what could I get in return?' section of the key information document.

Summary table of risks assessed by the sub-fund:

| Risk type                 | Concise definition of the risk                                                                                                      |          | Explanation:                                                                                                                                                                                                      |
|---------------------------|-------------------------------------------------------------------------------------------------------------------------------------|----------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Market risk               | The risk that the entire market of an asset class will decline, thus affecting the prices and values of the assets in the portfolio | high     | the level of the risk reflects the volatility of the stock market.                                                                                                                                                |
| Credit risk               | The risk that an issuer or a counterparty will default                                                                              | low      |                                                                                                                                                                                                                   |
| Settlement risk           | The risk that settlement of a transaction via a payment system will not take place as expected                                      | low      |                                                                                                                                                                                                                   |
| Liquidity risk            | The risk that a position cannot be liquidated in a timely manner at a reasonable price                                              | low      |                                                                                                                                                                                                                   |
| Exchange or currency risk | The risk that the value of an investment will be affected by changes in exchange rates                                              | high     | since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates. |
| Custody risk              | The risk of loss of assets held in custody with a custodian or sub-custodian                                                        | low      |                                                                                                                                                                                                                   |
| Concentration risk        | The risk relating to a large concentration of investments in specific assets or in specific markets                                 | low      |                                                                                                                                                                                                                   |
| Performance risk          | Risks to return                                                                                                                     | high     | the level of the risk reflects the volatility of the stock market.                                                                                                                                                |
| Capital risk              | Risks to capital                                                                                                                    | moderate | There is no capital protection.                                                                                                                                                                                   |
| Flexibility risk          | Inflexibility both within the product and constraints on switching to other providers                                               | low      |                                                                                                                                                                                                                   |
| Inflation risk            | Risk of inflation                                                                                                                   | low      |                                                                                                                                                                                                                   |
| Environmental factors     | Uncertainty regarding the immutability of environmental factors, such as the tax regime                                             | low      |                                                                                                                                                                                                                   |

### Risk profile of the typical investor

Profile of the typical investor for which the sub-fund has been designed : Highly dynamic profile.

The risk profile mentioned per sub-fund has been determined from the point of view of an investor in the euro area and may differ from that of an investor in other currency zones. More information on the risk profiles can be obtained at [www.kbc.be/riskprofile](http://www.kbc.be/riskprofile).

## 4. Information concerning the trading of shares

### How to buy and sell shares and switch between sub-funds

If it turns out that shares are being held by persons other than those permitted to hold them, the Company may, in accordance with article 8.2 of the articles of association, and without charge (except any taxes due and any charges to cover the cost of realising the assets), redeem those shares.

| Cut-off time for receiving orders at the financial service providers in Belgium <sup>(1)</sup><br><br>Date of published net asset value | Date the net asset value is calculated | Actual values used                                                                                                                                                                                                                                           | Date of payment or repayment of the orders |
|-----------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------|
| <b>D</b><br>(every banking day <sup>(2)</sup><br>at 2 pm CET)<br>also referred to as 'Dealing Day'                                      | <b>D+1 banking day</b>                 | <b>D</b> if maximum 20% of the actual values are already known on D<br>(every banking day <sup>(2)</sup><br>at 2 pm CET)<br><br><b>D+1</b> if more than 20% of the actual values are already known on D<br>(every banking day <sup>(2)</sup><br>at 2 pm CET) | <b>D+3 banking days</b>                    |

<sup>(1)</sup> The cut-off time for receiving orders stated above applies to orders investors place directly with the financial services providers in Belgium.

If an investor places an order with a financial institution other than the financial service providers in Belgium, he/she must find out from that institution what cut-off time (time + date) applies to the order he/she wishes to place so that the institution in question can take the necessary action to ensure that the order reaches the financial service providers in Belgium before 2 pm CET on day D in order to qualify as an order of day D.

<sup>(2)</sup> with the exception of banking days on which one or more markets on which more than 20% of the sub-fund's assets are listed are closed or if transactions are suspended or restricted.

### Calculation of the net asset value

The net asset value is calculated daily, as described above, except on days on which no shares may be issued or redeemed. Swing pricing may be applied as described in the 'Information concerning the Bevek – N. Liquidity management tools' section.

### Publication of the net asset value

The 'Information concerning the Bevek – I. Additional information – Publication of the net asset value' section specifies where the result of the calculation of the net asset value can be viewed.

If the profitability of the sub-fund is jeopardised due to a limited number of subscriptions during the initial subscription period (less than 5 000 000 euros), the Board of Directors of the Bevek may decide to refuse the orders placed during the initial subscription period and not to proceed with the commercialisation of the sub-fund.

## 5. Types of shares and fees and charges

---

Shares may be in registered or book-entry form, as the shareholder chooses. No certificates representing the registered shares are issued. Instead, confirmation is supplied of entry in the register of shareholders.

### Dividend payment

After the close of the financial year, the General Meeting determines the portion of the result, which, within the limitations imposed by the Law of 3 August 2012 relative to undertakings for collective investment complying with the conditions of Directive 2009/65/EC and the undertakings for investment in receivables, is to be paid to the holders of distribution shares.

The holders of capitalisation shares are not entitled to receive a dividend. The portion of the annual net income accruing to them is capitalised in favour of these shares.

The shareholders will receive payment within six months of the close of the financial year via institutions designated for this purpose by the General Meeting.

The General Meeting may decide to proceed to interim payments in accordance with the provisions of the law.

The Board of Directors may, in accordance with the provisions laid down in the articles of association and within the limits of the law, decide to pay out interim dividends.

The information on the type and/or class of shares and the fees and charges associated with them is set out below by type and/or share class.

# Family Enterprises - Discretionary Wealth Shares

There is a minimum subscription value of 1000000 EUR (both during as well as after the initial subscription period).

This share class is reserved for trading to persons who acquire and hold the units on the basis of a discretionary management contract with KBC Asset Management NV or with another company associated with KBC Asset Management NV. The investor must have this status at the moment of subscription and for as long as the investor remains a shareholder of the share class. If it appears that the shares of this class of shares are held by persons other than authorized, these shares will be converted at no cost (except taxes) into shares of the share class 'Classic Shares'.

# Family Enterprises - Institutional Discretionary Shares

**This share class is reserved**

- for trading to persons who acquire and hold the units on the basis of a discretionary management agreement with KBC Asset Management NV (except a discretionary management agreement 'Core Satellite'), or with another company associated with KBC Asset Management NV and who pay a discretionary management fee on the part of their portfolio invested in KBC UCIs<sup>1</sup>. In addition, these persons must have the status of 'eligible investors', acting on its own behalf, as within the meaning of Article 5 § 3/1 of the Law of 3 August 2012 relative to undertakings for collective investment complying with the conditions of Directive 2009/65/EC and the undertakings for investment in receivables<sup>2</sup>. The investor must comply with these conditions at the time of subscription and for as long as the investor remains a shareholder of the share class.
- for trading to institutional undertakings for collective investment managed by KBC Asset Management NV or by another company associated with this management company and who pay a fee on the part of the assets invested in KBC UCIs.

If it appears that the shares of this class are held by persons other than those authorized, these shares will be converted at no cost (except taxes) into shares of the share class "Classic Shares".

<sup>1</sup> These are collective investment undertakings managed by KBC Asset Management NV or by another company associated with this management company.

<sup>2</sup> These include both professional investors as referred to in Annex A of the Royal Decree of June 3, 2007 laying down detailed rules transposing the Directive of 2004 on markets in financial instruments and legal persons who are not considered professional investors and who have asked to be registered in the register of eligible investors with the FSMA. Natural persons, as well as legal entities that are not part of eligible investors as defined above, do not have access to this share class.

**One-off fees and charges charged to the investor unless indicated otherwise, in the currency the sub-fund is denominated in or as a percentage of the net asset value per share**

# Information concerning the sub-fund Flanders

## 1. Basic details

---

### Name

Flanders

### Date of incorporation

28 May 1997

### Life

Unlimited

### Delegation of the management of the investment portfolio

There is no delegation of the management of the investment portfolio.

### Stock exchange listing

Not applicable.

## 2. Investment information

---

### Sub-fund's object

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

### Sub-fund's investment policy

#### *Permitted asset classes*

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

#### *Restrictions of the investment policy*

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

### Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. **Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.**

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

### Selected strategy

The assets are invested primarily in shares with a Flemish character where conditions are such as to allow accelerated economic growth in the short or medium term.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

### Transparency of adverse sustainability impacts

The sub-fund considers the principal adverse impacts of its investment decisions on sustainability factors ('PAI') as described by the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector ('SFDR')

The principal adverse impacts on sustainability factors are explicitly taken into account through the General exclusion policy. More information on the principal adverse impact indicators that are taken into account can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > General exclusion policy for conventional and Responsible Investing funds.

In addition, the principal adverse impacts on sustainability factors are implicitly taken into account through the Proxy Voting and Engagement Policy of KBC Asset Management NV (more information can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > Retrospective Proxy Voting - overview > Proxy Voting and Engagement Policy).

KBC Asset Management NV exercises the voting rights of the shares it manages in accordance with the Proxy Voting and Engagement Policy. Where appropriate, KBC Asset Management NV will engage in dialogue with the management of the companies concerned, if necessary before voting.

Information on the principal adverse impacts on sustainability factors can also be found in the annual report for this sub-fund.

### Benchmark information

The fund is actively managed without referring to any benchmark.

### Volatility of the net asset value

The volatility of the net asset value may be high due to the composition of the portfolio.

## 3. Risk

### Sub-fund's risk profile

Investors must take note of the specific risk factors set out below, the description of the risks given under the heading 'Information concerning the Bevek - F.Information on the risk profile of the UCITS', and the 'What are the risks and what could I get in return?' section of the key information document.

Summary table of risks assessed by the sub-fund:

| Risk type                 | Concise definition of the risk                                                                                                      |          | Explanation:                                                                |
|---------------------------|-------------------------------------------------------------------------------------------------------------------------------------|----------|-----------------------------------------------------------------------------|
| Market risk               | The risk that the entire market of an asset class will decline, thus affecting the prices and values of the assets in the portfolio | high     | the level of the risk reflects the volatility of the stock market.          |
| Credit risk               | The risk that an issuer or a counterparty will default                                                                              | low      |                                                                             |
| Settlement risk           | The risk that settlement of a transaction via a payment system will not take place as expected                                      | low      |                                                                             |
| Liquidity risk            | The risk that a position cannot be liquidated in a timely manner at a reasonable price                                              | low      |                                                                             |
| Exchange or currency risk | The risk that the value of an investment will be affected by changes in exchange rates                                              | none     |                                                                             |
| Custody risk              | The risk of loss of assets held in custody with a custodian or sub-custodian                                                        | low      |                                                                             |
| Concentration risk        | The risk relating to a large concentration of investments in specific assets or in specific markets                                 | high     | there is a concentration of the investments in shares of Flemish companies. |
| Performance risk          | Risks to return                                                                                                                     | high     | the level of the risk reflects the volatility of the stock market.          |
| Capital risk              | Risks to capital                                                                                                                    | moderate | There is no capital protection.                                             |
| Flexibility risk          | Inflexibility both within the product and constraints on switching to other providers                                               | none     |                                                                             |
| Inflation risk            | Risk of inflation                                                                                                                   | low      |                                                                             |

### Risk profile of the typical investor

Profile of the typical investor for which the sub-fund has been designed : Highly dynamic profile.

The risk profile mentioned per sub-fund has been determined from the point of view of an investor in the euro area and may differ from that of an investor in other currency zones. More information on the risk profiles can be obtained at [www.kbc.be/riskprofile](http://www.kbc.be/riskprofile).

## 4. Information concerning the trading of shares

### How to buy and sell shares and switch between sub-funds

If it turns out that shares are being held by persons other than those permitted to hold them, the Company may, in accordance with article 8.2 of the articles of association, and without charge (except any taxes due and any charges to cover the cost of realising the assets), redeem those shares.

| Cut-off time for receiving orders at the financial service providers in Belgium <sup>(1)</sup><br><br>Date of published net asset value | Date the net asset value is calculated | Actual values used                                                                                                                                                                                                                                     | Date of payment or repayment of the orders |
|-----------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------|
| <b>D</b><br>(every banking day <sup>(2)</sup> at 2 pm CET)<br>also referred to as 'Dealing Day'                                         | <b>D+1 banking day</b>                 | <b>D</b> if maximum 20% of the actual values are already known on D<br>(every banking day <sup>(2)</sup> at 2 pm CET)<br><br><b>D+1</b> if more than 20% of the actual values are already known on D<br>(every banking day <sup>(2)</sup> at 2 pm CET) | <b>D+3 banking days</b>                    |

<sup>(1)</sup> The cut-off time for receiving orders stated above applies to orders investors place directly with the financial services providers in Belgium.

If an investor places an order with a financial institution other than the financial service providers in Belgium, he/she must find out from that institution what cut-off time (time + date) applies to the order he/she wishes to place so that the institution in question can take the necessary action to ensure that the order reaches the financial service providers in Belgium before 2 pm CET on day D in order to qualify as an order of day D.

<sup>(2)</sup> with the exception of banking days on which one or more markets on which more than 20% of the sub-fund's assets are listed are closed or if transactions are suspended or restricted.

### Calculation of the net asset value

The net asset value is calculated daily, as described above, except on days on which no shares may be issued or redeemed. Swing pricing may be applied as described in the 'Information concerning the Bevek – N. Liquidity management tools' section.

### Publication of the net asset value

The 'Information concerning the Bevek – I. Additional information – Publication of the net asset value' section specifies where the result of the calculation of the net asset value can be viewed.

## 5. Types of shares and fees and charges

---

Shares may be in registered or book-entry form, as the shareholder chooses. No certificates representing the registered shares are issued. Instead, confirmation is supplied of entry in the register of shareholders.

### Dividend payment

After the close of the financial year, the General Meeting determines the portion of the result, which, within the limitations imposed by the Law of 3 August 2012 relative to undertakings for collective investment complying with the conditions of Directive 2009/65/EC and the undertakings for investment in receivables, is to be paid to the holders of distribution shares.

The holders of capitalisation shares are not entitled to receive a dividend. The portion of the annual net income accruing to them is capitalised in favour of these shares.

The shareholders will receive payment within six months of the close of the financial year via institutions designated for this purpose by the General Meeting.

The General Meeting may decide to proceed to interim payments in accordance with the provisions of the law.

The Board of Directors may, in accordance with the provisions laid down in the articles of association and within the limits of the law, decide to pay out interim dividends.

The information on the type and/or class of shares and the fees and charges associated with them is set out below by type and/or share class.

# Flanders - Institutional Discretionary Shares

**This share class is reserved**

- for trading to persons who acquire and hold the units on the basis of a discretionary management agreement with KBC Asset Management NV (except a discretionary management agreement 'Core Satellite'), or with another company associated with KBC Asset Management NV and who pay a discretionary management fee on the part of their portfolio invested in KBC UCIs<sup>1</sup>. In addition, these persons must have the status of 'eligible investors', acting on its own behalf, as within the meaning of Article 5 § 3/1 of the Law of 3 August 2012 relative to undertakings for collective investment complying with the conditions of Directive 2009/65/EC and the undertakings for investment in receivables<sup>2</sup>. The investor must comply with these conditions at the time of subscription and for as long as the investor remains a shareholder of the share class.
- for trading to institutional undertakings for collective investment managed by KBC Asset Management NV or by another company associated with this management company and who pay a fee on the part of the assets invested in KBC UCIs.

If it appears that the shares of this class are held by persons other than those authorized, these shares will be converted at no cost (except taxes) into shares of the share class "Classic Shares".

---

### Sub-fund's object

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

### Sub-fund's investment policy

#### *Permitted asset classes*

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

#### *Restrictions of the investment policy*

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

## Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. **Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.**

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

## Selected strategy

The sub-fund invests primarily in shares of companies which, according to the manager, fit within the theme of 'structural growth'. The manager therefore mainly selects shares of companies with relatively high turnover growth, rising profit margins, high returns on investment capital or high free cash flows. It invests in a worldwide selection of shares.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

## Transparency of adverse sustainability impacts

The sub-fund considers the principal adverse impacts of its investment decisions on sustainability factors ('PAI') as described by the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector ('SFDR')

The principal adverse impacts on sustainability factors are explicitly taken into account through the General exclusion policy. More information on the principal adverse impact indicators that are taken into account can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > General exclusion policy for conventional and Responsible Investing funds.

In addition, the principal adverse impacts on sustainability factors are implicitly taken into account through the Proxy Voting and Engagement Policy of KBC Asset Management NV (more information can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > Retrospective Proxy Voting - overview > Proxy Voting and Engagement Policy).

KBC Asset Management NV exercises the voting rights of the shares it manages in accordance with the Proxy Voting and Engagement Policy. Where appropriate, KBC Asset Management NV will engage in dialogue with the management of the companies concerned, if necessary before voting.

Information on the principal adverse impacts on sustainability factors can also be found in the annual report for this sub-fund.

## Benchmark information

The fund is actively managed without referring to any benchmark.

## Volatility of the net asset value

The volatility of the net asset value may be high due to the composition of the portfolio.

## 3. Risk

### Sub-fund's risk profile

Investors must take note of the specific risk factors set out below, the description of the risks given under the heading 'Information concerning the Bevek - F.Information on the risk profile of the UCITS', and the 'What are the risks and what could I get in return?' section of the key information document.

Summary table of risks assessed by the sub-fund:

| Risk type                 | Concise definition of the risk                                                                                                      |          | Explanation:                                                                                                                                                                                                      |
|---------------------------|-------------------------------------------------------------------------------------------------------------------------------------|----------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Market risk               | The risk that the entire market of an asset class will decline, thus affecting the prices and values of the assets in the portfolio | high     | the level of the risk reflects the volatility of the stock market.                                                                                                                                                |
| Credit risk               | The risk that an issuer or a counterparty will default                                                                              | low      |                                                                                                                                                                                                                   |
| Settlement risk           | The risk that settlement of a transaction via a payment system will not take place as expected                                      | low      |                                                                                                                                                                                                                   |
| Liquidity risk            | The risk that a position cannot be liquidated in a timely manner at a reasonable price                                              | low      |                                                                                                                                                                                                                   |
| Exchange or currency risk | The risk that the value of an investment will be affected by changes in exchange rates                                              | high     | since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates. |
| Custody risk              | The risk of loss of assets held in custody with a custodian or sub-custodian                                                        | low      |                                                                                                                                                                                                                   |
| Concentration risk        | The risk relating to a large concentration of investments in specific assets or in specific markets                                 | moderate | there is a concentration of the investments in shares of companies with relatively high growth in revenues, an increasing profit margin, a high return on invested capital or a high free cash flow.              |
| Performance risk          | Risks to return                                                                                                                     | high     | the level of the risk reflects the volatility of the stock market.                                                                                                                                                |
| Capital risk              | Risks to capital                                                                                                                    | moderate | There is no capital protection.                                                                                                                                                                                   |
| Flexibility risk          | Inflexibility both within the product and constraints on switching to other providers                                               | low      |                                                                                                                                                                                                                   |
| Inflation risk            | Risk of inflation                                                                                                                   | low      |                                                                                                                                                                                                                   |
| Environmental factors     | Uncertainty regarding the immutability of environmental factors, such as the tax regime                                             | low      |                                                                                                                                                                                                                   |

### Risk profile of the typical investor

Profile of the typical investor for which the sub-fund has been designed : Highly dynamic profile.

The risk profile mentioned per sub-fund has been determined from the point of view of an investor in the euro area and may differ from that of an investor in other currency zones. More information on the risk profiles can be obtained at [www.kbc.be/riskprofile](http://www.kbc.be/riskprofile).

## 4. Information concerning the trading of shares

### How to buy and sell shares and switch between sub-funds

If it turns out that shares are being held by persons other than those permitted to hold them, the Company may, in accordance with article 8.2 of the articles of association, and without charge (except any taxes due and any charges to cover the cost of realising the assets), redeem those shares.

| Cut-off time for receiving orders at the financial service providers in Belgium <sup>(1)</sup><br><br>Date of published net asset value | Date the net asset value is calculated | Actual values used                                                                                                                                                                                                                                           | Date of payment or repayment of the orders |
|-----------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------|
| <b>D</b><br>(every banking day <sup>(2)</sup><br>at 2 pm CET)<br>also referred to as 'Dealing Day'                                      | <b>D+1 banking day</b>                 | <b>D</b> if maximum 20% of the actual values are already known on D<br>(every banking day <sup>(2)</sup><br>at 2 pm CET)<br><br><b>D+1</b> if more than 20% of the actual values are already known on D<br>(every banking day <sup>(2)</sup><br>at 2 pm CET) | <b>D+3 banking days</b>                    |

<sup>(1)</sup> The cut-off time for receiving orders stated above applies to orders investors place directly with the financial services providers in Belgium.

If an investor places an order with a financial institution other than the financial service providers in Belgium, he/she must find out from that institution what cut-off time (time + date) applies to the order he/she wishes to place so that the institution in question can take the necessary action to ensure that the order reaches the financial service providers in Belgium before 2 pm CET on day D in order to qualify as an order of day D.

<sup>(2)</sup> with the exception of banking days on which one or more markets on which more than 20% of the sub-fund's assets are listed are closed or if transactions are suspended or restricted.

### Calculation of the net asset value

The net asset value is calculated daily, as described above, except on days on which no shares may be issued or redeemed. Swing pricing may be applied as described in the 'Information concerning the Bevek – N. Liquidity management tools' section.

### Publication of the net asset value

The 'Information concerning the Bevek – I. Additional information – Publication of the net asset value' section specifies where the result of the calculation of the net asset value can be viewed.

If the profitability of the sub-fund is jeopardised due to a limited number of subscriptions during the initial subscription period (less than 5 000 000 euros), the Board of Directors of the Bevek may decide to refuse the orders placed during the initial subscription period and not to proceed with the commercialisation of the sub-fund.

## 5. Types of shares and fees and charges

---

Shares may be in registered or book-entry form, as the shareholder chooses. No certificates representing the registered shares are issued. Instead, confirmation is supplied of entry in the register of shareholders.

### Dividend payment

After the close of the financial year, the General Meeting determines the portion of the result, which, within the limitations imposed by the Law of 3 August 2012 relative to undertakings for collective investment complying with the conditions of Directive 2009/65/EC and the undertakings for investment in receivables, is to be paid to the holders of distribution shares.

The holders of capitalisation shares are not entitled to receive a dividend. The portion of the annual net income accruing to them is capitalised in favour of these shares.

The shareholders will receive payment within six months of the close of the financial year via institutions designated for this purpose by the General Meeting.

The General Meeting may decide to proceed to interim payments in accordance with the provisions of the law.

The Board of Directors may, in accordance with the provisions laid down in the articles of association and within the limits of the law, decide to pay out interim dividends.

The information on the type and/or class of shares and the fees and charges associated with them is set out below by type and/or share class.

# Fundamental Opportunities - Discretionary Wealth Management, Wealth & Institutional Office Shares

There is a minimum subscription value of 10 000 000 EUR (both during as well as after the initial subscription period).

This share class is reserved for trading to investors who are clients of KBC Bank's Wealth Management segment (criteria: [www.kbc.be/wealth](http://www.kbc.be/wealth)), CBC Banque's Wealth Centre segment (criteria: [www.cbc.be/centre-wealth](http://www.cbc.be/centre-wealth)) or CBC Banque's Institutional Centre segment (criteria: [www.cbc.be/centre-institutionnels](http://www.cbc.be/centre-institutionnels)) and who acquire and hold the units pursuant to a discretionary management agreement with KBC Asset Management NV, or with another company affiliated with KBC Asset Management NV. Investors must meet these conditions at the time of subscription and for as long as they are shareholders of the share class. If it appears that shares of this class are held by persons other than those admitted, a conversion will be made, free of charge (subject to any taxes), of these shares into shares of the "Classic Shares" share class.

# Fundamental Opportunities - Discretionary Wealth Shares

There is a minimum subscription value of 1000000 EUR (both during as well as after the initial subscription period).

This share class is reserved for trading to persons who acquire and hold the units on the basis of a discretionary management contract with KBC Asset Management NV or with another company associated with KBC Asset Management NV. The investor must have this status at the moment of subscription and for as long as the investor remains a shareholder of the share class. If it appears that the shares of this class of shares are held by persons other than authorized, these shares will be converted at no cost (except taxes) into shares of the share class 'Classic Shares'.

# Fundamental Opportunities - Institutional Discretionary Shares

## This share class is reserved

- for trading to persons who acquire and hold the units on the basis of a discretionary management agreement with KBC Asset Management NV (except a discretionary management agreement 'Core Satellite'), or with another company associated with KBC Asset Management NV and who pay a discretionary management fee on the part of their portfolio invested in KBC UCIs<sup>1</sup>. In addition, these persons must have the status of 'eligible investors', acting on its own behalf, as within the meaning of Article 5 § 3/1 of the Law of 3 August 2012 relative to undertakings for collective investment complying with the conditions of Directive 2009/65/EC and the undertakings for investment in receivables<sup>2</sup>. The investor must comply with these conditions at the time of subscription and for as long as the investor remains a shareholder of the share class.
- for trading to institutional undertakings for collective investment managed by KBC Asset Management NV or by another company associated with this management company and who pay a fee on the part of the assets invested in KBC UCIs.

If it appears that the shares of this class are held by persons other than those authorized, these shares will be converted at no cost (except taxes) into shares of the share class "Classic Shares".

<sup>1</sup> These are collective investment undertakings managed by KBC Asset Management NV or by another company associated with this management company.

<sup>2</sup> These include both professional investors as referred to in Annex A of the Royal Decree of June 3, 2007 laying down detailed rules transposing the Directive of 2004/39/EC in financial instruments and legal persons who are not considered professional investors and who have asked to be registered in the register of eligible investors with the FSMA. Natural persons, as well as legal entities that are not part of eligible investors as defined above, do not have access to this share class.

**One-off fees and charges charged to the investor unless indicated otherwise, in the currency the sub-fund is denominated in or as a percentage of the net asset value per share**

# Information concerning the sub-fund Fundamental Opportunities DBI-RDT

## 1. Basic details

---

### Name

Fundamental Opportunities DBI-RDT

### Date of incorporation

15 February 2021

### Life

Unlimited

### Delegation of the management of the investment portfolio

There is no delegation of the management of the investment portfolio.

### Stock exchange listing

Not applicable.

## 2. Investment information

---

### Sub-fund's object

The main object of this sub-fund is to generate the highest possible return for its shareholders by investing directly in transferable securities. This is reflected in its pursuit of capital gains and income. To that end, the assets are invested primarily in shares.

### Sub-fund's investment policy

#### *Permitted asset classes*

The sub-fund may invest in securities, deposits, liquid assets and all other instruments in so far as permitted by the applicable laws and regulations and consistent with the object referred to above.

#### *Restrictions of the investment policy*

The investment policy will be implemented within the limits set by law and regulations.  
The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

#### *Selected strategy*

The sub-fund invests primarily in shares of companies that, according to the fund manager, fit within the theme of 'structural growth'. The fund manager therefore mainly selects shares of companies with relatively high turnover growth, rising profit margins, high returns on investment capital or high free cash flows. Investments are made in a worldwide selection of shares. The sub-fund invests at least 50% of its assets in shares of which the dividends and capital gains qualify for the 'dividends received deduction' (DRD) system. However, under normal circumstances, the sub-fund will aim to invest between 70% and 100% in shares of which the dividends and capital gains qualify for the DRD system.

This means that not all of the share portfolio may be invested in shares of which the capital gains and dividends qualify for the DRD system. As a result, it is conceivable that the income distributed to the shareholders by the sub-fund may not qualify in full for the dividends received deduction.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

#### *Transparency of adverse sustainability impacts*

The sub-fund considers the principal adverse impacts of its investment decisions on sustainability factors ('PAI') as described by the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector ('SFDR')

The principal adverse impacts on sustainability factors are explicitly taken into account through the General exclusion policy. More information on the principal adverse impact indicators that are taken into account can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > General exclusion policy for conventional and Responsible Investing funds.

In addition, the principal adverse impacts on sustainability factors are implicitly taken into account through the Proxy Voting and Engagement Policy of KBC Asset Management NV (more information can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > Retrospective Proxy Voting - overview > Proxy Voting and Engagement Policy).

KBC Asset Management NV exercises the voting rights of the shares it manages in accordance with the Proxy Voting and Engagement Policy. Where appropriate, KBC Asset Management NV will engage in dialogue with the management of the companies concerned, if necessary before voting.

Information on the principal adverse impacts on sustainability factors can also be found in the annual report for this sub-fund.

### **Benchmark information**

The fund is actively managed without referring to any benchmark.

### **Volatility of the net asset value**

**The volatility of the net asset value may be high due to the composition of the portfolio.**

## 3. Risk

### Sub-fund's risk profile

Investors must take note of the specific risk factors set out below, the description of the risks given under the heading 'Information concerning the Bevek - F.Information on the risk profile of the UCITS', and the 'What are the risks and what could I get in return?' section of the key information document.

Summary table of risks assessed by the sub-fund:

| Risk type                 | Concise definition of the risk                                                                                                      |          | Explanation:                                                                                                                                                                                                      |
|---------------------------|-------------------------------------------------------------------------------------------------------------------------------------|----------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Market risk               | The risk that the entire market of an asset class will decline, thus affecting the prices and values of the assets in the portfolio | high     | the level of the risk reflects the volatility of the stock market.                                                                                                                                                |
| Credit risk               | The risk that an issuer or a counterparty will default                                                                              | low      |                                                                                                                                                                                                                   |
| Settlement risk           | The risk that settlement of a transaction via a payment system will not take place as expected                                      | low      |                                                                                                                                                                                                                   |
| Liquidity risk            | The risk that a position cannot be liquidated in a timely manner at a reasonable price                                              | low      |                                                                                                                                                                                                                   |
| Exchange or currency risk | The risk that the value of an investment will be affected by changes in exchange rates                                              | high     | since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates. |
| Custody risk              | The risk of loss of assets held in custody with a custodian or sub-custodian                                                        | low      |                                                                                                                                                                                                                   |
| Concentration risk        | The risk relating to a large concentration of investments in specific assets or in specific markets                                 | moderate | there is a concentration of the investments in shares of companies with relatively high growth in revenues, an increasing profit margin, a high return on invested capital or a high free cash flow.              |
| Performance risk          | Risks to return                                                                                                                     | high     | the level of the risk reflects the volatility of the stock market.                                                                                                                                                |
| Capital risk              | Risks to capital                                                                                                                    | moderate | There is no capital protection.                                                                                                                                                                                   |
| Flexibility risk          | Inflexibility both within the product and constraints on switching to other providers                                               | low      |                                                                                                                                                                                                                   |
| Inflation risk            | Risk of inflation                                                                                                                   | low      |                                                                                                                                                                                                                   |
| Environmental factors     | Uncertainty regarding the immutability of environmental factors, such as the tax regime                                             | low      |                                                                                                                                                                                                                   |

### Risk profile of the typical investor

Profile of the typical investor for which the sub-fund has been designed : Highly dynamic profile.

The risk profile mentioned per sub-fund has been determined from the point of view of an investor in the euro area and may differ from that of an investor in other currency zones. More information on the risk profiles can be obtained at [www.kbc.be/riskprofile](http://www.kbc.be/riskprofile).

## 4. Information concerning the trading of shares

### How to buy and sell shares and switch between sub-funds

If it turns out that shares are being held by persons other than those permitted to hold them, the Company may, in accordance with article 8.2 of the articles of association, and without charge (except any taxes due and any charges to cover the cost of realising the assets), redeem those shares.

| Cut-off time for receiving orders at the financial service providers in Belgium <sup>(1)</sup><br><br>Date of published net asset value | Date the net asset value is calculated | Actual values used                                                                                                                                                                                                                                     | Date of payment or repayment of the orders |
|-----------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------|
| <b>D</b><br>(every banking day <sup>(2)</sup> at 2 pm CET)<br>also referred to as 'Dealing Day'                                         | <b>D+1 banking day</b>                 | <b>D</b> if maximum 20% of the actual values are already known on D<br>(every banking day <sup>(2)</sup> at 2 pm CET)<br><br><b>D+1</b> if more than 20% of the actual values are already known on D<br>(every banking day <sup>(2)</sup> at 2 pm CET) | <b>D+3 banking days</b>                    |

<sup>(1)</sup> The cut-off time for receiving orders stated above applies to orders investors place directly with the financial services providers in Belgium.

If an investor places an order with a financial institution other than the financial service providers in Belgium, he/she must find out from that institution what cut-off time (time + date) applies to the order he/she wishes to place so that the institution in question can take the necessary action to ensure that the order reaches the financial service providers in Belgium before 2 pm CET on day D in order to qualify as an order of day D.

<sup>(2)</sup> with the exception of banking days on which one or more markets on which more than 20% of the sub-fund's assets are listed are closed or if transactions are suspended or restricted.

### Calculation of the net asset value

The net asset value is calculated daily, as described above, except on days on which no shares may be issued or redeemed. Swing pricing may be applied as described in the 'Information concerning the Bevek – N. Liquidity management tools' section.

### Publication of the net asset value

The 'Information concerning the Bevek – I. Additional information – Publication of the net asset value' section specifies where the result of the calculation of the net asset value can be viewed.

## 5. Types of shares and fees and charges

---

Only distribution shares are issued.

Shares may be in registered or book-entry form, as the shareholder chooses. No certificates representing the registered shares are issued. Instead, confirmation is supplied of entry in the register of shareholders.

### Dividend payment

After the close of the financial year, the General Meeting determines the portion of the result, which, within the limitations imposed by the Law of 3 August 2012 relative to undertakings for collective investment complying with the conditions of Directive 2009/65/EC and the undertakings for investment in receivables, is to be paid to its shareholders.

Shareholders will receive payment within six months of the close of the financial year via institutions designated for this purpose by the General Meeting.

The General Meeting may decide to switch to interim payments in accordance with the provisions of the law.

The Board of Directors may, in accordance with the provisions laid down in the articles of association and within the limits of the law, decide to pay out interim dividends.

### *Taxation of dividends paid to shareholders liable for Belgian corporation tax*

The sub-fund aims, within the scope of the applicable legislation to enable its shareholders to qualify for the dividend received deduction (DRD) system, as regulated by Articles 202–205 of the Income Tax Code 1992 (ITC 92), in respect of the dividends they receive from the sub-fund.

The sub-fund's articles of association provide to this end for an annual payout of at least 90% of the income it receives itself, this however after deduction of remuneration, commissions and charges.

The dividends paid by the sub-fund (including the 'redemption bonuses' paid to investors under Articles 18 and 186 ITC 92 in respect of purchase by the sub-fund of its own shares) qualify for the dividend received deduction in respect of the shareholder in so far as the underlying income of the sub-fund itself is derived from so-called 'good' income. 'Good' income refers either to dividends that meet the deduction criteria set out in Article 203(1.1–1.4) ITC 92 or to capital gains realised on shares qualifying for exemption under Article 192(1) ITC 92. In so far as the dividends received qualify for the DRD, they will be deducted from the taxable profit.

The DRD system applies to the following shareholders/investors: (1) domestic companies subject to corporation tax and (2) foreign companies with a permanent establishment in Belgium, which are subject to non-residents' corporation tax and in so far as the received dividends may be allocated to the Belgian permanent establishment.

The information on the type and/or class of shares and the fees and charges associated with them is set out below by type and/or share class.

# Fundamental Opportunities DBI-RDT - Institutional Discretionary Shares

**This share class is reserved**

- for trading to persons who acquire and hold the units on the basis of a discretionary management agreement with KBC Asset Management NV (except a discretionary management agreement 'Core Satellite'), or with another company associated with KBC Asset Management NV and who pay a discretionary management fee on the part of their portfolio invested in KBC UCIs<sup>1</sup>. In addition, these persons must have the status of 'eligible investors', acting on its own behalf, as within the meaning of Article 5 § 3/1 of the Law of 3 August 2012 relative to undertakings for collective investment complying with the conditions of Directive 2009/65/EC and the undertakings for investment in receivables<sup>2</sup>. The investor must comply with these conditions at the time of subscription and for as long as the investor remains a shareholder of the share class.
- for trading to institutional undertakings for collective investment managed by KBC Asset Management NV or by another company associated with this management company and who pay a fee on the part of the assets invested in KBC UCIs.

If it appears that the shares of this class are held by persons other than those authorized, these shares will be converted at no cost (except taxes) into shares of the share class "Classic Shares".

# Information concerning the sub-fund Global Value DBI-RDT Responsible Investing

## 1. Basic details

---

### Name

Global Value DBI-RDT Responsible Investing

### Date of incorporation

8 October 2024

### Life

Unlimited

### Delegation of the management of the investment portfolio

There is no delegation of the management of the investment portfolio.

### Stock exchange listing

Not applicable.

## 2. Investment information

---

### Sub-fund's object

The objective is to generate a high return with as little fluctuations as possible in the value of the sub-fund. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested primarily in shares.

### Sub-fund's investment policy

#### Permitted asset classes

The sub-fund may invest in securities, deposits, liquid assets and all other instruments in so far as permitted by the applicable laws and regulations and consistent with the object referred to above.

#### Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

#### Selected strategy

The sub-fund invests primarily in shares of companies that fit within the 'Structural value' theme. Companies within this theme include those offering shares with high dividend yields and/or share buyback policies. Consideration is also given to companies for which a relatively low valuation (expressed, for example, by a high book-to-market ratio) could indicate potential for short- or medium-term capital gain on the investment. The book-to-market ratio is the result of the carrying value (calculated as the value of assets less liabilities) of a company divided by its market value (calculated as the number of shares outstanding multiplied by the price per share). Investments are made in a worldwide selection of shares.

The sub-fund invests at least 50% of its assets in shares of which the dividends and capital gains qualify for the 'dividends received deduction' (DRD) system. However, under normal circumstances, the sub-fund will aim to invest between 70% and 100% in shares of which the dividends and capital gains qualify for the DRD system.

This means that not all of the share portfolio may be invested in shares of which the capital gains and dividends qualify for the DRD system. As a result, it is conceivable that the income distributed to the shareholders by the sub-fund may not qualify in full for the dividends received deduction.

## Information related to Responsible Investing

Within the above limits, the sub-fund pursues responsible investment objectives based on a dualistic approach: a negative screening and a positive selection methodology.

KBC Asset Management NV has a team of specialist researchers responsible for this dualistic approach. They are assisted by an independent advisory board (the “**Responsible Investing Advisory Board**”) comprised of up to twelve persons, who are not affiliated to KBC Asset Management NV, and whose sole responsibility is to supervise the dualistic approach and activities of the specialist researchers. The secretariat of the advisory board is handled by a representative of KBC Asset Management NV. Moreover, KBC Asset Management NV works with data suppliers with expertise in Responsible Investing that provide data to the specialized researchers, who process and complete the data with publicly available information (including annual reports, press publications, etc.).

The sub-fund promotes a combination of environmental and/or social characteristics and, even though it does not have sustainable investments as an objective, it shall invest a minimum proportion of its assets in economic activities that contribute to the achievement of environmental or social objectives (i.e. ‘sustainable investments’).

The companies in which it invests must follow good governance practices.

The sub-fund is compliant with the transparency obligations of article 8(1) of Regulation (EU) 2019/2088 of the European Parliament and of the council of 27 November 2019 on sustainability-related disclosures in the financial services sector (‘SFDR’). More information on how the sub-fund promotes environmental and/or social characteristics can be found in the ‘Annex for KBC Equity Fund Global Value DBI-RDT Responsible Investing’ to the prospectus. This annex specifically covers the pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852.

In addition, the exclusions set out in Article 12(1)(a) to (g) of Delegated Regulation (EU) 2020/1818 (“Exclusions for Paris Agreement-aligned EU benchmarks”) are respected by this sub-fund.

The sub-fund complies with the European Securities and Markets Authority (ESMA) guidelines on fund names using ESG or sustainability-related terms.

### Negative screening

In practical terms the end result of this negative screening procedure is that the sub-fund excludes companies in advance from the Responsible Investment universe which fall foul of the exclusion policy available on [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > Exclusion policy for Responsible Investing funds.

The application of these policies means that:

- companies involved in certain activities are excluded from the sub-fund's investment universe. A distinction can be made between companies that are excluded if they exceed a certain turnover threshold in relation to specific activities, such as conventional weapons, tobacco, gambling or adult entertainment, and those that are excluded outright because they are involved in specific activities, such as controversial weapons, agricultural commodities or the mining of thermal coal, among others.
- The sub-fund may nevertheless invest in companies involved in conventional weapons and/or nuclear weapons that exceed certain turnover thresholds, provided they are included on the whitelist as specified in the policy. The whitelist is a list drawn up by KBC Group and includes companies involved in conventional weapons and/or nuclear weapons, but which are nevertheless deemed acceptable as investments within funds that invest responsibly, taking into account factors such as the proportion of arms sales to non-NATO countries and a possible involvement in human rights controversies related to armed conflict.

This screening also ensures that companies who seriously violate fundamental principles of environmental protection, social responsibility and good governance, among others, are excluded from the sub-fund's investment universe.

More information regarding the specific exclusions can also be found in the “Annex for KBC Equity Fund Global Value DBI-RDT Responsible Investing” to the prospectus.

These negative screening principles are not exhaustive and may be adapted from time to time under the supervision of the Responsible Investing Advisory Board.

### Positive selection methodology

Within the defined investment universe and other limits described above, the responsible investment objectives of the sub-fund are the following:

- (1) promote the integration of sustainability into the policy decisions of companies by preferring companies with a better **ESG risk score**, where ESG stands for ‘Environmental, Social and Governance’, and
- (2) promote climate change mitigation, by preferring companies with lower **Greenhouse Gas Intensity**, with the objective of meeting a predetermined Greenhouse Gas intensity target;
- (3) support sustainable development, through ‘sustainable investments’ in accordance with art. 2(17) SFDR. Sustainable investments will consist of investments in companies contributing to the achievement of the **UN Sustainable Development Goals** (plus instruments awarded the ‘sustainable development’ label by KBC Asset Management NV on the advice of the Responsible Investing Advisory Board).

More information on the investment policy for Responsible Investing funds is available at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > Investment policy for Responsible Investing funds.

### **(1) ESG-risk score**

The contribution to the integration of sustainability into policy decisions of the companies is measured based on an ESG-risk score. This score represents the aggregated performance assessment of a given company against a series of ESG criteria which are grounded to the extent possible against objective measures. The main factors underpinning the ESG criteria are:

- respect for the environment (e.g., reduction in greenhouse gas emissions);
- attention to society (e.g., employee working conditions); and
- corporate governance (e.g., independence and diversity of the board of directors).

At least 90% of the corporate investments in the portfolio, as measured by assets under management, must have an ESG risk score. The ESG risk score for companies is an ESG risk score supplied by a data provider, and based on internal research as well.

These lists are not exhaustive and may be changed under the supervision of the Responsible Investing Advisory Board.

To achieve this objective, the ESG-risk score of the portfolio for companies is compared to following benchmark: MSCI World - Net Return index.

To calculate the ESG-risk score at portfolio level, the weighted average of the ESG (risk) scores of the positions in the sub-fund are taken into account. Technical items such as cash and derivatives are not taken into account and also companies or countries for which no data is available are left out. The weights used in the calculation depend on the size of the positions in the sub-fund, rescaled for these items.

More information on the ESG-risk score and the concrete goals of the sub-fund can be found in the 'Annex for KBC Equity Fund Global Value DBI-RDT Responsible Investing' to the prospectus.

The targets can be revised upwards or downwards.

### **(2) Greenhouse Gas Intensity**

The objective to promote climate change mitigation, by favoring lower greenhouse gas intensity companies, with the goal of meeting a predetermined greenhouse gas intensity target covers at least 90% of the portfolio. The objective does not apply to companies for which data is not available.

The contribution of companies to climate change mitigation is measured based on their greenhouse gas intensity. Greenhouse gas intensity is defined as absolute greenhouse gas emissions (in tonnes CO<sub>2</sub> equivalent), divided by revenues (in mln USD).

The sub-fund's target in terms of greenhouse gas intensity is assessed on two targets whereby the most strict of the two will determine the target applied: 15% better than the benchmark MSCI World - Net Return index and a reduction of 50% by 2030 compared to the benchmark MSCI World - Net Return index in 2019.

More information on Greenhouse Gas Intensity and the concrete goals of the sub-fund can be found in the 'Annex for KBC Equity Fund Global Value DBI-RDT Responsible Investing' to the prospectus.

The targets may be revised upwards or downwards.

### **(3) UN Sustainable Development Goals**

To support sustainable development, the sub-fund commits to invest a minimum proportion of the portfolio in companies that contribute to the UN Sustainable Development Goals. The UN Sustainable Development Goals include both social and environmental objectives.

Companies are considered to contribute to sustainable development when at least 20% of the revenues are linked to the UN Sustainable Development Goals. The activities of the companies are assessed on multiple sustainable themes that can be linked to the UN Sustainable Development Goals.

Instruments of companies that meet these requirements are designated as "sustainable investments," according to Article 2(17) SFDR.

In addition, KBC Asset Management NV can award the "sustainable development" label to instruments, on the advice of the Responsible Investing Advisory Board. In that case, these investments shall also qualify as "sustainable investments," according to Article 2(17) SFDR.

More information about the methodology used to qualify investments as investments which contribute to the UN Sustainable Development Goals can be found in the 'Annex for KBC Equity Fund Global Value DBI-RDT Responsible Investing' to the prospectus.

## **Potential Exceptions**

It cannot be ruled out, however, that very limited investments may be made temporarily in assets that do not meet the above criteria. The reasons for this include the following:

- Developments as a result of which a company can no longer be regarded as eligible after purchase;
- Corporate events, such as a merger of one company with another, where the merged company can no longer be considered an eligible company based on the above criteria;
- Incorrect data as a result of which assets are invested (unintentionally and erroneously) in assets purchased when it should not have been eligible for the sub-fund;
- A planned update of the screening criteria as a result of which assets should be excluded from the sub-fund, but which the management company chooses to refrain from selling immediately in the best interest of the customer;
- External circumstances such as market movements and updates of external data can lead to investment solutions failing to achieve the abovementioned targets.

In these cases, the fund manager will replace the assets concerned with more appropriate assets as soon as possible, always taking into account the sole interest of the investor.

## **Taxonomy related information**

At the date of this prospectus, the sub-fund does not commit to invest a minimum proportion of its assets in environmentally sustainable economic activities which contribute to any of the environmental objectives set out in Article 9 of the Regulation (EU) 2020/852 of the European Parliament and of the Council of 18 June 2020 on the establishment of a framework to facilitate sustainable investment ('EU Taxonomy Framework'). The minimum proportion of investments in environmentally sustainable economic activities within the meaning of the EU Taxonomy Framework is 0%. This will be monitored on a regular basis and as soon as sufficiently reliable, timely and verifiable data from issuers or invested companies is available, the prospectus may be updated.

Non-financial companies are considered to contribute to sustainable development if at least 20% of sales are aligned to the EU Taxonomy Framework based on Trucost data. For companies in the financial sector, a different methodology applies. For credit institutions, the alignment with the EU Taxonomy Framework is based on the Green Asset Ratio, while for other financial companies the alignment with the EU Taxonomy Framework is based on the alignment of their investment portfolios. Instruments of companies that meet these requirements are referred to as "sustainable investments," according to art. 2(17) SFDR. More information on the percentage in the portfolio that was considered "sustainable investments with an environmental objective aligned with the EU Taxonomy Framework" based on this criterion during the reporting period, can be found in the annual reports for this sub-fund.

More information on the EU Taxonomy Framework can be found in the 'Annex for KBC Equity Fund Global Value DBI-RDT Responsible Investing' to the prospectus.

## **Transparency of adverse sustainability impacts**

The sub-fund considers the principal adverse impacts of its investment decisions on sustainability factors by taking into account the principal adverse impact indicators ('PAI'), as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability disclosure in the financial services sector ('SFDR').

The principal adverse impacts on sustainability factors are explicitly taken into account through the General exclusion policy for conventional and Responsible Investing funds and the exclusion policy for Responsible Investing funds. More information on the principal adverse impact indicators taken into account can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > General exclusion policy for conventional and Responsible Investing funds and [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > Exclusion policy for Responsible Investing funds.

In addition, the principal adverse impacts on sustainability factors are implicitly taken into account through the Proxy Voting and Engagement Policy of KBC Asset Management NV (more information can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > Retrospective Proxy Voting - overview > Proxy Voting and Engagement Policy).

More information on how the sub-fund aims to consider the principal adverse impacts on sustainability factors can also be found in the 'Annex for KBC Equity Fund Global Value DBI-RDT Responsible Investing' to the prospectus. A statement on how the sub-fund has considered the principal adverse impacts on sustainability factors during the reporting period can also be found in the annual reports for this sub-fund.

## **Benchmark information**

The fund is actively managed without referring to any benchmark.

The responsible character is guaranteed by the aforementioned Responsible Investing methodology.

## 3. Risk

### Sub-fund's risk profile

Investors must take note of the specific risk factors set out below, the description of the risks given under the heading 'Information concerning the Bevek - F.Information on the risk profile of the UCITS', and the 'What are the risks and what could I get in return?' section of the key information document.

Summary table of risks assessed by the sub-fund:

| Risk type                 | Concise definition of the risk                                                                                                      |          | Explanation:                                                                                                                                                                                                      |
|---------------------------|-------------------------------------------------------------------------------------------------------------------------------------|----------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Market risk               | The risk that the entire market of an asset class will decline, thus affecting the prices and values of the assets in the portfolio | high     | the level of the risk reflects the volatility of the stock market.                                                                                                                                                |
| Credit risk               | The risk that an issuer or a counterparty will default                                                                              | low      |                                                                                                                                                                                                                   |
| Settlement risk           | The risk that settlement of a transaction via a payment system will not take place as expected                                      | low      |                                                                                                                                                                                                                   |
| Liquidity risk            | The risk that a position cannot be liquidated in a timely manner at a reasonable price                                              | low      |                                                                                                                                                                                                                   |
| Exchange or currency risk | The risk that the value of an investment will be affected by changes in exchange rates                                              | high     | since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates. |
| Custody risk              | The risk of loss of assets held in custody with a custodian or sub-custodian                                                        | low      |                                                                                                                                                                                                                   |
| Concentration risk        | The risk relating to a large concentration of investments in specific assets or in specific markets                                 | low      |                                                                                                                                                                                                                   |
| Performance risk          | Risks to return                                                                                                                     | high     | the level of the risk reflects the volatility of the stock market.                                                                                                                                                |
| Capital risk              | Risks to capital                                                                                                                    | moderate | There is no capital protection.                                                                                                                                                                                   |
| Flexibility risk          | Inflexibility both within the product and constraints on switching to other providers                                               | low      |                                                                                                                                                                                                                   |
| Inflation risk            | Risk of inflation                                                                                                                   | low      |                                                                                                                                                                                                                   |
| Environmental factors     | Uncertainty regarding the immutability of environmental factors, such as the tax regime                                             | low      |                                                                                                                                                                                                                   |

### Risk profile of the typical investor

Profile of the typical investor for which the sub-fund has been designed : Highly dynamic profile.

The risk profile mentioned per sub-fund has been determined from the point of view of an investor in the euro area and may differ from that of an investor in other currency zones. More information on the risk profiles can be obtained at [www.kbc.be/riskprofile](http://www.kbc.be/riskprofile).

## 4. Information concerning the trading of shares

### How to buy and sell shares and switch between sub-funds

If it turns out that shares are being held by persons other than those permitted to hold them, the Company may, in accordance with article 8.2 of the articles of association, and without charge (except any taxes due and any charges to cover the cost of realising the assets), redeem those shares.

| Cut-off time for receiving orders at the financial service providers in Belgium <sup>(1)</sup><br><br>Date of published net asset value | Date the net asset value is calculated | Actual values used                                                                                                                                                                                                                                     | Date of payment or repayment of the orders |
|-----------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------|
| <b>D</b><br>(every banking day <sup>(2)</sup> at 2 pm CET)<br>also referred to as 'Dealing Day'                                         | <b>D+1 banking day</b>                 | <b>D</b> if maximum 20% of the actual values are already known on D<br>(every banking day <sup>(2)</sup> at 2 pm CET)<br><br><b>D+1</b> if more than 20% of the actual values are already known on D<br>(every banking day <sup>(2)</sup> at 2 pm CET) | <b>D+3 banking days</b>                    |

<sup>(1)</sup> The cut-off time for receiving orders stated above applies to orders investors place directly with the financial services providers in Belgium.

If an investor places an order with a financial institution other than the financial service providers in Belgium, he/she must find out from that institution what cut-off time (time + date) applies to the order he/she wishes to place so that the institution in question can take the necessary action to ensure that the order reaches the financial service providers in Belgium before 2 pm CET on day D in order to qualify as an order of day D.

<sup>(2)</sup> with the exception of banking days on which one or more markets on which more than 20% of the sub-fund's assets are listed are closed or if transactions are suspended or restricted.

### Calculation of the net asset value

The net asset value is calculated daily, as described above, except on days on which no shares may be issued or redeemed. Swing pricing may be applied as described in the 'Information concerning the Bevek – N. Liquidity management tools' section.

### Publication of the net asset value

The 'Information concerning the Bevek – I. Additional information – Publication of the net asset value' section specifies where the result of the calculation of the net asset value can be viewed.

If the profitability of the sub-fund is jeopardised due to a limited number of subscriptions during the initial subscription period (less than 5 000 000 euros), the Board of Directors of the Bevek may decide to refuse the orders placed during the initial subscription period and not to proceed with the commercialisation of the sub-fund.

## 5. Types of shares and fees and charges

---

Only distribution shares are issued.

Shares may be in registered or book-entry form, as the shareholder chooses. No certificates representing the registered shares are issued. Instead, confirmation is supplied of entry in the register of shareholders.

### Dividend payment

After the close of the financial year, the General Meeting determines the portion of the result, which, within the limitations imposed by the Law of 3 August 2012 relative to undertakings for collective investment complying with the conditions of Directive 2009/65/EC and the undertakings for investment in receivables, is to be paid to its shareholders.

Shareholders will receive payment within six months of the close of the financial year via institutions designated for this purpose by the General Meeting.

The General Meeting may decide to switch to interim payments in accordance with the provisions of the law.

The Board of Directors may, in accordance with the provisions laid down in the articles of association and within the limits of the law, decide to pay out interim dividends.

### *Taxation of dividends paid to shareholders liable for Belgian corporation tax*

The sub-fund aims, within the scope of the applicable legislation to enable its shareholders to qualify for the dividend received deduction (DRD) system, as regulated by Articles 202–205 of the Income Tax Code 1992 (ITC 92), in respect of the dividends they receive from the sub-fund.

The sub-fund's articles of association provide to this end for an annual payout of at least 90% of the income it receives itself, this however after deduction of remuneration, commissions and charges.

The dividends paid by the sub-fund (including the 'redemption bonuses' paid to investors under Articles 18 and 186 ITC 92 in respect of purchase by the sub-fund of its own shares) qualify for the dividend received deduction in respect of the shareholder in so far as the underlying income of the sub-fund itself is derived from so-called 'good' income. 'Good' income refers either to dividends that meet the deduction criteria set out in Article 203(1.1–1.4) ITC 92 or to capital gains realised on shares qualifying for exemption under Article 192(1) ITC 92. In so far as the dividends received qualify for the DRD, they will be deducted from the taxable profit.

The DRD system applies to the following shareholders/investors: (1) domestic companies subject to corporation tax and (2) foreign companies with a permanent establishment in Belgium, which are subject to non-residents' corporation tax and in so far as the received dividends may be allocated to the Belgian permanent establishment.

The information on the type and/or class of shares and the fees and charges associated with them is set out below by type and/or share class.

# Global Value DBI-RDT Responsible Investing - Discretionary Shares

This share class is reserved for trading to persons who acquire and hold the units on the basis of a discretionary management contract with KBC Asset Management NV or with another company associated with KBC Asset Management NV. The investor must have this status at the moment of subscription and for as long as the investor remains a shareholder of the share class. If it appears that the shares of this class of shares are held by persons other than authorized, these shares will be converted at no cost (except taxes) into shares of the share class 'Classic Shares'.

# Global Value DBI-RDT Responsible Investing - Institutional Discretionary Shares

**This share class is reserved**

- for trading to persons who acquire and hold the units on the basis of a discretionary management agreement with KBC Asset Management NV, or with another company associated with KBC Asset Management NV and who pay a discretionary management fee on the part of their portfolio invested in KBC UCIs<sup>1</sup>. In addition, these persons must have the status of 'eligible investors', acting on its own behalf, as within the meaning of Article 5 § 3/1 of the Law of 3 August 2012 relative to undertakings for collective investment complying with the conditions of Directive 2009/65/EC and the undertakings for investment in receivables<sup>2</sup>. The investor must comply with these conditions at the time of subscription and for as long as the investor remains a shareholder of the share class.
- for trading to institutional undertakings for collective investment managed by KBC Asset Management NV or by another company associated with this management company and who pay a fee on the part of the assets invested in KBC UCIs.

If it appears that the shares of this class are held by persons other than those authorized, these shares will be converted at no cost (except taxes) into shares of the share class "Classic Shares".

# Global Value DBI-RDT Responsible Investing - Institutional Shares

This share class is reserved for institutional investors, as defined in Article 5 § 3 of the Law of 3 August 2012 relative to undertakings for collective investment complying with the conditions of Directive 2009/65/EC and the undertakings for investment in receivables, and requires a minimum subscription of 10 000 EUR (both during as well as after the initial subscription period). The investor must have the status of institutional investor at the moment of subscription and for as long as the investor remains a shareholder of the share class. If it appears that the shares of this class of shares are held by persons other than authorized, these shares will be converted at no cost (except taxes) into shares of the share class 'Classic Shares'.

# Information concerning the sub-fund Global Value Responsible Investing

## 1. Basic details

---

### Name

Global Value Responsible Investing

### Date of incorporation

1 February 2023

### Life

Unlimited

### Delegation of the management of the investment portfolio

There is no delegation of the management of the investment portfolio.

### Stock exchange listing

Not applicable.

## 2. Investment information

---

### Sub-fund's object

The objective is to generate a high return with as little fluctuations as possible in the value of the sub-fund. To this end, the assets are invested either directly, or indirectly via correlated financial instruments, primarily in shares.

### Sub-fund's investment policy

#### *Permitted asset classes*

The sub-fund may invest in securities, money market instruments, units in collective investment undertakings, deposits, financial derivatives, liquid assets and all other instruments insofar as and to the extent permitted by the applicable laws and regulations and consistent with the object specified above.

The sub-fund will invest no more than 10% of its assets in units of other undertakings for collective investment.

#### *Restrictions of the investment policy*

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

## Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. **Consequently, there may be an impact on concentration risk.** Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

## Selected strategy

The sub-fund invests primarily in shares of companies that fit within the 'Structural value' theme. Companies within this theme include those offering shares with high dividend yields and/or share buyback policies. Consideration is also given to companies for which a relatively low valuation (expressed, for example, by a high book-to-market ratio) could indicate potential for short- or medium-term capital gain on the investment. The book-to-market ratio is the result of the carrying value (calculated as the value of assets less liabilities) of a company divided by its market value (calculated as the number of shares outstanding multiplied by the price per share). Investments are made in a worldwide selection of shares.

## Information related to Responsible Investing

Within the above limits, the sub-fund pursues responsible investment objectives based on a dualistic approach: a negative screening and a positive selection methodology.

KBC Asset Management NV has a team of specialist researchers responsible for this dualistic approach. They are assisted by an independent advisory board (the "**Responsible Investing Advisory Board**") comprised of up to twelve persons, who are not affiliated to KBC Asset Management NV, and whose sole responsibility is to supervise the dualistic approach and activities of the specialist researchers. The secretariat of the advisory board is handled by a representative of KBC Asset Management NV. Moreover, KBC Asset Management NV works with data suppliers with expertise in Responsible Investing that provide data to the specialized researchers, who process and complete the data with publicly available information (including annual reports, press publications, etc.).

The sub-fund promotes a combination of environmental and/or social characteristics and, even though it does not have sustainable investments as an objective, it shall invest a minimum proportion of its assets in economic activities that contribute to the achievement of environmental or social objectives (i.e. 'sustainable investments').

The companies in which it invests must follow good governance practices.

The sub-fund is compliant with the transparency obligations of article 8(1) of Regulation (EU) 2019/2088 of the European Parliament and of the council of 27 November 2019 on sustainability-related disclosures in the financial services sector ('SFDR'). More information on how the sub-fund promotes environmental and/or social characteristics can be found in the 'Annex for KBC Equity Fund Global Value Responsible Investing' to the prospectus. This annex specifically covers the pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852.

In addition, the exclusions set out in Article 12(1)(a) to (g) of Delegated Regulation (EU) 2020/1818 ("Exclusions for Paris Agreement-aligned EU benchmarks") are respected by this sub-fund.

The sub-fund complies with the European Securities and Markets Authority (ESMA) guidelines on fund names using ESG or sustainability-related terms.

### Negative screening

In practical terms the end result of this negative screening procedure is that the sub-fund excludes companies in advance from the Responsible Investment universe which fall foul of the exclusion policy available on [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > Exclusion policy for Responsible Investing funds.

The application of these policies means that:

- companies involved in certain activities are excluded from the sub-fund's investment universe. A distinction can be made between companies that are excluded if they exceed a certain turnover threshold in relation to specific activities, such as conventional weapons, tobacco, gambling or adult entertainment, and those that are excluded outright because they are involved in specific activities, such as controversial weapons, agricultural commodities or the mining of thermal coal, among others.
- The sub-fund may nevertheless invest in companies involved in conventional weapons and/or nuclear weapons that exceed certain turnover thresholds, provided they are included on the whitelist as specified in the policy. The whitelist is a list drawn up by KBC Group and includes companies involved in conventional weapons and/or nuclear weapons, but which are nevertheless deemed acceptable as investments within funds that invest responsibly, taking into account factors such as the proportion of arms sales to non-NATO countries and a possible involvement in human rights controversies related to armed conflict.

This screening also ensures that companies who seriously violate fundamental principles of environmental protection, social responsibility and good governance, among others, are excluded from the sub-fund's investment universe.

More information regarding the specific exclusions can also be found in the "Annex for KBC Equity Fund Global Value Responsible Investing" to the prospectus.

These negative screening principles are not exhaustive and may be adapted from time to time under the supervision of the Responsible Investing Advisory Board.

### Positive selection methodology

Within the defined investment universe and other limits described above, the responsible investment objectives of the sub-fund are the following:

- (1) promote the integration of sustainability into the policy decisions of companies by preferring companies with a better **ESG risk score**, where ESG stands for 'Environmental, Social and Governance', and
- (2) promote climate change mitigation, by preferring companies with lower **Greenhouse Gas Intensity**, with the objective of meeting a predetermined Greenhouse Gas intensity target;
- (3) support sustainable development, through 'sustainable investments' in accordance with art. 2(17) SFDR. Sustainable investments will consist of investments in companies contributing to the achievement of the **UN Sustainable Development Goals** (plus instruments awarded the 'sustainable development' label by KBC Asset Management NV on the advice of the Responsible Investing Advisory Board).

More information on the investment policy for Responsible Investing funds is available at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > Investment policy for Responsible Investing funds.

#### **(1) ESG-risk score**

The contribution to the integration of sustainability into policy decisions of the companies is measured based on an ESG-risk score. This score represents the aggregated performance assessment of a given company against a series of ESG criteria which are grounded to the extent possible against objective measures. The main factors underpinning the ESG criteria are:

- respect for the environment (e.g., reduction in greenhouse gas emissions);
- attention to society (e.g., employee working conditions); and
- corporate governance (e.g., independence and diversity of the board of directors).

At least 90% of the corporate investments in the portfolio, as measured by assets under management, must have an ESG risk score. The ESG risk score for companies is an ESG risk score supplied by a data provider, and based on internal research as well.

These lists are not exhaustive and may be changed under the supervision of the Responsible Investing Advisory Board.

To achieve this objective, the ESG-risk score of the portfolio for companies is compared to following benchmark: MSCI World - Net Return index.

To calculate the ESG-risk score at portfolio level, the weighted average of the ESG (risk) scores of the positions in the sub-fund are taken into account. Technical items such as cash and derivatives are not taken into account and also companies or countries for which no data is available are left out. The weights used in the calculation depend on the size of the positions in the sub-fund, rescaled for these items.

More information on the ESG-risk score and the concrete goals of the sub-fund can be found in the 'Annex for KBC Equity Fund Global Value Responsible Investing' to the prospectus.

The targets can be revised upwards or downwards.

#### **(2) Greenhouse Gas Intensity**

The objective to promote climate change mitigation, by favoring lower greenhouse gas intensity companies, with the goal of meeting a predetermined greenhouse gas intensity target covers at least 90% of the portfolio. The objective

does not apply to companies for which data is not available.

The contribution of companies to climate change mitigation is measured based on their greenhouse gas intensity. Greenhouse gas intensity is defined as absolute greenhouse gas emissions (in tonnes CO2 equivalent), divided by revenues (in mln USD).

The sub-fund's target in terms of greenhouse gas intensity is assessed on two targets whereby the most strict of the two will determine the target applied: 15% better than the benchmark MSCI World - Net Return index and a reduction of 50% by 2030 compared to the benchmark MSCI World - Net Return index in 2019.

More information on Greenhouse Gas Intensity and the concrete goals of the sub-fund can be found in the 'Annex for KBC Equity Fund Global Value Responsible Investing' to the prospectus.

The targets may be revised upwards or downwards.

### **(3) UN Sustainable Development Goals**

To support sustainable development, the sub-fund commits to invest a minimum proportion of the portfolio in companies that contribute to the UN Sustainable Development Goals. The UN Sustainable Development Goals include both social and environmental objectives.

Companies are considered to contribute to sustainable development when at least 20% of the revenues are linked to the UN Sustainable Development Goals. The activities of the companies are assessed on multiple sustainable themes that can be linked to the UN Sustainable Development Goals.

Instruments of companies that meet these requirements are designated as "sustainable investments," according to Article 2(17) SFDR.

In addition, KBC Asset Management NV can award the "sustainable development" label to instruments, on the advice of the Responsible Investing Advisory Board. In that case, these investments shall also qualify as "sustainable investments," according to Article 2(17) SFDR.

More information about the methodology used to qualify investments as investments which contribute to the UN Sustainable Development Goals can be found in the 'Annex for KBC Equity Fund Global Value Responsible Investing' to the prospectus.

### **Potential Exceptions**

It cannot be ruled out, however, that very limited investments may be made temporarily in assets that do not meet the above criteria. The reasons for this include the following:

- Developments as a result of which a company can no longer be regarded as eligible after purchase;
- Corporate events, such as a merger of one company with another, where the merged company can no longer be considered an eligible company based on the above criteria;
- Incorrect data as a result of which assets are invested (unintentionally and erroneously) in assets purchased when it should not have been eligible for the sub-fund;
- A planned update of the screening criteria as a result of which assets should be excluded from the sub-fund, but which the management company chooses to refrain from selling immediately in the best interest of the customer;
- External circumstances such as market movements and updates of external data can lead to investment solutions failing to achieve the abovementioned targets.

In these cases, the fund manager will replace the assets concerned with more appropriate assets as soon as possible, always taking into account the sole interest of the investor.

In addition, for the purpose of efficient portfolio management, the fund manager may to a significant degree use derivatives relating to assets that would not be eligible for inclusion in the sub-fund, in so far as there is no serviceable and comparable alternative available on the market. In addition, the counterparties with which the derivative transactions are entered into may not necessarily be issuers having a responsible nature.

## Taxonomy related information

At the date of this prospectus, the sub-fund does not commit to invest a minimum proportion of its assets in environmentally sustainable economic activities which contribute to any of the environmental objectives set out in Article 9 of the Regulation (EU) 2020/852 of the European Parliament and of the Council of 18 June 2020 on the establishment of a framework to facilitate sustainable investment ('EU Taxonomy Framework'). The minimum proportion of investments in environmentally sustainable economic activities within the meaning of the EU Taxonomy Framework is 0%. This will be monitored on a regular basis and as soon as sufficiently reliable, timely and verifiable data from issuers or invested companies is available, the prospectus may be updated.

Non-financial companies are considered to contribute to sustainable development if at least 20% of sales are aligned to the EU Taxonomy Framework based on Trucost data. For companies in the financial sector, a different methodology applies. For credit institutions, the alignment with the EU Taxonomy Framework is based on the Green Asset Ratio, while for other financial companies the alignment with the EU Taxonomy Framework is based on the alignment of their investment portfolios. Instruments of companies that meet these requirements are referred to as "sustainable investments," according to art. 2(17) SFDR. More information on the percentage in the portfolio that was considered "sustainable investments with an environmental objective aligned with the EU Taxonomy Framework " based on this criterion during the reporting period, can be found in the annual reports for this sub-fund.

More information on the EU Taxonomy Framework can be found in the 'Annex for KBC Equity Fund Global Value Responsible Investing' to the prospectus.

## Transparency of adverse sustainability impacts

The sub-fund considers the principal adverse impacts of its investment decisions on sustainability factors by taking into account the principal adverse impact indicators ('PAI'), as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability disclosure in the financial services sector ('SFDR').

The principal adverse impacts on sustainability factors are explicitly taken into account through the General exclusion policy for conventional and Responsible Investing funds and the exclusion policy for Responsible Investing funds. More information on the principal adverse impact indicators taken into account can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > General exclusion policy for conventional and Responsible Investing funds and [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > Exclusion policy for Responsible Investing funds.

In addition, the principal adverse impacts on sustainability factors are implicitly taken into account through the Proxy Voting and Engagement Policy of KBC Asset Management NV (more information can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > Retrospective Proxy Voting - overview > Proxy Voting and Engagement Policy).

More information on how the sub-fund aims to consider the principal adverse impacts on sustainability factors can also be found in the 'Annex for KBC Equity Fund Global Value Responsible Investing' to the prospectus. A statement on how the sub-fund has considered the principal adverse impacts on sustainability factors during the reporting period can also be found in the annual reports for this sub-fund.

## Benchmark information

The fund is actively managed without referring to any benchmark.

The responsible character is guaranteed by the aforementioned Responsible Investing methodology.

## 3. Risk

### Sub-fund's risk profile

Investors must take note of the specific risk factors set out below, the description of the risks given under the heading 'Information concerning the Bevek - F.Information on the risk profile of the UCITS', and the 'What are the risks and what could I get in return?' section of the key information document.

Summary table of risks assessed by the sub-fund:

| Risk type                 | Concise definition of the risk                                                                                                      |                                                   | Explanation:                                                                                                                                                                                                      |
|---------------------------|-------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Market risk               | The risk that the entire market of an asset class will decline, thus affecting the prices and values of the assets in the portfolio | high                                              | the level of the risk reflects the volatility of the stock market.                                                                                                                                                |
| Credit risk               | The risk that an issuer or a counterparty will default                                                                              | low                                               |                                                                                                                                                                                                                   |
| Settlement risk           | The risk that settlement of a transaction via a payment system will not take place as expected                                      | low                                               |                                                                                                                                                                                                                   |
| Liquidity risk            | The risk that a position cannot be liquidated in a timely manner at a reasonable price                                              | low                                               |                                                                                                                                                                                                                   |
| Exchange or currency risk | The risk that the value of an investment will be affected by changes in exchange rates                                              | For the share class Classic Shares : high         | since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates. |
|                           |                                                                                                                                     | For the share class Institutional Shares : high   | since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates. |
|                           |                                                                                                                                     | For the share class Institutional B Shares : high | since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates. |
|                           |                                                                                                                                     | For the share class Corporate Shares : high       | since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates. |
|                           |                                                                                                                                     | For the share class Discretionary Shares : high   | since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates. |

|                       |                                                                                                     |                                                                                                  |                                                                                                                                                                                                                        |

## Risk profile of the typical investor

Profile of the typical investor for which the sub-fund has been designed : Highly dynamic profile.

The risk profile mentioned per sub-fund has been determined from the point of view of an investor in the euro area and may differ from that of an investor in other currency zones. More information on the risk profiles can be obtained at [www.kbc.be/riskprofile](http://www.kbc.be/riskprofile).

## 4. Information concerning the trading of shares

### How to buy and sell shares and switch between sub-funds

If it turns out that shares are being held by persons other than those permitted to hold them, the Company may, in accordance with article 8.2 of the articles of association, and without charge (except any taxes due and any charges to cover the cost of realising the assets), redeem those shares.

| Cut-off time for receiving orders at the financial service providers in Belgium <sup>(1)</sup><br><br>Date of published net asset value | Date the net asset value is calculated | Actual values used                                                                                                                                                                                                                                           | Date of payment or repayment of the orders |
|-----------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------|
| <b>D</b><br>(every banking day <sup>(2)</sup><br>at 2 pm CET)<br>also referred to as 'Dealing Day'                                      | <b>D+1 banking day</b>                 | <b>D</b> if maximum 20% of the actual values are already known on D<br>(every banking day <sup>(2)</sup><br>at 2 pm CET)<br><br><b>D+1</b> if more than 20% of the actual values are already known on D<br>(every banking day <sup>(2)</sup><br>at 2 pm CET) | <b>D+3 banking days</b>                    |

<sup>(1)</sup> The cut-off time for receiving orders stated above applies to orders investors place directly with the financial services providers in Belgium.

If an investor places an order with a financial institution other than the financial service providers in Belgium, he/she must find out from that institution what cut-off time (time + date) applies to the order he/she wishes to place so that the institution in question can take the necessary action to ensure that the order reaches the financial service providers in Belgium before 2 pm CET on day D in order to qualify as an order of day D.

<sup>(2)</sup> with the exception of banking days on which one or more markets on which more than 20% of the sub-fund's assets are listed are closed or if transactions are suspended or restricted.

### Calculation of the net asset value

The net asset value is calculated daily, as described above, except on days on which no shares may be issued or redeemed. Swing pricing may be applied as described in the 'Information concerning the Bevek – N. Liquidity management tools' section.

### Publication of the net asset value

The 'Information concerning the Bevek – I. Additional information – Publication of the net asset value' section specifies where the result of the calculation of the net asset value can be viewed.

If the profitability of the sub-fund is jeopardised due to a limited number of subscriptions during the initial subscription period (less than 5 000 000 euros), the Board of Directors of the Bevek may decide to refuse the orders placed during the initial subscription period and not to proceed with the commercialisation of the sub-fund.

## 5. Types of shares and fees and charges

---

Shares may be in registered or book-entry form, as the shareholder chooses. No certificates representing the registered shares are issued. Instead, confirmation is supplied of entry in the register of shareholders.

### Dividend payment

After the close of the financial year, the General Meeting determines the portion of the result, which, within the limitations imposed by the Law of 3 August 2012 relative to undertakings for collective investment complying with the conditions of Directive 2009/65/EC and the undertakings for investment in receivables, is to be paid to the holders of distribution shares.

The holders of capitalisation shares are not entitled to receive a dividend. The portion of the annual net income accruing to them is capitalised in favour of these shares.

The shareholders will receive payment within six months of the close of the financial year via institutions designated for this purpose by the General Meeting.

The General Meeting may decide to proceed to interim payments in accordance with the provisions of the law.

The Board of Directors may, in accordance with the provisions laid down in the articles of association and within the limits of the law, decide to pay out interim dividends.

The information on the type and/or class of shares and the fees and charges associated with them is set out below by type and/or share class.

# Global Value Responsible Investing - Discretionary Shares

This share class is reserved for trading to persons who acquire and hold the units on the basis of a discretionary management contract with KBC Asset Management NV or with another company associated with KBC Asset Management NV. The investor must have this status at the moment of subscription and for as long as the investor remains a shareholder of the share class. If it appears that the shares of this class of shares are held by persons other than authorized, these shares will be converted at no cost (except taxes) into shares of the share class 'Classic Shares'.

# Global Value Responsible Investing - Discretionary Wealth Shares

There is a minimum subscription value of 1000000 EUR (both during as well as after the initial subscription period).

This share class is reserved for trading to persons who acquire and hold the units on the basis of a discretionary management contract with KBC Asset Management NV or with another company associated with KBC Asset Management NV. The investor must have this status at the moment of subscription and for as long as the investor remains a shareholder of the share class. If it appears that the shares of this class of shares are held by persons other than authorized, these shares will be converted at no cost (except taxes) into shares of the share class 'Classic Shares'.

# Global Value Responsible Investing - Institutional Discretionary Shares

**This share class is reserved**

- for trading to persons who acquire and hold the units on the basis of a discretionary management agreement with KBC Asset Management NV (except a discretionary management agreement 'Core Satellite'), or with another company associated with KBC Asset Management NV and who pay a discretionary management fee on the part of their portfolio invested in KBC UCIs<sup>1</sup>. In addition, these persons must have the status of 'eligible investors', acting on its own behalf, as within the meaning of Article 5 § 3/1 of the Law of 3 August 2012 relative to undertakings for collective investment complying with the conditions of Directive 2009/65/EC and the undertakings for investment in receivables<sup>2</sup>. The investor must comply with these conditions at the time of subscription and for as long as the investor remains a shareholder of the share class.
- for trading to institutional undertakings for collective investment managed by KBC Asset Management NV or by another company associated with this management company and who pay a fee on the part of the assets invested in KBC UCIs.

**If it appears that the shares of this class are held by persons other than those authorized, these shares will be converted at no cost (except taxes) into shares of the share class "Classic Shares".**

<sup>1</sup> These are collective investment undertakings managed by KBC Asset Management NV or by another company associated with this management company.

<sup>2</sup> These include both professional investors as referred to in Annex A of the Royal Decree of June 3, 2007 laying down detailed rules transposing the Directive of 2004/39/EC in financial instruments and legal persons who are not considered professional investors and who have asked to be registered in the register of eligible investors with the FSMA. Natural persons, as well as legal entities that are not part of eligible investors as defined above, do not have access to this share class.

**One-off fees and charges charged to the investor unless indicated otherwise, in the currency the sub-fund is denominated in or as a percentage of the net asset value per share**

# Global Value Responsible Investing - Institutional Shares

This share class is reserved for institutional investors, as defined in Article 5 § 3 of the Law of 3 August 2012 relative to undertakings for collective investment complying with the conditions of Directive 2009/65/EC and the undertakings for investment in receivables, and requires a minimum subscription of 10 000 EUR (both during as well as after the initial subscription period). The investor must have the status of institutional investor at the moment of subscription and for as long as the investor remains a shareholder of the share class. If it appears that the shares of this class of shares are held by persons other than authorized, these shares will be converted at no cost (except taxes) into shares of the share class 'Classic Shares'.

# Information concerning the sub-fund Medical Technologies

## 1. Basic details

---

### Name

Medical Technologies

### Date of incorporation

26 March 1999

### Life

Unlimited

### Delegation of the management of the investment portfolio

There is no delegation of the management of the investment portfolio.

### Stock exchange listing

Not applicable.

## 2. Investment information

---

### Sub-fund's object

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

### Sub-fund's investment policy

#### *Permitted asset classes*

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

#### *Restrictions of the investment policy*

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

## Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. **Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.**

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

## Selected strategy

At least 75% of the assets are invested in shares of companies in the medical sector, the preference being companies whose core business is developing and manufacturing medical equipment, where conditions are such as to allow an accelerated economic growth in the short and medium term.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

## Transparency of adverse sustainability impacts

The sub-fund considers the principal adverse impacts of its investment decisions on sustainability factors ('PAI') as described by the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector ('SFDR')

The principal adverse impacts on sustainability factors are explicitly taken into account through the General exclusion policy. More information on the principal adverse impact indicators that are taken into account can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > General exclusion policy for conventional and Responsible Investing funds.

In addition, the principal adverse impacts on sustainability factors are implicitly taken into account through the Proxy Voting and Engagement Policy of KBC Asset Management NV (more information can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > Retrospective Proxy Voting - overview > Proxy Voting and Engagement Policy).

KBC Asset Management NV exercises the voting rights of the shares it manages in accordance with the Proxy Voting and Engagement Policy. Where appropriate, KBC Asset Management NV will engage in dialogue with the management of the companies concerned, if necessary before voting.

Information on the principal adverse impacts on sustainability factors can also be found in the annual report for this sub-fund.

## Benchmark information

The fund is actively managed with reference to the following benchmark: MSCI AC World Health Care Equipment and Services - Net Return Index.

However, it is not the aim of the fund to replicate the benchmark. The composition of the benchmark is taken into account when compiling the portfolio.

When compiling the portfolio, the manager may also decide to invest in instruments that are not included in the benchmark, or indeed not to invest in instruments that are included.

The composition of the portfolio will to a large extent be similar to that of the benchmark.

The benchmark is also used to assess the performance of the sub-fund.

The benchmark is also used to determine the fund's risk limitation mechanism. This limits the extent to which the fund's return may deviate from the benchmark.

The longterm expected tracking error for this fund is 3.00%. The tracking error measures the volatility of the fund's return relative to that of the benchmark. The higher the tracking error, the more the fund's return fluctuates relative to the benchmark. Market conditions may cause the actual tracking error to differ from the expected tracking error.

Required disclaimers for benchmark providers:

No further distribution or dissemination of the MSCI data is permitted without MSCI's express written consent.

### **Volatility of the net asset value**

The volatility of the net asset value may be high due to the composition of the portfolio.

## 3. Risk

### Sub-fund's risk profile

Investors must take note of the specific risk factors set out below, the description of the risks given under the heading 'Information concerning the Bevek - F.Information on the risk profile of the UCITS', and the 'What are the risks and what could I get in return?' section of the key information document.

Summary table of risks assessed by the sub-fund:

| Risk type                 | Concise definition of the risk                                                                                                      |          | Explanation:                                                                                            |
|---------------------------|-------------------------------------------------------------------------------------------------------------------------------------|----------|---------------------------------------------------------------------------------------------------------|
| Market risk               | The risk that the entire market of an asset class will decline, thus affecting the prices and values of the assets in the portfolio | high     | the level of the risk reflects the volatility of the stock market.                                      |
| Credit risk               | The risk that an issuer or a counterparty will default                                                                              | low      |                                                                                                         |
| Settlement risk           | The risk that settlement of a transaction via a payment system will not take place as expected                                      | low      |                                                                                                         |
| Liquidity risk            | The risk that a position cannot be liquidated in a timely manner at a reasonable price                                              | low      |                                                                                                         |
| Exchange or currency risk | The risk that the value of an investment will be affected by changes in exchange rates                                              | low      |                                                                                                         |
| Custody risk              | The risk of loss of assets held in custody with a custodian or sub-custodian                                                        | low      |                                                                                                         |
| Concentration risk        | The risk relating to a large concentration of investments in specific assets or in specific markets                                 | moderate | there is a concentration of the investments in the shares of companies operating in the medical sector. |
| Performance risk          | Risks to return                                                                                                                     | high     | the level of the risk reflects the volatility of the stock market.                                      |
| Capital risk              | Risks to capital                                                                                                                    | moderate | There is no capital protection.                                                                         |
| Flexibility risk          | Inflexibility both within the product and constraints on switching to other providers                                               | none     |                                                                                                         |
| Inflation risk            | Risk of inflation                                                                                                                   | low      |                                                                                                         |
| Environmental factors     | Uncertainty regarding the immutability of environmental factors, such as the tax regime                                             | low      |                                                                                                         |

### Risk profile of the typical investor

Profile of the typical investor for which the sub-fund has been designed : Highly dynamic profile.

The risk profile mentioned per sub-fund has been determined from the point of view of an investor in the euro area and may differ from that of an investor in other currency zones. More information on the risk profiles can be obtained at [www.kbc.be/riskprofile](http://www.kbc.be/riskprofile).

## 4. Information concerning the trading of shares

### How to buy and sell shares and switch between sub-funds

If it turns out that shares are being held by persons other than those permitted to hold them, the Company may, in accordance with article 8.2 of the articles of association, and without charge (except any taxes due and any charges to cover the cost of realising the assets), redeem those shares.

| Cut-off time for receiving orders at the financial service providers in Belgium <sup>(1)</sup><br><br>Date of published net asset value | Date the net asset value is calculated | Actual values used                                                                                                                                                                                                                                           | Date of payment or repayment of the orders |
|-----------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------|
| <b>D</b><br>(every banking day <sup>(2)</sup><br>at 2 pm CET)<br>also referred to as 'Dealing Day'                                      | <b>D+1 banking day</b>                 | <b>D</b> if maximum 20% of the actual values are already known on D<br>(every banking day <sup>(2)</sup><br>at 2 pm CET)<br><br><b>D+1</b> if more than 20% of the actual values are already known on D<br>(every banking day <sup>(2)</sup><br>at 2 pm CET) | <b>D+3 banking days</b>                    |

<sup>(1)</sup> The cut-off time for receiving orders stated above applies to orders investors place directly with the financial services providers in Belgium.

If an investor places an order with a financial institution other than the financial service providers in Belgium, he/she must find out from that institution what cut-off time (time + date) applies to the order he/she wishes to place so that the institution in question can take the necessary action to ensure that the order reaches the financial service providers in Belgium before 2 pm CET on day D in order to qualify as an order of day D.

<sup>(2)</sup> with the exception of banking days on which one or more markets on which more than 20% of the sub-fund's assets are listed are closed or if transactions are suspended or restricted.

### Calculation of the net asset value

The net asset value is calculated daily, as described above, except on days on which no shares may be issued or redeemed. Swing pricing may be applied as described in the 'Information concerning the Bevek – N. Liquidity management tools' section.

### Publication of the net asset value

The 'Information concerning the Bevek – I. Additional information – Publication of the net asset value' section specifies where the result of the calculation of the net asset value can be viewed.

## 5. Types of shares and fees and charges

---

Shares may be in registered or book-entry form, as the shareholder chooses. No certificates representing the registered shares are issued. Instead, confirmation is supplied of entry in the register of shareholders.

### Dividend payment

After the close of the financial year, the General Meeting determines the portion of the result, which, within the limitations imposed by the Law of 3 August 2012 relative to undertakings for collective investment complying with the conditions of Directive 2009/65/EC and the undertakings for investment in receivables, is to be paid to the holders of distribution shares.

The holders of capitalisation shares are not entitled to receive a dividend. The portion of the annual net income accruing to them is capitalised in favour of these shares.

The shareholders will receive payment within six months of the close of the financial year via institutions designated for this purpose by the General Meeting.

The General Meeting may decide to proceed to interim payments in accordance with the provisions of the law.

The Board of Directors may, in accordance with the provisions laid down in the articles of association and within the limits of the law, decide to pay out interim dividends.

The information on the type and/or class of shares and the fees and charges associated with them is set out below by type and/or share class.

# Information concerning the sub-fund Minimum Variance Responsible Investing

## 1. Basic details

---

### Name

Minimum Variance Responsible Investing

### Date of incorporation

26 June 2017

### Life

Unlimited

### Delegation of the management of the investment portfolio

There is no delegation of the management of the investment portfolio.

### Stock exchange listing

Not applicable.

## 2. Investment information

---

### Sub-fund's object

The aim is to generate a high return and minimise volatility in the sub-fund's value. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

### Sub-fund's investment policy

#### *Permitted asset classes*

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

#### *Restrictions of the investment policy*

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

## Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. **Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.**

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

## Selected strategy

The assets are invested directly or indirectly in a diversified selection of global shares .

The objective is to generate a high return while minimising the fluctuations in the value of the sub-fund. The composition of the portfolio is based on a quantitative model aimed at minimising expected volatility.

The main parameters of the model are historical data on the price movements of individual stocks, their correlation with the broad market and their mutual correlation. As a result, the sub-fund may invest to a greater or lesser extent in one or several themes, sectors or regions.

## Information related to Responsible Investing

Within the above limits, the sub-fund pursues responsible investment objectives based on a dualistic approach: a negative screening and a positive selection methodology.

KBC Asset Management NV has a team of specialist researchers responsible for this dualistic approach. They are assisted by an independent advisory board (the “**Responsible Investing Advisory Board**”) comprised of up to twelve persons, who are not affiliated to KBC Asset Management NV, and whose sole responsibility is to supervise the dualistic approach and activities of the specialist researchers. The secretariat of the advisory board is handled by a representative of KBC Asset Management NV. Moreover, KBC Asset Management NV works with data suppliers with expertise in Responsible Investing that provide data to the specialized researchers, who process and complete the data with publicly available information (including annual reports, press publications, etc.).

The sub-fund promotes a combination of environmental and/or social characteristics and, even though it does not have sustainable investments as an objective, it shall invest a minimum proportion of its assets in economic activities that contribute to the achievement of environmental or social objectives (i.e. ‘sustainable investments’).

The companies in which it invests must follow good governance practices.

The sub-fund is compliant with the transparency obligations of article 8(1) of Regulation (EU) 2019/2088 of the European Parliament and of the council of 27 November 2019 on sustainability-related disclosures in the financial services sector (‘SFDR’). More information on how the sub-fund promotes environmental and/or social characteristics can be found in the ‘Annex for KBC Equity Fund Minimum Variance Responsible Investing’ to the prospectus. This annex specifically covers the pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852.

In addition, the exclusions set out in Article 12(1)(a) to (g) of Delegated Regulation (EU) 2020/1818 (“Exclusions for Paris Agreement-aligned EU benchmarks”) are respected by this sub-fund.

The sub-fund complies with the European Securities and Markets Authority (ESMA) guidelines on fund names using ESG or sustainability-related terms.

### Negative screening

In practical terms the end result of this negative screening procedure is that the sub-fund excludes companies in advance from the Responsible Investment universe which fall foul of the exclusion policy available on [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > Exclusion policy for Responsible Investing funds.

The application of these policies means that:

- companies involved in certain activities are excluded from the sub-fund's investment universe. A distinction can be made between companies that are excluded if they exceed a certain turnover threshold in relation to specific activities, such as conventional weapons, tobacco, gambling or adult entertainment, and those that are excluded outright because they are involved in specific activities, such as controversial weapons, agricultural commodities or the mining of thermal coal, among others.

The whitelist, as stated in the exclusion policy for responsible investing funds under the heading "Conventional weapons", does not apply to this sub-fund. This sub-fund will therefore not invest in companies that exceed the turnover thresholds for conventional weapons and/or nuclear weapons.

This screening also ensures that companies who seriously violate fundamental principles of environmental protection, social responsibility and good governance, among others, are excluded from the sub-fund's investment universe.

More information regarding the specific exclusions can also be found in the "Annex for KBC Equity Fund Minimum Variance Responsible Investing" to the prospectus.

These negative screening principles are not exhaustive and may be adapted from time to time under the supervision of the Responsible Investing Advisory Board.

#### Positive selection methodology

Within the defined investment universe and other limits described above, the responsible investment objectives of the sub-fund are the following:

- (1) promote the integration of sustainability into the policy decisions of companies by preferring companies with a better **ESG risk score**, where ESG stands for 'Environmental, Social and Governance', and
- (2) promote climate change mitigation, by preferring companies with lower **Greenhouse Gas Intensity**, with the objective of meeting a predetermined Greenhouse Gas intensity target;
- (3) support sustainable development, through 'sustainable investments' in accordance with art. 2(17) SFDR. Sustainable investments will consist of investments in companies contributing to the achievement of the **UN Sustainable Development Goals** (plus instruments awarded the 'sustainable development' label by KBC Asset Management NV on the advice of the Responsible Investing Advisory Board).

More information on the investment policy for Responsible Investing funds is available at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > Investment policy for Responsible Investing funds.

#### (1) ESG-risk score

The contribution to the integration of sustainability into policy decisions of the companies is measured based on an ESG-risk score. This score represents the aggregated performance assessment of a given company against a series of ESG criteria which are grounded to the extent possible against objective measures. The main factors underpinning the ESG criteria are:

- respect for the environment (e.g., reduction in greenhouse gas emissions);
- attention to society (e.g., employee working conditions); and
- corporate governance (e.g., independence and diversity of the board of directors).

At least 90% of the corporate investments in the portfolio, as measured by assets under management, must have an ESG risk score. The ESG risk score for companies is an ESG risk score supplied by a data provider, and based on internal research as well.

These lists are not exhaustive and may be changed under the supervision of the Responsible Investing Advisory Board.

To achieve this objective, the ESG-risk score of the portfolio for companies is compared to following benchmark: target allocation MSCI All Countries World - Net Return Index.

To calculate the ESG-risk score at portfolio level, the weighted average of the ESG (risk) scores of the positions in the sub-fund are taken into account. Technical items such as cash and derivatives are not taken into account and also companies or countries for which no data is available are left out. The weights used in the calculation depend on the size of the positions in the sub-fund, rescaled for these items.

More information on the ESG-risk score and the concrete goals of the sub-fund can be found in the 'Annex for KBC Equity Fund Minimum Variance Responsible Investing' to the prospectus.

The targets can be revised upwards or downwards.

#### (2) Greenhouse Gas Intensity

The objective to promote climate change mitigation, by favoring lower greenhouse gas intensity companies, with the goal of meeting a predetermined greenhouse gas intensity target covers at least 90% of the portfolio. The objective does not apply to companies for which data is not available.

The contribution of companies to climate change mitigation is measured based on their greenhouse gas intensity. Greenhouse gas intensity is defined as absolute greenhouse gas emissions (in tonnes CO<sub>2</sub> equivalent), divided by revenues (in mln USD).

The sub-fund's target in terms of greenhouse gas intensity is assessed on two targets whereby the most strict of the

two will determine the target applied: 15% better than the reference portfolio MSCI All Countries World - Net Return Index and a reduction of 50% by 2030 compared to the reference portfolio MSCI All Countries World - Net Return Index in 2019.

More information on Greenhouse Gas Intensity and the concrete goals of the sub-fund can be found in the 'Annex for KBC Equity Fund Minimum Variance Responsible Investing' to the prospectus.

The targets may be revised upwards or downwards.

### **(3) UN Sustainable Development Goals**

To support sustainable development, the sub-fund commits to invest a minimum proportion of the portfolio in companies that contribute to the UN Sustainable Development Goals. The UN Sustainable Development Goals include both social and environmental objectives.

Companies are considered to contribute to sustainable development when at least 20% of the revenues are linked to the UN Sustainable Development Goals. The activities of the companies are assessed on multiple sustainable themes that can be linked to the UN Sustainable Development Goals.

Instruments of companies that meet these requirements are designated as "sustainable investments," according to Article 2(17) SFDR.

In addition, KBC Asset Management NV can award the "sustainable development" label to instruments, on the advice of the Responsible Investing Advisory Board. In that case, these investments shall also qualify as "sustainable investments," according to Article 2(17) SFDR.

More information about the methodology used to qualify investments as investments which contribute to the UN Sustainable Development Goals can be found in the 'Annex for KBC Equity Fund Minimum Variance Responsible Investing' to the prospectus.

### **Potential Exceptions**

It cannot be ruled out, however, that very limited investments may be made temporarily in assets that do not meet the above criteria. The reasons for this include the following:

- Developments as a result of which a company can no longer be regarded as eligible after purchase;
- Corporate events, such as a merger of one company with another, where the merged company can no longer be considered an eligible company based on the above criteria;
- Incorrect data as a result of which assets are invested (unintentionally and erroneously) in assets purchased when it should not have been eligible for the sub-fund;
- A planned update of the screening criteria as a result of which assets should be excluded from the sub-fund, but which the management company chooses to refrain from selling immediately in the best interest of the customer;
- External circumstances such as market movements and updates of external data can lead to investment solutions failing to achieve the abovementioned targets.

In these cases, the fund manager will replace the assets concerned with more appropriate assets as soon as possible, always taking into account the sole interest of the investor.

In addition, for the purpose of efficient portfolio management, the fund manager may to a significant degree use derivatives relating to assets that would not be eligible for inclusion in the sub-fund, in so far as there is no serviceable and comparable alternative available on the market. In addition, the counterparties with which the derivative transactions are entered into may not necessarily be issuers having a responsible nature.

### **Taxonomy related information**

At the date of this prospectus, the sub-fund does not commit to invest a minimum proportion of its assets in environmentally sustainable economic activities which contribute to any of the environmental objectives set out in Article 9 of the Regulation (EU) 2020/852 of the European Parliament and of the Council of 18 June 2020 on the establishment of a framework to facilitate sustainable investment ('EU Taxonomy Framework'). The minimum proportion of investments in environmentally sustainable economic activities within the meaning of the EU Taxonomy Framework is 0%. This will be monitored on a regular basis and as soon as sufficiently reliable, timely and verifiable data from issuers or invested companies is available, the prospectus may be updated.

Non-financial companies are considered to contribute to sustainable development if at least 20% of sales are aligned to the EU Taxonomy Framework based on Trucost data. For companies in the financial sector, a different methodology applies. For credit institutions, the alignment with the EU Taxonomy Framework is based on the Green Asset Ratio, while for other financial companies the alignment with the EU Taxonomy Framework is based on the alignment of their investment portfolios. Instruments of companies that meet these requirements are referred to as "sustainable investments," according to art. 2(17) SFDR. More information on the percentage in the portfolio that was considered "sustainable investments with an environmental objective aligned with the EU Taxonomy Framework" based on this criterion during the reporting period, can be found in the annual reports for this sub-fund.

More information on the EU Taxonomy Framework can be found in the 'Annex for KBC Equity Fund Minimum Variance Responsible Investing' to the prospectus.

### **Transparency of adverse sustainability impacts**

The sub-fund considers the principal adverse impacts of its investment decisions on sustainability factors by taking

into account the principal adverse impact indicators ('PAI'), as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability disclosure in the financial services sector ('SFDR').

The principal adverse impacts on sustainability factors are explicitly taken into account through the General exclusion policy for conventional and Responsible Investing funds and the exclusion policy for Responsible Investing funds. More information on the principal adverse impact indicators taken into account can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > General exclusion policy for conventional and Responsible Investing funds and [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > Exclusion policy for Responsible Investing funds.

In addition, the principal adverse impacts on sustainability factors are implicitly taken into account through the Proxy Voting and Engagement Policy of KBC Asset Management NV (more information can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > Retrospective Proxy Voting - overview > Proxy Voting and Engagement Policy).

More information on how the sub-fund aims to consider the principal adverse impacts on sustainability factors can also be found in the 'Annex for KBC Equity Fund Minimum Variance Responsible Investing' to the prospectus. A statement on how the sub-fund has considered the principal adverse impacts on sustainability factors during the reporting period can also be found in the annual reports for this sub-fund.

## **Benchmark information**

The fund is actively managed without referring to any benchmark.

The responsible character is guaranteed by the aforementioned Responsible Investing methodology.

## 3. Risk

### Sub-fund's risk profile

Investors must take note of the specific risk factors set out below, the description of the risks given under the heading 'Information concerning the Bevek - F.Information on the risk profile of the UCITS', and the 'What are the risks and what could I get in return?' section of the key information document.

Summary table of risks assessed by the sub-fund:

| Risk type                 | Concise definition of the risk                                                                                                      |          | Explanation:                                                                                                                                                                                                      |
|---------------------------|-------------------------------------------------------------------------------------------------------------------------------------|----------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Market risk               | The risk that the entire market of an asset class will decline, thus affecting the prices and values of the assets in the portfolio | moderate | the level of the risk reflects the volatility of the stock market.                                                                                                                                                |
| Credit risk               | The risk that an issuer or a counterparty will default                                                                              | low      |                                                                                                                                                                                                                   |
| Settlement risk           | The risk that settlement of a transaction via a payment system will not take place as expected                                      | low      |                                                                                                                                                                                                                   |
| Liquidity risk            | The risk that a position cannot be liquidated in a timely manner at a reasonable price                                              | low      |                                                                                                                                                                                                                   |
| Exchange or currency risk | The risk that the value of an investment will be affected by changes in exchange rates                                              | high     | since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates. |
| Custody risk              | The risk of loss of assets held in custody with a custodian or sub-custodian                                                        | low      |                                                                                                                                                                                                                   |
| Concentration risk        | The risk relating to a large concentration of investments in specific assets or in specific markets                                 | moderate | there is a concentration of investments in the shares of companies that operate in a responsible way. There may be a concentration of the investments in shares from one particular region, sector or theme.      |
| Performance risk          | Risks to return                                                                                                                     | moderate | the level of the risk reflects the volatility of the stock market.                                                                                                                                                |
| Capital risk              | Risks to capital                                                                                                                    | moderate | There is no capital protection.                                                                                                                                                                                   |
| Flexibility risk          | Inflexibility both within the product and constraints on switching to other providers                                               | none     |                                                                                                                                                                                                                   |
| Inflation risk            | Risk of inflation                                                                                                                   | low      |                                                                                                                                                                                                                   |
| Environmental factors     | Uncertainty regarding the immutability of environmental factors, such as the tax regime                                             | low      |                                                                                                                                                                                                                   |

## Risk profile of the typical investor

Profile of the typical investor for which the sub-fund has been designed : Dynamic profile.

The risk profile mentioned per sub-fund has been determined from the point of view of an investor in the euro area and may differ from that of an investor in other currency zones. More information on the risk profiles can be obtained at [www.kbc.be/riskprofile](http://www.kbc.be/riskprofile).

## 4. Information concerning the trading of shares

### How to buy and sell shares and switch between sub-funds

If it turns out that shares are being held by persons other than those permitted to hold them, the Company may, in accordance with article 8.2 of the articles of association, and without charge (except any taxes due and any charges to cover the cost of realising the assets), redeem those shares.

| Cut-off time for receiving orders at the financial service providers in Belgium <sup>(1)</sup><br><br>Date of published net asset value | Date the net asset value is calculated | Actual values used                                                                                                                                                                                                                                     | Date of payment or repayment of the orders |
|-----------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------|
| <b>D</b><br>(every banking day <sup>(2)</sup> at 2 pm CET)<br>also referred to as 'Dealing Day'                                         | <b>D+1 banking day</b>                 | <b>D</b> if maximum 20% of the actual values are already known on D<br>(every banking day <sup>(2)</sup> at 2 pm CET)<br><br><b>D+1</b> if more than 20% of the actual values are already known on D<br>(every banking day <sup>(2)</sup> at 2 pm CET) | <b>D+3 banking days</b>                    |

<sup>(1)</sup> The cut-off time for receiving orders stated above applies to orders investors place directly with the financial services providers in Belgium.

If an investor places an order with a financial institution other than the financial service providers in Belgium, he/she must find out from that institution what cut-off time (time + date) applies to the order he/she wishes to place so that the institution in question can take the necessary action to ensure that the order reaches the financial service providers in Belgium before 2 pm CET on day D in order to qualify as an order of day D.

<sup>(2)</sup> with the exception of banking days on which one or more markets on which more than 20% of the sub-fund's assets are listed are closed or if transactions are suspended or restricted.

### Calculation of the net asset value

The net asset value is calculated daily, as described above, except on days on which no shares may be issued or redeemed. Swing pricing may be applied as described in the 'Information concerning the Bevek – N. Liquidity management tools' section.

### Publication of the net asset value

The 'Information concerning the Bevek – I. Additional information – Publication of the net asset value' section specifies where the result of the calculation of the net asset value can be viewed.

## 5. Types of shares and fees and charges

---

Shares may be in registered or book-entry form, as the shareholder chooses. No certificates representing the registered shares are issued. Instead, confirmation is supplied of entry in the register of shareholders.

### Dividend payment

After the close of the financial year, the General Meeting determines the portion of the result, which, within the limitations imposed by the Law of 3 August 2012 relative to undertakings for collective investment complying with the conditions of Directive 2009/65/EC and the undertakings for investment in receivables, is to be paid to the holders of distribution shares.

The holders of capitalisation shares are not entitled to receive a dividend. The portion of the annual net income accruing to them is capitalised in favour of these shares.

The shareholders will receive payment within six months of the close of the financial year via institutions designated for this purpose by the General Meeting.

The General Meeting may decide to proceed to interim payments in accordance with the provisions of the law.

The Board of Directors may, in accordance with the provisions laid down in the articles of association and within the limits of the law, decide to pay out interim dividends.

The information on the type and/or class of shares and the fees and charges associated with them is set out below by type and/or share class.

# Minimum Variance Responsible Investing - Discretionary Shares

This share class is reserved for trading to persons who acquire and hold the units on the basis of a discretionary management contract with KBC Asset Management NV or with another company associated with KBC Asset Management NV. The investor must have this status at the moment of subscription and for as long as the investor remains a shareholder of the share class. If it appears that the shares of this class of shares are held by persons other than authorized, these shares will be converted at no cost (except taxes) into shares of the share class 'Classic Shares'.

# Minimum Variance Responsible Investing - Institutional Discretionary Shares

This share class is reserved

- for trading to persons who acquire and hold the units on the basis of a discretionary management agreement with KBC Asset Management NV (except a discretionary management agreement 'Core Satellite'), or with another company associated with KBC Asset Management NV and who pay a discretionary management fee on the part of their portfolio invested in KBC UCIs<sup>1</sup>. In addition, these persons must have the status of 'eligible investors', acting on its own behalf, as within the meaning of Article 5 § 3/1 of the Law of 3 August 2012 relative to undertakings for collective investment complying with the conditions of Directive 2009/65/EC and the undertakings for investment in receivables<sup>2</sup>. The investor must comply with these conditions at the time of subscription and for as long as the investor remains a shareholder of the share class.
- for trading to institutional undertakings for collective investment managed by KBC Asset Management NV or by another company associated with this management company and who pay a fee on the part of the assets invested in KBC UCIs.

If it appears that the shares of this class are held by persons other than those authorized, these shares will be converted at no cost (except taxes) into shares of the share class "Classic Shares".

# Minimum Variance Responsible Investing - Institutional Shares

This share class is reserved for institutional investors, as defined in Article 5 § 3 of the Law of 3 August 2012 relative to undertakings for collective investment complying with the conditions of Directive 2009/65/EC and the undertakings for investment in receivables, and requires a minimum subscription of 10000 EUR (both during as well as after the initial subscription period). The investor must have the status of institutional investor at the moment of subscription and for as long as the investor remains a shareholder of the share class. If it appears that the shares of this class of shares are held by persons other than authorized, these shares will be converted at no cost (except taxes) into shares of the share class 'Classic Shares'.

# Information concerning the sub-fund New Asia

## 1. Basic details

---

### Name

New Asia

### Date of incorporation

29 December 1993

### Life

Unlimited

### Delegation of the management of the investment portfolio

There is no delegation of the management of the investment portfolio.

### Stock exchange listing

Not applicable.

## 2. Investment information

---

### Sub-fund's object

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

### Sub-fund's investment policy

#### *Permitted asset classes*

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

#### *Restrictions of the investment policy*

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

## Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. **Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.**

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

## Selected strategy

At least 75% of the assets are invested in shares of companies in Asian countries where conditions are such as to allow on accelerated economic growth in the short or medium term.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

## Transparency of adverse sustainability impacts

The sub-fund considers the principal adverse impacts of its investment decisions on sustainability factors ('PAI') as described by the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector ('SFDR')

The principal adverse impacts on sustainability factors are explicitly taken into account through the General exclusion policy. More information on the principal adverse impact indicators that are taken into account can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > General exclusion policy for conventional and Responsible Investing funds.

In addition, the principal adverse impacts on sustainability factors are implicitly taken into account through the Proxy Voting and Engagement Policy of KBC Asset Management NV (more information can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > Retrospective Proxy Voting - overview > Proxy Voting and Engagement Policy).

KBC Asset Management NV exercises the voting rights of the shares it manages in accordance with the Proxy Voting and Engagement Policy. Where appropriate, KBC Asset Management NV will engage in dialogue with the management of the companies concerned, if necessary before voting.

Information on the principal adverse impacts on sustainability factors can also be found in the annual report for this sub-fund.

## Benchmark information

The fund is actively managed with reference to the following benchmark: MSCI Emerging Markets Asia - Net Return Index.

However, it is not the aim of the fund to replicate the benchmark. The composition of the benchmark is taken into account when compiling the portfolio.

When compiling the portfolio, the manager may also decide to invest in instruments that are not included in the benchmark, or indeed not to invest in instruments that are included.

The composition of the portfolio will to a large extent be similar to that of the benchmark.

The benchmark is also used to assess the performance of the sub-fund.

The benchmark is also used to determine the fund's risk limitation mechanism. This limits the extent to which the

fund's return may deviate from the benchmark.

The longterm expected tracking error for this fund is 4.00%. The tracking error measures the volatility of the fund's return relative to that of the benchmark. The higher the tracking error, the more the fund's return fluctuates relative to the benchmark. Market conditions may cause the actual tracking error to differ from the expected tracking error.

Required disclaimers for benchmark providers:

Source: MSCI. No MSCI Party nor any other party involved in or related to compiling, computing or creating the MSCI data, makes any express or implied warranties or representations with respect to such data (or the results to be obtained by the use thereof), and all such parties hereby expressly disclaim all warranties of originality, accuracy, completeness, merchantability or fitness for a particular purpose with respect to any of such data. Without limiting any of the foregoing, in no event shall MSCI, any of its affiliates, or any third party involved in compiling, computing, or creating the data have any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages. No further distribution or dissemination of the MSCI data is permitted without MSCI's express written consent.

**Volatility of the net asset value**

The volatility of the net asset value may be high due to the composition of the portfolio.

## 3. Risk

### Sub-fund's risk profile

Investors must take note of the specific risk factors set out below, the description of the risks given under the heading 'Information concerning the Bevek - F.Information on the risk profile of the UCITS', and the 'What are the risks and what could I get in return?' section of the key information document.

Summary table of risks assessed by the sub-fund:

| Risk type                 | Concise definition of the risk                                                                                                      |          | Explanation:                                                                                                                                                                                                      |
|---------------------------|-------------------------------------------------------------------------------------------------------------------------------------|----------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Market risk               | The risk that the entire market of an asset class will decline, thus affecting the prices and values of the assets in the portfolio | high     | the level of the risk reflects the volatility of the stock market.                                                                                                                                                |
| Credit risk               | The risk that an issuer or a counterparty will default                                                                              | low      |                                                                                                                                                                                                                   |
| Settlement risk           | The risk that settlement of a transaction via a payment system will not take place as expected                                      | low      |                                                                                                                                                                                                                   |
| Liquidity risk            | The risk that a position cannot be liquidated in a timely manner at a reasonable price                                              | moderate | since there will be invested in the shares of companies from emerging economies, there is a risk that a position cannot be sold quickly at a reasonable price.                                                    |
| Exchange or currency risk | The risk that the value of an investment will be affected by changes in exchange rates                                              | high     | since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates. |
| Custody risk              | The risk of loss of assets held in custody with a custodian or sub-custodian                                                        | low      |                                                                                                                                                                                                                   |
| Concentration risk        | The risk relating to a large concentration of investments in specific assets or in specific markets                                 | moderate | there is a concentration of the investments in the shares of companies from Asian countries.                                                                                                                      |
| Performance risk          | Risks to return                                                                                                                     | high     | the level of the risk reflects the volatility of the stock market.                                                                                                                                                |
| Capital risk              | Risks to capital                                                                                                                    | moderate | There is no capital protection.                                                                                                                                                                                   |
| Flexibility risk          | Inflexibility both within the product and constraints on switching to other providers                                               | none     |                                                                                                                                                                                                                   |
| Inflation risk            | Risk of inflation                                                                                                                   | low      |                                                                                                                                                                                                                   |
| Environmental factors     | Uncertainty regarding the immutability of environmental factors, such as the tax regime                                             | low      |                                                                                                                                                                                                                   |

### Risk profile of the typical investor

Profile of the typical investor for which the sub-fund has been designed : Highly dynamic profile.

The risk profile mentioned per sub-fund has been determined from the point of view of an investor in the euro area and may differ from that of an investor in other currency zones. More information on the risk profiles can be obtained at [www.kbc.be/riskprofile](http://www.kbc.be/riskprofile).

## 4. Information concerning the trading of shares

### How to buy and sell shares and switch between sub-funds

If it turns out that shares are being held by persons other than those permitted to hold them, the Company may, in accordance with article 8.2 of the articles of association, and without charge (except any taxes due and any charges to cover the cost of realising the assets), redeem those shares.

| Cut-off time for receiving orders at the financial service providers in Belgium <sup>(1)</sup><br><br>Date of published net asset value | Date the net asset value is calculated | Actual values used                                                                                                                                                                                                                                     | Date of payment or repayment of the orders |
|-----------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------|
| <b>D</b><br>(every banking day <sup>(2)</sup> at 6 am CET)<br>also referred to as 'Dealing Day'                                         | <b>D+1 banking day</b>                 | <b>D</b> if maximum 20% of the actual values are already known on D<br>(every banking day <sup>(2)</sup> at 6 am CET)<br><br><b>D+1</b> if more than 20% of the actual values are already known on D<br>(every banking day <sup>(2)</sup> at 6 am CET) | <b>D+3 banking days</b>                    |

<sup>(1)</sup> The cut-off time for receiving orders stated above applies to orders investors place directly with the financial services providers in Belgium.

If an investor places an order with a financial institution other than the financial service providers in Belgium, he/she must find out from that institution what cut-off time (time + date) applies to the order he/she wishes to place so that the institution in question can take the necessary action to ensure that the order reaches the financial service providers in Belgium before 6 am CET on day D in order to qualify as an order of day D.

<sup>(2)</sup> with the exception of banking days on which one or more markets on which more than 20% of the sub-fund's assets are listed are closed or if transactions are suspended or restricted.

### Calculation of the net asset value

The net asset value is calculated daily, as described above, except on days on which no shares may be issued or redeemed. Swing pricing may be applied as described in the 'Information concerning the Bevek – N. Liquidity management tools' section.

### Publication of the net asset value

The 'Information concerning the Bevek – I. Additional information – Publication of the net asset value' section specifies where the result of the calculation of the net asset value can be viewed.

## 5. Types of shares and fees and charges

---

Shares may be in registered or book-entry form, as the shareholder chooses. No certificates representing the registered shares are issued. Instead, confirmation is supplied of entry in the register of shareholders.

### Dividend payment

After the close of the financial year, the General Meeting determines the portion of the result, which, within the limitations imposed by the Law of 3 August 2012 relative to undertakings for collective investment complying with the conditions of Directive 2009/65/EC and the undertakings for investment in receivables, is to be paid to the holders of distribution shares.

The holders of capitalisation shares are not entitled to receive a dividend. The portion of the annual net income accruing to them is capitalised in favour of these shares.

The shareholders will receive payment within six months of the close of the financial year via institutions designated for this purpose by the General Meeting.

The General Meeting may decide to proceed to interim payments in accordance with the provisions of the law.

The Board of Directors may, in accordance with the provisions laid down in the articles of association and within the limits of the law, decide to pay out interim dividends.

The information on the type and/or class of shares and the fees and charges associated with them is set out below by type and/or share class.

# New Asia - Institutional Discretionary Shares

## This share class is reserved

- for trading to persons who acquire and hold the units on the basis of a discretionary management agreement with KBC Asset Management NV (except a discretionary management agreement 'Core Satellite'), or with another company associated with KBC Asset Management NV and who pay a discretionary management fee on the part of their portfolio invested in KBC UCIs<sup>1</sup>. In addition, these persons must have the status of 'eligible investors', acting on its own behalf, as within the meaning of Article 5 § 3/1 of the Law of 3 August 2012 relative to undertakings for collective investment complying with the conditions of Directive 2009/65/EC and the undertakings for investment in receivables<sup>2</sup>. The investor must comply with these conditions at the time of subscription and for as long as the investor remains a shareholder of the share class.
- for trading to institutional undertakings for collective investment managed by KBC Asset Management NV or by another company associated with this management company and who pay a fee on the part of the assets invested in KBC UCIs.

If it appears that the shares of this class are held by persons other than those authorized, these shares will be converted at no cost (except taxes) into shares of the share class "Classic Shares".

# Information concerning the sub-fund North America

## 1. Basic details

---

### Name

North America

### Date of incorporation

21 March 1991

### Life

Unlimited

### Delegation of the management of the investment portfolio

There is no delegation of the management of the investment portfolio.

### Stock exchange listing

Not applicable.

## 2. Investment information

---

### Sub-fund's object

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

### Sub-fund's investment policy

#### *Permitted asset classes*

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

#### *Restrictions of the investment policy*

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

## Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. **Consequently, there may be an impact on concentration risk.** Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

## Selected strategy

At least 75% of these assets are invested in shares of American and Canadian companies.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

## Transparency of adverse sustainability impacts

The sub-fund considers the principal adverse impacts of its investment decisions on sustainability factors ('PAI') as described by the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector ('SFDR')

The principal adverse impacts on sustainability factors are explicitly taken into account through the General exclusion policy. More information on the principal adverse impact indicators that are taken into account can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > General exclusion policy for conventional and Responsible Investing funds.

In addition, the principal adverse impacts on sustainability factors are implicitly taken into account through the Proxy Voting and Engagement Policy of KBC Asset Management NV (more information can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > Retrospective Proxy Voting - overview > Proxy Voting and Engagement Policy).

KBC Asset Management NV exercises the voting rights of the shares it manages in accordance with the Proxy Voting and Engagement Policy. Where appropriate, KBC Asset Management NV will engage in dialogue with the management of the companies concerned, if necessary before voting.

Information on the principal adverse impacts on sustainability factors can also be found in the annual report for this sub-fund.

## Benchmark information

The fund is actively managed with reference to the following benchmark: MSCI North America-Net Return index.

However, it is not the aim of the fund to replicate the benchmark. The composition of the benchmark is taken into account when compiling the portfolio.

When compiling the portfolio, the manager may also decide to invest in instruments that are not included in the benchmark, or indeed not to invest in instruments that are included.

The composition of the portfolio will to a large extent be similar to that of the benchmark.

The benchmark is also used to assess the performance of the sub-fund.

The benchmark is also used to determine the fund's risk limitation mechanism. This limits the extent to which the fund's return may deviate from the benchmark.

The longterm expected tracking error for this fund is 3.00%. The tracking error measures the volatility of the fund's

return relative to that of the benchmark. The higher the tracking error, the more the fund's return fluctuates relative to the benchmark. Market conditions may cause the actual tracking error to differ from the expected tracking error.

Required disclaimers for benchmark providers:

Source: MSCI. No MSCI Party nor any other party involved in or related to compiling, computing or creating the MSCI data, makes any express or implied warranties or representations with respect to such data (or the results to be obtained by the use thereof), and all such parties hereby expressly disclaim all warranties of originality, accuracy, completeness, merchantability or fitness for a particular purpose with respect to any of such data. Without limiting any of the foregoing, in no event shall MSCI, any of its affiliates, or any third party involved in compiling, computing, or creating the data have any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages. No further distribution or dissemination of the MSCI data is permitted without MSCI's express written consent.

***Volatility of the net asset value***

The volatility of the net asset value may be high due to the composition of the portfolio.

## 3. Risk

### Sub-fund's risk profile

Investors must take note of the specific risk factors set out below, the description of the risks given under the heading 'Information concerning the Bevek - F.Information on the risk profile of the UCITS', and the 'What are the risks and what could I get in return?' section of the key information document.

Summary table of risks assessed by the sub-fund:

| Risk type                 | Concise definition of the risk                                                                                                      |                                                    | Explanation:                                                                                                                                                                                                              |
|---------------------------|-------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Market risk               | The risk that the entire market of an asset class will decline, thus affecting the prices and values of the assets in the portfolio | high                                               | the level of the risk reflects the volatility of the stock market.                                                                                                                                                        |
| Credit risk               | The risk that an issuer or a counterparty will default                                                                              | low                                                |                                                                                                                                                                                                                           |
| Settlement risk           | The risk that settlement of a transaction via a payment system will not take place as expected                                      | low                                                |                                                                                                                                                                                                                           |
| Liquidity risk            | The risk that a position cannot be liquidated in a timely manner at a reasonable price                                              | low                                                |                                                                                                                                                                                                                           |
| Exchange or currency risk | The risk that the value of an investment will be affected by changes in exchange rates                                              | For the share class Classic Shares : low           |                                                                                                                                                                                                                           |
|                           |                                                                                                                                     | For the share class Institutional B Shares : low   |                                                                                                                                                                                                                           |
|                           |                                                                                                                                     | For the share class Classic Shares CSOB CZK : high | since there are investments in securities that are denominated in currencies other than the Czech Koruna, there is a considerable chance that the value of an investment will be affected by movements in exchange rates. |
| Custody risk              | The risk of loss of assets held in custody with a custodian or sub-custodian                                                        | low                                                |                                                                                                                                                                                                                           |
| Concentration risk        | The risk relating to a large concentration of investments in specific assets or in specific markets                                 | moderate                                           | there is a concentration of the investments in shares of companies from the United States of America and Canada.                                                                                                          |

## Risk profile of the typical investor

Profile of the typical investor for which the sub-fund has been designed : Highly dynamic profile.

The risk profile mentioned per sub-fund has been determined from the point of view of an investor in the euro area and may differ from that of an investor in other currency zones. More information on the risk profiles can be obtained at [www.kbc.be/riskprofile](http://www.kbc.be/riskprofile).

## 4. Information concerning the trading of shares

### How to buy and sell shares and switch between sub-funds

If it turns out that shares are being held by persons other than those permitted to hold them, the Company may, in accordance with article 8.2 of the articles of association, and without charge (except any taxes due and any charges to cover the cost of realising the assets), redeem those shares.

| Cut-off time for receiving orders at the financial service providers in Belgium <sup>(1)</sup><br><br>Date of published net asset value | Date the net asset value is calculated | Actual values used                                                                                                                                                                                                                                     | Date of payment or repayment of the orders |
|-----------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------|
| <b>D</b><br>(every banking day <sup>(2)</sup> at 2 pm CET)<br>also referred to as 'Dealing Day'                                         | <b>D+1 banking day</b>                 | <b>D</b> if maximum 20% of the actual values are already known on D<br>(every banking day <sup>(2)</sup> at 2 pm CET)<br><br><b>D+1</b> if more than 20% of the actual values are already known on D<br>(every banking day <sup>(2)</sup> at 2 pm CET) | <b>D+3 banking days</b>                    |

<sup>(1)</sup> The cut-off time for receiving orders stated above applies to orders investors place directly with the financial services providers in Belgium.

If an investor places an order with a financial institution other than the financial service providers in Belgium, he/she must find out from that institution what cut-off time (time + date) applies to the order he/she wishes to place so that the institution in question can take the necessary action to ensure that the order reaches the financial service providers in Belgium before 2 pm CET on day D in order to qualify as an order of day D.

<sup>(2)</sup> with the exception of banking days on which one or more markets on which more than 20% of the sub-fund's assets are listed are closed or if transactions are suspended or restricted.

### Calculation of the net asset value

The net asset value is calculated daily, as described above, except on days on which no shares may be issued or redeemed. Swing pricing may be applied as described in the 'Information concerning the Bevek – N. Liquidity management tools' section.

### Publication of the net asset value

The 'Information concerning the Bevek – I. Additional information – Publication of the net asset value' section specifies where the result of the calculation of the net asset value can be viewed.

## 5. Types of shares and fees and charges

---

Shares may be in registered or book-entry form, as the shareholder chooses. No certificates representing the registered shares are issued. Instead, confirmation is supplied of entry in the register of shareholders.

### Dividend payment

After the close of the financial year, the General Meeting determines the portion of the result, which, within the limitations imposed by the Law of 3 August 2012 relative to undertakings for collective investment complying with the conditions of Directive 2009/65/EC and the undertakings for investment in receivables, is to be paid to the holders of distribution shares.

The holders of capitalisation shares are not entitled to receive a dividend. The portion of the annual net income accruing to them is capitalised in favour of these shares.

The shareholders will receive payment within six months of the close of the financial year via institutions designated for this purpose by the General Meeting.

The General Meeting may decide to proceed to interim payments in accordance with the provisions of the law.

The Board of Directors may, in accordance with the provisions laid down in the articles of association and within the limits of the law, decide to pay out interim dividends.

The information on the type and/or class of shares and the fees and charges associated with them is set out below by type and/or share class.

# Information concerning the sub-fund North America Responsible Investing

## 1. Basic details

---

### Name

North America Responsible Investing

### Date of incorporation

2 November 2018

### Life

Unlimited

### Delegation of the management of the investment portfolio

There is no delegation of the management of the investment portfolio.

### Stock exchange listing

Not applicable.

## 2. Investment information

---

### Sub-fund's object

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

### Sub-fund's investment policy

#### *Permitted asset classes*

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

#### *Restrictions of the investment policy*

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

## Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. **Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.**

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

## Selected strategy

The assets are mainly invested in shares of companies from the United States and Canada.

## Information related to Responsible Investing

Within the above limits, the sub-fund pursues responsible investment objectives based on a dualistic approach: a negative screening and a positive selection methodology.

KBC Asset Management NV has a team of specialist researchers responsible for this dualistic approach. They are assisted by an independent advisory board (the “**Responsible Investing Advisory Board**”) comprised of up to twelve persons, who are not affiliated to KBC Asset Management NV, and whose sole responsibility is to supervise the dualistic approach and activities of the specialist researchers. The secretariat of the advisory board is handled by a representative of KBC Asset Management NV. Moreover, KBC Asset Management NV works with data suppliers with expertise in Responsible Investing that provide data to the specialized researchers, who process and complete the data with publicly available information (including annual reports, press publications, etc.).

The sub-fund promotes a combination of environmental and/or social characteristics and, even though it does not have sustainable investments as an objective, it shall invest a minimum proportion of its assets in economic activities that contribute to the achievement of environmental or social objectives (i.e. ‘sustainable investments’).

The companies in which it invests must follow good governance practices.

The sub-fund is compliant with the transparency obligations of article 8(1) of Regulation (EU) 2019/2088 of the European Parliament and of the council of 27 November 2019 on sustainability-related disclosures in the financial services sector (‘SFDR’). More information on how the sub-fund promotes environmental and/or social characteristics can be found in the ‘Annex for KBC Equity Fund North America Responsible Investing’ to the prospectus. This annex specifically covers the pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852.

In addition, the exclusions set out in Article 12(1)(a) to (g) of Delegated Regulation (EU) 2020/1818 (“Exclusions for Paris Agreement-aligned EU benchmarks”) are respected by this sub-fund.

The sub-fund complies with the European Securities and Markets Authority (ESMA) guidelines on fund names using ESG or sustainability-related terms.

### Negative screening

In practical terms the end result of this negative screening procedure is that the sub-fund excludes companies in advance from the Responsible Investment universe which fall foul of the exclusion policy available on [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > Exclusion policy for Responsible Investing funds.

The application of these policies means that:

companies involved in certain activities are excluded from the sub-fund's investment universe. A distinction can

- be made between companies that are excluded if they exceed a certain turnover threshold in relation to specific activities, such as conventional weapons, tobacco, gambling or adult entertainment, and those that are excluded outright because they are involved in specific activities, such as controversial weapons, agricultural commodities or the mining of thermal coal, among others.
- The sub-fund may nevertheless invest in companies involved in conventional weapons and/or nuclear weapons that exceed certain turnover thresholds, provided they are included on the whitelist as specified in the policy. The whitelist is a list drawn up by KBC Group and includes companies involved in conventional weapons and/or nuclear weapons, but which are nevertheless deemed acceptable as investments within funds that invest responsibly, taking into account factors such as the proportion of arms sales to non-NATO countries and a possible involvement in human rights controversies related to armed conflict.

This screening also ensures that companies who seriously violate fundamental principles of environmental protection, social responsibility and good governance, among others, are excluded from the sub-fund's investment universe.

More information regarding the specific exclusions can also be found in the "Annex for KBC Equity Fund North America Responsible Investing" to the prospectus.

These negative screening principles are not exhaustive and may be adapted from time to time under the supervision of the Responsible Investing Advisory Board.

#### Positive selection methodology

Within the defined investment universe and other limits described above, the responsible investment objectives of the sub-fund are the following:

- (1) promote the integration of sustainability into the policy decisions of companies by preferring companies with a better **ESG risk score**, where ESG stands for 'Environmental, Social and Governance', and
- (2) promote climate change mitigation, by preferring companies with lower **Greenhouse Gas Intensity**, with the objective of meeting a predetermined Greenhouse Gas intensity target;
- (3) support sustainable development, through 'sustainable investments' in accordance with art. 2(17) SFDR. Sustainable investments will consist of investments in companies contributing to the achievement of the **UN Sustainable Development Goals** (plus instruments awarded the 'sustainable development' label by KBC Asset Management NV on the advice of the Responsible Investing Advisory Board).

More information on the investment policy for Responsible Investing funds is available at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > Investment policy for Responsible Investing funds.

#### **(1) ESG-risk score**

The contribution to the integration of sustainability into policy decisions of the companies is measured based on an ESG-risk score. This score represents the aggregated performance assessment of a given company against a series of ESG criteria which are grounded to the extent possible against objective measures. The main factors underpinning the ESG criteria are:

- respect for the environment (e.g., reduction in greenhouse gas emissions);
- attention to society (e.g., employee working conditions); and
- corporate governance (e.g., independence and diversity of the board of directors).

At least 90% of the corporate investments in the portfolio, as measured by assets under management, must have an ESG risk score. The ESG risk score for companies is an ESG risk score supplied by a data provider, and based on internal research as well.

These lists are not exhaustive and may be changed under the supervision of the Responsible Investing Advisory Board.

To achieve this objective, the ESG-risk score of the portfolio for companies is compared to following benchmark: MSCI North America-Net Return index.

To calculate the ESG-risk score at portfolio level, the weighted average of the ESG (risk) scores of the positions in the sub-fund are taken into account. Technical items such as cash and derivatives are not taken into account and also companies or countries for which no data is available are left out. The weights used in the calculation depend on the size of the positions in the sub-fund, rescaled for these items.

More information on the ESG-risk score and the concrete goals of the sub-fund can be found in the 'Annex for KBC Equity Fund North America Responsible Investing' to the prospectus.

The targets can be revised upwards or downwards.

#### **(2) Greenhouse Gas Intensity**

The objective to promote climate change mitigation, by favoring lower greenhouse gas intensity companies, with the goal of meeting a predetermined greenhouse gas intensity target covers at least 90% of the portfolio. The objective does not apply to companies for which data is not available.

The contribution of companies to climate change mitigation is measured based on their greenhouse gas intensity. Greenhouse gas intensity is defined as absolute greenhouse gas emissions (in tonnes CO<sub>2</sub> equivalent), divided by revenues (in mln USD).

The sub-fund's target in terms of greenhouse gas intensity is assessed on two targets whereby the most strict of the two will determine the target applied: 15% better than the benchmark MSCI North America-Net Return index and a reduction of 50% by 2030 compared to the benchmark MSCI North America-Net Return index in 2019.

More information on Greenhouse Gas Intensity and the concrete goals of the sub-fund can be found in the 'Annex for KBC Equity Fund North America Responsible Investing' to the prospectus.

The targets may be revised upwards or downwards.

### **(3) UN Sustainable Development Goals**

To support sustainable development, the sub-fund commits to invest a minimum proportion of the portfolio in companies that contribute to the UN Sustainable Development Goals. The UN Sustainable Development Goals include both social and environmental objectives.

Companies are considered to contribute to sustainable development when at least 20% of the revenues are linked to the UN Sustainable Development Goals. The activities of the companies are assessed on multiple sustainable themes that can be linked to the UN Sustainable Development Goals.

Instruments of companies that meet these requirements are designated as "sustainable investments," according to Article 2(17) SFDR.

In addition, KBC Asset Management NV can award the "sustainable development" label to instruments, on the advice of the Responsible Investing Advisory Board. In that case, these investments shall also qualify as "sustainable investments," according to Article 2(17) SFDR.

More information about the methodology used to qualify investments as investments which contribute to the UN Sustainable Development Goals can be found in the 'Annex for KBC Equity Fund North America Responsible Investing' to the prospectus.

### **Potential Exceptions**

It cannot be ruled out, however, that very limited investments may be made temporarily in assets that do not meet the above criteria. The reasons for this include the following:

- Developments as a result of which a company can no longer be regarded as eligible after purchase;
- Corporate events, such as a merger of one company with another, where the merged company can no longer be considered an eligible company based on the above criteria;
- Incorrect data as a result of which assets are invested (unintentionally and erroneously) in assets purchased when it should not have been eligible for the sub-fund;
- A planned update of the screening criteria as a result of which assets should be excluded from the sub-fund, but which the management company chooses to refrain from selling immediately in the best interest of the customer;
- External circumstances such as market movements and updates of external data can lead to investment solutions failing to achieve the abovementioned targets.

In these cases, the fund manager will replace the assets concerned with more appropriate assets as soon as possible, always taking into account the sole interest of the investor.

In addition, for the purpose of efficient portfolio management, the fund manager may to a significant degree use derivatives relating to assets that would not be eligible for inclusion in the sub-fund, in so far as there is no serviceable and comparable alternative available on the market. In addition, the counterparties with which the derivative transactions are entered into may not necessarily be issuers having a responsible nature.

### **Taxonomy related information**

At the date of this prospectus, the sub-fund does not commit to invest a minimum proportion of its assets in environmentally sustainable economic activities which contribute to any of the environmental objectives set out in Article 9 of the Regulation (EU) 2020/852 of the European Parliament and of the Council of 18 June 2020 on the establishment of a framework to facilitate sustainable investment ('EU Taxonomy Framework'). The minimum proportion of investments in environmentally sustainable economic activities within the meaning of the EU Taxonomy Framework is 0%. This will be monitored on a regular basis and as soon as sufficiently reliable, timely and verifiable data from issuers or invested companies is available, the prospectus may be updated.

Non-financial companies are considered to contribute to sustainable development if at least 20% of sales are aligned to the EU Taxonomy Framework based on Trucost data. For companies in the financial sector, a different methodology applies. For credit institutions, the alignment with the EU Taxonomy Framework is based on the Green Asset Ratio, while for other financial companies the alignment with the EU Taxonomy Framework is based on the alignment of their investment portfolios. Instruments of companies that meet these requirements are referred to as "sustainable investments," according to art. 2(17) SFDR. More information on the percentage in the portfolio that was considered "sustainable investments with an environmental objective aligned with the EU Taxonomy Framework " based on this criterion during the reporting period, can be found in the annual reports for this sub-fund.

More information on the EU Taxonomy Framework can be found in the 'Annex for KBC Equity Fund North America Responsible Investing' to the prospectus.

### **Transparency of adverse sustainability impacts**

The sub-fund considers the principal adverse impacts of its investment decisions on sustainability factors by taking into account the principal adverse impact indicators ('PAI'), as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability disclosure in the financial services sector ('SFDR').

The principal adverse impacts on sustainability factors are explicitly taken into account through the General exclusion policy for conventional and Responsible Investing funds and the exclusion policy for Responsible Investing funds. More information on the principal adverse impact indicators taken into account can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > General exclusion policy for conventional and Responsible Investing funds and [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > Exclusion policy for Responsible Investing funds.

In addition, the principal adverse impacts on sustainability factors are implicitly taken into account through the Proxy Voting and Engagement Policy of KBC Asset Management NV (more information can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > Retrospective Proxy Voting - overview > Proxy Voting and Engagement Policy).

More information on how the sub-fund aims to consider the principal adverse impacts on sustainability factors can also be found in the 'Annex for KBC Equity Fund North America Responsible Investing' to the prospectus. A statement on how the sub-fund has considered the principal adverse impacts on sustainability factors during the reporting period can also be found in the annual reports for this sub-fund.

### **Benchmark information**

The fund is actively managed with reference to the following benchmark: MSCI North America-Net Return index.

However, it is not the aim of the fund to replicate the benchmark. The composition of the benchmark is taken into account when compiling the portfolio.

In line with its investment policy, the sub-fund may not invest in all the instruments included in the benchmark.

When compiling the portfolio, the manager may also decide to invest in instruments that are not included in the benchmark, or indeed not to invest in instruments that are included.

The composition of the portfolio will vary from that of the benchmark, as the composition of the benchmark is not fully consistent with the environmental and/or social characteristics promoted by the sub-fund. The use of the benchmark does not detract from the responsible character of the portfolio. The responsible character is guaranteed by the aforementioned Responsible Investing methodology.

The benchmark is also used to determine the fund's risk limitation mechanism. This limits the extent to which the fund's return may deviate from the benchmark.

The longterm expected tracking error for this fund is 3.50%. The tracking error measures the volatility of the fund's return relative to that of the benchmark. The higher the tracking error, the more the fund's return fluctuates relative to the benchmark. Market conditions may cause the actual tracking error to differ from the expected tracking error.

#### **Required disclaimers for benchmark providers:**

Source: MSCI. No MSCI Party nor any other party involved in or related to compiling, computing or creating the MSCI data, makes any express or implied warranties or representations with respect to such data (or the results to be obtained by the use thereof), and all such parties hereby expressly disclaim all warranties of originality, accuracy, completeness, merchantability or fitness for a particular purpose with respect to any of such data. Without limiting any of the foregoing, in no event shall MSCI, any of its affiliates, or any third party involved in compiling, computing, or creating the data have any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages. No further distribution or dissemination of the MSCI data is permitted without MSCI's express written consent.

### **Volatility of the net asset value**

**The volatility of the net asset value may be high due to the composition of the portfolio.**

## 3. Risk

### Sub-fund's risk profile

Investors must take note of the specific risk factors set out below, the description of the risks given under the heading 'Information concerning the Bevek - F.Information on the risk profile of the UCITS', and the 'What are the risks and what could I get in return?' section of the key information document.

Summary table of risks assessed by the sub-fund:

| Risk type                 | Concise definition of the risk                                                                                                      |                                                                   | Explanation:                                                                                                                                                                                                      |
|---------------------------|-------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Market risk               | The risk that the entire market of an asset class will decline, thus affecting the prices and values of the assets in the portfolio | high                                                              | the level of the risk reflects the volatility of the stock market.                                                                                                                                                |
| Credit risk               | The risk that an issuer or a counterparty will default                                                                              | low                                                               |                                                                                                                                                                                                                   |
| Settlement risk           | The risk that settlement of a transaction via a payment system will not take place as expected                                      | low                                                               |                                                                                                                                                                                                                   |
| Liquidity risk            | The risk that a position cannot be liquidated in a timely manner at a reasonable price                                              | low                                                               |                                                                                                                                                                                                                   |
| Exchange or currency risk | The risk that the value of an investment will be affected by changes in exchange rates                                              | For the share class Classic Shares : low                          |                                                                                                                                                                                                                   |
|                           |                                                                                                                                     | For the share class Institutional B Shares : high                 | since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates. |
|                           |                                                                                                                                     | For the share class Institutional Discretionary Shares EUR : high | since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates. |
| Custody risk              | The risk of loss of assets held in custody with a custodian or sub-custodian                                                        | low                                                               |                                                                                                                                                                                                                   |
| Concentration risk        | The risk relating to a large concentration of investments in specific assets or in specific markets                                 | moderate                                                          | there is a concentration of investments in the shares of North American companies.                                                                                                                                |
| Performance risk          | Risks to return                                                                                                                     | high                                                              | the level of the risk reflects the volatility of the stock market.                                                                                                                                                |
| Capital risk              | Risks to capital                                                                                                                    | moderate                                                          | There is no capital protection.                                                                                                                                                                                   |
| Flexibility risk          | Inflexibility both within the product and constraints on switching to other providers                                               | low                                                               |                                                                                                                                                                                                                   |
| Inflation risk            | Risk of inflation                                                                                                                   | low                                                               |                                                                                                                                                                                                                   |

## Risk profile of the typical investor

Profile of the typical investor for which the sub-fund has been designed : Highly dynamic profile.

The risk profile mentioned per sub-fund has been determined from the point of view of an investor in the euro area and may differ from that of an investor in other currency zones. More information on the risk profiles can be obtained at [www.kbc.be/riskprofile](http://www.kbc.be/riskprofile).

## 4. Information concerning the trading of shares

### How to buy and sell shares and switch between sub-funds

If it turns out that shares are being held by persons other than those permitted to hold them, the Company may, in accordance with article 8.2 of the articles of association, and without charge (except any taxes due and any charges to cover the cost of realising the assets), redeem those shares.

| Cut-off time for receiving orders at the financial service providers in Belgium <sup>(1)</sup><br><br>Date of published net asset value | Date the net asset value is calculated | Actual values used                                                                                                                                                                                                                                           | Date of payment or repayment of the orders |
|-----------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------|
| <b>D</b><br>(every banking day <sup>(2)</sup><br>at 2 pm CET)<br>also referred to as 'Dealing Day'                                      | <b>D+1 banking day</b>                 | <b>D</b> if maximum 20% of the actual values are already known on D<br>(every banking day <sup>(2)</sup><br>at 2 pm CET)<br><br><b>D+1</b> if more than 20% of the actual values are already known on D<br>(every banking day <sup>(2)</sup><br>at 2 pm CET) | <b>D+3 banking days</b>                    |

<sup>(1)</sup> The cut-off time for receiving orders stated above applies to orders investors place directly with the financial services providers in Belgium.

If an investor places an order with a financial institution other than the financial service providers in Belgium, he/she must find out from that institution what cut-off time (time + date) applies to the order he/she wishes to place so that the institution in question can take the necessary action to ensure that the order reaches the financial service providers in Belgium before 2 pm CET on day D in order to qualify as an order of day D.

<sup>(2)</sup> with the exception of banking days on which one or more markets on which more than 20% of the sub-fund's assets are listed are closed or if transactions are suspended or restricted.

### Calculation of the net asset value

The net asset value is calculated daily, as described above, except on days on which no shares may be issued or redeemed. Swing pricing may be applied as described in the 'Information concerning the Bevek – N. Liquidity management tools' section.

### Publication of the net asset value

The 'Information concerning the Bevek – I. Additional information – Publication of the net asset value' section specifies where the result of the calculation of the net asset value can be viewed.

If the profitability of the sub-fund is jeopardised due to a limited number of subscriptions during the initial subscription period (less than 5 000 000 euros), the Board of Directors of the Bevek may decide to refuse the orders placed during the initial subscription period and not to proceed with the commercialisation of the sub-fund.

## 5. Types of shares and fees and charges

---

Shares may be in registered or book-entry form, as the shareholder chooses. No certificates representing the registered shares are issued. Instead, confirmation is supplied of entry in the register of shareholders.

### Dividend payment

After the close of the financial year, the General Meeting determines the portion of the result, which, within the limitations imposed by the Law of 3 August 2012 relative to undertakings for collective investment complying with the conditions of Directive 2009/65/EC and the undertakings for investment in receivables, is to be paid to the holders of distribution shares.

The holders of capitalisation shares are not entitled to receive a dividend. The portion of the annual net income accruing to them is capitalised in favour of these shares.

The shareholders will receive payment within six months of the close of the financial year via institutions designated for this purpose by the General Meeting.

The General Meeting may decide to proceed to interim payments in accordance with the provisions of the law.

The Board of Directors may, in accordance with the provisions laid down in the articles of association and within the limits of the law, decide to pay out interim dividends.

The information on the type and/or class of shares and the fees and charges associated with them is set out below by type and/or share class.

<sup>1</sup> These are collective investment undertakings managed by KBC Asset Management NV or by another company associated with this management company.  
<sup>2</sup> These include both professional investors as referred to in Annex A of the Royal Decree of June 3, 2007 laying down detailed rules transposing the Directive on markets in financial instruments and legal persons who are not considered professional investors and who have asked to be registered in the register of eligible investors with the FSMA. Natural persons, as well as legal entities that are not part of eligible investors as defined above, do not have access to this share class.

**One-off fees and charges charged to the investor unless indicated otherwise, in the currency the sub-fund is denominated in or as a percentage of the net asset value per share**

# Information concerning the sub-fund North American Continent

## 1. Basic details

---

### Name

North American Continent

### Date of incorporation

26 January 2011

### Life

Unlimited

### Delegation of the management of the investment portfolio

There is no delegation of the management of the investment portfolio.

### Stock exchange listing

Not applicable.

## 2. Investment information

---

### Sub-fund's object

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares. Correlated financial instruments refer to certificates representing securities, such as American Depository Receipts (ADRs), Global Depository Receipts (GDRs) or futures on equity indices.

### Sub-fund's investment policy

#### *Permitted asset classes*

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

#### *Restrictions of the investment policy*

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

## Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. **Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.**

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

## Selected strategy

The assets are, directly or indirectly, mainly invested in shares of companies from the North American Continent.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

## Transparency of adverse sustainability impacts

The sub-fund considers the principal adverse impacts of its investment decisions on sustainability factors ('PAI') as described by the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector ('SFDR')

The principal adverse impacts on sustainability factors are explicitly taken into account through the General exclusion policy. More information on the principal adverse impact indicators that are taken into account can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > General exclusion policy for conventional and Responsible Investing funds.

In addition, the principal adverse impacts on sustainability factors are implicitly taken into account through the Proxy Voting and Engagement Policy of KBC Asset Management NV (more information can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > Retrospective Proxy Voting - overview > Proxy Voting and Engagement Policy).

KBC Asset Management NV exercises the voting rights of the shares it manages in accordance with the Proxy Voting and Engagement Policy. Where appropriate, KBC Asset Management NV will engage in dialogue with the management of the companies concerned, if necessary before voting.

Information on the principal adverse impacts on sustainability factors can also be found in the annual report for this sub-fund.

## Benchmark information

The fund is actively managed with reference to the following benchmark: MSCI North America-Net Return index.

However, it is not the aim of the fund to replicate the benchmark. The composition of the benchmark is taken into account when compiling the portfolio.

When compiling the portfolio, the manager may also decide to invest in instruments that are not included in the benchmark, or indeed not to invest in instruments that are included.

The composition of the portfolio will to a large extent be similar to that of the benchmark.

The benchmark is also used to assess the performance of the sub-fund.

The benchmark is also used to determine the fund's risk limitation mechanism. This limits the extent to which the fund's return may deviate from the benchmark.

The longterm expected tracking error for this fund is 3.00%. The tracking error measures the volatility of the fund's return relative to that of the benchmark. The higher the tracking error, the more the fund's return fluctuates relative to the benchmark. Market conditions may cause the actual tracking error to differ from the expected tracking error.

Required disclaimers for benchmark providers:

Source: MSCI. No MSCI Party nor any other party involved in or related to compiling, computing or creating the MSCI data, makes any express or implied warranties or representations with respect to such data (or the results to be obtained by the use thereof), and all such parties hereby expressly disclaim all warranties of originality, accuracy, completeness, merchantability or fitness for a particular purpose with respect to any of such data. Without limiting any of the foregoing, in no event shall MSCI, any of its affiliates, or any third party involved in compiling, computing, or creating the data have any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages. No further distribution or dissemination of the MSCI data is permitted without MSCI's express written consent.

**Volatility of the net asset value**

The volatility of the net asset value may be high due to the composition of the portfolio.

## 3. Risk

### Sub-fund's risk profile

Investors must take note of the specific risk factors set out below, the description of the risks given under the heading 'Information concerning the Bevek - F.Information on the risk profile of the UCITS', and the 'What are the risks and what could I get in return?' section of the key information document.

Summary table of risks assessed by the sub-fund:

| Risk type                 | Concise definition of the risk                                                                                                      |          | Explanation:                                                                                                                                                                                                      |
|---------------------------|-------------------------------------------------------------------------------------------------------------------------------------|----------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Market risk               | The risk that the entire market of an asset class will decline, thus affecting the prices and values of the assets in the portfolio | high     | the level of the risk reflects the volatility of the stock market.                                                                                                                                                |
| Credit risk               | The risk that an issuer or a counterparty will default                                                                              | low      |                                                                                                                                                                                                                   |
| Settlement risk           | The risk that settlement of a transaction via a payment system will not take place as expected                                      | low      |                                                                                                                                                                                                                   |
| Liquidity risk            | The risk that a position cannot be liquidated in a timely manner at a reasonable price                                              | low      |                                                                                                                                                                                                                   |
| Exchange or currency risk | The risk that the value of an investment will be affected by changes in exchange rates                                              | high     | since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates. |
| Custody risk              | The risk of loss of assets held in custody with a custodian or sub-custodian                                                        | low      |                                                                                                                                                                                                                   |

### Risk profile of the typical investor

Profile of the typical investor for which the sub-fund has been designed : Highly dynamic profile.

The risk profile mentioned per sub-fund has been determined from the point of view of an investor in the euro area and may differ from that of an investor in other currency zones. More information on the risk profiles can be obtained at [www.kbc.be/riskprofile](http://www.kbc.be/riskprofile).

## 4. Information concerning the trading of shares

### How to buy and sell shares and switch between sub-funds

If it turns out that shares are being held by persons other than those permitted to hold them, the Company may, in accordance with article 8.2 of the articles of association, and without charge (except any taxes due and any charges to cover the cost of realising the assets), redeem those shares.

| Cut-off time for receiving orders at the financial service providers in Belgium <sup>(1)</sup><br><br>Date of published net asset value | Date the net asset value is calculated | Actual values used                                                                                                                                                                                                                                     | Date of payment or repayment of the orders |
|-----------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------|
| <b>D</b><br>(every banking day <sup>(2)</sup> at 2 pm CET)<br>also referred to as 'Dealing Day'                                         | <b>D+1 banking day</b>                 | <b>D</b> if maximum 20% of the actual values are already known on D<br>(every banking day <sup>(2)</sup> at 2 pm CET)<br><br><b>D+1</b> if more than 20% of the actual values are already known on D<br>(every banking day <sup>(2)</sup> at 2 pm CET) | <b>D+3 banking days</b>                    |

<sup>(1)</sup> The cut-off time for receiving orders stated above applies to orders investors place directly with the financial services providers in Belgium.

If an investor places an order with a financial institution other than the financial service providers in Belgium, he/she must find out from that institution what cut-off time (time + date) applies to the order he/she wishes to place so that the institution in question can take the necessary action to ensure that the order reaches the financial service providers in Belgium before 2 pm CET on day D in order to qualify as an order of day D.

<sup>(2)</sup> with the exception of banking days on which one or more markets on which more than 20% of the sub-fund's assets are listed are closed or if transactions are suspended or restricted.

### Calculation of the net asset value

The net asset value is calculated daily, as described above, except on days on which no shares may be issued or redeemed. Swing pricing may be applied as described in the 'Information concerning the Bevek – N. Liquidity management tools' section.

### Publication of the net asset value

The 'Information concerning the Bevek – I. Additional information – Publication of the net asset value' section specifies where the result of the calculation of the net asset value can be viewed.

If the profitability of the sub-fund is jeopardised due to a limited number of subscriptions during the initial subscription period (less than 5 000 000 euros), the Board of Directors of the Bevek may decide to refuse the orders placed during the initial subscription period and not to proceed with the commercialisation of the sub-fund.

## 5. Types of shares and fees and charges

---

Shares may be in registered or book-entry form, as the shareholder chooses. No certificates representing the registered shares are issued. Instead, confirmation is supplied of entry in the register of shareholders.

### Dividend payment

After the close of the financial year, the General Meeting determines the portion of the result, which, within the limitations imposed by the Law of 3 August 2012 relative to undertakings for collective investment complying with the conditions of Directive 2009/65/EC and the undertakings for investment in receivables, is to be paid to the holders of distribution shares.

The holders of capitalisation shares are not entitled to receive a dividend. The portion of the annual net income accruing to them is capitalised in favour of these shares.

The shareholders will receive payment within six months of the close of the financial year via institutions designated for this purpose by the General Meeting.

The General Meeting may decide to proceed to interim payments in accordance with the provisions of the law.

The Board of Directors may, in accordance with the provisions laid down in the articles of association and within the limits of the law, decide to pay out interim dividends.

The information on the type and/or class of shares and the fees and charges associated with them is set out below by type and/or share class.

# Information concerning the sub-fund North American Continent Responsible Investing

## 1. Basic details

---

### Name

North American Continent Responsible Investing

### Date of incorporation

14 April 2020

### Life

Unlimited

### Delegation of the management of the investment portfolio

There is no delegation of the management of the investment portfolio.

### Stock exchange listing

Not applicable.

## 2. Investment information

---

### Sub-fund's object

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

### Sub-fund's investment policy

#### *Permitted asset classes*

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

#### *Restrictions of the investment policy*

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

## Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. **Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.**

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

## Selected strategy

The assets are mainly invested in shares of companies from continental North America .

## Information related to Responsible Investing

Within the above limits, the sub-fund pursues responsible investment objectives based on a dualistic approach: a negative screening and a positive selection methodology.

KBC Asset Management NV has a team of specialist researchers responsible for this dualistic approach. They are assisted by an independent advisory board (the “**Responsible Investing Advisory Board**”) comprised of up to twelve persons, who are not affiliated to KBC Asset Management NV, and whose sole responsibility is to supervise the dualistic approach and activities of the specialist researchers. The secretariat of the advisory board is handled by a representative of KBC Asset Management NV. Moreover, KBC Asset Management NV works with data suppliers with expertise in Responsible Investing that provide data to the specialized researchers, who process and complete the data with publicly available information (including annual reports, press publications, etc.).

The sub-fund promotes a combination of environmental and/or social characteristics and, even though it does not have sustainable investments as an objective, it shall invest a minimum proportion of its assets in economic activities that contribute to the achievement of environmental or social objectives (i.e. ‘sustainable investments’).

The companies in which it invests must follow good governance practices.

The sub-fund is compliant with the transparency obligations of article 8(1) of Regulation (EU) 2019/2088 of the European Parliament and of the council of 27 November 2019 on sustainability-related disclosures in the financial services sector (‘SFDR’). More information on how the sub-fund promotes environmental and/or social characteristics can be found in the ‘Annex for KBC Equity Fund North American Continent Responsible Investing’ to the prospectus. This annex specifically covers the pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852.

In addition, the exclusions set out in Article 12(1)(a) to (g) of Delegated Regulation (EU) 2020/1818 (“Exclusions for Paris Agreement-aligned EU benchmarks”) are respected by this sub-fund.

The sub-fund complies with the European Securities and Markets Authority (ESMA) guidelines on fund names using ESG or sustainability-related terms.

### Negative screening

In practical terms the end result of this negative screening procedure is that the sub-fund excludes companies in advance from the Responsible Investment universe which fall foul of the exclusion policy available on [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > Exclusion policy for Responsible Investing funds.

The application of these policies means that:

companies involved in certain activities are excluded from the sub-fund's investment universe. A distinction can

- be made between companies that are excluded if they exceed a certain turnover threshold in relation to specific activities, such as conventional weapons, tobacco, gambling or adult entertainment, and those that are excluded outright because they are involved in specific activities, such as controversial weapons, agricultural commodities or the mining of thermal coal, among others.
- The sub-fund may nevertheless invest in companies involved in conventional weapons and/or nuclear weapons that exceed certain turnover thresholds, provided they are included on the whitelist as specified in the policy. The whitelist is a list drawn up by KBC Group and includes companies involved in conventional weapons and/or nuclear weapons, but which are nevertheless deemed acceptable as investments within funds that invest responsibly, taking into account factors such as the proportion of arms sales to non-NATO countries and a possible involvement in human rights controversies related to armed conflict.

This screening also ensures that companies who seriously violate fundamental principles of environmental protection, social responsibility and good governance, among others, are excluded from the sub-fund's investment universe.

More information regarding the specific exclusions can also be found in the "Annex for KBC Equity Fund North American Continent Responsible Investing" to the prospectus.

These negative screening principles are not exhaustive and may be adapted from time to time under the supervision of the Responsible Investing Advisory Board.

#### Positive selection methodology

Within the defined investment universe and other limits described above, the responsible investment objectives of the sub-fund are the following:

- (1) promote the integration of sustainability into the policy decisions of companies by preferring companies with a better **ESG risk score**, where ESG stands for 'Environmental, Social and Governance', and
- (2) promote climate change mitigation, by preferring companies with lower **Greenhouse Gas Intensity**, with the objective of meeting a predetermined Greenhouse Gas intensity target;
- (3) support sustainable development, through 'sustainable investments' in accordance with art. 2(17) SFDR. Sustainable investments will consist of investments in companies contributing to the achievement of the **UN Sustainable Development Goals** (plus instruments awarded the 'sustainable development' label by KBC Asset Management NV on the advice of the Responsible Investing Advisory Board).

More information on the investment policy for Responsible Investing funds is available at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > Investment policy for Responsible Investing funds.

#### (1) ESG-risk score

The contribution to the integration of sustainability into policy decisions of the companies is measured based on an ESG-risk score. This score represents the aggregated performance assessment of a given company against a series of ESG criteria which are grounded to the extent possible against objective measures. The main factors underpinning the ESG criteria are:

- respect for the environment (e.g., reduction in greenhouse gas emissions);
- attention to society (e.g., employee working conditions); and
- corporate governance (e.g., independence and diversity of the board of directors).

At least 90% of the corporate investments in the portfolio, as measured by assets under management, must have an ESG risk score. The ESG risk score for companies is an ESG risk score supplied by a data provider, and based on internal research as well.

These lists are not exhaustive and may be changed under the supervision of the Responsible Investing Advisory Board.

To achieve this objective, the ESG-risk score of the portfolio for companies is compared to following benchmark: MSCI North America-Net Return index.

To calculate the ESG-risk score at portfolio level, the weighted average of the ESG (risk) scores of the positions in the sub-fund are taken into account. Technical items such as cash and derivatives are not taken into account and also companies or countries for which no data is available are left out. The weights used in the calculation depend on the size of the positions in the sub-fund, rescaled for these items.

More information on the ESG-risk score and the concrete goals of the sub-fund can be found in the 'Annex for KBC Equity Fund North American Continent Responsible Investing' to the prospectus.

The targets can be revised upwards or downwards.

#### (2) Greenhouse Gas Intensity

The objective to promote climate change mitigation, by favoring lower greenhouse gas intensity companies, with the goal of meeting a predetermined greenhouse gas intensity target covers at least 90% of the portfolio. The objective does not apply to companies for which data is not available.

The contribution of companies to climate change mitigation is measured based on their greenhouse gas intensity. Greenhouse gas intensity is defined as absolute greenhouse gas emissions (in tonnes CO<sub>2</sub> equivalent), divided by revenues (in mln USD).

The sub-fund's target in terms of greenhouse gas intensity is assessed on two targets whereby the most strict of the two will determine the target applied: 15% better than the benchmark MSCI North America-Net Return index and a reduction of 50% by 2030 compared to the benchmark MSCI North America-Net Return index in 2019.

More information on Greenhouse Gas Intensity and the concrete goals of the sub-fund can be found in the 'Annex for KBC Equity Fund North American Continent Responsible Investing' to the prospectus.

The targets may be revised upwards or downwards.

### **(3) UN Sustainable Development Goals**

To support sustainable development, the sub-fund commits to invest a minimum proportion of the portfolio in companies that contribute to the UN Sustainable Development Goals. The UN Sustainable Development Goals include both social and environmental objectives.

Companies are considered to contribute to sustainable development when at least 20% of the revenues are linked to the UN Sustainable Development Goals. The activities of the companies are assessed on multiple sustainable themes that can be linked to the UN Sustainable Development Goals.

Instruments of companies that meet these requirements are designated as "sustainable investments," according to Article 2(17) SFDR.

In addition, KBC Asset Management NV can award the "sustainable development" label to instruments, on the advice of the Responsible Investing Advisory Board. In that case, these investments shall also qualify as "sustainable investments," according to Article 2(17) SFDR.

More information about the methodology used to qualify investments as investments which contribute to the UN Sustainable Development Goals can be found in the 'Annex for KBC Equity Fund North American Continent Responsible Investing' to the prospectus.

### **Potential Exceptions**

It cannot be ruled out, however, that very limited investments may be made temporarily in assets that do not meet the above criteria. The reasons for this include the following:

- Developments as a result of which a company can no longer be regarded as eligible after purchase;
- Corporate events, such as a merger of one company with another, where the merged company can no longer be considered an eligible company based on the above criteria;
- Incorrect data as a result of which assets are invested (unintentionally and erroneously) in assets purchased when it should not have been eligible for the sub-fund;
- A planned update of the screening criteria as a result of which assets should be excluded from the sub-fund, but which the management company chooses to refrain from selling immediately in the best interest of the customer;
- External circumstances such as market movements and updates of external data can lead to investment solutions failing to achieve the abovementioned targets.

In these cases, the fund manager will replace the assets concerned with more appropriate assets as soon as possible, always taking into account the sole interest of the investor.

In addition, for the purpose of efficient portfolio management, the fund manager may to a significant degree use derivatives relating to assets that would not be eligible for inclusion in the sub-fund, in so far as there is no serviceable and comparable alternative available on the market. In addition, the counterparties with which the derivative transactions are entered into may not necessarily be issuers having a responsible nature.

### **Taxonomy related information**

At the date of this prospectus, the sub-fund does not commit to invest a minimum proportion of its assets in environmentally sustainable economic activities which contribute to any of the environmental objectives set out in Article 9 of the Regulation (EU) 2020/852 of the European Parliament and of the Council of 18 June 2020 on the establishment of a framework to facilitate sustainable investment ('EU Taxonomy Framework'). The minimum proportion of investments in environmentally sustainable economic activities within the meaning of the EU Taxonomy Framework is 0%. This will be monitored on a regular basis and as soon as sufficiently reliable, timely and verifiable data from issuers or invested companies is available, the prospectus may be updated.

Non-financial companies are considered to contribute to sustainable development if at least 20% of sales are aligned to the EU Taxonomy Framework based on Trucost data. For companies in the financial sector, a different methodology applies. For credit institutions, the alignment with the EU Taxonomy Framework is based on the Green Asset Ratio, while for other financial companies the alignment with the EU Taxonomy Framework is based on the alignment of their investment portfolios. Instruments of companies that meet these requirements are referred to as "sustainable investments," according to art. 2(17) SFDR. More information on the percentage in the portfolio that was considered "sustainable investments with an environmental objective aligned with the EU Taxonomy Framework " based on this criterion during the reporting period, can be found in the annual reports for this sub-fund.

More information on the EU Taxonomy Framework can be found in the 'Annex for KBC Equity Fund North American Continent Responsible Investing' to the prospectus.

### **Transparency of adverse sustainability impacts**

The sub-fund considers the principal adverse impacts of its investment decisions on sustainability factors by taking into account the principal adverse impact indicators ('PAI'), as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability disclosure in the financial services sector ('SFDR').

The principal adverse impacts on sustainability factors are explicitly taken into account through the General exclusion policy for conventional and Responsible Investing funds and the exclusion policy for Responsible Investing funds. More information on the principal adverse impact indicators taken into account can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > General exclusion policy for conventional and Responsible Investing funds and [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > Exclusion policy for Responsible Investing funds.

In addition, the principal adverse impacts on sustainability factors are implicitly taken into account through the Proxy Voting and Engagement Policy of KBC Asset Management NV (more information can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > Retrospective Proxy Voting - overview > Proxy Voting and Engagement Policy).

More information on how the sub-fund aims to consider the principal adverse impacts on sustainability factors can also be found in the 'Annex for KBC Equity Fund North American Continent Responsible Investing' to the prospectus. A statement on how the sub-fund has considered the principal adverse impacts on sustainability factors during the reporting period can also be found in the annual reports for this sub-fund.

### **Benchmark information**

The fund is actively managed with reference to the following benchmark: MSCI North America-Net Return index.

However, it is not the aim of the fund to replicate the benchmark. The composition of the benchmark is taken into account when compiling the portfolio.

In line with its investment policy, the sub-fund may not invest in all the instruments included in the benchmark.

When compiling the portfolio, the manager may also decide to invest in instruments that are not included in the benchmark, or indeed not to invest in instruments that are included.

The composition of the portfolio will vary from that of the benchmark, as the composition of the benchmark is not fully consistent with the environmental and/or social characteristics promoted by the sub-fund. The use of the benchmark does not detract from the responsible character of the portfolio. The responsible character is guaranteed by the aforementioned Responsible Investing methodology.

The benchmark is also used to determine the fund's risk limitation mechanism. This limits the extent to which the fund's return may deviate from the benchmark.

The longterm expected tracking error for this fund is 3.00%. The tracking error measures the volatility of the fund's return relative to that of the benchmark. The higher the tracking error, the more the fund's return fluctuates relative to the benchmark. Market conditions may cause the actual tracking error to differ from the expected tracking error.

#### Required disclaimers for benchmark providers:

Source: MSCI. No MSCI Party nor any other party involved in or related to compiling, computing or creating the MSCI data, makes any express or implied warranties or representations with respect to such data (or the results to be obtained by the use thereof), and all such parties hereby expressly disclaim all warranties of originality, accuracy, completeness, merchantability or fitness for a particular purpose with respect to any of such data. Without limiting any of the foregoing, in no event shall MSCI, any of its affiliates, or any third party involved in compiling, computing, or creating the data have any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages. No further distribution or dissemination of the MSCI data is permitted without MSCI's express written consent.

### **Volatility of the net asset value**

The volatility of the net asset value may be high due to the composition of the portfolio.

## 3. Risk

### Sub-fund's risk profile

Investors must take note of the specific risk factors set out below, the description of the risks given under the heading 'Information concerning the Bevek - F.Information on the risk profile of the UCITS', and the 'What are the risks and what could I get in return?' section of the key information document.

Summary table of risks assessed by the sub-fund:

| Risk type                 | Concise definition of the risk                                                                                                      |                                                       | Explanation:                                                                                                                                                                                                      |
|---------------------------|-------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Market risk               | The risk that the entire market of an asset class will decline, thus affecting the prices and values of the assets in the portfolio | high                                                  | the level of the risk reflects the volatility of the stock market.                                                                                                                                                |
| Credit risk               | The risk that an issuer or a counterparty will default                                                                              | low                                                   |                                                                                                                                                                                                                   |
| Settlement risk           | The risk that settlement of a transaction via a payment system will not take place as expected                                      | low                                                   |                                                                                                                                                                                                                   |
| Liquidity risk            | The risk that a position cannot be liquidated in a timely manner at a reasonable price                                              | low                                                   |                                                                                                                                                                                                                   |
| Exchange or currency risk | The risk that the value of an investment will be affected by changes in exchange rates                                              | For the share class Classic Shares : low              |                                                                                                                                                                                                                   |
|                           |                                                                                                                                     | For the share class Institutional B Shares EUR : high | since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates. |
| Custody risk              | The risk of loss of assets held in custody with a custodian or sub-custodian                                                        | low                                                   |                                                                                                                                                                                                                   |
| Concentration risk        | The risk relating to a large concentration of investments in specific assets or in specific markets                                 | moderate                                              | there is a concentration of investments in the shares of companies from the North American continent.                                                                                                             |
| Performance risk          | Risks to return                                                                                                                     | high                                                  | the level of the risk reflects the volatility of the stock market.                                                                                                                                                |
| Capital risk              | Risks to capital                                                                                                                    | moderate                                              | There is no capital protection.                                                                                                                                                                                   |
| Flexibility risk          | Inflexibility both within the product and constraints on switching to other providers                                               | low                                                   |                                                                                                                                                                                                                   |
| Inflation risk            | Risk of inflation                                                                                                                   | low                                                   |                                                                                                                                                                                                                   |
| Environmental factors     | Uncertainty regarding the immutability of environmental factors, such as the tax regime                                             | low                                                   |                                                                                                                                                                                                                   |

### Risk profile of the typical investor

Profile of the typical investor for which the sub-fund has been designed : Highly dynamic profile.

The risk profile mentioned per sub-fund has been determined from the point of view of an investor in the euro area and may differ from that of an investor in other currency zones. More information on the risk profiles can be obtained at [www.kbc.be/riskprofile](http://www.kbc.be/riskprofile).

## 4. Information concerning the trading of shares

### How to buy and sell shares and switch between sub-funds

If it turns out that shares are being held by persons other than those permitted to hold them, the Company may, in accordance with article 8.2 of the articles of association, and without charge (except any taxes due and any charges to cover the cost of realising the assets), redeem those shares.

| Cut-off time for receiving orders at the financial service providers in Belgium <sup>(1)</sup><br><br>Date of published net asset value | Date the net asset value is calculated | Actual values used                                                                                                                                                                                                                                     | Date of payment or repayment of the orders |
|-----------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------|
| <b>D</b><br>(every banking day <sup>(2)</sup> at 2 pm CET)<br>also referred to as 'Dealing Day'                                         | <b>D+1 banking day</b>                 | <b>D</b> if maximum 20% of the actual values are already known on D<br>(every banking day <sup>(2)</sup> at 2 pm CET)<br><br><b>D+1</b> if more than 20% of the actual values are already known on D<br>(every banking day <sup>(2)</sup> at 2 pm CET) | <b>D+3 banking days</b>                    |

<sup>(1)</sup> The cut-off time for receiving orders stated above applies to orders investors place directly with the financial services providers in Belgium.

If an investor places an order with a financial institution other than the financial service providers in Belgium, he/she must find out from that institution what cut-off time (time + date) applies to the order he/she wishes to place so that the institution in question can take the necessary action to ensure that the order reaches the financial service providers in Belgium before 2 pm CET on day D in order to qualify as an order of day D.

<sup>(2)</sup> with the exception of banking days on which one or more markets on which more than 20% of the sub-fund's assets are listed are closed or if transactions are suspended or restricted.

### Calculation of the net asset value

The net asset value is calculated daily, as described above, except on days on which no shares may be issued or redeemed. Swing pricing may be applied as described in the 'Information concerning the Bevek – N. Liquidity management tools' section.

### Publication of the net asset value

The 'Information concerning the Bevek – I. Additional information – Publication of the net asset value' section specifies where the result of the calculation of the net asset value can be viewed.

If the profitability of the sub-fund is jeopardised due to a limited number of subscriptions during the initial subscription period (less than 5 000 000 euros), the Board of Directors of the Bevek may decide to refuse the orders placed during the initial subscription period and not to proceed with the commercialisation of the sub-fund.

## 5. Types of shares and fees and charges

---

Shares may be in registered or book-entry form, as the shareholder chooses. No certificates representing the registered shares are issued. Instead, confirmation is supplied of entry in the register of shareholders.

### Dividend payment

After the close of the financial year, the General Meeting determines the portion of the result, which, within the limitations imposed by the Law of 3 August 2012 relative to undertakings for collective investment complying with the conditions of Directive 2009/65/EC and the undertakings for investment in receivables, is to be paid to the holders of distribution shares.

The holders of capitalisation shares are not entitled to receive a dividend. The portion of the annual net income accruing to them is capitalised in favour of these shares.

The shareholders will receive payment within six months of the close of the financial year via institutions designated for this purpose by the General Meeting.

The General Meeting may decide to proceed to interim payments in accordance with the provisions of the law.

The Board of Directors may, in accordance with the provisions laid down in the articles of association and within the limits of the law, decide to pay out interim dividends.

The information on the type and/or class of shares and the fees and charges associated with them is set out below by type and/or share class.

# Information concerning the sub-fund Rest of Europe

## 1. Basic details

---

### Name

Rest of Europe

### Date of incorporation

4 June 2020

### Life

Unlimited

### Delegation of the management of the investment portfolio

There is no delegation of the management of the investment portfolio.

### Stock exchange listing

Not applicable.

## 2. Investment information

---

### Sub-fund's object

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

### Sub-fund's investment policy

#### *Permitted asset classes*

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

#### *Restrictions of the investment policy*

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

## Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. **Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.**

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

## Selected strategy

The assets are mainly invested in shares of companies from Member States of the European Union that are not members of the euro area, as well as The United Kingdom, Switzerland and Norway.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

## Transparency of adverse sustainability impacts

The sub-fund considers the principal adverse impacts of its investment decisions on sustainability factors ('PAI') as described by the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector ('SFDR')

The principal adverse impacts on sustainability factors are explicitly taken into account through the General exclusion policy. More information on the principal adverse impact indicators that are taken into account can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > General exclusion policy for conventional and Responsible Investing funds.

In addition, the principal adverse impacts on sustainability factors are implicitly taken into account through the Proxy Voting and Engagement Policy of KBC Asset Management NV (more information can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > Retrospective Proxy Voting - overview > Proxy Voting and Engagement Policy).

KBC Asset Management NV exercises the voting rights of the shares it manages in accordance with the Proxy Voting and Engagement Policy. Where appropriate, KBC Asset Management NV will engage in dialogue with the management of the companies concerned, if necessary before voting.

Information on the principal adverse impacts on sustainability factors can also be found in the annual report for this sub-fund.

## Benchmark information

The fund is actively managed with reference to the following benchmark: MSCI Europe Ex EMU - Net Return Index.

However, it is not the aim of the fund to replicate the benchmark. The composition of the benchmark is taken into account when compiling the portfolio.

When compiling the portfolio, the manager may also decide to invest in instruments that are not included in the benchmark, or indeed not to invest in instruments that are included.

The composition of the portfolio will to a large extent be similar to that of the benchmark.

The benchmark is also used to assess the performance of the sub-fund.

The benchmark is also used to determine the fund's risk limitation mechanism. This limits the extent to which the fund's return may deviate from the benchmark.

The longterm expected tracking error for this fund is 3.00%. The tracking error measures the volatility of the fund's return relative to that of the benchmark. The higher the tracking error, the more the fund's return fluctuates relative to the benchmark. Market conditions may cause the actual tracking error to differ from the expected tracking error.

Required disclaimers for benchmark providers:

No further distribution or dissemination of the MSCI data is permitted without MSCI's express written consent.

**Volatility of the net asset value**

**The volatility of the net asset value may be high due to the composition of the portfolio.**

## 3. Risk

### Sub-fund's risk profile

Investors must take note of the specific risk factors set out below, the description of the risks given under the heading 'Information concerning the Bevek - F.Information on the risk profile of the UCITS', and the 'What are the risks and what could I get in return?' section of the key information document.

Summary table of risks assessed by the sub-fund:

| Risk type                 | Concise definition of the risk                                                                                                      |          | Explanation:                                                                                                                                                                                                      |
|---------------------------|-------------------------------------------------------------------------------------------------------------------------------------|----------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Market risk               | The risk that the entire market of an asset class will decline, thus affecting the prices and values of the assets in the portfolio | high     | the level of the risk reflects the volatility of the stock market.                                                                                                                                                |
| Credit risk               | The risk that an issuer or a counterparty will default                                                                              | low      |                                                                                                                                                                                                                   |
| Settlement risk           | The risk that settlement of a transaction via a payment system will not take place as expected                                      | low      |                                                                                                                                                                                                                   |
| Liquidity risk            | The risk that a position cannot be liquidated in a timely manner at a reasonable price                                              | low      |                                                                                                                                                                                                                   |
| Exchange or currency risk | The risk that the value of an investment will be affected by changes in exchange rates                                              | high     | since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates. |
| Custody risk              | The risk of loss of assets held in custody with a custodian or sub-custodian                                                        | low      |                                                                                                                                                                                                                   |
| Concentration risk        | The risk relating to a large concentration of investments in specific assets or in specific markets                                 | moderate | there is a concentration of the investments in shares of companies from European Union member states outside the euro-area and from the United Kingdom, Switzerland and Norway.                                   |
| Performance risk          | Risks to return                                                                                                                     | high     | the level of the risk reflects the volatility of the stock market.                                                                                                                                                |
| Capital risk              | Risks to capital                                                                                                                    | moderate | There is no capital protection.                                                                                                                                                                                   |
| Flexibility risk          | Inflexibility both within the product and constraints on switching to other providers                                               | low      |                                                                                                                                                                                                                   |
| Inflation risk            | Risk of inflation                                                                                                                   | low      |                                                                                                                                                                                                                   |
| Environmental factors     | Uncertainty regarding the immutability of environmental factors, such as the tax regime                                             | low      |                                                                                                                                                                                                                   |

### Risk profile of the typical investor

Profile of the typical investor for which the sub-fund has been designed : Highly dynamic profile.

The risk profile mentioned per sub-fund has been determined from the point of view of an investor in the euro area and may differ from that of an investor in other currency zones. More information on the risk profiles can be obtained at [www.kbc.be/riskprofile](http://www.kbc.be/riskprofile).

## 4. Information concerning the trading of shares

### How to buy and sell shares and switch between sub-funds

If it turns out that shares are being held by persons other than those permitted to hold them, the Company may, in accordance with article 8.2 of the articles of association, and without charge (except any taxes due and any charges to cover the cost of realising the assets), redeem those shares.

| Cut-off time for receiving orders at the financial service providers in Belgium <sup>(1)</sup><br><br>Date of published net asset value | Date the net asset value is calculated | Actual values used                                                                                                                                                                                                                                           | Date of payment or repayment of the orders |
|-----------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------|
| <b>D</b><br>(every banking day <sup>(2)</sup><br>at 2 pm CET)<br>also referred to as 'Dealing Day'                                      | <b>D+1 banking day</b>                 | <b>D</b> if maximum 20% of the actual values are already known on D<br>(every banking day <sup>(2)</sup><br>at 2 pm CET)<br><br><b>D+1</b> if more than 20% of the actual values are already known on D<br>(every banking day <sup>(2)</sup><br>at 2 pm CET) | <b>D+3 banking days</b>                    |

<sup>(1)</sup> The cut-off time for receiving orders stated above applies to orders investors place directly with the financial services providers in Belgium.

If an investor places an order with a financial institution other than the financial service providers in Belgium, he/she must find out from that institution what cut-off time (time + date) applies to the order he/she wishes to place so that the institution in question can take the necessary action to ensure that the order reaches the financial service providers in Belgium before 2 pm CET on day D in order to qualify as an order of day D.

<sup>(2)</sup> with the exception of banking days on which one or more markets on which more than 20% of the sub-fund's assets are listed are closed or if transactions are suspended or restricted.

### Calculation of the net asset value

The net asset value is calculated daily, as described above, except on days on which no shares may be issued or redeemed. Swing pricing may be applied as described in the 'Information concerning the Bevek – N. Liquidity management tools' section.

### Publication of the net asset value

The 'Information concerning the Bevek – I. Additional information – Publication of the net asset value' section specifies where the result of the calculation of the net asset value can be viewed.

If the profitability of the sub-fund is jeopardised due to a limited number of subscriptions during the initial subscription period (less than 5 000 000 euros), the Board of Directors of the Bevek may decide to refuse the orders placed during the initial subscription period and not to proceed with the commercialisation of the sub-fund.

## 5. Types of shares and fees and charges

---

Shares may be in registered or book-entry form, as the shareholder chooses. No certificates representing the registered shares are issued. Instead, confirmation is supplied of entry in the register of shareholders.

### Dividend payment

After the close of the financial year, the General Meeting determines the portion of the result, which, within the limitations imposed by the Law of 3 August 2012 relative to undertakings for collective investment complying with the conditions of Directive 2009/65/EC and the undertakings for investment in receivables, is to be paid to the holders of distribution shares.

The holders of capitalisation shares are not entitled to receive a dividend. The portion of the annual net income accruing to them is capitalised in favour of these shares.

The shareholders will receive payment within six months of the close of the financial year via institutions designated for this purpose by the General Meeting.

The General Meeting may decide to proceed to interim payments in accordance with the provisions of the law.

The Board of Directors may, in accordance with the provisions laid down in the articles of association and within the limits of the law, decide to pay out interim dividends.

The information on the type and/or class of shares and the fees and charges associated with them is set out below by type and/or share class.

# Information concerning the sub-fund Rest of Europe Responsible Investing

## 1. Basic details

---

### Name

Rest of Europe Responsible Investing

### Date of incorporation

2 November 2018

### Life

Unlimited

### Delegation of the management of the investment portfolio

There is no delegation of the management of the investment portfolio.

### Stock exchange listing

Not applicable.

## 2. Investment information

---

### Sub-fund's object

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

### Sub-fund's investment policy

#### *Permitted asset classes*

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

#### *Restrictions of the investment policy*

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

## Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. **Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.**

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

## Selected strategy

The assets are mainly invested in shares of companies from Member States of the European Union that are not members of the euro area, as well as The United Kingdom, Switzerland and Norway.

## Information related to Responsible Investing

Within the above limits, the sub-fund pursues responsible investment objectives based on a dualistic approach: a negative screening and a positive selection methodology.

KBC Asset Management NV has a team of specialist researchers responsible for this dualistic approach. They are assisted by an independent advisory board (the “**Responsible Investing Advisory Board**”) comprised of up to twelve persons, who are not affiliated to KBC Asset Management NV, and whose sole responsibility is to supervise the dualistic approach and activities of the specialist researchers. The secretariat of the advisory board is handled by a representative of KBC Asset Management NV. Moreover, KBC Asset Management NV works with data suppliers with expertise in Responsible Investing that provide data to the specialized researchers, who process and complete the data with publicly available information (including annual reports, press publications, etc.).

The sub-fund promotes a combination of environmental and/or social characteristics and, even though it does not have sustainable investments as an objective, it shall invest a minimum proportion of its assets in economic activities that contribute to the achievement of environmental or social objectives (i.e. ‘sustainable investments’).

The companies in which it invests must follow good governance practices.

The sub-fund is compliant with the transparency obligations of article 8(1) of Regulation (EU) 2019/2088 of the European Parliament and of the council of 27 November 2019 on sustainability-related disclosures in the financial services sector (‘SFDR’). More information on how the sub-fund promotes environmental and/or social characteristics can be found in the ‘Annex for KBC Equity Fund Rest of Europe Responsible Investing’ to the prospectus. This annex specifically covers the pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852.

In addition, the exclusions set out in Article 12(1)(a) to (g) of Delegated Regulation (EU) 2020/1818 (“Exclusions for Paris Agreement-aligned EU benchmarks”) are respected by this sub-fund.

The sub-fund complies with the European Securities and Markets Authority (ESMA) guidelines on fund names using ESG or sustainability-related terms.

### Negative screening

In practical terms the end result of this negative screening procedure is that the sub-fund excludes companies in advance from the Responsible Investment universe which fall foul of the exclusion policy available on [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > Exclusion policy for Responsible Investing funds.

The application of these policies means that:

- companies involved in certain activities are excluded from the sub-fund's investment universe. A distinction can be made between companies that are excluded if they exceed a certain turnover threshold in relation to specific activities, such as conventional weapons, tobacco, gambling or adult entertainment, and those that are excluded outright because they are involved in specific activities, such as controversial weapons, agricultural commodities or the mining of thermal coal, among others.
- The sub-fund may nevertheless invest in companies involved in conventional weapons and/or nuclear weapons that exceed certain turnover thresholds, provided they are included on the whitelist as specified in the policy. The whitelist is a list drawn up by KBC Group and includes companies involved in conventional weapons and/or nuclear weapons, but which are nevertheless deemed acceptable as investments within funds that invest responsibly, taking into account factors such as the proportion of arms sales to non-NATO countries and a possible involvement in human rights controversies related to armed conflict.

This screening also ensures that companies who seriously violate fundamental principles of environmental protection, social responsibility and good governance, among others, are excluded from the sub-fund's investment universe.

More information regarding the specific exclusions can also be found in the "Annex for KBC Equity Fund Rest of Europe Responsible Investing" to the prospectus.

These negative screening principles are not exhaustive and may be adapted from time to time under the supervision of the Responsible Investing Advisory Board.

#### Positive selection methodology

Within the defined investment universe and other limits described above, the responsible investment objectives of the sub-fund are the following:

- (1) promote the integration of sustainability into the policy decisions of companies by preferring companies with a better **ESG risk score**, where ESG stands for 'Environmental, Social and Governance', and
- (2) promote climate change mitigation, by preferring companies with lower **Greenhouse Gas Intensity**, with the objective of meeting a predetermined Greenhouse Gas intensity target;
- (3) support sustainable development, through 'sustainable investments' in accordance with art. 2(17) SFDR. Sustainable investments will consist of investments in companies contributing to the achievement of the **UN Sustainable Development Goals** (plus instruments awarded the 'sustainable development' label by KBC Asset Management NV on the advice of the Responsible Investing Advisory Board).

More information on the investment policy for Responsible Investing funds is available at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > Investment policy for Responsible Investing funds.

#### **(1) ESG-risk score**

The contribution to the integration of sustainability into policy decisions of the companies is measured based on an ESG-risk score. This score represents the aggregated performance assessment of a given company against a series of ESG criteria which are grounded to the extent possible against objective measures. The main factors underpinning the ESG criteria are:

- respect for the environment (e.g., reduction in greenhouse gas emissions);
- attention to society (e.g., employee working conditions); and
- corporate governance (e.g., independence and diversity of the board of directors).

At least 90% of the corporate investments in the portfolio, as measured by assets under management, must have an ESG risk score. The ESG risk score for companies is an ESG risk score supplied by a data provider, and based on internal research as well.

These lists are not exhaustive and may be changed under the supervision of the Responsible Investing Advisory Board.

To achieve this objective, the ESG-risk score of the portfolio for companies is compared to following benchmark: MSCI Europe Ex EMU - Net Return Index.

To calculate the ESG-risk score at portfolio level, the weighted average of the ESG (risk) scores of the positions in the sub-fund are taken into account. Technical items such as cash and derivatives are not taken into account and also companies or countries for which no data is available are left out. The weights used in the calculation depend on the size of the positions in the sub-fund, rescaled for these items.

More information on the ESG-risk score and the concrete goals of the sub-fund can be found in the 'Annex for KBC Equity Fund Rest of Europe Responsible Investing' to the prospectus.

The targets can be revised upwards or downwards.

#### **(2) Greenhouse Gas Intensity**

The objective to promote climate change mitigation, by favoring lower greenhouse gas intensity companies, with the goal of meeting a predetermined greenhouse gas intensity target covers at least 90% of the portfolio. The objective does not apply to companies for which data is not available.

The contribution of companies to climate change mitigation is measured based on their greenhouse gas intensity. Greenhouse gas intensity is defined as absolute greenhouse gas emissions (in tonnes CO<sub>2</sub> equivalent), divided by revenues (in mln USD).

The sub-fund's target in terms of greenhouse gas intensity is assessed on two targets whereby the most strict of the two will determine the target applied: 15% better than the benchmark MSCI Europe Ex EMU - Net Return Index and a reduction of 50% by 2030 compared to the benchmark MSCI Europe Ex EMU - Net Return Index in 2019.

More information on Greenhouse Gas Intensity and the concrete goals of the sub-fund can be found in the 'Annex for KBC Equity Fund Rest of Europe Responsible Investing' to the prospectus.

The targets may be revised upwards or downwards.

### **(3) UN Sustainable Development Goals**

To support sustainable development, the sub-fund commits to invest a minimum proportion of the portfolio in companies that contribute to the UN Sustainable Development Goals. The UN Sustainable Development Goals include both social and environmental objectives.

Companies are considered to contribute to sustainable development when at least 20% of the revenues are linked to the UN Sustainable Development Goals. The activities of the companies are assessed on multiple sustainable themes that can be linked to the UN Sustainable Development Goals.

Instruments of companies that meet these requirements are designated as "sustainable investments," according to Article 2(17) SFDR.

In addition, KBC Asset Management NV can award the "sustainable development" label to instruments, on the advice of the Responsible Investing Advisory Board. In that case, these investments shall also qualify as "sustainable investments," according to Article 2(17) SFDR.

More information about the methodology used to qualify investments as investments which contribute to the UN Sustainable Development Goals can be found in the 'Annex for KBC Equity Fund Rest of Europe Responsible Investing' to the prospectus.

### **Potential Exceptions**

It cannot be ruled out, however, that very limited investments may be made temporarily in assets that do not meet the above criteria. The reasons for this include the following:

- Developments as a result of which a company can no longer be regarded as eligible after purchase;
- Corporate events, such as a merger of one company with another, where the merged company can no longer be considered an eligible company based on the above criteria;
- Incorrect data as a result of which assets are invested (unintentionally and erroneously) in assets purchased when it should not have been eligible for the sub-fund;
- A planned update of the screening criteria as a result of which assets should be excluded from the sub-fund, but which the management company chooses to refrain from selling immediately in the best interest of the customer;
- External circumstances such as market movements and updates of external data can lead to investment solutions failing to achieve the abovementioned targets.

In these cases, the fund manager will replace the assets concerned with more appropriate assets as soon as possible, always taking into account the sole interest of the investor.

In addition, for the purpose of efficient portfolio management, the fund manager may to a significant degree use derivatives relating to assets that would not be eligible for inclusion in the sub-fund, in so far as there is no serviceable and comparable alternative available on the market. In addition, the counterparties with which the derivative transactions are entered into may not necessarily be issuers having a responsible nature.

### **Taxonomy related information**

At the date of this prospectus, the sub-fund does not commit to invest a minimum proportion of its assets in environmentally sustainable economic activities which contribute to any of the environmental objectives set out in Article 9 of the Regulation (EU) 2020/852 of the European Parliament and of the Council of 18 June 2020 on the establishment of a framework to facilitate sustainable investment ('EU Taxonomy Framework'). The minimum proportion of investments in environmentally sustainable economic activities within the meaning of the EU Taxonomy Framework is 0%. This will be monitored on a regular basis and as soon as sufficiently reliable, timely and verifiable data from issuers or invested companies is available, the prospectus may be updated.

Non-financial companies are considered to contribute to sustainable development if at least 20% of sales are aligned to the EU Taxonomy Framework based on Trucost data. For companies in the financial sector, a different methodology applies. For credit institutions, the alignment with the EU Taxonomy Framework is based on the Green Asset Ratio, while for other financial companies the alignment with the EU Taxonomy Framework is based on the alignment of their investment portfolios. Instruments of companies that meet these requirements are referred to as "sustainable investments," according to art. 2(17) SFDR. More information on the percentage in the portfolio that was considered "sustainable investments with an environmental objective aligned with the EU Taxonomy Framework " based on this criterion during the reporting period, can be found in the annual reports for this sub-fund.

More information on the EU Taxonomy Framework can be found in the 'Annex for KBC Equity Fund Rest of Europe Responsible Investing' to the prospectus.

### **Transparency of adverse sustainability impacts**

The sub-fund considers the principal adverse impacts of its investment decisions on sustainability factors by taking into account the principal adverse impact indicators ('PAI'), as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability disclosure in the financial services sector ('SFDR').

The principal adverse impacts on sustainability factors are explicitly taken into account through the General exclusion policy for conventional and Responsible Investing funds and the exclusion policy for Responsible Investing funds. More information on the principal adverse impact indicators taken into account can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > General exclusion policy for conventional and Responsible Investing funds and [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > Exclusion policy for Responsible Investing funds.

In addition, the principal adverse impacts on sustainability factors are implicitly taken into account through the Proxy Voting and Engagement Policy of KBC Asset Management NV (more information can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > Retrospective Proxy Voting - overview > Proxy Voting and Engagement Policy).

More information on how the sub-fund aims to consider the principal adverse impacts on sustainability factors can also be found in the 'Annex for KBC Equity Fund Rest of Europe Responsible Investing' to the prospectus. A statement on how the sub-fund has considered the principal adverse impacts on sustainability factors during the reporting period can also be found in the annual reports for this sub-fund.

### **Benchmark information**

The fund is actively managed with reference to the following benchmark: MSCI Europe Ex EMU - Net Return Index.

However, it is not the aim of the fund to replicate the benchmark. The composition of the benchmark is taken into account when compiling the portfolio.

In line with its investment policy, the sub-fund may not invest in all the instruments included in the benchmark.

When compiling the portfolio, the manager may also decide to invest in instruments that are not included in the benchmark, or indeed not to invest in instruments that are included.

The composition of the portfolio will vary from that of the benchmark, as the composition of the benchmark is not fully consistent with the environmental and/or social characteristics promoted by the sub-fund. The use of the benchmark does not detract from the responsible character of the portfolio. The responsible character is guaranteed by the aforementioned Responsible Investing methodology.

The benchmark is also used to determine the fund's risk limitation mechanism. This limits the extent to which the fund's return may deviate from the benchmark.

The longterm expected tracking error for this fund is 3.50%. The tracking error measures the volatility of the fund's return relative to that of the benchmark. The higher the tracking error, the more the fund's return fluctuates relative to the benchmark. Market conditions may cause the actual tracking error to differ from the expected tracking error.

#### **Required disclaimers for benchmark providers:**

Source: MSCI. No MSCI Party nor any other party involved in or related to compiling, computing or creating the MSCI data, makes any express or implied warranties or representations with respect to such data (or the results to be obtained by the use thereof), and all such parties hereby expressly disclaim all warranties of originality, accuracy, completeness, merchantability or fitness for a particular purpose with respect to any of such data. Without limiting any of the foregoing, in no event shall MSCI, any of its affiliates, or any third party involved in compiling, computing, or creating the data have any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages. No further distribution or dissemination of the MSCI data is permitted without MSCI's express written consent.

### **Volatility of the net asset value**

**The volatility of the net asset value may be high due to the composition of the portfolio.**

## 3. Risk

### Sub-fund's risk profile

Investors must take note of the specific risk factors set out below, the description of the risks given under the heading 'Information concerning the Bevek - F.Information on the risk profile of the UCITS', and the 'What are the risks and what could I get in return?' section of the key information document.

Summary table of risks assessed by the sub-fund:

| Risk type                 | Concise definition of the risk                                                                                                      |          | Explanation:                                                                                                                                                                                                      |
|---------------------------|-------------------------------------------------------------------------------------------------------------------------------------|----------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Market risk               | The risk that the entire market of an asset class will decline, thus affecting the prices and values of the assets in the portfolio | high     | the level of the risk reflects the volatility of the stock market.                                                                                                                                                |
| Credit risk               | The risk that an issuer or a counterparty will default                                                                              | low      |                                                                                                                                                                                                                   |
| Settlement risk           | The risk that settlement of a transaction via a payment system will not take place as expected                                      | low      |                                                                                                                                                                                                                   |
| Liquidity risk            | The risk that a position cannot be liquidated in a timely manner at a reasonable price                                              | low      |                                                                                                                                                                                                                   |
| Exchange or currency risk | The risk that the value of an investment will be affected by changes in exchange rates                                              | high     | since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates. |
| Custody risk              | The risk of loss of assets held in custody with a custodian or sub-custodian                                                        | low      |                                                                                                                                                                                                                   |
| Concentration risk        | The risk relating to a large concentration of investments in specific assets or in specific markets                                 | moderate | there is a concentration of the investments in shares of companies from European Union member states outside the euro-area and from the United Kingdom, Switzerland and Norway.                                   |
| Performance risk          | Risks to return                                                                                                                     | high     | the level of the risk reflects the volatility of the stock market.                                                                                                                                                |
| Capital risk              | Risks to capital                                                                                                                    | moderate | There is no capital protection.                                                                                                                                                                                   |
| Flexibility risk          | Inflexibility both within the product and constraints on switching to other providers                                               | low      |                                                                                                                                                                                                                   |
| Inflation risk            | Risk of inflation                                                                                                                   | low      |                                                                                                                                                                                                                   |
| Environmental factors     | Uncertainty regarding the immutability of environmental factors, such as the tax regime                                             | low      |                                                                                                                                                                                                                   |

### Risk profile of the typical investor

Profile of the typical investor for which the sub-fund has been designed : Highly dynamic profile.

The risk profile mentioned per sub-fund has been determined from the point of view of an investor in the euro area and may differ from that of an investor in other currency zones. More information on the risk profiles can be obtained at [www.kbc.be/riskprofile](http://www.kbc.be/riskprofile).

## 4. Information concerning the trading of shares

### How to buy and sell shares and switch between sub-funds

If it turns out that shares are being held by persons other than those permitted to hold them, the Company may, in accordance with article 8.2 of the articles of association, and without charge (except any taxes due and any charges to cover the cost of realising the assets), redeem those shares.

| Cut-off time for receiving orders at the financial service providers in Belgium <sup>(1)</sup><br><br>Date of published net asset value | Date the net asset value is calculated | Actual values used                                                                                                                                                                                                                                           | Date of payment or repayment of the orders |
|-----------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------|
| <b>D</b><br>(every banking day <sup>(2)</sup><br>at 2 pm CET)<br>also referred to as 'Dealing Day'                                      | <b>D+1 banking day</b>                 | <b>D</b> if maximum 20% of the actual values are already known on D<br>(every banking day <sup>(2)</sup><br>at 2 pm CET)<br><br><b>D+1</b> if more than 20% of the actual values are already known on D<br>(every banking day <sup>(2)</sup><br>at 2 pm CET) | <b>D+3 banking days</b>                    |

<sup>(1)</sup> The cut-off time for receiving orders stated above applies to orders investors place directly with the financial services providers in Belgium.

If an investor places an order with a financial institution other than the financial service providers in Belgium, he/she must find out from that institution what cut-off time (time + date) applies to the order he/she wishes to place so that the institution in question can take the necessary action to ensure that the order reaches the financial service providers in Belgium before 2 pm CET on day D in order to qualify as an order of day D.

<sup>(2)</sup> with the exception of banking days on which one or more markets on which more than 20% of the sub-fund's assets are listed are closed or if transactions are suspended or restricted.

### Calculation of the net asset value

The net asset value is calculated daily, as described above, except on days on which no shares may be issued or redeemed. Swing pricing may be applied as described in the 'Information concerning the Bevek – N. Liquidity management tools' section.

### Publication of the net asset value

The 'Information concerning the Bevek – I. Additional information – Publication of the net asset value' section specifies where the result of the calculation of the net asset value can be viewed.

If the profitability of the sub-fund is jeopardised due to a limited number of subscriptions during the initial subscription period (less than 5 000 000 euros), the Board of Directors of the Bevek may decide to refuse the orders placed during the initial subscription period and not to proceed with the commercialisation of the sub-fund.

## 5. Types of shares and fees and charges

---

Shares may be in registered or book-entry form, as the shareholder chooses. No certificates representing the registered shares are issued. Instead, confirmation is supplied of entry in the register of shareholders.

### Dividend payment

After the close of the financial year, the General Meeting determines the portion of the result, which, within the limitations imposed by the Law of 3 August 2012 relative to undertakings for collective investment complying with the conditions of Directive 2009/65/EC and the undertakings for investment in receivables, is to be paid to the holders of distribution shares.

The holders of capitalisation shares are not entitled to receive a dividend. The portion of the annual net income accruing to them is capitalised in favour of these shares.

The shareholders will receive payment within six months of the close of the financial year via institutions designated for this purpose by the General Meeting.

The General Meeting may decide to proceed to interim payments in accordance with the provisions of the law.

The Board of Directors may, in accordance with the provisions laid down in the articles of association and within the limits of the law, decide to pay out interim dividends.

The information on the type and/or class of shares and the fees and charges associated with them is set out below by type and/or share class.

<sup>1</sup> These are collective investment undertakings managed by KBC Asset Management NV or by another company associated with this management company.

<sup>2</sup> These include both professional investors as referred to in Annex A of the Royal Decree of June 3, 2007 laying down detailed rules transposing the Directive on Markets in financial instruments and legal persons who are not considered professional investors and who have asked to be registered in the register of eligible investors with the FSMA. Natural persons, as well as legal entities that are not part of eligible investors as defined above, do not have access to this share class.

**One-off fees and charges charged to the investor unless indicated otherwise, in the currency the sub-fund is denominated in or as a percentage of the net asset value per share**

# Information concerning the sub-fund Strategic Satellites Responsible Investing

## 1. Basic details

---

### Name

Strategic Satellites Responsible Investing

### Date of incorporation

26 March 1999

### Life

Unlimited

### Delegation of the management of the investment portfolio

There is no delegation of the management of the investment portfolio.

### Stock exchange listing

Not applicable.

## 2. Investment information

---

### Sub-fund's object

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

### Sub-fund's investment policy

#### *Permitted asset classes*

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

#### *Restrictions of the investment policy*

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

## Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. **Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.**

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

## Selected strategy

The sub-fund invests (directly or indirectly) in shares and/or share-related investment that may come from any region, sector or theme.

## Information related to Responsible Investing

Within the above limits, the sub-fund pursues responsible investment objectives based on a dualistic approach: a negative screening and a positive selection methodology.

KBC Asset Management NV has a team of specialist researchers responsible for this dualistic approach. They are assisted by an independent advisory board (the **"Responsible Investing Advisory Board"**) comprised of up to twelve persons, who are not affiliated to KBC Asset Management NV, and whose sole responsibility is to supervise the dualistic approach and activities of the specialist researchers. The secretariat of the advisory board is handled by a representative of KBC Asset Management NV. Moreover, KBC Asset Management NV works with data suppliers with expertise in Responsible Investing that provide data to the specialized researchers, who process and complete the data with publicly available information (including annual reports, press publications, etc.).

The sub-fund promotes a combination of environmental and/or social characteristics and, even though it does not have sustainable investments as an objective, it shall invest a minimum proportion of its assets in economic activities that contribute to the achievement of environmental or social objectives (i.e. 'sustainable investments').

The companies in which it invests must follow good governance practices.

The sub-fund is compliant with the transparency obligations of article 8(1) of Regulation (EU) 2019/2088 of the European Parliament and of the council of 27 November 2019 on sustainability-related disclosures in the financial services sector ('SFDR'). More information on how the sub-fund promotes environmental and/or social characteristics can be found in the 'Annex for KBC Equity Fund Strategic Satellites Responsible Investing' to the prospectus. This annex specifically covers the pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852.

In addition, the exclusions set out in Article 12(1)(a) to (g) of Delegated Regulation (EU) 2020/1818 ("Exclusions for Paris Agreement-aligned EU benchmarks") are respected by this sub-fund.

The sub-fund complies with the European Securities and Markets Authority (ESMA) guidelines on fund names using ESG or sustainability-related terms.

### Negative screening

In practical terms the end result of this negative screening procedure is that the sub-fund excludes companies in advance from the Responsible Investment universe which fall foul of the exclusion policy available on [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > Exclusion policy for Responsible Investing funds.

The application of these policies means that:

- companies involved in certain activities are excluded from the sub-fund's investment universe. A distinction can be made between companies that are excluded if they exceed a certain turnover threshold in relation to specific activities, such as conventional weapons, tobacco, gambling or adult entertainment, and those that are excluded outright because they are involved in specific activities, such as controversial weapons, agricultural commodities or the mining of thermal coal, among others.
- The sub-fund may nevertheless invest in companies involved in conventional weapons and/or nuclear weapons that exceed certain turnover thresholds, provided they are included on the whitelist as specified in the policy. The whitelist is a list drawn up by KBC Group and includes companies involved in conventional weapons and/or nuclear weapons, but which are nevertheless deemed acceptable as investments within funds that invest responsibly, taking into account factors such as the proportion of arms sales to non-NATO countries and a possible involvement in human rights controversies related to armed conflict.

This screening also ensures that companies who seriously violate fundamental principles of environmental protection, social responsibility and good governance, among others, are excluded from the sub-fund's investment universe.

More information regarding the specific exclusions can also be found in the "Annex for KBC Equity Fund Strategic Satellites Responsible Investing" to the prospectus.

These negative screening principles are not exhaustive and may be adapted from time to time under the supervision of the Responsible Investing Advisory Board.

#### Positive selection methodology

Within the defined investment universe and other limits described above, the responsible investment objectives of the sub-fund are the following:

- (1) promote the integration of sustainability into the policy decisions of companies by preferring companies with a better **ESG risk score**, where ESG stands for 'Environmental, Social and Governance', and
- (2) promote climate change mitigation, by preferring companies with lower **Greenhouse Gas Intensity**, with the objective of meeting a predetermined Greenhouse Gas intensity target;
- (3) support sustainable development, through 'sustainable investments' in accordance with art. 2(17) SFDR. Sustainable investments will consist of investments in companies contributing to the achievement of the **UN Sustainable Development Goals** (plus instruments awarded the 'sustainable development' label by KBC Asset Management NV on the advice of the Responsible Investing Advisory Board).

More information on the investment policy for Responsible Investing funds is available at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > Investment policy for Responsible Investing funds.

#### (1) ESG-risk score

The contribution to the integration of sustainability into policy decisions of the companies is measured based on an ESG-risk score. This score represents the aggregated performance assessment of a given company against a series of ESG criteria which are grounded to the extent possible against objective measures. The main factors underpinning the ESG criteria are:

- respect for the environment (e.g., reduction in greenhouse gas emissions);
- attention to society (e.g., employee working conditions); and
- corporate governance (e.g., independence and diversity of the board of directors).

At least 90% of the corporate investments in the portfolio, as measured by assets under management, must have an ESG risk score. The ESG risk score for companies is an ESG risk score supplied by a data provider, and based on internal research as well.

These lists are not exhaustive and may be changed under the supervision of the Responsible Investing Advisory Board.

To achieve this objective, the ESG-risk score of the portfolio for companies is compared to following benchmark: MSCI All Countries World - Net Return Index.

To calculate the ESG-risk score at portfolio level, the weighted average of the ESG (risk) scores of the positions in the sub-fund are taken into account. Technical items such as cash and derivatives are not taken into account and also companies or countries for which no data is available are left out. The weights used in the calculation depend on the size of the positions in the sub-fund, rescaled for these items.

More information on the ESG-risk score and the concrete goals of the sub-fund can be found in the 'Annex for KBC Equity Fund Strategic Satellites Responsible Investing' to the prospectus.

The targets can be revised upwards or downwards.

#### (2) Greenhouse Gas Intensity

The objective to promote climate change mitigation, by favoring lower greenhouse gas intensity companies, with the goal of meeting a predetermined greenhouse gas intensity target covers at least 90% of the portfolio. The objective does not apply to companies for which data is not available.

The contribution of companies to climate change mitigation is measured based on their greenhouse gas intensity. Greenhouse gas intensity is defined as absolute greenhouse gas emissions (in tonnes CO<sub>2</sub> equivalent), divided by revenues (in mln USD).

The sub-fund's target in terms of greenhouse gas intensity is assessed on two targets whereby the most strict of the

two will determine the target applied: 15% better than the benchmark MSCI All Countries World - Net Return Index and a reduction of 50% by 2030 compared to the benchmark MSCI All Countries World - Net Return Index in 2019. More information on Greenhouse Gas Intensity and the concrete goals of the sub-fund can be found in the 'Annex for KBC Equity Fund Strategic Satellites Responsible Investing' to the prospectus. The targets may be revised upwards or downwards.

### **(3) UN Sustainable Development Goals**

To support sustainable development, the sub-fund commits to invest a minimum proportion of the portfolio in companies that contribute to the UN Sustainable Development Goals. The UN Sustainable Development Goals include both social and environmental objectives.

Companies are considered to contribute to sustainable development when at least 20% of the revenues are linked to the UN Sustainable Development Goals. The activities of the companies are assessed on multiple sustainable themes that can be linked to the UN Sustainable Development Goals.

Instruments of companies that meet these requirements are designated as "sustainable investments," according to Article 2(17) SFDR.

In addition, KBC Asset Management NV can award the "sustainable development" label to instruments, on the advice of the Responsible Investing Advisory Board. In that case, these investments shall also qualify as "sustainable investments," according to Article 2(17) SFDR.

More information about the methodology used to qualify investments as investments which contribute to the UN Sustainable Development Goals can be found in the 'Annex for KBC Equity Fund Strategic Satellites Responsible Investing' to the prospectus.

### **Potential Exceptions**

It cannot be ruled out, however, that very limited investments may be made temporarily in assets that do not meet the above criteria. The reasons for this include the following:

- Developments as a result of which a company can no longer be regarded as eligible after purchase;
- Corporate events, such as a merger of one company with another, where the merged company can no longer be considered an eligible company based on the above criteria;
- Incorrect data as a result of which assets are invested (unintentionally and erroneously) in assets purchased when it should not have been eligible for the sub-fund;
- A planned update of the screening criteria as a result of which assets should be excluded from the sub-fund, but which the management company chooses to refrain from selling immediately in the best interest of the customer;
- External circumstances such as market movements and updates of external data can lead to investment solutions failing to achieve the abovementioned targets.

In these cases, the fund manager will replace the assets concerned with more appropriate assets as soon as possible, always taking into account the sole interest of the investor.

In addition, for the purpose of efficient portfolio management, the fund manager may to a significant degree use derivatives relating to assets that would not be eligible for inclusion in the sub-fund, in so far as there is no serviceable and comparable alternative available on the market. In addition, the counterparties with which the derivative transactions are entered into may not necessarily be issuers having a responsible nature.

### **Taxonomy related information**

At the date of this prospectus, the sub-fund does not commit to invest a minimum proportion of its assets in environmentally sustainable economic activities which contribute to any of the environmental objectives set out in Article 9 of the Regulation (EU) 2020/852 of the European Parliament and of the Council of 18 June 2020 on the establishment of a framework to facilitate sustainable investment ('EU Taxonomy Framework'). The minimum proportion of investments in environmentally sustainable economic activities within the meaning of the EU Taxonomy Framework is 0%. This will be monitored on a regular basis and as soon as sufficiently reliable, timely and verifiable data from issuers or invested companies is available, the prospectus may be updated.

Non-financial companies are considered to contribute to sustainable development if at least 20% of sales are aligned to the EU Taxonomy Framework based on Trucost data. For companies in the financial sector, a different methodology applies. For credit institutions, the alignment with the EU Taxonomy Framework is based on the Green Asset Ratio, while for other financial companies the alignment with the EU Taxonomy Framework is based on the alignment of their investment portfolios. Instruments of companies that meet these requirements are referred to as "sustainable investments," according to art. 2(17) SFDR. More information on the percentage in the portfolio that was considered "sustainable investments with an environmental objective aligned with the EU Taxonomy Framework" based on this criterion during the reporting period, can be found in the annual reports for this sub-fund.

More information on the EU Taxonomy Framework can be found in the 'Annex for KBC Equity Fund Strategic Satellites Responsible Investing' to the prospectus.

### **Transparency of adverse sustainability impacts**

The sub-fund considers the principal adverse impacts of its investment decisions on sustainability factors by taking into account the principal adverse impact indicators ('PAI'), as described in the Regulation (EU) 2019/2088 of the

European Parliament and of the Council of 27 November 2019 on sustainability disclosure in the financial services sector ('SFDR').

The principal adverse impacts on sustainability factors are explicitly taken into account through the General exclusion policy for conventional and Responsible Investing funds and the exclusion policy for Responsible Investing funds. More information on the principal adverse impact indicators taken into account can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > General exclusion policy for conventional and Responsible Investing funds and [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > Exclusion policy for Responsible Investing funds.

In addition, the principal adverse impacts on sustainability factors are implicitly taken into account through the Proxy Voting and Engagement Policy of KBC Asset Management NV (more information can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > Retrospective Proxy Voting - overview > Proxy Voting and Engagement Policy).

More information on how the sub-fund aims to consider the principal adverse impacts on sustainability factors can also be found in the 'Annex for KBC Equity Fund Strategic Satellites Responsible Investing' to the prospectus. A statement on how the sub-fund has considered the principal adverse impacts on sustainability factors during the reporting period can also be found in the annual reports for this sub-fund.

### **Benchmark information**

The fund is actively managed without referring to any benchmark.

The responsible character is guaranteed by the aforementioned Responsible Investing methodology.

### **Volatility of the net asset value**

The volatility of the net asset value may be high due to the composition of the portfolio.

## 3. Risk

### Sub-fund's risk profile

Investors must take note of the specific risk factors set out below, the description of the risks given under the heading 'Information concerning the Bevek - F.Information on the risk profile of the UCITS', and the 'What are the risks and what could I get in return?' section of the key information document.

Summary table of risks assessed by the sub-fund:

| Risk type                 | Concise definition of the risk                                                                                                      |          | Explanation:                                                                                                                                                                                                      |
|---------------------------|-------------------------------------------------------------------------------------------------------------------------------------|----------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Market risk               | The risk that the entire market of an asset class will decline, thus affecting the prices and values of the assets in the portfolio | high     | the level of the risk reflects the volatility of the stock market.                                                                                                                                                |
| Credit risk               | The risk that an issuer or a counterparty will default                                                                              | low      |                                                                                                                                                                                                                   |
| Settlement risk           | The risk that settlement of a transaction via a payment system will not take place as expected                                      | low      |                                                                                                                                                                                                                   |
| Liquidity risk            | The risk that a position cannot be liquidated in a timely manner at a reasonable price                                              | low      |                                                                                                                                                                                                                   |
| Exchange or currency risk | The risk that the value of an investment will be affected by changes in exchange rates                                              | high     | since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates. |
| Custody risk              | The risk of loss of assets held in custody with a custodian or sub-custodian                                                        | low      |                                                                                                                                                                                                                   |
| Concentration risk        | The risk relating to a large concentration of investments in specific assets or in specific markets                                 | low      |                                                                                                                                                                                                                   |
| Performance risk          | Risks to return                                                                                                                     | high     | the level of the risk reflects the volatility of the stock market.                                                                                                                                                |
| Capital risk              | Risks to capital                                                                                                                    | moderate | There is no capital protection.                                                                                                                                                                                   |
| Flexibility risk          | Inflexibility both within the product and constraints on switching to other providers                                               | none     |                                                                                                                                                                                                                   |
| Inflation risk            | Risk of inflation                                                                                                                   | low      |                                                                                                                                                                                                                   |
| Environmental factors     | Uncertainty regarding the immutability of environmental factors, such as the tax regime                                             | low      |                                                                                                                                                                                                                   |

### Risk profile of the typical investor

Profile of the typical investor for which the sub-fund has been designed : Highly dynamic profile.

The risk profile mentioned per sub-fund has been determined from the point of view of an investor in the euro area and may differ from that of an investor in other currency zones. More information on the risk profiles can be obtained at [www.kbc.be/riskprofile](http://www.kbc.be/riskprofile).

## 4. Information concerning the trading of shares

### How to buy and sell shares and switch between sub-funds

If it turns out that shares are being held by persons other than those permitted to hold them, the Company may, in accordance with article 8.2 of the articles of association, and without charge (except any taxes due and any charges to cover the cost of realising the assets), redeem those shares.

| Cut-off time for receiving orders at the financial service providers in Belgium <sup>(1)</sup><br><br>Date of published net asset value | Date the net asset value is calculated | Actual values used                                                                                                                                                                                                                                     | Date of payment or repayment of the orders |
|-----------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------|
| <b>D</b><br>(every banking day <sup>(2)</sup> at 2 pm CET)<br>also referred to as 'Dealing Day'                                         | <b>D+1 banking day</b>                 | <b>D</b> if maximum 20% of the actual values are already known on D<br>(every banking day <sup>(2)</sup> at 2 pm CET)<br><br><b>D+1</b> if more than 20% of the actual values are already known on D<br>(every banking day <sup>(2)</sup> at 2 pm CET) | <b>D+3 banking days</b>                    |

<sup>(1)</sup> The cut-off time for receiving orders stated above applies to orders investors place directly with the financial services providers in Belgium.

If an investor places an order with a financial institution other than the financial service providers in Belgium, he/she must find out from that institution what cut-off time (time + date) applies to the order he/she wishes to place so that the institution in question can take the necessary action to ensure that the order reaches the financial service providers in Belgium before 2 pm CET on day D in order to qualify as an order of day D.

<sup>(2)</sup> with the exception of banking days on which one or more markets on which more than 20% of the sub-fund's assets are listed are closed or if transactions are suspended or restricted.

### Calculation of the net asset value

The net asset value is calculated daily, as described above, except on days on which no shares may be issued or redeemed. Swing pricing may be applied as described in the 'Information concerning the Bevek – N. Liquidity management tools' section.

### Publication of the net asset value

The 'Information concerning the Bevek – I. Additional information – Publication of the net asset value' section specifies where the result of the calculation of the net asset value can be viewed.

## 5. Types of shares and fees and charges

---

Shares may be in registered or book-entry form, as the shareholder chooses. No certificates representing the registered shares are issued. Instead, confirmation is supplied of entry in the register of shareholders.

### Dividend payment

After the close of the financial year, the General Meeting determines the portion of the result, which, within the limitations imposed by the Law of 3 August 2012 relative to undertakings for collective investment complying with the conditions of Directive 2009/65/EC and the undertakings for investment in receivables, is to be paid to the holders of distribution shares.

The holders of capitalisation shares are not entitled to receive a dividend. The portion of the annual net income accruing to them is capitalised in favour of these shares.

The shareholders will receive payment within six months of the close of the financial year via institutions designated for this purpose by the General Meeting.

The General Meeting may decide to proceed to interim payments in accordance with the provisions of the law.

The Board of Directors may, in accordance with the provisions laid down in the articles of association and within the limits of the law, decide to pay out interim dividends.

The information on the type and/or class of shares and the fees and charges associated with them is set out below by type and/or share class.

# Information concerning the sub-fund Trends Responsible Investing

## 1. Basic details

---

### Name

Trends Responsible Investing

### Date of incorporation

26 February 1999

### Life

Unlimited

### Delegation of the management of the investment portfolio

There is no delegation of the management of the investment portfolio.

### Stock exchange listing

Not applicable.

## 2. Investment information

---

### Sub-fund's object

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

### Sub-fund's investment policy

#### *Permitted asset classes*

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

#### *Restrictions of the investment policy*

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

## Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. **Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.**

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

## Selected strategy

The sub-fund invests primarily in shares of companies operating in areas which, according to the manager, fit with the theme 'challenges and opportunities that will apply during this and subsequent decades'. The manager focuses mainly on shares of companies whose activities focus on long-term trends of transformative technologies, climate change, scarcity of natural resources, mismatch of skills, urbanization and changing lifestyles.

## Information related to Responsible Investing

Within the above limits, the sub-fund pursues responsible investment objectives based on a dualistic approach: a negative screening and a positive selection methodology.

KBC Asset Management NV has a team of specialist researchers responsible for this dualistic approach. They are assisted by an independent advisory board (the "**Responsible Investing Advisory Board**") comprised of up to twelve persons, who are not affiliated to KBC Asset Management NV, and whose sole responsibility is to supervise the dualistic approach and activities of the specialist researchers. The secretariat of the advisory board is handled by a representative of KBC Asset Management NV. Moreover, KBC Asset Management NV works with data suppliers with expertise in Responsible Investing that provide data to the specialized researchers, who process and complete the data with publicly available information (including annual reports, press publications, etc.).

The sub-fund promotes a combination of environmental and/or social characteristics and, even though it does not have sustainable investments as an objective, it shall invest a minimum proportion of its assets in economic activities that contribute to the achievement of environmental or social objectives (i.e. 'sustainable investments').

The companies in which it invests must follow good governance practices.

The sub-fund is compliant with the transparency obligations of article 8(1) of Regulation (EU) 2019/2088 of the European Parliament and of the council of 27 November 2019 on sustainability-related disclosures in the financial services sector ('SFDR'). More information on how the sub-fund promotes environmental and/or social characteristics can be found in the 'Annex for KBC Equity Fund Trends Responsible Investing' to the prospectus. This annex specifically covers the pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852.

In addition, the exclusions set out in Article 12(1)(a) to (g) of Delegated Regulation (EU) 2020/1818 ("Exclusions for Paris Agreement-aligned EU benchmarks") are respected by this sub-fund.

The sub-fund complies with the European Securities and Markets Authority (ESMA) guidelines on fund names using ESG or sustainability-related terms.

### Negative screening

In practical terms the end result of this negative screening procedure is that the sub-fund excludes companies in advance from the Responsible Investment universe which fall foul of the exclusion policy available on [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > Exclusion policy for Responsible Investing funds.

The application of these policies means that:

- companies involved in certain activities are excluded from the sub-fund's investment universe. A distinction can be made between companies that are excluded if they exceed a certain turnover threshold in relation to specific activities, such as conventional weapons, tobacco, gambling or adult entertainment, and those that are excluded outright because they are involved in specific activities, such as controversial weapons, agricultural commodities or the mining of thermal coal, among others.
- The sub-fund may nevertheless invest in companies involved in conventional weapons and/or nuclear weapons that exceed certain turnover thresholds, provided they are included on the whitelist as specified in the policy. The whitelist is a list drawn up by KBC Group and includes companies involved in conventional weapons and/or nuclear weapons, but which are nevertheless deemed acceptable as investments within funds that invest responsibly, taking into account factors such as the proportion of arms sales to non-NATO countries and a possible involvement in human rights controversies related to armed conflict.

This screening also ensures that companies who seriously violate fundamental principles of environmental protection, social responsibility and good governance, among others, are excluded from the sub-fund's investment universe.

More information regarding the specific exclusions can also be found in the "Annex for KBC Equity Fund Trends Responsible Investing" to the prospectus.

These negative screening principles are not exhaustive and may be adapted from time to time under the supervision of the Responsible Investing Advisory Board.

#### Positive selection methodology

Within the defined investment universe and other limits described above, the responsible investment objectives of the sub-fund are the following:

- (1) promote the integration of sustainability into the policy decisions of companies by preferring companies with a better **ESG risk score**, where ESG stands for 'Environmental, Social and Governance', and
- (2) promote climate change mitigation, by preferring companies with lower **Greenhouse Gas Intensity**, with the objective of meeting a predetermined Greenhouse Gas intensity target;
- (3) support sustainable development, through 'sustainable investments' in accordance with art. 2(17) SFDR. Sustainable investments will consist of investments in companies contributing to the achievement of the **UN Sustainable Development Goals** (plus instruments awarded the 'sustainable development' label by KBC Asset Management NV on the advice of the Responsible Investing Advisory Board).

More information on the investment policy for Responsible Investing funds is available at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > Investment policy for Responsible Investing funds.

#### (1) ESG-risk score

The contribution to the integration of sustainability into policy decisions of the companies is measured based on an ESG-risk score. This score represents the aggregated performance assessment of a given company against a series of ESG criteria which are grounded to the extent possible against objective measures. The main factors underpinning the ESG criteria are:

- respect for the environment (e.g., reduction in greenhouse gas emissions);
- attention to society (e.g., employee working conditions); and
- corporate governance (e.g., independence and diversity of the board of directors).

At least 90% of the corporate investments in the portfolio, as measured by assets under management, must have an ESG risk score. The ESG risk score for companies is an ESG risk score supplied by a data provider, and based on internal research as well.

These lists are not exhaustive and may be changed under the supervision of the Responsible Investing Advisory Board.

To achieve this objective, the ESG-risk score of the portfolio for companies is compared to following benchmark: MSCI All Countries World - Net Return Index.

To calculate the ESG-risk score at portfolio level, the weighted average of the ESG (risk) scores of the positions in the sub-fund are taken into account. Technical items such as cash and derivatives are not taken into account and also companies or countries for which no data is available are left out. The weights used in the calculation depend on the size of the positions in the sub-fund, rescaled for these items.

More information on the ESG-risk score and the concrete goals of the sub-fund can be found in the 'Annex for KBC Equity Fund Trends Responsible Investing' to the prospectus.

The targets can be revised upwards or downwards.

#### (2) Greenhouse Gas Intensity

The objective to promote climate change mitigation, by favoring lower greenhouse gas intensity companies, with the goal of meeting a predetermined greenhouse gas intensity target covers at least 90% of the portfolio. The objective does not apply to companies for which data is not available.

The contribution of companies to climate change mitigation is measured based on their greenhouse gas intensity. Greenhouse gas intensity is defined as absolute greenhouse gas emissions (in tonnes CO<sub>2</sub> equivalent), divided by revenues (in mln USD).

The sub-fund's target in terms of greenhouse gas intensity is assessed on two targets whereby the most strict of the

two will determine the target applied: 15% better than the benchmark MSCI All Countries World - Net Return Index and a reduction of 50% by 2030 compared to the benchmark MSCI All Countries World - Net Return Index in 2019. More information on Greenhouse Gas Intensity and the concrete goals of the sub-fund can be found in the 'Annex for KBC Equity Fund Trends Responsible Investing' to the prospectus. The targets may be revised upwards or downwards.

### **(3) UN Sustainable Development Goals**

To support sustainable development, the sub-fund commits to invest a minimum proportion of the portfolio in companies that contribute to the UN Sustainable Development Goals. The UN Sustainable Development Goals include both social and environmental objectives.

Companies are considered to contribute to sustainable development when at least 20% of the revenues are linked to the UN Sustainable Development Goals. The activities of the companies are assessed on multiple sustainable themes that can be linked to the UN Sustainable Development Goals.

Instruments of companies that meet these requirements are designated as "sustainable investments," according to Article 2(17) SFDR.

In addition, KBC Asset Management NV can award the "sustainable development" label to instruments, on the advice of the Responsible Investing Advisory Board. In that case, these investments shall also qualify as "sustainable investments," according to Article 2(17) SFDR.

More information about the methodology used to qualify investments as investments which contribute to the UN Sustainable Development Goals can be found in the 'Annex for KBC Equity Fund Trends Responsible Investing' to the prospectus.

### **Potential Exceptions**

It cannot be ruled out, however, that very limited investments may be made temporarily in assets that do not meet the above criteria. The reasons for this include the following:

- Developments as a result of which a company can no longer be regarded as eligible after purchase;
- Corporate events, such as a merger of one company with another, where the merged company can no longer be considered an eligible company based on the above criteria;
- Incorrect data as a result of which assets are invested (unintentionally and erroneously) in assets purchased when it should not have been eligible for the sub-fund;
- A planned update of the screening criteria as a result of which assets should be excluded from the sub-fund, but which the management company chooses to refrain from selling immediately in the best interest of the customer;
- External circumstances such as market movements and updates of external data can lead to investment solutions failing to achieve the abovementioned targets.

In these cases, the fund manager will replace the assets concerned with more appropriate assets as soon as possible, always taking into account the sole interest of the investor.

In addition, for the purpose of efficient portfolio management, the fund manager may to a significant degree use derivatives relating to assets that would not be eligible for inclusion in the sub-fund, in so far as there is no serviceable and comparable alternative available on the market. In addition, the counterparties with which the derivative transactions are entered into may not necessarily be issuers having a responsible nature.

### **Taxonomy related information**

At the date of this prospectus, the sub-fund does not commit to invest a minimum proportion of its assets in environmentally sustainable economic activities which contribute to any of the environmental objectives set out in Article 9 of the Regulation (EU) 2020/852 of the European Parliament and of the Council of 18 June 2020 on the establishment of a framework to facilitate sustainable investment ('EU Taxonomy Framework'). The minimum proportion of investments in environmentally sustainable economic activities within the meaning of the EU Taxonomy Framework is 0%. This will be monitored on a regular basis and as soon as sufficiently reliable, timely and verifiable data from issuers or invested companies is available, the prospectus may be updated.

Non-financial companies are considered to contribute to sustainable development if at least 20% of sales are aligned to the EU Taxonomy Framework based on Trucost data. For companies in the financial sector, a different methodology applies. For credit institutions, the alignment with the EU Taxonomy Framework is based on the Green Asset Ratio, while for other financial companies the alignment with the EU Taxonomy Framework is based on the alignment of their investment portfolios. Instruments of companies that meet these requirements are referred to as "sustainable investments," according to art. 2(17) SFDR. More information on the percentage in the portfolio that was considered "sustainable investments with an environmental objective aligned with the EU Taxonomy Framework" based on this criterion during the reporting period, can be found in the annual reports for this sub-fund.

More information on the EU Taxonomy Framework can be found in the 'Annex for KBC Equity Fund Trends Responsible Investing' to the prospectus.

### **Transparency of adverse sustainability impacts**

The sub-fund considers the principal adverse impacts of its investment decisions on sustainability factors by taking into account the principal adverse impact indicators ('PAI'), as described in the Regulation (EU) 2019/2088 of the

European Parliament and of the Council of 27 November 2019 on sustainability disclosure in the financial services sector ('SFDR').

The principal adverse impacts on sustainability factors are explicitly taken into account through the General exclusion policy for conventional and Responsible Investing funds and the exclusion policy for Responsible Investing funds. More information on the principal adverse impact indicators taken into account can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > General exclusion policy for conventional and Responsible Investing funds and [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > Exclusion policy for Responsible Investing funds.

In addition, the principal adverse impacts on sustainability factors are implicitly taken into account through the Proxy Voting and Engagement Policy of KBC Asset Management NV (more information can be found at [www.kbc.be/investment-legal-documents](http://www.kbc.be/investment-legal-documents) > Retrospective Proxy Voting - overview > Proxy Voting and Engagement Policy).

More information on how the sub-fund aims to consider the principal adverse impacts on sustainability factors can also be found in the 'Annex for KBC Equity Fund Trends Responsible Investing' to the prospectus. A statement on how the sub-fund has considered the principal adverse impacts on sustainability factors during the reporting period can also be found in the annual reports for this sub-fund.

### **Benchmark information**

The fund is actively managed without referring to any benchmark.

The responsible character is guaranteed by the aforementioned Responsible Investing methodology.

#### Required disclaimers for benchmark providers:

Source: MSCI. No MSCI Party nor any other party involved in or related to compiling, computing or creating the MSCI data, makes any express or implied warranties or representations with respect to such data (or the results to be obtained by the use thereof), and all such parties hereby expressly disclaim all warranties of originality, accuracy, completeness, merchantability or fitness for a particular purpose with respect to any of such data. Without limiting any of the foregoing, in no event shall MSCI, any of its affiliates, or any third party involved in compiling, computing, or creating the data have any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages. No further distribution or dissemination of the MSCI data is permitted without MSCI's express written consent.

### **Volatility of the net asset value**

The volatility of the net asset value may be high due to the composition of the portfolio.

## 3. Risk

### Sub-fund's risk profile

Investors must take note of the specific risk factors set out below, the description of the risks given under the heading 'Information concerning the Bevek - F.Information on the risk profile of the UCITS', and the 'What are the risks and what could I get in return?' section of the key information document.

Summary table of risks assessed by the sub-fund:

| Risk type                 | Concise definition of the risk                                                                                                      |                                                      | Explanation:                                                                                                                                                                                                              |
|---------------------------|-------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Market risk               | The risk that the entire market of an asset class will decline, thus affecting the prices and values of the assets in the portfolio | high                                                 | the level of the risk reflects the volatility of the stock market.                                                                                                                                                        |
| Credit risk               | The risk that an issuer or a counterparty will default                                                                              | low                                                  |                                                                                                                                                                                                                           |
| Settlement risk           | The risk that settlement of a transaction via a payment system will not take place as expected                                      | low                                                  |                                                                                                                                                                                                                           |
| Liquidity risk            | The risk that a position cannot be liquidated in a timely manner at a reasonable price                                              | low                                                  |                                                                                                                                                                                                                           |
| Exchange or currency risk | The risk that the value of an investment will be affected by changes in exchange rates                                              | For the share class Classic Shares : high            | since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.         |
|                           |                                                                                                                                     | For the share class Institutional B Shares : high    | since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.         |
|                           |                                                                                                                                     | For the share class Institutional F Shares LU : high | since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.         |
|                           |                                                                                                                                     | For the share class Classic Shares CSOB CZK : high   | since there are investments in securities that are denominated in currencies other than the Czech Koruna, there is a considerable chance that the value of an investment will be affected by movements in exchange rates. |
| Custody risk              | The risk of loss of assets held in custody with a custodian or sub-custodian                                                        | low                                                  |                                                                                                                                                                                                                           |

|                       |                                                                                                     |          |                                                                                                                                                                                      |
|-----------------------|-----------------------------------------------------------------------------------------------------|----------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Concentration risk    | The risk relating to a large concentration of investments in specific assets or in specific markets | moderate | there is a concentration of the investments in the shares of companies involved in the theme 'the challenges and opportunities that lie ahead in this decade and the decades ahead'. |
| Performance risk      | Risks to return                                                                                     | high     | the level of the risk reflects the volatility of the stock market.                                                                                                                   |
| Capital risk          | Risks to capital                                                                                    | moderate | There is no capital protection.                                                                                                                                                      |
| Flexibility risk      | Inflexibility both within the product and constraints on switching to other providers               | none     |                                                                                                                                                                                      |
| Inflation risk        | Risk of inflation                                                                                   | low      |                                                                                                                                                                                      |
